stood. Christian Science accepts the term divine Mind as most expressive of the omnipotence, omnipresence, and omniscience of this God who is infinite good, and who, as the Scriptures declare, is Spirit and is Love.

If this basis is accepted, logical reasoning therefrom can only bring us to one conclusion, viz., a spiritual and perfect universe, and normal man as the perfect idea of his perfect creator. Any concept of God or of man which is less than perfect is the result of false education or environment, the deception of erroneous material theories and the penalty for failure to realize man's God-given dominion. Christian Science declares that all disease, suffering, and their dolorous concomitants are phenomena of mental procurement and the results either of individual or racial sin, ignorance, or fear; that they are not of God, have no Principle or scientific basis, and exist wholly in the realm of a supposititious or mortal consciousness, and that they are therefore abnormal, illegitimate, unnecessary, and destructible.

Jesus said that salvation or freedom comes to mortals through knowing the truth. He also said that those who understood his teaching should not only duplicate his works, but should perform even greater works, because he went "to the Father"—to the divine Mind, the source of infinite Truth or knowledge, and he applied this knowledge in solving the problems of human existence in fulfilment of his mission. This process of applying God's law to the beliefs of human experience is today the modus of Christian Science practice, whereby health is proven to be entirely a condition of mind. Christian Science vindicates its claim to be Christian because of the Christliness of its practice. The Founder of Christianity declared that those who loved him, and therefore those who were entitled to call themselves his followers, or Christians, were those who obeyed him; and among other commands, universal and confined to no age, was his injunction to heal the sick and cast out devils. It vindicates its claim to be Science on the ground that all true Science must be the orderly arrangement of ascertained facts about that which is real. Christian Science maintains that there is nothing to know but Deity and His creation. True Science must then begin with a correct, comprehensive, complete knowledge of God, and must end with a full understanding of God's creation.

Christian Science is not guesswork, neither is it faith-cure in the sense that it is either fanatical or emotional in its inception or *modus operandi*. Christian Science practice is definite, precise, and systematic. It works according to law and is both rational and philosophical. The abstract statement, "There is no matter," needs the fuller explanations given in the Christian Science text-book. This teaching does not imply that all phenomena are unreal and that man has no body, but that creation is not what it seems to that mind which has not been instructed out of the material and into the spiritual concept of these. All things in creation from the smallest to the greatest are real, but exist as the product of Spirit or Mind, and are not material. Matter is the belief that spiritual creations are material. This belief is untrue; hence the declaration, "There is no matter." Thus it is noted that Science does not deny creation itself, but the false material concept thereof. The difficulty with critics in wrestling over this problem is that they do not perceive what Christian Science gives in return for that which it repudiates.

While Christian Scientists differ from others in their understanding of the nature of sickness, sin, and matter, they believe that these exist in erroneous mortal experience and must be grappled with and overcome through divine power. Bodily disease is as real as the sinner makes it by his indulgence. If in our prayers or meditations God becomes to us infinitely great, the troubles of earth must become infinitesimal, for though they may be mountains to mortals, they weigh nothing in the sight of omnipotent God.

[Rev. G. A. Kratzer in the *Fitchburg* (Mass.) *Sentinel*.]

Our brother's sermon, while setting forth much that is true, befogs one fundamental fact and rule of procedure which should never be lost sight of, and that is the fact that Christ Jesus never employed drugs in healing, never employed anybody to make any diagnosis of diseases from a material standpoint, and never commanded his disciples to employ drugs or to have such diagnosis made, but he did command them to rely wholly on their faith, their knowledge of God, Spirit, and of the ever-living, ever-present Christ. Christ Jesus is, or ought to be, supreme authority for all Christians; and they should be content to follow his command, even if they cannot see the reason; but in this case the reason is easily discernible. All Christians agree that God is all-powerful; and God is clearly revealed in the Scriptures to be Spirit, and Spirit only. Hence, it is necessarily true that Spirit is all-powerful, therefore it is impossible that there should be any power in matter, which is opposite to Spirit. Spirit, God, cannot and does not use that which is opposite, opposed to Him, as an avenue to do His work. Hence, to say that God is all-powerful, and then to recommend the employment of material remedies for the treatment of disease, is inconsistency for which a harsher word might well be substituted, were it not for the fact that the inconsistency is usually not perceived and not intended.

A man who is not loyal to his wife "for worse" as well as "for better," as long as she is a true wife, is not regarded as a good or a right-minded husband. Likewise, a person who is not loyal to Spirit for both the "better" and the "worse" of human experience, hardly lives up to the Biblical requirements of a Christian. That ancient worthy, Job, furnishes us an excellent model in this respect. A person who will not rely upon the power of God, Spirit, as the only proper medicine at any and all stages of disease, to the extent that he does not do so, is not loyal to the exact knowledge and procedure which constitutes the Science of Christianity; and the modern movement known as Christian Science, which stands in this age for scientific Christianity, cannot properly be held responsible for whatever may befall any one who departs from this rule.

Christian Science does not recognize any such thing as subconscious mind, or unconscious mind, or mortal mind, except as false claims. God is the source of all intelligence, and He is immortal Mind, and ever-conscious Mind. He is not the source of any mortal, or unconscious, or subconscious mind. Hence, Christian Science never works, cannot work, through the avenue of any subconscious mind, and it never works by suggestion emanating from a human source. Its disciples know and declare the truth about God and man, in order that mortals may be made free from their sins and sicknesses, without distinction as to whether the diseases are called organic or inorganic, from a human standpoint. The Lord Jesus healed "all manner of disease;" his immediate disciples did likewise; and such healing is being done by his modern disciples, known as Christian Scientists, past all manner of question, even though they do not succeed in healing every case that they undertake. The percentage of cases which they do benefit and heal is very large.

[Frederick Dixon in *The Baptist*, London, England.]

It is part of the fundamental teaching of Christian Science that there is no such thing as Christian psychology. Such a theory inevitably ends in making God responsible for all that is unlike Himself.

Even if the claims of Christian Science are ultimately justified, says our critic, "it will yet remain to be shown that the system is one of wide application, owing to the fact that many persons do not seem to be susceptible to

Digitized by Google

suggestion." It would be difficult to illustrate more clearly what Mrs. Eddy means in writing, on page 28 of Science and Health, of "the determination to hold Spirit in the grasp of matter." Our critic has written a book in which she consistently insists on referring Christian Science healing not to prayer, but to hypnotic suggestion in one or another of its many variants, and as a result she has produced a parody of the teaching she professes to elucidate. She apparently sees no contradiction between Christian healing and healing by suggestion, but Science and Health, the text-book of Christian Science, is one sustained protest against the theory that the human mind is a healing factor at all. If it were, it could indeed be said that the same fountain does bring forth sweet water and bitter, since no one has yet been found to maintain that the human mind does not also produce sickness and sin. It is just this idea which is alluded to in Genesis as the fruit of the tree of knowledge of good and evil, the result of eating which is described as death.

Jesus said, "A good tree cannot bring forth evil fruit, neither can a corrupt tree bring forth good fruit." Christian Science, accepting the teaching of Jesus, asserts that, this being so, any healing which may seem to result from the action of the human mind cannot be other than a tempered form of evil, which is essentially evil in itself. Our philosopher-critic has fallen into the same mistake as the philosopher who declared that vice in losing all its coarseness had lost half its danger. The moral sense of Burke's countrymen revolted from the hideous fallacy of that oratorical epigram; and the moral sense of the country will as surely revolt from the claim that there is any true healing to be gained from hypnotic suggestion, when it grasps what hypnotic suggestion means. Evil is no more power in an attenuated than in a robust form, even as vice was no less dangerous on the terraces at Versailles than amidst the squalor of St. Antoine. The only true thing that can be said of evil is that it is a lie; the only semblance of power it can ever manifest is the illusion produced by being deceived by a lie.

Jesus said, "Ye shall know the truth, and the truth shall make you free;" and what is it to know the truth, but to have in some measure, great or small, the Mind which was in Christ Jesus?

[C. R. Munro in the *Hamilton* (Ont.) *Spectator*.]

Our critic writes, "The Christian Scientist says that it is not necessary to know the origin of disease in order to cure it." This is not a fact, for Christian Science insists on the absolute necessity of knowing and understanding the cause of disease, and that only by such knowledge can the disease be destroyed. True, the Christian Scientist differs with the materialist as to the origin of disease, which he believes to be mental, not material, and believes that those who look entirely to matter for the cause of disease are looking rather at the effect than the cause. Christian Science, on the contrary, in working on the assumption that disease is of mental origin, is striking at the very root of the trouble, and the wonderful success of this Science, in the healing of all manner of sickness, is proof that its teachings on this line are correct.

[E. M. Ramsay in the *Weekly Scotsman*, Edinburgh.]

Christian Science accepts unreservedly the teachings of Jesus Christ, and regards him as the Wayshower and Saviour of the world. It looks upon God not as an incomprehensible, mysterious, and far-away Deity, whom man should worship but may never hope to understand, but as a being whose very essence is Truth and whose eternal mandate is, "Let there be light."

If it is the knowledge of the truth which makes men free, is it not natural to infer that all the woes of the race must proceed from an imperfect and insufficient knowledge of truth, of causation, of God? This is just what Christian Science teaches. It declares that we have not known enough to be good, well, or happy, and that what is required is a transformation of consciousness; that we must get rid of the ignorant, unsatisfactory, and unsatisfying thoughts we have entertained, and strive for that Mind which was in Christ. Further, it maintains that man, left to the guidance of the erring human intelligence, cannot accurately discriminate between the true and the false, does not know enough of the nature of good to be consciously governed by God. Nothing but Christian Science, the Science of Life, of good, of absolute Truth, can enable us to grasp for ourselves the great facts of existence and find God a very present help in trouble.

[From an editorial in the *Dallas County* (Adel, Ia.) *News*.]

For hundreds of years the church has been its own worst enemy and has neutralized its efforts by its own blindness. Denominations have fought each other harder than they have fought the devil. They have delighted more in undoing each other than in doing good. Fortunately those days are passing and "truth" begins to reveal itself as something that incites charity; that breeds brotherly love; that recognizes the liberty of conscience; that ceases to sit in judgment; that wishes no evil, but wishes universal good; that rejoices to see men made better and lifted higher. Men are beginning to rejoice to see these things, and to admit that a man may be a brother Christian though each may see a different side of "truth" and have a different conception of what it is. Charity, which is the highest expression of real religion, is casting its mantle over men's minds, and men can see good where once they saw only evil. The "truth" that will finally prevail will be broad enough for men to grasp it, even though each only comprehends a fragment of its true essence. And this is what is making the world better and religion more vitally true. The real Christian of today is more known for open-handed charity than for long prayers, more clearly recognized in brotherly love and charity than in bigoted zeal born of hate.

Before we judge and condemn or refuse a fellow-creature who needs help of any sort, let us first put ourselves in that fellow-creature's place, and read the Golden Rule which must be written upon our hearts if we are honestly desirous of obeying the Master's command. Let us turn no one away with the remark, "God is the source of all supply, and it is available to all who do right." This is true, but let us make sure that we ourselves are doing right, are mindful of the possibility that we are to be the channels for conveying that supply. We are all one in our need of the bestowments of divine Love. The Master fed all the multitude, both the just and the unjust. Love and charity are at-one, they go hand in hand. If we let the love for our fellow-man whom we have seen fill our hearts and impel our acts, we shall be led aright in all things and learn to understand God's ways,—Him whom we have not seen. In our charity it is well to remember the old Scotch adage, "When justice is doubtful, lean to the side of mercy." Generosity is a lovable element of character. It proves in a great degree that one trusts and loves God.

CHRISTIAN SCIENCE SENTINEL

EDITORIAL

MRS. EDDY TAKES NO PATIENTS.

The author of the Christian Science text-book takes no patients, and reads no letters on disease, distress, or error of any kind. Reliable news concerning Mrs. Eddy will be found in the Christian Science publications.

"FREEDOM TO WORSHIP GOD."

ABILITY to maintain at all times the proper relation between teacher and student seems to be one of the hardest problems with which many Christian Scientists are confronted, and doubtless much of the misunderstanding and friction which unfortunately exist in some fields is due to a failure on the part of both teacher and students to adjust themselves to a sensible working basis, one that recognizes the individuality of each party and the necessity for maintaining this individuality. That this failure is due to thoughtlessness is true in some instances, but not in all.

There is a peculiar trait of human nature which, when not governed by divine Mind, seems to impel some persons to seek personal adulation, and to exercise more or less of personal domination over those with whom they are brought into close touch. This same trait is also apparent in others in an inverted form, and through it is furnished the desired adulation and the willingness to be dominated. It should be needless to say that neither phase of this trait can be the groundwork for a demonstration of Christian Science.

The aim of every teacher of Christian Science should be to instruct his pupils in such a manner as to enable them to appeal to the one and only Mind for guidance, and through their understanding of this Mind to heal the sick and destroy all evil. It is not the province of a teacher personally to dominate and control his students, nor is it proper for a student so to be dominated and controlled. The teacher does not teach Christian Science in order to build up a personal following or to become what might have been called in former days a feudatory lord, nor does the student become a vassal by virtue of being taught by the one whom he has selected to be his teacher.

It is quite right that there should be the utmost harmony and good feeling between teacher and student, and all that tends to this in a proper way should be encouraged, but there is no reason why this feeling should become the foundation, as it sometimes does, of an offensive and defensive league against all other teachers and students. Neither should the fact that some students are unwilling to accept their teacher's direction or domination in personal matters which are entirely distinct from the legitimate relation of teacher and student, be taken as ground for ostracizing the student or for predicting evil consequences to him. To teach students of Christian Science that truth destroys error is to teach them the inexorable law of infinite Mind, but to teach them that truth destroys persons would be to teach them that crime is legitimate.

The best teachers of Christian Science are those who, like our Leader, direct the thought of their students to God as the source of infinite wisdom and love, and away from their own personality; and the best students are those who imbibe this wise teaching and follow it. Thus each works out his own salvation, neither is encumbered with the burden of the other, and both rejoice in the exercise of their inalienable "freedom to worship God."

ARCHIBALD MCLELLAN.

A QUESTION OF RIGHT.

IN the remarkable colloquy between God and Abraham, as narrated in the 18th chapter of Genesis, the plea of the patriarch is grounded in an interrogatory assumption respecting the divine conduct which is of profound significance. He said, "Shall not the Judge of all the earth do right?" and the convictions of Christian men certainly support the assumption. To make this affirmation, however, is practically to say that an enlightened man may legitimately pass upon the ethical nature of the divine activity, and the question arises whether Christian men may be sure that an infinitely righteous and just Being would not do that which is condemned by the moral sense He has implanted.

In the presence of the universal recognition of the palpable wrong of many of the things which are customarily attributed to the determinations of Providence, two courses are possible. We may say that God is not responsible for the conditions and events which are condemned as an outrage by our moral sense, or we may adjust our ethical judgment to the reputed conduct of God whether or no, and hold that given acts must be right regardless of the protest they awaken, for the simple reason that they are the acts of God. We can either question the legitimacy of our moral judgment or the correctness of the traditional assumption as to God's responsibility. At this juncture we shall find a new significance in St. Luke's story of how on a Sabbath day Jesus came upon a poor woman who for eighteen years had suffered from a grievous infirmity, and graciously healed her; how, when a Pharisaical devotee of Talmudic law called him to account, he referred to the human compassion which led an ox to water, and added, "Ought not this woman . . . be loosed from this bond?" In this saying Jesus certainly recognized the authority of that prevailing moral sense which instinctively passes upon the justice or injustice of given conditions and conduct. He practically said that if the husbandman would save his cattle from unmerited suffering, he ought to presume that God would certainly do as much.

Jesus' argument here is very pertinent to the fact that the great body of Christian believers have been taught they have no right to subject the so-called "inscrutable acts of Providence" to the same standard of ethical criticism which obtains in determining the merit or demerit of human conduct. The whole theory of the atonement as generally accepted assumes that God's wrath toward sinful man has been placated by the suffering of an innocent person, and yet if an earthly father were to declare that he would forgive a child only out of consideration for the fact that another innocent child received a whipping, these same Christian people would promptly pronounce upon this position as an offense to common justice and common sense. When long-continued pain is brought upon the innocent by human selfishness and cruelty, swift condemnation is heard; but when, through the ignorance of human belief, it is attributed to the government of God, the Christian world bows before it as the inscrutable act of an all-wise God!

Christian Science dares to accept the intimation of Jesus' words when he reprovingly inquired, "Ought not this woman . . . be loosed from this bond?" It declares, and that forcefully, "In God's name she ought! The enslavement is unjust, hence it cannot be divinely approved." It is thus revoicing for the sick and sorrowing of many lands the Master's comforting assurance, and every healing it effects presents in itself the satisfying proof that the conditions of suffering were no less offensive to divine law than they were appealing to divine Love. With the coming of this restatement and demonstration of the Christ-teaching, the day when injustice and wrong can be attributed to the inscrutability of the divine order without eliciting emphatic protest has passed away.

JOHN B. WILLIS.

OUR SANCTUARY.

THE wisdom of our Leader in providing for the study of the entire Bible in our Lesson-Sermons becomes more and more apparent, for we are thus led to see how the understanding of the truth unites "all periods in the design of God" (Science and Health, p. 271). What was true of the Israelites on their way to the promised land is true today in a larger and more spiritual sense of those who are journeying toward the realm of the real. For instance, the symbolism of the tabernacle and its rites must have meant much to a primitive people, and no one would now deny that its true significance was lost because it was materialized; hence our great need is to gain the spiritual meaning of this, and of "all the good the past hath had," for thus only can we comprehend the Christ-idea which is "the same yesterday, and to day, and for ever."

In the Psalms we have many references to the sanctuary, all of which lift thought to its spiritual significance and universal application; as, for instance, "My flesh longeth for thee in a dry and thirsty land, where no water is; to see thy power and thy glory, so as I have seen thee in the sanctuary." Again, the psalmist tells of a troubled sense, a conflict with the belief in error's reality, when he says, "It was too painful for me; until I went into the sanctuary of God." This points to the necessity of *dwelling* in the "secret place of the most High," and *abiding* "under the shadow of the Almighty." Of old the Jewish sanctuary contained the tables of stone inscribed with the Ten Commandments, the golden pot of manna, and Aaron's rod, the symbol of spiritual power. The sanctuary also came to be regarded as a place of refuge from the enemy, and this thought of it has perhaps been the most permanent, but its most deeply significant feature was the pillar of cloud and of fire, the symbol of Life and Love,—the "consuming fire" which destroys all evil—sin, disease, and death.

In the epistle to the Hebrews (9th chapter) we read much concerning the sanctuary and what it contained, and these are declared to be "figures of the true," while Christ is said to be "an high priest of good things to come, by a greater and more perfect tabernacle, not made with hands." Concerning this subject our revered Leader says, "Our surety is in our confidence that we are indeed dwellers in Truth and Love, man's eternal mansion" (Pulpit and Press, p. 3). We may well ask ourselves whether we ever forget what it means to dwell in this sanctuary of Spirit, whether we forget the Ten Commandments, the manna, the rod, all of which exist to the spiritualized consciousness as eternal verities, making unceasing demand for righteousness. Isaiah says that in "every dwelling place of Mount Zion" there will be "a cloud and smoke by day, and the shining of a flaming fire by night: for upon all the glory shall be a defense." Can "any plague," either sin or sickness, come nigh the home thus divinely protected? We know it cannot unless we open the door for it, perchance even invite some phase of discord to enter, and there is really no home unless it be a sacred place,—at once a stronghold and a sanctuary. We rejoice in knowing that the "good things to come" are here and now, revealed by Divine Science, which gives us spiritual realities in place of "carnal ordinances," and shows us that the "only priest is the spiritualized man" (Science and Health, p. 141). The way into "the holiest of all" is opened for us when we advance beyond the vail of belief in matter, for thus we stand in the presence of spiritual facts, —eternal verities.

All may serve in the temple of Spirit, God, and as the psalmist has said, "declare his glory among the heathen; shew forth his salvation from day to day," and we are told that "honor and majesty are before him: strength and beauty are in his sanctuary."

ANNIE M. KNOTT.

LETTERS TO OUR LEADER.

[Telegram.]

Milwaukee, Wis., March 12, 1909.

Mrs. Mary Baker Eddy, Brookline, Mass.

Beloved Leader:—We, the members of First Church of Christ, Scientist, of Milwaukee, Wis., assembled in business meeting prior to the dedication of our new edifice, March 14, send love and greetings to you. We are profoundly grateful for your spiritual leadership, and know that obedience to your teachings has made this demonstration possible. Faithfully yours,

First Church of Christ, Scientist.
CAROLINE A. TUPPER, *Clerk.*

MRS. EDDY'S REPLY.

Beloved Brethren:—Your communication is gratefully received. Press on! The wrath of men shall praise God, and the remainder thereof He will restrain.

Lovingly yours,
MARY BAKER EDDY.

Washington, D. C., March 9, 1909.

Mrs. Mary Baker Eddy.

Beloved Leader:—I have recently reread with care Miss Wilbur's book, "The Life of Mary Baker Eddy," and stand in awe before the wonderful chronicle. I wish that every Christian Scientist had a copy—yea, and all who misunderstand you and your mission. It would make the former better Scientists, and the latter more just in their concept of you.

To read the absorbing narrative of your life is an inspiring experience. The righteous ancestry, which constituted the best of New England thought and tradition, the atmosphere of godliness, the childhood experiences with the grandmother, the unusual advantages of training by a devoted brother versed in the classics, the early religious experiences, fraught with so much that was unusual to such tender years, the marked individuality and adherence to religious convictions that were so early manifested, —all these naturally pointed to a career of investigation and original thinking. Then the marriage to Colonel Glover and the brief, blissful experience in the South, the wrenching of human ties by the dread enemy, the return to the parental home, where later further wrenchings were to ensue, showing the frailty of all human bonds; the bitter experiences which error (seemingly foreseeing its uncovering) thrust upon the Truth-seeker,—all are graphic and absorbing. With an unanswered "How and why" upon her lips, this frail invalid steadfastly persisted in her search after God; and when patient investigation of one system after another failed to bring peace, she was led to find the divine Mind, to discern and enunciate in practical terms the method of action of this Mind, which she named Christian Science, so giving to human consciousness that which will deliver it, a practical and demonstrable Christianity.

As the narrative goes on, rehearsing the heart-breaking struggles, the opposition encountered, both within and without, the loving forbearance, the sublime courage, the patient waiting, and the transcendent faith in God, one is simply speechless with wonder. When we reflect that the discoveries made by this New England woman nearly a half century ago, are now one by one being verified and attested by leading physicists and thinkers of the world; when we think of the mighty reformatory and health-giving movement established, we see that God has indeed chosen the weak things of the world to confound the mighty. And when we see this same woman, firm in the faith, with tender, loving care, still at the head,—leading, counseling, admonishing, pointing the way, and by her life of purity,

Digitized by Google

self-renunciation, and love, living a marvel day by day,—our hearts are thrilled with joy and gratitude. From my heart of hearts I say, God bless Mary Baker Eddy! She has set before us an open door, and it is but a question of time when the world shall know her better and love her more.

I trust you will accept the enclosed as a small token of sincere gratitude and love.

Your obedient student,

EDWARD EVERETT NORWOOD.

Minneapolis, Minn., Feb. 28, 1909.

Mrs. Mary Baker Eddy, Brookline, Mass.

Beloved Leader:—Today, on the first anniversary of Fifth Church of this city, my thought turns to you in loving gratitude for the harmony and prosperity of this branch of your church, and for the privilege I have in reading here. This church was organized from members of Second Church living on the East Side who, owing to the crowded condition, had been requested by its board of directors to withdraw and form a new church. At the opening service, a year ago today, our hall, overlooking the campus of the University of Minnesota, was filled with people, who were mostly visiting Scientists from other parts of the city. This morning every seat was taken by our local congregation, representing the growth of one year. Much of this interest has been awakened in the university, among both students and members of the faculty.

You will be interested to know that the *Monitor* is to be on file in the university library, and that the dean of the English department recently paid a very high tribute to the paper. Prof. Richard Burton, widely known as a writer and lecturer, in addressing one of his classes spoke of the splendid ideals of the *Monitor,* of its freedom from sensationalism, the cleanness of its news, and of the worthy purpose back of it to establish such a publication. He told the students that many people (not Christian Scientists) were subscribing to the paper because of the stand it had taken for pure journalism, and recommended it to their attention.

With loving acknowledgment to you for many blessings,

Sincerely yours,

SCHUYLER S. CLARK.

Plainfield, N. J., Feb. 27, 1909.

Beloved Leader:—It is with deep gratitude that we are able to write you that on Jan. 12 the Christian Science Society here was organized as First Church of Christ, Scientist, Plainfield, N. J. We are steadily increasing in numbers and strength, and the thought is constantly gaining firmer ground. With our organization as a church comes a new impetus for work, which, grounded on the teachings you have given us, we know has already its assured fruitage. In the future, as in the past, we look to you with love and gratitude for the understanding which has enabled and will enable us to take each step of the way.

Faithfully yours,

CHRISTINE MAST, SUSAN COREY,
LOTTIE S. BENNETT, *Committee.*

Petaluma, Cal., Feb. 19, 1909.

Mrs. Mary Baker Eddy.

Beloved Leader:—The members of the Christian Science Society of Petaluma, Cal., recently organized, send to you an expression of their love and gratitude for the truth you have revealed. The growth of Christian Science in this city is constantly increasing, and the Sunday School attendance is splendidly maintained. We are all striving to follow, to be glad and rejoice alway.

Faithfully yours,

MISS MARTHA THOMPSON, MRS. JOSEPHINE BURDELL,
MRS. ELLA A. MCNEAR, *Committee.*

Edinburgh, Scotland, Jan. 12, 1909.

Mrs. Mary Baker Eddy, Chestnut Hill, Mass.

Beloved Leader:—It was unanimously resolved, at the annual meeting of the members of First Church of Christ, Scientist, Edinburgh, held Jan. 9, 1909, to send you an expression of heartfelt love and loyalty. We realize that "gratitude is much more than a verbal expression of thanks" (Science and Health, p. 3); that it is shown in the demonstration of divine Principle, in healing the sick and reforming the sinner. We recognize in your divinely appointed leadership the fulfilment of prophecy, and thank you that through your heroic and Christlike example in temptation, affliction, and persecution, you have proved to the world that "one on God's side is a majority." We are deeply grateful for your further demonstration of patience and wisdom in establishing *The Christian Science Monitor,* with its ever-increasing sphere of purifying influence, gently and steadily leading human consciousness from a belief in evil to the realization of the omnipotence, omniscience, and omnipresence of God, good.

We know you will rejoice to hear that Christian Science is making rapid strides in Edinburgh. We have had two lectures during the past year, with gratifying results. Numbers of strangers are attending our services and studying Science and Health as a direct result of having heard these lectures. We are glad to tell you that the healing of the sick and sinning is being much more rapidly accomplished, and consequently there is a great increase in the numbers applying for Christian Science treatment. As our understanding of Christian Science advances, we see more clearly the impossibility of there being any other way to heaven, harmony, than through the demonstration of the Christ-idea; by implicit obedience to divine Principle, and to the rules laid down in "Science and Health with Key to the Scriptures" and your other writings.

We feel with thankfulness and humility that your loving desires, expressed in a letter to this church on June 27, 1902, are being fulfilled. You said, "May the bounty and beauty of holiness gladden this church, hallow its meetings, rest in the heart of each member, and birds of the upper air sing their sweetest songs and build their nests in this dear branch of His planting."

Faithfully and lovingly,

CHARLES W. J. TENNANT, *First Reader.*

W. Somerville, Mass., March 4, 1909.

Dear Mrs. Eddy:—I would like to express my gratitude for the miraculous cure of my nephew of fourteen years. It is just two weeks ago today that three of our best doctors gave us no hope for our boy's recovery, giving the verdict that death was only a short way off. At once the whole family turned to something higher, which was to them Christian Science. The doctor and nurse were discharged, and a practitioner was found who started at once on the great work of the restoration of our beloved boy. Strong faith was manifested on the part of the father and mother, who previous to this time had no particular interest in Christian Science, and the case was met almost immediately. Today our boy had a long walk, and is better than before this sickness came to him. The doctors who diagnosed his case and gave no hope to the parents, stated that nothing in medical science could reach the trouble.

The best feature of the case is that Christian Science has come to that whole family to stay with them, we trust, forever. Only one in the family believed in Science up to the time of the healing. We all thank God for you, to whom He gave the wonderful understanding of life and hope which you are giving to the world.

With sincere gratitude, I am

Yours in love,

MISS M. GERTRUDE NELSON.

THE LECTURES.

PADUCAH, KY.

The Hon. Clarence A. Buskirk of St. Louis, Mo., spoke to a large, representative, and most appreciative audience at the Kentucky Theater, on Sunday afternoon, Jan. 10. His subject was Christian Science. He was introduced by Miss Anna Webb, First Reader of the Christian Science Society of Paducah, who spoke in part as follows:—

Religious thought is rapidly casting off the garments of superstition, creeds, dogmas, and religious formula, and seeking to be clothed in the "seamless robe" of the Christ and to acquire the vitalizing force and dominant power of his life. As Elijah stood at the entrance of the cave, watching the destruction of error and listening for the voice of God, so all the nations of the world are waiting, at the entrance of the twentieth century. They have failed to find God in the turmoil of commercialism; they have failed to find God in the earthquake of materiality; they have failed to find God in the whirlwind of civil, social, and political strife—but they are hearing the "still small voice" of Truth. This "still small voice" is Christian Science, which comes as a direct message from God to the individual consciousness of all mankind; comes as the gentle messenger of peace and love, bringing light to the darkened thought, joy to the disconsolate one, freedom to the captive in sin, healing to the sufferer, and a note of true brotherhood to all the world, for it is Love enthroned. We are hearing again the Master's voice, saying, "Come unto me, all ye that labor and are heavy laden, and I will give you rest." Christian Science is a practical, demonstrable truth, so that every man having eyes to see and ears to hear may prove it for himself.—*News-Democrat.*

CHICAGO, ILL.

Prof. Hermann S. Hering lectured on Christian Science in Fifth Church Jan. 28, 29, and 30. John S. Coonley, First Reader of Fifth Church, introduced the lecturer, saying in part,—

It is said that the good men do lives after them. We learn in Christian Science that the good we know and put into practice lives with us in the present and constitutes our real life. Jesus in his brief ministry on earth taught men how to gain a better and higher understanding of God as Life, Truth, and Love. His teaching was not theoretical—he proved absolutely the truth of what he taught. Our Master said, "He that believeth on me, the works that I do shall he do also." Christian Science teaches men how they may abide in Christ, Truth, today, and prove for themselves and others the healing, saving truth which Jesus taught and practised.—*Correspondence.*

NEW YORK, N. Y.

The evening of Feb. 19, the edifice of Third Church of Christ, Scientist, was well filled with an audience whose presence on such a night showed a deep interest and earnest desire to know more of the subject of the lecture, "Christian Science: Its Healing Ministry," delivered by Bliss Knapp of Boston. The lecturer was introduced by the First Reader, J. Allen Barris, who said in part,—

In the spirit of brotherhood we want to tell you something of the character and mission of the truth which today is appearing above the mountains of prejudice and ignorance and filling the valleys of sin and sickness with its healing rays. A few days ago we observed the anniversary of the birthday of Abraham Lincoln, whose name is identified with the Emancipation Proclamation. It was but a short time after this immortal proclamation was given to the world, which freed men from physical slavery, that there came from New England another proclamation, which is destined to go ringing down the ages under the name of Christian Science, and which proclaims man's freedom from mental slavery. This new proclamation is not the edict of a chief magistrate proclaiming the will of a sovereign people and enforced by an army of men, but it comes as a revelation of the will of God and is enforced by the gentle influence of Truth and Love. Under its banner, on which may be inscribed the words of St. Paul, "I was free born," man is beginning to recognize his birthright as the son of an omnipotent and all-loving Father, and to exercise his God-given dominion over all the claims of the material senses.

The name "Christian Science" is no longer unfamiliar in our land and is fast becoming known in lands across the seas. Is Christian Science here to stay? Jesus said, "By their fruits ye shall know them," and Christian Science is here to stand or fall by its works. It could have withstood the persecutions of the past on no other basis, and it expects to build in the future on no other foundation. For forty years the bright light of publicity has been turned upon it. It has been misunderstood, criticized, and also praised, but throughout all it has gone on its way with light undimmed, healing the sick, redeeming the sinner, purifying and elevating all that it has touched. Not only does Christian Science stand for the betterment of all social conditions, but its influence is beginning to be felt in our art and literature. Christian Science is the impersonal Truth revealed to this age; but when time has set its seal of unqualified approval upon it, the name of Mary Baker Eddy will be found inseparably linked with it as its Discoverer and Founder. Through much labor and great tribulation she has already established the knowledge of this truth in the hearts of thousands of grateful men and women throughout the world; and in thousands of homes made happier through her teachings, her name is mentioned with heartfelt gratitude. This knowledge of God, unhindered either by persecution or popularity, will continue to grow until all shall come to the fountain, without money and without price, and drink of its healing water, until we all shall come to know Him, the only true and living God, who heals all our diseases.

TESTIMONIES OF HEALING.

It has been my custom for over two years, upon the receipt of the *Sentinel* or *Journal*, to scan the index in order to ascertain if there was any message from Mrs. Eddy, and if there was, to read the same. Then I would look over the names of those who offered testimonies, to see if there were any who were living in the same township or county in which I live, but in the six years that I have been reading the *Sentinel*, only one lone testimony has appeared in its columns from a person living in my home county. To me this has seemed very strange, and I found the question seemed to address itself to me, Why have you not offered a testimony? As I pondered the question, many sayings of the Master came to me, which made me feel that I was not a very faithful disciple. For instance, "Freely ye have received, freely give;" and again, "Feed my sheep." Then Paul tells us that if we sow sparingly, we shall also reap sparingly. I began to realize that if I would behold the harvest, I must do my part in the seeding of the field.

In June, 1902, I learned that a dear friend had been restored to health and happiness through Christian Science, yet what Christian Science was I knew not. My informant, a sister of the person healed, told me that the treatment was through prayer. I inquired how a Scientist's prayer could have any more healing in it than any other prayer. To which question she frankly admitted that she did not know. All she seemed to be sure of was, that whereas her sister had been ill,—dangerously ill,—she was now well. After thinking for a moment, I remarked that I had always told learned divines, when they sought to interest me in the gospel of Jesus Christ, that when they could heal the sick, raise the dead, cast out devils, or do any of the many things which he said they could do if they believed on him, I would listen; but until they could do these things, in proof of their faith, it would be but a waste of time for all concerned to talk to me. I was perfectly willing that they should get all they could out of his doctrine, but I then thought Moses' doctrine was much more practical than that of Christ Jesus. To shorten my story I will say that I bought a copy of "Science and Health with Key to the Scriptures" by Mrs. Eddy, and commenced to study it to the best of my understanding. I am glad to say that I have proven beyond a possible doubt, to my thinking, that Mrs. Eddy has indeed found the Key to the Scriptures. In a word, she has brought to light the truth, the word of God, which heals all our diseases. We read in the Scriptures, "He sent his word, and healed them." If the word of God ever healed mortals from their sick and discordant conditions, it should not seem strange that it is again not only healing the sick, but the sinful as well.

When Science and Health came to my hands, in July, 1902, I was laboring under the belief that I was losing my eyesight. I could not see to file my saws, nor could I read by lamplight for any length of time. I began to realize, as did Job, that the thing I greatly feared was fast coming upon me. I had already sent for an oculist to come and fit my eyes with glasses, but, thanks be to God, He "sent his word" and healed me; and He sent it through the teachings of that godly woman, Mrs. Eddy, who has lived such a pure and holy life that she has been able to apprehend that which was in the beginning, "the Word." Within thirty days from the time I began to read and apply the teachings of this wonderful book, which speaks as never book spoke before, my eyesight had come back to me, and the tobacco habit, which had been a part of my existence since I was eleven years old, had vanished like the mist before the noonday sun. Six years have gone by, and for aught I know I can see just as well as I could twenty-five years ago, and never for one moment have I wanted to use tobacco.

All this, however, seems small in comparison to the spiritual uplifting wherein one is able to bring into activity and prove the Scriptural promise, that all men shall be taught of God, Spirit. The apostle James tells us, "If any of you lack wisdom, let him ask of God." To me this advice, before I had learned through Mrs. Eddy how to prove God, was the quintessence of foolishness, but now it is an inspiration to know Him whom, as Mrs. Eddy tells us, "to know aright is Life eternal" (Science and Health, Pref., p. vii.). If it is not possible for one to know God here and now by the "signs following" which Christ Jesus promised should be given to those who believed, then the gospel which he taught is vain. I might add that I have recorded here only a few of the many blessings which have come into my life by the study of the Scriptures, after they had been made plain by Mrs. Eddy's teachings. Nor would I forget to give honor where honor is due, so I say with deep gratitude, "God bless Mrs. Eddy."

JULIUS POORE, Black River, N. Y.

How grateful we are to God, and to our Leader, Mrs. Eddy, as we pass each mile-stone on our journey out of the bondage of material beliefs into the dominion of spiritual truths. It is just five years since I passed the first mile-stone in my experience, and it required two years to reach this one. Living with Scientists, as I did, the atmosphere of Truth and Love in the home enabled me to discard glasses, which I had been compelled to wear for six years, being unable to read or sew without them for five minutes at a time without severe suffering. During these first two years I had been treated for minor complaints by my friends, but no special thought was given to my eyes, which illustrates what to me is one of the most beautiful things in Science, namely, that the pure thought of the Scientist, resting upon the sick, sad, and discouraged patient, enfolds him in divine Love, and thus makes him every whit whole. The next mile was covered in much less time, as I had begun to see that there was something for me to do if I desired to make any progress in my journey, for while others may give us a helping hand and start us on the right road, still there are many ruts and stony places over which no human hand can guide us, and we must ourselves labor to enter into the kingdom of God. In reaching this second mile-stone I left by the wayside my chief annoyances of former years, corns and bunions. Since that time many miles have been traveled, while here and there I have been dropping old beliefs, striving with all my might to bury them so deep down that others coming along the same road may not stumble and fall, but may be helped by my efforts to smooth the way.—LOLA WALSTON, Quincy, Fla.

It is seven or eight years since I first tried Christian Science for what seemed to be terrible ills of the flesh, but, alas, I was then not ready to receive the truth. The seed was, however, sown, and thankful indeed am I that the soil was not altogether barren ground. Two years ago I again decided to try Christian Science, and in less than one week of absent treatment I was completely healed of bowel trouble, from which I had suffered for fifteen years. To doubt, or even hesitate, after such a manifestation of God's power and willingness to heal our diseases, was impossible! Always, from earliest childhood, I have had all that material love and abundance could do for me. From a worldly view-point I possessed everything which could bring happiness, but it was a phantom which I was chasing. To Christian Science I am indebted for true happiness,—for

Digitized by Google

peace that passes all understanding, and the blessed, abiding knowledge that God is my shepherd, and "he that dwelleth in the secret place of the most High shall abide under the shadow of the Almighty."

To me Christian Science has brought too many blessings to enumerate, but there are two that shine forth before all others,—the true understanding of prayer and the true relationship of God and man; the power at all times and in all places to demonstrate harmony for myself and my loved ones.—JULIA WOODS RUBEY, Shawnee, Okla.

In October, 1902, I heard for the first time a little about Christian Science. That day was certainly "a red letter day"—one never to be forgotten. It opened up to me great and grand vistas of truth; my thought was awakened to the fact that God is still revealing Himself to mankind, even as He did of old to the ancient prophets of Israel. Till then I had not realized how hungry I was for God—for the living God. I saw before me the possibility of my girlhood's dreams being fulfilled, namely, that I should be made "meet for the Master's use." The Christian Science text-book was loaned to me, and in about a fortnight I had my first demonstration, over defective eyesight. I had been wearing glasses for many years, and could not see to read without them. At this time my eyes were in such condition that I knew I must get stronger glasses or be enabled to do without any. I had committed to memory a portion of the scientific statement of being,—"There is no life, truth, intelligence, nor substance in matter. All is infinite Mind and its infinite manifestation, for God is All-in-all" (Science and Health, p. 468). I put my glasses away in a drawer and tried to realize the meaning of what I had learned. I knew that God could manifest Himself in restored sight, and He did. That night I was able to read clearly without glasses and have never since had occasion to wear them. From childhood I had suffered from stomach trouble, sometimes in a very acute form. This trouble also was overcome, and I gradually lost all fear of food through understanding that "the truths of immortal Mind sustain man, and they annihilate the fables of mortal mind" (*Ibid.*, p. 103). For some time prior to my hearing of Christian Science I had been greatly troubled with a skin disease. Two physicians who tried their best had failed to cure me, but the truth was again successful.

Though I have reaped such great physical benefit simply from the study of Science and Health, this is but a small part of the gain. The great spiritual awakening raised my thoughts to ponder upon the unseen verities of being. I am deeply grateful to God for bringing me into the clearer light of His presence, and also to our revered Leader, Mrs. Eddy, for her selfless love, through which my nearer approach to God was made possible. My great desire is to be fitted to work for the fulfilment of her "life-purpose," as outlined by her on page 207 of "Miscellaneous Writings."—MRS. LUCINDA SLATER, Bradford, England.

I have depended on Christian Science for help since 1897, and have had many difficulties overcome by the understanding of divine Principle, as taught by Mrs. Eddy, but at this time I will only give an experience of recent date. For the benefit of those living outside of California I will say that we have in this valley a barbed grass which seems to work itself into everything that it is possible for it to penetrate. In attending to the work a barb in some way became imbedded in one of my nostrils so that it could neither be seen nor reached. I had no fear of the outcome, but did not feel able to overcome the trouble myself, so I telephoned to a practitioner for help, and went right on with my work. In just two days the barb came out, and there were none of the usual disagreeable symptoms during this time. For this, and for all the other help that I have received in Christian Science, I am thankful to God, and also very grateful to Mrs. Eddy, who has given her saving apprehension of the truth about God to the world.

ALEX. S. GILLIAM, Visalia, Cal.

It is with a heart full of gratitude that I send this testimony concerning my healing, hoping that my experience may prove a help to others. For twenty-six years I suffered, more than words can tell, from what the attending physicians called an abnormal growth. I underwent seven different operations at different times. My suffering was so great that at times I was closely watched, my friends being fearful that I would do violence to myself. Instead of getting better I grew worse, until at last the doctors advised me to try a sea voyage. Following their instructions, I left England and came to America in 1905. I received no benefit by the change, but after a time began to suffer from rheumatic trouble. A friend asked me to try Christian Science for this latter difficulty. I did so, and was soon healed. Having been helped so quickly in this instance, the thought came to me that if I could be healed by Christian Science of one disease, it might be equally good for another, so I continued to take treatment of the same practitioner until I was completely healed of the growth. Where I formerly spent half my time in bed, I am now always well and happy, and am more so than ever before in my life. By the reading of "Science and Health with Key to the Scriptures," I find I am able to help myself in many ways.

My earnest desire is to try to follow in the footsteps of our Master, who said, "By their fruits ye shall know them," and my heart goes out in love and reverence to our dear Leader for pointing out for us the way to health and happiness.—ADELINE W. HOLT, Fall River, Mass.

I am indeed grateful for Christian Science. It has done for me what all else failed to do. I had been a sufferer with an eruption on my arms for about twenty years. I had several different physicians prescribe for me, but with only temporary relief, as the trouble always came back. One arm was so bad that for seven months I did no work, being forbidden by my physicians to put my hand in water.

About this time I was told of Christian Science, and went to a practitioner at Carterville, there being no practitioner here at that time. I received treatment while there, and also had seven absent treatments, with the result that I was healed. I was told that I could put my hands in water or do anything I wished, so after the first treatment I went to work immediately, with no bad result whatever.

MRS. T. L. RASCOE, Carbondale, Ill.

Ever since I can remember there was something wrong with my eyes, until Christian Science healed me over a year ago. There seemed to be a mist before my eyes, and sometimes they pained me very much. When I was old enough to go to school, there were times when I could not see the letters in my book, and it hurt more for me to see than it had before. My parents were afraid I might become blind, and they were going to keep me at home and not send me to school any more. Then they began to know about Christian Science and my father took me to a Christian Science practitioner and she treated me. That was the only time I went to the practitioner for treatment, and I do not know how many times I was treated absently, but I do know that my eyes pained me only two times after that. I have gone to school all the time, and sometimes I study my lessons in the evening,

Digitized by Google

but my eyes never hurt me any more and the mist has never been in front of them since that first treatment. At that time I did not think the lady could help me, although she was so kind, for I did not understand how she could get to God and tell Him. Now I know that God is with us all the time, and it was because she knew how much He loves us that she was able to help me. I am so glad that I can see everything plainly, and I wish that everybody in the world could know about Christian Science.

HAZEL JAY MILLER, Marshfield, Ore.

After six years of faithful study of Christian Science, I wish to express my gratitude for all the blessings it has brought to me and my family. At a time of great physical need, a copy of *The Christian Science Journal* was sent me, and through the reading of this periodical I was immediately healed of acute and chronic stomach trouble of many years' standing. For three years previous to this nothing had been able to relieve me, everything that was tried seemingly making me worse, as every remedy tried affected the heart so that I could get no rest day or night. I had to be very careful as to what I ate, and for nearly two weeks had not been able to take anything but hot water. After reading the *Journal*, I ate a light supper and slept all night, very much to the surprise of myself as well as my family. I knew that God's word had been fulfilled, where it reads, "He sent his word, and healed them." From that day I have never doubted that Christian Science is the word of God; that it does heal the sick today as surely as in any age, for the power of God is "the same yesterday, and to day, and for ever."

The next three weeks was the happiest time I had ever known, for another promise had been fulfilled, "They that wait upon the Lord shall renew their strength." I then had treatment from a practitioner for about six weeks, and was healed of a severe bowel trouble which had caused a great deal of suffering for about twenty years. This was in April, and the following December I took off the glasses which I had worn for several years, and for three years had not been able to read or do any sewing without them. In the six years since then I have been able to read a great deal, and every evening until a late hour. I was also healed of rheumatic trouble, which at times caused very acute suffering. For relief from all these troubles, and many others, I am truly grateful to God, who not only "forgiveth all thine iniquities," but who also "healeth all thy diseases."

Christian Science has not only helped me to love the Bible more, but has shown me how to prove its promises as "yea, and in him amen." I am deeply grateful to our Leader, through whom this truth has been revealed.

MRS. MARTHA BICKFORD, Warren, Me.

About five years ago I began to read Science and Health, not because I thought it would heal me, but because my sister gave me her book and asked me to read it. I did not want to hurt her feelings, so I tried to lay aside my prejudice and began to read it. I asked God to lead me aright and show me in some way if Christian Science was the truth, for I was in great fear that I might be led astray. I wanted to know God, and was willing to suffer pain if it was His will, as I had always been taught to believe.

When I read in Science and Health that God does not send sickness and evil upon His children, it was a great revelation to me, and I asked for more light. One night, after having read in the Bible and Science and Health every day for over a week, I had a very severe attack of neuralgic trouble. I got up and walked the floor and cried, but I did not use any medicine, as I had lost all faith in it. I began to repeat the scientific statement of being (Science and Health, p. 468), and declared God to be my refuge and strength, "a very present help in trouble." I then went to bed, and in less than ten minutes I fell asleep and knew nothing more until morning. After such a proof of Truth's power I have never doubted that Christian Science is the same truth that Jesus taught. I know that Mrs. Eddy was taught of God, and I long to be worthy to be called one of her followers. I of course kept on with my reading even more earnestly, and many physical ailments vanished, among them female trouble and the fear of lung trouble. Through the study of the Lesson-Sermons, the *Sentinel* and *Journal*, I have been kept in almost perfect health, except a few times when it seemed wise to ask the help of a practitioner. Every member in my home, including my husband and five children, has been healed of some ailment, and Christian Science is a daily study with each one.

I am grateful to be a member of The Mother Church. We hold a service in our home every Sunday. There are several families in this community who are studying Christian Science. We meet quite often, and hope to be able to form a society soon. I am indeed grateful that Christian Science is teaching me to love the Bible more and more, and to know God aright. I long to express my gratitude to our Leader in works rather than words.

MRS. ANNIE QUAINTANCE, La Cygne, Kan.

Among the many privileges conferred upon Christian Scientists today is that of telling the world some of the manifold blessings which they have received from the effectual workings of the Principle of Christian Science as revealed in "Science and Health with Key to the Scriptures" by Mrs. Eddy. I would like to express my gratitude for a demonstration that was made for me in the winter of 1907. I was taken ill with chills and fever. For six hours I struggled with myself, trying to realize the all-presence of God, good, and the nothingness of this erroneous condition, but apparently to no avail. I then called a practitioner, and through her help the trouble was speedily overcome. The fever subsided within an hour, and I was perfectly healed. Previously I had been obliged to remain in bed from two to three weeks at a time with this ailment. I also wish to express my gratitude for the realization of a higher sense of law and order, and the spiritual uplifting which follows this awakening.

DELLA C. HELEN KURTH, Franklin, Pa.

I can scarcely find words to express my love and gratitude for what God has done for me through Christian Science. I was brought up from childhood in an orthodox church, and was class and choir leader for many years. I was, however, never fully satisfied; my faith was not abiding, it seemed to come and go. It always seemed to me there was something deeper spiritually than I possessed or had been taught; there was enthusiasm enough, but not that peace which characterizes the truly Christian life.

About fourteen years ago a friend handed me a *Christian Science Journal* and I read and studied it very closely, especially the testimonies of healing by the power of Truth. I became very much interested, and resolved that I would test Christian Science and find out the truth, just as these people said they did. I was after the truth and wanted to know it, and it was not long before I had an opportunity to test it. I had been afflicted with a rheumatic trouble for more than thirty years. After returning from the war in 1865, this ailment seemed to settle on me. I would drop down where it happened to overtake me, and for ten days at a time it would keep me from my duties. So with the little I knew of Christian Science and the

Digitized by Google

study of the Lesson-Sermons I found that Christian Science is the truth. I have never had a return of the ailment since, for which I am very thankful to God, and to Mrs. Eddy for her spiritual understanding of the truth as it is in Christ Jesus. But this is not all. Other ailments have been met,—paralytic trouble, heart disease, and an eruption, in their worst forms,—all these and many others have been met and healed through the power of Truth as revealed in Christian Science. Should not I then be thankful? Words fail to express my gratitude to God, and to our dear Leader, for this truth.

R. S. MAPES, Bucyrus, O.

Christian Science was first presented to us by a dear friend, about six years ago. We were not at that time in need of physical help, but so far as we understood we saw that Christian Science was what we wanted. Two years after taking up its study, my wife was healed of a very troublesome disease in one treatment, and last year I was healed of a trouble in my hip, the result of an injury I had received twenty-two years before. I was healed in one treatment and since then have not felt any of the old trouble. We have also had many beautiful demonstrations with our two children. They have never tasted any kind of medicine nor used any material remedies in their lives. This shows God's love and care over us, and we are very thankful to God, and to Mrs. Eddy for the way of Truth which has been shown us.—C. E. KNEELAND, Cushing, Okla.

About seven months ago my seven-year-old boy stepped on a large rusty nail, which penetrated his foot to the bone. The foot began to swell and the child suffered intense pain. I was greatly frightened, and asked a neighbor to telephone to a Christian Science practitioner. The child was given absent treatment, and the pain soon ceased to trouble him. In a few days he was able to attend school, as well and happy as ever.

I had been healed in Christian Science a few months before my little boy was hurt, and I am learning to depend more and more on divine Love. I am very thankful to God for all He has done for me and my little ones.

MRS. JOHANNA TULLER, Fruitvale, Cal.

Having been in Christian Science almost seven years, I feel it a duty and privilege to testify to the help received both physically and spiritually through the study of the Bible and of Science and Health by Mrs. Eddy. Many times the way has seemed dark, but when my own understanding and study did not quickly overcome the difficulty, a word to a faithful practitioner has always brought the desired result. We came to Christian Science about seven years ago, when our oldest boy was five months old. He had very bad attacks of stomach and bowel trouble, was feverish a great deal of the time, and restless both day and night. At that time I was to mortal sense very nervous and tired out, so we finally called a Christian Science practitioner to see what could be done for us. The result was that the baby slept all that night and was greatly helped. We asked for help many times for him, besides reading and studying the Lessons and attending the church services. The fear gradually grew less, and so many other things were overcome that we clung to the truth. Two years ago in January the boy, who was then five years old, had another attack, after having been free from the trouble for over a year. At this time we again called on the practitioner for help. The child was healed and has had no further trouble in that way.

Every year I have been troubled with chapped hands more or less. Last winter was the worst in the line of work which otherwise would cause the trouble, but through my application of the truth as taught in Science and Health I have overcome that ailment, for which I am deeply grateful, as it was always a source of great inconvenience, and also of suffering. Although we have had many proofs of God's care and love, I consider the overcoming of this trouble one of the best proofs which has come directly to myself. I clung to these words by Mrs. Eddy, "Every law of mortal mind or the body, supposed to govern man, is rendered null and void by the law of Life, God;" also, "Whatever it is your duty to do, you can do without harm to yourself" (Science and Health, pp. 380, 385). Having had two children born to us since coming to this truth, I want to express my gratitude for the help which Christian Science was to me at that time. The knowledge which our children have of Science is a wonderful help to them in every way, and they could not get along without it. Christian Science found me full of fear and worry, but, thanks to God, these have both been overcome to a large extent, so that now, instead of feeling it to be a hard task to care for a baby, I enjoy it, and am constantly rejoicing because I have learned that in God is strength and peace.

I want to express my gratitude to God, and also to Mrs. Eddy, for having been so lovingly helped over the rough places. I am grateful, too, for the church services, and the periodicals, from which we have derived so much benefit.—MRS. V. NEILSEN, Minneapolis, Minn.

As our blessings multiply, the duty of telling them to others, that they too may be helped, demands I should give my testimony of gratitude through our matchless periodicals. Although at one time considered delicate in health, I have scarcely missed a day from my office on account of physical indisposition since September, 1895. My children have been repeatedly helped in the minor ailments prevalent among children, and my home has often been freed from the fears of contagion and children's diseases of the more serious character, so that I have reason to know of the great protecting power and prophylactic value of Christian Science.

In my secular work Christian Science has brought me into closer touch with my clients and professional brethren, although some of them think they are opposed to it. Christian Science has made me no less ambitious, but infinitely more contented, and therefore I have done better work. It has also saved me from loss, which is often caused by discontent and by reaching out after other people's money through speculation in the hope of thereby increasing one's own supply. I owe a great deal to the sound sense, devout piety, and loving example of our beloved Leader, Mrs. Eddy. Christian Science has been the means, in God's providence, of leading me gently by easy steps into happier and safer conditions, revealing in a measure the mission of Christ Jesus to the world, whereby it is saved.—CHARLES G. BALDWIN, Baltimore, Md.

My prayer? Not that the branch of bay
Shall be bestowed by fame.
Before the laurel wreath can fade
The world forgets it e'er was made.
Instead, in His dear name,
With all sincerity I plead
For blessing in each thought and deed,
At-one-ment day by day.

GERTRUDE RING HOMANS.

FROM OUR EXCHANGES.

[Rev. K. C. Anderson, D.D., in the *Christian Commonwealth.*]

If we would grow, we must leave the old behind, that we may come out into a larger, broader, higher, nobler thought of things. And this is exactly what is taking place. It is not a flood of infidelity sweeping over the world. It is a flood of God's new light, a sweeter, broader revelation of His truth. Men have moved into a new world not only larger than the old, but vastly more religious, and in this new world the old doctrines are beginning to have no meaning. The old controversies seem trivial. There are seasons when thoughts swell like buds, old meanings press out and unfold like leaves; seasons when we either need new words for great thoughts, or else new meanings, new implications, new and larger contexts frankly recognized in the old words, and this age is one of those seasons.

[*Christian Work and Evangelist.*]

We once said in these columns that revivals were confessions of the church's failure to do its normal work. The church should bend all its greatest effort to so inculcating the children of the land in the Christian principle that it should not be necessary to spend its greatest endeavor on reclaiming the lost. To prevent the lost should be its aim. It has failed here and is still halting in this regard. But we suppose there will always be some who relapse into sinful ways and indifferent spirit. And there are many who were not claimed for Christ in youth. And it is always necessary to awaken rebirths of feeling in the Christian. So the revival still plays an important part in the Christian church.

[J. H. Jowett in the *Christian World.*]

The positive not only cheers, it directly and immediately strengthens the soul. Positives are dynamics and they radiate power. Not to hate one's neighbor is a negation; there is not much of anything in it, and it is not productive of spiritual vigor and influence. But to love one's neighbor is positive. "It states life actively, gladly, kindly." It braces to a fine achievement. Not to injure other people is a mild and impotent negation, and leaves the life very soft and limp. But to be an emancipator, a benefactor, an active minister in the redemption of the world, is to prescribe a program which itself is full of moral tonic and invigoration.

[*British Congregationalist.*]

There come hours when mere custom loses all its appearance of authority and when the fact that other people hold to religion by no means satisfies us that we ought to hold to it too; there come hours when a mere yielding to enthusiasm appears foolish; and in those hours the questioning and doubting spirit finds its chance. The religious faith which can plead nothing more than custom or enthusiasm in its own behalf is like a house built upon the sand. Yet, at bottom, much of the faith in us is established on no other foundations than these. We want, for one thing, to feel sure that Christianity is an essentially reasonable thing.

[*Universalist Leader.*]

From the side of the church it would appear that its most effective work lies in turning out into the service of politics and society individuals who are wholly competent,—men with the character, the integrity, the purity, the strength, the courage, the self-sacrifice, and the ability to cope with the forces of evil and command the forces of righteousness and compel victory.

SPECIAL ANNOUNCEMENTS.

FROM THE PUBLISHER OF MRS. EDDY'S WORKS.

THE CHRISTIAN SCIENCE TEXT-BOOK, "SCIENCE AND HEALTH WITH KEY TO THE SCRIPTURES."—This work contains many important changes and additions by the author, and also contains a photogravure portrait of Mrs. Eddy, together with a facsimile of her signature.

SOME OF MRS. EDDY'S WRITINGS IN NEW BINDINGS.—One volume containing Unity of Good, Rudimental Divine Science, No and Yes, Retrospection and Introspection; a second volume containing Christian Healing, The People's Idea of God, Pulpit and Press, Christian Science *versus* Pantheism, and the Messages of 1900, 1901, and 1902. These volumes are printed from new plates and are uniform in size with the pocket edition of Science and Health. Bound in morocco, limp, round corners, gilt edges, heavy Oxford India Bible paper. The prices of these books prepaid are as follows: single copy, $3.50; six or more copies of either volume to one address, each $3.25.

THE CHURCH MANUAL.—Containing all the By-laws of The Mother Church, The First Church of Christ, Scientist, in Boston, Mass. Each new edition of the Manual will have special notice in the *Sentinel.* Price, single copy, prepaid, $1; six copies to one address, $5; twelve copies to one address, $9.

Attention is called to the Library Edition of Mrs. Eddy's works, description and prices of which will be found on the outside cover page of the *Sentinel.*

Address all orders for books named above to ALLISON V. STEWART, Falmouth and St. Paul Streets, Boston, Mass.

FROM THE CLERK OF THE MOTHER CHURCH.

CHURCH TENETS.—The tenets of The First Church of Christ, Scientist.—The Mother Church,—printed on folded sheet for the use of Branch Churches of Christ, Scientist, with space for the names of churches and their by-laws, can be had at seventy-five cents per hundred.

Not less than one hundred are sold. Postage stamps are not taken for payment.

MEMBERSHIP.—Correspondence relating to membership with The Mother Church, and requests for blank applications for membership, should be addressed to the Clerk.

All correspondence and orders relative to the above should be sent to WILLIAM B. JOHNSON, Clerk, The First Church of Christ, Scientist, Falmouth, Norway, and St. Paul Streets, Boston, Mass.

FROM THE CHURCH TREASURER.

PER CAPITA TAXES.—Per Capita Taxes and Contributions to The Mother Church, The First Church of Christ, Scientist, in Boston, Mass., should be sent to the Treasurer. Please do not send currency.

Remittances for the above should be sent to STEPHEN A. CHASE, Treasurer, Box 56, Fall River, Mass.

FROM THE SOCIETY.

Attention is called to the announcement over our Leader's signature, which appeared in the *Sentinel* of Jan. 9, to the effect that Christian Scientists in the field who send four subscriptions to the *Monitor* for one year, will receive their own paper gratuitously.

Attention is called to the new Pamphlets, Reprints, and Music found listed in the advertising columns on the opposite page.

The Publishing Society requests that Reading Rooms and individuals when ordering *Quarterlies* will specify whether the large or small size is desired. This is necessary in order to avoid wrong shipments and consequent delays.

THE CHRISTIAN SCIENCE JOURNAL

FOUNDED APRIL, 1883, BY THE AUTHOR OF "SCIENCE AND HEALTH WITH KEY TO THE SCRIPTURES," MARY BAKER EDDY, DISCOVERER AND FOUNDER OF CHRISTIAN SCIENCE

This monthly Magazine is the official organ of The First Church of Christ, Scientist, in Boston, Massachusetts, and correctly represents the Christian Science movement. It contains interesting discussions of the teaching and the practice of Christian Science, and in addition to dissertations, lectures, and contributed articles, publishes always a number of reports from cases of spiritual and physical healing, which practically illustrate the redemptive work of Christian Science.

TERMS OF SUBSCRIPTION: Single copy, one year, $2.00. Quantities TO ONE ADDRESS: ten or more, each, $1.90; twenty-five or more, each, $1.80; fifty or more, each, $1.60. These rates apply in the United States, Canada, Mexico, and Cuba. In all other countries add forty cents for postage on each subscription. Six months' subscriptions received at half the above rates. No subscriptions received for less than six months.

TERMS OF SALE: Postpaid to any address: Per copy, twenty cents. Quantities TO ONE ADDRESS: ten copies, $1.70; twenty-five copies, $4.00; fifty copies, $7.00; in the United States, Canada, Mexico, or Cuba. To all other countries, per copy, twenty-five cents. Quantities TO ONE ADDRESS: ten copies, $2.10; twenty-five copies, $5.00; fifty copies, $9.00.

THE CHRISTIAN SCIENCE MONITOR

A daily newspaper of world-wide scope, particularly designed for those desiring a high-class publication in the home. It contains all the current news worth considering, all the departments of interest of a modern newspaper, illustrations of worthy features, and an unbiased editorial page which deals with the vital topics of the day. The MONITOR does not feature nor illustrate vice and crime.

SUBSCRIPTION PRICE: For the United States, Canada, Mexico, and Cuba, $5.00 a year, $3.00 for six months; all other countries, $8.00 a year, $4.50 for six months, postpaid. In the Greater Boston postal district the MONITOR will be delivered by carrier through the local news-dealer at the customary rate of 12 cents a week payable to the news-dealer. If delivered by mail $1.00 should be added to the annual subscription rate to cover extra postage.

The Christian Science Quarterly

Published January, April, July, and October

Contains the Lesson-Sermons which are read at the Sunday Services throughout the year in all the Christian Science churches. These Lessons, which present citations from the Bible and "Science and Health with Key to the Scriptures," are valuable for daily study.

TERMS OF SUBSCRIPTION: For one year, 50 cents; fifty copies or more to one address, 50 cents yearly for each copy. Foreign subscriptions, 60 cents. Yearly subscriptions only received.

TERMS OF SALE: One or more copies, postage paid, each, 15 cents; fifty copies or more to one address, each 12½ cents, postage paid.

Der Herold der Christian Science

Published Monthly.

A magazine printed in German, which publishes original and translated articles bearing upon Christian Science, and also testimonies of healing from Germany and America. It contains about thirty-eight pages of such reading matter, also the Lesson-Sermons which are read at the Sunday services in all the Christian Science churches, and is valuable as an authorized representative of the movement.

SUBSCRIPTION PRICE: For the United States, Canada, Mexico, and Cuba, 10 cents a copy, $1.00 a year in advance; all other countries, 12 cents a copy, $1.25 a year, postpaid.

Entered at the Boston, Mass., post-office as second-class mail matter.

ITEMS OF INTEREST.

National.

President Taft, having learned from the experience of his many official trips that first-hand information is the best, will expect his cabinet officers to make frequent tours of inspection, and in accordance with this view Secretary of War Dickinson will make an early visit to the Isthmus of Panama to inspect the canal, while Secretary of the Interior Ballinger will go to Alaska to investigate conditions in that territory, particularly in regard to public lands. Secretary of Agriculture Wilson expects to visit the various state experiment stations this summer, and Secretary of the Navy Meyer probably will visit the various navy yards of the country to acquaint himself with existing local conditions.

The naval establishment is to be furnished under contract with wireless apparatus which will transmit messages for a distance of three thousand miles day or night, and two ships are to be furnished with similar apparatus capable of sending messages for a distance of one thousand miles. The apparatus, it is said, will be thirty times as powerful as that in ordinary use. The department will be able to communicate with its vessels practically across the Atlantic ocean, and the achievement, if successful, will be one of the greatest in naval practice.

The Federal Court at Buffalo has denied the motion of the Standard Oil Company for a new trial and imposed a fine of $20,000. The case hinged on the Standard Oil Company's accepting concessions from railroads in the shipments of oil from Olean, N. Y., to Rutland and other points in Vermont. There were in all 346 counts found against the oil company, but thus far only forty have been considered. The railroads involved are the New York Central, the Pennsylvania, and the Rutland.

Congress will probably be asked by President Taft to make an appropriation for the use of the national conservation commission. This is one of the commissions affected by the legislation enacted at the recent session prohibiting the use of public money by a commission not authorized by Congress.

Louisiana is estimated to waste seventy-five million cubic feet of natural gas daily, more than 1-20 of that consumed in the United States, and the Secretary of the Interior has withdrawn from entry sixty-five hundred acres of natural gas fields.

By a unanimous opinion the Louisiana State Supreme Court upholds the constitutionality of the Locke bill prohibiting gambling on race-tracks.

Ex-President Roosevelt has announced that his much-talked-of trip to Africa is taken in the interest of the Smithsonian Institute.

A proposition is before the Massachusetts Legislature to tax automobiles according to their horse-power.

International.

The committee of the Government which was appointed last summer to inquire into the alleged American control of the British meat supply has finished the preparation of its report. According to the *Standard*, the committee has arrived at the conclusion that there is no evidence that any effective combination in the meat trade exists in Great Britain or that an American combination has obtained control of Great Britain's meat trade, although certain American firms in Smithfield have been able to fix prices and, to some extent, regulate the supply. The report also alludes to the handicapping of the British trade by the securing by Americans of all available freightage on cattle steamers.

The recently completed scheme for furnishing Manila with water takes its supply from a watershed one hundred and forty square miles in extent, being drawn from the Mariquina river, at a point twenty miles northeast of Manila. The works include a 42-inch steel pipe, ten and a half miles in length, a concrete tunnel four and a half miles in length, and a reservoir of fifty million gallons' capacity. The capacity of the system is twenty-two million, five hundred thousand gallons per day, equivalent to one hundred gallons daily for each person in Manila.

France, like the United States, is confronted with a big deficit in her revenues. The situation is rendered the more serious by the large number of pending socialistic projects involving heavy drafts on the treasury. The budget of 1909 necessitated the issue of $12,000,000 in treasury bonds, while the regular estimates for 1910 show a deficit of $45,600,000, and this without taking into consideration the proposed workmen's old-age and state railroad employes' pension proposals, which together involve a sum of $37,800,000 more.

Fifteen thousand square miles of territory have been added to the British empire by a treaty signed at Bangkok, Siam, under the terms of which Siam cedes to Great Britain the states of Kalantan, Tringano, and Kedah, which hereafter will be administered with the Malay federated states. Under the treaty British capital to the extent of $20,000,000 will be furnished for the construction of railroads south from Bangkok.

The Japanese budget for 1909-10 has been passed by the House of Peers in the form in which it came from the House of Representatives. In accordance with the policy of retrenchment in all departments of government, started by Premier Katsura, the budget effects a saving of about $178,500,000 in the empire's expenditures by postponing for eleven years work previously undertaken.

Advices received from Pekin tell of efforts to restore the navy of China at a cost of $100,000,000. Naval ports and docks are to be established, foreign experts engaged as advisers and instructors, and naval colleges established.

A permanent national exposition at Madrid, for the promotion of which an organization has been formed in Spain, will have for one of its chief objects the stimulation of scientific methods in agriculture and manufacturing.

A war army of 1,260,000 men is England's plan for the future. The proposition involves the unifying of all the fighting forces of the empire.

Industrial and Commercial.

It is unlawful for the railroads so to adjust their rate schedules as to force commodities into a particular city or port, according to a decision of the interstate commerce commission, just announced. The commission says in its decision: "In claiming that, as Chicago affords as good a market for grain from the North and Northwest as does Milwaukee, the principal defendant may therefore lawfully so adjust its rate schedules as to force the grain to Chicago, the defendant overlooks the right of the shipper to choose his own market and to do business where he prefers or finds it more advantageous to carry it on. It also overlooks the chief function of a common carrier, which is to carry at reasonable rates the traffic that is tendered to it. A carrier has no right to insist that a shipment shall go to the end of its rails if the shipper desires it to be diverted at an intermediate point to another market off its rails. Nor may a carrier accomplish these results indirectly by any unreasonable adjustment of its rate schedules with that end in view. It cannot lawfully compel the shipping public to contribute to its revenues on any such grounds."

A spark-proof smoke-stack, according to the *Technical World*, has been invented which promises relief to the forest-fire fighters if it should be adopted by railroads traversing forest regions. After being tested for some time on a Kentucky railroad it was demonstrated that not a spark escaped from the stack. So well does the Forestry Department at Washington think of this ingenious invention that it has asked the New York state public service commission to compel all railroads in the state to equip their locomotives with the new stack. The principle which led to the invention of the spark-proof stack is that all solids emerging from a locomotive smoke-stack, influenced by the pressure of the exhaust, hug close to the edge of the pipe and only the smoke comes up through the center. In this new stack a simple trap catches the sparks and cinders at the edge of the circle and sends them falling down chutes arranged on either side of the stack to the roadway below.

It is reported that the United States Steel Corporation plans immediate work upon the erection of a second great steel plant, to be located at Duluth, Minn. This plant will cost about one half as much as the new Gary plant, as plans now call for an expenditure of about $30,000,000. The same construction crews which worked on the plant at Gary, Ind., have been ordered to Superior to begin active work on this construction when spring opens.

The owners of fifty of the largest lumber-carrying vessels on the Great Lakes have agreed, it is said, to sell their boats to a corporation now in process of formation, which will own and operate fifty to sixty per cent of the lumber-carriers of the lakes. The value of the fifty vessels to be purchased at once has been mutually agreed upon as approximately $850,000. The new corporation will probably be capitalized at $1,000,000.

A company is seeking a franchise to pipe natural gas from the Caddo field to New Orleans. This will be the longest gas line in the world—three hundred and twenty-five miles—and represents an expenditure of $7,500,000 in the construction of the line to New Orleans alone.

CHRISTIAN SCIENCE SENTINEL

"WHAT I SAY UNTO YOU, I SAY UNTO ALL — WATCH" JESUS

THE HIDDEN SPRING.

REV. WILLIAM P. MC KENZIE.

WHAT is of most worth to the world, things or thoughts, material possessions or spiritually developed men? Christian Science answers this question both speedily and practically. Indeed the world itself has answered the question by enshrining in its memory the names of those who have brought truth to men from the unseen realm of Spirit; whereas, the colossal monuments built by those who had merely great possessions, in many cases arouse wonder but not remembrance. What, then, shall one do to serve best his generation? An invention may be superseded, a book may be forgotten, a fortune may disappear, taking to itself wings like the eagle and passing beyond all touch of the outreaching hands. A man need not mourn, then, because he cannot serve men as inventor or author or possessor of wealth. He may serve in every place and time by being a true man, for there is no service so good to one's day and generation as that of developing and expressing the integrity of manhood and womanhood. The true method of philanthropy may be illustrated in a parable.

Once there was a rich man who had great estates. At one time his land had been traversed by a clear-flowing brook which was fed from a spring whose water never had failed. Through long neglect, however, the channel became choked, and the waters were diverted and made to overflow, so that now they spread out and made a large area of swampy land. Once the villagers living near to the great estate had been able to find pure water to drink from the brook, but when it ceased to flow they had to dig wells, and so were supplied. Then there came a hot summer when the water in the wells sank so low that nobody could have as much water to drink as he craved, and the people grew languid and the children cried out because of thirst. Then the rich man roused himself and went among them speaking comfort. He sent grapes from his hothouse to refresh the parched lips. He even procured from the markets oranges and other fruits which had been imported from far lands, though the cost to him was great. Because of this expense and trouble he felt that he was doing a great service to the people; but the fruit was soon gone, and the people were sorrier than before, because they missed it.

"I have surely done all that could be expected of me," said the rich man; but his friend said, "Have you? It is true that at great expense you have given the thirsty people an intermittent pleasure from the costly fruit, but what they want and need is a daily supply of pure water. Dig out your spring again, repair the water-course, let the water flow as was its wont, so that all may drink and be refreshed."

When this good advice had been followed the rich man learned how much better it is for a man to supply a constant flow of pure love—the affection which satisfies daily needs—to men, rather than to impose upon them occasional costly and unusual benefits which soon leave them unsatisfied. When his life was filled with trouble and annoyance in his effort to do good, he felt that something was being accomplished and that the villagers were under a debt of obligation to him for his unusual efforts in their behalf. What they needed was natural good, while he was forcing upon them unnatural benefits. What they needed was permanent relief, while he was giving only spasmodic and unenduring assistance. The water which was finally made to fill its natural channel may typify the refreshment coming from that human kindness which should flow through every life. Instead of seeking to do great things, to satisfy high ambitions or to devise fantastic philanthropies, it were better for every man to find within himself the hidden spring, and allow its daily supply to reach others.

Some one has told of a dream which may further illustrate the problem of life. Generally the dream or vision of the night is a confused combination of the usual activities of every-day life, without nexus or purpose. It is as if one read from a torn newspaper the items of news in scraps across the page. But there are times when a dream is a vision of reality, as in this instance. Said the dreamer: "For some reason I had considered a piece of land so valuable that I bought it, although all I had was spent in so doing. When I went to look at it I seemed to have to travel to another country before finding it, and then was disappointed to find it barren. Yet I knew I must gain my living from it, since I had no other resource left, and I thought with dismay of the toil among the rocks and sand-barrens in the endeavor to coax from the niggardly soil some return for my labor. I found here and there springs of water that had marshy places near them where luxuriant green rested the eye, but nothing grew in the mire that was of value.

"I spoke to some of the people of the country about the land. 'What it needs is water,' said they. 'But where is water to be had for these barren reaches?' I asked. They replied, 'Behind that mountain is a lake which is never empty; there is an abundant supply.' 'Must I, then, blast away the rocks, and let the water flow this way for my land's welfare?' 'Why should you do that,' said they, 'when these springs are connected with that never-failing source and never go dry. All that your barren land needs is irrigation. The land is good and the water-supply is abundant.' Then I perceived what must be done, and I found myself with a spade in my hands, digging canals for the water to flow out upon the lands, so that instead of stagnating in the marshes it might sink into the soil and make its hidden fertility available. When I awoke the impression of my dream remained with me, and there came into my thought the words of a hymn which I had often sung, but now with a new meaning:—

"Make channels for the streams of love,
Where they may broadly run;
And love has overflowing streams,
To fill them every one."

Now no analogy is perfect, nor is any parallel exact, but an illustration may give us a gleam of light which helps

to make the thing itself understood; then the parable is no longer needed. There comes a time in the life of the progressive Christian Scientist when he understands how his former methods of doing good were really the carrying out of his own plans for others, and the imposition of the government of human will upon them. He further understands that the good derived from a higher source than the human may come to a man and flow from him to others. But he finds it like parting with all he possesses to give up his former efforts for others, his interference with their lives, and instead give just the care and cultivation to his own life which will make it fruitful in the right way. Eventually he discerns the source of his life's enrichment to be that unfailing truth which is like springs of water in a thirsty land. Then for the first time his life becomes fertile, and by virtue of developed character he becomes a real benefactor to the race.

THE CHURCH AND THE INDIVIDUAL.

WILLIAM R. RATHVON.

THE earnest truth-seeker who approaches Christian Science with open mind, and who has perhaps been healed thereby, looks at times for what he does not find and finds what he is not seeking. In the ethics of Christian Science he sees perfection, and he looks for perfection in its adherents. In his ardent thought he invests the Scientists with robes that should show the radiance of sunlight, and is dismayed sometimes to find them stained with clay and dingy with dust. He may thus be tempted to confound Christian Science with the Christian Scientist, and to condemn the latter because he is not the complete embodiment of the former.

Particularly is the zealous beginner disquieted when he finds an absence of ideal unity and love among Christian Scientists; when he hears complaint of lack from one who freely speaks of the unlimited bounty of Truth, available for all. The steadfastness of his faith may be seriously tested if he finds the church of his adoption, as he may have already found its individual members, a long way removed, in its demonstrations, from the ideal presented in its manual of government. But in due time he awakens to the fact that it is not merely truth professed, but truth practised which makes a Christian Scientist worthy of the name. Then, if he is wise and true as well as zealous, he finds in each shortcoming on the part of others, a spur to better work on his own part. As he learns that the place of conquest over every error is right in his own consciousness, he becomes less concerned about the faults of others and more about his own.

In his awakening he comes to see that the words "mine" and "thine" are not to be applied to truth; that the basis of every mental endeavor, of every treatment, must be the desire that good shall result, whether such good fits in with personal preferences or not; that to outline in thought how good shall or shall not be manifested, and then do all that can be done to make it come out a particular way, is to invest the human mind with power for evil, it is to recognize minds many instead of the one omniscient and omnipotent Mind. He finds that every manifestation of error must be detached from personality; that it is right to condemn sin, but not the individual, and that in searching for discord's source it is imperative that we let the first glance be inward. This transformation will not be instantaneous, but gradual, and the outcome will be blessed and lasting.

In this connection the story of how one little band of Christian Science believers has solved some financial problems may be of interest. When a date is announced for a meeting of the members, all are requested to consider thoughtfully the matter, in order that each may acquire a clear understanding of his duty and privilege in the premises. When assembled, the chairman states briefly the purpose of the meeting, the amount required, and such other details as are important and necessary. Blank slips of paper are then passed, and each is invited to state thereon the amount he will subscribe. It is understood that these slips are not preserved as obligations, that no name need be signed unless desired; their sole purpose is to show how much may be relied upon as attainable when needed. Usually brief extracts from our Leader's writings relative to giving are read, but discussion is not encouraged and no one is urged to give nor are amounts suggested. The slips are gathered and counted, and the total is announced. There has never been a failure to reach the amount desired nor a known case of neglect to meet a subscription thus anonymously made. On the other hand, without exception, and it has been tried many times, the ultimate amount raised has exceeded the initial subscription, being subsequently added to from outside and inside sources. The success which follows this plan is traceable, among other things, to its doing away with the mesmerism of personal rivalry. No one knows what his neighbor gives, nor measures his subscription by what another has done on a previous occasion. There is no opportunity for comparison, the transaction being between the individual and divine Principle, so that fear of want and selfish motives find no footing. The widow's nickel ranks with the merchant's eagle in the till of Principle.

Centuries ago a little church in Macedonia was one day gladdened by a letter from a friend whose loving care and wise counsel had more than once carried them through deep waters. In a distant land, on trial for his life before a heathen emperor, deserted by his friends, perplexed but not dismayed, he sent to the little church at Philippi words of wisdom, courage, and good cheer, odorous with an all-pervading trust in God. That letter of St. Paul has carried solace and encouragement to unnumbered churches, great and small, in the intervening centuries. In it he wrote those oft-quoted words, "Work out your own salvation;" and the admonition is as needful today as it was then.

The church that accomplishes much for Christian Science is that one which has a large proportion of active workers. The habit of relying upon practitioners to do work that we can and ought to do ourselves, is detrimental to the growth of the individual and the church. It leads to mental laziness, and tends to debilitate that prompt and ready resistance to error which does so much toward making treatment effective. It has been aptly said that every Christian Scientist should have at least one patient—himself. It might be added that when he does his best for this patient he will also be doing well for his church.

"KNOW THYSELF."

J. MILES CHAMBERS, M.R.C.S., ENG.; L.R.C.P., LOND.

THE valuable precept, "Know thyself," comes to us from the writings of one of the Greek philosophers. It was placed over the porch or entrance to one of the temples of ancient Greece, a witness to the fact that they, like we, sought for an answer to the question, "What must I do to be saved?"

Webster's Dictionary gives the definition of the verb "to know" as follows: "To perceive with certainty; to understand clearly; to have a clear and certain perception of truth, fact, or any thing that actually exists; *e.g.*, we know that truth and falsehood express ideas incompatible with each other." Juvenal writes (Satires, xi. 27), "The precept, 'Know thyself,' is heaven-born;" and when it is considered in conjunction with the teaching of Christian

Digitized by Google

Science, it is indeed the open door which no man can shut, a veritable entrance to the holy of holies. "Know thyself:" know that the true selfhood is spiritual, not material; that it is eternal, not temporal; that it is coexistent with God, the Lord and giver of life; that it is a son of the living God, joint heir with Christ; that it is free from the law of sin and death, and in this knowing human consciousness will pass from death unto life.

"In him [God] we live, and move, and have our being," said Paul; "for I am persuaded, that neither death, nor life, nor angels, nor principalities, nor powers, nor things present, nor things to come, nor height, nor depth, nor any other creature, shall be able to separate us from the love of God, which is in Christ Jesus our Lord." And our Leader says, "He [man] has been forever in the eternal Mind, God" (Science and Health, p. 336). If this be true, if our conviction of the "hidden mysteries of God" is such that the life and ascension of the perfect Jesus have established this thought of the nature of man in consciousness as our inalienable birthright, we know that we may be guided in all our doings and relations by the one Mind, good. Knowing this, we may learn, by the exercise of our hitherto dormant faculty of spiritual perception, to live in the indescribable joy of realizing that right consciousness is sensitized to receive impressions only from light and love, that it is incapable of receiving or recording impressions of darkness or falsity.

Does anything seem to give us a sense of discord? Let us know our true selfhood,—know that the shadow is cast upon the human sense, is recorded by the mortal mind, whose life is but for a day, whose evidence has been forever unreliable; know that in ourselves is to be found the remedy for every seeming discord if we open the doors of our hearts to the light and might of God, good, recognize the falsity of the impression thrown on the screen of consciousness, which is obliterating for the moment our rightful outlook with the distortion which claims attention.

It is recorded that at the outset of his ministry our Master met and foiled the tempter with the words, "Get thee behind me, Satan." Thereupon the devil "departed from him for a season," and "behold, angels came and ministered unto him," and "Jesus returned in the power of the Spirit into Galilee." Temptation is an every-day experience of our own, but if we meet it with an emphatic "Get thee behind me, Satan! What have I to do with thee?" we, too, may experience the ministrations of angels, "God's thoughts passing to man; spiritual intuitions, pure and perfect" (Science and Health, p. 581), and return to our life-work "in the power of the Spirit." We do not have to die in order to gain the power of Spirit; our Exemplar overcame the world while he was in the world, and we have but to obey his command, "Follow me." Jesus went apart into the wilderness, in order to receive direct from the Father the strength with which to overcome the assaults of the evil one, and we must seek our strength from the same open fount; there is no other.

Does the business of life seem to oppress, and demand the exercise of deep and careful thought in order that it may be brought to a successful issue? Let us know that the Mind which has created and still maintains the immensity of the universe with unfailing precision, is the Mind which has ordained and still holds the details of our life-work in its grasp; hence we may look to Mind for guidance. Ours it is to wait on God, ours to perceive with patience and trust the undisturbed and effective activity of that Mind, with the sure knowledge that God, good, produces naught but good. It is ours to know that the human mind cannot perceive the things of the Spirit, but that Mind, Spirit, will control all things through the Christ-idea in us. Does our brother seem to offend us? We are being led up into the wilderness to be tempted of the devil. Let us know the true self. The coming of offense to our thought indicates a lapse of watchfulness on our part in allowing, for the fraction of a moment even, the claim of evil to receive attention from our awakening consciousness. Knowing self, the temptation to dwell on the shortcomings of our brother will depart, and in its place will come the consciousness that our brother man, also, "dwells forever in the eternal Mind" (Science and Health, p. 247); that he too is actuated only by the thoughts of God, who is Love.

Is it fear of lack which claims attention to the exclusion of all else? We may know that the very thought indicates that the human mind is assuming a control which is the rightful prerogative of spiritual consciousness. Let us, then, ask for that supply which is the real substance, seek earnestly for a clearer perception of the Scripture teaching, for "in him we live, and move, and have our being." Lastly, do we sit sorrowful and sad by the couch of a dearly loved friend and companion, apparently powerless to mitigate his pain? We may claim now, and ever, that noblest privilege of man, the understanding of Him who is Life, Truth, and Love, made clear in individual consciousness by the living Christ, an understanding as efficacious today to heal the sick and cast out devils as it was nineteen hundred years ago. Let us fulfil the injunction, "Know thyself," and that peace which "passeth all understanding" shall ever keep our hearts and minds through Christ Jesus.

ORGANIC DISEASE HEALED BY MIND.

REV. G. A. KRATZER.

EVEN those who declare that matter is real, concede that it is wholly non-intelligent. In itself it does not possess the power of motion; hence matter cannot plan its own states. It cannot rearrange itself, whether in masses or in molecular relations. It cannot carry out any program. If there be any motions or rearrangements in so-called matter, whether in the human body or elsewhere, these changed conditions are the results of mental action; and this is true, even though it be impossible to discern whence the mental action emanates.

If, therefore, there seem to be any abnormal conditions, or any structural changes in the body, these changes are the results of mental action, and being unideal in character, it is necessary to conclude that they are brought about by unideal or erroneous mentality, that is, by the carnal mind, the devil. It is not asserted that these changes are brought about primarily by the thought of the person who is afflicted, but they are brought about, in belief, by general mortal mind, the one evil. It ought to be perfectly plain that if erroneous mentality or false sense rearranges, in belief, the particles of so-called matter in the human body, so as to produce a change of structure known as an abnormal growth or a disease, then the application of true mentality, the right idea, or the truth, should be able to overcome or stay the proceedings of the mentality which is but false belief, undo what it has seemed to accomplish, so that a healthy and harmonious condition shall be manifest where before discord was in evidence.

Since divine Mind is all-powerful and everywhere present, it is natural and lawful to rely on our knowledge and application of this Mind to overcome the supposed workings of false sense and to bring about harmonious conditions of the body. Would it be reasonable to set any time-limits to what the infinite All-power can accomplish when thus applied through right consciousness to the very finite task of overcoming any discordant condition of the human body?

Matter is not real, but is only the substratum of mortal mind, the objectification of general mortal belief. Hence the application of divine Mind in the cure of organic dis-

Digitized by Google

ease is not the control of mind over matter, as that expression would be commonly understood, but it is the control of Truth over error, divine Mind over mortal mind in the various phases of its manifestation. The supposed control of mortal mind over matter is simply a finite belief. The application of divine Mind to control mortal mind and its substratum, miscalled matter, is the practice of Christian Science.

SPIRITUAL ATMOSPHERE.

REV. HENRY M. PERKINS.

To the ordinary mortal thought certain conditions of temperature are regarded as essential to health. The truth that Life is spiritual is overlooked by these people. Mrs. Eddy has said, "God never ordained a material law to annul the spiritual law" (Science and Health, p. 273). There is a spiritual atmosphere which is always invigorating, to which we may ever have access. This blessing is gained in several ways, one being mutual fellowship. The apostle says, "If we walk in the light, as he is in the light, we have fellowship one with another." How often have help and strength been gained by the interchange of thought, experience, and testimony in our Wednesday evening meetings, and at other times, by those who have demonstrated God's allness, as revealed through Christian Science. Kindred tastes and pursuits imply fellowship. This helpful influence is beautifully expressed by these lines in one of our Leader's hymns,—

Father, where Thine own children are,
I love to be.

Miscellaneous Writings, p. 397.

We may also realize the rich inheritance of Christian experience enjoyed in the past by all those who have loved God. In view of this Paul says, "Now therefore ye are no more strangers and foreigners, but fellowcitizens with the saints, and of the household of God." We have for our contemplation the lives of God's children. In the Bible their pathway is faithfully delineated. Their temptations, struggles, and sometimes, it is true, their defeats; yet again, their faith, victory, and final understanding of Truth, remind us that with divine equipment we also may conquer the enemies which do so sorely beset us, namely, sin, disease, and death.

What a brilliant array of heroic deeds is given us in the 11th chapter of Hebrews. In another place we are exhorted to be "followers of them who through faith and patience inherit the promises." After a review of the conquests of faith, the apostle sums up his exhortation in these words: "Wherefore seeing we also are compassed about with so great a cloud of witnesses, let us lay aside every weight, and the sin which doth so easily beset us, and let us run with patience the race that is set before us." The material conditions of the world vary from age to age, but the divine Principle—Life, Truth, and Love—is available in all human need, and will insure spiritual victory.

This spiritual atmosphere is, however, chiefly the result of fellowship with God. To quote John again: "Truly our fellowship is with the Father, and with his Son Jesus Christ." We read that Enoch "walked with God." So intimate was this fellowship that he did not see death, but was translated. What an inspiration and incentive in meeting all the problems and contingencies of this earthly life, to remember that God, the all-powerful and ever-loving, is constantly with us, and that we may confidently look to Him for guidance and blessing so long as we are obedient to His precepts. Breathing this heavenly atmosphere of fellowship with God and with His children, we become refreshed and strengthened to meet the seeming conditions of a material world, and are enabled to cast out lurking error by realizing the presence of Truth and Love. In the words of one of our hymns,—

In atmosphere of Love divine,
We live, and move, and breathe.

THE LIBERALISM OF CHRISTIAN SCIENCE.

A. JACOBSON.

WHEN our Master was asked by a certain lawyer, "And who is my neighbor?" he told him the story of the good Samaritan, showing that Jesus appreciated the good wherever it was found, irrespective of creed, dogma, or man-made theologies. Likewise is a student of Christian Science impressed with the liberal and rational view taken by Mrs. Eddy, the author of "Science and Health with Key to the Scriptures." On page 361 of this book she gives credit to the Jew for being a monotheist,—having one omnipresent God; on page 238 we read about the faith of the Catholic girl who lost her crucifix, and on page 164 the author refers to the cultured class of medical practitioners as "grand men and women." One cannot fail to recognize the generous and kindly qualities of this real Leader, since all her work tends to uplift humanity; never to condemn or to destroy.

Nearly all who have come into the fold of Christian Science were formerly members of one creed or another; some were unbelievers, and perhaps sincere at that. The father of the writer was an orthodox rabbi, his oldest brother is a Jewish minister, and another brother is a medical doctor, and I say with deepest respect for them that they are sincere in their beliefs. Nevertheless, if they were to take up the study of Christian Science they would become more liberal, they would understand more about the true brotherhood and the one fatherhood. When any one applies for help in Christian Science the practitioner does not ask what religious label is attached to the applicant, but rather his aim is to make the patient understand that we are all children of one Father, and that this Father gives to all alike if they come to Him. This rational view, when understood by the newcomer, helps him to look with compassion upon those who are still enthralled by man-made dogmas and creeds, and he is liberal, for he knows they need help and not ridicule. So, with a heart overflowing with joy, he thanks the giver of all good for having revealed to the world this healing truth through our Leader, who teaches us by precept and example how to become true followers of Jesus the Christ.

[Written for the *Sentinel*.]

"THE DARKNESS IS PAST."

ADIN E. BALLOU.

O ICY wind, from snow-clad mountains blowing,
From summits where the winter still holds sway,
In the chill freedom of your ebb and flowing
Is felt no promise of the coming May.

Yet April buds 'gainst April's sky-line swelling,
And willow shoots aglow by loosened stream,—
These know the secret in its earliest telling,
That spring is here, and winter but a dream!

Tonight may break, like some soft word of warning,
A first sweet mildness 'neath a wid'ning moon;
And myriad throats, joy-strained, will greet the morning
As spring reveals their rapture-waited boon.

So when we walk in wind of error's chilling,
And self-cast shadows lie athwart our way,
We know the truth, and soon the light comes, filling
A perfect pathway to a perfect day.

SELECTED ARTICLES.

[Algernon Hervey Bathurst in *Kentish Mercury*, Greenwich.]

Through the study of Christian Science we soon learn that the body of itself can do nothing, but, as the wise man said, that as a man "thinketh in his heart, so is he." And further, we learn that just to the extent that we let that Mind be in us which was also in Christ Jesus, do we lose the consciousness of evil, sin, or sickness, with the result that we are healed. The Master, who said distinctly that he had not come to destroy but to fulfil God's immutable law, healed the sick through the understanding that good never did produce evil, and that, consequently, evil has no legitimate existence even as a physical trouble. Christian Scientists have had so much positive proof of the health and harmony that comes into the lives of those who meekly endeavor to put into practice the teachings of the Master, that no room is left for doubt as to the truth of the teachings of Christian Science given to us by Mrs. Eddy; and we maintain that, as it is the aim of every Christian to practise what Jesus of Nazareth taught, so it is our privilege and duty to preach the gospel and heal the sick, not separating the command which Jesus gave as one. With regard to faith, no better definition could well be had than that given by the Master when he said, "What things soever ye desire, when ye pray, believe that ye receive them, and ye shall have them." St. Paul again referred to faith as "the substance of things hoped for, the evidence of things not seen," and this is the faith for which Christian Scientists are striving. It is through this faith alone, faith in the power of God, good, not seen by the physical senses and not needing any assistance from material means, that the sick are healed and the sinner reformed in Christian Science today.

Our critic refers to sin as a "transgression, violation, or disobedience of God's law." The question at once occurs, What is sin, and what are God's laws? There is one great cause and creator, the infinite Spirit, God, or good expressed in His perfect spiritual creation; and since Spirit, God, can be discerned only through spiritual sense, we must assume that just so long as we are unable to see beyond the material, but continue to accept the testimony of the carnal mind and the physical senses which St. Paul described as "enmity against God," we shall fail to recognize God's law. This must result in discord, suffering of some sort, and it is only through the recognition of God's perfect law of harmony that we are freed from this belief of evil or suffering. Were it possible to do evil without suffering we might believe evil to be good. The evil or punishment is not, however, doled out by Deity, and ceases the moment we perceive that the "Lord our God is one Lord," omnipotent and omnipresent good, and that therefore "evil," as Mrs. Eddy says on page 192 of Science and Health, "is not power." In regard to prayer, Christian Scientists are learning that there is no need to ask God to do what He has already done, but that they need a clearer perception of what God is, a better understanding of Him without whom "was not any thing made that was made." As we begin to change our conception of God and His creation we learn what the apostle meant when he said, "Old things are passed away; behold, all things are become new."

[From an address before the National House of Representatives by Congressman Nye of Minnesota.]

We know but little of the source of real power. We associate it with external pomp and parade. We think of gathering armies, of magnificent navies, of gleaming swords and clashing steel, of roaring artillery, of waving banners and beating drums; but these are not the sources of real power. Human judgment is often swept from its throne by the spectacular and by transitory appeals to the mere passions of men. But these are only bubbles and foam on the ever-flowing sea of time in which great actions and great events follow in succession. We are prone to look out upon the world and to think that the outer phenomenon of things is the real. We confuse substance with show. Not long ago I read an admirable lecture on the subject of substance and show. We think all substance is bulk, is that which is subject to measurement; but after all, as the great teacher Paul says, "the things which are seen are temporal; but the things which are not seen are eternal." This man whose lecture I read spoke of the outer phenomenon of things, the scholastic as distinguished from that reverence of thought which leads men intuitively to that which inspires, rather than mere scholasticism.

The tree, the oak that has stood for a hundred years and dared the tempest and the storm, we think of as it appears outwardly, mere bulk or form, but substance really is that which creates and produces and classifies. The real substance of the tree is unseen. It is that which winds its rings about it year by year, glues the bark to the stem, sends its living leaves to the heavens and its roots far into the earth. It is unseen. The scholars tell us that in the whole vegetable world there are but three or four elements or gases—I think the oxygen, nitrogen, hydrogen, and carbon. The catalogue is not so important; but there is a reverence of thought which might lead us to wonder and adore the infinite intelligence and love which takes this common stuff and works it up into all the manifold manifestations of beauty and life, which makes it an orange here, an olive there, a pine here and an oak there, a dahlia here and a violet there. This is the real substance, the intelligence and power that is, after all, the real. This is the substance; all else is but a part of the show of things, only the outer phenomenon. In human society the same great law is true, whether it be the church, the fraternal organization, or whatever it be; it is not its number, not its form or ceremony or ritual, but its spirit and its life, expressing itself in the daily lives of men. This is substance. And what is a nation? Not the outer phenomenon, not wealth or commerce or mines or fields. There is back of it all a spirit which is the real nation and which constitutes the enduring republic. "The things which are seen are temporal; but the things which are not seen are eternal." I present to you today what I believe to be a type of that better, interior, and unseen life and spirit of this Republic, and I find it personified in the life and character of that great man whose love for his fellow-men made him the wonder of his day and the wonder of all coming centuries.

[Charles K. Skinner in the *Jackson* (Mich.) *Citizen Press*.]

Our critic says, "The truth that there is a divine power to alleviate suffering is not original with Christian Science." Very true. Mrs. Eddy does not claim to have invented a new truth, and certainly her followers do not claim it for her. It is granted that the power of God has been shown in the healing of disease all down the ages. It is claimed, however, for Christian Science, that it is the only system of healing since the time of the early Christian church which operates by the application of a Principle that, rightly understood, heals all diseases.

The gentleman adds, "Christian Science makes no distinction, but treats both functional and organic disorders." The Christian Scientist does not divide Christ's robe, declaring in one breath that God is omnipotent, and in the next that He is not. The Master made no distinction between one ailment and another, and it is certainly astounding to find a clergyman taking the position that God is not omnipotent at all times. We are then told that "a great

Digitized by Google

many Christian Scientists die of organic diseases." I dislike to think this statement was more than a thoughtless expression, for certainly there is no foundation for it. In this state, during the past two years, less than eighty deaths have occurred of persons under Christian Science treatment, and of this number about sixty had been given up by the doctors as incurable from organic troubles. During the same period, the state board of health reported over seventy thousand deaths from various causes, the rate being about fourteen in one thousand. When it is taken into consideration that in Michigan the number of people depending on Christian Science for physical help numbers many thousands, the death-rate is small.

Again the gentleman says, "Like others, I do not understand the English which Mrs. Eddy uses to explain her ideas." Like some others, he may have attempted to measure spiritual things by material, and finds that they will not agree. Mrs. Eddy's statements in the text-book refer to the spiritual man and universe, except when matter and material things are discussed to show their unreality to God. I have never, in all my experience, found a person who read the text-book from the view-point of its author, and with a sincere desire to understand, who had the least difficulty in comprehending its statements. As to the Bible being an open or sealed book, Christian Scientists take the position of the apostle, that "the letter killeth, but the spirit giveth life." Until the spiritual meaning of the Scriptures is understood sufficiently for its practical application to our daily needs, it is certainly not an open book.

[W. J. Bonnin in *Manchester* (Eng.) *Courier.*]

Christian Science demands a lively faith, rising, through constant translation into works, into the higher planes of spiritual understanding and knowledge; and while it enforces calm and orderly habits of thought, it induces a mental activity of the highest quality. "Inert" and "inactive" would seem almost the last epithets to describe such a faith. Again, a vague general assertion to the effect that Christian Scientists have persisted in abstaining from the wares of the chemist and druggist till "they have declined into a state of health past remedy," is a broadside which, happily, falls very wide of the mark.

The fact is that Christian Science churches are filled with those who testify to the direct contrary, and as Christian Science organizations are increasing over the world at a rate equal to a new center being established every four days, it will be seen that the volume of this testimony is an ever-growing one. Further, Christian Science does not, as the writer of the article seems to assume, rely on suggestion, will-power, or any other agency of the human mind, but especially and emphatically disowns and discountenances them as mere counterfeits of the one true method practised by the Master, and by him ordained both as the reward and the test of a true belief in him, the spiritual understanding of the omnipotent, omnipresent love of God, the infallible destruction of that which is not real and eternal by that which is.

[George Shaw Cook in *Eureka* (Ill.) *Democrat-Journal.*]

Christian Science teaches that the only creator is God, divine Love, eternal Life. It teaches that this God who is Life and Love "made all that was made" and pronounced it good, but did not make anything evil or that could cause evil, pain, sickness, or death. What possible comfort can the sufferer derive from believing that pain and sickness are from God, and therefore are real and indestructible because of Him? Has such a belief been of any advantage to the countless millions who have sickened and died under the intolerable discouragement which it fosters?

On the other hand, is it any comfort or advantage to the sufferers in this day and age to have learned through Christian Science that their suffering is needless, that pain and sickness are illegitimate, monstrous, abnormal, unreal, and therefore that they can be successfully resisted and scientifically banished? The answer comes from a host of grateful beneficiaries of Christian Science, that its teaching of man's rightful dominion over evil (including pain and sickness) has caused them untold joy and comfort and has given them a foretaste of the "new heaven" and "new earth" in which St. John said "there shall be no more death, neither sorrow, nor crying, neither shall there be any more pain: for the former things are passed away."

[Editorial in the *Fairhaven* (Mass.) *Star.*]

Our friends, the doctors, or at least some of them, are most desirous of forming a trust. They insist that none but themselves are competent to treat diseases, and are constantly urging laws to prevent the laity from interfering with their apparently profitable business. There are a good many honest, intelligent people who are even more successful than the doctors in healing the sick, and every one is entitled to the privilege of selecting for himself a treatment that has his confidence, whether it be "medical" or "mental," so long as it does not conflict with the rights or safety of others. It is just as essential to have medical as religious freedom. We are not told by law that we must swallow this or that doctrine for the salvation of our souls; neither should we be compelled either to die or swallow nauseous medicines for the salvation or salivation of our systems.

[Albert E. Miller in the *Examiner and Express,* Lancaster, Pa.]

Christian Science is not the offspring of Swedenborg's teaching, as alleged by a critic, and much less can it be said to bear any relationship whatsoever to that of Mesmer. On the contrary its works are a revival of the apostolic healing instituted by our Saviour and practised by his disciples and the early Christians for upward of three centuries after his ascension. The fact that Christian Science operates through a mental instead of a material process is no more argument in favor of its being mesmeric in its action than to charge the reformation of sinners to the influence of hypnotism on the part of those who show the sinners the way out of sin and thereby induce repentance. The whole process in such cases is purely mental, and the continuance of reform is dependent entirely on the state of mind of the repentant one.

Through the study of the Holy Scriptures Mrs. Eddy, the Founder of Christian Science, was finally led to the discovery that only through absolute dependence upon God, and a demonstrable understanding of our relationship to Him, can we hope to maintain ourselves in good moral and physical health. This led to the founding of Christian Science, and the eager acceptance of this teaching by the multitude of sick folk who have found healing in its ministrations, furnishes all the proof necessary to convince the unprejudiced that the origin of this faith lies entirely apart from the human and rests solely upon the divine. Therefore it is plainly evident that the credit for its good works cannot honestly be ascribed to any but the one who discovered Christian Science and founded the movement which bears this name.

[Frederick Dixon in *Vitality,* London, England.]

Today, as of yore, when a man knows the truth he knows God, and in that he becomes the freeman of the Lord. If this freedom had only conferred immunity from neurotic disease, it would have accomplished something that has defied all the generations of doctors from Galen to our own time, but the fact is that the healing of organic

Digitized by Google

disease by Christian Science is even more common than the healing of hysteria. No one, I imagine, would classify cancer, epilepsy, or consumption as neurotic, yet all these are being destroyed by Christian Science every day. In the pamphlet entitled "Christian Science and Legislation" instances of the cure of these and many other types of disease are given, and, if anything was to be gained by it, such instances might have been increased indefinitely. The evidence in support of these cures is irrefutable, and has satisfied Judge Clifford P. Smith, a man trained by years of experience to sift and weigh evidence of every kind.

The fact is that Christian Scientists are meeting today the cry which Jesus met. When the blind man was healed, the Pharisees, instead of rejoicing, began at once to suggest that he never had been blind. The Jews, John tells us, did not believe. They went to his parents and demanded, "Is this your son, who ye say was born blind?" And when his parents had replied that he certainly was born blind, and when the man himself had flouted them with the irreducible minimum of his reply, "One thing I know, that, whereas I was blind, now I see," they answered with their own irreducible minimum, "And they cast him out."

[Olcott Haskell in *Oakland* (Cal.) *Tribune*.]

Christian Science does not teach "the power of mind over matter" in the sense of human will-power being a healer, but it recognizes the power of divine Mind, God, over all His universe. Christian Scientists have established no spiritual hierarchy or despotism, but they encourage the freest investigation and study, since each man must be saved through his own understanding of the truth. The attitude of a Christian Scientist is that of unquestioned obedience to Principle, but not to any human being. He recognizes the deep insight attained by Mrs. Eddy, and is glad to follow her, in accordance with her own request, "only so far as she follows Christ" (Messages to The Mother Church, p. 70).

This Science has probably done more to lessen the unreasoning fear of epidemics and of so-called incurable diseases—to deliver men from the hopeless bondage to which they had been consigned—than has any other system. Instead of antagonizing progress in the sciences, a Christian Scientist recognizes the value of human research, of art, philosophy, and discovery; and in regard to methods of healing he leaves all persons free to choose for themselves, urging only that each system be judged on its merits. He is taught to respect the laws of our land; to observe cleanliness and established rules of sanitation. He does not ignore the human body, but seeks, like St. Paul, to live in subjection, not to the laws of the flesh, but to the higher "law of the Spirit of life."

[J. V. Dittemore in the *Telegram*, New York.]

There can be but one "school of Christian Science." Mrs. Eddy's life-work has been to elucidate divine metaphysics, to reduce to a comprehensive science the spiritual rules or laws of God, the creative and governing Principle of the universe. Correct and demonstrable knowledge of Deity must be scientific in the highest sense, and must be "without variableness, neither shadow of turning." Hence there can be no differing "schools" of Christian Science, for in all scientific demonstration the slightest variation from the established rule must lead to erroneous conclusions and results.

In Christian Science it is proven that all cause and effect are mental. Hence the application and practice of Christian Science are at all times metaphysical—above the physical. If Christian Science is true in part it is all true, for its logic is faultless and its conclusions rest absolutely on the basis of the omnipotence of Mind and the impotence of all that would oppose Mind. The world resents innovation. All great revolutions in human thought, regardless of their value to humanity, have passed through stages of bitter opposition and condemnation before the beneficence of their mission has been perceived or acknowledged. The progress of the Christian Science movement is no exception to this rule.

The world may refuse to believe that matter is non-intelligent or that drugs have no power apart from the patient's faith in them and the universal belief in their potency. It is slow to acknowledge that all disease is of mental procurement and that medical practice is not a science, but simply the application of a system of theories, speculative and conjectural, founded on the fluctuating beliefs of the minds of mortals and incapable of exact or scientific demonstration. It is a strange characteristic of the human mind that mortals may see thousands of instances of regeneration and healing through Christian Science, and so easily prove for themselves the basis of its accomplishments, but still be willing to accept as true the contradictory charges of some whose professional interests have been considered in jeopardy and the success of whose criticisms and condemnations of the subject can only be in proportion to the world's willingness to believe without investigation. No comparison can justly be made between the practice of Christian Science and of material methods of healing without taking into consideration the successes of each as well as their failures.

[Ida Hodnett in the *Age-Herald*, Birmingham, Ala.]

"Christian Science" must mean the science, or accurate knowledge, of the Christ. This accurate knowledge of Christ must be in accord with the law of Spirit or God, which law cannot be other than that which shows the nature or essence of God. Even human laws show more or less truly the mental attitude of the people who make them. God's law cannot be said to be made, for it coexists with and expresses His nature. The operation of this law may be discovered by human beings who are able to recognize it, but not "originated." Mrs. Eddy uses the term "discovery" in describing what she has learned of the things of God, and it is noticeable that the unfolding of the truths of Christian Science comes to each of its followers as a discovery more or less clear. In order that this discernment of the divine nature and its laws or modes of action may be made useful, it must be applied to the conditions of life presented in human experience. The right apprehension of the divine nature, which is always "in heaven," or harmony, must necessarily bring into that experience a reflection of harmony. The Christlike discernment—more or less vivid—has in individual cases been attained throughout the ages, and Mrs. Eddy speaks of this in her book, "Science and Health with Key to the Scriptures," as follows: "Throughout all generations both before and after the Christian era, the Christ, as the spiritual idea,—the reflection of God,—has come with some measure of power and grace to all prepared to receive Christ, Truth" (p. 333).

THE PUBLISHING HOUSE BUILDING FUND.

Contributions to the Publishing House Building Fund should be sent to Stephen A. Chase, Treasurer, P. O. Box 56, Fall River, Mass. These contributions will be thankfully received and promptly acknowledged.

ADMISSION TO MEMBERSHIP.

The next admission of candidates to membership in The Mother Church will be June 4, 1909. Applications should be in the hands of the Clerk on or before May 12, 1909. Application blanks may be had by addressing William B. Johnson, C.S.D., Clerk, at the church edifice, Falmouth, Norway, and St. Paul streets, Boston.

CHRISTIAN SCIENCE SENTINEL

EDITORIAL

MRS. EDDY TAKES NO PATIENTS.

The author of the Christian Science text-book takes no patients, and reads no letters on disease, distress, or error of any kind. Reliable news concerning Mrs. Eddy will be found in the Christian Science publications.

NO "EDICT" ISSUED.

RECENTLY there appeared simultaneously in several newspapers in New York and other cities notices of a book which attacks Christian Science, and about which the statement was made that Mrs. Eddy had "issued an edict to her followers, forbidding them to read the book." Whether or not this was a new method of advertising a book which otherwise might never be heard of, we cannot say, but this we do announce with authority: Mrs. Eddy has not seen the book in question and knows nothing of it, nor has she issued an "edict" concerning this or any other book.—EDITOR.

"THE LORD GIVETH WISDOM."

OCCASIONALLY there come to us appeals for advice in regard to the proper course to be pursued by members of churches in which the utmost harmony does not prevail. Our Leader sagely says, "Great mischief comes from attempts to steady other people's altars, venturing on valor without discretion" (Miscellaneous Writings, p. 287); therefore to all such appeals we have answered, in effect, that we cannot undertake to be the arbiter of differences which have arisen between members, nor to advise any course of action other than for those interested to "search the Scriptures diligently," and demonstrate the teachings of Science and Health.

There is no problem in branch church government which will not yield to the demonstration of Christian Science, and there is no Christian Scientist who cannot, if he will put away all thought of self and self-interest, do his share toward bringing out harmony and loving good fellowship in church affairs as well as in every other walk of life. If divine Mind is All, then divine Mind must control in every department of our work.

A mistake often made by members of branch churches is that, instead of using every possible effort to be guided by the one Mind, they talk over their church affairs with casual visitors, and thereby secure the opinions of minds many. It is not every visitor who is wise enough or experienced enough to advise in such matters, and there are fewer still who can resist the temptation to give advice, especially when it is invited. Then, too, advice given under such circumstances is rarely worth considering, because it is almost certain either to be based upon the statement made by the person asking for the advice, in which case it is usually nothing more than a corroboration of that person's views, which may or may not be correct, or else it is given quickly, without opportunity for due consideration, and therefore is equivalent in value to what lawyers sometimes derisively call "a curbstone opinion."

Another means of injecting personal opinion into the affairs of a church is for the members to write to their teachers for advice concerning problems which are entirely individual to that particular church, and of which the teacher is likely to have no knowledge except the information supplied by the student. Three or four students presenting three or four different versions of the trouble to the same number of teachers can result in nothing but an increase of the discord, unless the teachers are wiser than most human beings and decline to give other advice than to direct their students to the Bible, Science and Health, and the Church Manual, for a solution of their problem.

When two persons differ in their opinions in regard to any matter, it is certain that one is wrong, and both may be. When that Mind which was in Christ Jesus is sought and demonstrated by both persons, the wrong concept or concepts of the situation will disappear; therefore the way to settle any disagreement is not by turning to human opinion, but by looking for guidance to infinite Mind, "that giveth to all men liberally."

ARCHIBALD MCLELLAN.

WHAT GOD CREATES.

THOSE who are beginning to look into Christian Science sometimes ask, Who created all the manifestations of disease, the ravenous beasts, reptiles, and sinful mortals, if God did not? These inquirers are usually directed to the 1st chapter of Genesis, which gives a full account of God's creation and repeatedly declares it all to be good and "very good." They are also shown many kindred statements throughout the entire Bible—some from the Psalms, where we read: "The works of the Lord are great, sought out of all them that have pleasure therein. His work is honorable and glorious: . . . He hath made his wonderful works to be remembered." As these and similar passages are pondered in the light thrown upon them by the study of the Christian Science text-book, it is clearly seen that God never could create anything unlike Himself in nature, and an understanding of this fact leads to the disappearance of evil from our experience,—sin and disease vanish as the great Teacher declared they would when he said, "Hear, and understand: . . . Every plant, which my heavenly Father hath not planted, shall be rooted up."

Not so long ago, it was very generally believed by religious people that for some mysterious reason God sent many evils to afflict the human race, and it was by no means uncommon to hear some Christian Scientist, who refused to entertain such a belief, charged with irreverence and skepticism. A great many are now coming to see, however, that it is both skeptical and irreverent to believe or to say that God either creates or maintains any form of evil, while the Christian Scientist accepts unquestioningly the prophet's declaration, "Thou art of purer eyes than to behold evil, and canst not look on iniquity."

The inquiry as to what God creates is fully answered in Christian Science. On page 70 of Science and Health Mrs. Eddy says, "The divine Mind maintains all identities, from a blade of grass to a star, as distinct and eternal." She then asks, "What are God's identities?" and goes on to say, "Evil has no reality. It is neither person, place, nor thing, but is simply a belief, an illusion of material sense."

Taking this statement as our starting-point, it is easy to see, for instance, that the swarms of frogs, of lice, of flies, etc., which constituted part of the plagues in Egypt, were simply a manifestation of the sinful mortal thought which knew not God and refused to know His will when declared by His prophet. These manifested beliefs in the reality and power of evil appeared and disappeared in Egypt as the human thought changed, and they have continued to do so throughout the centuries except as the truth of God's creation has been understood and declared. It is often seen in Christian Science that destructive insects and other vermin disappear when the divine creation is understood and declared; or else they cease to be troublesome, and this proves man's dominion over all that is beneath him, and surely points to dominion over his own body.

The psalmist said, "A good understanding have all they that do his commandments." As we strive to obey the

Digitized by Google

First Commandment, and give no power to evil, we see that the germ theory of disease has no more reality than had the belief of the Egyptians in the frogs, flies, etc., in their day. God's work is indeed "honorable and glorious," and our work is to make this known. In Isaiah we read, "Behold, I create new heavens and a new earth: and the former shall not be remembered, nor come into mind. But be ye glad and rejoice for ever in that which I create: for, behold, I create Jerusalem a rejoicing, and her people a joy." There is nothing to hurt or destroy here, and this is the creation which divine Science reveals!

ANNIE M. KNOTT.

A DIVIDING LINE.

THOUGHTFUL and conscientious Christian people not infrequently find themselves at a loss to know how to distinguish between spiritual forces which are of God, and hence always good in nature and effects, and so-called forces which are often found serving the ends of evil. "God makes the tree to grow," say they, "and yet its strength is in the club that makes the bully's blow effective! The alchemy of the poppy discloses an infinite intelligence, and yet its extract becomes the curse of the nations!" They are in a state of thought which always brings distress to the heart and confusion to the judgment.

A representative clergyman has recently proposed a most astounding solution of their difficulty by declaring for the oneness in source and hence in kind of all forces. He says: "All thought, the power or force of it, is the power of God. Its marshalings may be for evil ends, . . . for in His wonderful love and wisdom God permits it so to be for a time. . . . Men need but to know more of the constitution of their own mentality, the power of which is of God, yea, is God, . . . in order to come into the kingdom"! In other words, the study of the human mentality is to become the stay of Christian aspiration, answer all its questions, and bring sure knowledge of the way of salvation! This is another modern phase and resultant of the failure to distinguish between the real and unreal, the true and the seeming, which characterizes so much of the world's theology. It is manifest that if all so-called mental forces, are "of God" and good, and all evil results from the exercise of that reputed freedom by which, through divine provision, men are privileged to use divine forces for good or for ill as they like, then in the last analysis the responsibility must rest with him who determined the order and gave the freedom, and God is inextricably involved in the strife and contradictions of human sense! Nevertheless many today are turning to this study of the phenomena of the human mind, with the thought that it is an avenue of approach to the Christ-healing. Failing to distinguish between human beliefs and divine ideas, they essay the impossible task of obtaining a knowledge of Truth by studying error. They are undertaking to acquire the Mind that was in Christ Jesus by centering their thought on the activities of human sense.

On the other hand there is an ever-increasing number of those who are not willing to believe that the forces which conduce to injustice and suffering are of God, and they long for the ability to recognize things for what they are. For all such Christian Science has come to supply a definite and final test for the determination of the inherent nature of so-called secondary causes. Accepting the unquestioned teaching of Jesus, that to know God is eternal life, and that God is revealed to the pure in heart alone, Christian Science declares that the divine ideas, the manifestations or forces of Truth, do not and cannot lend themselves or become amenable to an evil will, purpose, or end; hence any asserted power which at any time or under any circumstance is found in the service of evil is known to be not of God. Again and again Mrs. Eddy emphasizes the thought that there is no concert, collusion, or confederation between good and evil. "Truth has no home in error," she writes, "and error has no foothold in Truth. . . . At no point can these opposites mingle or unite" (Science and Health, p. 282).

Christian Science gives true rank and place to that intuitive spiritual perception which apprehends divine Truth, knows the things of God, without process. The Master frankly said that his Father showed him the things of which he spoke. Alone, in the night seasons, there was whispered into his ear the eternal word by which he lifted up the fallen and healed the sick. This word cannot be heard by the unspiritual, and therefore it is not available to them. It cannot be made serviceable to base ends, because the base cannot apprehend it, and hence the so-called mental or material forces, which serve the ends of evil, are classified by this fact as unreal, wholly separate from God.

JOHN B. WILLIS.

LETTERS TO OUR LEADER.

Boston, Mass., March 13, 1909.

Beloved Leader:—Your letter has been to me a greater cause of encouragement than I know how to express. Coming to work here, at your desire, has been to me an opportunity for proving something of the gratitude I feel for your teaching through the pages of Science and Health and all your other works. I realize, however, that this gratitude has to find its true expression in my life rather than in my words, and that by the use I make of what I have understood so far, I shall fit myself to understand more in the future. It will be a true pleasure to me to come out and see Mr. Dickey and the other students, and above all, to know that some day I am to see you again.

Your loving follower,

FREDERICK DIXON.

St. Joseph, Mo., March 20, 1909.

Mrs. Mary Baker Eddy, Brookline, Mass.

Beloved Teacher and Leader:—I know that your heart was made glad again to hear the news from Missouri. God has given us another victory, and you may know that it came about through earnest, consecrated work, putting off the false mortal sense and reflecting more and more the divine nature.

Your article, "The Way of Wisdom," made a deep impression upon every faithful one. With every succeeding battle with error, and victory won, we learn how to appreciate you more and more, as we find that you have been over the ground before us; and our love and gratitude to you for having marked out the way for us is unbounded. And now for more earnest, consecrated work, leading up to divine heights.

May God bless and sustain you at all times.

Your sincere and faithful student,

CHAS. M. HOWE.

Anamosa, Ia., March 10, 1909.

Beloved Leader:—I must tell you something of the joy that your tireless efforts and never-ceasing work for humanity has brought us. Tonight we hold our first meeting in a hall of our own, and our hearts turn with loving gratitude to you, dearest and wisest of leaders, first for your marvelous book, "Science and Health with Key to the Scriptures," which has unlocked that vast treasure-house, the Bible, revealing in it the tree whose leaves are "for the healing of the nations," and secondly for the matchless wisdom of our Church Manual, which guides us ever in the straight and narrow way. May we never forget that

Digitized by Google

life eternal is found only through obedience! The dear Master has given us the true test, "If ye love me, keep my commandments."

In June, 1905, four seekers of the truth you have revealed, began to meet each Sunday in our home to study the Lesson-Sermon, but not until a year ago last February was our number increased. Then three families were added, through healing, and since then there has been a steady growth. There have been two wonderful cases of healing in our congregation, simply through the reading of Science and Health. Three years ago Clara Barton, another of the world's brave women, visited in our home. She found here the first Christian Science literature she had ever seen, and attended her first Christian Science service. She read "Retrospection and Introspection" at once, with pleasure and profit. Then she asked me to order for her a copy of Science and Health, and several other of your writings, together with the *Sentinel*, *Journal*, and *Quarterly*, to be sent to her home in Glen Echo, Md. I did so, and this winter I had the pleasure of spending a number of weeks with her. I know of no more humble seeker of this great truth today than this much loved woman, or one who rejoices more in the wonderful wisdom of our Leader in every step she is taking in freeing the world from the bondage of materialism.

May this branch of the Vine ever prove faithful to God, divine Principle, and to you!

Gratefully and lovingly yours,
RENA HUBBELL.

Riverside, Cal., March 12, 1909.

Beloved Leader:—Having been a journalist until two years ago, when I joined the ranks of Christian Science workers, I am probably a little more interested in the good tidings being spread abroad by the *Monitor* than is the average reader. Each issue comes to my study a welcome and a very helpful guest. In fact, it is such an uplift to me in its clean subject-matter and its careful dress that I find myself constantly speaking its praise and rejoicing that an ideal newspaper has at last been made a successful venture. That the *Monitor* is being admired by honest and well-meaning editors everywhere, is becoming more and more apparent in what they have to say concerning it. That its purity of thought and its reliable medium of advertising are destined to reform completely the methods which are governing powers in the field of newspaperdom, cannot in the least be gainsaid. I am at a loss to understand how progressive thinkers, those who desire legitimate information anent legitimate world happenings, can be without our daily paper. Surely, Christian Scientists do not hesitate to send in a half or whole year's subscription to this publication which should be read by us all. The practitioner and his patients are blessed beyond measure in having the *Monitor*.

Faithfully yours,
STOKES ANTHONY BENNETT.

Parsons, Kan., March 5, 1909.
Mrs. Mary Baker Eddy, Brookline, Mass.

Beloved Leader:—At this time, the close of my term as First Reader of First Church of Christ, Scientist, in this place (and we have only one church), words are inadequate to express my gratitude for the great privilege and blessing given me during the past three years, whereby I have been able to be of service to God and to our Cause. To be given an opportunity to serve as First Reader in a Christian Science church surely is one of the greatest blessings that could be bestowed upon one. After having had these three years' experience, I know that I am in a position to do a greater work for God, and I realize, dear Leader, it has been through your untiring, unselfish efforts that I have been able to avail myself of this blessing. During the past year and a half we have been able to purchase our own property in one of the best locations in the city, and we are now rejoicing in the occupancy of our new church home, remodeled and equipped with everything needed for a greater work. My daily prayer is to know more of good, and to live a life that will be worthy the name of Christian Scientist.

Gratefully and lovingly yours,
RALPH R. HIBBEN.

Fayetteville, Ark., Jan. 28, 1909.
Mrs. Mary Baker Eddy, Chestnut Hill.

Beloved Leader:—Having just organized as First Church of Christ, Scientist, Fayetteville, Ark., we wish to express our love and gratitude to you for having shown us how to organize on a spiritual foundation. The utmost harmony and love for each other have been manifested in this organization. Knowing, through your teaching, that divine Love alone governs and that God is the only lawmaker, we feel our church will be a strong branch. We have in our membership many who are members of The Mother Church, and we are striving and seeking for that Mind to guide us which has been your wayshower and protector.

Yours in truth and love,
First Church of Christ, Scientist.
MRS. M. W. CLARK, MRS. ANNIE T. BOYD,
MRS. MINNIE B. EVANS, MRS. ALICE M. BROWN,
Committee.

San Jose, Cal., Feb. 16, 1909.
Mrs. Mary Baker Eddy, Brookline, Mass.

Beloved Leader:—Please accept the gratitude of one for whom the valley of sorrow has been exalted and the mountains of difficulties and sickness have been laid low by gaining an understanding of the divine Principle of all being,—Life, Truth, and Love,—as you have taught us in your wonderful book, "Science and Health with Key to the Scriptures." These teachings, with the study of the Scriptures in their spiritual light, indeed reveal "a new heaven and a new earth" to tired humanity. To do ministering work in His name, through this understanding, brings joy and peace beyond verbal expression. We of this age should not cease to be grateful for the great Shepherd's leadings "in the paths of righteousness," and that He has led among us one so eminently worthy to give us the cup overflowing with the "still waters." Again I thank you for your great love-gift to mankind.

Lovingly your student,
FLORENCE G. HALL.

NEW PAMPHLETS.

The attention of the Field is called to the following new pamphlets listed in this issue: "Christian Science: Its Principle and Method," "Christian Science: The Christianity of Jesus." Also to these new translations: "Gebet und Vertrauen," "Christian Science ou La Science Chrétienne: Sa Nature et Son But."

THE MANUAL.

The 79th edition of The Mother Church Manual, containing all of the recent changes, has been issued and is now on sale.

Subsequent editions of the Manual will be issued when new By-laws are made or when important changes are made in By-laws already in effect; and due notice of each new edition will appear in the *Sentinel*.

Address all orders to Allison V. Stewart, Publisher, Falmouth and St. Paul streets, Boston.

THE LECTURES.

AUSTIN, TEX.

Hon. Clarence A. Buskirk lectured in Fireman Hall, for First Church of Christ, Scientist, on Jan. 21. The lecturer was introduced by the mayor of Austin, Hon. Frank M. Maddox, who spoke in part as follows:—

The Christian Scientists' belief, practice, and teaching is the truth, and by this teaching they banish all evil and heal the sick. They are the healthiest, happiest, and most contented people, because they live and teach the truth as did the meek and lowly Master. I am not a Scientist, but there is much in this truth-teaching that appeals to me; this being true to me, a layman, then how wonderfully comforting the words of the Master, "He that believeth on me, the works that I do shall he do also; and greater works than these shall he do," must be to the truth-believing, truth-practising, and truth-loving Christian Scientists.

Correspondence.

UNIVERSITY OF ILLINOIS.

Under the auspices of the University of Illinois Students' Society, Prof. Hermann S. Hering gave a lecture on Christian Science Sunday afternoon [Feb. 14] to a large audience in the University Chapel. Prof. A. P. Wyman, in introducing the speaker, said in part,—

The lecturer was reared in a physician's family and learned early the compassionate good of a physician's life. When, later, that profession opened itself to him through an acquaintance with Christian Science, like his father, who was a homeopathist in the early days when it was not always happiness to be one of that school, he sought in his own way that form in which he could make best his ministration of good, where not only disease and misfortune but their primary cause could be removed. Since sin brings forth death, their final remedy must be religious. The Christian Science church demands of its members, if their prayer would heal, the highest spirituality and communion with God.—*The* (Urbana, Ill.) *Illini.*

BROOKLYN, N. Y.

The large concert hall of the new Academy of Music was filled by a most attentive audience on Sunday afternoon, Feb. 14, to listen to the lecture on Christian Science given under the auspices of Third Church. The lecturer, Bliss Knapp of Boston, was introduced by Jesse Pickard of New York, who said in part,—

The time is fast approaching when the subject of Christian Science will need no introduction. This new, yet old, response to that inquiry of the ages, "What is truth?" has already awakened universal thought, and has so appealed as to find throughout all English-speaking countries and in many others audiences large in numbers and sincere in interest. This fact is explainable from the basis of its positive remedial effects. Indeed it is safe to say that the large majority of those present can bear witness thereto in the case of some acquaintance who has drunk from this cup of promise and been lifted from some hellish misery of human experience by its loving ministration. You have come here this afternoon to inquire further into the compassion of Christian Science. This message of tender sympathy and practical purport is an answer to that despairing cry ringing down the centuries, "What shall I do to be saved?"—*Correspondence.*

MONTGOMERY, ALA.

Mrs. Sue Harper Mims of Atlanta, Ga., spoke to a crowded house at the Grand Theater yesterday afternoon [Feb. 7], and for nearly an hour held the attention of her hearers. The discussion was along Christian Science lines and abounded in rich comparisons of an exquisite delicacy. Capt. R. T. Goodwin, in introducing Mrs. Mims, spoke in part as follows:—

Many of us present this afternoon are not members of the Christian Science church and understand its workings in but limited degree, yet we do know that Mrs. Mary Baker Eddy is accepted and received by the church as the great Discoverer and Founder of this Science, and that for forty odd years, in the face of adverse criticism, undaunted by the hurled javelins of ridicule and scorn and misrepresentation, she has held aloft the flaming torchlight of Christian Science truth. Under her instruction, the great thought and golden rule of the church, blazoned in its temples everywhere, are those words that come ringing down through nineteen centuries, "The truth shall make you free," and this truth lighted by the man of Galilee has laid its beneficent hand upon the thought of men and women, and disease and pain and fever have been dissipated. It has placed its kindly touch upon their hearts, and the coiled serpents of sin have fled affrighted. The church, as a church, is a sower in the field of humanity, scattering seeds of love from the storehouse builded by the lowly Nazarene, so that humanity in the centuries to come may reap the golden harvest of Christian perfection.

All religions have a common purpose, the protection and perfection of the human soul. As one of the great religions of the world, the Christian Science church has performed, is performing, and will continue to perform in the highest and best degree its great mission to ennoble and elevate all mankind. The world has begun to understand and appreciate the magnificent results that flow from the teachings of this great and thriving church. It weaves into the hearts and souls and lives of its members, into the very warp and woof of their being, sentiments of kindliness and brotherly love, that build for our common country the highest and most exalted type of patriotic citizenship. In the presence of such fruition the scoffer is silenced, ridicule is hushed, and misrepresentation bows its head in shame. Godspeed to this church, as to all churches, in the great work for humanity. May the fruits in the vineyard ripen early and the workers be ever there in plenty.

TESTIMONIES OF HEALING.

In November, 1907, while pursuing my work in New York city, I suffered a complete nervous breakdown. I was in two different hospitals in the city, and later transferred to a private sanitarium for nervous diseases at Stamford, Conn. The head physician at this latter place, a medical expert and a famed authority on such disorders, said there was little he could do for me, but advised me to refrain from work and from all responsibility connected with it, and to remain away from New York city for an indefinite period, as the strain of living within a great metropolis was too much for any one who was in such a state as was I at that time. He gave me a prescription, which I had filled, and used faithfully according to directions for nearly two months. He also said that while my condition was serious, it could be overcome under favorable conditions, though, if relief were not soon obtained, insanity—and that of a hopeless nature—was likely to be the result.

I then came to Missouri, having relatives in this section of the country, and decided to remain with them for a time and see what rest would do toward establishing a return to health. For about a month I seemed to improve, then all the old symptoms returned with added intensity. Before me constantly was the thought of what the physician had said. Was such to be my fate? Sleeping or waking, the thought was ever present. I grew more and more depressed, but try as I would, I could not emerge from this state of feeling for more than a day or two at a time. Sometimes I would walk for miles in a vain attempt to dissipate the gloom which was all around me. One day I happened to meet an old friend, and he told me how his wife had been healed by Christian Science after having been given up by several of the best medical practitioners in the city. I was then at the stage where I was ready to grasp at anything which promised relief. While I never had been bitterly opposed to Christian Science, my knowledge—or rather, lack of knowledge—of it had been mostly gleaned from remarks which I heard in a sermon by a celebrated clergyman. I, however, felt that Christian Science could at least do me no harm, and I determined to give it a trial.

Looking up a practitioner, I stated my case, and after having taken three treatments I was completely healed and have so remained. I have no words with which to convey the meaning of the full measure of my gratitude for what I have received in Christian Science. Only those who have been in such a "valley of gloom" as that from which I was raised, can have even a faint idea of it. I realize more and more each day what it means to come from darkness into light; but greater by far than the joy of relief from physical suffering is the perfect sense of peace and security which comes from the spiritual understanding of God and of man's relation to Him. As Christ Jesus said, "Ye shall know the truth, and the truth shall make you free." Christian Science does not limit or bind me in any respect, but opens to me a richer, deeper, and better life in all ways; in fact, Christian Science is all I have ever found which gives me a true sense of freedom, and I use the word "freedom" in its largest and noblest meaning. The Bible is a new book to me, and new truths unfold themselves each day as I study its pages with the help received from that incomparable work, "Science and Health with Key to the Scriptures" by Mrs. Eddy.

I was a member of an orthodox church for some years, and a most earnest seeker after the truth. I faithfully endeavored to live up to my highest sense of good, though I felt the need of something which I was unable to grasp, and which I have now found in my better understanding and knowledge of Truth. Recently I received a letter from the pastor of the church in New York city to which I formerly belonged. He is an eminent divine, and a man with whom it is a pleasure to be associated. He had evidently learned of my conversion to Christian Science, as he expressed the hope that like the "prodigal of old," I would again become my proper self. While his hope has been virtually fulfilled, it was not according to his understanding. My answer to him contained the following: "I rejoice to say that the 'prodigal' of whom you speak has already returned, and has at last found his Father's house. I have received health and strength in a mental, moral, and spiritual way, and my daily bread is now satisfying, as indeed it never was before. I could wish for no greater blessing to come to any one whom I have ever known."

These words but faintly express what I feel regarding Christian Science. Since coming into the truth, my faith has been subjected to some severe tests, and had it not been for the strength which I have received through my knowledge of Christian Science, I am confident that ere this time the physician's prediction would have been fulfilled and my case would have been hopeless indeed. It has been proven to me beyond any doubt that God is a present help in time of trouble, and I find that in just so far as I can understand the divine Principle, and the Science which teaches the allness of God, do I get that peace "which passeth all understanding," and the power to demonstrate which Christ said should be theirs that believe. For the past three months I have filled a position of considerable responsibility without the loss of an hour, and have had no errors in my work, which is sometimes difficult, though always pleasant. I eat and sleep well and regularly, have a normal body, and a mind at rest and filled with peace and love to God and my fellow-men. For all this I thankfully acknowledge my gratitude to God the All-giver, and to Mrs. Eddy for the patience with which she has labored in her life of love and sacrifice in discovering and declaring to the world the saving truth which is revealed in Christian Science.

CLYDE R. FARIS, St. Joseph, Mo.

In 1894 I had an attack of rheumatic trouble which left me very weak, but, being the mother of a large family, I had a great deal of housework to do, and one day in lifting a heavy kettle I seemed to injure my back severely. I was put to bed in terrible pain, and when our physician came he pronounced the injury very serious. I was kept under opiates four days; I could not move, and life seemed a burden. Later, every attempt to do any work was accompanied with severe pain, the attacks often lasting ten days or longer. As time passed, for at least three years before my healing in Christian Science, I was able to do only some light sewing.

In 1900 a dear friend who saw my need brought Christian Science to my notice. For some weeks I read the *Sentinel* and *Journal*, also in "Science and Health with Key to the Scriptures" by Mrs. Eddy, but could not then grasp the spiritual meaning and failed to be benefited. I saw, however, that Christian Science was a most beautiful and desirable religion for those who could understand its teachings. I had been a member of an orthodox church from my girlhood and had brought my children up in that belief. I had always read the Bible and prayed, and I had answers to some of my petitions, but there never seemed to be anything certain about the results. In 1902 my health seemed to grow even worse, and I became a wreck physically and almost mentally. I was advised to have a change of scene, and though not able to travel I started. I went nine days and nights on the train, to get a change of climate; stayed several months on the Pacific coast, but the conditions were not changed.

I had a son living in San Francisco who had been greatly benefited by Christian Science, and he reminded me of this in every letter, but we as a family concluded that he was fast becoming a religious crank. In June, 1903, he sent me a copy of Science and Health. I commenced to read it, and where I had stumbled before, it was now clear and beautiful to me. That summer I was alone a great deal, and I read the book carefully. I sought to have God show me if it was the truth, and one day when I was fearful that it might not be of God I asked Him to make it plain to me. I opened the Bible for my answer, and this is what my eyes rested upon, "Jesus Christ the same yesterday, and to day, and for ever." I was fully satisfied, and several ailments, such as neuralgic trouble, etc., left me while reading the book. I had, however, no one to help me, and I had not gained sufficient understanding to destroy the worst trouble. In August of that year we concluded to attend the G. A. R. encampment in San Francisco. We were at that time living in northern California, and there was not only a long trip by stage, but when we got to the railroad I could not secure a sleeper. By the time we reached the city I was prostrated with an unusually severe attack of the trouble with my back, and had to go to bed immediately. This was Saturday night, and there I lay until Wednesday morning, when my son advised me to have the help of a practitioner. I said he might call up one, and tell her that I wanted absent treatment. The practitioner immediately commenced to treat me, which was about nine o'clock in the morning. A little later I got up, and although my feet were badly swollen, and my daughter helped me dress, I nevertheless walked three blocks, sat from ten o'clock until one, watching the parade of the old soldiers, and then walked around the greater part of the afternoon. In the evening I went to the Christian Science testimony meeting, which was a great revelation to me. I had never witnessed anything like it before. The hall was crowded even to standing-room, and there were as many men as women. I met the practitioner who had given me absent treatment that morning, and I told her that I had walked not less than three miles, after having been so helpless in the morning.

I could not tell all the blessings that have come to me through Christian Science. I had worn glasses for three years and felt that I needed stronger ones. One day the thought came to me as clearly as spoken words, that if God is our Life there can be no weakness, and I laid the glasses away. At this present time I find I can do any sewing or reading I need to without material aid. I now consider it my greatest privilege and joy to be able to help others to awake from their mortal beliefs, and to know the truth which makes free indeed. Words fail to express my gratitude to God for His loving-kindness to the children of men. I count it a great blessing to be a member of The Mother Church. Our dear Leader tells us to follow her only as she follows Christ, and the best way I can show my appreciation of her life-work is to follow closely her teachings, in which she makes so beautifully plain the way of salvation. I am thankful that I have all her books (except "Christ and Christmas"), also for the *Journal* and *Sentinel,* and for the Lesson-Sermons,—such wonderful helps as they are. I am likewise very grateful for the kindness shown me in my journey out of sense into a better understanding of God as Life. This city has been my home for fifteen years, and any one is at liberty to seek further information as to my healing.

MRS. MARY E. EASTLICK, Ashland, Ore.

That Christian Science gives strength in the midst of weakness, and victory in the midst of seeming defeat, was proven to me last fall, when, our house being geographically about the "storm-center" of a severe fever epidemic, I found myself succumbing to this malady. Calling upon a practitioner for help, the more pronounced conditions were so speedily met that I did not realize, until I was practically well again, what had been the nature or name of the disorder. Indeed the disturbance had seemed so purely mental,—the caldron of mortal thoughts had been so stirred to the very bottom, and so needed to be purified and subdued to an orderly, peaceful condition, that I had had little time or inclination to think of a name for the trouble.

During this time, which covered several weeks, I found it possible to perform most of the necessary duties in a household of six persons,—four of them children under twelve,—doing all but the heaviest work, with only occasionally a little more assistance than that usually given me by my husband and children. I ate my usual meals and, for the most part, retired and rose at the usual hours, with but little wakefulness. Many times, during my work, I found it necessary to leave what I was doing and rest on my bed until I could gain, through scientific demonstration, strength to continue it. Gradually, however, the periods of rest became shorter and less frequent, until normal strength was again established. Beside this, I was able to carry on my work as organist of our little church, using the largest form of reed organ, with two manuals and pedal keyboard. I practised frequently, and did not miss a service.

Many, many times this passage from Science and Health (p. 385) was a distinct help: "Constant toil, deprivations, exposures, and all untoward conditions, *if without sin,* can be experienced without suffering. Whatever it is your duty to do, you can do without harm to yourself." Especially was this a help one Sunday morning, when on first waking I had not the strength to rise and dress, and found that, for the first and as it proved the only time during this illness, I must take my breakfast in bed. Remaining quietly there, however, until I could realize somewhat that God's strength was my strength, and that because my place was at the organ at the appointed hour, the needed strength would be provided for each moment's preparation and for the performance of the work itself, in the course of half an hour I rose and began to dress. Little by little, as the realization became clearer, strength and energy increased, so that I performed my regular duties. It had been proven to me that God does not require us to "make bricks without straw." Later, when my strength and health were about normal again, my hair began to come out, and again I called for help. In a few days' time there was marked improvement, and new hair began to come in.

All this physical help through Christian Science was indeed much to me, but that for which I find myself most grateful is the mental reformation accomplished during this time of stress and weakness. The healing most needed has taken place, mortal mind has been elevated to a higher plane and a healthier attitude established toward my work and those about me; in other words, the Christ-mind is more in evidence, and the mortal mind or selfhood has consequently become dimmer and less obtrusive. I must not close before mentioning that, after my own recovery, this same malady tried to attack each of my household, but the demonstration had been so complete with myself that it obtained little foothold in our consciousness. A few hours at most found the illusion entirely dispelled, with but two calls for help outside of that which I was able to give.

Can it be doubted that we were all grateful for these evidences of "God with us," and for the beloved Leader who is showing us daily how to prove His ever-presence and power?—LAURA SHELDON INMAN, Franklin, Pa.

Words cannot express the gratitude I feel for what Christian Science has done for me. I had employed a

Digitized by Google

doctor constantly for the past thirty-five years, up to five years ago, when I first heard of Christian Science. I had just undergone an operation, this being my third experience on the operating table, when a friend advised me to try Christian Science. I was feeling very much discouraged, for the doctor had told me that he had done all he could, and that I was to keep very quiet and not do anything about the house for a year; that if I followed out his instructions I might get well, but he would not promise. When I told my husband about Christian Science he laughed at it, but he wanted me to do anything that would help me. We employed a Christian Science practitioner, and I am deeply grateful for the faithful work that was done for me. From the very first treatment there was a change, and I was so much better after the first week that I took all my meals in the dining-room at regular times. The first the doctor knew of my having Christian Science treatment was after he had not seen me for eight days, he having been called away. When he came to the house, early one morning, he found me in the dining-room eating breakfast, and I went to greet him. He was startled to see me there and said the last bottle of medicine had certainly done me much good, but that he had brought another with him which would give me more strength. I told him I had never opened the other bottle, and he very soon left the house, saying that if I needed him I could send for him.

I am very thankful to God that I have had no occasion to use material remedies. Three months from my first treatment in Christian Science we moved to Berkeley, and two months later I was doing all my own housework and have done it ever since, which has been five years. For all of these blessings I am very thankful to God, and to our beloved Leader.—Mrs. Emma Hawley, Berkeley, Cal.

I am glad to add my testimony to those of the many who have been healed and blessed by Christian Science. About a year and a half ago I was taken with a severe cold, which developed into serious lung trouble. Knowing of the good that Christian Science was doing for other members of my family and being tired of material remedies, I asked for its help. A practitioner was speedily called, and the feeling of peace and comfort which came over me after the first treatment was truly wonderful. In a very short time I was well without having taken one drop of medicine, which seemed to me more wonderful still, as I had not given Christian Science much thought as regards myself. I am very thankful to God for this healing, and thankful that His work was done so quickly and well.—Mrs. Kate M. Groesbeck, Fort Smith, Ark.

Twelve years ago I was healed through Christian Science of a serious trouble in one of my eyes, after this eye had been nearly blind for two years. After two weeks' treatment the improvement was marked, and it continued steadily until the sight was perfectly restored. That eye is now my best one, and I can see to read with it quite well without glasses, at the age of sixty-six. I was also afflicted for many years with severe rheumatic trouble, but this was entirely overcome through Christian Science treatment and I have been wholly free from it for several years. Nine years ago I received a bruise on the ankle, and never seemed to recover fully from the effects of the injury. About a year ago a malignant ulcer developed, which spread so rapidly that in a few weeks it presented an alarming appearance. I applied for treatment from a Christian Science practitioner in December, 1907. In two weeks the ulcer was completely healed, and now, after more than six months, the limb is sound and well.

These most wonderful demonstrations of the power of divine Love to heal our infirmities, fill me with gratitude to our noble Leader, for the revelation of the understanding which has made these blessings possible to me; but even more than all these, am I thankful for the joy and peace which Christian Science has brought into my life.—Mrs. Malinda Wilkins, Seneca, Kan.

When I first learned of Christian Science I was a physical wreck. I could not get along a week without medicines of some kind, and this had been the case for over forty years. I had been under the care of many doctors, but none could give me any permanent relief and by no means could any cure me. Soon after I heard of Christian Science I suffered from poisoning in my hand, and I think I should have lost the hand had it not been for the treatment I received from a Christian Science practitioner. Although I lost the nail of one finger, I was able to do my washing during the whole time I was under treatment, and was entirely healed. In the case of another serious attack of illness, I was healed by absent treatment. Two years later I had a similar attack, and with the little understanding I had of Christian Science I was able to overcome it in a few days without any one's help.

Before I came into Christian Science I was so very much afraid of storms that I could neither eat, sleep, nor work while the wind was blowing hard, but now I have no such fear, because I know that God is ever-present and will take care of me. My health is greatly improved, and I can get through with my business and work much better than I used to; while the spiritual uplifting is so very great that I enjoy life more than ever I did in all the previous years.

I feel very thankful to God that I am living in this age, and very grateful to Mrs. Eddy for what she has done for me and for giving Science and Health to the world. The reading of this book has given me a clearer understanding of God, and a greater love for my neighbors and for all mankind.—Mrs. Catharine Cassell, Baltimore, Md.

About two and a half years ago I had a great deal of trouble with my eyes. I could not bear a bright light and could read only a few words at a time. I was very despondent and nervous, and did not dare go out alone. One day a friend took me to see a Christian Science practitioner. The very first treatment helped me, and in a short time I was well again and could see as clearly as I ever did,—conditions which have continued to the present time.

I also would like to tell of how my mother, who is now over eighty-four years of age, was helped last summer in an attack of hay-fever, a disease from which she had suffered regularly every August, for forty odd years. The attacks always commenced on a certain day and lasted for six weeks, and she suffered at times very much indeed. Last year the trouble started in a week later than usual, but it lasted only a day or so. A week later it started in again, but that also was stopped in a day. This was about all of the trouble. She was helped mostly by absent treatment in Christian Science.

Alice Goodspeed, Jersey City, N. J.

I was taken ill in November, 1907, but as I did not think the attack serious I did not call for any help. I soon felt better, but was again taken sick. I was more or less ill for a month, and finally was unable to continue my work as a watchmaker. I then feared that I had serious lung trouble, and saw it was necessary to get help. I called on a Christian Science practitioner and asked him to treat me. When he came to see me he found me in a very serious condi-

Digitized by Google

tion.—I could not walk across the room alone, was coughing terribly, and had very alarming symptoms. It seemed as if I had only a short time to live, and I fully believe that if it had not been for Christian Science I would have been in the grave ere now. In five weeks I was able to resume my work, and in six weeks after I had asked for treatment I was completely healed and had no more need of help.—THOMAS GULBRANDSEN, Brooklyn, N. Y.

I am indeed thankful to God, and to Mrs. Eddy, for what Christian Science has done for me. About two years ago I was taken sick with a fever. We called in a physician, and I was under his care some time, but no improvement was made. I had two alarming attacks, and we then sent for a Christian Science practitioner. I had one more attack but began to improve right away, and in a few days I was up and doing my work. Ever since then I have always depended upon God, the "great Physician," for my healing, and I am glad to know that divine Love is always with us—"always has met and always will meet every human need" (Science and Health, p. 494).

MRS. JOHN WINNING, Carterville, Ill.

It is with a deep sense of gratitude for Christian Science that I add my testimony to the healing power of Truth. Three years ago I was taken seriously ill with a fever. I was struggling to overcome the trouble for about two weeks, when I finally had to give up and go to bed. We called a Christian Science practitioner, and in nine days I was able to be up and to do my housework, and I have been in perfect health ever since. We have had many ailments overcome by Christian Science, before and since that time, and I am thankful to God, and to our dear Leader, Mrs. Eddy, for the great work she has done for others.—MRS. ROSINA MCNALLY, Hopkins, Minn.

I have too long delayed in giving a testimony of my gratitude to God for the great work that has been done in my family through Christian Science. I first learned of this healing truth about ten years ago, after my daughter had been given up as incurable by four physicians. One of them, our family physician and a personal friend, treated her for twelve months, and then said that only death would relieve her. She could retain hardly any food or even drugs. We tried three other doctors, but each ended with the statement that as her stomach was seriously affected she could not be cured. A neighbor who heard all this asked why we did not try Christian Science. I asked her what it was, and she said she did not know, except that it was something like the way that Christ healed the sick, and that she knew of a young girl who had been healed of spinal trouble after seventeen years of invalidism and helplessness. This neighbor did not know the name of the practitioner, but promised to find out. I was so anxious that I could hardly wait, and as soon as I received the information I wrote for treatment. My daughter had not been able to stand, nor had any natural action of the bowels for over a year, but in less than three weeks after the first treatment in Christian Science she asked me to get her shoes. She drew up her foot, put on first one shoe and then the other, rose up from the bed, and walked a few steps. Out of a full heart I said, "Thanks be to God." I reminded my daughter that the Scientist had said that when she was able to walk we were to give God the praise. We both stood there in silent thankfulness for a few minutes, and then my daughter said, "Thank God, I am healed!" From that time until now she has had no return of the disease, and she loves Mrs. Eddy and is grateful to her for this revelation of Truth which heals.

Since then we have had no need of medicine, for we have learned that it is God who heals all our diseases. I have seen the truth, as revealed in Science and Health, heal many other diseases. Two of my family have been healed of the drink habit, and I have learned to read without glasses, after having worn them eighteen years. My family and I attend and love the Christian Science service, and each day finds us studying the helpful Lesson-Sermons, with hearts overflowing in gratitude to God, and to Mrs. Eddy, for His unspeakable gift to all mankind.

MRS. L. A. REDD, Kinston, N. C.

Christian Science found me a physical and mental wreck. I had seemingly exhausted the resources of *materia medica* and surgery, for there was no relief for me in either. My body was racked with pain day and night. This, with extreme nervousness, made life almost unbearable for me, as well as for my family. At this time Christian Science was advised, and although I had no idea what it was, I hoped it would at least relieve me. While waiting to hear from a practitioner over five hundred miles away, I borrowed a copy of that inspired book, Science and Health, till one could reach me from Boston. Then came a letter from the practitioner, full of peace and comfort, also saying she would take my case. At once the clouds began to roll back, and I caught glimpses of light; soon the pain was gone, and I fully realized what the psalmist meant, for I could "both lay me down in peace, and sleep." I knew without a doubt that I had found the truth which makes free.

After studying the Bible and Science and Health almost constantly for three months, making free use of a dictionary to get the exact meaning of words, I found my sight restored, even to the eye that was called partially blind. It had been proven to me that sight is spiritual, not material. I cannot enumerate the many blessings which have come to us as a family, through the study of Christian Science, but one of the greatest, as it seems to me, is a sufficient understanding of Truth to help others as I was helped. Each day and hour my heart is filled with love and gratitude to God that we have been given our dear Leader, Mrs. Eddy, who has so tenderly, patiently, and wisely shown us the way whereby we may know God, good. The Bible and the Christian Science text-book have been my only teacher.

MRS. MARY B. STRONG, Dixon, Ill.

[Written for the *Sentinel*.]

COMFORT ME.

LAURA GERAHTY.

COMFORT me, Lord, that I may be
Some comfort to another;
That on his darkness I may shed
Light for a stumbling brother.
A soother to the aching heart,
That watches late in sorrow;
A little cloud-break in the sky
When dawns the dim tomorrow.
Help me to reap, that I may sow
Seed from Thy purple mountains;
To pass along the cooling cup
Filled from Thy ceaseless fountains;
To gather sweets from every flower
That lightens up the dawning,
Their scent will linger through the night
Ere glows another morning.

FROM OUR EXCHANGES.

[*Universalist Leader.*]

If we study the program of Jesus carefully we find that its fundamental proposition was an absolute faith in truth. Every one of the synoptics records the saying of Jesus that his words should outlast the heavens and the earth. The sky might collapse; the solid globe might crumble; but the words he spoke should survive the wreck of the material universe. It is the absolute confidence in the indestructibility of truth which makes the career of Jesus unfold as it does. Amid all the chaos of politics and society where he stood, with an alien despot ruling his people, with all Israel groaning with social injustice, with the very atmosphere surcharged with a multitude ready to spring to arms and die at his call, he never even hesitated. Probably there was never a moment up to the march to Calvary when a word from him would not have been like a lighted match in a powder magazine. Had Jesus been willing to escape death itself by force, he might have brought about an explosion that would have shook the human rule in Palestine. One of his finest Jewish biographers asks, with a sigh of regret, why he did not speak the word, and lead the people out of their wilderness of woe. The answer is clear to one who uncovers in the magnitude of Jesus the magnitude of his faith in truth. He believed, and planted his gospel on the rock of this belief, that a word of truth spoken out of the heart of infinite reality would outlast the cosmos. He was never really tempted from his true path from the moment that he returned from the wilderness with his ideas and ideals clarified.

[J. H. Jowett in the *Christian World.*]

Note how the man of the positive life conquers in facing possible gain. He contemplates the supernal heights of moral purity and loveliness, and determines that he will stand upon their topmost peaks. By the very fervor of his ambition his soul becomes incandescent and is purified. He counts all things but loss that he may possess "the unsearchable riches of Christ." In seeming loss he is making constant gain, and he will at length sit down with the Lord in heavenly places, robed in spiritual sovereignty and glory. Such is the positive life—exhilarating, invigorating, protective, and triumphant.

[*Christian Register.*]

Can the modern church be saved? is a problem under discussion. If so, it must be as a progressive, unfolding, forward-looking institution. It must be a living protest against wrong, with a vital union with God. It must be as bold as Jesus created it, and cowardice must not be a conceivable attainder. It can stand only in its divine devotion to the right and its incarnation of the truth. The inspired church, having ever on its portals, "On earth peace, good will toward men,"—is it our church, the church of the twentieth century?

[Rev. T. Rhondda Williams in the *Christian Commonwealth.*]

How real Jesus was! It was the flame of his reality that burned through tradition and convention into the hearts of men, and gave the world a living religion. To do any work that is really worth doing today we must have full liberty to realize our deepest selves in intellectual, moral, and spiritual sincerity, and our words must come to men straight from life as we find it in its deepest places.

[Rev. D. C. Knowles in *Zion's Herald.*]

The primary need of the preacher is a soul-absorbing faith in what he says. The deeper the conviction in the essential truths of the gospel, the surer will be the aim of the minister.

SPECIAL ANNOUNCEMENTS.

FROM THE PUBLISHER OF MRS. EDDY'S WORKS.

THE CHRISTIAN SCIENCE TEXT-BOOK, "SCIENCE AND HEALTH WITH KEY TO THE SCRIPTURES."—This work contains many important changes and additions by the author, and also contains a photogravure portrait of Mrs. Eddy, together with a facsimile of her signature.

SOME OF MRS. EDDY'S WRITINGS IN NEW BINDINGS.—One volume containing Unity of Good, Rudimental Divine Science, No and Yes, Retrospection and Introspection; a second volume containing Christian Healing, The People's Idea of God, Pulpit and Press, Christian Science *versus* Pantheism, and the Messages of 1900, 1901, and 1902. These volumes are printed from new plates and are uniform in size with the pocket edition of Science and Health. Bound in morocco, limp, round corners, gilt edges, heavy Oxford India Bible paper. The prices of these books prepaid are as follows: single copy, $3.50; six or more copies of either volume to one address, each $3.25.

THE CHURCH MANUAL.—Containing all the By-laws of The Mother Church, The First Church of Christ, Scientist, in Boston, Mass. Each new edition of the Manual will have special notice in the *Sentinel*. Price, single copy, prepaid, $1; six copies to one address, $5; twelve copies to one address, $9.

Attention is called to the Library Edition of Mrs. Eddy's works, description and prices of which will be found on the outside cover page of the *Sentinel*.

Address all orders for books named above to ALLISON V. STEWART, Falmouth and St. Paul Streets, Boston, Mass.

FROM THE CLERK OF THE MOTHER CHURCH.

CHURCH TENETS.—The tenets of The First Church of Christ, Scientist,—The Mother Church,—printed on folded sheet for the use of Branch Churches of Christ, Scientist, with space for the names of churches and their by-laws, can be had at seventy-five cents per hundred.

Not less than one hundred are sold. Postage stamps are not taken for payment.

MEMBERSHIP.—Correspondence relating to membership with The Mother Church, and requests for blank applications for membership, should be addressed to the Clerk.

All correspondence and orders relative to the above should be sent to WILLIAM B. JOHNSON, Clerk, The First Church of Christ, Scientist, Falmouth, Norway, and St. Paul Streets, Boston, Mass.

FROM THE CHURCH TREASURER.

PER CAPITA TAXES.—Per Capita Taxes and Contributions to The Mother Church, The First Church of Christ, Scientist, in Boston, Mass., should be sent to the Treasurer. Please do not send currency.

Remittances for the above should be sent to STEPHEN A. CHASE, Treasurer, Box 56, Fall River, Mass.

FROM THE SOCIETY.

Attention is called to the announcement over our Leader's signature, which appeared in the *Sentinel* of Jan. 9, to the effect that Christian Scientists in the field who send four subscriptions to the *Monitor* for one year, will receive their own paper gratuitously.

Attention is called to the new Pamphlets, Reprints, and Music found listed in the advertising columns on the opposite page.

The Publishing Society requests that Reading Rooms and individuals when ordering *Quarterlies* will specify whether the large or small size is desired. This is necessary in order to avoid wrong shipments and consequent delays.

THE CHRISTIAN SCIENCE JOURNAL

FOUNDED APRIL, 1883, BY THE AUTHOR OF "SCIENCE AND HEALTH WITH KEY TO THE SCRIPTURES," MARY BAKER EDDY, DISCOVERER AND FOUNDER OF CHRISTIAN SCIENCE

This monthly Magazine is the official organ of The First Church of Christ, Scientist, in Boston, Massachusetts, and correctly represents the Christian Science movement. It contains interesting discussions of the teaching and the practice of Christian Science, and in addition to dissertations, lectures, and contributed articles, publishes always a number of reports from cases of spiritual and physical healing, which practically illustrate the redemptive work of Christian Science.

TERMS OF SUBSCRIPTION: Single copy, one year, $2.00. Quantities TO ONE ADDRESS: ten or more, each, $1.90; twenty-five or more, each, $1.80; fifty or more, each, $1.60. These rates apply in the United States, Canada, Mexico, and Cuba. In all other countries add forty cents for postage on each subscription. Six months' subscriptions received at half the above rates. No subscriptions received for less than six months.

TERMS OF SALE: Postpaid to any address: Per copy, twenty cents. Quantities TO ONE ADDRESS: ten copies, $1.70; twenty-five copies, $4.00; fifty copies, $7.00; in the United States, Canada, Mexico, or Cuba. To all other countries, per copy, twenty-five cents. Quantities TO ONE ADDRESS: ten copies, $2.10, twenty-five copies, $5.00; fifty copies, $9.00.

THE CHRISTIAN SCIENCE MONITOR

A daily newspaper of world-wide scope, particularly designed for those desiring a high-class publication in the home. It contains all the current news worth considering, all the departments of interest of a modern newspaper, illustrations of worthy features, and an unbiased editorial page which deals with the vital topics of the day. The MONITOR does not feature nor illustrate vice and crime.

SUBSCRIPTION PRICE: For the United States, Canada, Mexico, and Cuba, $5.00 a year, $3.00 for six months; all other countries, $8.00 a year, $4.50 for six months, postpaid. In the Greater Boston postal district the MONITOR will be delivered by carrier through the local news-dealer at the customary rate of 12 cents a week payable to the news-dealer. If delivered by mail $1.00 should be added to the annual subscription rate to cover extra postage.

The Christian Science Quarterly

Published January, April, July, and October

Contains the Lesson-Sermons which are read at the Sunday Services throughout the year in all the Christian Science churches. These Lessons, which present citations from the Bible and "Science and Health with Key to the Scriptures," are valuable for daily study.

TERMS OF SUBSCRIPTION: For one year, 50 cents; fifty copies or more to one address, 50 cents yearly for each copy. Foreign subscriptions, 60 cents. Yearly subscriptions only received.

TERMS OF SALE: One or more copies, postage paid, each, 15 cents; fifty copies or more to one address, each 12½ cents, postage paid.

Der Herold der Christian Science

Published Monthly.

A magazine printed in German, which publishes original and translated articles bearing upon Christian Science, and also testimonies of healing from Germany and America. It contains about thirty-eight pages of such reading matter, also the Lesson-Sermons which are read at the Sunday services in all the Christian Science churches, and is valuable as an authorized representative of the movement.

SUBSCRIPTION PRICE: For the United States, Canada, Mexico, and Cuba, 10 cents a copy, $1.00 a year in advance; all other countries, 12 cents a copy, $1.25 a year, postpaid.

Falmouth and St. Paul Sts., Boston, Mass., U. S. A.

ARCHIBALD MCLELLAN, Editor.

JOHN B. WILLIS, ANNIE M. KNOTT,

Associate Editors.

SUBSCRIPTION PRICE

Single copy, one year, $2.00.

Ten copies or more to one address, one year, each copy, $1.90.

Twenty-five copies or more to one address, one year, each copy, $1.80.

Fifty copies or more to one address, one year, each copy, $1.50.

These rates apply in the United States, Canada, Mexico, and Cuba. In all other countries add 50 cents for postage on each subscription.

Six-months subscriptions received at half the above rates.

No subscription received for less than six months.

Subscriptions to the *Sentinel* will be entered to begin with the first of the month, and will include all issues for the month named as expiration date on the wrapper. The receipt of the periodical by the subscriber will be our acknowledgment of the subscription.

TERMS OF SALE

Five cents a copy, postpaid to any address in the United States, Canada, Mexico, and Cuba. In quantities to one address: twenty-five copies, $1.00; fifty copies, $1.80; one hundred copies, $3.00.

To all other countries, six cents a copy, postpaid to any address. In quantities to one address: twenty-five copies, $1.25; fifty copies, $2.30; one hundred copies, $4.00.

Bound Volumes: Current year and two years previous, cloth, $3.00; half calf or half morocco, $3.50. On earlier volumes write for prices.

Entered at the Boston, Mass., post-office as second-class mail matter.

ITEMS OF INTEREST.

National.

One of the largest competitive examinations ever held under the civil service commission is now in progress, and will continue in all the principal cities of the United States and at Ponce, Porto Rico, and at Honolulu, until April 27. This examination is to establish an eligible list, from which appointments will be made of clerks, stenographers, railway mail clerks, and pressmen; and to various technical positions, such as draftsmen, civil engineers, physicians, trained nurses, teachers, and farmers. More than twenty thousand applications have been received in Washington from people who wish to take these examinations, and about half of the applicants desire appointment as railway mail clerks.

Two methods of taxing commercial billboard advertising, and perhaps checking it and eventually eliminating it altogether, are before the Massachusetts Legislature. One plan provides for an excise tax of ten cents a square foot on all such advertising when displayed for more than seven consecutive days. The other plan proposes to tax billboards and the like as real estate, basing the tax on the advertising value of the bill-boards. The tax would be determined by local special commissions, which also would have authority to regulate and control the display of any or all outdoor advertising as public safety, morals, or decent appearance may require.

A notable decision in favor of the railroads has been handed down by Judge McPherson of the United States District Court in the two-cent fare and maximum freight rates cases, involving eighteen Missouri lines. The railroads contended that the rates fixed by the statutes of the state were not remunerative, but confiscatory, and that the enforcement of the statutes should be enjoined. The state brought proceedings to have them enforced.

A national organization for the promotion of a movement for living on and from a little land, has been set on foot in New York under the name of "The Little Land League." Its object is to "persuade people to provide themselves with home and employment by gardening," and to "show them where to buy land, help them to get on it, and teach them how to make the best use of it."

A revision of the Connecticut automobile law fixes a jail penalty for persons operating cars when under the influence of liquor, the maximum being two years. The speed provisions of the present law are unchanged, there being no limit, although under the rule of evidence a rate of twenty-five miles an hour may be taken as *prima facie* evidence of recklessness.

Arrangements for the Champlain tercentenary celebration next summer, at and near Burlington, Vt., are rapidly nearing completion. The celebration will begin Sunday, July 4, and continue through July 13. The great national day will be on Thursday, July 8, when President Taft and Sir Wilfrid Laurier, premier of Canada, are expected to be present.

Already nine men have been arraigned in the Superior Criminal Court in Boston on a charge of conspiracy, based on the "Boston agreement" under which corporations and manufacturers, to their mutual benefit but the disadvantage of the city, regulated the price of structural steel.

A direct nominations bill, embodying the ideas of Governor Hughes, has been introduced in both houses of the New York Legislature. Its promise of effectiveness is apparent in the opposition it has aroused in the ranks of the machine politicians of both parties.

The scheme for reform in the manufacturing plants of the navy, which was desired by ex-President Roosevelt and formulated by ex-Secretary of the Navy Newberry, is calling out much complaint and may be thrown over entirely, or at least greatly modified.

Hearings have begun in the Federal Court at St. Louis before a special examiner in the Government's suit to declare the merger of the Union and Southern Pacific lines by E. H. Harriman a violation of the Sherman anti-trust law.

The Senate, confirming the action taken by Republican and Democratic caucuses, has created two new powerful committees,—one "on public expenditures," the other "on conservation of national resources."

Secretary of War Dickinson will leave Washington about April 15 for his visit to the Isthmus of Panama, in order to inform himself as to work and conditions in the canal zone.

International.

Lieutenant Shackleton of the British navy, commander of the Antarctic expedition which left England in July, 1907, has just returned to New Zealand. Briefly summarized, the results of the expedition are that a point was reached within 111 miles of the South Pole; the magnetic pole was reached; eight mountain chains were discovered and one hundred mountains. Mt. Erebus, 13,120 feet in altitude, was ascended by the party; new coast and high mountains were located running west from Victoria Land, and coal measures were discovered in the Antarctic continent. The theory of the existence of an area of atmospheric calm around the South Pole was disproved.

In thirty years the street railways of the United Kingdom have grown from 260 to 2,464 miles; their capital from $20,000,000 to $332,000,000, and their yearly net receipts from $1,000,000 to $22,000,000. The number of passengers annually carried is equal to sixty times the entire population, or sixty journeys a year for every man, woman, and child in the country.

Admiral Lord Charles Beresford, commander of the channel fleet, has just hauled down his flag at Portsmouth, Eng., thus bringing to an end fifty years of active service. The admiral is now a free lance, and it is expected that he will take an active part in the agitation for a big navy.

During the last ten years the Russian government has spent $944,510,000 on its railroads. Their entire mileage is now 27,263 miles. Private companies own the rest of the 40,111 miles of railway.

Last year 94,695 immigrants landed at Brazilian seaports. Brazil is the one American country reporting an increased immigration in 1908.

Great Britain has accepted the offer, made by New Zealand, to give the empire free of cost a fully equipped Dreadnought.

Industrial and Commercial.

The experiment of pumping oil through a rifled pipe has proved a success in California, where it has been tried on a line two hundred and eighty-two miles long from Bakersfield to Porta Costa on the San Francisco Bay. The oil of this section is so heavy that it cannot be piped practically through the tubes which are ordinarily made use of for this purpose, but the movement of the oil is greatly facilitated by forcing a certain amount of water into the pipe with it. On the interior of the pipe are cut corrugations about one eighth inch deep, these spiral curves making a complete circuit every ten feet. Thus the water pumped in with the oil goes to the outside of the interior of the pipe and following the rifling forms a thin sheet about the oil. The two move along together, the oil forming a central core that does not come into direct contact with the pipe. Relay pumping stations are established every twenty-three miles. This line cost four and a half million dollars and the daily movement of oil is between seventeen and twenty thousand barrels.

After two years of labor and an expenditure of more than one million dollars, the constructive work on the dam across the Connecticut river between Vernon, Vt., and Hinsdale, N. H., has been practically completed, making this the fifth largest water-power plant in New England. The dam is expected to develop about fifteen thousand electric horse-power.

The value of manufactured products in Rhode Island increased from $64,178,324 in 1869 to $212,716,683 in 1906—the date of the last manufacturing census. The average number of wage-earners in the industries increased from 31,927 to 93,834, while the wages paid them advanced from $12,082,758 to $44,497,101.

The difficulties between the Venezuelan government and the New York and Bermudez Asphalt Company having been settled, the company's representatives have taken legal possession of the territory in accordance with the settlement and have commenced work again in the asphalt beds.

The Cunard liner Mauretania has again beaten her own best eastward time record by completing the run in 4 days 18 hours and 25 minutes. The liner made for a best day's run 609 miles in the twenty-three-hour day.

The St. Johns, Newfoundland, sealing fleet, just returned from its annual cruise, reports fair catches for the season. Two vessels report 30,000 and 20,000 seals each.

Work has begun at the Westinghouse electric plant at East Pittsburg on the Pennsylvania's $5,000,000 electrical equipment.

So great is the oil production in the Mexican fields that the problem of housing and marketing it is becoming serious.

CHRISTIAN SCIENCE SENTINEL

"WHAT I SAY UNTO YOU, I SAY UNTO ALL — WATCH" JESUS

FRIENDSHIP.

M. G. KAINS, M.S.

PROBABLY the most conspicuous friendship of all history is that of David and Jonathan. David, it will be remembered, had just returned from his victory over Goliath, and when he was brought before King Saul, Jonathan's father, Jonathan saw him for the first time. In describing the foundation of their friendship, the prophet Samuel says that when David told the king of his humble birth, and "had made an end of speaking unto Saul, that the soul of Jonathan was knit with the soul of David, and Jonathan loved him as his own soul." How that friendship was tested; how Jonathan had to meet his father's anger because he persisted in associating with David; how his friendship was unabated even after his father had declared that he could not ascend the throne while David lived; how at dinner he risked his life and barely escaped his own father's javelin because he championed the cause of his friend, and how David commemorates their friendship in that exquisite lament for Saul and Jonathan after their fall in the battle of Gilboa,—the story always has glowed and always will glow, because its vital essence is selfless love.

Every story, whether it be true as that of David and Jonathan, whether it be traditionary as that of Damon and Pythias, or whether it be fiction as that of Hamlet and Horatio,—every story of friendship that has ever been written, and every one that ever will be written, and every one that has ever been or ever will be imagined, may be epitomized in those two words, selfless love. Wherever selfless love is absent, therefore, there can be no friendship in the highest sense of the word. To be sure, people may associate amicably on many other bases without revealing to the world at large or perhaps ever suspecting themselves that such associations lack the vital spark of supreme friendship. They may "put up with" one another's faults and foibles and follies for the sake of peace, and yet not feel the slightest glow of friendship. They may even go the length of making sacrifices for one another; but unless those sacrifices are placed upon the pyre of self they desecrate the shrine of friendship. To count or to calculate one's own sacrifices is to augment one's own selfishness. Self-seeking kills friendship. Whatever the ulterior motive be, if it involve any thought of getting, soon or late, instead of giving freely, abundantly, lavishly now, it betrays, crucifies, and would destroy friendship. This always finds its proof in a test.

Who "to the manner born," or who having risen to position in any department of endeavor, has not had flocks of "friends;" but who, having experienced a reverse, cannot recount rude awakenings and bitter losses of such friends? Who that has taken a turn in a wrong direction has not been forsaken while he was "having his experience"? Who, having listened to what he believed to be a higher message of Truth, has not been attacked with vituperation or dogmatic statements, neither of which fit the case but which tend to strengthen him in his sense of right, only to find that his "friends" have fallen away and left him, as they say, "darkened"? And who, discovering his error, and returning to the straight and narrow path, has not been met by the cold disdain or the bland reproach of self-righteousness? Only those who have passed through such ordeals can know how much they have lost and—gained. They, and they only, have proved that the fire can destroy nothing but the dross. They, and they only, can rejoice to know that in spite of their misfortunes, their wanderings, their mistakes, through good report and through evil report they have been able—if such has been their good fortune—"to keep a few friends, but these without capitulation."

Of all people who have special cause to rejoice in a potential, dynamic knowledge of what friendship really is, Christian Scientists should rank first. Like all professing Christians, they are beneficiaries of the abounding selfless love of Jesus of Nazareth. So much of what the world enjoys today is due directly or indirectly to his mission that any enumeration is superfluous. But Christian Scientists are under an added obligation to Mrs. Eddy, whose selfless love has presented in our fortunate day the only explanation of the Master's words and works that has enabled mankind to present the signs which Jesus declared evidence an understanding of God. And now that we have only to apply ourselves to gain this understanding, may we not rejoice that we can so easily establish, each for himself, the true bond of friendship that "suffereth long, and is kind," the bond whose establishment proves that Emerson was right when he said that "the only way to have a friend is to be one." Higher than this we find the words of the Master, concerning Lazarus, who had been carried to the tomb. Jesus said to his anxious disciples, "Our friend Lazarus sleepeth; but I go, that I may awake him out of sleep." And he did! Such proofs of friendship as the Master gave we should seek to give—we who have learned in Christian Science the infinite power of divine Love.

"REMEMBER NOW THY CREATOR."

RICHARD P. VERRALL.

AFTER having reached the conclusion that human existence was but "vanity and vexation of spirit," the wise Preacher of Israel thus earnestly addressed the rising generation of his time: "Remember now thy Creator in the days of thy youth, while the evil days come not, nor the years draw nigh, when thou shalt say, I have no pleasure in them; . . . when the keepers of the house shall tremble, and the strong men shall bow themselves, and the grinders cease because they are few, and those that look out of the windows be darkened." This vivid portrayal of matter's demise and the inevitable dissolution of the five physical senses, set forth in the body of the discourse, shows how important it is to commence, while there is yet time, to discover the true way of escape from this prison-house of matter.

Copyright, 1900, by Mary Baker Eddy.

In the congregation of Israel many of the fathers could no doubt remember how, in introducing the young king, David had said, "Solomon my son, whom alone God hath chosen, is yet young and tender, and the work is great: for the palace is not for man, but for the Lord God;" and how, in his public thanksgiving for the prosperity of his own reign, he had declared: "Both riches and honor come of thee, and thou reignest over all; . . . But who am I, and what is my people, that we should be able to offer so willingly after this sort? for all things come of thee, and of thine own have we given thee." The books of the Chronicles contain numerous other instances of the fidelity with which both David and Solomon remembered their creator in the days of their youth; yet, on account of their inability to conquer the flesh, both failed in later life to uphold the standard which each had set up.

When in the fulness of time "the root and the offspring of David, and the bright and morning star," appeared in the form of the great Teacher and Healer, Jesus said, "My meat is to do the will of him that sent me, and to finish his work;" and again, "Verily, verily, I say unto you, The Son can do nothing of himself, but what he seeth the Father do: for what things soever he doeth, these also doeth the Son likewise." And at the close of his victorious earthly career he triumphantly exclaimed: "I have finished the work which thou gavest me to do. And now, O Father, glorify thou me with thine own self with the glory which I had with thee before the world was." All through the period of his public ministry Jesus never once forgot that the power to heal and save which he exercised so freely was not his own but came forth from the Father. His appeal for a return of the glory which he had "before the world was," clearly indicates that Jesus had a foreknowledge of God upon which he never for an instant lost his mental grasp. Speaking of his disciples, he said, "They . . . have known surely that I came out from thee, and they have believed that thou didst send me."

Through her discovery of Christian Science, Mrs. Eddy in our day brings back to our remembrance "all things whatsoever" Jesus said when on earth. In "No and Yes" (p. 36) she says: "Jesus' true and conscious being never left heaven for earth. It abode forever above, even while mortals believed it was here. He once spoke of himself (John iii. 13) as 'the Son of man which is in heaven.'" At another time he showed that the same relationship with which he was inseparably connected with the Father was available to all mankind. He said, "Take heed that ye despise not one of these little ones; for I say unto you, That in heaven their angels do always behold the face of my Father which is in heaven."

When we read Solomon's warning, "Remember now thy Creator," in the light of Christian Science, we no longer form a mental picture of an unknown God, nor do we think of Him as the creator of a material universe; on the contrary, we have been taught to stop worshiping "any graven image, or any likeness of any thing that is in heaven above, or that is in the earth beneath, or that is in the water under the earth;" for it is written, "The hour cometh, and now is, when the true worshipers shall worship the Father in spirit and in truth:" When Jesus said, "Call no man your father upon the earth," did he not plainly warn mankind against entering into a conspiracy against their own hope of salvation? Surely a man cannot legitimately have two fathers, any more than he can honestly serve two masters. Let us choose therefore this day whom we will serve, the god of this world,—matter,—or "the only true God,"—Mind.

In reference to this question Mrs. Eddy has said: "Mind is the grand creator, and there can be no power except that which is derived from Mind. . . . then give to Mind the glory, honor, dominion, and power everlastingly due its holy name" (Science and Health, p. 143).

Thus, step by step in Christian Science, Mrs. Eddy would safely lead us upward and onward, out of the Egyptian bondage of material sense into the "glorious liberty of the children of God." In the light of her teachings we may learn to "be fruitful, and multiply, and replenish the earth," not with conceptions of sin "shapen in iniquity," but with spiritual ideas in the likeness of God, expressing "the beauty of holiness." By looking to Mind as the "author and finisher" of every good gift, we are taught in Christian Science how literally to remember God; that is, how to prove title to our membership in His body; in a word, to experience the fact (even if at present only in occasional glimpses) that man is now perfect even as his Father in heaven is perfect. John of Damascus wrote, "We shall not injure God by remaining ignorant of Him, but shall deprive ourselves of His friendship." In pointing out the true status of man as a child of God, Jesus restores the divine ideal, and points to humanity's divine inheritance. Referring to his own mission, he said, "The Son of man is come to save that which was lost."

Remembering—saving—and healing (making whole), --all point to the same essential meaning, namely, to the fact that man has never fallen from grace. He was, is now, and always will be perfect; like the Father in whom we, as did he, "live, and move, and have our being," he changes not, he is "the same yesterday, and to day, and for ever." But mortals must find this out by awakening to the truth of being; they must not only know, but live as if they knew, that man is now a son of God, having "dominion over all the earth," and "now," as the apostle tells us, "is the accepted time; behold, now is the day of salvation." "Then shall be brought to pass the saying that is written, Death is swallowed up in victory." "And the Lord God will wipe away tears from off all faces; and the rebuke of his people shall he take away from off all the earth: for the Lord hath spoken it."

CHRISTIANITY VS. THEOLOGY.

JOHN E. FELLERS.

In one of the popular dictionaries we find this definition: "Christianity is the spirit manifested by Jesus in his life, and which he commanded his followers to imitate." The same authority gives this curious but interesting definition of theology: "A speaking concerning God," and following this definition, as an illustration of the meaning of the word, we find the statement: "Theology, properly and directly, deals with notional apprehension." The essence of these definitions is that Christianity is the truth about God and the universe as "manifested by Jesus," while theology is some one's notion or apprehension of that truth. One is the certainty, while the other is the guess. Following out this line of thought, we may say that Christianity shows how; theology tells how. Christianity is practice; theology is theory. Christianity is subject; theology is thesis. Christianity is science; theology is philosophy.

When Christianity speaks the oppressed take courage, and the face of the oppressor blanches with fear. To the established medical and theological creeds the healing Christianity as "manifested by Jesus" seems mockery, but to the suffering and sin-sick it is a balm. Before its benign influence sorrow gives place to joy and weakness gives place to strength. It alone serves for the removal of the world's woe. It insists that humanity cannot be absolutely well and happy so long as there lives on this earth one sick man or woman, and that sin will not be fully destroyed so long as it can find one person to advocate its claims. Christianity is the divine wonder to human sense, announced by the wise men of old; manifested by the star; taught by Christ Jesus, and demonstrated to this age by the Discoverer and Founder of Christian Science.

Digitized by Google

It is recorded that in the hour of the Master's greatest trial, when condemned and betrayed by theology and creed, he calmly and resolutely stood for the truth which he had declared and demonstrated. Mary Baker Eddy has met the world's ingratitude with a smile. There is a serene and certain poise about her work that turns criticism into apology, inspires confidence, and makes sad hearts happy and calm. She is more than a physician in her ministry to the needs of a suffering race. She is its wise counselor and guide, patiently waiting for the frail present to yield its false standards to God's eternal forever. Christian Science has led humanity beyond the mystic midnight hour, far toward Truth's unending day.

"THY FAITH HATH MADE THEE WHOLE."

LOUIS A. GREGORY.

It sometimes happens that the passages of the Bible which we have studied most will suddenly present to us a new meaning, unfold a thought we had not discovered before, and teach a new and beautiful lesson. The 9th chapter of Matthew, which contains an account of the healing of the woman who touched the hem of Christ's robe, was such a passage for me. A recent reading of this chapter impressed upon me the ever-presence of God, good, and the naturalness and reasonableness of Truth's manifestation in every phase of human experience, as it had never done before.

When I read how the woman was able to get close enough to the Messiah to touch his robe, and how that touch healed her physical ailment, the first thought was, How blessed was the woman that she lived at a time when she could come into physical contact with Jesus and thus be instantly healed. But as I read farther I found how mistaken the first thought had been, for Christ Jesus told the woman that it was her faith which had made her whole. It was not, therefore, the physical presence of Jesus nor the touch of his robe that effected the healing, but it was the faith of the woman in the power of God and her appreciation of the fact that the Christ was present to demonstrate the supremacy of God as infinite good. As it was the faith of the woman in Christ Jesus' works and her appreciation of the import of his teachings that healed her, then she had no advantage that any one does not have who reads the story of her experience today, for all may be healed, as was this woman, through the attainment of sufficient faith. We have the benefit of her experience, which should add to our faith the true knowledge of God.

This story has another lesson, viz.; this, that the works of Jesus and the deeds which are being done today in the emulation of his example are not miraculous in the sense that they are special dispensations or manifestations of the power of God. The thought that this was a special manifestation of the power of God, peculiar to the time or circumstance, not something which is equally practicable and applicable today, is a mistake. In spite of a partial appreciation of the beauty and truth of the incident, I still clung to the orthodox notion that the healing was the result of the physical presence of Jesus and contained no practical lesson for the reader today. The scientific understanding of the incident removes that misconception. If the faith of the woman made her whole, then the same faith, when coupled with the understanding which enables one even figuratively to touch the hem of Christ's robe,—that is, to get into harmony even to a degree with the teachings and works of Christ Jesus.—will heal instantaneously, as the woman was healed.

It was not a dead faith that healed the woman. She of all the throng had a faith that was active enough to cause her to reach out and touch the hem of the robe. As the people crowded around Jesus it is probable that many were touched by his robe as he passed. Others may have reached out in curiosity and touched him. But the one who reached out in faith was the one to be healed. When we open our eyes to the reality of being, we see all around us the repetition of this so-called miracle. We see those who have had the faith to put aside material beliefs, press through the crowd of errors and false claims until they touch the living Truth, and we see that in the attainment of a small measure of the knowledge of Truth, they are healed.

MY GARDEN.

MARY TROXELL.

One morning, after an absence of years from my home, I stood by the window looking out upon a forlorn and neglected garden. Sweet memories arose of the scent of a honeysuckle which hung over the trellis at the end of a trim lawn in the garden of long ago; memories of stately peony and gay verbena, of deep red rose and her paler pink sister, of dainty white clematis, shy alyssum, and modest mignonette. Rather discouraging was the present contrast, however, for naught of beauty or sweetness remained; rank weeds and grasses betokened long neglect; stones and an ash-heap, a broken trellis, the stump of a dead tree, called forth momentary regret, to be quickly dispelled by the knowledge of what willing hands, bright sunshine, and warm showers would accomplish.

When wintry frosts melted before oncoming spring, and the ground was soft and warm, a faithful servitor came one day at my bidding. He had a quaint, cheery way of expressing himself, and a thrifty habit of turning to account things that most people would throw away as useless, but even his optimistic spirit faltered for a moment before the unsightly prospect. Then he said hopefully, "Well, miss, there's plenty of sun to make the grass grow." And when sun and rain had made all ready, I went into my garden and sowed seed, though one might wonder what of life or beauty could come from the little black balls and withered pods that fell into the earth. Yet the work was not all done even then; soon a shade of green lightened the brown, small double leaflets and tiny stalks came up in rows; but weeds, too, began to grow apace,—sometimes it was impossible to tell which was flower and which was weed, and both must needs "grow together" for a time.

After the heavy spring rains, stones came to the surface and lay thick and hard over the tender seedlings, and they had to be gathered up, and the weeds uprooted, lest the plants should be choked and hindered. One night a marauding pussy scratched away the sprouting asters, and one day a kindly hand, that wanted to help, pulled up some weeds, but alas, petunia plants came up with them, and it was too late to sow more. Yet, despite drawbacks and hindrances, beauty and sweetness budded and bloomed, and when golden summer came on, green vines covered the unsightly trellis; the moonflower opened its pure white cup, to be filled by silvery moonbeams at eventide; feathery cypress vines dotted with tiny red and white stars climbed up and up and over the fence; many-colored verbenas laughed a gay "good morning," and if hollyhock and madeira vines forgot to bloom, the geraniums would have rivaled the hollyhock in brilliant hues, while sweet alyssum sent forth a faint, sweet perfume. And the nasturtiums! How they ran riot over border and pathway, opening bright blossoms of sunset red and orange, pale yellow, russet, and even pink! Into many homes they went, with their silent message of cheer, for what home is not brighter for the gift of a few flowers? Then winter came again, but the memories of beauty, color, and fragrance lingered on. This spring there will be fewer stones and weeds to clear away, the planting will be easier and the yield larger.

Digitized by Google

When our mental homes and gardens are first examined in the light of Christian Science, sad indeed, sometimes, is the uncovering of the results of neglect, indolence, wasted time, and lost opportunities, and well-nigh hopeless might seem the task before us but for the understanding of the regenerative power of divine Love, and the knowledge of what hope, faith, and patience can accomplish. Even after the first toil is over, and the seeds of truth are fairly planted, weeds and stones of old thought-habits reappear and come to the surface, again and again; thievish mortal propensities seek to tear away the good, and even well-meaning helpers may injure the tender thought-seedlings, reaching upward and away from earth and matter to the glorious possibilities and freedom of infinite spiritual good.

But have a care, overanxious and zealous gardener, lest human judgment mistake in attempting to divide between truth and error or seek to hasten the unfolding of Love's blossoms. "Growth is the eternal mandate of Mind," says our Leader (Science and Health, p. 520), yet no human touch may force apart the forming bud and blossom, no human haste or anxiety can develop it to its perfection. As from the heart of the flower, untouched by human aid, its perfume rises and is borne forth on the morning air, so does love for God and man arise in the heart and go forth on the breath of gratitude to sweeten the atmosphere and bless the earth. Canst thou, O human helper, tell whence or how it came? Wouldst thou with careless hand tear apart the closely folded petals, to find the recesses of its being, since

> Love alone knows whence it came,
> And comprehendeth love?

We have but to do our part, through unceasing prayer and constant labor, to destroy in the consciousness of those who call for aid all that would hinder spiritual growth and development, then leave the rest to God. The sunlight and warmth of Love and the gentle dews from heaven will refresh the newly awakened thought which is opening to the springtime of Life and Truth, and some day the flowers of patience, purity, meekness, hope, and joy will unfold, unseen perhaps to mortal vision, but cared for by the great husbandman who giveth the increase. This thought is beautifully expressed in one of our hymns:—

> Thou knowest not which seed shall grow,
> Or which may die or live:
> In faith and hope, and patience, sow;
> The increase God shall give,
> According to His gracious will,—
> As best His purpose may fulfil.

TRUTH'S ANSWER.

CHARLES A. BLAKE.

IN the *Boston American* of July 23, 1908, was an editorial accompanied by a cleverly drawn illustration,—a figure of a man, the familiar type of the unemployed of every city and of all time. The subject of the editorial was, "Who is going to answer this man?" and it was suggested by a question which had been put to Mr. Taft after he had delivered an address at Cooper Union in New York city. The question was, "If a man is out of work, and has a family starving, what is he to do?" The answer given was, "God knows; I don't." The editorial comment on this answer was, that it was honest but not satisfying. It graphically pictured this man's condition, and definitely placed the responsibility for "the plight of honest men willing to work faithfully but unable to find work." It implied that such a one is not satisfied with simply an honest answer, but demands a satisfactory one also. The editorial was a pathetic and touching appeal for the man in question, a sincere and vivid portrayal of the hopeless misery of his condition, but its writer failed to give a clue to the remedy, and I believe he was as ignorant of the real solution as was the one commented upon.

In the first place, I do not think that there ever was a man strictly honest and absolutely faithful who was unable to find work and receive a fair reward for his labor. Whether the conditions of business be prosperous or otherwise, we have the unemployed. Perhaps the number is greater in a time of depression, yet they are always with us. Wherever and whenever there is free bread, there we find the bread line. Whence, then, comes this condition? As seen in Christian Science it is a state of the human mind, a sense of lack, fear, etc., and until that "perfect love" which "casteth out fear" is realized and practised universally, the problem of the unemployed will remain unsolved.

Having been through a similar experience to that of the subject of the editorial, with one exception, that of the family, and because I have found a solution of the problem which has proven satisfactory and which is available to every one, I will relate a little of my experience. A few years ago, although equipped with a high school education, with a working knowledge of two trades, with admitted talent and ability, of good family and careful training, as free from bad habits as the majority of young men of similar advantages, I found myself far from home, out of money, out of employment, poorly clad, seemingly friendless, and hopelessly in debt; a young man under twenty-five, a failure. About this time I fortunately came in contact with a Christian Scientist, who, seeing my need, endeavored to show me that my condition was the result of wrong thinking.

Inspired by a new hope, I determined to investigate, and find if possible the help it offered. With a borrowed copy of "Science and Health with Key to the Scriptures" by Mrs. Eddy, I soon found the reason for all my trouble, also the remedy, and the rule which, if followed, would insure health, peace, and prosperity. The Bible, which I had been taught in childhood to love and reverence as the inspired word of God, but which I had come to believe was only an accumulation of mythical and inaccurate accounts of people and events long since passed into history, has been transformed into a book of vital interest and full of promise; and God, who had been intangible and unavailable, became a Father of infinite love and power. I soon obtained employment with one of the large eastern railroads, and with fear eliminated I was able to give my best effort to my work, which became a pleasure where before it would have been distasteful. I now have faith in place of fear, hope in place of hopelessness, prosperity in place of poverty, peace and happiness in place of discontent and discouragement. In spite of the general depression in business during the past year, which affected railroads perhaps more than any other business, I have had more work and better pay than in any year previous, and I am persuaded that in the teaching of Christian Science is to be found the remedy for all discordant conditions.

THE PUBLISHING HOUSE BUILDING FUND.

Contributions to the Publishing House Building Fund should be sent to Stephen A. Chase, Treasurer, P. O. Box 56, Fall River, Mass. These contributions will be thankfully received and promptly acknowledged.

ADMISSION TO MEMBERSHIP.

The next admission of candidates to membership in The Mother Church will be June 4, 1909. Applications should be in the hands of the Clerk on or before May 12, 1909. Application blanks may be had by addressing William B. Johnson, C.S.D., Clerk, at the church edifice, Falmouth, Norway, and St. Paul streets, Boston.

SELECTED ARTICLES.

[Algernon Hervey-Bathurst in the *Nation*, England.]

The logic of Christian Science is the logic enforced by the greatest metaphysician the world has ever known, logic so clear that the humblest fisher-folk, perhaps the most uneducated men of their day, were able to accept it without any difficulty. That same "mode of arguing," to use one of the definitions of "logic," is the mode employed by Mrs. Eddy, the Discoverer and Founder of Christian Science, and by all students of Christian Science. On what did the great Master base his teachings? In reply to the scribe who asked, "Which is the first commandment of all?" Jesus replied, "The Lord our God is one Lord: and thou shalt love the Lord thy God with all thy heart, and with all thy soul, and with all thy mind, and with all thy strength: this is the first commandment." Now the teachings of Christian Science are based on the First Commandment, and in this connection Mrs. Eddy has said, on page 340 of Science and Health: "The First Commandment is my favorite text. It demonstrates Christian Science." Starting, therefore, from the premise of "one God, or good," whom, as Jesus declared, to know aright is eternal life, the logic of Christian Science can hardly be termed "contemptible," if it leads to the conclusion that there is in reality no power but that which is of God or good. To the extent that this is understood or demonstrated, to that extent is evil proved to be unreal, be it in the form of sin or of sickness, for there is no evil in good.

There is never the slightest doubt in the mind of any student of Christian Science as to the soundness of its logic, because, just so soon as he has grasped it, even in a small degree, he begins to see his way out of the thraldom of sin, sickness, and discord. It is indeed true that to the "wisdom of the wise" these things are just as much "foolishness" today as in the days when the apostle, writing to the church at Corinth, told them that "God hath chosen the foolish things of the world to confound the wise; and God hath chosen the weak things of the world to confound the things which are mighty." True it is that "the attitude of thought and feeling which it [the logic of Christian Science] represents is worthy of much consideration," for it is just because the logic of Christian Science is faultless that the message of freedom and joy can be given with such authority to the sick and suffering.

[Capt. Geoffrey Wilkinson in the *Onlooker*.]

Mrs. Eddy has stated that the Bible was her only textbook, and any one who has gained even a slight demonstrable understanding of Christian Science has no reason to doubt her statement, for he can see how absolutely her teaching has been drawn from it. The fact is, that if you start with the Scriptural teaching that God is All, that God is good, and that God is Spirit or Mind, the rest of Mrs. Eddy's teaching follows as a matter of course, if you will only be logical, and do not, as others have done, throw logic to the winds when faced with the testimony of the physical senses. The essential point which has differentiated Mrs. Eddy from every great teacher since the days of the Galilean Prophet is the intense spiritual discernment which has enabled her to see and demonstrate the unreality of evil in its many forms, thereby breaking away from that mesmerism of sense which has lain like a pall on Christendom for eighteen centuries. The healing of Christian Science follows naturally from the understanding of the truth of being, before which the errors of sense flee as darkness before the light, for truth is of God and has the divine energy behind it, and where truth appears, error disappears—forever. Once let the student of mathematics grasp the fact that four times four are sixteen, and he can no longer be led astray by the supposition that they are twenty, or even thirty-two. Such is the nature of absolute truth.

The critic seems to have ignored the fact that "the mystical and ascetic elements in Christian Science" are not only the natural conclusions from Mrs. Eddy's premise of the allness of God, Spirit, good, but also the commonplaces of primitive Christian doctrine. Should any one doubt this, let him familiarize himself with the teachings of the New Testament, and realize that these teachings were meant to be practised, not to be regarded as too transcendental for imitation by ordinary mortals. In the same way Mrs. Eddy's teachings as to the overcoming of death and on certain social questions are not only the logical conclusions from her premise, but identical with the teachings of the New Testament. Thus, when our critic wrote that Christian Science "has a much longer pedigree than recent writers seem to have realized," he was saying a good deal more than he intended. The fact is, that Christian Science is the outcome of Mrs. Eddy's continuous and devoted study of the Bible as illumined by the singular spirituality of her thought, and her teaching has succeeded in making of the Bible the most interesting and practical book in the world.

[Helen M. Emery in the *Morning Oregonian*, Portland, Ore.]

A copy of your enterprising paper, the *Morning Oregonian*, has found its way to my table, away up here in Canada, and having duly read the various articles which were marked by some good friend in your fair city, I beg leave to submit a few comments upon the same. The first marked item that I noted was an account of the fall of a lady down a flight of stairs in a public hall, and her refusal to have medical treatment. This was not strange, considering that she was a Christian Scientist, but the refusal of the police officer to assist her into a carriage was not polite, to say the least. It is to be hoped, however, that her preference for Christian Science treatment was respected and successful. Glancing through the pages, I saw another marked item. I was grieved to read of the death of a Christian Science believer from the effects of poisoning, and the serious illness of her two daughters. I also read that there was much excitement in the town (Roseburg), and that "officers and citizens felt that the time had come to stamp out this craze."

Pursuing my reading, I noticed the account of three or four brutal murders, and I think four suicides, and while the usual "coroner's inquests" would doubtless be held, I saw nothing to indicate that the "citizens were aroused" as to the cause, or as to "stamping it out," although whisky was written large and luminous over all, and whisky is surely a product to be stamped out. I noticed the lamented passing away of respected citizens—some in the early and some in the later prime of life. Some of them passed from hospitals where the best was obtainable in the way of material help; others went from homes where wealth and love and skill combined their forces in vain to keep their dear ones with them. The list of deaths in the daily statistics seemed small for a great city, but there were fifteen in all, and these with the others presumably passed on while under the care and with the consent of responsible physicians, for no mention was made of "inquests" or "stamping out a craze." I pondered somewhat over these things.

I next read with interest the opening remarks of one of your city pastors on a recent Sabbath morning and, strange to say, they were upon the same theme, Christian Science. It seems that he had previously preached or spoken upon the subject, and had received numerous letters,

Digitized by Google

taking him to task for his position. He says only one of the writers signed his name, and I here offer the suggestion that not all who wrote him were Scientists, but simply people who liked fair play, for he claims that they did not show the usual courtesy of Christian Scientists. However, the sample which he quotes does not appear to me as vindictive as the answer which is flung back, which is not really so much of an answer as a medley of assertions, gossipy statements, and false conclusions, which from their nature preclude the use of arguments to refute them.

One thing greatly surprises me. If the teachings of Christian Science are so utterly false and foolish as some people try to prove, why not let Mrs. Eddy bear the odium of it all, and not drag forth the sleeping dead of centuries ago to share it with her. And what an ever-increasing list of discoverers is being discovered by Mrs. Eddy's critics. They date back thousands of years before Christ! They include the ancient Hindoo philosophers, the eminent scientists and philosophers throughout the centuries, and finally culminate with a kind-hearted Maine man, who laid no claims, it is said, to anything higher than magnetism in his often successful efforts to heal the sick. The Founder of Christian Science declares that she gained her spiritual inspiration from the study of the Bible alone: that through it there was borne to her quickened thought a revival of the method which Jesus openly taught to his disciples. She asks her followers to follow her "only so far as she follows Christ" (Messages to The Mother Church, p. 70). No more, no less, does she profess, yet hark to the ancient cry of malice against this woman who, more than most, has shown forth the spirit of the Christ. "Father, forgive them, for they know not what they do." It is as if the thoughts of hate and envy in many human minds had taken to themselves other human proclivities and "bound themselves with an oath" to crush this movement and defame its Leader. As if they said, We may not be able to turn back the hosts of those who have listened and learned somewhat of this new evangelism, but we must keep the rest of the world from going after it, for our crafts be in danger. But error is powerless when Truth goes forth to battle for its own, in its own time and way; and not only is it powerless, but self-destructive.

There is one hopeful feature in this preacher's summing up—he wishes Christian Science were true, and if he thought it were he would gladly accept it, and try to live it. Good for you, brother! Now, go to work and learn what Christian Science is. Learn even a little, a grain, and you will not speak of self-complacency or self-sufficiency in the same breath with a true Christian Scientist, and I believe you will reconsider your statement that you have already "studied the subject carefully."

[J. V. Dittemore in the *Batavia* (N. Y.) *Times*.]

Christian Science does not take away the Bible and substitute Mrs. Eddy's text-book, as our critic charges. Science and Health may be said to be the Christian Scientists' commentary on the Bible. Almost every denomination has its Bible commentaries or "helps," and why cannot a Christian Scientist have his, especially when it has proven, even according to the critic, to have produced such good results. One of the principal tenets of the Christian Science church states that "as adherents of Truth, we take the inspired Word of the Bible as our sufficient guide to eternal Life" (Science and Health, p. 497).

The clergyman criticizes Christian Scientists for charging a fee for their services, when, he tells us, the services of ministers are "freely given." If Christian Scientists like clergymen received a salary, they would gladly perform any duties which fell to their lot without further remuneration. No person who is honest is kept from receiving help in Christian Science on account of his temporary inability to pay, but those who are devoting their lives to the practice of Christian Science, or to any other system of good works, are entitled to proper compensation from those who avail themselves of such services. That "the laborer is worthy of his hire" was a fundamental teaching of the Master. It is a pauperizing suggestion to make any one believe that they are unable to give value received. "The noblest charity is to prevent a man from accepting charity."

Every great religious movement has passed through periods of bitter antagonism. Jesus Christ himself was assailed, misrepresented, and crucified for the truth he taught. After all has been said, we can rest the future of Christian Science, or of any other system of religious teaching, on no better basis than that expressed by a certain doctor of the law, Gamaliel by name, who two thousand years ago said of the doctrines of the great Nazarene, that "if this counsel or this work be of men, it will come to nought: but if it be of God, ye cannot overthrow it." Christian Scientists are willing to have their faith stand or fall by this test.

[Frederick Dixon in the *Kensington News*, London, England.]

The bishop says of sin that the Christian Scientist ignores it, but that Jesus acknowledged its reality and overcame it. Now the word reality is used in Christian Science to express the absolute, that is, the spiritual and eternal, as opposed to the material sense of sin and suffering. When, therefore, the Christian Scientist says that pain is unreal, he means that it has no place in God's kingdom, and "the kingdom of God is within you." This does not in the least mean that suffering does not seem desperately real to the human consciousness. Mrs. Eddy says, "Sickness is neither imaginary nor unreal,—that is, to the frightened, false sense of the patient. Sickness is more than fancy; it is solid conviction. It is therefore to be dealt with through right apprehension of the truth of being" (Science and Health, p. 460). What is this right apprehension? According to Christian Science it is the perception of the eternal fact that there is no power in evil which can turn men's thoughts from God into channels of sickness and sin. The persistent effort to attain this apprehension fulfils the command of the apostle to "pray without ceasing," and in proportion as he succeeds man "enters heaven with prayer." He finds, that is, the "right apprehension of the truth of being," which consists in letting that "mind be in you, which was also in Christ Jesus," and he begins to overcome suffering as Jesus overcame it, certainly not by ignoring it, but by destroying its cause; and as he does this he learns that "heav'n is all around us now, if we but lift our eyes."

The Christian Science worker, constantly spending all his day in shop or office, and after that sitting long into the night by the bedside of the sick, is in little danger of "ignoring pain" or of becoming "self-centered." That is the criticism of those whose knowledge of Christian Science is theoretical. As for sin, to the Christian Scientist it is the belief in anything that is unlike God. He does not ignore it, he never palliates it, but he insists that it is not real because it is no part of the spiritual and eternal. There is a paragraph on page 448 of Science and Health with which the bishop's own words seem to agree almost exactly: "When the Publican's wail went out to the great heart of Love, it won his humble desire. Evil which obtains in the bodily senses, but which the heart condemns, has no foundation; but if evil is uncondemned, it is undenied and nurtured. Under such circumstances, to say that there is no evil, is an evil in itself."

[Alfred Farlow in *Boston American*.]

We submit that every individual who forsakes sin does so on the basis of Christian Science teaching, that there is

Digitized by Google

nothing in it, whether or not he knows anything about the letter of Christian Science. A man does not do wrong because he believes there is nothing in it, but because he believes there is something in it. In any event, Christian Science agrees with the Scriptural teaching: "If we say that we have no sin, we deceive ourselves, and the truth is not in us. If we confess our sins, he is faithful and just to forgive us our sins, and to cleanse us from all unrighteousness." Christian Science reveals the fact that the sinner is not a slave to a real but to an unreal master.

This new idea gives fresh hope and courage to the sinner and, together with the understanding of the omnipotence of good, it helps him to wage a successful combat with evil. In passing, we desire to call attention to the fact that Jesus, the Master of Christianity, gave the fundamental idea of Christian Science on this point. He declared Satan, who all agree is the author of sin, to be a self-constituted "liar," and he referred to his offspring, "his own," as "a lie." He said of Satan that he "abode not in the truth, because there is no truth in him," which is equivalent to saying that Satan is simply deception, and that his offspring is false. In order to escape the effects of deception one must first recognize that it is deception, then deport himself accordingly. Hence the teaching of Christian Science that one must first uncover wrong and then overcome it with truth, following the Master's suggestion to "overcome evil with good."

[Willard S. Mattox in the *Toronto* (Ont.) *World*.]

Christian Science interprets the atonement as a successful effort on the part of Jesus to exemplify or prove to the world the true unity which exists between man and God, the unity and relationship of Father and child, of creator and creation. He prayed, "Holy Father, keep through thine own name those whom thou hast given me, that they may be one, as we are." His human life, culminating in the crucifixion and resurrection, was undertaken in order to encourage the human race by showing them that there is a way out of the mortal beliefs of sin, disease, and death, a way out of the illusion that man has ever been separated from God. Salvation, then, in Christian Science is not mere passive acquiescence in a belief that Jesus is the Saviour. . . . "Work out your own salvation," said Paul, "with fear and trembling. For it is God which worketh in you both to will and to do of his good pleasure."

Jesus is described as the Wayshower, and he said, "If ye love me, keep my commandments," and among other commandments that he gave were those to "heal the sick" and to "love one another." Christian Scientists believe thoroughly in the Scriptural record, and they do not reject the texts cited by your contributor, but they have their interpretation for them and this interpretation is spiritual and scientific. Your contributor quotes among others the text, "For the love of Christ constraineth us; because we thus judge, that if one died for all, then were all dead: and that he died for all, that they which live should not henceforth live unto themselves, but unto him which died for them, and rose again." The Christian Scientist takes much comfort from this text, because to him it means that Jesus' triumph over the grave was a glorious assurance to stricken humanity that the grave can be overcome by the power of God in the same manner as Jesus overcame it. Did he not say, "If a man keep my saying, he shall never see death"? His patient suffering, his death and resurrection, were for an example, to show mortals that these evils do not have power over man, when man is governed by God. St. Peter says, "Because Christ also suffered for us, leaving us an example, that ye should follow his steps." It is, then, an active imitation of Jesus' career, a demonstration or proof of the truths he taught, that accomplishes our salvation and that will finally usher us into heaven, according to Christian Science.

[Anna Friendlich in the *Spectator*, Portland, Ore.]

The movement to live as Jesus lived—to do what Jesus would do—appeals strongly to Christian Scientists. "The purpose and motive to live aright can be gained today. This point won, . . . you have begun at the numeration table of Christian Science," says the Christian Science text-book, Science and Health (p. 326). How to advance beyond the numeration table is the problem. Can we live a divine life on a human basis; a spiritual life on a material basis?

I might say: "For two weeks I shall live as Abraham Lincoln lived; I shall paint as Raphael painted; I shall play as Beethoven played; shall write as Shakespeare wrote." But how, without the genius, without the spirit that animated these men? And how achieve the infinitely greater feat of living as Jesus lived, without the Mind that was in Christ Jesus? This is the very instruction we find Paul instilling into the early Christians, the beginners in Christian living. This Mind is perfect Love, of which Paul makes the astonishing statement that we can give our bodies to be burned and yet not have it; that we can bestow all our goods upon the poor, and yet not have it.

The study of the Mind "which was also in Christ Jesus," rightly named the Science of Mind, forms the subject-matter of this text-book. Our experience is that in proportion as we grasp its meaning, we do what Jesus did,—heal the sick and the sinning; and our human life is magnified more nearly to approach the divine. We count not ourselves to have apprehended, but we press forward toward the mark. The Founder of Christian Science still proclaims herself "a willing disciple at the heavenly gate, waiting for the Mind of Christ" (Science and Health, Pref., p. ix.).

[Written for the *Sentinel*.]

"A NEW SONG."

FRANCIS E. FALKENBURY.

THE weary snow and slush lay on the road,
The winter sun smiled wanly all in vain,
It could not lift the bitter dragging load
That lay upon my heart with numbing pain.

A sullen wind blew harshly through the trees,
The starveling crows flapped cawing overhead;
And everything upon the earth did freeze,
While every hope within me drooped as dead.

There seemed no power that men should e'er call God,
There seemed no power our heavy prayers to heed,
No vision—for the sullen peoples trod
It underfoot and perished in their need.

And then a little girl with bonny face
Came singing sweetly through the dolorous day—
So beautiful to hear in that drear place
Her voice confiding caroling away!

So sweet and clear she sang of God as Truth,
And sweeter still she sang of Him as Love,
The somber way no longer marred my youth,
My blood no more like some cold snake did move.

And still I watched her as she went along,
Until she was beyond the land's long line,
And soft I blessed her for her golden song,
That fell upon my heart like warm sunshine.

Lo, all the warring tumult of the wind,
And all the gripe of cold and hateful gloom
Had passed, and only could my spirit find
A peace and glory filling all their room!

CHRISTIAN SCIENCE SENTINEL

EDITORIAL

MRS. EDDY TAKES NO PATIENTS.

The author of the Christian Science text-book takes no patients, and reads no letters on disease, distress, or error of any kind. Reliable news concerning Mrs. Eddy will be found in the Christian Science publications.

"THE LOVE OF GOD."

In all the teachings of Jesus there is nothing more pronounced than his desire that men should love one another, even as they are beloved of God. John, the disciple so close to the Master, amplified this precept in the text, "If a man say, I love God, and hateth his brother, he is a liar: for he that loveth not his brother whom he hath seen, how can he love God whom he hath not seen?" Centuries before David (well-beloved) had said, "Behold, how good and how pleasant it is for brethren to dwell together in unity!" and this expresses the ideal for all who follow Christ.

Mrs. Eddy has brought this truth home to Christian Scientists on page 7 of "No and Yes," in the words, "No personal considerations should allow any root of bitterness to spring up between Christian Scientists, nor cause any misapprehension as to the motives of others. We must love our enemies, and continue to do so unto the end. By the love of God we can cancel error in our own hearts, and blot it out of others."

In other words, there is nothing in the teachings of the Bible or the Christian Science text-book that should cause Christian Scientists to hold aloof from one another and to say, "I am of Paul; and I of Apollos," for the love that is of God is the dominant thought in both. One of the reasons for the marked progress of the Christian Science movement is that Mrs. Eddy's work has been uniformly with a view to keeping in force that harmony of purpose and unity of action which are in line with the demonstration of the divine Mind in human affairs.

When the disciples asked Jesus why the man whose eyes he had opened was born blind, his answer was, "That the works of God should be made manifest in him;" and he added, "I must work the works of him that sent me." If the ruling purpose of the Master's life was the healing of the sick and sinful, in fulfilment of the Father's will, then surely the one important task that lies before Christian Scientists is to follow in his footsteps, as they have been taught in Science and Health. If their every effort to do this is directed along the lines of unity and peace, coupled with an unselfish striving for the presence of that Mind which was also in Christ Jesus, all other considerations will be lost sight of, and they may rightfully claim the fulfilment of that promise which should be the ambition of every Christian: "If ye keep my commandments, ye shall abide in my love; even as I have kept my Father's commandments, and abide in his love."

ARCHIBALD MCLELLAN.

THE UNHIDDEN LIFE.

One of St. Mark's sententious comments respecting the Master, namely, that "he could not be hid," refers primarily to the fact that he often and vainly tried to escape the discomforts of personal intrusion. The desire to make him king, to witness his astonishing miracles, to secure some coveted benefit, or to gratify an aimless curiosity,—these and other kindred impulses must have largely dominated the multitude who thronged about him day after day, and the annoyance and profitless inconvenience they brought him can be readily understood by those who are familiar with the representative crowd of an oriental city. The deeper significance of these words is disclosed, however, in the fact that the omnipresent Life, Truth, Love which floods every accessible human avenue, found in Christ Jesus an open door of egress and manifestation.

As the summer draws near the evidences of an irrepressible presence are multiplying on every side. A tremendous force is astir. Every bud has become a prophet of its nearness, and we are being made more and more aware of a mighty somewhat which indeed cannot be hid. The first soft ripples of its flow are already beginning to be seen upon the northern hillsides, and the fulness of its tide will soon be the glory of half the world. We shall lose the better part, however, of this splendor of the spring thus hastening to its fragrant fruitions, if it does not bring to our thought ever-repeated suggestions of the active nearness of that eternal truth and goodness which came to its own in the gentle Man of Nazareth, and thus made him forever conspicuous. Jesus could no more be "hid" than could the dawn of a summer's day, for his life presented in its completeness the distinctive phenomena of the Christ-coming, God-with-us, the greatest possible event of every age and every life.

And this is the glory and the gladness of Christian Science, that it recognizes the individual life as the natural point of radiation for that light which is "above the sun;" it finds in Christ Jesus the type and pattern of our true manhood, and it begets that consciousness of the omnipresence of Truth and Love which led the psalmist to query, "Whither shall I go from thy spirit? or whither shall I flee from thy presence?"

This consciousness found its perfect embodiment in the great Wayshower, and this explains why, despite the gross darkness and materialism of the forgetful centuries, the light that was in him has forever shone on, penetrated the darkness of the world's selfishness and sin through the transparencies of humility and faith and aspiration and hope, which in all the years have windowed saintly souls. Speaking of her own experience of this unfoldment of spiritual truth in consciousness, Mrs. Eddy has written, "Whence came to me this heavenly conviction? . . . According to St. Paul, it was 'the gift of the grace of God given unto me by the effectual working of his power'" (Science and Health, p. 108). This is both the secret and the joy of every truly great life, and it is this sense of the immediateness of the divine,—that all intelligence is the manifestation of the one Mind; that all true brotherhood, sympathy, kindliness, affection is the blossoming forth, upon the human plane, of the impulses of infinite Love; that all genuine power is a spiritual force, God working in us "to will and to do of his good pleasure,"—it is this realization of the nature, philosophy, and practical possibility of the Christ-life that accounts for that abiding sense of freedom, enthusiasm, confidence, and efficiency which marks every true Christian Scientist.

The manifestations of goodness, patience, purity, honesty, integrity, etc., in our lives may be as multiplied as are the objects of grace and beauty in the fields of spring, and in Christian Science we come to understand that all these are but the "varied expressions of God" (Science and Health, p. 518). In so far, therefore, as we are conformed to this concept, in so far do we attain to divine sonship.

JOHN B. WILLIS.

HEALING FOR ALL.

It is simply astonishing to discover the extent to which doubt seems to prevail over faith among professed Christians, and this condition can but be largely due to the belief

Digitized by Google

that Jesus' teachings and demonstrations were limited to the age in which he lived. The strange thing is that people do not hesitate to admit their doubt. They seemingly fail to see its inconsistency with Christian profession, and quite forget the unmistakable words in the 11th chapter of Hebrews, "Without faith it is impossible to please him [God]." A brilliant writer of modern times has said that mere incredulity, or doubt, "is the surest sign of a weak head and a corrupt heart." Paul surely demanded a great deal of the religionists of his time when he said, "Why should it be thought a thing incredible with you, that God should raise the dead?" and today Mrs. Eddy asks, "What cannot God do?" (Science and Health, p. 135).

It sometimes happens that those who need help from Christian Science, say they believe that others can be healed, but that they themselves cannot. If, however, these were to devote their energies to the demolition of doubt, by the understanding of what God can do and has done for those who trust Him in every age, their healing would surely, and perhaps speedily, be accomplished. The law that "like attracts like" should be remembered in such cases, for a firm faith in the power of good will bring the needed help at all times.

Some one who has trouble in respect to hearing complains that little or nothing is to be found in the Bible which would encourage one to hope for the overcoming of such a disability, but this is a mistake. It is, however, well to remember that the healing power of Truth is equally available in all cases, and if there seem to be special difficulties on the human side, this should only arouse the energies needed to combat the error. All who are discouraged, whatever their trouble, should read these inspiring words in the 29th chapter of Isaiah: "I will proceed to do a marvelous work among this people, even shall the deaf hear the words of the book, and the eyes of the blind shall see out of obscurity." Again we read, in the 35th chapter: "The eyes of the blind shall be opened, and the ears of the deaf shall be unstopped. . . . they shall obtain joy and gladness, and sorrow and sighing shall flee away." In speaking of his healing ministry the Master said, "The blind receive their sight, . . . the deaf hear;" and we read that others said of him, "He maketh both the deaf to hear, and the dumb to speak."

In Science and Health (p. 585) "ears" are thus defined: "Not organs of the so-called corporeal senses, but spiritual understanding;" and Mrs. Eddy here quotes Jesus' words, "Having ears, hear ye not?" When we are willing to listen constantly for the "still small voice" of Truth, and willing to obey Truth's high and holy mandates, we shall see more clearly each day what is needed in order to rise above all human discords, be they mental or physical.

One who chronicles her healing from what seemed desperate conditions, writes, "I was given full opportunity to see what I had lost by leaving so much undone, because I was so soundly asleep as to have little thought for anything but the material work of each day." She says that she failed to find much if any help from others, but happily this very thing called forth the spiritual energies of which all may avail themselves, and the result was perfect healing after some months of steady endeavor. Ordinary duties had to be performed, in spite of a sense of great weakness, but this could not be allowed to crowd out the spiritual necessities. Again and again, during the day, and often during the night, the word of Life, as found in the Bible and Science and Health, was called upon, and as the truth was realized and put into practice, weakness gave place to strength, and disease vanished as the living bread was partaken of, for did not the Master say, "If any man eat of this bread, he shall live for ever"? Divine Truth has healing for all, and surely so great a blessing is worth striving for.

ANNIE M. KNOTT.

LETTERS TO OUR LEADER.

Council Bluffs, Ia., March 22, 1909.

Mrs. Mary Baker Eddy.

Beloved Leader:—Many, many times have I wished to write to you, but resisted the impulse to do so. However, since reading "The Life of Mary Baker Eddy" by Sibyl Wilbur, I have felt strongly impelled at least to express myself on paper. It is only very recently that I have read this wonderfully interesting book, as fascinating as any story ever was in my novel-reading days, and I stand in awe before the revelation it gives of character—the divine reflected in the human, the divine revealed through the human. It has magnified a thousandfold my own conception of the work you have done for the world through your wonderful book, "Science and Health with Key to the Scriptures." A key indeed it is, even for those who like myself had been for years an earnest student and teacher of the Bible. When reading of your struggles, of the persecution which you endured "for righteousness sake," all that I have suffered sinks into insignificance, and I feel I could bear for the sake of the truth a thousand times more than I have ever yet borne.

As the wife of a physician I have seen much of the bitter enmity which *materia medica* bears toward this healing truth which through much travail you have given to us your followers, and to a blind world. Every day in my heart of hearts I bless you, both for myself and for the hungry world.

Very lovingly yours,

MRS. HELEN C. MONTGOMERY.

Boston, Mass., March 22, 1909.

Mrs. Mary Baker Eddy.

Dear Teacher:—I am striving to show my love and gratitude to you in writing a few lines to tell you that my wife and daughter and myself have been reading aloud "The Life of Mary Baker Eddy" by Sibyl Wilbur.

We found the reading interesting and instructive. We three have agreed, with one voice, that every Christian Scientist, far and near, should read that book. First, because it gives a clear and comprehensive explanation of some of the trials you have gone through for the sake of advancing the glorious Cause of Christian Science, for doing good, following God's laws, and benefiting the people everywhere. I have been a witness of some of the many trials you have passed through in the past quarter of a century, and know the author of the book has not overstated anything therein told. Second, because the most important facts all Christian Scientists should know and do,—such as the steadfastness you showed in holding firmly to God under all circumstances, as the divine Principle who ruled out from your way, and will rule out from the way of all who follow your teachings, all seeming evils. Third, one can learn from your experience, as stated in this book, that it is most important to know how to meet the question of animal magnetism, in order to destroy the claims of evil and show them to be no part of God's creation, hence nothing to be afraid of when they are correctly worked out in Christian Science; because no one can serve God acceptably who does not mentally overcome all evils and show them to be only false beliefs.

I am proud to say that I love you, and hope I shall always love you, because all that I have and all I ever expect to have, Christianity included, I owe, under God, to you, my precious teacher. Some months ago we adopted a daughter, who had been for many years my wife's companion, faithful and true to her. She and my wife both join me in sending the best love to our tender, loving teacher, with a God bless you.

Lovingly,

CAPT. J. S. EASTAMAN.

Montreal, Can., March 17, 1909.

Mrs. Mary Baker Eddy, Brookline, Mass.

Dear Leader:—I had occasion lately to visit a military equipments store. In looking around, my eyes rested on, to me, very strange candlesticks made of swords. One kind particularly was not as pretty, and still they were a little more expensive than the others. I asked the reason for this, and was told that these were made of true proved swords, the kind used at the front in time of war. In looking at them Isaiah ii. 4, 5, came to me. I was so glad to see these little emblems of peace and light, and my gratitude went out to you for having given to the world the understanding of Truth which is bringing the true peace and light to this age.

I am sending you this little homely candlestick with its candle. Would you accept it from one who wants to love you more and more, and earnestly work for Truth.

With love and gratitude, Your follower,

EUNICE VARY.

Manchester, England, March 13, 1909.

Dear Mrs. Eddy:—In accordance with the unanimous wish of the members of our church, assembled in annual meeting, we desire to communicate to you some expression of the profound gratitude we feel for the further proof you have given to the world of your unceasing devotion to the good of humanity. Deeply conscious of what we already owe to your wisdom and love, and mindful of the great benefits we have ourselves received through the labors of the Publishing Society, we rejoice to know that a still wider field is open for your beneficence. Apart from the *Monitor's* intrinsic interest and value as a newspaper, the contemplation of its exalted mission and of the great good it is assuredly destined to effect is for us a new source of help and refreshment, and fortifies us in our daily determination to bring forth fruits worthy of acceptance.

In loyalty and love,

The Executive Committee,
First Church of Christ, Scientist, Manchester, England.

Brookline, Mass., March 14, 1909.

Beloved Leader:—In view of the oft-repeated and unjust charges made against your teaching, that it is not in accordance with the Scriptures, I want to tell you a little story which I feel sure will rejoice your heart. Last summer my son and I took a short trip along the coast of Maine, stopping off at several places on the way. Among the rest we found a little village where a small band of Christian Scientists were holding services in a little church which had been abandoned by the Universalists about two years ago. The former pastor of the church, a dear old man about seventy years old, almost immediately began to attend the Christian Science services in the same little church, and became so interested in the teaching that he soon was a regular attendant. We heard him give his testimony in the Wednesday evening meeting when we were there, and the beautiful tribute which he paid to your teaching was what I wish you to know. He said: "I have preached from the Bible for more than fifty years, but I have gotten more light on the Bible in the little while that I have been studying it in connection with Science and Health, than in all the fifty years before."

Can we do aught but love and reverence you for the blessing you have brought to a needy world in teaching us how to understand God? I owe my life to your teaching, which saved me fifteen years ago, when I was given up by the physicians, and it is daily leading me into higher and holier consciousness. If my little story brings one bit of cheer or comfort to your heart, I shall be satisfied. With my heart's deepest love and gratitude to you, our best earthly friend,

Your loyal student's student,

JENNIE M. COOLEY.

Paris, Tex., March 21, 1909.

Mrs. Mary Baker Eddy.

Beloved Leader:—It is with a heart full of love and gratitude that I try to thank you for your beautiful pointing of the way in your article, "The Way of Wisdom," in the February *Journal*, which I have just read again, where you say, "The only incentive of a mistaken sense is malicious animal magnetism,—the name of all evil,—and this must be understood." This has come to me so clearly, in an hour of much need, that I feel I must express my love and gratefulness to you. For four years I have tried to travel the way you are so faithfully pointing, —years which, by the way, are the happiest of my life,— and in no hour of need, when I sought refuge from the storms of evil, has Christian Science failed to comfort. I am especially thankful today to you for the knowledge of God as Love and not as a God of wrath, and that He is the source of all good and saves us from evil—all that is not good—and does not send it to us. I thank God for giving us such a Leader, and I shall strive to live my love and gratitude in such a way that others may be led to see the way to real happiness which you are revealing to us.

Devotedly,

GEORGE F. CAMPBELL.

Spokane, Wash., March 18, 1909.

Mrs. Mary Baker Eddy, Brookline, Mass.

Dear Leader:—We, loyal and grateful Christian Scientists of Spokane, Wash., send you joyful greetings. Our gratitude is a demonstrative and positive quantity always, because of the daily evidence of the presence in our midst of Christ, Truth, healing the sick and reforming the sinner; but just now there is added reason for gratitude with us, because we have reached the period in our church history when we are ready to dedicate our church edifice to the Cause of Christian Science. Dedicatory services will be held at 11 o'clock A.M. and at 8 o'clock P.M. Sunday, March 28. It has been our constant effort, guided by the wisdom with which God has so richly endowed you, and which is set before us in such practical form through your writings, so to consecrate our lives to God's work that the spiritual dedication may precede the material. The wonderful growth of the church in our midst—the direct result of the healing work—leads us to believe that our efforts have been honestly expended and are being generously rewarded by the Giver of all good.

Words are poor instruments with which to attempt an expression of our love for you, as our Leader in this great work, and of our appreciation of the wonderful blessings that have accrued to us because you have ever walked so wisely and so faithfully with God; our appreciation and love are yours always.

This letter is written by direction of the church-membership. Most sincerely yours,

JOHN M. HENDERSON, *First Reader.*
MRS. MARGARET CRANE, *Second Reader.*

Milwaukee, Wis., March 22, 1909.

Mrs. Mary Baker Eddy, Brookline, Mass.

Beloved Leader:—Just a line to thank you for the publication in the Manual of the new order of service for the Sunday School. It was needed, and now you have supplied the need, as you do all our needs, in the right time. We observed the order, as thus given, on Sunday the 21st for the first time, and it was also the first time that our Sunday School met in our new church home.

We are very grateful for our new church, but even now it is not large enough, as many have been turned away from our services because of lack of room. Our Cause is certainly blessed by our demonstration. For this, and more good than we can tell, we owe you unbounded gratitude.

Respectfully and devotedly your humble follower,

IMOGENE WEATHERBEE.

THE LECTURES.

KIRKWOOD, MO.

Prof. Hermann S. Hering lectured on Christian Science Sunday afternoon, Feb. 7, at Choral Hall, under the auspices of First Church of Christ, Scientist. The lecturer was introduced by F. H. Skeele, clerk of the church, who said in part,—

We hope that each of you may share in the fulness of the joy, health, and happiness which is the heritage of those who live Christian Science in accord with the teaching of the Master. Thirty years ago the first Christian Science church was organized. Its purpose, as stated by its Founder, was "to commemorate the word and works of our Master, which should reinstate primitive Christianity and its lost element of healing" (Manual, p. 17). That this purpose is being fulfilled is attested by thousands, who have been healed from sin, sickness, and sorrow through Christ, through the truth which Jesus taught and demonstrated. We read in the Bible that "Jacob awaked out of his sleep, and he said, Surely the Lord is in this place; and I knew it not." Through Christian Science the world is awakening from its dream of a far-off, impracticable, unknowable God, to know Him aright as divine Love, an ever-present help in every need.—*Correspondence.*

CHICAGO, ILL.

Christian Science and what it teaches was explained yesterday afternoon [Feb. 28] at Orchestra Hall by Judge Septimus J. Hanna. There were fully twenty-five hundred people present and hundreds were turned away. The meeting was in charge of the nine Christian Science churches of Chicago. George Shaw Cook introduced Judge Fred L. Fake, Jr., of the municipal court, as the presiding officer. Judge Fake commented on the size of the audience by saying that twenty-five years ago the streets of Chicago could have been raked without securing more than a few hundred people who were willing to listen to a Christian Science lecture.—*Chicago Record-Herald.*

The following evening the lecture was repeated. The introductory remarks by John K. Allen, publisher of *Domestic Engineering*, were as follows:—

In all ages the most serious thoughts of the most serious men have been directed upward and outward, in an endeavor to solve the mysteries of the universe, including man, who is to himself its most interesting object. His origin, his order, his purpose, have in all times engaged the study of the thoughtful, whose supreme effort has been to find a reasonable working hypothesis which would explain the great First Cause and man and their relations to each other. Many such hypotheses have been formulated and many creeds and systems of religious thinking have been founded upon them. To the degree which these hypotheses have approached truth have they been able to bless and aid mankind. It is believed that a clear, complete knowledge and understanding of the whole truth about God and man will, as Paul the scholarly follower of Jesus said, set men forever free from the law of sin and death. The long procession of seekers after truth, in which we of this audience form a part, attests the deep interest mankind has always had in this quest. Some of us here tonight have the conviction, and many of us have the hope, that Christian Science presents a fuller understanding of God and His children than we have heretofore known. Because of this we shall gladly listen to an authorized statement of the faith and works of Christian Science, delivered by Judge Hanna.—*Correspondence.*

LINCOLN, NEB.

Frank H. Leonard of Brooklyn, N. Y., lectured last night [Feb. 21] at the Oliver on "Demonstrable Religion." R. L. Metcalfe [editor of the *Commoner*] introduced the speaker with the following remarks:—

Many people who do not readily grasp the meaning of Browning love to linger over the sublime optimism of his lines,—

> God's in His heaven;
> All's right with the world.

And for nearly two thousand years little children have been taught to lisp the words of the Saviour of men: "Come unto me, all ye that labor and are heavy laden, and I will give you rest." Christian Science, as I understand it, is the optimistic dream of Browning come true; it is the living, loving promise of the sweetest singer of all the ages applied to the every-day life of men. If men and women who through actual experience have learned that the poverty and the grief, the pain and the tears with which the world struggles may be conquered through the application of divine law, undertake to lead us into the light that has been shed into their own lives, may we not give patient attention to their story of love and of life, feeling within our heart of hearts, "How beautiful upon the mountains are the feet of him that bringeth good tidings."

Nebraska State Journal.

GRAND RAPIDS, MICH.

The Christian Science lecture delivered by Prof. Hermann S. Hering at Powers' Theater, Feb. 16, was attentively listened to by a large and representative audience. The lecturer was introduced by H. Bruce Moore, who said in part,—

Throughout all the ages, from every corner of the earth, there comes the cry of humanity for more light, that unsatisfied appeal for truth seen in the pressing on of earth's vast army down the beaten paths of science, art, and religion. Late in the nineteenth century there has been heard in this throng the voice of one who has said, "Come out of matter and into Spirit, for the solution of the problems of life." Those who have listened to and investigated this way are more than satisfied with the fruits of their search. Christian Science stands at the door of the unbiased and unprejudiced thought for a hearing.—*Correspondence.*

LECTURES AT OTHER PLACES.

Wausau, Wis.—Bliss Knapp, Feb. 11.
Burlington, Ia.—Francis J. Fluno, M.D., Feb. 14.
Lowell, Mass.—Frank H. Leonard, Feb. 14.
Baltimore, Md.—Mrs. Sue Harper Mims, Feb. 14.
Lockport, N. Y. (Second Church).—Rev. Arthur R. Vosburgh, Feb. 14.
Alliance, Neb.—Judge Septimus J. Hanna, Feb. 15.
Evanston, Ill.—Prof. Hermann S. Hering, Feb. 15.
Cornell University, Ithaca, N. Y.—Bliss Knapp, Feb. 15.
Stroud, Okla.—Hon. Clarence A. Buskirk, Feb. 16.
Weeping Water, Neb.—Francis J. Fluno, M.D., Feb. 18.
Shawnee, Okla.—Hon. Clarence A. Buskirk, Feb. 21.
Danville, Ill.—Francis J. Fluno, M.D., Feb. 21.
Chester, Pa.—Prof. Hermann S. Hering, Feb. 21.
Newark, N. Y. (Society).—Rev. William P. McKenzie, Feb. 21.

CORRECTION.

The newly-elected First Reader, John H. Coulter, instead of the retiring Reader, John S. Coonley, as stated in the *Sentinel* of March 20, introduced the lecturer at Fifth Church, Chicago, Jan. 28–30.

TESTIMONIES OF HEALING.

In 1895 I attended an informal gathering of Christian Scientists and heard a lady give her experience, and also answer some questions which were asked her. I had no preconceived notions of Christian Science, for I had never heard of it until that day, but I was impressed only with what seemed to me to be the unreasonableness of the teachings. From that time on I was ready to criticize and condemn, conceitedly imagining that I knew what Christian Science taught.

Ten years later a dear friend, who had been given by the physicians only a few hours to live, was most marvelously healed in Christian Science, and her experience roused my curiosity. Being of an investigating turn of mind, I resolved to find out what had wrought the change. To my question she only answered, "Christian Science," but I responded, "That doesn't mean anything. I want to know what did it." Handing me a copy of the text-book she said, "They say it is all in that book; take it home and see if you can find it." I took the book home and immediately commenced to read it, with the aid of a Bible and a dictionary. It was a revelation to me, and I could not leave it. I lived alone and studied almost day and night. At the time I was wearing an elastic stocking from hip to toes, and had been told by my physician that the conditions were very serious, that no human power could prevent a rupture of the veins, and that there was nothing known to *materia medica* which would heal them. On removing the pressure of the stocking at night, sharp pains kept me restless and fearful. I had no thought of Christian Science doing anything for me physically, for I did not know that one could be healed by reading Science and Health, but one morning I awoke to realize that the entire night had been spent in peaceful sleep. I threw off the coverings expecting to find the veins broken, but my astonishment can be imagined at finding the limb healed and as normal as that of a child.

Since that experience I have devoted most of my time to the study of Christian Science, and am very grateful to the Giver of "every good gift" for perfect health, and for some knowledge of how to help others. My gratitude also goes out to Mrs. Eddy, for I realize that but for her marvelous perception of the spiritual import of the Scriptures, and her unfailing determination to teach it by pen, precept, and example, thousands would still be in darkness who now behold the light. As we learn from Science and Health to separate, in our thought, the mortal from the immortal, and to know that God's works are without beginning or end, we gain a clearer sense of the Christianly scientific teaching. Truth is eternal, therefore that only is true which endures through all eternity. The consciousness of evil being transient, it logically follows that it is not true consciousness, and that the only true consciousness is a consciousness of the good, the eternal. The true man, being now a child of God,—a reflection of the true consciousness, or Mind,—cannot reflect anything not found in God, and the seeming consciousness of evil is but a counterfeit that must be destroyed—put out of circulation—to give place to the genuine, the real. This has been a most helpful thought to me and I hope it may help others.

MRS. FRANCES ELLINGHAM, Morrison, Ill.

I want to add my testimony to that of the thousands of others who have been benefited physically, mentally, and spiritually by Christian Science. I seemed to be a mental, moral, and physical wreck when I heard of the uplifting changes effected by the influence of Mrs. Eddy's teachings. Strong drink had destroyed my moral capacity to think rightly; I had lost my equipoise. I had become restless, dissatisfied with everything, and was unable to resist the temptation to use stimulants and drugs. My nervous system had become utterly deranged, and mentally I had neither capacity to think nor desire to work. At last my friends sent me to a hospital, and eventually I was placed in a sanitarium.

Some one told me of the Christian Science text-book, "Science and Health with Key to the Scriptures," and I began to read it. I had read but a few pages when a wonderful change came over me. I can hardly tell how, but it seemed as if some tremendous force for good was working within me. The change came almost instantly; I saw things in a new light. After six treatments from a Christian Science practitioner my mentality adjusted itself to normal conditions, and I told my wife that I was a well man. My appetite for strong drink ceased, and I became physically strong again. I gained strength of character, and succeeded in securing a position. Previous to this I had been unable to keep employed because of my habits, but I am now happy to say that I have not lost a single day since my conversion. I have lost all desire for drink and drugs, and my health is of the best. I am able to live in a better way and to keep my family in comfort. I attribute all of this to the wonderful power of Almighty God as demonstrated by Christ Jesus, and revealed in this age by Christian Science.

The true concept of man's relation to God has been my salvation. I have learned that God is good, and that the troubles of mankind are due to an improper conception of the creator and His attitude to the needs of His children. In Christian Science we find that as children of God we have nothing to fear; that God does not afflict the world with trouble, and that as we think only of God as good, evil disappears. I cannot close without expressing my heartfelt gratitude to Mrs. Eddy, to whom God gave this great revelation of Truth.

LEWIS T. WHITEFORD, Baltimore, Md.

In September of 1907 I had a severe attack of nervous illness. My family doctor told me he could do nothing for me: that I must have patience, and I would gradually come out of it. In about two weeks' time I was able to be out of bed, but this did not mean that I was better. I was afflicted with extreme depression, and realized that I must do everything in my power to fight it off; I also worried about money matters, and in fact everything about which it was possible to worry. My friends realized something of my condition and did everything they could to help me, but all to no purpose. I lost flesh steadily, and when I would meet people who had not seen me for some time they would exclaim, "What in the world have you been doing to yourself!"

I would like to say that this state of mind was entirely contrary to anything I had previously experienced, as my natural disposition had been to look on the bright side of things. For about three months I had been getting only two or three hours of restless sleep in a night. I was tempted many times to take drugs for this trouble, but then I would have the fear that I might become addicted to the habit, and as I had seen some of the awful results of this in a friend, I abstained, because I realized it would only mean more suffering. The following February I visited an osteopath. I took this treatment for about six weeks, with the result that at first I did sleep a little better and then I seemed to be getting worse all the time.

About that time I went to visit a friend, and she told me of some one who, as she expressed it, thought he had been cured by Christian Science, and she urged me to try it. I thought the matter over and decided that it certainly would not do me any harm to go and see about it. At that time the only knowledge I had of Christian Science

Digitized by Google

was from reading an article now and then in the newspapers, and this would hardly encourage one to take it up; but I obtained the address of a practitioner and went to call on her. She tried to show me the light and gave me the text-book, Science and Health, to read. I read the book faithfully, but did not then understand it, and seemed to be growing worse. A few days after my visit the practitioner sent me a marked copy of the *Sentinel*. The testimony was that of a man whose experience was similar to my own, and it gave me courage to go again and ask her to try to do something for me. I had not asked her to do this on my previous visit, as at that time I was only looking for a little explanation of the Science, and thinking that perhaps I might become interested in it. I went to her when it seemed to me there was no hope left, but in just four weeks from that time I was feeling better than I had felt in years, and would not know that I ever had such a thing as nerves.

It seems that I cannot be too thankful for Christian Science, and although I do not yet understand it, I am trying to do so, and hope that my experience will be a help to some one who is suffering in the same way that I was before Christian Science came to my aid.

MRS. MARY LA FORGE BOHL, Waterbury, Conn.

It is with deep gratitude to God, and to Mrs. Eddy for Christian Science, that I send this testimony. For over eight years I was a sufferer from nervousness, heart and stomach troubles, fever, etc.; in fact, I was a physical wreck. During all this time I was under the care of six different medical doctors, had two magnetic healers, and also tried electrical treatment, but got little or no relief. A cousin of mine who had been healed through Christian Science wanted me to try it, so I wrote to a practitioner and took treatment for about two weeks. By keeping up the study of Christian Science I was healed, and since my healing many physical ailments have been met and overcome by Truth.

MRS. KATIE EBERHARDT, Murphysboro, Ill.

I wish to acknowledge the help I have always received from Christian Science. I have called for help at different times and for different members of the family, and we have always felt the peace and reassurance of Love's presence and power. One time in particular, when I went to a practitioner in the night, seemingly filled with fear and trembling, I was instantly relieved. The loving hand-clasp, the quiet and wisdom which always accompany the manifestation of divine Love, did the work, and I returned home in perfect harmony. The past winter my two-year-old babe was treated for a very severe attack of bowel trouble. Although much fear was expressed, the work was fully accomplished in two treatments, for which I feel very grateful. I indeed rejoice at the work being done through the earnest study of our text-book, "Science and Health with Key to the Scriptures."

L. M. PRETTYMAN, Fort Smith, Ark.

I feel that it is a great privilege to send my testimony to the *Sentinel*, which for so many years has been of such great benefit to me. When I first went to a Christian Science practitioner for help I was a wreck, mentally and physically. I was suffering from a severe organic trouble, but through loving and patient work it was overcome and I felt a greater sense of freedom than I had ever known. Through the study of Science and Health a severe throat trouble from which I had suffered since childhood, many times having had my throat burned with acids to remove growths, only to have them appear again and again, and a head and spinal trouble, the result of an accident in childhood and which had caused me intense suffering—all of these were entirely overcome many years ago and have never returned. Mental depression and intense fear were also met and conquered, as I realized that every loving thought and deed helped me to know that Love "casteth out fear."

My gratitude to God, and to our beloved Leader, grows daily, and for our messengers of light, the *Sentinel* and *Journal*, I know I can best show my gratitude by a life of consecration to God and obedience to the teachings of Science and Health.

MRS. SUSIE F. MORRISON, Belvidere, Ill.

I cannot find words adequate to express my gratitude for Christian Science. Neither could I enumerate the blessings which Truth has brought to my home. For six years I have been interested in Christian Science, but only in the last three have I been sufficiently interested to attempt to demonstrate the truth for myself. While the physical healing has been truly marvelous, it has been small compared to the spiritual gain. The knowledge that divine Love will smooth all the rough places that seem to obstruct our path is a treasure in itself. My little girl of two, declaring that God takes care of her, shows how quickly the infant thought grasps this wonderful truth, and I find many opportunities to use it in training my two children.

Thank God for this religion which helps us every day, and Mrs. Eddy for her life of sacrifice to aid us in loving our neighbor as ourselves. I am deeply grateful for having been taught how to solve my own problems.

MRS. ORO M. BRAUN, Galena, Kan.

Some time ago my nephew called me on the telephone, and said that he had been ill since the first of the year and had been confined to the house for three months. He had been a sufferer for the past four years from stone in the kidney. He had had three specialists, and each had decided that the only thing for him was an operation. He then told me he had tried everything excepting Christian Science, and asked when I was coming to see him. I replied that I would go the following day. I went to see my nephew as I had promised, and brought to his notice some strong points in Christian Science. I told him I had brought a copy of our text-book, Science and Health, and that if he would like to read it I would leave it. I said, "Many have been healed by reading this book, but you must bear in mind it is not the reading alone that does the work. Here you will find a Principle and a rule; if you use your intelligence and apply the rule, you will prove the Principle and make your demonstration." When I was going away he asked me to leave the book and said he would read it.

Four or five days after this there came a call on the telephone, and again it was my nephew. He said, "What do you think? I have been healed of my trouble, and I give the credit to Christian Science. I read the book conscientiously and did just as you advised. I stopped taking medicine from the time you came that day. It was a struggle, but I passed the stone, and that is all I have to say." In two or three days he came to see me, returned the book, and expressed his gratitude for my quick response to his call for help. My son saw him lately, and he said he had never felt better in all his life and had gained twenty pounds in less than a month.

I would like to add that I was healed after many years of suffering. I am deeply grateful for what Christian Science has done for me; and grateful to have been the messenger to carry the healing truth to my relative.

MRS. HARRIET E. H. GORDON, New York, N. Y.

Digitized by Google

Thinking that my experience may encourage others, and with a desire to express gratitude for benefits received, I wish to add my testimony to the many that have appeared in our periodicals. I did not take up the study of Christian Science for physical healing, but from curiosity. However, after I had studied it for about six months, I found that I could use my eyes for any purpose that I wished, without glasses, although I had been obliged to wear them for eight years. A chronic complaint, with which I had been troubled for thirty years, had disappeared, and during a period of six years there has been no return of either trouble. During this time various other troubles have been overcome through the application of Christian Science.

The healing of the above-mentioned complaints came about through the study of Mrs. Eddy's book, "Science and Health with Key to the Scriptures," in connection with the Bible.—MRS. MARY M. SMITH, Astoria, Ore.

It is about twelve years ago since my child was healed in Christian Science of severe bowel trouble. She was so ill that she could not keep anything on her stomach, and she finally became unconscious. The neighbors all said she could not live over night, and I really thought so myself. We had done all we could for her, and then my brother, who is a Christian Scientist, came in, and asked me to let him take the baby. I gave her to him, and he went out in the open air with her and was gone about a half hour. When he came back we had a well baby! She looked as bright and well as she ever did. I knew that no doctor could ever cure her, but through God's power as revealed in Christian Science she is here today. I am thankful to God for His goodness, and for Christian Science. I also had two children ill with a terrible disease, but they were cured by Christian Science and none of the rest of us ever took the disease.

MRS. L. A. PARKER, Seiling, Okla.

I wish to testify to my healing of blood-poisoning, also of pleurisy, through Christian Science. The first trouble made its appearance on the back of my neck, and gradually got worse, until I was obliged to take to my bed. A serious condition rapidly manifested itself, and my head became very much discolored and was swollen to a great extent. In addition to this I suffered great pain from a large carbuncle on my body, and also had a very severe attack of lung trouble. I was made to understand that the condition was serious, and was told that something had to be done. I was asked if I would prefer a doctor or Christian Science. I chose the latter, and am very thankful that I did.

I received absent treatment for several days, but did not seem to get any better, in fact the change seemed to be for the worse, as part of the time I was delirious. On Sunday, five days after I took to my bed, the practitioner came out to see me, and gave me a treatment. In less than one hour after the practitioner had gone there was a discharge from the boils, and after this had taken place I suddenly became aware of the fact that I was able to rest and to breathe easily. On the fourth day after these happenings I was downstairs, and on the following day I went into the city on an electric car. From the time I took to my bed, until the time I went into the city again, was ten days. After my recovery the back of my head became entirely bald. I took treatments for this also, and in a short time I had a heavier and thicker growth of hair, and I am in far better health than ever before.

I cannot find words to express my gratitude for what Christian Science has done for me, not only in the healings mentioned in this testimony, but for the innumerable benefits that I have received through obedience to its teachings. I have written this in the hope that it will lead some one to share the joys and benefits that I have received in Christian Science.—ERNEST J. BLOUNT, Duluth, Minn.

In October, 1906, I was induced to accompany a friend to a Wednesday evening meeting, which was my first hearing of the truth taught in our text-book, Science and Health. I listened intently to the reading, as it was so different from anything I had ever heard before. On Friday I procured a copy of the text-book from the Reading Room. I went to the service the following Sunday morning, and from that service I returned home healed of deafness in one ear, caused by a fever, twenty years before. I also noted an improvement in my sight, which has become normal since I began to study Christian Science. By the reading of Science and Health I have been healed of several chronic diseases. Five of these ailments dated back over twenty years.

Our young daughter has been lifted from extreme delicacy and chronic bronchial trouble to perfect health, by attending Sunday School and by holding the right thought of God's power to heal. I fully understand, by the teaching of Science and Health, and the Lesson-Sermons, that we must live the truth and have the Christ-spirit—demonstrate the truth of being, which has been to me "the resurrection and the life." Only through the clear reflected thought of Love divine, truth and harmony, was I healed and led to seek true Christian Science, as it had never appealed to me before. I am daily trying to live, and to show by health and loving actions, my gratitude to God, and to His messenger, Mrs. Eddy, for the true gospel.

MRS. LEAF MALCOLM, Great Falls, Mont.

In corroboration of the above, and with a feeling of deep gratitude, I wish to add my testimony, as it may possibly benefit some of those who are as skeptical as I was of the healing power of Christian Science. The ailment of which I was healed was a severe type of rheumatic trouble and was thought to be hereditary. I had been afflicted for thirty years, and one treatment completely healed me. I am very grateful for Christian Science.

FRANK H. MALCOLM, Great Falls, Mont.

For some time I have wished to express my joy and gratitude for the help Christian Science has brought me. Knowing in my heart that I did not possess the "something" which every professing Christian should possess, I commenced to search, and to read everything I could find that promised to throw any light upon my difficulty. I was finally led to Christian Science, and although my prejudice was great and my progress slow, when the light did dawn and revealed to me the meaning of the Holy Ghost as the divine understanding, I experienced as great relief as any physical healing could have brought. With this truth constantly unfolding, I am the recipient of many blessings, both physical and spiritual, for which I am most thankful.

My prejudice has changed to love and admiration for Mrs. Eddy, our revered Leader, and a desire to obey the divine Principle that she has so clearly set before us.

MRS. MARY B. COFFIN, Minneapolis, Minn.

I would like to tell of the many blessings which myself and family have received through the understanding of that wonderful old yet new religion, Christian Science. We have been safely brought through serious throat trouble, also the supposed effects of poison-oak, heart trouble, etc. We have always found some kind friend who was able

Digitized by Google

to give us help, and to make things clear so that we could help ourselves. I had worn glasses for twenty years, but I am glad to say that I do not need them now. I also had other troubles that made me almost helpless at times. I will say right here that if the healing is not as quick as we think it ought to be, sometimes, the delay seems to be just what we need, as we are then led to study and try to help ourselves. I am thankful for the patient work of those who assist us to understand Christian Science.

MRS. E. A. WINN, Santa Ana, Cal.

I did not take up the study of Christian Science for the physical healing, but was invited to meet with a little band of students who gathered each Sunday morning at the home of one of their number to read the Lesson-Sermon, there being no church organization here at that time. From the first I was touched by the truth of this teaching. I became eager to know more of God and of man's relation to Him. It was not long before I had occasion to test the truth of God's power to heal, and my faith to trust to Christian Science treatment. A carbuncle came on my finger. I worked in Science a few days, the best I knew (which was comparatively nothing). Then my sister said to me, "There is a scientific way of healing, and there is no need for you to suffer." So I asked a practitioner for treatment and was relieved at once. No material remedies were used, there was no lancing, and no discharge from the carbuncle. It just seemed to be absorbed, to go back to its native nothingness. All soreness was overcome in one week's treatment.

I am very grateful for the spiritual uplifting which I have received, as well as for the physical healing. I am thankful to Mrs. Eddy for this revelation of Truth, and for giving us the spiritual interpretation of the Bible. Words cannot express my gratitude for all the help I have received in gaining what knowledge I have of Christian Science.—FLORENCE P. DODGE, Wagoner, Okla.

I am glad to give my testimony to what Christian Science has brought into my life. In the past four months, through its treatment, I have been healed of almost constant backache and headache, which so affected my eyes and nerves that I was unfitted for anything. As doctors and medicine had failed to help me, there seemed nothing to hope for until, through Science treatment, I came into the realization of what God's perfect child should be. I feel that this understanding of divine Love has made me free and happy.—JESSICA BURDICK, Santa Ana, Cal.

About a year and a half ago I injured my ankle severely. Shortly afterward I started for home, using a stick, and although I had less than a half mile to go, it took me a full hour to get there. I was treated by a Christian Science practitioner, and was able to go to work Monday morning, the accident having occurred on Saturday. I know that if I had not relied upon the power of Truth, I probably would have been laid up for a week or more.

JOHN L. MCNALLY, Hopkins, Minn.

I wish to tell of the blessings which Christian Science has brought into my life. It was indeed a priceless gift of divine Love to me. When material means had failed to heal or to make me happy, I prayed fervently to God to restore me to health, and promised to devote my life to Him. In answer He did more.—He gave me happiness for sorrow, health for sickness; gave me a happy home, where love reigns. My husband was restored from the results of a serious accident, the injuries being overcome without calling a surgeon, and this brought him into Christian Science, which we study together. For all these blessings I thank God. My heart goes out in love to Mrs. Eddy, our Leader and guide, and I am especially grateful for the valuable addition to Science and Health, page 442, line 30.

MRS. M. MCNAUGHTEN, Peoria, Ill.

About three years ago I had such a severe attack of rheumatic trouble that I could hardly help myself in any way. I was treated by two good doctors, one for seven months and the other for six months, but at the end of that time I was worse than when I commenced with them, and could hardly hobble across the room with two canes. I then gave up the struggle, feeling that my case was hopeless, as I am seventy-four years old, but I was finally persuaded to try Christian Science. I was benefited from the start, and now I have walked five miles with only one cane and could walk even farther. Other troubles are disappearing; I think now that I shall soon be well of all of them. I also had a small growth on one of my eyes which the doctors had told me was malignant, but it is all gone now. For all of these healings I have to thank Christian Science, and I hope that this will be the means of causing others who need help in any way to try this truth.

WILLIAM P. MCCORMACK, Eureka, Cal.

[Written for the *Sentinel*.]

SERVICE.

MARY I. MESECHRE.

How may I best attain the high ideal
Of Christly service, of true helpfulness,
That daily, hourly, as the way I follow,
I may each needy brother cheer and bless?
Not mine to choose the service I may render
To those who need,
But mine to watch, that never word untender
Shall mar a helpful deed.

Let me remember that my daily living
Should shadow forth the life of him whose days
Were spent in humble way, as one that serveth,
Lest I my time should darken by self-praise;
Let me remember that the truest pleasure
Gives never pain:
By service unto others let me measure
The heights that I may gain.

Let me lean low to aid a struggling pilgrim
Whose heavy burden seems to hold him back;
Let me not falter, though—my help unheeding—
He thrust upon some weaker one his pack.
Give me to know, past danger of forgetting,
That Love's own might
Will lift each one from sins so close-besetting
To freedom's glorious height.

Let me remember I may serve in silence,
Should act of mine be scorned and speech denied;
Give me the knowledge that by steadfast loving
I e'en may aid the scoffer at my side;
Give me to see and know, with faith unswerving,
Each burdened heart
Is rendered lighter through my faithful serving,
And fitter for its part.

Let me go forth each day, when dawns the morning,
With ever loving heart and ready hand;
With willing feet to bear Love's joyous tidings;
With patience, should my service be to stand.
Not mine to question why the clouds be drifting
Beyond my ken;
Mine but to serve with him whose true uplifting
Will draw to him all men.

FROM OUR EXCHANGES.

[*Christian World*, London.]

The monopolists, the distillers, the selfish interests, the social vampires in general, have every reason to fear the new attitude of the churches. Religion is turning its search-light on the doings of these people, and the results will not be pleasant. These doings are being openly discussed; things are even being said about them in pulpits. Worst of all, religious men are not deterred from speaking when these forces of unrighteousness take shelter behind political names and combinations. The new feature is, we say, a portent. It means the rise to power of a force that daily gathers strength, and which in the end will master everything that opposes it. We are at present watching only the beginnings of its work. But a generation will not have passed before it will have made a new world for our children to live in. What is this new force? We call it the social conscience.

[*British Congregationalist.*]

The required thing is, not that we should be able to convince others, but that we should ourselves be really convinced—that there should be, for every one, something to which he can point and say, "That is the thing which settles me into restfulness of faith, the thing which confirms me in my reliance upon the religion and the redemption of Jesus Christ, the thing which keeps me peaceful however the contradicting voices may strive and cry. My faith is not based on convention, it is not the product of a chance enthusiasm which has somehow found its way into my heart, but a definite and abiding possession which I can truly call my own."

[*Examiner.*]

One of the sad mistakes of God's people in past times has been that they have ranged themselves under the banners of human leaders in theology instead of owning allegiance to Jesus Christ alone. All that Paul dared require of his converts was that they should follow him *as he followed Christ*. And with what vehemence he condemned the factional spirit of those who cried, "I am of Paul!" "I am of Apollos!" So, thank God, we are under no compulsion to follow Augustine or Calvin or Arminius, or any other teacher, save as their doctrines harmonize with the teachings and spirit of their Lord and ours.

[*Christian Work and Evangelist.*]

The call of Christ today is for the whole energy of our souls, and the task of building with him the beautiful city of God in the earth will bring into play every finest faculty of our being. It is a call to leadership and brotherhood, to battle against all injustices, to the establishment of justice, to reform, to redemptive service, to blazing new paths for God's children, to thinking great thoughts and plans, to creating new worlds with Christ. It offers scope for all the best and greatest in us and puts sky over our little lives.

[*Christian Register.*]

Jesus preached the bread of life and the kingdom of God, but he did not tell us of what the one consists or where the other is to be found. These are his secrets revealed to those who hunger after righteousness and whose souls are pure and innocent like unto a little child. He spoke to this deep human need, this unquenchable hunger and thirst that make men human.

[*Universalist Leader.*]

Spiritual life—communion with God, love of Christ, love of man, conquest of selfishness through those loves, and the devotion of self to the gospel ideals—is the great need everywhere.

SPECIAL ANNOUNCEMENTS.

FROM THE PUBLISHER OF MRS. EDDY'S WORKS.

THE CHRISTIAN SCIENCE TEXT-BOOK, "SCIENCE AND HEALTH WITH KEY TO THE SCRIPTURES."—This work contains many important changes and additions by the author, and also contains a photogravure portrait of Mrs. Eddy, together with a facsimile of her signature.

SOME OF MRS. EDDY'S WRITINGS IN NEW BINDINGS.—One volume containing Unity of Good, Rudimental Divine Science, No and Yes, Retrospection and Introspection; a second volume containing Christian Healing, The People's Idea of God, Pulpit and Press, Christian Science *versus* Pantheism, and the Messages of 1900, 1901, and 1902. These volumes are printed from new plates and are uniform in size with the pocket edition of Science and Health. Bound in morocco, limp, round corners, gilt edges, heavy Oxford India Bible paper. The prices of these books prepaid are as follows: single copy, $3.50: six or more copies of either volume to one address, each $3.25.

THE CHURCH MANUAL.—Containing all the By-laws of The Mother Church, The First Church of Christ, Scientist, in Boston, Mass. Each new edition of the Manual will have special notice in the *Sentinel*. Price, single copy, prepaid, $1; six copies to one address, $5; twelve copies to one address, $9.

Attention is called to the Library Edition of Mrs. Eddy's works, description and prices of which will be found on the outside cover page of the *Sentinel*.

Address all orders for books named above to ALLISON V. STEWART, Falmouth and St. Paul Streets, Boston, Mass.

FROM THE CLERK OF THE MOTHER CHURCH.

CHURCH TENETS.—The tenets of The First Church of Christ, Scientist,—The Mother Church,—printed on folded sheet for the use of Branch Churches of Christ, Scientist, with space for the names of churches and their by-laws, can be had at seventy-five cents per hundred.

Not less than one hundred are sold. Postage stamps are not taken for payment.

MEMBERSHIP.—Correspondence relating to membership with The Mother Church, and requests for blank applications for membership, should be addressed to the Clerk.

All correspondence and orders relative to the above should be sent to WILLIAM B. JOHNSON, Clerk, The First Church of Christ, Scientist, Falmouth, Norway, and St. Paul Streets, Boston, Mass.

FROM THE CHURCH TREASURER.

PER CAPITA TAXES.—Per Capita Taxes and Contributions to The Mother Church, The First Church of Christ, Scientist, in Boston, Mass., should be sent to the Treasurer. Please do not send currency.

Remittances for the above should be sent to STEPHEN A. CHASE, Treasurer, Box 56, Fall River, Mass.

FROM THE SOCIETY.

Attention is called to the announcement over our Leader's signature, which appeared in the *Sentinel* of Jan. 9, to the effect that Christian Scientists in the field who send four subscriptions to the *Monitor* for one year, will receive their own paper gratuitously.

Attention is called to the new Pamphlets, Reprints, and Music found listed in the advertising columns on the opposite page.

The Publishing Society requests that Reading Rooms and individuals when ordering *Quarterlies* will specify whether the large or small size is desired. This is necessary in order to avoid wrong shipments and consequent delays.

THE CHRISTIAN SCIENCE JOURNAL

FOUNDED APRIL, 1883, BY THE AUTHOR OF "SCIENCE AND HEALTH WITH KEY TO THE SCRIPTURES," MARY BAKER EDDY, DISCOVERER AND FOUNDER OF CHRISTIAN SCIENCE

This monthly Magazine is the official organ of The First Church of Christ, Scientist, in Boston, Massachusetts, and correctly represents the Christian Science movement. It contains interesting discussions of the teaching and the practice of Christian Science, and in addition to dissertations, lectures, and contributed articles, publishes always a number of reports from cases of spiritual and physical healing, which practically illustrate the redemptive work of Christian Science.

TERMS OF SUBSCRIPTION: Single copy, one year, $2.00. Quantities TO ONE ADDRESS: ten or more, each, $1.90; twenty-five or more, each, $1.80; fifty or more, each, $1.60. These rates apply in the United States, Canada, Mexico, and Cuba. In all other countries add forty cents for postage on each subscription. Six months' subscriptions received at half the above rates. No subscriptions received for less than six months.

TERMS OF SALE: Postpaid to any address: Per copy, twenty cents. Quantities TO ONE ADDRESS: ten copies, $1.70; twenty-five copies, $4.00; fifty copies, $7.00; in the United States, Canada, Mexico, or Cuba. To all other countries, per copy, twenty-five cents. Quantities TO ONE ADDRESS: ten copies, $2.10; twenty-five copies, $5.00; fifty copies, $9.00.

BOUND VOLUMES: Current year and two years previous, cloth, $2.50; half calf or half morocco, $3.00. On earlier volumes write for prices.

THE CHRISTIAN SCIENCE MONITOR

A daily newspaper of world-wide scope, particularly designed for those desiring a high-class publication in the home. It contains all the current news worth considering, all the departments of interest of a modern newspaper, illustrations of worthy features, and an unbiased editorial page which deals with the vital topics of the day. The MONITOR does not feature nor illustrate vice and crime.

SUBSCRIPTION PRICE: For the United States, Canada, Mexico, and Cuba, $5.00 a year, $3.00 for six months; all other countries, $8.00 a year, $4.50 for six months, postpaid. In the Greater Boston postal district the MONITOR will be delivered by carrier through the local news-dealer at the customary rate of 12 cents a week payable to the news-dealer. If delivered by mail $1.00 should be added to the annual subscription rate to cover extra postage.

The Christian Science Quarterly

Published January, April, July, and October

Contains the Lesson-Sermons which are read at the Sunday Services throughout the year in all the Christian Science churches. These Lessons, which present citations from the Bible and "Science and Health with Key to the Scriptures," are valuable for daily study.

TERMS OF SUBSCRIPTION: For one year, 50 cents; fifty copies or more to one address, 50 cents yearly for each copy. Foreign subscriptions, 60 cents. Yearly subscriptions only received.

TERMS OF SALE: One or more copies, postage paid, each, 15 cents; fifty copies or more to one address, each 12½ cents, postage paid.

Der Herold der Christian Science

Published Monthly.

A magazine printed in German, which publishes original and translated articles bearing upon Christian Science, and also testimonies of healing from Germany and America. It contains about thirty-eight pages of such reading matter, also the Lesson-Sermons which are read at the Sunday services in all the Christian Science churches, and is valuable as an authorized representative of the movement.

SUBSCRIPTION PRICE: For the United States, Canada, Mexico, and Cuba, 10 cents a copy, $1.00 a year in advance; all other countries, 12 cents a copy, $1.25 a year, postpaid.

Bound in morocco, limp, round corners, gilt edges, heavy Oxford India Bible paper. Price, prepaid, single copy, $3.50; six or more copies to one address, each, $3.25.

UNITY OF GOOD. It lays the axe at the root of error, elucidating and enforcing practical Christian Science, thus affording invaluable directions for all true Scientists. Library edition, 64 pages, cloth binding, marbled edges. Price, prepaid, single copy, 65 cents; $3.00 per half dozen; $5.50 per dozen. Leather covers (pocket). Price, prepaid, single copy, $1.00; $5.00 per half dozen; $9.00 per dozen.

RETROSPECTION AND INTROSPECTION. A biographical sketch of the author. The way she was led to the discovery of Christian Science; its growth and fundamental idea. Library edition, 95 pages, cloth binding, marbled edges. Price, prepaid, single copy, $1.06; $5.00 per half dozen; $9.00 per dozen.

PULPIT AND PRESS. A unique work of importance in the history and to the readers of Christian Science; containing Dedicatory Sermon delivered at The Mother Church, and scintillations from the press of that occasion. 132 pages, cloth binding. Price, prepaid, single copy, $1.06; $5.00 per half dozen; $9.00 per dozen.

RUDIMENTAL DIVINE SCIENCE. An interesting and valuable book, containing a brief and concise statement of Divine Science, *alias* Christian Science, in the form of questions and answers. 17 pages. Leatherette covers, gilt top. Price, prepaid, single copy, 37 cents; $3.00 per dozen. Library edition, cloth binding, marbled edges. Price, prepaid, single copy, 55 cents; $2.50 per half dozen; $4.50 per dozen.

NO AND YES. A brief statement of very important points in Christian Science. 46 pages. Pebbled cloth covers. Price, prepaid, single copy, 27 cents; $2.50 per dozen. Library edition, cloth binding, marbled edges. Price, prepaid, single copy, 60 cents; $3.00 per half dozen; $5.50 per dozen.

MESSAGES TO THE MOTHER CHURCH. By Mary Baker Eddy, including Christian Science *vs.* Pantheism, and the Messages of 1900, 1901, and 1902. In one volume. Library edition, 94 pages, cloth binding, marbled edges. Price, prepaid, single copy, $1.56; $7.50 per half dozen; $13.50 per dozen.

CHRISTIAN SCIENCE *versus* PANTHEISM. The Pastor Emeritus' Message delivered at the Communion Season in The Mother Church in Boston, June, 1898. A clear and strong refutation of the charge that Christian Scientists are pantheists. 15 pages. Price, prepaid, single copy, 26 cents; $2.50 per dozen.

MESSAGE TO THE MOTHER CHURCH. The annual message of Mary Baker Eddy to The Mother Church on Communion Sunday, June, 1900. Leatherette covers, deckled edges. 15 pages. Price, prepaid, single copy, 26 cents; $2.50 per dozen.

OUR LEADER'S MESSAGE. The annual message of Mary Baker Eddy to The Mother Church on Communion Sunday, June, 1901. Deckled edges. 35 pages. Price, prepaid, single copy, 50 cents; $4.50 per dozen.

COMMUNION MESSAGE. The annual message of Mary Baker Eddy to The Mother Church on Communion Sunday, June 15, 1902. Deckled edges. 20 pages. Price, prepaid, single copy, 50 cents; $4.50 per dozen.

TWO SERMONS. CHRISTIAN HEALING and PEOPLE'S IDEA OF GOD. In one volume. Library edition, cloth binding, marbled edges. 36 pages. Price, prepaid, single copy, 60 cents; $3.00 per half dozen; $5.50 per dozen.

CHRISTIAN HEALING. A sermon delivered in Boston. 19 pages. Paper covers. Price, prepaid, single copy, 21 cents; $2.00 per dozen.

PEOPLE'S IDEA OF GOD. A sermon delivered in Boston. 14 pages. Paper covers. Price, prepaid, single copy, 21 cents; $2.00 per dozen.

FEED MY SHEEP. Words by Mary Baker Eddy. Music by Lyman F. Brackett. Price, prepaid, single copy, 50 cents; $5.00 per dozen.

Direct all orders for above works, and make remittances payable to

ALLISON V. STEWART, FALMOUTH AND ST. PAUL STS., BOSTON, MASS.

All orders for periodicals, or literature other than the above works, should be sent with remittance directly to The Christian Science Publishing Society.

CHRISTIAN SCIENCE SENTINEL

(THE CHRISTIAN SCIENCE WEEKLY)

PUBLISHED EVERY SATURDAY BY

THE CHRISTIAN SCIENCE PUBLISHING SOCIETY

Falmouth and St. Paul Sts., Boston, Mass., U. S. A.

ARCHIBALD MCLELLAN, Editor.

JOHN B. WILLIS, ANNIE M. KNOTT,

Associate Editors.

SUBSCRIPTION PRICE

Single copy, one year, $2.00.

Ten copies or more to one address, one year, each copy, $1.90.

Twenty-five copies or more to one address, one year, each copy, $1.80.

Fifty copies or more to one address, one year, each copy, $1.50.

These rates apply in the United States, Canada, Mexico, and Cuba. In all other countries add 50 cents for postage on each subscription.

Six-months subscriptions received at half the above rates.

No subscription received for less than six months.

Subscriptions to the *Sentinel* will be entered to begin with the first of the month, and will include all issues for the month named as expiration date on the wrapper. The receipt of the periodical by the subscriber will be our acknowledgment of the subscription.

TERMS OF SALE

Five cents a copy, postpaid to any address in the United States, Canada, Mexico, and Cuba. In quantities to one address: twenty-five copies, $1.00; fifty copies, $1.80; one hundred copies, $3.00.

To all other countries, six cents a copy, postpaid to any address. In quantities to one address: twenty-five copies, $1.25; fifty copies, $2.30; one hundred copies, $4.00.

Bound Volumes: Current year and two years previous, cloth, $3.00; half calf or half morocco, $3.50. On earlier volumes write for prices.

Entered at the Boston, Mass., post-office as second-class mail matter.

ITEMS OF INTEREST.

National.

The Utah Fuel Company has pleaded guilty in the United States court to the fraudulent acquisition of 1,440 acres of coal land, paid a fine of $8,000, also $192,000 for the coal extracted, and relinquished the land. The land was acquired through "dummy" entrymen as agricultural land. The company was a subsidiary corporation of the Denver and Rio Grande Railroad. The land reverts to the public domain and the company loses the $14,400 fee originally paid as well as the further sums paid to the entrymen.

The first election for the recall of a mayor of an American city was held in Los Angeles last week, and resulted in the choice of the reform candidate. The election was robbed of a great deal of its interest through the resignation three weeks ago of the man against whom the recall was aimed. The recall election was the result of charges that the mayor had given approval to various forms of vice in the city.

During the 60th Congress 6,597 special pension acts were passed. Since 1865 there has been paid in pensions the sum of $3,654,653,365 and the cost of maintaining pension agencies and administration of the pension bureau has been $112,852,477. It is estimated that within ten years the pension roll will not carry over $75,000,000 or $80,000,000 unless additional legislation should be enacted.

A special train, which was given the right of way over all other trains, recently made the distance between New York and Englewood station, Chicago, in 15 hours 58 minutes. The run to Buffalo, 440 miles, was covered in 399 minutes; from Buffalo to Cleveland, 183 miles, in 168 minutes; from Toledo to Elkhart, Ind., 133 miles, in 120 minutes; the last 95 miles in 92 minutes.

President Taft has stated that he does not consider the appointment of judges to be a part of the patronage of United States senators, and that judicial appointments should be free from political influences. He considers himself competent to pass upon their fitness for the bench, and will do so.

A plan for reserving for the exclusive use of women the rear car of all rush-hour trains in the Hudson tunnel system connecting New York city, Hoboken, and Jersey City, was put into effect last week, and has been pronounced a success. The plan was tried at the request of the Women's Municipal League.

The first year of the Des Moines commission plan of municipal government was completed March 24, and the treasury showed a surplus of $20,000 on hand over and above expenditures. In the year previous under the old system there was a deficit of $180,000.

The official opening of the Virginian Railway, H. H. Rogers' new coal road, took place on April 3, when the first train-load of coal to be brought from Deepwater, W. Va., arrived at the terminal at Sewall's Point, near Norfolk.

Two million fifteen-cent postage stamps, to be held subject to requisitions of the Post Office Department for issue to postmasters, have been ordered printed.

International.

The French budget has reached the four billion francs mark with only a beginning made upon the extensive program of reforms, involving the expenditure of hundreds of millions, which is being urged upon Parliament by the advanced socialists. The income tax bill, the rates of which can be progressively increased, is the measure by which the socialists expect ultimately to take from the well-to-do classes the funds necessary to realize their reforms. The struggle of the opposing forces has called attention to an interesting controversy now being threshed out in the French and English papers as to the relative material well-being of the working classes in the two countries.

Servia has surrendered completely to the demands of Europe and the tension of six months over the Balkan situation has come to an end. The ministers at Belgrade of Great Britain, France, Russia, and Italy have verbally informed the Servian government of their recognition of the annexation of Bosnia and Herzegovina by Austria-Hungary. They will advise Servia to consider this question closed and issue a circular note to all the Powers acknowledging this annexation, and at the same time to assure Austria-Hungary of her peaceful intentions, revoking all claims to indemnifying concessions.

The Spanish Minister of the Interior has introduced a bill in the Chamber of Deputies calling for a complete modernization of the postal services of the kingdom, which have proved highly defective. The bill provides for new telegraph and telephone systems, which will take in four thousand towns; and reduced rates for their use and the creation of a savings bank and a parcels post. The total cost of the improvements will be $6,000,000.

The Chinese ministers of railways, war, finance, and colonies have decided that it is necessary to construct, without delay, a trans-Mongolian railroad from Kalgan to Urga. This decision is in response to a petition from the Mongolian princes, who offered to meet the cost of the road, which will form the principal link in the proposed line northwesterly from Pekin to join the Russian trans-Siberian line.

Chief Secretary for Ireland Birrell has reintroduced the Irish land bill in the House of Commons. The bill is in exactly the same form as when it was crowded out at the end of last session. In the course of his remarks the chief secretary said again that it would require an expenditure of $515,000,000 at least to satisfy the land hunger of the Irish, and of this total Parliament had still to provide $775,000,000.

The Council of Ministers of the Argentine Confederation has decided to devote $25,000,000 of the recent $50,000,000 loan to the purchase of materials for the national railways and additional construction purposes; $7,500,000 in public works and the colonization of territories, and $17,500,000 for the augmentation of the capital of the national bank.

The Cape-to-Cairo railway project is rapidly becoming realized. At the present moment it is possible to travel from Alexandria to Cape Town by rail or steamer except for a distance of about six hundred miles. The various African states now recognize that the only method of dealing with their development is by means of railway construction.

The agreement which has been in existence for five years among the nitrate producers in Chile came to an end last week, and it was decided not to renew it. It is expected that this action will result in an increased production and a decrease in the price of this product.

President Gomez has signed a contract giving the Cuba Railway Company a subsidy of $6,000 per kilometre for the construction of a branch line from the main line at Marti to Manzanillo by way of Bayamo. This will open up a great section of fertile country.

The volcanic district affected a few years ago by the eruption of Soufrière in the island of St. Vincent in the West Indies, has been rendered habitable once more by the construction of a water canal at a cost of $50,000.

The Prussian government has published a bill providing for $56,750,000 to be used in the construction of a secondary railway, double-tracking the present lines, and other railway improvements.

The former American minister to Venezuela has presented his credentials to President Gomez, and diplomatic relations are thus renewed.

The last of the American troops of the army of pacification left Cuba on March 31 without incident or demonstration from the Cubans.

Industrial and Commercial.

Germany faced the same great timber supply problem early in the nineteenth century that the United States faces today, and in solving it developed heavy producing and well administered forests which are models for the rest of the world. A study of the systems of forest management and wood utilization in the two countries offers many interesting comparisons. The United States takes two hundred and sixty cubic feet per capita annually from the forests; Germany uses but thirty-seven. American forests are now producing not more than twelve cubic feet per acre; German forests are producing forty-eight cubic feet per acre annually. Germany has reduced waste and consumption and increased production.

Since the first of the year thirty-four railroad enterprises have been organized or incorporated in the South and Southwest, ten in Texas, four in North Carolina, four in Missouri, three in Arkansas, three in Tennessee, two in Oklahoma, two in Louisiana, and one each in Alabama, Georgia, Kentucky, Maryland, Virginia, and West Virginia.

The protest against salacious and unclean dramatic performances of every type has assumed formidable and practical shape in the proposition brought before a recent meeting of the Theatrical Managers' Association at New York to help establish in this country an official dramatic censorship under state control.

The United States Cast Iron Pipe and Foundry Company of New York has been awarded the San Francisco contract for 45,000 tons of sewer and water pipe. This contract involves approximately $1,000,000.

CHRISTIAN SCIENCE SENTINEL

"WHAT I SAY UNTO YOU, I SAY UNTO ALL — WATCH" JESUS

WHAT WE DEMONSTRATE.

REV. ARTHUR R. VOSBURGH.

THE words "demonstrate" and "demonstration" hold a large place in the vocabulary of Christian Science. They indicate the process by which some unseen truth is, in its results, made evident to humanity. That which is demonstrated is always the unseen: some visible, tangible result is its demonstration.

There is frequently heard a use of these words which involves a confusion or even a reversal of their true meaning. For instance, we sometimes hear such statements as these: "I have demonstrated one hundred dollars for our Cause;" or, "We have demonstrated a lot, a building, an organ, for our church." Some individual has demonstrated a pleasing residence for a home. Not infrequently such an instance as this arises. Some young church or society finds it impossible, for a time, to bring forward any man who is eligible for the position of Reader. Finally some one is raised up who proves to be the one for the place. Then it has often been said that this church has demonstrated a man for a Reader.

All this is wrong—why? Because that which is demonstrated is not the result but the procuring cause. What the Christian Scientist is demonstrating in every one of the instances named above, and in every instance that might be named, is that divine Love has a sufficient supply for every need. Without any doubt all these things have come about in demonstration, but that which is demonstrated is the divine power which has wrought to produce these beneficent results. Then our statement is true if we say that we have demonstrated Love's guidance, Love's power, Love's supply, in any of these conditions. And our statement is utterly wrong if we say we have demonstrated the thing or the result, whatsoever it be, instead of the divine cause that has produced the result.

A study of the use of the word demonstrate will show that in every instance it is some rule, some proposition, some power, quality, or condition, that is spoken of as being demonstrated. A study of our text-book shows that it is the Principle and rule of divine Science which the Christian Scientist demonstrates, and the good that appears as the result of scientific work is all in demonstration of the proposition that "divine Love always has met and always will meet every human need" (Science and Health, p. 494). To demonstrate is defined as to show; to exhibit; to make manifest; that which is demonstrated in Science is some element or quality of divine Mind. In these elements and qualities of Life, Truth, Love, we find the source and supply of all possible good. In demonstrating these divine qualities and elements we gain the practical fruition of good, and in the interest of the clear, accurate thinking which alone is scientific and brings scientific results, there is need of the accurate, correct statement which indicates scientific accuracy of thought.

Those who know our Leader, her standard and her teaching along these lines, know how she enforces the truth that Science demands accurate thought and accurate statement; that inadequate or slovenly thought and careless statement will show in imperfect results; so that a true form of statement is not merely a matter of propriety, but has a vital connection and bearing in working out the problem of life.

RESURRECTION.

HAROLD F. HALL.

A STORY filled with precious meaning for the Christian Scientist is told in the 20th chapter of St. John, where Mary Magdalene goes, before the dawn of day, to visit the tomb of her crucified Lord. The darkness and cheerlessness of that early morning hour must have served but to emphasize her deep sorrow, accentuated on her arrival at the tomb by the discovery that the body of Jesus had been taken away. Even after Peter and John, who had hastened to the garden on hearing her startling announcement, had returned disheartened to their homes, the faithful Mary remained, and overcome in contemplation of the apparent hopelessness of the situation, she stands without the sepulcher weeping. Once more she stoops down to look into the empty tomb; but now her vision has cleared, and she sees the two angels, whose question, "Woman, why weepest thou?" brought forth that pathetic response, "Because they have taken away my Lord, and I know not where they have laid him." Then it was, as she turned to go away, that Jesus met her, though at first she knew him not, and it was in answer to his sympathetic inquiry as to why she was weeping that she, voicing the possible hope which sprang into being at the sight of this tangible presence, replied: "Sir, if thou have borne him hence, tell me where thou hast laid him." The Master, we are told, then called her by name. The outward form she had failed to recognize, but that one word, "Mary," uttered with all his wonted tenderness, filled her with the joy of recognition, and revealed to her once again him whose loss she had so lately mourned.

It is a story which can but appeal to all who read it, and it has a special significance for some who are perhaps just entering into the realization of the truths of Christian Science, and whose previous religious experience has been deep and sincere. To these the old forms of service and worship, in whatever church they had called their own, were very precious. With what reverence they regarded its ordinances, how their hearts were comforted by its assurances of divine love and pardon, in its interpretation of prayer and praise; and now that the teaching of Christian Science has come into their lives, it all seems so revolutionary, so new, that they scarce can recognize the truths of Christianity in their changed and resurrected forms, and it is with a sense of great loss that they cry with Mary, "They have taken away my Lord, and I know not where they have laid him." It is to those who have come to this point in their experience that the story offers special en-

Copyright, 1909, by Mary Baker Eddy.

Digitized by Google

couragement and comfort. At such a time as this, when tempted to look down into the sepulcher of former beliefs, it is well to remember that, although material sense sees not the Christ, yet the risen Christ stands near, and is calling each one by name with a message of hope for every sorrowing heart.

The day of Spirit is surely dawning, and as the morning light breaks and the clearer meanings of these eternal truths speak to each consciousness, we again shall recognize in this resurrection light all that we really longed for; the spiritual meaning of every true act of worship, so valued in the past, will be brought to us, thus to appear more beautiful than ever before, and we, too, in thankful recognition shall turn to our new and higher conception of the Christ with the joyful cry, "Rabboni; . . . Master." Thus, as we journey from sense to Soul, each earthly joy and sorrow, each mortal conception of life and love, will some day find its sepulcher, but the seemingly vacant place is already filled with the fulness of divine Love, and in its realization we shall be satisfied.

THE POWER OF GODLINESS.

DENNIS L. ROGERS.

THE article on "the report of the Lambeth Conference with respect to the 'Ministries of Healing,'" published in part in the *Sentinel* of Oct. 10, 1908, suggests this remarkable saying of St. Paul: "Having a form of godliness, but denying the power thereof." When this second epistle to Timothy was written, Paul was at the close of his earthly career: in prison, under torture, sentenced to death, he probably felt that these would be his last words.

For thirty years Paul had been a missionary of the gospel of the kingdom; he had suffered contempt, persecution, stoning, lashing, imprisonment, banishment, shipwreck, cold and hunger; had made three long missionary journeys, preaching, teaching, healing, and had established churches in more than sixty villages and towns in Europe and Asia. Although blinded at first by bigotry and ignorance of the truth, the scales had fallen from his eyes; he saw the light of Truth and experienced the power of the risen Christ. If ever a man was qualified, through personal experience and demonstrated knowledge of the truth, to speak with authority, it was St. Paul at this time. Timothy was his beloved pupil and assistant; the son of a believing Jewish mother and a Greek father, and acquainted with the Hebrew Scriptures from childhood. To him Paul addressed his last, most particular, and special instructions and admonitions, warning him especially against those errors which seemed to him most insidious and dangerous in these words, "This know also, that in the last days perilous times shall come. For men shall be lovers of their own selves, covetous, boasters, proud, blasphemers, disobedient to parents, unthankful, unholy, . . . having a form of godliness, but denying the power thereof: from such turn away."

St. Peter and St. Paul are the only New Testament writers who make use of this word "godliness," and it does not occur in the Old Testament. Paul seems to use it in his epistles to Timothy more than anywhere else, counseling him to "lead a quiet and peaceable life in all godliness;" and again he bids him, "Exercise thyself rather unto godliness," for "godliness is profitable unto all things; . . . godliness with contentment is great gain." In the Revised Version the word is used in Acts as the equivalent of the word "holiness:" "And when Peter saw it, he answered unto the people, Ye men of Israel, why marvel ye at this? or why look ye so earnestly on us, as though by our own power or holiness [godliness] we had made this man to walk?" In his second epistle Peter says: "And beside this, giving all diligence, add to your faith virtue; and to virtue knowledge; and to knowledge temperance; and to temperance patience; and to patience godliness; and to godliness brotherly kindness; and to brotherly kindness charity. . . . for if ye do these things, ye shall never fall."

The sort of godliness that never falls, then, is that which is associated with faith, virtue, knowledge, temperance, patience, brotherly kindness, and charity; but he that lacketh these things may yet have a "form of godliness," according to St. Paul. Then what particular form of godliness may one have, and yet deny "the power thereof"? In Webster's Dictionary godliness is defined as "piety," "belief in God and reverence for his character and laws." "Having a form of godliness, but denying the power thereof," would therefore be construed to mean having a formal or conventional sort of piety; and this formal sort of godliness would certainly be what St. Peter calls "barren and unfruitful" because lacking in every one of the essential qualities mentioned; not at all the sort of godliness manifested by him when he healed the lame man at the Beautiful gate of the temple.

Peter was not a regular physician, he had no license to practise medicine and surgery; and being "unlearned and ignorant," according to the opinion of the authorities, he should not have undertaken, without medical advice, to heal a man who had been lame from his birth. Even as it was, he and John got themselves into trouble. They were called before the council and "threatened," and were also forbidden to do any more of the healing work. Peter, however, stood fearlessly by the Christ-healing, and said to the authorities and all the people, "This is the stone which was set at nought of you builders, which is become the head of the corner. Neither is there salvation in any other: for there is none other name under heaven given among men, whereby we must be saved." The historian adds, "And beholding the man which was healed standing with them, they could say nothing against it."

And now we see how history repeats itself. Although eighteen centuries have passed away, the healing of the sick and the lame by the method of Christ Jesus often seems to be just as obnoxious to many religionists, as in that early day; and they are still asking the question, "By what power, or by what name, have ye done this?" Alas, that it should ever be said of a professed follower of the Master, that he is "ever learning, and never able to come to the knowledge of the truth; . . . having a form of godliness, but denying the power thereof." In Science and Health (p. 41) we read, "The truth taught by Jesus, the elders scoffed at. Why? Because it demanded more than they were willing to practise." Also, on page 1, we read, "The prayer that reforms the sinner and heals the sick is an absolute faith that all things are possible to God—a spiritual understanding of Him, an unselfed love." This shows why "a form of godliness" which denies "the power thereof" is "barren" and "unfruitful;" why it cannot heal the sick, and why St. Paul warned his beloved Timothy to "turn away" from such doctrines. Although the words of Peter and Paul above quoted have for centuries been as household words in the established churches, it is not until touched by the living truth of Christian Science that their splendid significance blazes out as it were in letters of fire, uncovering the error of a conventional, scholastic form of godliness which, being unfruitful, denies the power thereof, and from which unsatisfied men and women can but turn away to the real godliness which does not deny, but affirms and demonstrates the healing power of God, of Truth and Love.

WORKING OUT OUR OWN SALVATION.

FRANK B. HOMANS.

IN speaking of a difficult problem, one requiring considerable mental labor, we often hear it said by earnest,

Digitized by Google

well-meaning Christians, and also by those who are striving to be Christian Scientists, that they will leave it all with God, and take no further responsibility in the matter. They thus leave everything for God to do, and are surprised when they fail to realize the success they covet. God surely inspires us to work out good and grand plans, but in so far as our work is material it requires a human agent to carry it out. If we are good enough to hear the voice of Truth, we must be strong and wise enough to execute the demands of wisdom.

Moses received the message from God to deliver the children of Israel from bondage to the Egyptians, but it required forty years of ceaseless labor on the part of "the man of God" to bring the Hebrews to the promised land, and the story from Genesis to Leviticus tells us how occupied he was in this work. So, too, it required a great deal of energy as well as true wisdom on the part of Solomon to build the temple. If Jesus had stayed on the mountain or by the seashore, and put forth no effort to do God's work, he would never have consummated his great mission. If he had not started out in an earnest, determined manner to do his Father's business, he would never have accomplished what he did. Though, as he said, he could do nothing of himself, yet he was called to be an active and also a willing agent, in order that the material evidence of his life-work might be presented to human sense. Paul was called to preach the words and works of Jesus, and as we follow him in his activities we realize that he understood the call to mean very much more than just "leaving it all to divine Love." He felt called to work and to endure hardship and privations in order to advance the Cause. Our Leader's life as we have seen it for the past forty years is an object-lesson that every one may contemplate with much profit. God calls, God leads, but if we desire to accomplish anything we certainly must do the work that needs to be done if we would prove ourselves worthy of our summons and win success.

Overzealous reformers, blindly working out their own mortal opinions, may do more harm than the mistaken Christian who is waiting for God to do the work for him; but this fact should not offer any encouragement to the latter course. We must remember the rebuke of the slothful servant who buried his talent in a napkin. It is very easy to make the mistake of being led by our own desires, both to do too much in the wrong direction or not enough in the right, and we need to remember ever the prayer our Master taught, and say, "Thy will be done."

CHRISTIAN SCIENCE LITERATURE.

MATHER ALMON ABBOTT.

IN the Manual of The Mother Church (p. 43) is a rule entitled "No Incorrect Literature," which recalls the statement in Exodus: "For they cast down, every man his rod, and they became serpents: but Aaron's rod swallowed up their rods." When philosophy had come to its second standstill, and the skeptics had reached the height of power; when that wonderful product, the Greek mind, lay palsied at its own discovery that there was no criterion of truth; when the thought of Plato, Aristotle, and the later philosophers had shown its weakness,—that weakness which always follows the pursuit of truth through the material, namely, lack of proof; when Philo the Jew and the Neoplatonists had invented the Alexandrian trinity and through a religious philosophy were endeavoring to satisfy the desire of mankind for a practical knowledge of the Father,—there came to Alexandria—the chief seat of learning at that time—a few disciples of the humble Nazarene.

In spite of scorn and ridicule the numbers of these Christians grew, and because of their fruits it was not long before the learned men of the age had to pay attention to this new and wonderful power which had arisen in their midst. From this it soon followed that many of these savants were converted, but unwilling to lose their position as the scholars of the day, unwilling to lay aside their theories and teaching, unwilling to put on the humble garment required by their Master, they sought to ingraft upon the teaching of that Master the ideas of their old philosophies, and to show that his teaching was merely an extension of the ideas to which the ancient philosophers had given birth; thinking, no doubt, that thus they would save themselves and also acquire a much needed prestige for Christianity. Thus came about the first rent in the undivided garment, for worldly success soon followed these teachers, and the Christian thought became so interwoven with the doctrines of Plato and Aristotle that we find the churchmen of later times paying even more attention to the teaching of these two philosophers than to the doctrine of the Master.

When philosophy came to its last standstill, and again skepticism was rife, when religion through its lack of proof had had its weaknesses disclosed, again came the healing truth, and again it came in humble form. The scorn and the ridicule were there, as at an earlier day; but followed by fruits, by the almighty power of proof, the numbers of Truth's followers grew apace; and now, today, when it can no longer be scorned, but stands forth as the most mighty factor of the age, the worldly intellect is again forced to consider it. Never for a moment does worldly pride, which seeks Truth through the material, admit the healing power of Spirit, God, but cries out that the mighty works of Christian Science are accomplished by a force long known in the East, viz., the suggestion of the finite mortal mind, which, if we may trust accounts, accomplishes more evil than good.

Unwilling to lay aside material knowledge, unwilling to give up its years of allegiance to the teachers and philosophers of the past, unwilling to exalt the Master and sit at his feet, this worldly intellectual pride would have us believe that the only power to save man from sin, sickness, and death, with all their attendant misery, resides in the material mortal mind. It forgets that "the wisdom of this world is foolishness with God," and pays no attention to the warning of St. Paul: "Beware lest any man spoil you through philosophy and vain deceit, after the tradition of men, after the rudiments of the world, and not after Christ," and in its ignorance and self-justification would have us believe that works wrought by Spirit are accomplished by mortal mental power. In such a manner did the Pharisees claim that Jesus cast out devils, a claim which brought down upon them the heaviest denunciation that ever fell from the Master's lips. Further, the worldly intellect, which claims that the works of Christian Science are accomplished by mental suggestion, in its desire not to be at a loss would invent a system of healing by means of this mortal mind, join to this system the doctrines of philosophy, psychology, hypnotism, and *materia medica*, and then come forth as a healer, claiming that he who said, "It is the spirit that quickeneth; the flesh profiteth nothing: the words that I speak unto you, they are spirit, and they are life,"—that he healed by the same human material method!

When one considers these things, he can but feel the deepest gratitude for the wise guidance and care which has foreseen and provided for our need. The writer remembers how, in the days of his antagonism to Christian Science, or rather to what he then thought was Christian Science, the greatest play of his scorn descended upon that teaching which counseled such devotion to the study of two books, and he questioned what could lead sooner to mental stagnation, to narrowness of mind! Narrowness of mind! When one has sat by the bedside of the sick,

Digitized by Google

and because of his consecration to the teaching of these books has for a moment seen, as it were, the heavens open, and for a brief space realized the perfection of all the manifestations of God, infinite Truth and Love, and as a result of this experience has found the sick healed and joy and love where discord and sorrow reigned,—then no words can express one's gratitude to her who, to use her own words, "has not compromised conscience to suit the general drift of thought, but has bluntly and honestly given the text of Truth" (Science and Health, Preface, p. x.). One can then meet with love the gibes of worldly intellectual pride, and be thankful that through a strict adherence to the true literature he has become broad-minded enough to press onward to the "throne of grace," there to "find grace to help in time of need."

RELIGION.

WILLIAM HOLMAN JENNINGS.

RELIGION, according to its accepted Latin derivation, is that which binds man back to God, the ligament or tie that holds man in union or at-one-ment with God. It is also that which shows man's relation to God, and this relation to be that of sonship. Through a true sense of religion we receive and reflect life and health. Through religion or conscious relation to God as substance, man reflects substance and affluence. Through his religion or relation to God as Mind, he reflects intelligence, understanding, spiritual consciousness, etc.

Religion is to humanity what the trolley connection is to the street-car. When this connection is made the car receives power by which it moves on harmoniously. So when the relation of man to God is realized in Christian Science, we ought to expect an instantaneous reflection of power and health and harmony. As there is one motive power to many cars, so we are all animated and moved by the one Mind and power, even God, Life, Truth, Love. Religion is to us as the union of the ray of light with the sun. This union is beyond the reach of mortals. So the eternal union of man to God is metaphysical, hence beyond the asserted power of finite mind, but nothing can break the spiritual man's relation, or life-link, to the infinite God, or Life. "I and my Father are one," said Christ Jesus. Through this oneness, this vital union and communion of man with God, the spiritual man receives and reflects all the blessings, qualities, and attributes of God. "Son, thou art ever with me, and all that I have is thine."

[Written for the *Sentinel*.]

THE CHOICE.

BEN. HAWORTH-BOOTH.

I have set before you life and death, blessing and cursing: therefore choose life.—MOSES.

BEHOLD! this day I set before thy vision
The fateful choice—and thou thyself the chooser;
Call heaven and earth to witness thy decision—
And thou thyself the gainer or the loser;
Do service to the Lord of love and life,
And be His son, and of His truth partaking,
Or give thine heart to hate and lust and strife,
Thou thine own self deceiving and forsaking.
'Tis life or death, the blessing or the curse;
'Tis light and peace, or darkness and despair;
Dominion of the boundless universe,
Or infamy and bondage past compare.
Ye sheep of Israel, heed your Shepherd's voice,
Choose life, and live forever—take your choice!

SELECTED ARTICLES.

[Editorial in *St. Louis* (Mo.) *Post-Dispatch*.]

The medical bills against which the Christian Scientists and others who believe in the treatment of diseases without the use of drugs are protesting, have a grave fault in that they would prevent any treatment of disease except that authorized by regular schools of medicine and practised by regular physicians. No opening is left for liberty of choice in the methods of healing outside of the practice recognized by the state board of health. The bills provide that none except licensed physicians shall practise medicine or "profess to cure" or "attempt to treat disease." They are very sweeping and stringent, and subject all, except registered and licensed physicians, who profess to cure or attempt to treat disease to injunction and heavy penalties.

No legislation is more necessary than that prohibiting the practice of medicine and surgery by any except well-equipped and trained physicians and surgeons, graduates of schools of medicine or men whose qualifications are proven by examination. The use of medicines, many of which are poisonous, or of surgical instruments, by ignorant persons or "quacks" would be dangerous to the life and health of their patients. But to go beyond this and say that no one shall profess to cure or attempt to treat disease, except men equipped to give drugs or use surgical instruments, is to debar those who may not believe in the use of drugs or instruments from using any other method of treatment.

The Christian Scientists and others who use mental methods do not endanger life by the use of drugs or knives. Shall they be debarred from treating the afflicted who seek their aid? Shall those who believe in the efficacy of prayer to heal disease be debarred from praying for the sick, or shall the sick be refused the privilege of seeking relief through prayer? Shall a person who has a disease pronounced incurable by regular physicians be refused the privilege of trying other than regular medical or surgical methods to save his life?

Restrictive legislation of this kind, which goes beyond the protection of the public from contagion or unsanitary conditions, or the ignorant use of drugs and instruments or frauds, and attempts to prescribe what healing methods shall be used by the public, is unwise and unprogressive. It is discriminative and intolerant. It violates the principle of liberty.

[Editorial in the *Iron Era*, Dover, N. J.]

The refusal or reluctance of some of our churches to grant letters of dismissal to their members who wish to join the Christian Science church, because the latter is not recognized as a religious body by orthodox churches, and also because of the prosecution in the courts of some of the members, who refuse to employ doctors for their families during sickness, has awakened more or less discussion not altogether favorable to the churches. Comments which have been made on the subject tend to show that our churches have not altogether escaped from that narrowness of belief which caused the persecution of the apostles; which drenched Europe with human blood; which drove the Puritans to America, and which in turn prompted the Puritans to banish Roger Williams into the wilderness because he was a Baptist. The churches are a moral power in the world, standing for all that is good, and may the day be far distant when they cease to thrive and prosper; but the fact remains that, be a man ever so broad in his views on other subjects, he is extremely sensitive on religious affairs, and prefers to have a person think the way he thinks and belong to the denomination to which he belongs. While this feeling is not so pronounced as in former

Digitized by Google

years, it is still extant, as shown by the refusal to recognize the Christian Science church as a religious organization.

Why should the church of the Christian Scientists not be recognized as a religious organization? The tenets of their belief are founded on strict adherence to the teachings of Jesus Christ, even to the treatment of disease, and it is impossible to separate any part or parcel of their creed from Biblical precept. They demand morality, truth, and honesty from all adherents, and the followers of this branch of religion are among the most upright in any community, for evidence of which we do not have to search beyond the limits of Dover; while from a physical viewpoint, notwithstanding that the practice of medicine has no place among them, there are no more healthy citizens than they, and though they are stricken with illness the same as the rest of mortals, the death-rate among them is not extraordinarily large. While we may not agree with them in all particulars of their beliefs, and the majority of us, when ill, would feel safer under medical treatment than with mental healing, yet we cannot but acknowledge that these conditions exist as demonstrated facts. Then why should our churches refuse to recognize Christian Scientists as a religious body, or why should they be prosecuted in courts of law for practising mental healing? Did not the great Preceptor of Christianity, and later his apostles, practise this same method of treating disease?

We all have our own views on matters of religious preference, but this is a land where each person is guaranteed the right to worship the creator according to the dictates of his own conscience, and we should cheerfully accord to the individual who differs with us the same right that we demand for ourselves, and for which we would fight if it were refused us. The Christian Scientist, sincere in his belief, ranks favorably with the rest of our churchmen; the peer of the most intelligent, and unexcelled in his efforts to lessen evil and error, by his example he frequently administers a rebuke to those who refuse to recognize his good intentions and who seek to restrain him in our courts.

[Frederic C. Hotchkiss in *Danbury* (Conn.) *News.*]

"Christian philosophy" can be only the teachings of Jesus, and surely "traditional Christianity," if it follows that philosophy, should be able to heal the sick and do the works of the Master as did the early Christians prior to the advent of scholastic theology. If "traditional Christianity" stands merely for scholastic theology from the early fathers through Calvin to the present time, Christian Science claims little part in it. If, on the contrary, it stands for Jesus' teachings and the doing of His works, Christian Science may be called not only Christian, but scientific. Jesus' work was scientific because he worked by Principle—never by chance—and gained fixed results according to law. Christian Science is today bringing forth the same fruits by the use of the same Principle. It claims therefore its right to its name, Christian Science.

The critic says Christian Science deals in "negations;" that it denies "matter, man, sin, and death." Christian Science, as does all Christianity, starts with the affirmation that God is Spirit, good, omnipotent, and the only creator. Its "negations" consist in its denials of everything that claims an existence contrary to this affirmation. God, Spirit, being the only creator, and cause being necessarily manifested in its effect, God could not create matter; nor could God, good, create evil. If God is omnipotent and the only creator, no other power can create matter or evil. Hence Christian Science, along with the most advanced thinkers in the world of physics, denies the substantiality of matter; and with Jesus, who called the devil—evil—only "a liar," it denies the truth of evil. Christian Science is bold enough and logical enough to accept the conclusions from its premise of an omnipotent God who is Spirit, good, and it undertakes to prove the truth of the fact that it accepts. Christian Science does not deny man, as our critic asserts, but it does not start with evil to find him. It bases its statement of God and of man in His image on Genesis i.–ii. 4, and it finds this statement in accord with Jesus' teachings. It denies the possibility of any human theology making man less than God's image.

Christian Science denies death as good, because it accepts Paul's statement, "The last enemy that shall be destroyed is death;" in short, Christian Science is so sure of the existence of an omnipotent God who is good, that it denies whatever seems to contradict this fact, and is slowly working out its proof, step by step, that the omnipotence of Truth can destroy error, all evil, until man comes finally to "the knowledge of the Son of God, unto a perfect man, unto the measure of the stature of the fulness of Christ."

[Alfred Farlow in *Bloomington* (Ill.) *Pantagraph.*]

It is not strange that one whose belief as to what constitutes science is based upon material sense, should differ in his conclusions from Christian Scientists, who reason from spiritual premises; but when one undertakes to deal with the arguments of a Christian Scientist, we have a right to insist that they be weighed against our premises and not against his. The question regarding the veracity of material sense is a much mooted one, and since the gentleman makes the charge that I speak with "metaphysical obscurity" he may be better satisfied if I quote some of the opinions of the leading scientists of the day. In discussing the properties of matter, Dr. G. W. Saleby in *Marmsworth's Self-Educator Magazine*, page 231, declares: "So it became necessary to conclude—since matter, to use the words of Mr. Balfour, 'had been not only explained, but explained away'—that matter is made of electricity, or is merely an electrical phenomenon. Hence the question arises—What, then, is electricity? We may here briefly say that electricity is none other than a mode or form of energy. In other words, matter is merely a particular form of energy."

The *Van Norden Magazine* contains an interesting article by Hereward Carrington, from which we extract the following: "Matter, it has been found, is not everlasting and indestructible—as it was thought—but it can be split up and disassociated, and even caused to vanish and cease to be matter altogether. The phenomena of radio-activity prepared the field for this; and then came forward Dr. Gustave Le Bon, *membre de l'Academie de Belgique*, whose previous work accorded him a high place in scientific circles, and in his 'Evolution of Matter' asserts that he has caused matter to vanish without return, and that he has found that it ceases to be matter altogether. Of course Dr. Le Bon is not alone in this. Several other English, American, and European scientists have advanced very much the same ideas; but not with Le Bon's sweeping conclusiveness. Further, the right of priority belongs to him, in a sense, since he advanced his ideas when no one in the scientific world paid any heed to them; and it is only recently that they have won acceptance. What he says, therefore, is of the highest value; while his conclusions are sufficiently sweeping and far-reaching to affect every one who follows the trend of science at all. Thus, for instance, we have read: 'Matter, hitherto deemed indestructible, vanishes slowly by the continuous disassociation of its component atoms.' There can be no question that Dr. Le Bon's experiments are authoritative and conclusive. He has been at work on them for ten years, and was the first to announce to the scientific world many of his discoveries. His past reputation as a careful scientist ensures his work, and acts as a guarantee of its genuineness and care. Further, Dr. Le Bon clearly shows us how his results were brought to pass. The facts are established beyond question. It becomes merely a matter of interpretation."

Dr. Le Bon declares: "Energy is not indestructible. It is unceasingly consumed, and tends to vanish like the matter

Digitized by Google

which represents one of its forms." We do not vouch for the correctness of these deductions, but famous men confidently affirm that they have been and can be demonstrated, and if this be true, our critic's demand is supplied and matter is explained away from a material point of view. It is our purpose to deal with the subject from a spiritual point of view. If the gentleman has read the Bible as carefully as he has "Alice in Wonderland," he is aware that Jesus, who from a Christian standpoint was the greatest scientist the world has ever known, said, "It is the spirit that quickeneth; the flesh profiteth nothing." The word flesh in the text is evidently equivalent to our word matter, since it unmistakably refers to materiality in contradiction to Spirit. Jesus said, "Neither shall they say, Lo here! or, lo there! for, behold, the kingdom of God is within you," clearly expressing the fact that the state of existence which insures health and harmony, that which is commonly called heaven, is not to be found through material observation, but is within the individuality of the man as a characteristic of God's image and likeness, and that it must be discovered there and brought forth in the life of the individual in order to insure what is needed for the existence and comfort of the man.

I am well aware that the testimony of personal sense contradicts our Lord's teaching, and that we are called upon to choose which we shall serve—the testimony of material sense or the evidence of Soul, and I know of no way of testing the truth of the spiritual proposition as it was taught by the Master and is demonstrated in Christian Science, but by considering the results of the teaching and thus complying with the measure, "By their fruits ye shall know them." If by living, that is, by thinking, speaking, and acting, in accordance with the spiritual truth of being, the general condition of the individual is improved, we have the evidence that good is predominating over evil, and we are proving the truth of the proposition that good is omnipotent and that evil, its opposite, is impotent. When one considers that faith in Spirit means faith in the existence of that which personal sense denies, there is "more truth than poetry" in the statement that faith is believing something you know "ain't so," or at least that you declare is not true.

If our critic were as familiar with the Scriptures as he is with fiction he would not leave so wide a gap between his quotation, "The Lord made the heavens and the earth," and the quotation, "And whatsoever Adam called every living creature that was the name thereof." May I call attention to the fact that the first statement quoted appears in the beginning of the first chapter of Genesis, while the second appears in the beginning of the second chapter of Genesis. The two texts represent two entirely different narratives, two different statements or opinions concerning the creation. In the first narrative man is mentioned as the last in the scale of creation. In the second narrative man is described as the first in the scale of creation. In the first narrative it is declared that man was made in the image and likeness of God. In the second, that he was made of the dust of the earth. These two descriptions conflict, and it is for us to choose which is the more spiritual and correct. According to the second story, Adam started from a mist and usurped God's place and erroneously named the creatures of God. The first chapter declares creation to be "after" God's "kind," that is, spiritual. The second affirms that Adam was of dust and that he placed his construction on creation.

THE LECTURES.

ASHEVILLE, N. C.

Prof. Hermann S. Hering, who lectured on Christian Science at the Grand Opera House Feb. 19, was introduced by the First Reader of the Christian Science Society of Asheville, Miss Elizabeth Earl Jones. Miss Jones said in part,—

Christian Science is bringing to the world such a joyous, practical, redeeming sense of life, that it is giving "beauty for ashes, the oil of joy for mourning, the garment of praise for the spirit of heaviness," and it has opened wide for the world a door of hope and salvation which no man can shut. In that dearly familiar prayer which Christendom uses daily, the Lord's Prayer, we are told to ask, "Thy will be done in earth, as it is in heaven." Now how do we think God's will is done in heaven? And what is it that we ask when we pray thus?

Heaven, to the average mind, suggests a state and condition of absolute and unbroken harmony; no more sin, no more sickness, no more sorrow, no more death. Heaven seems to speak to us of the full satisfaction of all our worthy longings, the fulfilment of our highest hopes, the meeting of our deepest needs. This is our idea of heaven, and if it is yours, and if this is the way we think God's will is done in heaven, then what does it mean when we pray daily, "Thy will be done in earth, as it is in heaven"? Jesus did not leave us in doubt on this point; he illustrated his meaning. He healed the sick, cleansed the lepers, cast out devils, raised the dead, and he commanded his followers to do the works which he did, thus bringing heaven into human experience here and now. Jesus lived the spirit of his prayer, and he said to all mankind for all time, "Follow me." This is what Christian Science is teaching us how to do, and it is most reasonable and natural to suppose that the wide-awake, conscientious people of today wish to investigate a religion and science which comes reiterating Jesus' promise: "Ask, and it shall be given you; seek, and ye shall find; knock, and it shall be opened unto you."

Asheville Gazette-News.

MUSKOGEE, OKLA.

An exposition of the doctrine of Christian Science was given Feb. 18, at the Hinton Theater, under the auspices of First Church of Christ, Scientist, by the Hon. Clarence A. Buskirk of St. Louis, before a large audience. Judge N. B. Maxey, in introducing the speaker, said in part,—

There are a great many things about Christian Science that I do not understand, but I can truthfully say that its members get more satisfaction out of the teachings of their creed than any other within my knowledge. Some author has defined Christianity, or religion, as that which satisfies the mind; if this definition is a correct one, then Christian Science surpasses them all, for its adherents certainly are supremely satisfied with their creed. If there were nothing else in Christian Science than the beautiful life it teaches, it is worthy of all the attention you can bestow upon it.

Correspondence.

MACON, GA.

Frank H. Leonard of Brooklyn, N. Y., lectured yesterday afternoon [Feb. 28] at the Grand to a large, cultured, and attentive audience on Christian Science. He was splendidly introduced to the audience by the Hon. W. A. Huff. Mr. Huff, who is always a good talker, was especially so in his introductory remarks, saying in part,—

When a man has traveled the great highway of life as long and as far as I have, he naturally feels that he has

Digitized by Google

lived in vain if he has not learned the difference between the good and the bad of this world. And I desire to say, here and now, that which I have never before said in public. For more than seven years I have been mingling with the good people of this Christian Science church of Macon. I have been with them in the holding of their religious services, day and night. I have scrutinized their conduct, have studied their characters, and have marveled at the modesty and meekness of their devotional exercises. During all of these years no word of doubt, no whisper of discord, has ever been heard at one of their meetings. No jealousy, no strife in their midst—the result is, their ways are ways of pleasantness and their paths are peace.

They are indeed a peculiar people, zealous of all good works. They are a Bible-reading, a Bible-studying, God-fearing, and God-loving people. Their faith is the faith of the moved mountain: and their chief Christian graces, like their open charities, are nothing more nor less than love in action. They teach well by precept, but better by example. They practise what they preach, and demonstrate what they teach. If I were asked to sum up their Christian virtues in one short line, I would say they were better than they pretend or profess to be; and this is enough.—*Macon Telegraph.*

LITTLE ROCK, ARK.

Bicknell Young addressed an audience at the Capital Theater yesterday afternoon [Feb. 28], and explained the tenets of that sect. E. Robinson, Second Reader of Second Church of Christ, Scientist, welcomed the audience and presented Atty.-Gen. Hal L. Norwood, who introduced the speaker, saying in part.—

I am not a Christian Scientist, but have been taught to have consideration and respect for the views of all sincere people. Bigotry and prejudice flourish where ignorance prevails. It is only intelligence that lends a listening ear. Our greatest boast is tolerance, and any man is welcome whose object is the accomplishment of good. Christian Science claims that God, who created the world, and He who guides man from the cradle to the grave, is not a cruel tyrant or a sensational visionary, but a God of love who heals the sick, reforms the sinner, and relieves distress. When Christian Science is properly understood, love, peace, health, and happiness will be universal.—*Arkansas Gazette.*

NEW YORK, N. Y.

A lecture on Christian Science was given in Second Church of Christ, Scientist, New York city, on Friday evening, March 12, by the Rev. William P. McKenzie of Cambridge, Mass., to a very large and attentive audience. The lecturer was introduced by Gage E. Tarbell, who spoke as follows:—

I am not a Christian Scientist myself, but this religion, or philosophy, or whatever you may choose to call it, has attracted my attention by the things it has done,—the good it has accomplished. All my life I have been an admirer of the men and women who do things, and judging Christian Scientists by the old Biblical standard, "By their fruits ye shall know them," they seem to me to deserve not only the admiration but the thoughtful attention of mankind. It is my privilege to number many Scientists among my friends, and in a rather wide experience during the last fifteen years I have had the pleasure of meeting and talking with a great many others and studying to some extent what they were doing; and I want to say this as a result of my observation: Laying aside their claims as to healing the sick and reforming the sinner; laying aside the things they are striving for spiritually; laying aside the main things for which they are contending, for regarding these we have with us tonight one who is far more competent to speak to you than I, it is my opinion that in one respect alone, in their cheerfulness, their unfaltering optimism, they exert a most beneficent and uplifting influence upon those with whom they come in contact. Show me a man who is always cheerful and has an encouraging word for every situation, one who is ever looking upward and not downward, a man who in his every-day life is living the doctrine of good, and I will show you a man who is making the world better for his presence.

My experience leads me to believe that it is of such men and women that the great body of Christian Science adherents is composed, and the fact that so very many thinking, intelligent people have joined its army of workers seems to me convincing evidence that there must be something very substantial in the premises upon which it is based. I honor a belief that can show such results, and I have nothing but the most profound respect and admiration for the noble woman who is its Founder, confessedly one of the most remarkable and brilliant women of this or any other age.—*Correspondence.*

SAVANNAH, GA.

In the lecture on Christian Science delivered at the Guards' Hall last evening [March 22], Frank H. Leonard was introduced by the Hon. William R. Leaken, who spoke in part as follows:—

I have no apology to make to this distinguished and intellectual audience. I am here to plead the momentous motto of the great state of Georgia, "Justice, Wisdom, and Moderation." I represent a profession which could not exist except for the lasting legal principle, *Audi alterem partem*, which being interpreted meaneth, "Hear the other side." Christian Science has now with its host of members passed the stage of suffering from sarcastic suggestions and scoffing, stinging satires. To all those who are interested in mental and moral progress, it reveals a realm of thought and study more lasting than the Incas. And after all, thought is indestructible, for it not only survives, but vindicates its power, in ways apparently miraculous.—*Savannah Press.*

LECTURES AT OTHER PLACES.

Council Grove, Kan.—Hon. Clarence A. Buskirk, Feb. 23.
Bridgeport, Conn.—Prof. Hermann S. Hering, Feb. 26.
Galesburg, Ill.—Bicknell Young, Feb. 26.
Ottawa, Kan.—Hon. Clarence A. Buskirk, Feb. 28.
Hartford, Conn. (First Church).—Prof. Hermann S. Hering, Feb. 28.
Orange, N. J.—Bliss Knapp, Feb. 28.
Madison, Wis.—Francis J. Fluno, M.D., March 1.
Americus, Ga.—Frank H. Leonard, March 2.
New Bedford, Mass.—Rev. William P. McKenzie, March 9.

NOTICE.

At the request of the Field, the Publishing Society has added to its stock *Quarterly* covers containing *change pockets.* These are sold at the following prices:—

Large size, 5¼ x 7¾, $1.50 each or $15.00 a dozen. Small size, 4½ x 6½, $1.40 each or $14.00 a dozen.

ADMISSION TO MEMBERSHIP.

The next admission of candidates to membership in The Mother Church will be June 4, 1909. Applications should be in the hands of the Clerk on or before May 12, 1909. Application blanks may be had by addressing William B. Johnson, C.S.D., Clerk, at the church edifice, Falmouth, Norway, and St. Paul streets, Boston.

CHRISTIAN SCIENCE SENTINEL

EDITORIAL

MRS. EDDY TAKES NO PATIENTS.

The author of the Christian Science text-book takes no patients, and reads no letters on disease, distress, or error of any kind. Reliable news concerning Mrs. Eddy will be found in the Christian Science publications.

"RELIGION THE BASIS."

In a newspaper report of an address before the students of Leland Stanford University, by Dr. W. F. Cheney, a professor in Cooper Medical College, we find the following:—

"And good there must certainly be in Mrs. Eddy's teachings," said Professor Cheney, "since countless thousands are yearly taking up the Scientist belief, with no compulsion or revival meetings on the part of the Eddy forces. Christian Science makes religion the basis of its cures. Christ himself was known as the 'great Physician,' as well as the 'great Teacher.'"

These words, coming as they do from a physician of prominence, indicate a growing spirit of liberality on the part of the profession of which he is a member, and they should be heeded by those who seem determined to crush out by legislation, if possible, all healing work which does not bear the hall-mark of their own particular school. At this late day there can be but few physicians who have not been at some time brought into personal touch with the beneficial effects of Christian Science practice, and it would be wise for all who have had such an experience to investigate (and if this investigation is faithfully carried on, they can but endorse) rather than ignore or belittle, as some have done, the remarkable work which is being accomplished under their very eyes. Christ Jesus was indeed the "great Physician," as well as the "great Teacher," and one of his teachings respecting those who wilfully shut out the truth is that they did so lest they should be converted and be healed by his master touch.

That some physicians, confronted with apparently hopeless illness of their loved ones or themselves, have, though ofttimes unwillingly, been led to investigate the cures wrought by a system which is the exact opposite of their own practice, and through this personal investigation have become convinced that Christian Science is indeed the healing truth taught and practised by Christ Jesus, is shown by the number who have abandoned the use of drugs and become practitioners of Christian Science. We are glad to publish in this issue of the *Sentinel* the statement of Dr. Sawyer, who became convinced by experiences in his own family not only that Christian Science heals the sick, but also that it affords a measure of joy and satisfaction which his former practice did not bring to either physician or patient.

It is no light matter for men who have been schooled for years to do something in a certain way, and who conscientiously believe that their own method is the only right way in which it can be done,—whether it be treating the sick or sending a telegraphic message,—to turn from that way of thinking to an entirely different system; and no sensible man will do this, unless he is convinced by demonstration that the new way is the better. Dr. Sawyer was fortunate in having this experience, and his testimony should go far toward refuting the statement so often made, that Christian Scientists "only imagine" that they were afflicted with certain diseases of which they claim to have been healed.

ARCHIBALD MCLELLAN.

"RISEN WITH CHRIST."

We cannot better mark the forward march of thought in late years than by comparing the old material concept of the resurrection with the more spiritual sense of it which is largely held today. Not so long ago many believed that to be "risen with Christ" meant an experience which would come to the righteous after death, but there is nothing in St. Paul's wonderful epistle to the Colossians, in which this phrase appears, to warrant such an assumption. Here he tells his readers that the giving up of the gross vices in which they at one time lived was but a single step toward their own resurrection; and he adds, "But now ye also put off all these; anger, wrath, malice, blasphemy, filthy communication out of your mouth." He then reminds them that they "have put on the new man, which is renewed in knowledge after the image of him that created him," and he urges them to put on "bowels of mercies, kindness, humbleness of mind, meekness, long-suffering," and above all else to "put on charity, which is the bond of perfectness." Paul does not stop with the virtues here enumerated, for there is really no stopping-place in one's spiritual progress, so he tells of peace and of thankfulness, and makes special application of the truth to all human relationships; nor does he forget to say, "Walk in wisdom toward them that are without," all of which wise counsel is surely as applicable to Christian Scientists today as if it had been written for their special benefit.

All that Paul here says points to the inevitable flowering and fruitage of character which must come if we are "risen with Christ." In Tennyson's wonderful poem, "The Holy Grail," we read of the famed hall at Camelot, with its "four great zones" of symbolic sculpture, of which the poet says,—

> And in the lowest beasts are slaying men,
> And in the second men are slaying beasts,
> And on the third are warriors, perfect men,
> And on the fourth are men with growing wings.

Over these towers a statue of the ideal king, with wings pointing to the northern star, and a crown which reflects the morning sun, so that the people who are struggling with the heathen hordes catch the reflection of its golden glory and claim their king.

This symbolism means much to the Christian Scientist, who knows so well what the struggle with the beasts signifies, and how hopeless it is till one beholds in Science the vision of "Jesus the God-crowned or the divinely royal man" (Science and Health, p. 313); until one comes to understand how Christ Jesus lifted men from their struggle with the animal propensities to the true warfare in which all evil passions are slain and the sufferings which attend them cease. Then does he begin to rise with Christ, and the shadows of the long night of materiality vanish forever in the sunlight of Truth and Love.

If we are ever to unfold our wings and to realize what it means to be "risen with Christ," is it not time to leave behind us the entangling pettinesses of a false material sense which would battle with beasts, slay and be slain? Is it not time to rise, by holy living and holy service, to the manifestation of the Christ-ideal? Our revered Leader has wisely bidden us to "emerge gently from matter into Spirit" (Science and Health, p. 485), but this does not mean that we must necessarily rise slowly. The healing work of Christ is the one thing most needed today,—the healing of sin, of sickness, and of sorrow,—and in no way can we rise more surely than by doing this work. Paul said, "If ye then be risen with Christ." Is there an "if," an uncertainty as to this vital question, with any of us? Then we cannot too soon make sure that we are indeed rising above all that would hold us back, nor too often look up to the Christ-standard, and follow it by setting our affection "on things above, not on things on the earth."

ANNIE M. KNOTT.

"AND BE YE KINDLY AFFECTIONED."

ALL who are familiar with the introductory pages of the chapter on Christian Science Practice in Science and Health, are prepared to understand the deep significance of Mrs. Eddy's very brief and very beautiful characterization of the ministry and meaning of our Lord's humanity, which is expressed in the words, "Out of the amplitude of his pure affection, he defined Love" (Science and Health, p. 54).

The self-forgetful affection of Christ Jesus for the seemingly unlovable,—for the whole world lying in wickedness, ready to reject, aye, to crucify him,—this is indeed wonderful, and the thought that in it he "defined Love" awakens a new concept of the possible meaning of every human life, even yours and mine. We begin to realize that the Christlike man is he who finds in every call for the expression of brotherly kindness and affection an opportunity to make men see and understand the very heart of God, and we perceive as we have not before why our Leader should have counseled us to pray daily, "And may Thy Word enrich the affections of all mankind, and govern them!" (Manual of The Mother Church, p. 41).

It is clear that if Christian Science has come thus to enrich and govern the impulses of the heart, any show of coldness or indifference to human relations is not only incongruous but quite impossible to those who worthily represent its teaching, and that an attitude which is so assertedly "scientific" that it fails to be either sympathetic or sensible, is nothing more nor less than pharisaism and that of the worst sort. In fulfilment of the Messianic prophecy, "A bruised reed shall he not break, and smoking flax shall he not quench," the Master made known in a thousand tender words and deeds that he had come to lift up the fallen and to comfort them that mourn, and the gladness and freedom with which the common folk and the little children always approached him speak unmistakably for that true compassion with which he ever proved that, in all our relations to others,

> Love is the password, love is the toll,
> Love is the golden key.

When we remember that to define God is the vital end of all true greatness, and accept the fact that this ministry may be wrought by even the humblest if they but love sincerely, it is seen that the commonest path may indeed be hedged with flowers and paved with gold. Mrs. Eddy has said that love enlarges, purifies, and elevates the nature, and that "it is not poured forth vainly even though it meet no return" (Science and Health, p. 57). In most experiences there is some return, a compensation which is sweet and comforting beyond words, and when to this guerdon there is added the realization that in all true, unselfish loving we are making men acquainted with God, then indeed a new significance attaches to every outgoing of the heart, and life takes on that finer expression defined by him who said, "Christian Science leads me to be kinder and kinder, more and more gentle, more and more true."

Surely no one can ignore the human when he comes to see that through its constant betterment by love he may reveal the divine; and this is the glory of every-day life, that it is ever bringing us moments of Messianic privilege, opportunities to flash into the eyes of heart-hungry men the rays of infinite Love through some facet of kindly ministry. Surely "so to love and be loved is part of that saintliness of life by which humanity is moved onward." "God is love." So said

> The sinless years
> That breathed beneath the Syrian blue.

In every hour, every deed, every word of that dear life, the comfort and strength of this immortal truth was brought to men, and in the presence of his glorious example there come to each one of us today these appealing words, "Beloved, let us love one another: for love is of God; and every one that loveth is born of God, and knoweth God."

JOHN B. WILLIS.

LETTERS TO OUR LEADER.

Geneva, Switzerland, March 22, 1909.

Mrs. Mary Baker Eddy.

Beloved Leader:—While passing through this city, whose name is associated with that of a religious reformer, I desire to send a few lines of love and allegiance to you, the great reformer of our age. Calvin was able to inspire to acts of courage some important groups of people,—the French Huguenots, the Dutch Protestants, the Scotch Covenanters, and the English Puritans. Thanks to your unremitting labors, the whole world is now being inspired to deeds of healing. Your great work, Science and Health, is solving world-problems, as I have had occasion to observe on my travels over the ordinary tourist routes in the British Isles, in Switzerland, France, Italy, and Egypt. This last country is no longer a land of darkness, since Christian Science is now known and practised within its confines. It has been my privilege to assist in the healing work during my travels. I have been in the best of health, visiting and revisiting scenes new and old, mountaineering, and riding in Europe and Africa.

How splendidly our new *Monitor*, founded by you, is fulfilling its mission! How joyous and strong is the host whom you are leading into the land of Canaan! God blesses your every endeavor. I remain, as always,

Your humble follower,

W. D. MCCRACKAN.

Hackensack, N. J., March 13, 1909.

Mrs. Mary Baker Eddy, Chestnut Hill, Mass.

Dearly Beloved Leader:—It is only a few hours since I have heard Rev. W. P. McKenzie's lecture given at Second Church, New York (March 12), and it awakened such a new sense of love and gratitude that I can no longer wait a more convenient time, as heretofore, to express my deep love to you who have given to mankind this wonderful understanding through which my little boy, who up to five years of age was considered an incurable epileptic, was healed. We had decided, with the advice of noted specialists, to put him in a sanitarium for the remainder of his life, but for three years now he has been a normal child, advancing rapidly. I should like to mention the fact that it was on the day when Mr. Roos and myself were accepted as members of The Mother Church that our little boy was healed. I had worn glasses continually for fifteen years, and was healed during the first week I heard of this Science, without having what is termed a treatment. There have been many other wonderful healings in our little family, all of whom are earnestly studying "Science and Health with Key to the Scriptures."

I wish I could express half the love we have for you, but the Master said, "By their fruits ye shall know them." Earnestly praying that I may "prove what the understanding of God brings to man" (Science and Health, p. 496), I remain,

Your grateful and humble follower,

EDITH MAY ROOS.

Grand Forks, N. D., Feb. 5, 1909.

Mrs. Mary Baker Eddy.

Beloved Leader:—We, the members of First Church of Christ, Scientist, of Grand Forks, in annual business meeting assembled, send you most loving greeting. We have

Digitized by Google

manifold reasons for great gratitude to you for the many blessings that have been ours in the past year. As you stand on the watch-tower of Zion, far above our altitude, we have heard, again and again, your call of warning, of counsel, and of encouragement; and in the degree that we have heeded your voice have we been protected, instructed, strengthened, and prospered. We thank you for the understanding and wisdom that have enabled us to hold aloft the standard of Christian Science in this city, and to extend the gospel of healing and reformation to many smaller towns and countrysides in this state and beyond. In very many of these places Christian Scientists gather to hear the reading of that Lesson-Sermon which is Christianizing all earnest listeners and doers of the word.

By watching and praying and laboring as you have taught and demonstrated, we have worked together under the reign of Love, and in peace and unity. We rejoice to know that our outgoing Readers retire with the deep satisfaction of having been strengthened and blessed by the love and confidence of this church throughout their entire term of three years. Moreover, we feel assured that those who are about to stand in their places will serve as acceptably to God and man. As we take up the work for the new year we feel, more surely than ever before, that God worketh with us and that we have added grace to labor unselfishly for the salvation of mankind, and thus prove our loyalty to God, and to you, our wayshower in this age.

Lovingly and loyally your followers in Christ,

First Church of Christ, Scientist, of Grand Forks.

MRS. MARTHA SUTTON-THOMPSON, *Chairman*,
MRS. SABRA C. FINCH, MRS. MARIA F. BRUNDAGE,
Directors.
MRS. ANNA WELLS, MRS. MILLIE VAN ALSTINE,
MRS. F. TIBBALS, *Trustees.*

Kansas City, Mo., March 1, 1909.

Mrs. Mary Baker Eddy, Brookline, Mass.

Dear Leader:—I am grateful to you for having made it possible for me to love the Bible. I had been an atheist from boyhood and hated the Bible; even to see a copy of it would put me into a very unpleasant state of mind. The first night I read "Science and Health with Key to the Scriptures," my sense of life was changed. I had always believed in a principle governing the universe, but I could never lay hold of it in a way to make it of a practical benefit until I read Science and Health. It was a revelation to me to learn that God is Principle, and it seemed so easy to believe that Principle is God. It seemed as if every statement you made, I had always believed. I have been healed mentally, morally, and physically, and I hope to show real gratitude by living the truth.

Gratefully yours,

IRA BOTTS.

Indianapolis, Ind., March 17, 1909.

Mrs. Mary Baker Eddy, Brookline, Mass.

Beloved Leader:—I am sure you will be pleased to know that during negotiations with our city librarian, looking to the placing of the *Monitor* in the main and the nine branch reading rooms of the Indianapolis public library, it was developed that the good paper which you have given us will fill a long-felt want as an invaluable reference work on current events for school children. Miss Browning, our librarian, cited the fact that while the public schools require frequent essays by the children on current topics, very many of the parents forbid their children to read the daily papers in search of needed information. At this juncture in the conversation, to which two ladies representing other libraries in the state were parties, our librarian held a copy of the *Monitor* aloft, and citing its clean pages of important events of the day, declared triumphantly, "Here our need is met. An authentic statement of important news items, free from objectionable reading-matter." Miss Browning furthermore assured us that future instructions in the use of reference works in libraries would include the citing of *The Christian Science Monitor* as a most excellent medium through which to keep in touch with important events of the day.

In conclusion, I wish to assure you that I am working hard in the interest of this latest enterprise for the bettering of humanity. I am using ten annual subscriptions to the *Monitor* for weekly distribution on my mailing lists throughout the state. I have been enabled to send in recently ten annual subscriptions for institutions in the state, and will send ten more in a day or two. In addition, the Scientists in various localities are earnestly cooperating with me in the placing of the *Monitor* on news-stands through the Indiana News Company, in such a manner that "returns" are used for distribution instead of being sent back to the Publishing Society.

In the midst of our effort we are not unmindful that the opportunity thus to disseminate the healing pages of a clean newspaper has been afforded us through your foresight, and as a direct result of your unselfed effort in humanity's interest. Thanking you for the privilege of serving, I remain

Very lovingly yours,

R. STANHOPE EASTERDAY.

Greeley, Col., March 4, 1909.

Mrs. Mary Baker Eddy, Brookline, Mass.

Dear Mrs. Eddy:—In contrasting what was said by the enemies of Abraham Lincoln fifty years ago, with the noble and grateful words which were spoken of him in the South last month at the various anniversary services held in his memory, I have thought lovingly and gratefully of your mighty work for those you love, and of how feeble words must always be in trying to express what mankind owes you for your teachings on the unreality of evil.

A reprint from an editorial in the *Aurora* of March 6, 1797, in which George Washington was charged with the very opposite qualities from those history has accorded his character, also comforted me for you, in showing me how inevitable it is that you will receive an ever truer and higher appreciation in the heart of the race as time passes. My heart is filled with love and gratitude for what Christian Science is doing, and I pray daily that my life may prove I am at least trying to be a genuine Christian Scientist.

With love and reverence,

CARRIE F. LYMAN.

LECTURE IN THE MOTHER CHURCH.

The semiannual lecture on Christian Science in The First Church of Christ, Scientist, in Boston, Mass., will be delivered by Judge Septimus J. Hanna, member of the Christian Science Board of Lectureship, Thursday evening, April 15, at eight o'clock. The lecture will be free, and the public is cordially invited.

NOTICE.

The Publishing Society has decided to discontinue its custom of furnishing free of charge to branch churches and societies copies of the *Sentinel* for distribution after lectures. Orders sent before this notice is received will be filled as heretofore; on subsequent orders the usual quantity rates will be charged. It is believed that many periodicals will be contributed for distribution by subscribers who otherwise might not put them in circulation.

AMONG THE CHURCHES.

MILWAUKEE, WIS.

The new edifice of First Church of Christ, Scientist, corner of Prospect avenue and Keene street, was dedicated with appropriate services March 14, four services being held during the day. In the historical sketch which was read at the dedication service it was stated that ten years ago the lot on which this building now stands was purchased by former Second Church of Christ, Scientist, for the purpose of erecting a church edifice thereon. The present church organization is the result of a union of former First and Second Christian Science churches, and was organized April 20, 1904. In January, 1906, Third and Fourth churches united with First Church, and having outgrown its former edifice, this church has been gradually working up to the demonstration of a new building. Ground was broken May 27, 1907, and the corner-stone laid the following August. Work progressed rapidly until the next February, when the building was destroyed by fire, rendering it necessary to tear down the walls and clear away the débris before beginning to rebuild. The work has not been hampered in any way by inactivity on the part of the members of the church, and the consideration shown in this regard has been deeply appreciated. Special recognition is due the children, whose contributions have amounted to a substantial sum of money, and they are to be commended for the spirit of unselfishness and self-denial which has been manifested by them in the giving of so large a donation.

This visible structure is a beautiful manifestation of healing, of the overcoming of obstacles in the way of seeming inharmony, lack, selfishness, and pride; of the bringing out of love, singleness of purpose, and good fellowship among its members, showing that it is in very deed built upon the foundation of Truth and Love, and that without such a foundation even the visible structure could not appear. Mrs. Eddy, in the Christian Science text-book, "Science and Health with Key to the Scriptures" (p. 583), has given us the true definition of church as follows: "The structure of Truth and Love; whatever rests upon and proceeds from divine Principle. The Church is that institution, which affords proof of its utility and is found elevating the race, rousing the dormant understanding from material beliefs to the apprehension of spiritual ideas and the demonstration of divine Science, thereby casting out devils, or error, and healing the sick."—*Correspondence.*

MINNEAPOLIS, MINN.

Third Church of Christ, Scientist, held its regular Sunday morning service in its new church building at the corner of Lake street and Holmes avenue on Feb. 28. The church was comfortably filled, there being present many strangers and a number of members from the other Christian Science churches of this city and of St. Paul. The building is Corinthian in type, with the exterior finish in rough cast concrete. Although simple in style, the building is impressive. The seating capacity is about four hundred. It is provided with a Reading Room, which is open to the public daily.—*Correspondence.*

LOS GATOS, CAL.

The handsome new Reading Room of First Church of Christ, Scientist, on Broadway, is now completed, and regular services are being held therein; in fact, services have been held there for the last two or three weeks, though the grounds are not yet quite in the condition the society hopes soon to place them. This comfortable and cozy little house of worship is entirely paid for, and the society is in a flourishing condition with a membership that is constantly being augmented. The total cost of the building, exclusive of grounds, was thirty-five hundred dollars.

Los Gatos Mail.

YOUNGSTOWN, O.

The first service to be held in the new Church of Christ, Scientist, at Boston and Spring streets, took place Sunday morning [March 21]. The formal opening will be held within a month. Invitations will be sent to surrounding churches and it is expected that a number of out-of-town people will be present on that occasion. While the building is complete, the church yard has not been sodded, but this will be done and various other finishing touches will be attended to before the opening.

Youngstown Daily Telegram.

CONSTANTINOPLE, TURKEY.

At the present time, when we feel that the events in this country are so much talked about throughout the world, we think you may be interested to know that there are a small number of people, two of whom are members of The Mother Church, who meet nearly every Sunday in a little village on the Bosphorus outside Constantinople to go through the Lesson-Sermon together. This note is sent in the hope that the peace and joy which this truth has brought into our lives may be felt by those around us.

Correspondence.

PASADENA, CAL.

Christian Scientists are building in Pasadena a domed edifice for their assemblies and worship. It is to be entirely of concrete—footings, foundation walls, piers, beams, columns, floors, roof, and dome. It is all to be steel-reenforced, and the dome is to be supported by great cantilever arms. The diameter of the dome will be sixty feet. The building is 120 by 120 feet, on a site 180 by 168 feet. When completed there will be seating capacity for fourteen hundred in the auditorium and eight hundred and fifty in the Sunday School apartments.—*San Francisco Chronicle.*

PATERSON, N. J.

The consolidation of the two Churches of Christ, Scientist, has been consummated, and headquarters have been established in Orpheus Hall, corner of Broadway and Carroll street. Heretofore First Church was located at 112 Ellison street, the congregation of the Second worshiping at Orpheus Hall. Owing to the more advantageous location and the better facilities for church work at Orpheus Hall, that place was selected by the combined congregations, which will now be officially known as First Church of Christ, Scientist, Paterson, N. J.

Morning Call.

KINGSTON, N. Y.

The Christian Scientists of our city are now holding services in a pretty chapel on Sterling street, near Cedar. The location is central, being not far from the West Shore station and convenient to both trolley lines. The services on Sunday, and on Wednesday evening, are the same as are held in every church of the denomination in this and other lands.—*Daily Leader.*

TESTIMONIES OF HEALING.

For several years prior to the time I began the study of Christian Science, I believed that it was not only misleading in many ways, but that it was even a dangerous method of treating the sick. I had spent ten years in the study and practice of medicine, and believed that I knew exactly the process by which the cures (which I admitted) were brought about. Although at the time I took up the study of Christian Science I had been out of active practice for about seven years, I was still much interested in *materia medica*. I was professor of medical jurisprudence in one of our medical colleges, and was trying, with some success, to make a specialty of medico-legal cases. Aside from this I was interested financially in two drug concerns, so that the medical thought was connected with my every act in life.

To make my case more hopeless, as it seemed, I felt that it was inhuman to treat children under Christian Science, also that the inability of its practitioners to diagnose contagious diseases, and thus to prevent their spread, was a matter which ought to condemn it with all thinking people. These were only a few of the seeming barriers to my acceptance of Christian Science. How many more there were, I do not claim to know. Only the faithful practitioners and friends who so lovingly aided me in that stormy "passage from sense to Soul" (Science and Health, p. 566) can tell. With all this seeming opposition, and with the feeling that my supply depended entirely upon continuing in the medical thought, together with the fact that I believed myself well physically, it is marvelous to human sense that I should have been led to see the truth.

My wife had suffered for several years from diseases which would not yield to medicine, and although she was treated by the most skilful members of my profession, under their care she received only temporary relief. In her great distress she was anxious to try Christian Science, but though gradually growing worse, she lovingly yielded to my judgment. This state of affairs could not, in the nature of things, last. The very extremity which my erroneous judgment brought about, at last led me to see the injustice of my position, and I finally consented to have her treated under Christian Science. Her healing was beautiful and complete, but the effect upon my attitude was to increase rather than to diminish my opposition. The reason for this was that I attributed the result to the effect upon the human mind which is produced by hypnotism or mental suggestion, as is recognized by my profession.

"Why couldn't she accept the same through *materia medica*, and leave out the Christian element?" was a mooted point which brought many hours of sorrow to me. My greatest desire, at that time, was for my wife to see the subject as I saw it, for I was fully awake to the fact that the question of religious teaching for our little girl would soon come up for final decision, and that while my wife's adherence to Christian Science would cause her to want that method, I could not, I felt, consent to it. Here, however, came in the argument that settled the whole matter. I had no religion to offer the child, while my wife had; and upon this rock my opposition was destroyed. I realized that it would be unfair to deprive her of something which my wife regarded as beneficial, so about two years ago I concluded to study Christian Science, in order to find some plan by which I could be fair to my wife and little girl and still do my duty by keeping them from going blindly into something I considered dangerous. The history of my projected "undoing of Science" would be interesting if I could tell it as it really occurred. A short time after I began to study, our little girl went to bed one night with a severe cough. My wife wanted to call a practitioner, to which I consented, though with some reluctance. The result was that the child's cough ceased in about fifteen minutes, and she went to sleep. "A coincidence," I said to myself. The next night the same thing occurred. "Another coincidence," was the verdict of my *materia medica*, but it was not so strong. On the third night the same thing occurred, and by that time I felt more like studying, with a view to finding the law by which the healing was accomplished.

When I began the study of this great religion in real earnest, it was not long before I saw that there was much truth in it. For instance, the statement, "There is no sensation in matter" (Science and Health, p. 237), which seems so hard for many beginners to understand, was plain to me from the start. I think all physicians will admit its truth if they will consider it from an unprejudiced standpoint. This important point being passed, I was soon led to see that there was an underlying wisdom in the whole teaching that could come from no source but that of scientific knowledge. Therefore, having found one great truth, I followed it up, along with many others, until the entire system became one grand combination of truth, so interwoven that the proof of one part would be proof of it all.

Notwithstanding the fact that I at first saw much truth, I could not keep down the thought that there were what I called "extreme cases" which Christian Science would not reach, and these seemed ever to stand out as complete barriers to prevent me from seeing the basic law which I sincerely hoped to discover. These "extreme cases" included, among others, diphtheria, pneumonia, and consumption. For instance, I believed that diphtheria could be cured only by the use of antitoxin. I had used this remedy in my own practice, and felt that the refusal of its use by Christian Scientists was criminal negligence, even in the face of the fact that very many medical men do not now and never have used it. In regard to pneumonia, I did not argue in my own mind that it could be cured under medical treatment, but I did think that at certain stages of the disease the patients needed stimulants: therefore, the fact that Christian Scientists did not use stimulants made them guilty of neglect. I considered that consumption would be harmed rather than benefited in Christian Science, for the reason that its victims would be so wrapped up in religious blindness that they would refuse to take care of themselves, and refuse also to change to a climate where they could be helped. Not many months, however, after I began to read Science and Health, it was my privilege to observe a case of this disease which was being treated by a Christian Science practitioner. It was a well developed case, but it was healed in the course of about three weeks, and in this climate too. Thus, I passed one of the mile-posts, and I must say I did it gladly.

In the first few months these "extreme cases" seemed to come under my observation with astonishing rapidity. While I was away from home for a few days, my little girl became sick and was placed under the care of a practitioner. She was nearly well when within twenty-four hours I got home. I immediately recognized the condition as a case of serious throat trouble, but the next morning she was able to eat heartily and was entirely healed in about thirty-six hours. No antitoxin had been used, and thus another of the props was taken from under my *materia medica* knowledge. After this she was completely healed of a severe nervous trouble in one treatment. To me this was the most wonderful demonstration of the power of God as explained and taught in Christian Science that I have ever seen. Is it any wonder that I became a firm believer in this healing religion? But to make the "extreme cases" complete, and to destroy utterly and finally every argument I had ever used, I had the great privilege of examining a man who was suffering from pneumonia in its worst form. To make this case even more difficult of

Digitized by Google

treatment, the patient had a valvular heart lesion. There is no doubt in my mind of the hopelessness of recovery had medicine been relied upon, but the patient was entirely healed in one treatment and was on the street the next day. The very foundations of all that I had claimed about the dangers of Christian Science were fairly taken from under me, and I was left with only God upon whom to depend.

In my own case, without special treatment, I was healed of wearing glasses. I was also healed of sleeplessness, of a stomach trouble which was periodic in character, and of many other complaints of less importance; but the greatest demonstration was relief from the intense opposition. It seemed as if every point that I had ever contended for came up in one form or another, and when they did they always met defeat. I have mentioned only a few of the many cases that have come under my personal observation. I have seen high fevers leave in a few minutes on several occasions, I have seen intense pain fade away, I have seen sorrow replaced by joy and gladness,—all by reason of acquaintance with and reliance upon the power of Truth, divine Mind, as taught in Christian Science.

If the healing of disease were the only thing for which I have reason to be grateful for Christian Science, it would be sufficient, but this is only a very small part of the many blessings that have been showered upon me. To know that there is a God; to have been associated with people about whom it can be said, as our Leader has written about others, that "their religion was the great fact concerning them" (Messages to The Mother Church, p. 69); to feel the inspiration of Love, and to know that for every seeming trouble of mankind there is an infallible remedy,—these are among the blessings that have come to me since I began the honest investigation of this healing and regenerating truth. I write this testimony with a feeling of deepest gratitude to God, and to our beloved Leader for her inspiring and helpful message to mankind. I wish also to thank all those who have so kindly and unselfishly assisted me in the acquisition of this knowledge of God.—LEWIS B. SAWYER, M.D., Kansas City, Mo.

Just before Jan. 1, 1907, I was forced to go to Atlantic City for a few days' rest, and while there I became suddenly ill with an acute attack of throat trouble. My suffering was intense, combined with a severe headache, from which I had not been free during the past few years. With me was a very dear friend, who had lately come into Christian Science, and she was asking that I might be led to receive the truth—a prayer which was answered in the most wonderful way. I came into this world bearing many so-called inherited afflictions, as from that day until after my twenty-third year I never knew what it was to be free from pain. I had even been blind, the longest period being a year and a half. I had an attack of fever, and also of lung trouble, which left me in such a weakened condition that I was under the care of an eminent specialist for over two years. During all those years I had four operations, which were as severe as one could have and live. Added to this was an ever-present bowel trouble, dating back to infancy, and pronounced hopeless, as both medical men and surgeons agreed that the repeated operations on my back had seriously affected the bowels. This is but a mere outline of what my sufferings were before my operations and in the years following. I had been taken to Atlantic City to recover from my various illnesses, so I knew well the best physicians to be found there, as I had all my life received the very best medical advice that money could secure.

On this memorable Sunday morning I told my friend that we would attend the Christian Science service, my mind being absolutely void of any other thought. I had never been so ill, yet able to be on my feet; still, strange to say, not once did the thought of a doctor occur to me, any more than if I were on a desert island. We found the Reading Room and heard the service, in which I took but little interest, as I was suffering greatly. After the service I asked the kindly First Reader to give me a treatment, which she did, after I had faintly outlined my pains and requested her to confine her treatment to my throat and to ignore the paralytic bowel trouble and my headaches, as I considered them beyond help, having been assured of that fact by many prominent physicians. I saw her the next day, and had my second treatment, then returned home a very different woman. The medicines that I had not been without for years have not since passed my lips; the headaches and the bowel trouble have disappeared entirely. Today I am a perfectly well woman, and weigh one hundred and forty pounds. While I am deeply grateful to God for this blessed health He has given me, I am more thankful for the spiritual uplifting that has come to me at the same time.

MISS JOSEPHINE LOCKHART, Philadelphia, Pa.

When Christian Science found me I was a rather vacillating and uncertain individual, undisciplined and ever leaving any work that seemed harder than I wanted to do. I had no desire to be forever changing, but the nature of my human make-up seemed to be of that quality which was always leading me to something new. The light of Truth at last dawned upon me, and I saw that if I did not change my habits I should continue indefinitely to drop one thing after another because of seeming hardship. Six months was about as long as I would stick to anything, and in about that time those nearest and dearest to me would begin to watch for the signs that I was getting tired of it, which were usually manifested in what is called "the blues" and kindred symptoms. This condition has been entirely overcome through Christian Science.

The work in which I have since been engaged, and which is not yet quite completed, covers a period of over four years, and is the hardest and most unpleasant work I have ever done. Christian Science has been my only help in its continuance, and it has besides broken many other phases of error for me. I used to be constantly taking medicine and was filled with fear, but the medicine has entirely disappeared and the fear is well along the same road. Love for my fellow-men is daily growing stronger, and I feel certain I am drawing nearer to that condition of mind where we shall all, individually and collectively, love our neighbor as ourselves. The promises of the Bible are constantly growing clearer and dearer and more reasonable, and I live in expectation of their daily and hourly fulfilment. This has all come through the study of the Bible and the Christian Science text-book, Science and Health, by Mrs. Eddy, and surely it is leading me into the right path.—EDGAR D. WILLIAMS, Cumberland, Md.

I wish to express my gratitude for what Christian Science has done for me. Three months ago I was taken very ill with severe abdominal trouble. A Christian Science practitioner was called in, and I soon began to improve, so that in a few days I was able to walk around. In two months I was entirely healed, and have had no return of the trouble since. I love to study the Bible and Science and Health, also the *Quarterly*. The daily study of the Lesson is a great comfort and help to me.

For this physical healing, together with the greater and higher spiritual uplifting I have received, I am most thankful to God, and to Mrs. Eddy.

MISS LOUISE ANDERSON, Los Angeles, Cal.

Digitized by Google

In the fall of 1906 I had a severe attack of throat trouble, having been subject to such attacks at more or less frequent intervals for several years before. In the particular attack referred to above, I asked a Christian Science practitioner of this city to treat me, which she kindly did, and in due time the aggravated symptoms began to abate, the inflammation and swelling which had been so severe leaving without the usual formation of an abscess. This I considered remarkable, in view of the fact that I had so strongly believed it would form as usual; hence I was and am yet very thankful for the efficient work which brought such good results. I have had no recurrence of this ailment since, for which I am also grateful, for the reason that it proves to me that the correct application of Christian Science will heal disease.—C. C. BARRICK, Canton, O.

For twenty-five years, previous to 1906, I was addicted to the use of alcoholic liquors, greatly to my detriment, morally, physically, and financially. Through the healing of my wife of stomach trouble of long standing, I became interested in Christian Science, and asked her practitioner for help to free me from this evil, as well as from the tobacco habit. In less than a week's time the desire for both had entirely left me, although my calling brought me in daily contact with both of these vices. The following August I fell four stories down an elevator shaft, which resulted in a very serious injury to the left ankle. The surgeon and all my friends predicted a clubfoot, or at best a stiff ankle, but through the faithfulness of our practitioner and the constant realization of man as the perfect child of God, the ankle and foot healed perfectly.

While I am indeed grateful for these physical benefits, I am more deeply thankful for the spiritual light that has come to my understanding, and the growing knowledge of what it means to be indeed God's child.

WILLIAM L. BALDWIN, Minneapolis, Minn.

About eleven years ago a copy of *The Christian Science Journal* found its way into our home. The testimonies of healing at once appealed to my mother, probably because we were all so much in need of it. At that time I was a child of nine. Every winter was a dread to us, as I would be ill from fall until spring, often being absent from school from four to six weeks at a time. I suffered from lung and stomach trouble, severe colds, etc. This particular winter, through reading the *Journal* and "Miscellaneous Writings" by Mrs. Eddy, my mother learned enough of Christian Science to know that man need not bow down before sickness, as a slave before his master. I had been sick in bed since fall and had a physician in constant attendance. There was no noticeable improvement, however, but on the contrary the sickness continued longer than usual.

There were then only a few in our city who were studying Christian Science, and as we had not heard about practitioners, we knew of no help to be had except by reading the literature. One day my mother, on the strength of her slight understanding of Christian Science, decided to dismiss the physician, who had been coming every day. She then told me I might get up, as she had read in the *Journal* that we did not need to be sick. I was only a child, and of course was delighted with the prospect of once more being up and active. I arose at once, and as I was very weak, at first it seemed hard to walk, but it was not more than four or five days before I returned to school perfectly well. Christian Science has not only healed me from physical ills, but it has also prevented sickness. For eleven years I have not taken any medicine, and during that time, if any illness has begun to make its appearance, it has soon been destroyed by applying the Principle of Christian Science as taught in our text-book, "Science and Health with Key to the Scriptures" by Mrs. Eddy.

As one goes on with the study of Christian Science the physical healing seems like a small thing when compared with the right understanding which this truth gives of all things. By following the rule of right thinking as taught in Christian Science I have seen harmony enthroned where discord had reigned; I have seen lack give way to abundance; and I have seen hate overcome and destroyed by Love. It is difficult to find words to express gratitude for that which is all-in-all to one, and my desire is to live continually my gratitude in daily deeds.

When thinking of our dear Leader, Mrs. Eddy, who has held the standard aloft through tempest and storm, I love to recall Jesus' words: "Verily I say unto you, Wheresoever this gospel shall be preached in the whole world, there shall also this, that this woman hath done, be told for a memorial of her."

NELLIE CHRISTINE NUMAN, Canton, O.

One night I went to bed in my usual health, but in the middle of the night I was awakened by a miserable feeling in my head and ear. I treated myself in Science and slept interruptedly until morning, when I discovered that I was entirely deaf in one ear, and was suffering acutely with a sense of numbness of the whole head. Many years previous to this, I had suffered during a long period from a catarrhal condition of the other ear, and was finally healed in Christian Science without the loss of hearing which *materia medica* had predicted. After breakfast I worked for my patients, and then went to the piano, but finding I could not hear a familiar and brilliant *etude*, I began to study carefully the Lesson-Sermon for the week.

I had recently passed through what I consider the greatest of human losses, and I had realized that I must make a better demonstration over the belief in death and separation. In the Lesson was this reference from Science and Health (p. 190), "This mortal seeming is temporal; it never merges into immortal being." I paused to consider these words, and at once the voice of Truth spoke clearly and reassuringly to me, telling of man's immortality in Spirit, God. Simultaneously with this, a sharp report, as of a pistol, was heard in my ear, and I was entirely free from the sense of deafness. I was overwhelmed, not only with the physical freedom, but with all that had been so suddenly unfolded to me. I saw clearly, mentally, that the only heaven there is, is here and now; and the only separation is in a different consciousness. I abandoned all plans for the day, wishing to abide by this high and sacred experience until it was mine, not to be forgotten nor lost. For a month, however, the physical healing was not entirely retained; one night the original suffering awakened me, but a prompt and short declaration of the truth preceded its final destruction. The sense of grief was by no means so quickly healed, but by reverting to the blessings of that experience I always found reassurance in "the law of Love" (Science and Health, p. 384).

This hearing of the word of God and being able to keep it at once and forever, is to me one of those "greater works" to which Jesus referred. I know that I have heard the voice of God, and my daily prayer has been that I might keep it, and profit by all it unfolded to me; never be tempted to waver or to look backward, nor be depressed in renouncing in my thought the loss of material objects of affection. The companionship in thought is never lost, nor changed but for higher proofs of God's love and care and presence. I have learned that in the truth no one ever suffers in vain. I only hope that this assurance which came to me from above will prove to some other a stepping-stone to spiritual comfort and joy.

MISS EDITH S. DARLINGTON, West Chester, Pa.

Digitized by Google

Too often in our greed to grasp more of man's divine heritage, to be made "every whit whole," we forget the blessings already received, and the rapid strides we fain would make are postponed until we become properly adjusted, more in tune with the design of wisdom, which has no taint of sensuous traffic. At these times of retrospection I recall with increased gratitude my first healing in Christian Science. I had suffered for fifteen years from nervous troubles, and for some time had not slept naturally. A sort of stupor, which afforded very little if any rest, was the only sleep I had.

At this juncture I began to read "Science and Health with Key to the Scriptures" by Mrs. Eddy, and in a very short time I became conscious of a great sense of love for Mrs. Eddy. This was not mere sentiment, for it was accompanied by a deep respect and admiration. I soon began to realize that this love was going out to others, and two or three old feuds which had disturbed me greatly were adjusted so naturally that the annoying incidents passed out of remembrance. I have since seen that I was taking my first step in reflecting love. I did not know how to do so before, but now it was all so natural and peaceful. I began to sleep the peaceful sleep of a healthy child. I had found rest, and the human need was supplied.

As the years have come and gone every problem that has confronted me has been entrusted to Christian Science for solution. When the storehouse has seemed empty and darkness and doubt have enveloped me, through faith and the understanding gained from Christian Science my vision has pierced the blackness, and I have found, as one of our hymns expresses it, a kind, loving Father, whose

> Tender love and watchful care
> Shall free thee from the fowler's snare
> And from the noisome pestilence.

Tonight, from the depths of my heart, I thank God for this revelation and the revelator.

MRS. MARY F. BALDWIN, Pueblo, Col.

Many times, when I have been depressed and discouraged, sometimes over trifles, or perhaps over heavier difficulties, the testimonies in the *Sentinel* and *Journal* have been the means of help and encouragement to me. I send this bit of my personal experience of the healing power and presence of divine Love, in the hope that it may in its turn reach some human need. Some five years ago I sought for help in Christian Science for serious bowel and female trouble of twenty years' standing, accentuated by extreme nervousness, and I was entirely healed of the organic trouble within a very few weeks. Since then I have gradually worked out of the nervousness, apprehensions, and general unrest, until peace of mind and health of body have been attained. This physical and mental healing has made of me a changed woman, and made of our dwelling a home! If there be any one who is discouraged as to the ultimate triumph of truth, or any one who is skeptical of the healing power of Christian Science, my statement of physical healing can be substantiated and I will willingly answer a direct inquiry.

I am very thankful to God for these blessings, and grateful to Mrs. Eddy for the help I have received.

MRS. MAY HARRIS, Mattoon, Ill.

In submitting this testimony of the benefits derived by myself from Christian Science, I do so with a desire to convey to others my heartfelt gratitude for the divine guidance that assisted me to my present state of health and happiness. Nine years ago I began to suffer with various ailments, and was continually under medical treatment. I was examined by many different physicians, who said I was a victim to female trouble. My eyes pained me severely, and I was told that the trouble was organic and could not be cured. I suffered greatly from a nervous affection, and by the frequent use of an opiate, which the physicians administered to alleviate my suffering, I was fast becoming a victim to the drug habit as a source of relief to my mental and physical condition.

The time and cost of Christian Science treatment was in marked contrast to the nine years of suffering and the considerable amount of money expended for medical treatment, as were also the results obtained. I am now in perfect health—thanks to Christian Science; have thrown away my glasses, and abandoned the use of medicine entirely. I could write pages in support of Christian Science, but will not trespass on the space further. I shall ever be thankful to God for the great blessings bestowed through Mrs. Eddy for the benefit of suffering human beings.

MRS. ISABEL WATHEN, Mineral Wells, Tex.

About eight years ago I had a fever which left me with a severe nervous trouble. I was taken South, and everything was done for me that could be done, but nothing seemed to do me any good. At last, after I had been in bed for three years, my mother consented to try Christian Science. The first time the practitioner came to see me I was in bed, the second I was sitting up, and the third I ran downstairs to meet her. I was healed in six weeks, and I am very grateful to God, and to Mrs. Eddy, for this truth which has done so much for me.

OLIVE RING, Louisville, Ky.

[Written for the *Sentinel*.]

THE EMPTY TOMB.

EVELYN GAGE KNIFFIN.

WHY weepest thou? whom seekest thou?
The Master gently said.
Why seek ye for the living Christ
Among the silent dead?
Ye seek for Life,—why seek ye here?
The grave is not the door;
I conquered death that ye might know,
And live forevermore.
Then cease to weep, to seek me here,—
Methinks I hear him say,—
The way to Life lies not through death:
The Christ is ris'n today.

Why weepest thou? whom seekest thou?
I hear him ask it still.
And some of us with Mary cry,
He died on Calvary's hill.
But lo, he's ris'n! he lives indeed!
And points the way for thee.
O death, where is thine anguish now?
O grave, thy victory?
He swept all finite barriers down,
Broke every bond of sense,
And stepped out from his rock-hewn tomb,
Clothed with omnipotence.

Why weepest thou? whom seekest thou?
Down through the ages ring.
Where, empty grave, thy victory?
Where, vanquished death, thy sting?
Then weep no more, and seek no more
For Life within the tomb;
There is no death! He's proven it;
The grave has met its doom!
So may the blessed truth sweep on,
Through every age and clime,
Till death itself is swallowed up
In victory sublime.

FROM OUR EXCHANGES.

[*Christian Register.*]

The currents of virtue in any community flow full and free only when they are fed by internal springs of right desire and virtuous aspiration. All progress, all excellence that rises above the legal level, all virtue that makes good laws possible and moral deportment seem excellent, come out of the hearts and minds of those who need no laws. Their external graces of manner and action, their readiness to serve the public, their quick sympathy with all who suffer, and their righteous indignation against all who oppress their fellow-men, come from internal sources and appear in the outer life only as they force themselves into expression in spontaneous action.

[*Christian World*, London.]

All this brings more and more clearly into view the supreme necessity of our age, and at the same time foreshadows a new coming of that reality which is to meet it. What we are now waiting for is a spiritual revival, which in the largeness of its outlook will fit our mental size, while its deeper content fills the soul. The need, when it has reached a certain degree of intensity, will bring in the supply. The history of mankind, the real history, is full of this; it is the story of the recurrent entrance of the eternal into time. The spiritual reality waits its opportunity, and does not neglect it when it comes.

[*London Christian Commonwealth.*]

Again and again has it been true that the deepest things of God are revealed to simple souls. Learning need be no detriment; it should be a great help; but learning alone does not bring the light. That knowledge of God which is life eternal cannot be got through the scientific text-books. It can be got without them. When the soul finds its own certainty it asks for no proof and it weighs no evidence. The more learning and the more science the better, but the greatest of all treasures is still within the reach of the unlearned and the simple.

[Rev. Walter Walsh in *Christian Work and Evangelist.*]

More luminously than ever is religion to be exhibited as the ministering angel of heaven, beneficent to all human wants; and as the fighting angel of a heaven which has enjoined men to work out their salvation. Many—and not the most foolish of their generation—are persuaded that religion alone can achieve the social reform which is generally perceived to be necessary; and that religion must herself be, to some extent, reformed, in order to fit her for the task.

[*Universalist Leader.*]

Punishment will last as long as sin lasts; no one can reach heaven through an evil life, here or hereafter; the effective deterrent in punishment lies, not in its duration, but in its certainty; the prime object of punishment is not the mere suffering of the guilty but the extinction of sin; the aim of Providence is not the misery but the salvation of the sinner; not the vindication of God but the creation of saints.

[*Christian Work and Evangelist.*]

Let us say again, that the church will not attract the attention of the world until it preaches and lives a religion and ethics far, far above the world's. It is that which is impossible to the world that has always drawn the world and always will.

SPECIAL ANNOUNCEMENTS.

FROM THE PUBLISHER OF MRS. EDDY'S WORKS.

THE CHRISTIAN SCIENCE TEXT-BOOK, "SCIENCE AND HEALTH WITH KEY TO THE SCRIPTURES."—This work contains many important changes and additions by the author, and also contains a photogravure portrait of Mrs. Eddy, together with a facsimile of her signature.

SOME OF MRS. EDDY'S WRITINGS IN NEW BINDINGS.—One volume containing Unity of Good, Rudimental Divine Science, No and Yes, Retrospection and Introspection; a second volume containing Christian Healing, The People's Idea of God, Pulpit and Press, Christian Science *versus* Pantheism, and the Messages of 1900, 1901, and 1902. These volumes are printed from new plates and are uniform in size with the pocket edition of Science and Health. Bound in morocco, limp, round corners, gilt edges, heavy Oxford India Bible paper. The prices of these books prepaid are as follows: single copy, $3.50; six or more copies of either volume to one address, each $3.25.

THE CHURCH MANUAL.—Containing all the By-laws of The Mother Church, The First Church of Christ, Scientist, in Boston, Mass. Each new edition of the Manual will have special notice in the *Sentinel*. Price, single copy, prepaid, $1; six copies to one address, $5; twelve copies to one address, $9.

Attention is called to the Library Edition of Mrs. Eddy's works, description and prices of which will be found on the outside cover page of the *Sentinel*.

Address all orders for books named above to ALLISON V. STEWART, Falmouth and St. Paul Streets, Boston, Mass.

FROM THE CLERK OF THE MOTHER CHURCH.

CHURCH TENETS.—The tenets of The First Church of Christ, Scientist,—The Mother Church,—printed on folded sheet for the use of Branch Churches of Christ, Scientist, with space for the names of churches and their by-laws, can be had at seventy-five cents per hundred.

Not less than one hundred are sold. Postage stamps are not taken for payment.

MEMBERSHIP.—Correspondence relating to membership with The Mother Church, and requests for blank applications for membership, should be addressed to the Clerk.

All correspondence and orders relative to the above should be sent to WILLIAM B. JOHNSON, Clerk, The First Church of Christ, Scientist, Falmouth, Norway, and St. Paul Streets, Boston, Mass.

FROM THE CHURCH TREASURER.

PER CAPITA TAXES.—Per Capita Taxes and Contributions to The Mother Church, The First Church of Christ, Scientist, in Boston, Mass., should be sent to the Treasurer. Please do not send currency.

Remittances for the above should be sent to STEPHEN A. CHASE, Treasurer, Box 56, Fall River, Mass.

FROM THE SOCIETY.

Attention is called to the announcement over our Leader's signature, which appeared in the *Sentinel* of Jan. 9, to the effect that Christian Scientists in the field who send four subscriptions to the *Monitor* for one year, will receive their own paper gratuitously.

Attention is called to the new Pamphlets, Reprints, and Music found listed in the advertising columns on the opposite page.

The Publishing Society requests that Reading Rooms and individuals when ordering *Quarterlies* will specify whether the large or small size is desired. This is necessary in order to avoid wrong shipments and consequent delays.

THE CHRISTIAN SCIENCE JOURNAL

FOUNDED APRIL, 1883, BY THE AUTHOR OF "SCIENCE AND HEALTH WITH KEY TO THE SCRIPTURES," MARY BAKER EDDY, DISCOVERER AND FOUNDER OF CHRISTIAN SCIENCE

This monthly Magazine is the official organ of The First Church of Christ, Scientist, in Boston, Massachusetts, and correctly represents the Christian Science movement. It contains interesting discussions of the teaching and the practice of Christian Science, and in addition to dissertations, lectures, and contributed articles, publishes always a number of reports from cases of spiritual and physical healing, which practically illustrate the redemptive work of Christian Science.

TERMS OF SUBSCRIPTION: Single copy, one year, $2.00. Quantities TO ONE ADDRESS: ten or more, each, $1.90; twenty-five or more, each, $1.80; fifty or more, each, $1.60. These rates apply in the United States, Canada, Mexico, and Cuba. In all other countries add forty cents for postage on each subscription. Six months' subscriptions received at half the above rates. No subscriptions received for less than six months.

TERMS OF SALE: Postpaid to any address: Per copy, twenty cents. Quantities TO ONE ADDRESS: ten copies, $1.70; twenty-five copies, $4.00; fifty copies, $7.00; in the United States, Canada, Mexico, or Cuba. To all other countries, per copy, twenty-five cents. Quantities TO ONE ADDRESS: ten copies, $2.10; twenty-five copies, $5.00; fifty copies, $9.00.

BOUND VOLUMES: Current year and two years previous, cloth, $2.50; half calf or half morocco, $3.00. On earlier volumes write for prices.

THE CHRISTIAN SCIENCE MONITOR

A daily newspaper of world-wide scope, particularly designed for those desiring a high-class publication in the home. It contains all the current news worth considering, all the departments of interest of a modern newspaper, illustrations of worthy features, and an unbiased editorial page which deals with the vital topics of the day. The MONITOR does not feature nor illustrate vice and crime.

SUBSCRIPTION PRICE: For the United States, Canada, Mexico, and Cuba, $5.00 a year, $3.00 for six months; all other countries, $8.00 a year, $4.50 for six months, postpaid. In the Greater Boston postal district the MONITOR will be delivered by carrier through the local news-dealer at the customary rate of 12 cents a week payable to the news-dealer. If delivered by mail $1.00 should be added to the annual subscription rate to cover extra postage.

The Christian Science Quarterly

Published January, April, July, and October

Contains the Lesson-Sermons which are read at the Sunday Services throughout the year in all the Christian Science churches. These Lessons, which present citations from the Bible and "Science and Health with Key to the Scriptures," are valuable for daily study.

TERMS OF SUBSCRIPTION: For one year, 50 cents; fifty copies or more to one address, 50 cents yearly for each copy. Foreign subscriptions, 60 cents. Yearly subscriptions only received.

TERMS OF SALE: One or more copies, postage paid, each, 15 cents; fifty copies or more to one address, each 12½ cents, postage paid.

Der Herold der Christian Science

Published Monthly.

A magazine printed in German, which publishes original and translated articles bearing upon Christian Science, and also testimonies of healing from Germany and America. It contains about thirty-eight pages of such reading matter, also the Lesson-Sermons which are read at the Sunday services in all the Christian Science churches, and is valuable as an authorized representative of the movement.

SUBSCRIPTION PRICE: For the United States, Canada, Mexico, and Cuba, 10 cents a copy, $1.00 a year in advance; all other countries, 12 cents a copy, $1.25 a year, postpaid.

PAMPHLETS AND REPRINTS

CHRISTIAN SCIENCE, THE RESTORATION OF PRIMITIVE CHRISTIANITY. A Lecture. By CLARENCE C. EATON. 29 pages.

CHRISTIAN SCIENCE: A REASONABLE AND RATIONAL VIEW OF ALL THINGS. A Lecture. By FRANCIS J. FLUNO, M.D. 37 pages.

CHRISTIAN SCIENCE: THE RELIGION OF THE BIBLE. A Lecture. By JUDGE SEPTIMUS J. HANNA. 23 pages.

CHRISTIAN SCIENCE: HUMANITY'S HELPER. A Lecture. By PROF. HERMANN S. HERING. This pamphlet is also printed in German. 29 pages.

CHRISTIAN SCIENCE: ITS ADVANTAGE TO MANKIND. By EDWARD A. KIMBALL. A lecture delivered in London. 47 pages.

CHRISTIAN SCIENCE: MAN'S DOMINION OVER EVIL. By EDWARD A. KIMBALL. A lecture delivered at Harvard University. 28 pages.

CHRISTIAN SCIENCE: ITS NATURE AND PURPOSE. A Lecture. By BLISS KNAPP. This pamphlet is also printed in French. 25 pages.

CHRISTIAN SCIENCE: DEMONSTRABLE RELIGION. A Lecture. By FRANK H. LEONARD. 31 pages.

CHRISTIAN SCIENCE: OR, DELIVERANCE FROM EVIL. A Lecture. By REV. WILLIAM P. MCKENZIE. 29 pages.

CHRISTIAN SCIENCE: THE CHRISTIANITY OF JESUS. A Lecture. By MRS. SUE HARPER MIMS. 28 pages.

CHRISTIAN SCIENCE: BOTH CHRISTIAN AND SCIENTIFIC. A Lecture. By REV. IRVING C. TOMLINSON. 36 pages.

CHRISTIAN SCIENCE: ITS PRINCIPLE AND METHOD. A lecture delivered in London. By BICKNELL YOUNG. 31 pages.

CHRISTIAN SCIENCE: ITS COMPASSIONATE APPEAL. Four articles reprinted from the JOURNAL. This pamphlet is also printed in German. 50 pages.

CHRISTIAN SCIENCE IS SCIENTIFIC CHRISTIANITY. A Lecture. By REV. ARTHUR R. VOSBURGH. 33 pages.

CHRISTIANITY IS SCIENCE, AND SCIENCE IS DEMONSTRABLE. A Lecture. By MISS MARY BROOKINS. 37 pages.

PROPHECY: FULFILMENT: REVELATION. By CHARLES ADOLPHUS MURRAY, Seventh Earl of Dunmore. 42 pages.

THE LOS ANGELES CASE. Testimonials given in Court as to the healing efficacy of Christian Science. 81 pages.

THE MINISTRY OF TRUTH. Five articles reprinted from the JOURNAL. This pamphlet is also printed in German. 50 pages.

PRAYER AND CONFIDENCE. Four articles reprinted from the JOURNAL. This pamphlet is also printed in German. 50 pages.

THE CHRISTIAN SCIENCE CHURCH. Its Organization and Polity. By CAROL NORTON. 38 pages.

PRICE: One copy or more, six cents; twelve copies to one address, sixty cents; fifty copies to one address, $2.25; one hundred copies, $4.00. Orders for above pamphlets may be assorted as desired.

PRICE: Ten copies, five cents, prepaid; one hundred copies, fifty cents; two hundred copies, seventy-five cents; five hundred copies, $1.75; one thousand copies, $3.00.

MISCELLANEOUS

BIBLES. Clarendon Brevier (01483 x), heavy faced, very distinct type, Turkey morocco, size 6 1-2 x 4 3-8 inches, corresponding in size and binding to pocket edition of Science and Health. Price, $3.75.
Morocco cases, to hold pocket Science and Health and above Bible, may be had at $1.25.
Text Bible. (01561 x). pica square type, Alaska seal, size 7 1-2 x 6 1-4 inches, 1 1-2 inches thick. Specially adapted for use of Second Readers. Price, $7.25.

CHRISTIAN SCIENCE AND LEGISLATION. A pamphlet of one hundred and twelve pages, containing articles by JUDGE CLIFFORD P. SMITH, EDWARD A. KIMBALL, and JUDGE SEPTIMUS J. HANNA, together with testimonies of healing, editorial comments, etc. Single copies, 10 cents; twelve copies to one address, $1.00; twenty-five copies, $1.85; fifty copies, $3.50.

QUARTERLY COVERS, in black seal leather. Regular size, 5 1-4 x 7 3-4. $1.25 each or $12.50 a dozen. Pocket size, 4 1-2 x 6 1-2, $1.15 each or $11.00 a dozen.

THE MOTHER CHURCH. By JOSEPH ARMSTRONG. A History of the Building of The Mother Church, The First Church of Christ, Scientist, in Boston, Mass. One hundred and three pages. Illustrated. One copy, $1.50; six copies, $7.00; twelve copies, $12.00.

PICTURE OF THE MOTHER CHURCH. A half-tone reproduction, size 12 x 15 inches, mounted on a white mat 21 x 25 inches. Single copies, 50 cents; a dozen copies to one address, $4.50.

SOUVENIR POST CARDS, showing picture of The Mother Church, 25 cents per dozen.

THE CHRISTIAN SCIENCE HYMNAL. Cloth, per copy, prepaid, $1.15 each; per dozen, $9.00; per half dozen, $5.00. Half morocco, per copy, prepaid, $1.40 each; per dozen, $12.00; per half dozen, $6.50. Full morocco, $2.50 each. Levant, $3.50 each. Pocket Edition, size 4 5-8 x 6 5-8. Full morocco. Per copy, prepaid, $3.00; twelve or more copies to one address, prepaid, each, $2.50.

MUSIC. Poems written by MARY BAKER EDDY and used by special permission, have been set to music, as follows:—

"THE MOTHER'S EVENING PRAYER." By William Lyman Johnson. The arrangement for both high and low voice in the same copy. 75 cents the copy; $7.00 the dozen.

"CHRIST MY REFUGE." By William Lyman Johnson. Arrangement for high and low voice in same copy. 75 cents the copy; $7.00 the dozen.

COMMUNION HYMN.—"SAW YE MY SAVIOUR?" By William Lyman Johnson. Published in two keys for high and low voice. 50 cents the copy; $5.00 the dozen.

"BLEST CHRISTMAS MORN." By Frederick W. Root. Published in two keys, for high and low voice. 50 cents the copy; $5.00 the dozen.

"O'ER WAITING HARPSTRINGS OF THE MIND." By Frederick W. Root. Published in two keys for high and low voice. 50 cents the copy; $5.00 the dozen.

Please state when ordering any of the three last named whether high or low key is desired.

REMITTANCES: Remittances should be made by post-office money order, express money order, or exchange on Boston or New York. Do not send exchange on Chicago, or other western cities. We shall esteem it a great favor if our coworkers throughout the Field will comply with this request. We ask that no money remittances whatever be made to the Editor or Editorial Department. Address all ORDERS and REMITTANCES for literature named above to

THE CHRISTIAN SCIENCE PUBLISHING SOCIETY

FALMOUTH AND ST. PAUL STREETS, BOSTON, MASSACHUSETTS

All orders for the works by Mrs. Eddy should be sent with remittance directly to Allison V. Stewart, Publisher.

Works on Christian Science

Written by MARY BAKER EDDY, Founder of Christian Science and Author of its Text-book

SCIENCE AND HEALTH WITH KEY TO THE SCRIPTURES. In one volume, 700 pp. Containing many important changes and additions by the author. THE ORIGINAL, STANDARD, and only Text-book on CHRISTIAN SCIENCE MIND-HEALING. This edition contains a fine photogravure portrait of Mrs. Eddy, together with a facsimile of her signature.

Price (cloth), single copy $3.18
Two to twelve books (cloth only) to one address, each 3.00
Twelve or more books to one address, each 2.75
Full leather, stiff beveled boards, gilt edges, same paper as in cloth binding, single copy 4.00
Twelve or more to one address, each 3.75
Morocco, limp, round corners, gilt edges, Oxford India Bible paper, convenient for pocket, single copy . . . 5.00
Twelve or more to one address, each 4.75
Levant, divinity circuit, leather-lined to edge, round corners, gilt edges, silk sewed, heavy Oxford India Bible paper, single copy 6.00
Twelve or more to one address, each 5.75

Orders for Science and Health in lots of twelve or more to one address may include any or all of the different styles of binding. The above prices are all prepaid.

MISCELLANEOUS WRITINGS—1883–1896. A book of 471 pages, containing articles published in THE CHRISTIAN SCIENCE JOURNAL since 1883, with revisions and additions.

Price (cloth), single copy $2.25
Twelve or more books to one address, each . . . 2.00
Morocco, limp, round corners, gilt edges, convenient for pocket, single copy 4.00
Twelve or more to one address, each 3.75
Levant, divinity circuit, leather-lined to edge, round corners, gilt edges, silk sewed, single copy 5.00
Twelve or more to one address, each 4.75

The above prices are all prepaid. Orders for Miscellaneous Writings in lots of twelve or more to one address may include any or all of the different styles of binding.

No discount will be allowed on orders for twelve books which include both Science and Health and Miscellaneous Writings.

CONCORDANCE TO SCIENCE AND HEALTH. This work contains about eighty thousand references (more than ten thousand words being indexed). It also contains an index to the Marginal Headings, and a list of the Scriptural Quotations in SCIENCE AND HEALTH. 607 pages, 10 x 7, and addendum, bound in cloth, marbled edges. Price, prepaid, single copy . $5.00
Twelve or more to one address, each 4.50

CHURCH MANUAL. Containing the By-laws of The Mother Church. Price, prepaid, single copy, $1.00; $5.00 per half dozen; $9.00 per dozen.

CHRIST AND CHRISTMAS. An illustrated poem.
Price, prepaid, single copy $3.00
Twelve or more books to one address, prepaid, each . 2.50

UNITY OF GOOD AND OTHER WRITINGS. One volume containing: Unity of Good, Rudimental Divine Science, No and Yes, Retrospection and Introspection, uniform in size with the pocket edition of Science and Health. Bound in morocco, limp, round corners, gilt edges, heavy Oxford India Bible paper. Price, prepaid, single copy, $3.50; six or more copies to one address, each, $3.25.

CHRISTIAN HEALING AND OTHER WRITINGS. One volume containing: Christian Healing, The People's Idea of God, Pulpit and Press, Christian Science *versus* Pantheism, Messages of 1900, 1901, 1902, uniform in size with the pocket edition of Science and Health. Bound in morocco, limp, round corners, gilt edges, heavy Oxford India Bible paper. Price, prepaid, single copy, $3.50; six or more copies to one address, each, $3.25.

UNITY OF GOOD. It lays the axe at the root of error, elucidating and enforcing practical Christian Science, thus affording invaluable directions for all true Scientists. Library edition, 64 pages, cloth binding, marbled edges. Price, prepaid, single copy, 65 cents; $3.00 per half dozen; $5.50 per dozen. Leather covers (pocket). Price, prepaid, single copy, $1.00; $5.00 per half dozen; $9.00 per dozen.

RETROSPECTION AND INTROSPECTION. A biographical sketch of the author. The way she was led to the discovery of Christian Science; its growth and fundamental idea. Library edition, 95 pages, cloth binding, marbled edges. Price, prepaid, single copy, $1.06; $5.00 per half dozen; $9.00 per dozen.

PULPIT AND PRESS. A unique work of importance in the history and to the readers of Christian Science; containing Dedicatory Sermon delivered at The Mother Church, and scintillations from the press of that occasion. 132 pages, cloth binding. Price, prepaid, single copy, $1.06; $5.00 per half dozen; $9.00 per dozen.

RUDIMENTAL DIVINE SCIENCE. An interesting and valuable book, containing a brief and concise statement of Divine Science, *alias* Christian Science, in the form of questions and answers. 17 pages. Leatherette covers, gilt top. Price, prepaid, single copy, 37 cents; $3.00 per dozen. Library edition, cloth binding, marbled edges. Price, prepaid, single copy, 55 cents; $2.50 per half dozen; $4.50 per dozen.

NO AND YES. A brief statement of very important points in Christian Science. 46 pages. Pebbled cloth covers. Price, prepaid, single copy, 27 cents; $2.50 per dozen. Library edition, cloth binding, marbled edges. Price, prepaid, single copy, 60 cents; $3.00 per half dozen; $5.50 per dozen.

MESSAGES TO THE MOTHER CHURCH. By Mary Baker Eddy, including Christian Science *vs.* Pantheism, and the Messages of 1900, 1901, and 1902. In one volume. Library edition, 94 pages, cloth binding, marbled edges. Price, prepaid, single copy, $1.56; $7.50 per half dozen; $13.50 per dozen.

CHRISTIAN SCIENCE *versus* PANTHEISM. The Pastor Emeritus' Message delivered at the Communion Season in The Mother Church in Boston, June, 1898. A clear and strong refutation of the charge that Christian Scientists are pantheists. 15 pages. Price, prepaid, single copy, 26 cents; $2.50 per dozen.

MESSAGE TO THE MOTHER CHURCH. The annual message of Mary Baker Eddy to The Mother Church on Communion Sunday, June, 1900. Leatherette covers, deckled edges. 15 pages. Price, prepaid, single copy, 26 cents; $2.50 per dozen.

OUR LEADER'S MESSAGE. The annual message of Mary Baker Eddy to The Mother Church on Communion Sunday, June, 1901. Deckled edges. 35 pages. Price, prepaid, single copy, 50 cents; $4.50 per dozen.

COMMUNION MESSAGE. The annual message of Mary Baker Eddy to The Mother Church on Communion Sunday, June 15, 1902. Deckled edges. 20 pages. Price, prepaid, single copy, 50 cents; $4.50 per dozen.

TWO SERMONS. CHRISTIAN HEALING and PEOPLE'S IDEA OF GOD. In one volume. Library edition, cloth binding, marbled edges. 36 pages. Price, prepaid, single copy, 60 cents; $3.00 per half dozen; $5.50 per dozen.

CHRISTIAN HEALING. A sermon delivered in Boston. 19 pages. Paper covers. Price, prepaid, single copy, 21 cents; $2.00 per dozen.

PEOPLE'S IDEA OF GOD. A sermon delivered in Boston. 14 pages. Paper covers. Price, prepaid, single copy, 21 cents; $2.00 per dozen.

FEED MY SHEEP. Words by Mary Baker Eddy. Music by Lyman F. Brackett. Price, prepaid, single copy, 50 cents; $5.00 per dozen.

Direct all orders for above works, and make remittances payable to

ALLISON V. STEWART, FALMOUTH AND ST. PAUL STS., BOSTON, MASS.

All orders for periodicals, or literature other than the above works, should be sent with remittance directly to The Christian Science Publishing Society.

CHRISTIAN SCIENCE SENTINEL

(THE CHRISTIAN SCIENCE WEEKLY)

PUBLISHED EVERY SATURDAY BY

THE CHRISTIAN SCIENCE PUBLISHING SOCIETY

Falmouth and St. Paul Sts., Boston, Mass., U. S. A.

ARCHIBALD MCLELLAN, Editor.

JOHN B. WILLIS, ANNIE M. KNOTT,

Associate Editors.

SUBSCRIPTION PRICE

Single copy, one year, $2.00.

Ten copies or more to one address, one year, each copy, $1.90.

Twenty-five copies or more to one address, one year, each copy, $1.80.

Fifty copies or more to one address, one year, each copy, $1.50.

These rates apply in the United States, Canada, Mexico, and Cuba. In all other countries add 50 cents for postage on each subscription.

Six-months subscriptions received at half the above rates.

No subscription received for less than six months.

Subscriptions to the *Sentinel* will be entered to begin with the first of the month, and will include all issues for the month named as expiration date on the wrapper. The receipt of the periodical by the subscriber will be our acknowledgment of the subscription.

TERMS OF SALE

Five cents a copy, postpaid to any address in the United States, Canada, Mexico, and Cuba. In quantities to one address: twenty-five copies, $1.00; fifty copies, $1.80; one hundred copies, $3.00.

To all other countries, six cents a copy, postpaid to any address. In quantities to one address: twenty-five copies, $1.25; fifty copies, $2.30; one hundred copies, $4.00.

Bound Volumes: Current year and two years previous, cloth, $3.00; half calf or half morocco, $3.50. On earlier volumes write for prices.

Entered at the Boston, Mass., post-office as second-class mail matter.

ITEMS OF INTEREST.

National.

The Assistant Treasurer of the United States Treasury has approved a plan for systematizing designs for United States notes and coin certificates which will embody the ideas of officials of the Treasury Department, bankers, business men, and currency experts. Under the plan adopted, all classes of notes of each denomination will carry the same portrait. The one-dollar silver certificate will carry the portrait of Washington; the two-dollar silver certificate the portrait of Jefferson; the five-dollar note, whether silver certificate or greenback, will carry the portrait of Lincoln; the ten-dollar gold and silver certificates and United States notes, that of Cleveland; the twenty-dollar that of Jackson; the fifty-dollar that of Grant; the one-hundred-dollar that of Franklin; the five-hundred-dollar that of Salmon P. Chase; the one-thousand-dollar that of Alexander Hamilton.

Reassessment of duties amounting to a total increase of $1,239,000 on sugar imported by the American Sugar Refining Company at the refinery of Havemeyer and Elder, between December, 1901, and November, 1907, have been ordered by Collector Loeb of the port of New York. The imposition of the increased assessments is a result of the trial of the case of the Government against the American Sugar Refining Company, which was recently tried in New York, in which the Government was awarded $134,000. The Government also claims that it has been defrauded of about $500,000 in duties on sugar weighed at the refinery of Havemeyer and Elder, in Brooklyn, and also of $500,000 in duties on sugar weighed at the Jersey City refinery, prior to 1901.

Under a bill introduced in Congress, the Secretary of Commerce and Labor is authorized to establish in each state where mineral deposits are known to exist in commercial quantities and where it will promote the development of mineral resources, a mining experiment station at which will be stationed an expert geologist and a chemist. Their duties will be to examine and assay all rock or earth submitted to them by any citizen upon the payment of a small charge, and to explore their immediate mineral districts.

To determine what changes should be made reasonably in the rates and methods of the New England Telephone and Telegraph Company, the Massachusetts highway commission during the past year has spent an appropriation of $30,000 in conducting a study of the company's physical valuation and traffic arrangements, and asks a further appropriation of $35,000 to complete the investigation. The results thus far show that the value of the physical plant in the commonwealth is $22,885,082.

The full bench of four judges of the United States Circuit Court, sitting at St. Louis, began hearing arguments last week in the important case in which the United States seeks the dissolution of the Standard Oil Company of New Jersey, involving an interpretation of many of the phrases of the Sherman Act.

The monthly statement of Government receipts and expenditures for March shows an increase in the customs and internal revenue receipts, though still about three million dollars less than for March, 1907. The total March receipts are $53,377,012.

The Supreme Court has decided that the Alabama state prohibition law is valid, all the judges concurring in the opinion. This is the second time the court has upheld the statewide act of the last Legislature.

A total expenditure of $800,000 is contemplated by the War Department in the construction of quarters and barracks for troops at the new army post in the Hawaiian Islands.

Upward of six hundred saloons and ten breweries will be forced out of business in the nineteen counties of Michigan which voted "dry" at last week's election.

According to a decision of Attorney-General Wickersham national banks will not be allowed to participate in state guaranty funds.

International.

German finances have excited particular attention this year from the fact that, from a country temporarily at a standstill industrially, it has been necessary to increase the revenues by about $50,000,000, chiefly on account of the growing naval armaments. The government scheme, which has been passed with slight modifications, provides that the federated states shall levy, for the benefit of the empire income, capital or "other" property taxes to an amount which shall not up to April 1, 1914, exceed $25,000,000 a year.

Preliminary preparations are being made for a round of state visits by the Czar of Russia to the Scandinavian capitals and possibly to London in the early summer. According to the plans, his majesty will leave in June aboard the imperial yacht Standart, escorted by a division of the Baltic fleet and torpedo-boats, and will go to Stockholm, Christiania, and Copenhagen, and perhaps thence to England, to return King Edward's visit during the past summer.

The contract for the construction of a railroad to connect Arica, Chile, with La Paz, Bolivia, has been awarded to a London firm. This line is to be a part of the Longitudinal Railroad. It will be three hundred miles long and will cross the Andes mountains at a height of twelve thousand feet above the level of the sea. It will cost in the neighborhood of $15,000,000.

France, in agreement with Great Britain and Russia, has concluded that there is no need of calling a conference of the signatories of the Berlin treaty to consider the Balkan situation. It is expected that this matter, as was the annexation by Austria-Hungary of Bosnia and Herzegovina, will be arranged by direct negotiations between the Powers.

The protocol which provides for the settlement of the differences arising out of the annexation by Austria-Hungary of the provinces of Bosnia and Herzegovina, and which was signed at Constantinople on Feb. 26, has been approved by the Turkish Chamber. Under it the Turkish government receives $10,800,000 indemnity.

By an agreement of England, France, Holland, Panama, and Colombia with the United States, Cipriano Castro, late president of Venezuela, is to be refused admission to any possessions of those nations in the West Indies. It is believed that he is plotting to regain his power in Venezuela.

President Diaz of Mexico, who stated at the last election that he would not again be a candidate for the office, yielding to the importunities of committees from every state, has decided to run again.

King Victor Emmanuel of Italy, and Theodore Roosevelt, ex-president of the United States, met last week and together viewed the ruins of Messina.

By 1912 England expects to have added to her extensive and costly armament eight new battle-ships of the "Dreadnought" class.

The Seventh International Congress of Applied Chemistry is to be held in London from May 27 to June 2 next.

The Servian government has notified Austria-Hungary of its willingness to negotiate a commercial treaty.

Industrial and Commercial.

The completion of the Pacific coast extension of the Chicago, Milwaukee, and St. Paul Railway, now known as the Chicago, Milwaukee, and Puget Sound Railway, creates a world's record for rapidity of railway construction. The length of the extension from the Missouri river to Seattle and Tacoma is a trifle over fourteen hundred miles. The first shovelful of earth was turned April 15, 1906. Since then sixty million cubic yards of material have been excavated, three hundred and sixty thousand yards of tunnel driven, twenty miles of bridges erected, and two hundred thousand tons of eighty-five-pound rails laid, at a total cost of $85,000,000. Ballasting will be completed about June 1, next. Freight and passenger service will be established soon afterward.

It is understood that the Baltimore and Ohio Railroad will soon be in the market for an immense amount of equipment, expenditures on this account being estimated as high as $10,000,000. Tentative plans have been prepared which call for six thousand to ten thousand steel freight cars of various types and a large number of heavy locomotives.

It is announced that efforts which have been under way for several months to consolidate about seventy-five of the independent fertilizer companies in the South into a $50,000,000 corporation have been virtually completed.

The passage from New York to Chicago by trolley is now possible, the connecting link having been completed last week. The route, however, is somewhat circuitous.

The estimated output of cement in the United States for 1908, though less than the previous year, amounts to forty million barrels.

Mexican transportation line officials declare that the Hawaiian sugar output this year will be the heaviest in its history.

The log cut on the Penobscot waters of Maine this winter will probably reach about two hundred million feet.

CHRISTIAN SCIENCE SENTINEL

"WHAT I SAY UNTO YOU, I SAY UNTO ALL — WATCH" JESUS

TRUE SOCIALISM.

SUE H. MIMS.

BECAUSE the brotherhood of man, as a correlative of God's fatherhood, is eternally and fundamentally true, the human mind for centuries has been spiritually aspiring toward a final demonstration of this grand fact. In an orderly process of unfoldment we find first the family life, then the hamlet, the town, the city, the state, the country. Hand in hand with these manifestations, however, are "wars and rumors of wars;" pride, ambition, conquest, oppression, tyranny, subjugation,—the reign of might and not of right.

Human history is a record of these struggles. Today a broader and wider philanthropy has reached a philosophic and even Christian socialism, in theory, at least, evincing splendid energy, noble and self-sacrificing toil, as Maurice, George, Kingsley, Fourier, have shown in striving for the betterment and uplifting of the poorer classes and added comfort for the working people. This leaven of loving ardor for Christ's kingdom must be the earth helping the woman, preparing consciousness for the grand hour when dawning truth will blaze the true way of attainment. In these human efforts good and evil still seem to be sadly mixed, as must ever be the case until the true basis is found, for side by side with the noble efforts of Christian socialism, red-handed anarchy, breathing hate and murder, lifts its hand of Cain to slay the brother. Christian Science, the divine interpreter, as Mrs. Eddy tells us, "with which can be discerned the spiritual fact of whatever the material senses behold" (Science and Health, p. 585), uncovers the error, reveals the divine way, and points to the ultimate attainment or demonstration of what is and ever was true.

When Mrs. Eddy, in her original and revolutionary way, declared the unreality and impersonality of evil, she gave a fatal blow to all evil in saying that it is "neither person, place, nor thing" (*Ibid.*, p. 71). For ages men have labored in vain to destroy evil on the basis of its reality, but when one learns in Christian Science to separate the evil illusion from the individual, and begins to prove its unreality, as "neither person, place, nor thing," since God is All-in-all, the only Mind, cause, creator of man and the universe, he lays the axe at the very root of all sin, discord, disease, death. As this truth is proven in our life-work, and the real, ideal man is seen to be entirely separate and apart from the seeming evil, and altogether lovely and lovable, the work of demonstrating the brotherhood of man is already begun on its true basis, and it is going on in Christian Science daily, hourly.

The Christian Scientist's own growth and success depend on the clearness with which he sees the line of demarcation between the real and the unreal, the absoluteness with which he beholds the brother free from the illusion of sin and disease; and this discernment of the perfect man heals today just as it did two thousand years ago. This glorious work whereby one may, in the words of St. Paul, "present every man perfect in Jesus Christ," is the only basis whereon to establish a successful and beneficent method of bringing about the kingdom of heaven on earth—the reign of righteousness here and now. This process heals sin, disease, and death; it destroys them by the understanding of God's allness, and man as the divine reflection or image of his Maker. In this glorious statement of God, and of man and the universe as divine reflection, we see how beautifully an old song illustrates the universality of God's affluent good—

> The moon looks
> On many brooks,
> The brook can see no moon but this.

Each idea, in its crystal clearness, may reflect the fulness of divine Love without robbing its brother, all sharing the same light and good.

Mrs. Eddy writes in Science and Health (p. 467): "It should be thoroughly understood that all men have one Mind, one God and Father, one Life, Truth, and Love. Mankind will become perfect in proportion as this fact becomes apparent, war will cease and the true brotherhood of man will be established." These great truths of perfect being, the fact of the one Mind that was in Christ Jesus (which we are admonished to have), with the correlated truth that if the one Mind is God, omnipotent, omnipresent, then evil can have neither power, presence, nor reality,—must be and are steadily progressing to their grand fruition.

The Mother Church with its spreading branches, which reach now to the remotest bounds of this habitable globe, is establishing as the church triumphant the spiritual democracy, or true socialism, whose head is Christ. It is gathering under its protecting wings the children of earth, who are freed from the fetters of materialism, and who rejoice in the glorious liberty of the "children of God," the "new-born of Spirit" (Science and Health, p. 35).

RIGHT THINKING AND ACTING.

EDWARD EVERETT NORWOOD.

THE basis of all Christian Science growth and practice is the great truth that there is but one Mind, who governs intelligently and harmoniously through spiritual law. Only as a practitioner is a channel for Truth and Love, expressing honesty, purity, patience, and intelligent mental activity, can correct healing be done. As desire is pure, thought clear, and purpose good, then in proportion to one's energy and persistent application will results be attained. The healing in Christian Science is thorough and exact because based upon Principle and law and caused by the irresistible and irrefutable impulse of divine Love, hence it cannot return void nor fail in its mission.

This law is the method of action of Mind,—the law of which Paul speaks as overcoming the (false) law of sin and death.—and as one is honestly fulfilling this law of love, doing justly, loving mercy, and walking humbly, each day records progress with increased blessings, for they are

Copyright, 1909, by Mary Baker Eddy.

Digitized by Google

legitimately earned. We have but to do our part in reflecting the one Mind, keeping thought free and clear of all limitation and fear, and trust God supremely, in order to reap the reward of righteousness, gain harmony and health and every good and perfect gift that belongs to the ideal man.

The truth of being is that God, ever-present and eternal good, is supreme—here, now, and always. The spiritual man reflects divine Mind; he expresses all that there is in this Mind; and as we identify ourselves with all that is pure, loving, and good (of which this Mind is Principle), we go through the transforming process spoken of by Paul, and gain our sonship, or spiritual identity, which seemed lost in the belief of material sense. This is the "only begotten" (begotten only) of the Father,—never of material sense,—"full of grace and truth." Nothing but right thinking enables one to do this work; and as it is honestly done, one can say with Job of old, "I know that my redeemer liveth;" for the mental power based on Mind and law, purified and illumined and rightly directed, is the "redeemer," or Christ, becoming operative and saving the individual from the sins of the world. The sins of the world are the various erroneous beliefs about God and man, the envies and jealousies, the passion and pride, the ignorance of God, with the resultant mental malpractice that would crush the consciousness of all who are on a human plane of existence. The world was really ignorant, in a great measure, of what this means, and certainly ignorant of any right method of overcoming evil until Mrs. Eddy pointed the way in Christian Science. She says in "No and Yes" (p. 12), "The essence of this Science is right thinking and right acting—leading us to see spirituality and to be spiritual, to understand and to demonstrate God."

The work in human consciousness of this spiritual or Christ-idea, is broadening, enlarging, and expanding all the time. As Isaiah says, "Of the increase of his government and peace there shall be no end," and there cannot be, for infinite progression logically follows its advent. But with this joyous progress or unfoldment there arises, or seems to arise, the argument of the undestroyed human sense, coming in the name of good, that would fasten itself to the divine impulse and deceive the elect. The Scientist must wisely protect his spiritual discernment, must uncover and destroy sin, both within and without. He must get spiritually to the place where, like Jesus, he knows what is in mortal man, and not commit himself, for in giving pearls to swine (the unprepared and unprotected thought) it turns and rends him. He must work continuously to locate good in thought, and this dislocates the error. He must be careful to cut himself off from inside and outside suggestion, else he might be confused and intoxicated by the mesmerism about him, the mental cross-fire that seems rampant in the general human consciousness; but God is All and Love is supreme, and fear is destroyed by intelligent reflection of good.

By right thinking we learn instinctively to deny the false arguments of discouragement, limitation, and fear. We know they are not true thoughts, and therefore no part of our true selfhood. The Christian Scientist sees the lack of wisdom in outlining or forecasting from a personal sense basis, and leaves all things to God, who doeth wisely and well. He ceases to fret himself because of evil-doers, and instead learns to hold all mankind in the right concept. He thereby sees error as impersonal, and meets the argument of self-pity, and the belief of martyrdom, or that he has much to meet in his spiritual growth. He learns to be patient in problems, both in people and conditions, he does not resent trials, nor go back and suffer anew in thought by indulging in a review of past mental environments. He learns also gradually to lose all faith in evil as person, thing, organization, or as any one's identity. By detaching or separating error from his concept of man, one divests it of all the power it claims to possess, for it can never live without a body. Only as we turn away from the personalizing of evil, from all human concepts or thoughts of people, human opinions, limitations, etc., can we get close enough to God to let the Word govern. As we do this, and free our thoughts of all mortal mind picturing, being filled with the divine energies of Truth and Love, the mental truth that reforms on a higher basis is seen in Mind, and then thought is pure enough to heal and uplift. As we lift up the spiritual idea in thought, we instinctively hold mentally the great fact that because divine Love is supreme and all, there can be no reality or law to any discord or disease, and our patients are quickly healed.

The Christian Scientist knows that the human hatred of Truth, expressed in fear, envy, hate, has no power; that no combination of mortal mind laws or thoughts can separate a child of God from his spiritual identity in Mind, nor interfere with the harmony of his being, because good is supreme. As our dear Leader says (Miscellaneous Writings, p. 334), "You must find error to be *nothing:* then, and *only* then, do you handle it in Science." The great need is to reform all who are ready and willing to be reformed, and we must make every demonstration through the intelligent understanding and application of spiritual law, which becomes operative in the pure and loving thought of the Scientist.

There is but one Mind, supreme, All and over all, ever and forever. Only that which is good and comes of God is the real and eternal, and the unreal and temporal cannot blind us to facts. If we resist the argument of error, it will flee from us. Thus it is that, when we cannot seem to see one step ahead, by holding fast to the truth the light comes, and there is a way of escape provided. So we must keep at it patiently, knowing that there is an end to everything but good, and do all we can to bring the reign of divine Love to human consciousness—the kingdom of heaven on earth.

PUTTING OFF THE "OLD MAN."

VIOLET KER SEYMER.

PRIOR to our study of Christian Science, most of us attempted to contend with and to reform the "old man," as the Scriptures term the mortal concept. Perhaps we were painfully aware of shortcomings in the flesh, of the weight of heredity, and we endeavored to make ourselves over again. If the struggle oftentimes seemed bitter and fruitless, it was because we were not working along sufficiently spiritual lines. Jesus said to Nicodemus that he must be "born again;" viz., that he must see man as a perfect and spiritual being, and not as an imperfect and mortal concept. Christian Science has taught us two great facts: firstly that the eternal likeness of God has never fallen to the level of mortality, and secondly that mortals "never had a perfect state of being, which may subsequently be regained" (Science and Health, p. 476). Christian Science enables us to see the nothingness of evil, while the truth becomes apparent to us; it likewise causes the error to be self-seen. Thus Christian Science brings hope and regeneration to the veriest sinner and to the most hopeless sufferer. In the ratio in which spiritual reality is unfolding before us, material falsity is receding, and those individuals who are striving to put off the old sense of man and cleave to the true one will find that a sense of peace and life is replacing their former sense of discord and death.

Suppose for a moment that a Christian Science practitioner were to embark upon a case, believing the patient to be a child of God upon whom the blight of sickness or sin has fallen, and that he then called upon God to heal

Digitized by Google

His own sick or sinful image: would not this be asking amiss? Humanity has been praying in this way for centuries, and losing heart because God did not answer. But suppose the Scientist should strive to realize that there has never been but one spiritual creation, intact in God's consciousness now, neither changed, added to, nor taken from, this prayer would be true, and the Scripture promise, "Before they call, I will answer," would be fulfilled. Reality was established before humanity appealed to God. Prayer in Christian Science is initiating its followers into the joy of putting off unreal beliefs, for self-distrust and discouragement are compelled to flee away when we work from the standpoint of the unchanged perfection of the spiritual man, the only man known to God, the only man known to the real men. Perceiving that spiritual man has never been in the slightest degree sick or sinful, how can we do less than put away the old concept of man just as completely as we are learning to put off the old and erroneous concept of God? We are not called upon to change either God or man. Our mental work, in reaching out after perfection, will hereby be at least as thorough and infinitely purer, for we shall be seeking to reflect Truth spontaneously.

Furthermore, this step out of purely personal problems comes to leaven our thought concerning those about us, our thought regarding the spiritual prosperity of the church we have joined, national conditions, and the bearing of Christian Science upon economic questions. It is probable that one who has constantly to be treating himself for some discord or other is in danger of becoming self-engrossed, whereas all around him "the harvest truly is plenteous, but the laborers are few." Instead of remembering our Leader's injunction to "hold thought steadfastly to the enduring, the good, and the true" (Science and Health, p. 261), we are too prone to watch evil and to dwell dismally upon the shortcomings of the old man, rather than with joy to look upon the divine image "which after God is created in righteousness and true holiness." John the Baptist, perceiving the immortal idea of God reflected in Christ Jesus, said of himself, as a material concept of man, "He must increase, but I must decrease."

The right metaphysical method of work brings God's blessings into fuller view, lifts each one mentally nearer to God, makes better practitioners and more responsive patients. In progressing after this manner, we are certainly not called upon to desert the post of self-examination, but there will be less personal effort and less fear in our vigilance, if we bear in mind that the old man is to be "put off" rather than wrestled with, and seek to find comfort in the fact that God's gift to man is the unlabored reflection of His allness.

THE PARTIAL AND THE PERFECT.

ROSEMUND GUERNSEY.

ST. PAUL tells us that "when that which is perfect is come, then that which is in part shall be done away." To spiritual sense the perfect is always present, and of necessity must be by reason of the unchanging law of divine Life and Truth, but to our finite human sense this perfect manifestation is ofttimes veiled from sight by the clouds of misconception, so that there appears to be present only that which is expressed in limitation, and which through the vagaries of blind chance may culminate at any moment in suffering and despair.

Could we, however, but read aright the events we deem so woeful, we would realize, when storms break over us and sweep away that which seemed so fair, that it is because these partial things have outlived their usefulness that they are done away, because we have grown to that point in the stature of Christ that we are able to look upon a more perfect concept without its effulgence blinding us. Not until that which is perfect is come, does that which is in part leave us. There is no void, no interval when we are without the sustaining power of Truth and Love to meet our present needs. Each blast of the storm but thins the mists around us. Perfection stands always behind the clouds of material sense, awaiting recognition. After gas was utilized as an illuminant, men put aside their tallow dips—not before. When wireless telegraphy is perfected, we shall abandon wires as a transmitting medium of sound. But there will not be, and never has been, any interval of inaction between the casting off of the old and the taking on of the new. The new is in force before the old goes, and the old is done away with simply because it is no longer of any use to any one. In the epistle to the Hebrews we read, "Now that which decayeth and waxeth old is ready to vanish away."

It is human nature to cling to the possessions of the moment, to linger in pleasant gardens, drowsily content, not realizing how this false sense holds us from man's true heritage as a child of God; or, half comprehending, lazily to resolve on action at some future period. Fortunately for our ultimate attainment the matter is not left in our hands. Truth, lovingly watchful, knows when to advance us to the next step in our progress toward our Father's house. Says Mrs. Eddy, "When this hour of development comes, . . . spiritual Love will force you to accept what best promotes your growth" (Science and Health, p. 266).

It is the nature of material conditions to change suddenly, as they are without fixed law. Without warning we are called upon to face new problems, and we ofttimes struggle with a sense of loss and fear, as we seek to adjust ourselves to the changed conditions. Should we not rather take up the new tasks with joy, knowing that the passing of the old is divine evidence that a new and higher is to come? When we realize this fully, no untoward circumstance can have the power to cause us one moment's suffering or regret. It can but open our consciousness more clearly to the ever-presence of divine Love, which in its great storehouse has always at hand greater, truer, and more beautiful treasures than the feeble substitutes we foolishly look back upon or would recall.

As we then turn with a glad full-heartedness to the fresh chapter in our life journey, we presently begin to note the brightening light about us, and so advance into the fuller realization of the true world as God created it for all His little ones, in which all things move in accord with the one central will, the will of Truth and Love, that has never aught but joy and peace and abounding supply for all, right here and now. Then, in the fulness of time, we shall learn the great world-truth that all which is good abides forever, and can never be lost to man for an instant, and that the seeming loss of any possession of condition serves instantly to prove it a false condition, and to show the true behind it.

FREEDOM FROM SENSE-THRALDOM.

MARIE F. SMALLEY.

PAUL said, "The carnal mind is enmity against God," and this fleshly mind is manifested in the pleasures and pains of sense. In this dream of life in matter our enjoyment and suffering are largely contributed by the senses; thus one who is bound in this dream-slavery vacillates between a state of joy and the depths of misery—the permanent peace which Christ Jesus promised is unknown to him.

It may seem to us that this carnal mind is productive of good when all is going as we would have it, and we are enjoying life, as we say; but when as a later development

Digitized by Google

appear disappointment, weariness, misfortune, or some other evil, we at last perceive, when we have suffered sufficiently, that what does not result in good cannot be good. Then, having tried in vain by various means to throw off our shackles, and looking merely for freedom from present ills, we turn to Christian Science. We learn in the Science of being, through the channel of Mrs. Eddy's irresistible logic and irrefutable proof, that God is good and All-in-all, the one Mind, and not the fountain at the same time of bitter waters and sweet, and we begin to realize the unreality of sense testimony and are healed.

When we experience pain or any seeming inharmony through these senses, under the authority of Science we reach out eagerly for freedom, eradicate the discomfort by knowing the unreliability of the corporeal senses, and affirming their falsity in view of the facts of being; but on the other hand, when our dream-life is flowing along like a song, and we for the moment are reveling in the fleeting pleasures of matter and the erstwhile welcome sense testimony, does the thought come to us just as quickly to blot out this sweet sensation, to free ourselves from sense bondage, declare the pleasure unreal because manifestly not of Spirit, God? No! emphatically no!

We all want the good, because it is pleasant and brings peace and harmony; and that is a right desire, for harmony is the law of being, natural and right, and we are told that we need not look beyond the skies for heaven (harmony), since it lies within and around us, and nothing but what is pure and fair and beautiful can enter there; but we must have constantly before our minds that only in the allness of Spirit is there good, and that not only is the evil in matter unreal, but that there is also absolutely no good in matter. The thought for realization is not so much that there is no pain, as that there is no substance in matter; God, Spirit, is absolutely All-in-all, omnipresent, infinite; and clearly there can be nothing outside or beyond Him.

It is only by holding in consciousness the fact of being that we can be entirely free and secure from the aftermath of bitterness which surely comes from worshiping the seeming pleasures of sense as gods many. We must yield absolute allegiance to the one Mind, Spirit. We must apply to Principle not only in time of suffering, but constantly "stand porter at the door of thought" (Science and Health, p. 392), and watch even more when the senses give their deceivingly pleasant testimony, for it is only by being wholly faithful and obedient that the fulness of Life in all its completeness and satisfying perfection can be attained.

As the leaf and blossom unfold under the warmth of the sun, so the warmth of divine Love, flooding our consciousness, brings forth the fruit of Spirit, which is "love, joy, peace, longsuffering, gentleness, goodness, faith, meekness, temperance;" but we must remember that these are not the fruit of the carnal mind.

THE PUBLISHING HOUSE BUILDING FUND.

Contributions to the Publishing House Building Fund should be sent to Stephen A. Chase, Treasurer, P. O. Box 56, Fall River, Mass. These contributions will be thankfully received and promptly acknowledged.

ADMISSION TO MEMBERSHIP.

The next admission of candidates to membership in The Mother Church will be June 4, 1909. Applications should be in the hands of the Clerk on or before May 12, 1909. Application blanks may be had by addressing William B. Johnson, C.S.D., Clerk, at the church edifice, Falmouth, Norway, and St. Paul streets, Boston.

[From *The Christian Science Monitor.*]

"THE STILL SMALL VOICE."

Evidence that Christian Science has a practical value in reformatory and prison work has recently come to light through a letter received by Mrs. Mary Baker Eddy from Rudolph Knur, a beneficiary of Christian Science in the state prison at Canon City, Col. The letter is written on the official paper of the prison, and reads as follows:—

Name.	Name.
Rudolph Knur.	Mary Baker G. Eddy.
Register No. 6228.	Street Number.
Canon City, Colorado;	Chestnut Hill.
April 4th, 1909.	City, Brookline.
	State, Mass.

Mrs. Mary Baker G. Eddy, Brookline, Mass.

Revered Leader and Benefactress:—About to be released on parole from the state prison of Colorado, where I have been justly imprisoned for the past five years for a crime of dishonesty, I cannot refrain from telling you how much the study of your invaluable book, Science and Health, has done for me, in that it has been the means of turning me from a life of sin and so-called pleasure to a life of love and righteousness.

The study of your book has created in me a desire to live a noble, pure, and upright life. At various times in my life I have had such a desire, but could not and would not listen to "the 'still small voice' of Truth" (p. 323) calling for a better and purer existence. The religious teachings of my youth only tended to make me fear the God presented to me. How different is the God of Christian Science. Three years of the study of Christian Science enables me to understand, in a small way, your inspired definition of God as found on page 465: "God . . . Mind, Spirit, Soul, Principle, Life, Truth, Love." Life is God, and God is good. I am deeply grateful to God, and to you, to be able to say in all sincerity of purpose that I have entered upon a spiritual evolution which enables me to demonstrate that "Life is eternal" (p. 246).

Prior to coming into Science, I flattered myself in having an ideal, consisting of a desire to accumulate, by fair means or foul, the means to spend a riotous life. Thanks to the divine Principle which changeth all things, I shall leave my penal servitude in the positive assurance that by "walking in the pathway of Truth" (p. 487) I shall be able to refrain from indulging in habits at once degrading and repulsive. "Get thee behind me, Satan." Passion, hatred, and revenge are henceforth supplanted by that divine Principle which is Love. I would not, however, overlook the important fact that only by continued practice of the truth can perfection be attained.

It shall be the effort of my life so to live as to become a positive influence for good to all with whom I come in contact, not failing to realize that the path is narrow, yet under the shadow of the almighty, infinite wisdom I cannot fail. Conscious of God-given power, success must follow.

I am glad to refute the advanced theory of criminologists that after indulging in crime for a length of time the criminal becomes tired of his mode of life. Thanks to the understanding I have of the Science of being, I am tired of this so-called life, not because it brings with it such dire consequences, but crime and sin are now repulsive to me. I find no pleasure therein.

For this and much more, revered Leader, I am deeply grateful. It shall be my continued effort to follow the words you so fitly used in your message, dated March, 1899: "Keep your minds so filled with Truth and Love, that sin, disease, and death cannot enter them."

Digitized by Google

I could write forever on this glorious subject, but will content myself by saying, God bless you. Love will guard you. Principle will guide you.

I conclude by saying that the church at Canon City is doing a great work at the prison. The services and the distribution of literature prove helpful and an incentive. God—good—will bless them for it.

"God's will is done: His kingdom come.
The Potter's work is plain.
The longing to be good and true
Has brought the Light again."

God bless you, is the prayer of yours in love and truth,

RUDOLPH KNUR.

Colorado State Institution, Canon City, Col.

[Karl Knudsen in the *Onlooker*, London, Eng.]

It is obviously necessary to approach this subject from the point of view of one who has observed and experienced physical healing by spiritual means, and who stands before the question, "What next?" He sees that Christian Science cannot remain simply a means of ridding oneself of discomfort and pain. On page 150 of Science and Health it is stated: "The mission of Christian Science now, as in the time of its earlier demonstration, is not primarily one of physical healing."

What is called "religion in business" is generally viewed with suspicion, and yet among those who make little or no profession of religious belief one meets with an amount of manly honesty, generosity, and kindliness which contradicts the lamentations about the special wickedness of latter-day business life. Why this suspicion of the profession of religion while engaged in the conduct of business? Partly, of course, because it has so often served as a cloak; but chiefly, I think, on account of the supposed impossibility of applying the Sermon on the Mount to practical business. Many professing Christians tacitly, if not audibly, admit this, and draw a distinct line between their business and their religious life. Henrik Ibsen has caricatured this exclusion of one's religion from being an active influence upon the conduct of business in his study of human character represented by Peer Gynt. Peer had been carrying on a lucrative trade in idol-images to China, and tried to balance his account with God by sending out missionaries to checkmate the images. It is the old story of making religion a belief in a future-world salvation typified by the question of the Pharisees: "Is it lawful to heal on the sabbath days?" They did not see that the healing of all manner of discord, sickness, poverty (witness the feeding of the multitude), and death was not only the inevitable result, but also the requisite proof of the truth of the religion preached by Jesus of Nazareth, and which he promised should make men free. The Pharisees had reduced religion to a set of doctrines without vitalizing power.

The Bible promises, to those who believe, that they shall receive power to overcome discord in the way Jesus did. Christian Scientists interpret the word "believe" to mean "understand." Failing to find in the orthodox churches a religion which would meet the demands of a logical reading of the Gospels and the demands of their sense of justice, many business men prefer what is called "a religion of their own" to a halting acceptance of the teachings of the Bible. Now it cannot be gainsaid that Christian Science, with all its seeming paradoxes, has given to many men of affairs, often acknowledged agnostics, a religion that satisfies their need. They have found that it sheds a new light on the Bible, revealing it as being the history of the gradual dawning upon the human mind of a knowledge of that ever available law of the universe which not only heals the sick, but will solve any and every human problem. While striving to gain a knowledge of this law, they find that the appellation, "Science," is not only justified, but is, in fact, the only word that is adequate. They find that Christian Science removes the antagonism between natural science and the Bible, and that it does, in fact, give them a far more intelligent understanding of the phenomena of the material universe than they had previously possessed.

Having seen disease healed as being merely a phenomenon of erroneous thinking, a false conclusion from false premises, the business man quickly perceives that the same remedy must be capable of similar results when applied to all those discords of the world of business which spring from the same source. His business becomes his patient; he realizes that it is the index to his state of mind, not the other way about. In "Major Barbara," the rich manufacturer, Andrew Undershaft, is made to say that the power which drives him and his business is "a will of which I am a part." Such doctrines make man the creature of circumstances and far removed from that man to whom was given dominion over the whole earth. They make God responsible for laws which are blind in their action, cruel in results, and would make man "more just than God." Christian Scientists have found that it is not inexorable circumstances which defile mankind with poverty, failure, worry, disease, and like afflictions, and make them the victims of dishonesty, avarice, and hatred; they have found that Jesus spoke the literal truth when he said: "Not that which goeth into the mouth defileth a man; but that which cometh out of the mouth, this defileth a man."

The remedy must be applied within to one's state of mind, and circumstances will change with it. How often have we not said that honesty is the best policy, but until Christian Science revealed it we have not recognized that honesty, justice, mercy, ceasing to consider another man's gain a loss to oneself—in fact, all unselfishness—are a powerful defense against dishonesty, injustice, greed, and kindred evil. As a man "thinketh in his heart, so is he;" that is, the thoughts, fears, and motives which he harbors, he will see manifested in those surroundings which go to make up his life. The Norwegian proverb, "As you shout in the forest, so will you be answered," expresses the same thought.

It is a common misconception that Christian Science promises to make rich; nothing could be farther from the truth. Christian Scientists agree with Andrew Undershaft that there is no virtue in poverty, and that it is a disease; but they do not forget the warning about the uselessness of hoarding up treasures upon earth. All that they claim is, that it is unnatural and wrong to lack those things which are needful to enable us to fill our own niche in life; and they claim that only erroneous thinking and fear can be the cause of such lack. This reconciles such seemingly contradictory statements in the Bible as these: "Seek ye first the kingdom of God, and his righteousness; and all these things shall be added unto you;" and, "The kingdom of God is not meat and drink."

In his first faltering attempts to apply the Principle of Christian Science to his every-day affairs, the business man is often surprised by suddenly discovering that some long-standing cause of petty worries has disappeared. On reflection he finds that something in himself has changed; the fear of being worried by that particular thing has gone, with the inevitable result of the disappearance of the trouble. This spurs him on to further effort, because he cannot avoid seeing that that which is true in part must be true also in regard to all the varied manifestations of material existence.

[C. R. Munro in *Hamilton* (Ont.) *Spectator*.]

The statement of our reverend critic, that the teachings of Christian Science are "philosophical nonsense," can

Digitized by Google

best be answered by referring the gentleman to the works that are daily being accomplished by this Science, the healing of all forms of functional and organic diseases, and the reforming of the worst cases of sin and of depraved appetites and passions, works which he could easily have seen for himself in his own city of Toronto had he taken the trouble to investigate. These works were what Jesus said should follow those who believed in him,—that is, understood his teachings,—and the fact that these results are today being brought about through the Christian Science interpretation of the Master's teachings proves this interpretation beyond a doubt to be the true one.

Every statement of Christian Science is based on the Scriptural teaching that God is Spirit and that God is All, and if the teachings of Christian Science are philosophical nonsense, then it logically follows that Jesus' teachings were alike philosophical nonsense, a conclusion which our critic would scarcely care to accept. The fact that Christian Science enables those who understand it to apply practically the commands of Jesus, in the way he commanded, is the best proof that it is not philosophical nonsense, but the practical fulfilment of the Master's express commands.

["Civitus" in *Portland* (Ore.) *Journal*.]

In a recent issue of the *Journal* I read a report of a paper given to the Ministers' association by Dr. ———, in which he evidently misinterprets the teachings of Mrs. Eddy and Christian Science. I am not a Christian Scientist, but belong to an orthodox church, as they are called, but I believe in all fairness the doctor should allow Christian Scientists to explain their tenets, as they do in all their meetings and publications. The willing ear given his paper will neither help nor hinder the truth.

What little I have read of Christian Science has greatly helped me in religious life, and particularly the teachings in regard to prayer, to which the doctor takes so much exception. Fruits are the best evidence of proper teaching, and the contrast between the large congregations of the Science churches and the empty pews to which the doctor has been preaching for the past few months is a sufficient proof.

[J. V. Dittemore in *Ithaca* (N. Y.) *News*.]

In his recent interesting address on "The Church and Mental Healing" the reverend critic is reported as pointing out as "a defect of Christian Science" that it does not recognize sin or evil. Such a statement does not make clear the teaching of Christian Science on this subject. Sin and evil of every kind are stern realities to human experience, but they can have no real or permanent existence without being embraced in the consciousness of God, and hence being infinite and eternal, in fact a part of Deity. All evil is in human thought, and will disappear into its native nothingness in proportion as mortals "put off the old man" and put on that Mind "which was also in Christ Jesus."

Christian Science proves man's dominion and the ever-present availability of true Christianity in the overcoming of all that is unlike God, who is infinite good.

[Frederic C. Hotchkiss in *Danbury* (Conn.) *News*.]

Christian Science is essentially a practical religion—a religion of common sense. Christian Scientists dwell on the spiritual instead of the material, because man progresses by thinking of what he wants to be, instead of keeping his thoughts on what he is striving to outgrow. They do not claim to have gone farther than did Jesus in their demonstration over food and clothing, but rather thank God that they are approximating a more normal condition, where they can eat and digest the food that is set before them. They are bringing into their experience better conditions right here and now, instead of waiting until after death.

Every system of healing should stand on its own merits, and thousands of families give willing testimony to better conditions under Christian Science practice than they formerly experienced with material methods. It would be worse than folly to urge the blind who have received their sight, to close again their eyes to the light, or try to convince one who was once dying and has been restored to life, that God did not heal through the "effectual fervent prayer of a righteous man,"—through the ministration of divine Love. "Why should it be thought a thing incredible with you, that God should raise the dead," or heal the sick?

[Algernon Hervey-Bathurst in the *Onlooker*, London, Eng.]

Some nineteen centuries ago "the most scientific man that ever trod the globe," as Mrs. Eddy says on page 313 of Science and Health, was teaching the multitudes who "heard him gladly" on the shores of the Galilean sea and among the Judean hills. This great man, who has rightly been termed the Master, shattered the beliefs of ages, reversed so-called laws, overcame the law of gravity, and relied in no way at all on the testimony of the physical senses, but proved that evil, failure, limitation, sin, sickness, death, fear, are not created by God, have no true existence, but are the outcome of the mortal belief in some power equal to or greater than God. Today the world is again being roused to a true understanding of the teachings of Jesus the Christ.

The knowledge or science of this Christ-teaching has been termed Christian Science. As is well known, Mrs. Eddy, the author of the Christian Science text-book, "Science and Health with Key to the Scriptures," is the Discoverer and Founder of Christian Science, and, as is perhaps almost equally well known, she has from her childhood been a deep and earnest student of the Bible, and rediscovered this great truth in its sacred pages. Christian Science is nothing new; there is nothing that can compete with Christian Science with respect to age, for it has been from all time. Truth has ever been, and it is the truth that has been revealed through Christian Science.

Today Christian Science is reiterating the teachings of Jesus, and with "signs following." As already pointed out, Jesus overcame evil in every form, whether manifested mentally, morally, or physically. If, then, Christians are to follow his teachings, clearly they must also overcome all evil. If we endeavor to unravel this "mystery" of the overcoming of evil, it becomes, however, no more of a mystery than is the "mystery of godliness." It is clear that godliness includes no evil. The more Godlike, therefore, a man is, the less he knows of evil. Jesus, who, as we read on page 364 of Science and Health, has been "rightfully regarded as the best man that ever trod this planet," was so clear as to the truth about God and His creation, and that in it was no sin, suffering, or discord, that he successfully healed sickness, reformed the sinner, and raised the dead; and to his followers for all time he said in language of unmistakable clearness, "He that believeth on me, the works that I do shall he do also." Christian Scientists have learned, through the faultless logic and profound simplicity of the teachings of Mrs. Eddy, that it is far from being presumption for mankind to do the works Jesus told them to do; it is their duty and privilege to do so. And Jesus never taught his followers to be harsh or impractical; he taught by his own example that, unless we reflect love, sympathy, and human affection, we can do little to lift the load of sorrow, sin, or sickness from those hungering for that

Digitized by Google

peace which the world cannot give. There are among us today many who, having experienced the healing power of Christian Science and not yet understanding how it is accomplished, say, with gratitude, in the words of the blind man healed by the Master: "One thing I know, that, whereas I was blind, now I see."

The healing of sickness, discord, or sin in Christian Science is not achieved by manipulating the human mind in any way, it is a spiritual understanding of the one God, "who forgiveth all thine iniquities; who healeth all thy diseases," the one perfect cause or creator, and man, as His image and likeness,—dependent, that is, in no sense on matter, the so-called material senses, or mortal mind, but dependent on and reflecting the one Mind or God. The apostle's injunction, "Let this mind be in you, which was also in Christ Jesus," applies to all mankind, and Christian Scientists are proving that to the extent they follow this injunction, they apprehend the truth which Jesus said "shall make you free."

The knowledge of this truth does not include any mighty struggle with evil as a powerful entity; it entails the spiritual understanding of God as omnipotent good, and a willingness to trust to His omnipotence, not in one instance, in certain circumstances, but at all times and in all ways, for it is through a practical understanding of the all-power of good alone that the belief in evil can be destroyed. A mistake can only be corrected by knowing the truth about it. The belief that three and three make seven can only be corrected by knowing that the sum of the two numbers is six. So with the belief in sin, sorrow, suffering, want, and misery; it is healed to the extent that we understand that the same fountain cannot send forth both sweet and bitter water, by realizing that the one Mind or God is supreme, infinite, omnipotent, and omnipresent good, that He made all that was made, and made that perfect. In the face of that understanding, the testimony of the physical senses stands for nothing more than it is, an illusion, the opposite of truth, a falsity.

There is nothing mysterious, nothing unnatural in the teachings and practice of Christian Science, and, thanks to the glorious, practical message it has given to humanity, the commands of Jesus are again being declared in every Christian Science church throughout this and every land, with "signs following." Critics may confound its teachings with the teachings of mesmerism, hypnotism, will-power, suggestion, and the like, but the facts cannot be altered, the tree will still be known by its fruit, and those who seek its protection and shelter will not seek in vain.

[Albert E. Miller in the *Public Ledger*, Philadelphia, Pa.]

The physical healing effected through Christian Science is in a sense secondary to the main import of this teaching, because Christian Science seeks primarily the moral regeneration of those who adopt its plan of human betterment. Through the study of Christian Science it is found that the basis of all diseases is in the conscious or unconscious indulgence in sin, and the patient and loving effort to get rid of the sin and its effects involves the cure of the patient. In fact, this is so clearly shown to be the operation of the cure that one is almost tempted to employ the chemical term "by-product" in defining the result of this metaphysical operation. It is significant that the public interest aroused by the splendid achievements of Christian Science reformation and cure has led to the establishment in recent years of a number of systems which would claim the "fame tho' not the name" of Mrs. Eddy's unselfish labor. This cannot be, and those who are lax in giving credit to whom credit is due violate the basic law of honesty, without which nothing can be accomplished in the line of right.

AMONG THE CHURCHES.

PORTLAND, ORE.

The plans for the building to be erected by First Church of Christ, Scientist, on the half block on Everett street between Eighteenth and Nineteenth streets, were prepared by S. S. Beman of Chicago, and show a building of the classic style of architecture, which differs from that of any other building in the city. The basement for the church, which was finished last year, covers an area of eighty-two by one hundred and fifty-four feet and will be used for Sunday School purposes.

On the first floor of the building there will be three double and two single entrances from Everett street leading to the vestibule, which enters into the foyer. This foyer is twenty feet wide at the narrowest part and then spreads out over the full width of the building. On the next floor will be the auditorium, which covers an area of sixty-five by one hundred and fifty feet and will undoubtedly have the largest seating capacity of any church building in the city. This auditorium will be inclined toward the pulpit and ample room will be left for aisles. Fifteen hundred people can be comfortably accommodated with seats. There will be no galleries. The pews are to be of hard wood and the interior finish of the church is to be plain and massive, no carved work or extensive decorations being used. The dome arising over the central part of the building will probably be the largest in the city, measuring fifty-two feet across the interior. In the center of the dome will be a skylight, with a "sunburst" in the ceiling. The building is to be of brick, with outside facing of oolitic limestone furnished by the quarry at Salt Lake City, Utah.

General construction work will start as soon as the stone commences to arrive, and it is the expectation to have the building completed within fifteen months. The estimated cost is $100,000.—*Daily Abstract.*

ORANGEHURST, CAL.

Christian Science services were held for the first time in this place Sunday [March 14], at a private residence. It is expected that a church building will be erected and a regular church organized during the year. There were nineteen persons present at this first meeting. The town of Orangehurst is not yet a year old, and the establishment of a church at such an early date speaks well for the community. So far as known, it is the first instance where a Christian Science church was the first to be established in a community, and to that extent it is a matter of public interest.—*Visalia* (Cal.) *Times.*

ROCKY FORD, COL.

The Christian Science Society in Rocky Ford was organized only a few years ago. The membership was small and the growth has been slow, although the Christian Science movement has spread with remarkable rapidity all over the world. Many wonderful cases of healing have taken place in Rocky Ford, and during the past few months the growth of the society has been very marked, until now their room in the Hagen Block is filled every Sunday to overflowing. The organization is looking for a ground-floor location and expects to purchase a lot at an early date on which to build a church edifice. We are glad to note the growth of this organization.—*Rocky Ford Enterprise.*

CHRISTIAN SCIENCE SENTINEL

EDITORIAL

MRS. EDDY TAKES NO PATIENTS.

The author of the Christian Science text-book takes no patients, and reads no letters on disease, distress, or error of any kind. Reliable news concerning Mrs. Eddy will be found in the Christian Science publications.

RELIGIOUS FREEDOM.

Box G, Brookline, Mass., April 12, 1909.
Christian Scientists in Concord, N. H.

Beloved Brethren:—Allow me to send forth a pean of praise for the noble disposal of the legislative question as to the infringement of rights and privileges guaranteed to you by the laws of my native state. The constituted religious rights in New Hampshire will, I trust, never be marred by the illegitimate claims of envy, jealousy, or persecution.

In our country the day of heathenism, illiberal views, or of an uncultivated understanding has passed. Freedom to worship God according to the dictates of enlightened conscience, and practical religion in agreement with the demand of our common Christ, the Holy One of Israel, are forever the privileges of the people of my dear old New Hampshire.

Lovingly yours,
MARY BAKER EDDY.

"BE YE DOERS OF THE WORD."

SEVERAL years ago our Leader wrote, "Keep your minds so filled with Truth and Love that sin, disease, and death cannot enter them" (*The Christian Science Journal*, March, 1899). This advice to her students is probably more widely known and quoted among them than anything else she has written, yet Christian Scientists today may profitably ask themselves how fully they are yielding a loving obedience to this wise counsel, and how much they are helping themselves and their fellow-mortals by putting into practice this precept, which contains the pith of our Master's teachings.

To keep our "minds so filled with Truth and Love" means much more than merely to indulge a sentimental or ecstatic state of consciousness, or to hold an undemonstrated belief in the power and wisdom of God. The apostle James says, "Whoso looketh into the perfect law of liberty, and continueth therein, he being not a forgetful hearer, but a doer of the work, this man shall be blessed in his deed." Sin, disease, and death are the subtle weapons of evil, and whoso would avail himself of the freedom offered by the "perfect law of liberty" must be ever on guard to prevent an entrance into the citadel.

Mrs. Eddy writes on page 451 of Science and Health, "Every conscientious teacher . . . feels morally obligated to open the eyes of his students that they may perceive the nature and methods of error of every sort, especially any subtle degree of evil, deceived and deceiving." This indicates the alertness which should mark the work of every Christian Scientist, be he teacher or student. A merely passive state of goodness is not all that is required in order to enter into the kingdom of heaven. One must know and demonstrate that "Christian Science goes to the bottom of mental action, and reveals the theodicy which indicates the rightness of all divine action, as the emanation of divine Mind, and the consequent wrongness of the opposite so-called action,—evil, occultism, necromancy, mesmerism, animal magnetism, hypnotism" (Science and Health, p. 104).

There is need for every Christian Scientist to be awake to the claims of evil, in whatever guise they may present themselves; to see their nothingness and powerlessness, and thus destroy them, not by the inactivity of a blind belief in God, but by demonstration of the activity of divine Mind, God, the omnipotent ruler of the universe.

ARCHIBALD MCLELLAN.

BOTH BANEFUL AND INCONGRUOUS.

WHEN the late Canon Farrar's volume on "The Eternal Hope" appeared about the year 1878, it awakened a convulsive and declamatory protest from so large a number of clergymen as to give convincing evidence of the hold which the doctrine of eternal punishment still had upon Christian belief at that time. Today it would probably be difficult to find any considerable number of educated Protestant ministers who accept this phase of the Miltonic theology, and this for the reason that it involves a questioning of the equity of the divine government from which the moral sense of every open-minded man must instinctively revolt. All the world knows that if the moral character of God is not unimpeachable, then He is no longer God, and the foundation of all Christian faith is hopelessly shattered.

This assertive discontent with the doctrine of the possible endlessness of retributive suffering results, however, not only from its reflection upon the justice of God, but from the indisposition of human sense at its best to believe in the eternality of evil. The assumption that evil does or can persist, puts an end at once to all hope, not to say conviction, of the sovereignty of good, and practically reestablishes the Manichean heresy which troubled the souls of the saints in the third century. The fundamental and innate conviction that the good and the true are and ought to be supreme by virtue of their inherent nature may be said to be universal among Christian men today, and this sense of legitimate dominion is not satisfied with any other conclusion than that evil will be dethroned and done away with in time; that it cannot maintain its present claim of place and sway throughout eternity.

With this conviction the great majority of those who, in opposition to the teaching of Christian Science, are declaring for the reality of evil would no doubt agree, and yet it must be apparent that if sin, disease, and death are real, the eternality of evil becomes inevitable, and pain and sorrow are sanctified by their association, if not by their identity with the things of God. From this point of view Mr. Chesterton is warranted in saying that "since Jesus suffered on the cross, a certain actuality and even sanctity has clung to the pain of prosaic men"!

The tenacity with which the testimony of the material senses sways the unthinking is not surprising, but when, in their loyalty to these senses, intelligent Christian people are willing to project the unendurable thought of an everlasting evil, despite the protest of a universal sense of fitness and a well-nigh universal refusal longer to believe in the doctrine of eternal punishment, one can but be astonished at so pitiful a spectacle. Such a belief were enough in itself to make the whole world sick. Between the question of loyalty to God as no less certainly good than infinite, and the question of loyalty to the declarations of a physical sense whose stumbling is known to all intelligent people, it would seem that there could be no reserve of choice, and yet it is true that in this twentieth century there are those who look upon the unequivocal stand which Christian Science has taken for divine idealism, regardless of sense testimony, as an unpardonable offense! Surely it was with the far-seeing of a seer that Mrs. Eddy declared that this teaching of the unreality and consequent temporality of

Digitized by Google

evil, all error, is the one point that the many "will most reluctantly admit, although first and last it is the most important to understand" (Science and Health, p. 466).

There is no questioning the fact that Ephraim still clings to his idols in a truly marvelous and inexplicable fashion, and the pathos of the habit upon the part of professed followers of Christ Jesus is, if possible, more impressive than its incongruity. St. John still lives to rebuke this offense, and it is a comfort to hear him say ever and again, "And there shall be no more death, neither sorrow, nor crying, neither shall there be any more pain: for the former things are passed away."

JOHN B. WILLIS.

THE DENIAL OF SELF.

THE statement of Christ Jesus, "If any man will come after me, let him deny himself, and take up his cross, and follow me," seems to present some difficulties to those who do not yet see that a great giving up of error is necessary before we are fitted to receive the blessings of Truth. Mrs. Eddy says, "We cannot fill vessels already full. They must first be emptied" (Science and Health, p. 201). Most Christian people are willing to give up "things" for the sake of their spiritual advancement, but when it comes to the denial of self they are apt to be puzzled and sometimes they are unwilling to meet the demand. Some seek to appease conscience by giving up more things, or by assuming crosses which Truth does not call them to carry, but the demand of the Master upon each would-be follower is, "Let him deny himself," and without obedience to this there can be no true following.

It is well for us to be clear at the start as to the fact that we are never called upon to deny the man that God has made,—the one that is like Him in nature: in a word, that is spiritual. On the contrary, we must clearly recognize and insistently affirm the reality of the true selfhood,—God's idea,—and by our words and deeds demonstrate its verity. The fundamental error of the ages has been the belief in an existence separate from God and unlike Him. Not so long since it was believed that man's likeness to God was a bodily likeness; and it would have been thought presumptuous, to say the least, to have claimed a likeness in mind or character. Happily, however, this belief is disappearing before the teaching of Christian Science, that our likeness to God, infinite Mind, must be a likeness in nature and character, expressed in a spiritual selfhood which is separate from materiality,—a selfhood which is born, "not of blood, nor of the will of the flesh, nor of the will of man, but of God," to quote St. John.

We find that Christ Jesus began early to deny "the will of the flesh" which largely controls the mortal sense of manhood, and this denial involved the taking up of the cross at every step of the way. Our revered Leader says that the "cross, which Jesus bore up the hill of grief, was the world's hatred of Truth and Love" (Science and Health, p. 50). His mission was misunderstood and his character misrepresented because he denied material selfhood and insisted that his followers do the same. He denied this false claim of selfhood when he put his hand upon the leper and healed him; when in the face of derision and hatred he said of Jairus' daughter, "She is not dead," then waked her from the dream of death; and again, when he raised Lazarus from the tomb. Most mightily did he deny the mortal belief of self when on the cross he proved the powerlessness of hate and ignorance, and went to his glorious victory over death and the grave,—his victory and ours, if we are willing to deny the false self and to follow him.

Material belief, based on knowledge gained solely from the physical senses, would insist that we admit self—not "deny" it. It would even demand a physical and mental diagnosis of the suppositional good and evil of corporeality, as necessary to one's healing, when the one necessity, according to Christ Jesus, is to rise out of the mortal sense as we would lay off outworn and "filthy garments." Then are we ready to hear the voice of Truth, saying to us, as to the high priest in Zechariah's vision, "I will clothe thee with change of raiment."

We should not forget, moreover, that self must be denied daily,—this was the great Teacher's requirement,—until nothing appeals to us but the divine idea, reflected in ourselves and others, lived and loved.

ANNIE M. KNOTT.

LETTERS TO OUR LEADER.

Indianapolis, Ind., April 5, 1909.

Mrs. Mary Baker Eddy, Brookline, Mass.

Dear Mrs. Eddy:—From time to time I have been the committee selected by the Reading Room of First Church of this city to place its various gifts of different copies of your works, as well as subscriptions for the *Christian Science Sentinel* and *Journal*, in the city, county, and state libraries of our city. I have been treated with great courtesy by the different librarians and, as the public demand for Christian Science literature has increased, they have on several occasions asked for more copies of "Science and Health with Key to the Scriptures" with which to meet this demand. Upon several occasions when the librarians have contemplated the purchase of books recommended for the library, I have been consulted as to the genuine worth of the book in question and whether it would be of use to the public in helping it to learn what Christian Science is.

But in no instance have we felt so much cause for gratitude as upon the occasion of my visit to the city library to ask if *The Christian Science Monitor* would be received. I found the librarian already familiar with this paper, having looked over the sample copies sent out by our Publishing Society. She was enthusiastic over its reading-matter and high ideals, and said it would be gratefully received in the city library, where it would fill a long-felt want. She then explained that seventh and eighth grade pupils of the public schools, as well as first and second year high school pupils, are required to be prepared in the giving of "current events," and that this demand of the schools has caused much friction between teachers and parents, as many parents have flatly refused to allow their children to read the daily newspapers, claiming that so much of the ordinary newspaper is unfit for the child mind. She added that the library attendants will now be instructed to give the *Monitor* to any child coming to the library who asks for a daily newspaper. She also said that the school reference assistant, who is sent out from the library to visit each school and help both teachers and pupils in learning to use the various books of reference at the library, will now be instructed to mention *The Christian Science Monitor*, and explain its nature, that teachers, pupils, and parents may as quickly as possible know of its existence.

This year I have been attending a series of lectures to a class made up of Sunday School teachers of different denominations, given by the president of the college for training kindergarten teachers, who is also the superintendent of the Indianapolis free kindergartens. One morning at the college the pernicious influence of indiscriminate newspaper reading upon the child mind was dwelt upon by the lecturer. The next week I took a bundle of *Monitors*, and gave samples to the teachers and members of the class, which were cordially received. Never once have I mentioned the purpose of the *Monitor* to any one interested in the proper education of children that it has not met with the most hearty commendation and sympathetic interest for its success. Truly your life-work is leading to grander and

Digitized by Google

grander results, influencing the present generation for untold good and reaching into and molding the present and future lives of the children of our country! This letter is written by direction of the last Reading Room meeting, after hearing the above report.

In closing I want to add that we are grateful for the order of service given for the Sunday Schools in the last edition of the Church Manual, knowing that it will be of great use all over the Field. We have taken pleasure in at once making the few changes necessary to conform to the outline given.

Yours with love,
MISS CLARA P. WALES,
Superintendent of Sunday School.

Sherbrooke, Quebec, March 21, 1909.

Dear Mrs. Eddy:—I have had the pleasure of visiting Boston a number of times since early last fall, and of watching the preparations for the starting of *The Christian Science Monitor,* and its growth to date. As a newspaper publisher, as well as one deeply interested in Christian Science, all this has been very interesting to me. It is one of the great advance steps in the journalism of America. To keep up with the natural growth and advancement of the *Monitor*, I feel that I cannot contribute to a better cause than to help to provide for larger quarters for the carrying on of the work of this paper. More room is already required in all the departments, and looking forward for a couple of years, I do not think double the space now available will be too much. Considering the great benefit to the Cause of Truth and Love throughout the world, afforded by the *Monitor*, it does seem to me that the Field as a whole should provide the best quarters possible for its publication.

It has been my privilege to send Mr. Chase a cheque for seventy-five dollars today, to apply on the building fund, and I hope to be able to add to this from time to time, until the need is fully met. The possibilities for good in the *Monitor*, I realize more fully as time goes on. Here in Sherbrooke it is received with pleasure in the reading-rooms of the public library, the Y. M. C. A., and the Y. W. C. A. This is reaching the people with what Christian Science really stands for, in a way that already shows results. In closing, let me thank you, dear Mrs. Eddy, for all your loving, kind, patient, unselfish efforts, which have done so much to help me physically and morally, and which have enabled me to rise to a higher understanding of what God really is.

Still seeking for a higher understanding of Truth, I remain,

Sincerely yours,
L. S. CHANNELL.

Hannover, Germany, March 23, 1909.

Mrs. Mary Baker Eddy, Brookline, Mass.

Beloved Leader:—We, the members of First Church of Christ, Scientist, Hannover, Germany, in annual meeting assembled, unanimously voted that a letter be written to you to express our deepest gratitude for what you have done and are doing for mankind in your untiring and selfless labor of love. Since the first seed of Christian Science was sown in our country—twelve years ago—your revelation, as given in our text-book, "Science and Health with Key to the Scriptures," has been our precious guide, and day by day we were led to wonderful experiences wrought by this living truth.

With gladness we report a steady growth of Christian Science in our field, and rejoice in the spiritual progress and harmony of this branch of the true Vine. Much healing is done, and the attendance of both the Sunday and Wednesday evening services is beautifully increasing. The *Herold,* this special messenger of your loving care for your German children, we always joyfully welcome, and patiently we are anticipating the blessing of having something of your original writings translated into German, to enlarge the understanding of the truth which we shall know and which shall make us free.

We are endeavoring to prove our gratitude in our daily work, striving to be pure in heart, and "to do unto others as we would have them do unto us" (Science and Health, p. 497), knowing well that in this way we may be able to repay you in some small degree for your grand and blessed work of love.

MARIE FRICKE, RUD. LINDEMANN,
SOFIA MEGER, WILHELM RADEMACHER,
Committee.

Chicago, Ill., March 31, 1909.

Mrs. Mary Baker Eddy, Brookline, Mass.

Beloved Leader:—As today is the second anniversary of the first public service in Seventh Church of Christ, Scientist, of Chicago, we are writing to tell you again of our loving gratitude for the infinite blessings of Christian Science, and of one phase of our work which we are sure will rejoice your heart. We have just given two lectures in our new edifice in Edgewater, by your devoted student, Mrs. Sue Harper Mims, of Atlanta, Ga. Her message was heard by the largest audiences which have ever assembled in our church; a total of about thirty-eight hundred persons attended the lectures on Sunday afternoon and Monday evening of this week. Her lecture was logical, convincing, compassionate, and was delivered with remarkable earnestness and simplicity. We know that it has accomplished much good.

Now, beloved guide and friend, the circumstances in our work which we believe will interest you most are these facts: Since our commencement as a branch of The Mother Church we have been privileged to give six lectures, including the two just referred to, and all the expenses of these lectures have been paid by the children of our Sunday School of their own desire and volition. Surely in this work of love by the little folk of this church we see some fulfilment of Isaiah's prophecy, "And a little child shall lead them." We are sure that these little workers will be as happy as we are to have you know of the practical way in which their demonstrations of Christian Science are applied to the work of church extension in Chicago.

Faithfully and lovingly,
BOARD OF DIRECTORS,
Seventh Church of Christ, Scientist, of Chicago.
R. T. ROGERS, *Clerk.*

SENTINELS OF SPECIAL VALUE.

The Publishing Society has in stock a number of copies of *Sentinel* No. 6, Vol. IX., containing the article "What Our Leader Says" as last published, and *Sentinel* No. 14, Vol. IX., containing the article "Harvest," also by our Leader. As these articles are of constant interest and value to the Field the Society will be glad to supply them, postpaid, at the following prices: 1 copy, 5 cents; 5 copies, 15 cents; 10 copies, 25 cents; 25 copies, 50 cents; 50 copies, 85 cents; 100 copies, $1.50.

On foreign orders add 2 cents a copy to cover postage.

NOTICE.

The Publishing Society has decided to discontinue its custom of furnishing free of charge to branch churches and societies copies of the *Sentinel* for distribution after lectures. Orders sent before this notice is received will be filled as heretofore; on subsequent orders the usual quantity rates will be charged. It is believed that many periodicals will, in the future, be contributed for distribution by subscribers who otherwise might not put them in circulation.

THE LECTURES.

SOUTH BEND, IND.

Prof. Hermann S. Hering of Concord, N. H., appeared in a lecture on Christian Science at the Oliver Opera House Sunday afternoon [March 7]. The speaker, who was heard by a large audience, was introduced by John F. Gaylor of Mishawaka, who said in part,—

It is gratifying to the Scientists of South Bend and vicinity to see the increasing interest which is evident, not only here, but everywhere, in the teachings and practice of Christian Science. When, nineteen hundred years ago, Jesus stood before Pilate and had directed to him the question, "What is truth?" he listened to the most momentous question ever propounded by mortal man; and during the centuries which have elapsed since this question was so pointedly and so prominently launched upon human consciousness, hundreds, aye, thousands upon thousands of men have undertaken to answer. Today, all over this fair world, men are asking themselves and asking each other this same question, "What is truth?" For upon the answer to this question depends the freedom, the salvation of the races of men. Perhaps this question of the ages has come to you, and you hope here to find that which will answer it. Or it may be you desire merely to know something of the nature of the philosophy which has taken the name Christian Science, to learn what it has done or possibly may do for mankind; and the lecture this afternoon is designed to instruct you correctly upon this important matter.—*South Bend Tribune.*

ST. PETERSBURG, FLA.

Frank H. Leonard of Brooklyn, N. Y., delivered a free lecture to a goodly audience at the City Hall last night [March 8]. He was introduced by Dr. Frederick Finch Strong, who said,—

While I am not a Christian Scientist, I have been for some years an observer of this progressive movement. At first my attitude was bitterly hostile and antagonistic, but time has changed this standpoint. In the scientific laboratory, where the greater part of my life has been spent, the test of a new theory is, "How does it work out in practice?" Now, I have seen the basic truths of Christian Science applied, and in simple justice I must say that the results justify the claims of its advocates,—in many cases, at least. I have seen a household where intemperance and immorality were rampant changed to a happy, harmonious Christian home. I have seen diseases which, as a pathologist, I should have considered practically incurable, disappear under Christian Science treatment. These are facts to which I can testify, not as a Christian Scientist, but as a simple lover of truth and honesty. From what I have learned from my conversation with and observation of Christian Scientists, the essence of their teaching seems to be a literal acceptation of the doctrines of Christ as expressed in the Gospels, and an endeavor to live the Christ-life personally and collectively. Surely we, as Christian people, can have but little fault to find with such a belief. Christ said that a tree is known by its fruit. If this be true, then the hundreds of handsome Christian Science churches, each of which was fully paid for and free from debt before it was dedicated, should indicate a solid basis for the religion for which they stand.—*Independent.*

ST. LOUIS, MO.

Under the auspices of the six Churches of Christ, Scientist, in St. Louis, East St. Louis, and Kirkwood, the Hon. Clarence A. Buskirk lectured on Christian Science, at the Odeon Theater, on Thursday evening, March 18. Judge Buskirk was introduced by John Ashcroft, chairman of the joint committee, who said in part,—

In all the ages there have lived men and women whose clearer vision has enabled them to pierce the shadows of mortal belief and catch glimpses of the eternal sunlight beyond. Some forty years ago the world became conscious of the presence in its midst of one such woman, who offered for its consideration what Whittier has so aptly termed "the larger thought of God." She planted herself unreservedly upon the foundation laid by Christ Jesus, and, like him, was called upon to bear the enmity of the world, which has always resisted and resented any attempt to correct its errors. Slowly but surely there gathered around this woman thoughtful men and women, weary and heavy-laden, from all the walks of life; and with them she shared the treasure of a demonstrable knowledge of God, practical and complete. Today Mary Baker Eddy has her place among the world's great teachers; while Christian Science is known and practised throughout the civilized earth.—*Correspondence.*

RIPON, WIS.

Bicknell Young of Chicago delivered a lecture on Christian Science in the spacious auditorium of the Congregational church, Monday evening, March 22. The speaker was introduced by the pastor of that church, the Rev. H. G. Pillsbury, who said,—

I have been requested by certain friends of mine whom I esteem and love, to say a few words, in introducing the speaker of the evening. I do so willingly and without the least hesitation. I heard a remark some time since—and doubtless you at some time or other have heard the same—that the trouble with Christian Science is that it is neither Christian nor scientific. With regard to the first count in the indictment I beg leave to demur; for, so far as I am able to judge of this faith in question, from those of its adherents whom I have known, the spirit of Christian Science is Christian. I think this should be stated without equivocation and with emphasis. With regard to the second count in the indictment, it would be unseemly for me to stand here and speak of the difficulties which I encounter in accepting the philosophy underlying Christian Science. I prefer to say this instead: that the part of wisdom—of the man who would become wise—is to keep the open mind toward any form of truth which to him may be new. There is a passage of Scripture which is applicable here: "Prove all things; hold fast that which is good." To be open to conviction and receptive of that which commends itself as true, is worthy of us all. It is a satisfaction to have with us one who is an authoritative interpreter of the matter before us.—*Correspondence.*

LECTURES AT OTHER PLACES.

TESTIMONIES OF HEALING.

When I first became interested in Christian Science, a little over a year ago, I remember how eagerly I perused the *Sentinel* and *Journal* for testimonies of healing of cases similar to my own, and when my search was rewarded, how it strengthened the hope that I might be healed and gave me greater encouragement to accept and prove Christian Science. In the hope that my testimony may reach some one in similar frame of mind, I am glad to present these facts.

When a boy, I was attacked with what I thought was hereditary stomach trouble, which began in a mild form, and grew worse year by year, until about seven years ago, when my physicians pronounced it catarrhal affection of the stomach. I suffered intensely night and day for weeks together, during which time I was unable to retain any kind of food. I tried a great many kinds of medicines, which gave temporary relief only. Then I took regular courses of treatment with some of the best physicians and specialists in Kentucky and Ohio. Under one form of treatment I was required to lie in bed for six weeks and live on an exclusive milk diet. Finally I was treated by a noted New York specialist, under whose dietary rules I lived for nineteen months on uncooked foods. While this seemed to afford me great benefit, I was not cured, and I would suffer serious relapses from time to time. The last doctor I consulted was frank in saying that he could not help me. Twenty-three years had now elapsed since I began to take medicine, and I had almost lost confidence in it or the profession thereof, and was growing extremely despondent.

When my attention was first directed to Christian Science, some years ago, by a friend in the far West who was anxious for me to become interested in it as a means of regaining my fast-waning health, I was evidently not prepared to accept it, as I gave the subject but a fleeting thought and dismissed it as too ridiculous to a limit of sane consideration. However, a little over a year ago, Christian Science was again recommended to me by a friend in Chicago, who presented it so earnestly that I determined to look into the subject. A few days later I met by chance a gentleman from St. Louis, who told me of his wonderful cure through Christian Science of serious lung trouble, and advised that I attend the meetings, and a lecture on Christian Science which was to be held the following Sunday. I did so, and it was all so different from what I had imagined; the beautiful service and the impressions convinced me that I had at last found a source of relief from the bondage of sickness and mental depression. I purchased a copy of "Science and Health with Key to the Scriptures" and began to read, and a little later asked for help from a practitioner. In a very few days I noticed that my appetite was returning, and I began to eat and enjoy my food as I had not done in years. I continued to improve daily, and in a week was eating anything I desired, without the fear as of old, and the consequent suffering. I have gained in weight, and at this writing my trouble has entirely disappeared. For this beautiful demonstration of the efficacy of divine healing, I am exceedingly thankful to God, and grateful to Mrs. Eddy, through whom the Science of Life and being has been revealed, as taught and practised in Christian Science.—EDWARD J. WILSON, Cincinnati, O.

Wishing to acknowledge publicly the good derived from the reading of "Science and Health with Key to the Scriptures" by Mrs. Eddy, I give my testimony. Christian Science has meant much to me during the last three years, and will mean more and more as I come to realize more clearly that the only reality is good; that every good thought, every good deed brings its reward here and now. The Science of God, good, as brought out in Christian Science, gives us a firm foundation, thus bringing us security and peace. For eight years I had worn glasses constantly; never laying them off for an instant during the day. I commenced to read Science and Health, just to see what it taught, and before I had finished the book I knew that I did not need glasses, for God's creation is perfect, and I have never used them during the three following years. Every day many little instances—little in themselves, but big in the truth set forth in righting them—occur to prove this wonderful power of Truth and to strengthen me in its knowledge. I am trying to show my gratitude by watching and praying for that Mind to be in me which was also in Christ Jesus.

MISS ELIZABETH MCMAKIN, Louisville, Ky.

I wish to express my deep gratitude for the blessings I have received through Christian Science. A short time ago I was taken with an attack of poisoning. With my little understanding of the truth I tried to treat myself, but my symptoms grew worse. The pain in my side, together with the nausea, became almost unbearable. I tried to continue my work, but found I could not; so I called a Christian Science practitioner, and from that time I improved rapidly. After a lapse of four days I returned to my work, and am now perfectly well. I wish to mention another beautiful demonstration. Quite recently, while using a foot-adz, I cut my foot severely. To mortal sense it would have seemed impossible to continue my work, but I did so, and in the evening called a practitioner to help me. The following morning there was not even an intimation of pain or stiffness. I am indeed very grateful for this truth which makes us free.

JULIAN M. CARPENTER, Los Angeles, Cal.

After years of suffering and after trying all sorts of material remedies, I was left under the impression that nothing but an operation could cure me. A friend then brought a Christian Science practitioner to see me, and when I saw her coming to my door I wanted to run away, as I had no faith whatever in Science. After one week's treatment, however, I was entirely cured, and have been able to be at my place of business for six months at a time without losing one day. Truly said Jesus, "Ye shall know the truth, and the truth shall make you free." This has certainly been proven to me through divine Science, and for this I am indeed grateful. I am also grateful to our dear Leader, Mrs. Eddy.

MRS. FANNY B. RICHARDSON, Oklahoma City, Okla.

I first read Science and Health at the request of a dear uncle, from whom I received a copy while at college in 1905. At first I read it critically, as I never had joined any church, having always been skeptical about what I understood to be the orthodox concept of God, and having stopped attending Sunday school at sixteen because my teachers said if I did not join the church I would go to hell. For about a year I read and reread Science and Health, reluctantly foreseeing that if I accepted its teachings I must give up all selfishness. Still I could not leave the book alone, and found in it the only possible explanation of the atonement, which I had never understood or believed in the old way. Finally, however, under stress of pressing material duties, I neglected to study, and with my father investigated Darwin's and Huxley's writings; also "mental science." This last state was "worse than the first," and I was indeed weary of it all. I had not learned the grand lesson of the need of humility in seeking the truth.

Digitized by Google

It was then (in 1906) that circumstances placed me in a position, through no fault of my own, where no power but that of God could rescue me. Fortunately I knew enough of Christian Science to declare that God is an ever-present help, that God is All-in-all, and that therefore virtue must be in His hands. I was instantly rescued from the clutch of mesmerism, and learned that God is indeed the only power. At this time another uncle, also a Christian Scientist, showed me how this truth is ever-operative for all mankind, just as it had been for me. It is hardly necessary to say that since then my whole time has been given to the study of the Christian Science text-book, and to helping others. It is only through a realization of the preciousness of our dear Leader's moments that I have refrained from writing her personally of my gratitude for Christian Science. Besides this wonderful demonstration I have been enabled to overcome a violent temper, have been healed of a catarrhal trouble which I had from childhood, headaches, and poor circulation (said to be hereditary), rheumatic trouble, and, worst of all, an intense fear of death.

Nor is this all. About a year and a half ago I had the pleasure of interesting in Christian Science the man who is now my husband. At that time, through our talks and letters, he was healed (almost instantaneously) of the drink and cigarette habits, also of profanity and an indifference to religion in general. He is now an earnest student of Christian Science and we are both members of The Mother Church, endeavoring to be able to meet this test of our Master: "By this shall all men know that ye are my disciples, if ye have love one to another." We see, as Paul said, that our "reasonable service" is in offering a "living sacrifice"—the allness of Life demonstrated.

The more I ponder Jesus' life-work, the more grandly significant is the silence he maintained in answer to Pilate's question, "What is truth?" He depended on his Father to give the final climax to his answer, and, seeking not his own glory, he was exalted. My husband gladly joins me in this testimony to the power of God, good, demonstrated through Christian Science.

MRS. JOY LEE PINNELL, G. A. PINNELL, Charleston, Ill.

While on a fishing trip I had removed my shoes and stockings, and stepped upon something which cut a deep gash in my foot. I did not think it serious at the time, but it seems that some foreign matter still remained in the cut, and in walking I was made to limp slightly. After a few days the foot began to swell, and I was quite fearful of the outcome when a Christian Science practitioner was called in the evening. The next day the swelling had disappeared, and the foot healed quickly, giving me no more trouble. Some time later, while working around a new building, I stepped upon the iron top of a sewer opening, which tipped, causing me to fall heavily astride it, and thence to drop into the opening. There were some severe bruises, and fear was felt as to possible internal injury, but after two days' treatment in Christian Science I was able to resume heavy work without discomfort.

J. L. POLK, Lincoln, Neb.

Some seven years ago I became interested in Christian Science through an old-time friend of my husband, who urged us each time he called to try it, assuring us of help. I was growing worse under medical treatment, and finally I decided to try Christian Science and called on a practitioner. I never shall forget how kind and good she was to me, and how plain she made the teachings of the Bible. In the first treatment I was healed of chronic stomach and bowel trouble of years' standing. I was wearing glasses at the time, but they were laid aside. Under adverse circumstances I dropped the study of Christian Science, but when taken ill I could not get any benefit from medical treatment. I had taken a severe cold, which developed into lung trouble. I also had an organic disease of the jawbone, and a dentist treated this trouble for more than a month. In 1907 I took treatment in this city in Christian Science and was completely healed of these conditions. With this healing came a clearer understanding of Christian Science: I was led to Principle, and since that time I have gained in all that is good. Our little boy has had nothing but Christian Science treatment. An acute attack of lung trouble was entirely destroyed in three days, and since coming here he has been healed of an enlarged gland. Under medical treatment this would have been a most painful experience, but with the help of a Christian Science practitioner he never lost a moment of play or of sleep.

For the many blessings which Christian Science has brought to me and mine I am most grateful. I, however, consider the greater blessing to be the spiritual understanding I have gained, which enables me to turn to God as the Father who giveth all good. May my life attest my sincerity and my love for the truth taught in Christian Science and expressed in the life and example of our beloved Leader, Mrs. Eddy.

MRS. HERMINE HANSON, Havre, Mont.

What first appealed to me in Christian Science was the beauty, purity, and force of its teachings. It seemed to me it must be the truth. At the time I told my husband that I could never again rely on anything else but Christian Science. I was sick in bed. I had seen no complete healing in Christian Science, and had read little, but that little, together with the talks which I had with my sister and her husband, then just taking up the study of Christian Science, was enough to convince me that I wanted to know more of it. The next week I had a copy of Science and Health of my own, and read it with absorbing interest. My illness was the outcome of an operation performed in a hospital three months before. I could not, at the time, walk two blocks without being thoroughly overcome with weakness; but, with the help of a Christian Science practitioner, and my own reading, I was a well woman in a very short time, and able to walk any distance, my first walk being one of six miles about a week after I began treatment.

My husband took up the study with me, and we are traveling the rugged but wonderful road together. In the year and a half of our work in Science we have had many beautiful demonstrations over illness, the worst symptoms being destroyed in a day and the healing completed in a week. With only my own efforts and study I have overcome in myself severe headaches, which were for three years very frequent, and so distressing that for several nights consecutively I would be unable to lie down all night. For a year and a half I had frequent and very severe attacks of styes on both eyes. The last few I treated persistently with Christian Science, and each proved less troublesome.

My baby boy, now over a year old, is a picture of health and happiness. I ascribe it all to the glorious truth which he has always known, and which we are trying to live for his sake. Some seemingly severe ailments have been overcome for him. A few months ago he seemed to be seriously ill, but with persistence in realizing the truth of being, and our reliance upon God, the trouble was completely met. Five hours after he had seemed to be a helpless, fever-racked babe, he was transformed into a laughing, bright-eyed boy. Can any one, especially any parent who may read this, doubt that I am thankful for my slight knowledge of Christian Science, and grateful to the courageous woman through whom it has come to us—she

Digitized by Google

who has toiled so long and so persistently, against overwhelming obstacles, to show us anew the way.

I unite with all others in saying that the physical healing of Christian Science is a small thing when compared with the spiritual regeneration that we receive when obedient to our Leader's teachings. I realize fully that I have yet a high mountain to climb, but I know I have found the right path and cannot miss my way. My prayer is that I may so follow Truth's guidance in rearing my child, that he will never lose the way, and that we may both be instrumental in bringing others to the same health, peace, and understanding of God which the Master said is "life eternal."

MRS. FRANCES VAN RENSSELAER BRISCOE, Greenville, Miss.

I am very grateful for the many blessings which have come to me through the understanding of Christian Science. The words of our beloved Leader, "Step by step will those who trust Him find that 'God is our refuge and strength, a very present help in trouble'" (Science and Health, p. 444), have appealed to me with greater force, through a recent experience, than ever before. I awoke one morning very early, in great pain with an acute attack of kidney trouble. I treated myself the best I could for a while, but as I seemed to grow worse steadily, I realized that I must have help as soon as possible. I asked my wife to send for a Christian Science practitioner, which she did at once. The practitioner came, and remained with me all day and until midnight, when the sense of illness left me and I was perfectly healed. In less than twenty-four hours I was free from this serious and painful disease. In the old way I should have been under morphine for three or four days, and there would have been two weeks or more of convalescence, dieting, etc.

For this wonderful proof of the power of divine Mind to heal all our diseases, I am thankful to God, and to our dear Leader, Mrs. Eddy, who has made it possible for us to understand the truth that makes free.

HERBERT SANDERSON BUSH, East Haven, Conn.

Soon after I became interested in Christian Science I went to Bethlehem, N. H., for the summer, and one day took the trip up Mt. Washington. We all know that to reach any great height, whatever the means, the journey must be slow, but what a view we had on reaching the summit! Suddenly in the clear blue sky there appeared a cloud, then others quickly gathered. In a remarkably short time, while neighboring peaks on one side seemed laughing in the sunshine, those on the other were inky black in the shadow. Then both were lost to view, enveloped in a heavy mist, and we were glad to seek shelter from the pelting hailstones. As the storm abated we ventured out, clinging cautiously to the rocks and watching with intense interest the sun and the wind battling with the clouds. Finally there came a tiny rift in the clouds, and through this small vista we caught a glimpse of a far-off landscape, lying warm and bright in the glorious sunshine, as if it were indeed the "promised land."

Making immediate application of this instance to my experience in Christian Science, I realized that although I seemed to be away "up in the clouds" in the feeling of exhilaration that had come to me in the joy of the new-found truth, I must begin at the bottom and climb. Though sometimes the way seems dark and gloomy, while I stumble and perhaps fall over the rough places, as I occasionally reach the open I know by the extended view that I have attained higher ground. Then on and on again, leaving old landmarks behind, I pursue the upward path. Before coming to Christian Science I had found teaching a rather trying task physically, but that sense soon became one of the old landmarks, and instead I find that God gives me daily strength, as much for the last day of the school term as the first. Truth and Love have helped me to fight many battles, and I know now that I have reached a height where the view of life is wider, grander, more beautiful and hopeful than was ever possible before.

AUGUSTA LOCKETT CLARK, Jersey City, N. J.

I want to tell others what Christian Science has done for me. Christian Science has helped me in my school work, and to get along agreeably with my schoolmates. A little experience I had on the Fourth of July showed me the error of disobedience. My uncle gave me a blank pistol and a box of cartridges. After I had used up all the cartridges my mother said I had had enough and told me not to shoot any more; but I went up the street to where a boy had one, and he told me to shoot it. I yielded to the temptation, and injured my hand. I at once washed the blood away, but it gave me some pain. The boys tried to frighten me by saying I would have blood-poisoning, but I went at once to my mother and told her all about it, and with Christian Science treatment my fear was destroyed, the pain and swelling stopped, and the next morning my hand was well. One of the boys who saw this demonstration asked me to treat him for a cut on his head, which I did, and it was quickly healed. I am so grateful for Christian Science, for it helps me in all ways.

WALLACE TATE, Memphis, Tenn.

In the fall of 1898 I had a very severe attack of illness, and suffered beyond expression, although I used all material means possible. The difficulty was in my lower limbs, and I received no benefit from any of the appliances used. I was in deep despair, when the thought came to me to try Christian Science. I had read a few pamphlets, which appealed to me at once; indeed I was very deeply impressed, so I wrote to a practitioner one hundred and fifty miles away. At night I removed some plasters which I had been using, feeling that I would have no more use for them. I went to bed and slept all night, the first time in four weeks. I was healed, and have not had an attack of the trouble since. I received a few treatments after that, all absent.

I am very glad to tell of the healing power of Christian Science, and I do this with a deep feeling of gratitude to Mrs. Eddy for having given us in Science and Health the truth that makes free.

MRS. ADELE MAGEE, Altamont, N. Y.

When Christian Science was mentioned to me, somewhat more than seven years ago, as a possible means of relief from the difficulties under which I was laboring, it was met with stubborn prejudice, for I was bound hand and foot to a belief in material gods, and moreover felt a strange antagonism toward Christian Scientists, in spite of the evidences all about me of the good work they were doing. However, my health was failing, after a residence in the South, where I had contracted malaria, and I was burdened at the same time with a sense of grief and an intolerable condition of discontent.

When a friend urged me at least to read Science and Health, I began to do so reluctantly and hestitatingly, but in the end it healed me. Eye trouble, for which glasses had been worn three years, stomach trouble of several years' standing, extreme nervousness, and an internal complication for which the physicians could offer me no promise of cure,—all these yielded after a faithful and persistent study of our text-book. Now, in place of physical discomfort

I have good health; in place of dissatisfaction and unrest I know something of the peace that comes with the realization of man's unity with his Maker; and in place of scornful prejudice I find myself with an increasing love for humanity. I am gladly, humbly willing to follow all the instructions given by our beloved Leader for our guidance in bringing to the apprehension of men the kingdom of heaven on earth. I am grateful to God for this revelation, and shall endeavor to show that gratitude and appreciation for the truth by follow Love's command, "Be ye doers of the word."—CORA E. CAMPBELL, Chicago, Ill.

It was with a weary, sad, empty, and useless life that I sought regeneration in Christian Science nearly four years ago. The acute prod which furnished my immediate necessity was sleeplessness. From a low altitude I went to Denver, bearing a persistent tendency to this trouble. Subjected to the mortal law concerning altitude, this tendency quickly developed into continuous sleeplessness, with its consequent suffering. In my extremity I sought the healing power of divine Love as revealed in Christian Science, and was relieved at once, resting normally after the first treatment. God's law was proven supreme, right where the mortal law about nerves made its strongest stand.

With this liberation there also came freedom from ever-recurring attacks of bowel trouble, and of incessant headaches, arising from the least provocation. Shortly after receiving two weeks' treatment, I discovered that glasses were no longer necessary, and I have not required them since. Before that time I could not read fifteen minutes without intense headache. Twice, with the gentle help of loving workers in Christian Science, I have been freed from wretched attacks of illness. Every occasion of turning for help to the Giver of all good has afforded me proof of God's power, for healing has followed. Divine Love continually responds to every opportunity offered by such seeking, and is thus proving to me that God is All, and infinitely sufficient.

The mental and moral regeneration sought is being gained step by step. I feel almost hourly gratitude for our Leader's illuminating words on page 242 of "Science and Health with Key to the Scriptures:" "Self-love is more opaque than a solid body. In patient obedience to a patient God, let us labor to dissolve with the universal solvent of Love the adamant of error,—self-will, self-justification, and self-love,—which wars against spirituality and is the law of sin and death." In this paragraph has been revealed the mental cause of practically all inharmony, and I am learning the value of quickly seeking the Father's will, as His will is always expressed not only with perfect wisdom and certain power, but with tenderest love.

The old century-worn invitation, "Ho, every one that thirsteth," only shines the brighter and clearer for its time-worn and time-tried truth, as one false claim after another is cleared away—shined away by Truth and Love—and the true man ever more distinctly stands forth through the lessening shadows. This true sense of God and man ("that which was lost") is again being saved to humanity by the Saviour's triumphant teachings as illumined by Christian Science, and this time for all time and to all peoples. My gratitude to our dear Leader cannot be expressed in words, but she is graciously pointing us to a method by which we can live our thankfulness in pure thinking and compassionate living.—MISS ALICE M. TAYLOR, Portland, Ore.

The Scripture says, "Rejoice evermore. . . . In every thing give thanks." Our Leader beautifully expresses this thought in one of the by-laws of The Mother Church: "Gratitude and love should abide in every heart each day of all the years" (Manual, p. 69). I consider it, therefore, not only a blessed privilege but a sacred duty publicly to thank God for all He has done for me, in the hope that some one who is suffering and sorrowing may be healed and comforted through the practical application of Christian Science, as I was. It is now four and a half years since I was healed. From birth I had been ill, in a greater or less degree, and it was only by the most tender care and the best medical aid that I was reared; electricity and osteopathy were faithfully tried, and my parents spared nothing that money could afford.

Kind friends recommended Christian Science, and a practitioner was called at a time when I was lying unconscious, a condition which had occurred every six months for nine years. I shall never forget the joy, when I awoke the next morning, to behold the Christian Scientist, who had come with her message of Love. From that hour life was so different! I felt at once the healing touch of the Christ. At last the something, I knew not what, but for which I had prayed, had come and would heal me. After receiving three weeks' treatment I was lovingly told to study the Bible, and Science and Health by Mrs. Eddy, for therein was contained the healing truth.

During that time I was healed of a most severe female trouble of nine years' standing, which specialists had pronounced incurable. This condition was so severe that I have often lain in bed ten weeks at a time, and for months had been unable to walk any distance, and always with much inconvenience. A head and spinal trouble, which caused constant pain, was also healed. At certain periods I would be in such a mental condition from the intense suffering, that I did not recognize the members of my own family. For thirteen years I had worn glasses, and often had to stay in a dark room, but so thoroughly was the work done that my eyes were completely healed before the practitioner knew I wore glasses. This was also the case with a bowel trouble. From childhood I had been subject to a throat trouble, and averaged from four to six attacks in a year. Since my healing in Christian Science my throat has been normal.

How can one express in words the gratitude felt for having been freed from such bondage! My heart overflows in unutterable thanksgiving to God, and to our Leader, for having been so lovingly and patiently led to this truth. The physical healing was much, but the spiritual awakening is far more. The joy of living each day as best I know, and of helping others, is indeed the pearl without price.

NELLIE BLODGETT BUSH, Worcester, Mass.

[Written for the *Sentinel*.]

THE VOICE OF TRUTH.

KATHARINE T. PORTER.

As, looking overhead, sometimes we see
Two galaxies of clouds, not keeping company
But going diverse ways;
As listening to music, played in many parts
Clear to the listening ear and gentle hearts,
Beneath and quite apart, no other sound can drown
A low, sweet, tender monotone:
So, when Love friends together brings,
To outward ear discussing many things,
But still their hearts unite in universal love,
Finding its tranquil source in God above,
Be silent thou, and bend a listening ear!
Apart from mortal sense, a song of peace thou'lt hear,
God's undercurrent in the mental air.
Wherein thou also hast a part, I trow,
For, when in tune, God's instrument art thou!

FROM OUR EXCHANGES.

[*Universalist Leader.*]

We have noted a certain finality of thought in many of the fine utterances of Jesus Christ. Behind these sayings we have noted the fact that the entire policy and program of Jesus grew out of a perfect faith in the indestructibility and power of truth. We have also noted that truth as it fell from the lips of Jesus was a certain fine and final interpretation of life, of both human and divine life, the life of God and the life of man. We have still to search for the source of this perfect confidence in truth. We may date it as a matter of biography from the end of the wilderness meditation, or we may go back another step to the ford of the Jordan and the awakening of a soul at the baptism of John. These are outward circumstances and dates of which much has been made in studying the mind of Christ. We call attention to them here simply to ignore them, or at least to discredit them as sufficient authentic data upon which to construct any psychological theory of Christ. It is best to accept the facts and rest our argument on them. It is not a question of when or where or how. It is a question of the nature of the experience of Christ, however and wherever and whenever consummated. The fact of experience in the consciousness of Jesus, in which rests this whole fabric of spiritual truth as he constructed it during his ministry, is his absolute and complete sense of the divine, his total spiritual identification with God.

[Rev. R. J. Campbell in *Christian Commonwealth*, London.]

Jesus' gospel for sin was a very simple one: it was, "Go, and sin no more." I wonder why we have ever added anything to that. What on earth was ever needed? If by a gospel for sin you mean the hope of escaping punishment, that is quite another matter, and no small part of the mischief wrought by the overbeliefs to which I have alluded is that they have lulled men into a false security. "Be not deceived; God is not mocked: for whatsoever a man soweth, that shall he also reap." How could it be otherwise in a well-ordered universe? No man can escape what he is; and what he is, is the result of what he thinks and does. The divine forgiveness of sin can only operate by enabling a man to see the true results of what he has thought and done, and that may mean suffering, but also mercy.

[*Christian World*, London.]

It is the social conscience that, in the old world and the new, is bringing the hideous reign of war to its final end. There is a glorious crash preparing here which cannot now be long delayed. The system of bloated armaments is tottering by its own weight, tottering under the upheaving force of the public conscience. And what a burden will fall there! It will leave the nation like Bunyan's pilgrim with his load off his back.

[*Christian Life*, London.]

Today much cant is talked about art in its relation to religion. The great fact is forgotten that art appeals mainly to the senses, though it suggests impressions and thoughts beyond the range of the senses. Religion in its purest form has no direct relation to the senses; it is a purely spiritual relation between the Father and the child.

[*British Congregationalist.*]

The one necessity for every man is that he shall be faithful to the voice of truth as he interprets it; but if there be a true divine life in Christ, with whose fulness he waits to fill the hearts of men, then a man must be in himself spiritually nearer to or farther from perfectness, according as he has or has not believed that.

SPECIAL ANNOUNCEMENTS.

FROM THE PUBLISHER OF MRS. EDDY'S WORKS.

THE CHRISTIAN SCIENCE TEXT-BOOK, "SCIENCE AND HEALTH WITH KEY TO THE SCRIPTURES."—This work contains many important changes and additions by the author, and also contains a photogravure portrait of Mrs. Eddy, together with a facsimile of her signature.

SOME OF MRS. EDDY'S WRITINGS IN NEW BINDINGS.—One volume containing Unity of Good, Rudimental Divine Science, No and Yes, Retrospection and Introspection; a second volume containing Christian Healing, The People's Idea of God, Pulpit and Press, Christian Science *versus* Pantheism, and the Messages of 1900, 1901, and 1902. These volumes are printed from new plates and are uniform in size with the pocket edition of Science and Health. Bound in morocco, limp, round corners, gilt edges, heavy Oxford India Bible paper. The prices of these books prepaid are as follows: single copy, $3.50; six or more copies of either volume to one address, each $3.25.

THE CHURCH MANUAL.—Containing all the By-laws of The Mother Church, The First Church of Christ, Scientist, in Boston, Mass. Each new edition of the Manual will have special notice in the *Sentinel*. Price, single copy, prepaid, $1; six copies to one address, $5; twelve copies to one address, $9.

Attention is called to the Library Edition of Mrs. Eddy's works, description and prices of which will be found on the outside cover page of the *Sentinel*.

Address all orders for books named above to ALLISON V. STEWART, Falmouth and St. Paul Streets, Boston, Mass.

FROM THE CLERK OF THE MOTHER CHURCH.

CHURCH TENETS.—The tenets of The First Church of Christ, Scientist,—The Mother Church,—printed on folded sheet for the use of Branch Churches of Christ, Scientist, with space for the names of churches and their by-laws, can be had at seventy-five cents per hundred.

Not less than one hundred are sold. Postage stamps are not taken for payment.

MEMBERSHIP.—Correspondence relating to membership with The Mother Church, and requests for blank applications for membership, should be addressed to the Clerk.

All correspondence and orders relative to the above should be sent to WILLIAM B. JOHNSON, Clerk, The First Church of Christ, Scientist, Falmouth, Norway, and St. Paul Streets, Boston, Mass.

FROM THE CHURCH TREASURER.

PER CAPITA TAXES.—Per Capita Taxes and Contributions to The Mother Church, The First Church of Christ, Scientist, in Boston, Mass., should be sent to the Treasurer. Please do not send currency.

Remittances for the above should be sent to STEPHEN A. CHASE, Treasurer, Box 56, Fall River, Mass.

FROM THE SOCIETY.

Attention is called to the announcement over our Leader's signature, which appeared in the *Sentinel* of Jan. 9, to the effect that Christian Scientists in the field who send four subscriptions to the *Monitor* for one year, will receive their own paper gratuitously.

Attention is called to the new Pamphlets, Reprints, and Music found listed in the advertising columns on the opposite page.

The Publishing Society requests that Reading Rooms and individuals when ordering *Quarterlies* will specify whether the large or small size is desired. This is necessary in order to avoid wrong shipments and consequent delays.

THE CHRISTIAN SCIENCE JOURNAL

FOUNDED APRIL, 1883, BY THE AUTHOR OF "SCIENCE AND HEALTH WITH KEY TO THE SCRIPTURES," MARY BAKER EDDY, DISCOVERER AND FOUNDER OF CHRISTIAN SCIENCE

This monthly Magazine is the official organ of The First Church of Christ, Scientist, in Boston, Massachusetts, and correctly represents the Christian Science Movement. It contains interesting discussions of the teaching and the practice of Christian Science, and in addition to dissertations, lectures, and contributed articles, publishes always a number of reports from cases of spiritual and physical healing, which practically illustrate the redemptive work of Christian Science.

TERMS OF SUBSCRIPTION: Single copy, one year, $2.00. Quantities TO ONE ADDRESS: ten or more, each, $1.90; twenty-five or more, each, $1.80; fifty or more, each, $1.60. These rates apply in the United States, Canada, Mexico, and Cuba. In all other countries add forty cents for postage on each subscription. Six months' subscriptions received at half the above rates. No subscriptions received for less than six months.

TERMS OF SALE: Postpaid to any address: Per copy, twenty cents. Quantities TO ONE ADDRESS: ten copies, $1.70; twenty-five copies, $4.00; fifty copies, $7.00; in the United States, Canada, Mexico, or Cuba. To all other countries, per copy, twenty-five cents. Quantities TO ONE ADDRESS: ten copies, $2.10; twenty-five copies, $5.00; fifty copies, $9.00.

BOUND VOLUMES: Current year and two years previous, cloth, $2.50; half calf or half morocco, $3.00. On earlier volumes write for prices.

THE CHRISTIAN SCIENCE MONITOR

Published every afternoon except Sunday

A daily newspaper for the home. Adequate news service. The various departments of a modern newspaper. Unique home forum page. Entire page of editorials dealing with the vital topics of the day. Contributions for the columns of the MONITOR should be addressed, Managing Editor, THE CHRISTIAN SCIENCE MONITOR.

SUBSCRIPTION PRICE: For the United States, Canada, Mexico, and Cuba, $5.00 a year, $3.00 for six months; all other countries, $8.00 a year, $4.50 for six months, postpaid. In the Greater Boston postal district the MONITOR will be delivered by carrier through the local news-dealer at the customary rate of 12 cents a week payable to the news-dealer. If desired by mail in Boston district $2.75 should be added to the annual subscription rate to cover extra postage.

The Christian Science Quarterly

Published January, April, July, and October

Contains the Lesson-Sermons which are read at the Sunday Services throughout the year in all the Christian Science churches. These Lessons, which present citations from the Bible and "Science and Health with Key to the Scriptures," are valuable for daily study.

TERMS OF SUBSCRIPTION: For one year, 50 cents; fifty copies or more to one address, 50 cents yearly for each copy. Foreign subscriptions, 60 cents. Yearly subscriptions only received.

TERMS OF SALE: One or more copies, postage paid, each, 15 cents; fifty copies or more to one address, each 12½ cents, postage paid.

Der Herold der Christian Science

Published Monthly.

A magazine printed in German, which publishes original and translated articles bearing upon Christian Science, and also testimonies of healing from Germany and America. It contains about thirty-eight pages of such reading matter, also the Lesson-Sermons which are read at the Sunday services in all the Christian Science churches, and is valuable as an authorized representative of the movement.

SUBSCRIPTION PRICE: For the United States, Canada, Mexico, and Cuba, 10 cents a copy, $1.00 a year in advance; all other countries, 12 cents a copy, $1.25 a year, postpaid.

PAMPHLETS AND REPRINTS

CHRISTIAN SCIENCE. THE RESTORATION OF PRIMITIVE CHRISTIANITY. A Lecture. By CLARENCE C. EATON. 29 pages.

CHRISTIAN SCIENCE: A REASONABLE AND RATIONAL VIEW OF ALL THINGS. A Lecture. By FRANCIS J. FLUNO, M.D. 37 pages.

CHRISTIAN SCIENCE: THE RELIGION OF THE BIBLE. A Lecture. By JUDGE SEPTIMUS J. HANNA. 23 pages.

CHRISTIAN SCIENCE: HUMANITY'S HELPER. A Lecture. By PROF. HERMANN S. HERING. This pamphlet is also printed in German. 29 pages.

CHRISTIAN SCIENCE: ITS ADVANTAGE TO MANKIND. By EDWARD A. KIMBALL. A lecture delivered in London. 47 pages.

CHRISTIAN SCIENCE: MAN'S DOMINION OVER EVIL. By EDWARD A. KIMBALL. A lecture delivered at Harvard University. 28 pages.

MISCELLANEOUS

BIBLES. Clarendon Brevier (01483 x), heavy faced, very distinct type, Turkey morocco, size 6 1-2 x 4 3-8 inches, corresponding in size and binding to pocket edition of Science and Health. Price, $3.75.
Morocco cases, to hold pocket Science and Health and above Bible, may be had at $1.25.

Text Bible. (01561 x), pica square type, Alaska seal, size 7 1-2 x 6 1-4 inches, 1 1-2 inches thick. Specially adapted for use of Second Readers. Price, $7.25.

CHRISTIAN SCIENCE AND LEGISLATION. A pamphlet of one hundred and twelve pages, containing articles by JUDGE CLIFFORD P. SMITH, EDWARD A. KIMBALL, and JUDGE SEPTIMUS J. HANNA, together with testimonies of healing, editorial comments, etc. Single copies, 10 cents; twelve copies to one address, $1.00; twenty-five copies, $1.85; fifty copies, $3.50.

QUARTERLY COVERS, in black seal leather. Regular size, 5 1-4 x 7 3-4, $1.25 each or $12.50 a dozen. Pocket size, 4 1-2 x 6 1-2, $1.15 each or $11.00 a dozen.

QUARTERLY COVERS WITH CHANGE POCKETS. Regular size, $1.50 each or $15.00 a dozen. Pocket size, $1.40 each or $14.00 a dozen.

THE MOTHER CHURCH. By JOSEPH ARMSTRONG. A History of the Building of The Mother Church, The First Church of Christ, Scientist, in Boston, Mass. One hundred and three pages. Illustrated. One copy, $1.50; six copies, $7.00; twelve copies, $12.00.

PICTURE OF THE MOTHER CHURCH. A half-tone reproduction, size 12 x 15 inches, mounted on a white mat 21 x 25 inches. Single copies, 50 cents; a dozen copies to one address, $4.50.

SOUVENIR POST CARDS, showing picture of The Mother Church, 25 cents per dozen.

THE CHRISTIAN SCIENCE HYMNAL. Cloth, per copy, prepaid, $1.15 each; per dozen, $9.00; per half dozen, $5.00. Half morocco, per copy, prepaid, $1.40 each; per dozen, $12.00; per half dozen, $6.50. Full morocco, $2.50 each. Levant, $3.50 each. Pocket Edition, size 4 5-8 x 6 5-8. Full morocco. Per copy, prepaid, $3.00; twelve or more copies to one address, prepaid, each, $2.50.

MUSIC. Poems written by MARY BAKER EDDY and used by special permission, have been set to music, as follows:

"THE MOTHER'S EVENING PRAYER." By William Lyman Johnson. The arrangement for both high and low voice in the same copy. 75 cents the copy; $7.00 the dozen.

"CHRIST MY REFUGE." By William Lyman Johnson. Arrangement for high and low voice in same copy. 75 cents the copy; $7.00 the dozen.

COMMUNION HYMN.—"SAW YE MY SAVIOUR?" By William Lyman Johnson. Published in two keys for high and low voice. 50 cents the copy; $5.00 the dozen.

"BLEST CHRISTMAS MORN." By Frederick W. Root. Published in two keys, for high and low voice. 50 cents the copy; $5.00 the dozen.

"O'ER WAITING HARPSTRINGS OF THE MIND." By Frederick W. Root. Published in two keys for high and low voice. 50 cents the copy; $5.00 the dozen.

Please state when ordering any of the three last named whether high or low key is desired.

Our Catalogue for 1909, containing description and prices of above named literature and a selected list of Bibles, will be mailed free on application.
Remittances should be made by check, post-office money order, express money order, or exchange on Boston or New York. Currency or coin should not be sent by mail unless registered. Please send no money remittances or business letters to the Editor or Editorial Department.

Works on Christian Science

Written by MARY BAKER EDDY, Founder of Christian Science and Author of its Text-book

SCIENCE AND HEALTH WITH KEY TO THE SCRIPTURES. In one volume, 700 pp. Containing many important changes and additions by the author. THE ORIGINAL, STANDARD, and only Text-book on CHRISTIAN SCIENCE MIND-HEALING. This edition contains a fine photogravure portrait of Mrs. Eddy, together with a facsimile of her signature.
Price (cloth), single copy $3.18
Two to twelve books (cloth only) to one address, each 3.00
Twelve or more books to one address, each 2.75
Full leather, stiff beveled boards, gilt edges, same paper as in cloth binding, single copy 4.00
Twelve or more to one address, each 3.75
Morocco, limp, round corners, gilt edges, Oxford India Bible paper, convenient for pocket, single copy . . . 5.00
Twelve or more to one address, each 4.75
Levant, divinity circuit, leather-lined to edge, round corners, gilt edges, silk sewed, heavy Oxford India Bible paper, single copy 6.00
Twelve or more to one address, each 5.75
Orders for Science and Health in lots of twelve or more to one address may include any or all of the different styles of binding. The above prices are all prepaid.

MISCELLANEOUS WRITINGS—1883-1896. A book of 471 pages, containing articles published in THE CHRISTIAN SCIENCE JOURNAL since 1883, with revisions and additions.
Price (cloth), single copy $2.25
Twelve or more books to one address, each . . . 2.00
Morocco, limp, round corners, gilt edges, convenient for pocket, single copy 4.00
Twelve or more to one address, each 3.75
Levant, divinity circuit, leather-lined to edge, round corners, gilt edges, silk sewed, single copy 5.00
Twelve or more to one address, each 4.75
The above prices are all prepaid. Orders for Miscellaneous Writings in lots of twelve or more to one address may include any or all of the different styles of binding.
No discount will be allowed on orders for twelve books which include both Science and Health and Miscellaneous Writings.

CONCORDANCE TO SCIENCE AND HEALTH. This work contains about eighty thousand references (more than ten thousand words being indexed). It also contains an index to the Marginal Headings, and a list of the Scriptural Quotations in SCIENCE AND HEALTH. 607 pages, 10 x 7, and addendum, bound in cloth, marbled edges. Price, prepaid, single copy . $5.00
Twelve or more to one address, each 4.50

CHURCH MANUAL. Containing the By-laws of The Mother Church. Price, prepaid, single copy, $1.00; $5.00 per half dozen; $9.00 per dozen.

CHRIST AND CHRISTMAS. An illustrated poem.
Price, prepaid, single copy . . . . . $.30
Twelve or more books to one address, prepaid, each . 2.50

UNITY OF GOOD AND OTHER WRITINGS. One volume containing: Unity of Good, Rudimental Divine Science, No and Yes, Retrospection and Introspection, uniform in size with the pocket edition of Science and Health. Bound in morocco, limp, round corners, gilt edges, heavy Oxford India Bible paper. Price, prepaid, single copy, $3.50; six or more copies to one address, each, $3.25.

CHRISTIAN HEALING AND OTHER WRITINGS. One volume containing: Christian Healing, The People's Idea of God, Pulpit and Press, Christian Science *versus* Pantheism, Messages of 1900, 1901, 1902, uniform in size with the pocket edition of Science and Health. Bound in morocco, limp, round corners, gilt edges, heavy Oxford India Bible paper. Price, prepaid, single copy, $3.50; six or more copies to one address, each, $3.25.

UNITY OF GOOD. It lays the axe at the root of error, elucidating and enforcing practical Christian Science, thus affording invaluable directions for all true Scientists. Library edition, 64 pages, cloth binding, marbled edges. Price, prepaid, single copy, 65 cents; $3.00 per half dozen; $5.50 per dozen. Leather covers (pocket). Price, prepaid, single copy, $1.00; $5.00 per half dozen; $9.00 per dozen.

RETROSPECTION AND INTROSPECTION. A biographical sketch of the author. The way she was led to the discovery of Christian Science; its growth and fundamental idea. Library edition, 95 pages, cloth binding, marbled edges. Price, prepaid, single copy, $1.06; $5.00 per half dozen; $9.00 per dozen.

PULPIT AND PRESS. A unique work of importance in the history and to the readers of Christian Science; containing Dedicatory Sermon delivered at The Mother Church, and scintillations from the press of that occasion. 132 pages, cloth binding. Price, prepaid, single copy, $1.06; $5.00 per half dozen; $9.00 per dozen.

RUDIMENTAL DIVINE SCIENCE. An interesting and valuable book, containing a brief and concise statement of Divine Science, *alias* Christian Science, in the form of questions and answers. 17 pages. Leatherette covers, gilt top. Price, prepaid, single copy, 37 cents; $3.00 per dozen. Library edition, cloth binding, marbled edges. Price, prepaid, single copy, 55 cents; $2.50 per half dozen; $4.50 per dozen.

NO AND YES. A brief statement of very important points in Christian Science. 46 pages. Pebbled cloth covers. Price, prepaid, single copy, 27 cents; $2.50 per dozen. Library edition, cloth binding, marbled edges. Price, prepaid, single copy, 60 cents; $3.00 per half dozen; $5.50 per dozen.

MESSAGES TO THE MOTHER CHURCH. By Mary Baker Eddy, including Christian Science *vs.* Pantheism, and the Messages of 1900, 1901, and 1902. In one volume. Library edition, 94 pages, cloth binding, marbled edges. Price, prepaid, single copy, $1.56; $7.50 per half dozen; $13.50 per dozen.

CHRISTIAN SCIENCE *versus* PANTHEISM. The Pastor Emeritus' Message delivered at the Communion Season in The Mother Church in Boston, June, 1898. A clear and strong refutation of the charge that Christian Scientists are pantheists. 15 pages. Price, prepaid, single copy, 26 cents; $2.50 per dozen.

MESSAGE TO THE MOTHER CHURCH. The annual message of Mary Baker Eddy to The Mother Church on Communion Sunday, June, 1900. Leatherette covers, deckled edges. 15 pages. Price, prepaid, single copy, 26 cents; $2.50 per dozen.

OUR LEADER'S MESSAGE. The annual message of Mary Baker Eddy to The Mother Church on Communion Sunday, June, 1901. Deckled edges. 35 pages. Price, prepaid, single copy, 50 cents; $4.50 per dozen.

COMMUNION MESSAGE. The annual message of Mary Baker Eddy to The Mother Church on Communion Sunday, June 15, 1902. Deckled edges. 20 pages. Price, prepaid, single copy, 50 cents; $4.50 per dozen.

TWO SERMONS. CHRISTIAN HEALING and PEOPLE'S IDEA OF GOD. In one volume. Library edition, cloth binding, marbled edges. 36 pages. Price, prepaid, single copy, 60 cents; $3.00 per half dozen; $5.50 per dozen.

CHRISTIAN HEALING. A sermon delivered in Boston. 19 pages. Paper covers. Price, prepaid, single copy, 21 cents; $2.00 per dozen.

PEOPLE'S IDEA OF GOD. A sermon delivered in Boston. 14 pages. Paper covers. Price, prepaid, single copy, 21 cents; $2.00 per dozen.

FEED MY SHEEP. Words by Mary Baker Eddy. Music by Lyman F. Brackett. Price, prepaid, single copy, 50 cents; $5.00 per dozen.

CHRISTIAN SCIENCE SENTINEL

(THE CHRISTIAN SCIENCE WEEKLY)

PUBLISHED EVERY SATURDAY BY

THE CHRISTIAN SCIENCE PUBLISHING SOCIETY

Falmouth and St. Paul Sts., Boston, Mass., U. S. A.

ARCHIBALD McLELLAN, Editor.

JOHN B. WILLIS, ANNIE M. KNOTT,

Associate Editors.

SUBSCRIPTION PRICE

Single copy, one year, $2.00.

Ten copies or more to one address, one year, each copy, $1.90.

Twenty-five copies or more to one address, one year, each copy, $1.80.

Fifty copies or more to one address, one year, each copy, $1.50.

These rates apply in the United States, Canada, Mexico, and Cuba. In all other countries add 50 cents for postage on each subscription.

Six-months subscriptions received at half the above rates.

No subscription received for less than six months.

Subscriptions to the *Sentinel* will be entered to begin with the first of the month, and will include all issues for the month named as expiration date on the wrapper. The receipt of the periodical by the subscriber will be our acknowledgment of the subscription.

TERMS OF SALE

Five cents a copy, postpaid to any address in the United States, Canada, Mexico, and Cuba. In quantities to one address: twenty-five copies, $1.00; fifty copies, $1.80; one hundred copies, $3.00.

To all other countries, six cents a copy, postpaid to any address. In quantities to one address: twenty-five copies, $1.25; fifty copies, $2.30; one hundred copies, $4.00.

Bound Volumes: Current year and two years previous, cloth, $3.00; half calf or half morocco, $3.50. On earlier volumes write for prices.

Entered at the Boston, Mass., post-office as second-class mail matter.

ITEMS OF INTEREST.

National.

A bill is before the Massachusetts Legislature asking for a charter for "Massachusetts College." The object of this college is to give a college education to those who cannot afford the expense nor the time for attendance at any of the existing institutions. Various high school buildings throughout the state will be used during evenings and become "college centers." Local educators and "traveling" lecturers from other colleges will give instruction leading to the degree of A.B. The cost for a four years' course will be $138.

An effort is to be made in the present extra session of Congress to limit the volume of special pension legislation. Such legislation has grown rapidly, until during the last Congress about eight thousand bills, the object of most of which was to increase existing pensions, were passed. During the present session about one thousand bills providing for pensions not obtainable under the general pension laws have been introduced in the Senate alone.

Bids will be opened in the office of the quartermaster of the army within the next few weeks for the largest consignment of army clothing ever purchased in time of peace. The contract will aggregate about $4,000,000, and represents a year's supply. The largest single item is for eight hundred and twenty-five thousand yards of olive drab cotton cloth of the new shade of khaki, which has been adopted for summer military wear.

A suit which was brought in 1907 by the Metropolitan Securities Company to recover $602,202.82, paid by that company for the purchase of the Wall and Cortlandt Street Ferries Company, New York city, has been settled out of court by the defendants sending their check to the company for the amount they received in the original transaction in 1900. The property was bought for $250,000 and sold for $905,007.19.

The imports of the "Commercial Orient" amount to $2,150,000,000, and the exports $2,033,000,000. Of these imports five per cent are taken from the United States; of the exports, ten per cent are sent to the United States. India is the largest importer and exporter among the thirty countries included within what the Bureau of Statistics designates the Commercial Orient.

The American Sugar Refining Company of New York has completed payment of the duty due the Government on the reliquidation of its sugar entries in consequence of the recent finding in the United States Circuit Court. It was alleged in that case that the sugar was underweighed. The payments amount to $1,239,088.38.

A monument to Henry Wadsworth Longfellow is to be dedicated in Washington May 7. President Taft will participate in the unveiling ceremonies and Chief Justice Fuller will preside. The monument is situated at the corner of Connecticut avenue and M street, Northwest, and is of Bonacord marble from Scotland.

An injunction has been issued from the Circuit Court of St. Louis, Mo., restraining the Missouri railroads from returning to the three cents a mile passenger rate. The two-cent rate passed by the Legislature was pronounced illegal in the upper courts. It is possible that a compromise of two and a half cents may be effected.

It is possible that an order will be issued by the Navy Department to remove the figureheads from all United States war-ships. Many cities and states have gone to large expense to present handsome stem and stern ornaments to the ships which bear their names. Some of these bronze ornaments cost as much as $12,000.

The direct primary bill advocated by Governor Hughes of New York was reported adversely from the judiciary committee and defeated in the Legislature. As in the case of race-track gambling, he will take the issue before the people, and he looks for ultimate victory.

The Supreme Court of the United States has denied the motion for a rehearing in the case of the Waters-Pierce Oil Company, in which the court affirmed a decision by the Texas courts imposing a fine of $1,600,000 on the company, and ousted it from the state.

The report of the referee finds that the borrowing capacity of New York city on June 30, last, was $106,205,714. The permanent debt of the city is placed at $517,844,345.

A bill has been introduced in the New York Assembly to establish savings bank insurance along lines similar to the Massachusetts plan.

International.

The agitation against the operations of steam trawling vessels in the waters adjoining the eastern Canadian provinces is expected to result in the calling of an international conference to consider means of prohibiting steam trawl fishing. It is alleged that the steam trawls are ruining the fisheries, because a large proportion of the fish taken are rendered useless through crushing, and because of the destruction of numerous small fry.

A transaction involving the purchase of four million acres of Guayule rubber land and a dozen factories for manufacturing crude rubber from the Guayule shrub, has been completed by the Continental Rubber Company of New York, a subsidiary concern of the United States Rubber Company. This gives almost complete ownership of the Guayule rubber industry of Mexico.

Senora Castro, wife of the former president of Venezuela, has been refused admittance into that country, and her husband, who remained behind at Martinique, was put aboard a French steamer to be returned to France. The Powers are endeavoring to make it impossible for the ex-president to foment trouble in Venezuela.

The Mexican annual budget of expense carries more than $3,000,000 for a new national theater, $4,000,000 for educational purposes, $11,500,000 for improving irrigation facilities and the water system of the Federal district, and $1,000,000 for a monument to commemorate the one hundredth anniversary of Mexican independence next year.

A Chinese woman, Mrs. Chang, owns and publishes the *Pekin Woman's Paper*, a daily publication. It is her aim to keep before the public four things which she hopes to see brought about: the education of women, woman's rights, natural feet, and the breaking off from the opium habit.

The Portuguese government has decided to introduce a rigid system of inspection in Angola, West Africa, to put an end to the conditions of enforced labor among the native workers on the cocoa plantations, which have resulted in conditions akin to slavery.

The St. John River Log Driving Company last year rafted about seventy million feet of logs at a cost to the lumbermen of $1.05 a thousand feet. Estimates of the present winter's cut showed about one hundred million feet of logs taken out.

A bill has been introduced in the Mexican Congress providing for a subsidized line of steamers to ply between Seattle, San Francisco, and west coast ports of Mexico and Central America. The subsidy will amount to $5,000 a month.

An agreement has been arrived at between the French Cable Company and the Venezuelan government to open the cable service provisionally for the use of the company's private messages and official government despatches.

Industrial and Commercial.

Dr. Schlick's apparatus for preventing ships from rolling at sea has lately given fresh proof of its ability. One of his gyroscopes has been fitted on board the mail steamer Lochiel. While the vessel was rolling through a total angle of thirty-three degrees, the gyroscope was started, and immediately decreased the total angle of roll to three degrees. The apparatus is driven electrically and requires little attention.

The Santa Fé Railroad has just opened the new deep-water port at Bolivar, Tex., for export, import, and coastwise traffic. The Rock Island-Frisco interests and the St. Louis, Brownsville, and Mexico Railroad plan to open a deep-water port at Baffin Bay, near Kingsville, Tex.

The Southern Cotton Stalk Pulp and Paper Company of Atlanta has purchased a site for the location of its paper mill at Cordele. The mill will be not only the first of the kind in the South, but the first to manufacture paper exclusively from cotton stalks.

From Aug. 1, 1908, to April 1, 1909, the total shipment of potatoes out of Aroostook county, Maine, over the Bangor and Aroostook, reached 10,108,837 bushels. In this period also about 1,600,000 bushels were shipped via the Canadian Pacific.

The New York, New Haven, and Hartford Railroad is planning to extend its electrical equipment from Stamford to New Haven. The estimated cost will be about fifteen million dollars.

A Maxwell car recently completed a run of over ten thousand miles, covering a period of twenty-six days, without once stopping its engine.

Precious stones valued at more than $3,350,000 were imported during March by New York dealers.

CHRISTIAN SCIENCE SENTINEL

"WHAT I SAY UNTO YOU, I SAY UNTO ALL — WATCH" JESUS

EVIL IMPERSONAL.

SAMUEL GREENWOOD.

THE belief of evil masquerades before humanity in the guise of personality. It presses its delusions upon mankind through mortals themselves, and they yield to its suggestions because they do not recognize the deception. Christian Science is humanity's greatest benefactor in removing the personal mask from evil and in demonstrating it to be what Jesus declared,—a lie without origin or power of self-propagation. When mankind refuse to listen to sin's seductive suggestions, because they have learned that only good is real, evil will have no personal agency nor basis for manifestation, and must consequently become self-extinguished. Toward this goal of individual purification Christian Scientists are working for the regeneration and redemption of the human race.

In her work entitled "Retrospection and Introspection," page 64, Mrs. Eddy says, "The sin is the sinner, and *vice versa;*" and in that and subsequent pages she makes clear the vital point of the oneness and allness of God. Sin and sinner are but the premise and conclusion of the belief in life and intelligence apart from God, and are therefore one error. To eliminate sin is to eliminate the sinner also; one cannot remain without the other. This truth is illustrated in the influence of Christian Science upon individual character, a marked moral renovation and improvement of conduct invariably following the change of thought effected by this teaching.

Mortals have been taught to regard sinners as God's erring children, but this teaching would make God also the author of sin, since sin precedes the sinner (*Ibid.*, p. 67). It should be evident that God can produce neither sin nor sinner, inasmuch as good, in its very nature, destroys evil. Neither could God consistently condemn sin, if, as has been generally taught, He imparted to His offspring the power to become sinners, for this would be equivalent to denying the premise while accepting the conclusion. Sin and sinner are in the relation of cause and effect, and must stand or fall together. Evil is necessarily as unlike what God creates as it is unlike God Himself; hence the image and likeness of God never was and never could be a sinner.

From the human standpoint it may seem difficult to separate evil from the personality through which it appears to act, but unless this separation is made, the true concept of man as the divine idea cannot be gained. The only way to think of evil, either as abstract or concrete, consistent with one's belief in the allness of God, is as self-assertive error, as "nothing claiming to be something" (Science and Health, p. 591). Nothing but human ignorance of the omnipresence of good is capable of accepting or obeying the suggestion that there is something besides God, for it is clear that nowhere else could evil seem to have reality and power except in the mortal lack of knowing that God is All. But since ignorance is not a place or a person, since it is not an entity anywhere, evil is shown to be without a real foundation.

Evil is a suggestion of something besides infinite good,—a suggestion of life, mind, power, will, activity, consciousness, apart from God. As good is infinite, and is therefore incapable of knowing evil, evil, as the counterfeit of good, can know only itself. To the sense that recognizes evil as a reality, the true consciousness of man seems dormant, and an evil consciousness claims to take its place, as is the case in the belief of hypnotism; but this evil consciousness is evil itself, and is the whole illusion and delusion. If one could but see the vital importance of preserving a normal and scientific sense of things, he could never be deceived by false suggestions; and likewise, where the divine concept, the Christ-idea, is always active in human thought, evil can find no arena for its asserted activity, and no opportunity to present its delusions.

In human belief there is a quality called anger, another called hate, another called malice, revenge, jealousy; and so on through the list of evils too familiar to all mortals. Now, what is it that is active in one's thought when he is said to be angry? What prompts the wrathful word? Is it something essentially different with each person, or is it the same identical wicked suggestion that has ever incited mankind to evil words and deeds? If anger were a person, who is that person, and of whom was he born? Or if anger is any part of a person, would one continue to be a whole person when he had completely overcome this evil? Is not anger rather the repetition of the same evil suggestion, whenever or wherever it is presented?

Human ignorance or apathy may allow evil to assert itself as personality, but in reality it is the sin itself that sins or is the sinner, and not the man whom God created. The individual in his true self expresses love, not anger; then what can express it, in belief, but anger itself? What but deception can deceive, what but evil can do wrong? Truth cannot utter falsities, and that which does so must be of the same nature, and is itself a falsity. It is impossible for love to hate, or to express itself as a hater; hence that which appears to hate is not related to God, divine Love. Who has not stood, after a storm of passion is passed, and felt that he has been beside himself, that he has acted a false part, has been as one possessed, and has endured agonies of shame at the remembrance? It was plainly an evil sense, and not an inherent personal quality, that thus storm-swept the unwary and unguarded thought and used it for its own base purpose.

But this does not absolve from responsibility the one who consents to become a channel for evil works. A wolf entering a sheepfold through the shepherd's negligence is the doer of the mischief, but the shepherd is held responsible therefor. Every mortal is as a shepherd, keeping watch over his thoughts or leaving them unguarded; and while it is the sense of sin that sins, he suffers who lends himself to its delusions and becomes its dupe. Anger, envy, hate, all the phases of evil which, as wolves that seek to destroy human innocence, to prey upon the holiest aspirations of mortals, murdering their gentler and kindlier feelings of love,—these evils have never been a man or a woman. Let mor-

Digitized by Google

tals remember this, and guard their thoughts from these intruders.

One under the control of evil suggestions is in a mental and moral delusion, and the only way to help him is to awaken him from his delusion; but love, not censure, must be the motive power in this work. We may condemn evil without mercy under its own name, but not under the name of its victim. Though others have wronged us, it only makes wrong-doers of ourselves to cherish resentment against them; but Christianly and scientifically to resent or deny the evil impersonally, helps to destroy it. Man's real personality is good, because it is of God; and mortals are in their right mind and express true being only as they are conscious of goodness, "man's real ego" (No and Yes, p. 26). When we understand that obedience to Truth, and its results, deliver us absolutely from any belief in mesmerism, and that the false sense which claims to think and act as person has no reality, we shall reserve our condemnation for the belief in evil, while we keep our brother's place holy in our thought.

"THE SWORD OF THE SPIRIT."

ARTHUR E. JENNINGS.

ERRONEOUS charges of inconsistency in the Bible narratives and sayings of our Lord, are fast melting away through Christian Science. As the errors of sense in mortal thought are uncovered and destroyed, and self-righteousness gives place to humility, the sublimity and completeness of the Word of God becomes understood. This is due in a very large measure to the study of the Bible with Science and Health, as set forth in the Lesson-Sermons of the *Christian Science Quarterly*. There is an understanding gained from this study which we are able to make our own, and yet we get this spiritual insight only as we apply the Christ-Science to our needs.

To the student, the link between Principle and these two books is a revelation, but it takes time to define and express it. The student, then, should not be discouraged because he finds many things "hard to be understood." This simply means that he has farther to go in his own demonstration. In Science and Health there is an answer to every question, and if he will only search he will find it out. The action of truth is "quick, and powerful, and sharper than any twoedged sword," but there are very few who at first understand that it is a help to see and experience more of the difference between Truth and error. True, the two never really meet because of their opposite-ness, and yet when error is destroyed, that is, when wrong thinking and wrong actions are changed, we know that Christ, Truth, has made the correction.

In many parts of the Bible we learn much that is beautiful about the Saviour,—his appearing, his life and example, and much also that seems very like harsh treatment of those who opposed him. Isaiah cried, "Surely he hath borne our griefs, and carried our sorrows." Jesus did this, and then declared, "Whosoever will be great among you, let him be your minister; and whosoever will be chief among you, let him be your servant." His life and teaching here reveal the most loving condition of thought. It is recorded that "he healed all that were sick: that it might be fulfilled which was spoken by Esaias the prophet." Now note the effect of the Truth-healing. We find Principle at work as follows: "When he had made a scourge of small cords, he drove them all out of the temple, and the sheep, and the oxen; and poured out the changers' money, and overthrew the tables; and said unto them that sold doves, Take these things hence; make not my Father's house an house of merchandise. And his disciples remembered that it was written, The zeal of thine house hath eaten me up." For a while it is difficult to reconcile these seeming differences in the nature and offices of the Saviour, and it is only through experience as well as an understanding of Christian Science that we are able to love the Principle which corrects our errors. This is indeed "the sword of the Spirit,"—the sword of love; not the "flaming sword" which we in infancy pictured as traveling round the garden of Eden, but the knowledge of Truth and its operations.

As we advance we rejoice to have our own faults and mistakes uncovered, and if necessary made known. This experience makes us loving, tender, and meek, and anxious to do our own work with the thought of love uppermost in our hearts. We cannot remain at a standstill in thought or activity. It is not sufficient simply to stop saying unkind things. We must then go on saying and doing kind things whenever the opportunity presents itself. Even a theoretical knowledge of love is better than ignorance on the subject, but to put love into practice is what helps humanity. Sometimes the student is apt to think that if only the older students would explain some delicate point it would be such a help, but he seldom thinks that all are working out their own problems. There are many questions affecting our existence which need to be answered definitely, but we get the answers only as we are ready for them. It is true that we must come out of material sense, but that does not mean the annihilation of the body or the belief that something is wrong with God's creation. While Jesus was on earth he showed what the perfect man may do, because he had overcome material sense.

The difference between the Christian Scientist and the non-Scientist on all questions is a mental difference. The struggle with sin, animality, and hate is caused simply by false belief, and it is the knowing of the truth about God, good, that solves all the problems. The recognition and demonstration of God as supreme in all that pertains to life will melt away false material sense. If we can see that all the changes to come are mental, we shall soon understand that the right concept of existence here is what we most need.

"WATCH YE THEREFORE."

ANNIE M. PAYNE.

ACCORDING to St. Mark, Jesus gave the reason for this command to watch in these words, "For ye know not when the master of the house cometh, at even, or at midnight, or at the cock crowing, or in the morning: lest coming suddenly he find you sleeping." Elsewhere Jesus said, "Lo, I am with you alway," and if Christ be thus ever-present how can we watch for his coming? The very placing of these texts in juxtaposition at once shows us that this "master of the house" is neither material nor personal, but rather Truth, the Comforter, the "I am;" that Truth, although ever-present, yet "cometh" (is revealed) to the individual thought in the measure that thought is prepared to receive it.

Watching, then, must be a continuous state of resistance to all evil, and loving welcome to all that is good. In the even of rest and security, we watch that peace may not give place to the mists of indolence. In the midnight of wrestling with a sense of bodily or mental suffering, we watch against discouragement and faith's denial. At the cockcrowing, when some new hope startles with its jubilant call old habits of sleep and dreams, we watch against pride and self-complacency. In the glowing morning of "revelation and progress" (Science and Health, p. 591) we watch against the seductive notes of ease, the myriad claims of animal magnetism. Our Lord cometh! omnipresent good penetrates gradually the human consciousness and seeks to

Digitized by Google

bring "into captivity every thought to the obedience of Christ."

The need to see in a neighbor only the divine image, brought a few days ago the thought that our Lord might come suddenly in that neighbor's demonstration over the besetting sin, and unless the watch were maintained, one might be still sleepily holding him to it in thought, and so be guilty of malpractice! This consideration revealed another opportunity for watching, for as the above thought struck home, this flashed forth: "But I shall never be able at all times to keep clear of the sense of such a conspicuous moral claim." Lack of trust and humility, induced by the arch-enemy, fear, had now to be routed. Into that "city of God," man's perfect consciousness, "there shall in no wise enter . . . any thing that defileth;" and hence it is indeed our duty to "stand porter at the door of thought" (Science and Health, p. 392). Little daily concessions to wrong habits, indolence, idle comment, audible or silent criticism, are so many "little foxes, that spoil the vines" while the grapes are yet tender, while thought is but learning to free itself from its mortal fetters.

GRATITUDE.

GENEVIEVE BOOTH.

FROM time to time my attention has been drawn to the opposition manifested by some who are becoming interested in Christian Science, to what they deem is the adulation of Mrs. Eddy. It seems to be the last resisting thought of those who might otherwise be benefited by entering in. I have been through this phase of experience myself, and have come to see how little it amounts to. The announcement of the name of the author of Science and Health at the services, and expressions of gratitude to her at the testimonial meetings—why should these ever be obnoxious to visitors? Is it not, perhaps, because gratitude is one of the least practised and understood of all virtues? We know that mankind is so actively engaged in "getting," that even the human idea of love is mainly selfish and depends upon some return, instead of existing by its own inherent worth and by the inestimable privilege of having found a nature noble enough to call it into being. Men, as a rule, do not like to be under obligations to others. They prefer to be considered independent and self-sufficient. Says Shakespeare,—

> Neither a borrower nor a lender be:
> For loan oft loses both itself and friend.

If a person is unable or disinclined to make some return for a favor, the obligation often becomes a cause of estrangement. Here we see that it takes a very lofty nature to sustain an obligation.

At the time that I was struggling with a personal sense in regard to the constant references to our Leader, I had not made a practical application of the Principle and rule of Christian Science. I had, however, been benefited by the work of others, and was convinced of the truth and efficacy of this teaching. Then came a sudden opportunity to apply the rule, and the demonstration was instantaneous. From that time the gratitude expressed for Christian Science ceased to be a stumbling-block, and there has grown up instead a sense of appreciation such as I have never known before. The scientific certainty of the operation of the rule shows me the Spirit of truth guiding into all truth, and no matter how slight the understanding may be, he who is able to demonstrate even a little in Christian Science has "seen a great light," and he begins to gain some small idea of the unselfishness and consecration of the life of her who has brought this knowledge anew to the world's apprehension. Thankfulness to God, and to Mrs. Eddy, wells up in his heart, and this is in itself a call to higher thought and action. Perhaps it is not realized today to what extent Mrs. Eddy's writings have been used by others without her authorship having been acknowledged. The wisdom of announcing the references from Science and Health in our services is patent, *i.e.*, that Mrs. Eddy's writings may not be confounded with those of others.

It does seem, that with the growth of the Christian Science movement and the unnumbered host of its cultured and intelligent followers, the charge of too much gratitude to our Leader should fall of its own weight. The world honors those who have in material ways won distinction in its service. We vie with each other in seeking the acquaintance of those who by their talents cause us to pass pleasantly an hour or two of our time, without so much as approaching the depths of our being or inspiring a thought that would be productive of any future good. We in this country have some reason to be grateful to Columbus for discovering America, and we did not hesitate to express our admiration of that intrepid mariner by celebrating the four hundredth anniversary of the event in a magnificent manner and in erecting statues to him. Is there anything strange in this? Columbus sailed westward on an unknown sea with his inspired idea as his guide. He held his mutinous men in subjection by the strength of his conviction, and found a new world. We do well to acclaim him!

Our revered Leader set sail alone on the sea of mortal thought, with its turbulent waves of sin and disease, and guided by the light of the teachings and life of Christ Jesus has given to each one of us a new world, the world of Spirit and of freedom; the magnitude of whose meaning we as yet but dimly discern. We know the opposition that has met this coming of the Christ-idea, and the courage and faithfulness with which Mrs. Eddy has withstood it all. Said Jesus, "Heaven and earth shall pass away, but my words shall not pass away," and his saying has been proved true. Is it strange that we are grateful? Surely not the least we have learned is to be thankful that we are thankful. Often before we have come to God with our plaints and with our desires, but now we know how to offer Him gratitude, as Mrs. Eddy so beautifully phrases it in one of her hymns, "with love perfumed" (Miscellaneous Writings, p. 396).

THE CHANGED THOUGHT.

ERNESTINE HADKINSON.

A SHORT while ago the writer came across a newspaper cutting referring to a correspondence, dating back to about the middle of the last century, between a Dutch ancestor and the Greek philosopher Adamantios Korais, who had been an eye-witness of the French Revolution. After having given a description of what he believed he saw, Korais ends by saying: "Whosoever has seen such atrocities committed before his very eyes, is even then not capable of seeing the true state of things. Eyes we have, but they see not; ears we have, but they hear not; only the mouth speaks without judgment what the eye did not see and the ear did not hear." The reading of this last passage reminded me of an experience I had, not long ago, on a farm in the interior of Macedonia.

After a few years' study of Christian Science I had been obliged to go back to a place where I had, during seemingly endless years, gone through some of the experiences which Korais describes. Lying awake one night, I was thinking about the villagers, and the bands of discontented men who were that very night passing over the land, ready to give their lives for freedom. Behind them they left crying children and anxious women, who looked forward with dread upon what was to happen the next day.

In "Unity of Good" (p. 56), Mrs. Eddy writes: "Hold-

Digitized by Google

ing a quickened sense of false environment, and suffering from mentality in opposition to Truth, are significant of that state of mind which the actual understanding of Christian Science first eliminates and then destroys." It was about midnight that, lying there sleepless, I was trying to prove to myself the truth of these words. Suddenly a cock crowed, and a few seconds after, another answered this loud call in the distance; then from a greater distance and fainter came yet another call, and I knew that the watchword had been passed on, and with this sound there came suddenly a great sense of joy into my awakened consciousness.

Right there, in the midst of this night of foreboding, was the herald of the morning, reminding me of our Leader's definition of morning as "light; symbol of Truth; revelation and progress" (Science and Health, p. 591). In this statement was to be found the solution of the problem of years, this struggle for freedom, and of all other seeming earthly difficulties as well. During the dark nights before the knowledge of Christian Science had come to me, this cock-crowing at night seemed a disturbance to rest; now it was a sound "as the birth of Truth, the dawn of divine Love breaking upon the gloom of matter and evil with the glory of infinite being" (*The Christian Science Journal*, December, 1907). I then saw that as the cock announces the day in the darkness of the night, so our beloved Leader, having seen the truth of being in advance of others, is awakening mankind from the dream of life and intelligence in matter. I also saw that the floods of hate and greed have no impulse, for they have no source from which to flow. God's thoughts are floods of love, and as the heat of the sun makes the waters of stagnant pools to evaporate, so the "Sun of righteousness" will dispel all the beliefs of suffering and of revenge, and establish the brotherhood of man.

THE NINETY-FIRST PSALM.

JOHN ASHCROFT.

WHILE passing through one of those experiences which help us finally to understand the supremacy of Mind, the writer's thought dwelt frequently on that beautiful psalm so dear to Christian Scientists,—the 91st,—and it became a source of great comfort and help.

The authorship of this psalm appears to be unknown. It is sometimes attributed to David; but while he undoubtedly experienced "the terror by night," and was exposed to "the arrow that flieth by day," it is quite possible that the psalm was written by Moses, to whom is credited the one preceding. Some of the expressions used seem to indicate this: "the pestilence that walketh in darkness;" "the destruction that wasteth at noonday;" "neither shall any plague come nigh thy dwelling,"—all these seem to be associated with the thought of the one who led Israel out of Egypt. However this may be, the psalm was certainly written by one who had proved God's goodness and protecting care; one who knew that only by dwelling "in the secret place of the most High," can man "abide under the shadow of the Almighty."

The understanding that man is spiritual, not material, as gained from the study of the Christian Science text-book, alone makes such abiding possible; and begets the confidence which can truthfully say of the Lord, "He is my refuge and my fortress." To the possessor of such confidence there is always the comforting assurance, "Surely he shall deliver thee." Throughout the Scriptures fear is recognized only to be denied and destroyed, and the injunction, "Thou shalt not be afraid," found frequent confirmation in the teaching of our Master. Our Leader also reaffirms this uplifting thought in the Christian Science text-book, Science and Health, and as we put in practice these teachings we come to know that fear can never disturb us if we are constantly conscious of the ever-presence and all-power of God, good."

In the declaration, "Because thou hast made the Lord, . . . even the most High thy habitation; there shall no evil befall thee," there is a constant stimulus to that effort which leads to the realization of the protection of infinite Love. In Revelation we read, "Blessed are they that do his commandments, that they may have right to the tree of life." The definition of angels, given on page 298 of our text-book, illumines the promise, "He shall give his angels charge over thee;" and enables us to understand how we may be kept in all our ways. We are to "tread upon the lion and adder,"—upon the error which we are apt to fear because of its roar and appearance of strength, and upon the evil which seems to glide in unseen, in silence and subtlety.

And now there follows a remarkable change in expression. It is as though divine Love had been listening to the sweet singer, and now takes up the strain; as though the writer heard and recorded the audible utterance of Truth. Again is reiterated the thought of right effort, and its result; of adherence to Principle, and its reward: "Because he hath set his love upon me, therefore will I deliver him;" "He shall call upon me, and I will answer him;" "With long life will I satisfy him, and show him my salvation." In the marginal reading "long life" is rendered "length of days," and our Leader has given the word "day" a new and broader meaning in the Glossary of Science and Health, where she says (p. 584): "Mind measures time according to the good that is unfolded. This unfolding is God's day, and 'there shall be no night there.'"

[Written for the *Sentinel*.]

ATTAINMENT.

ELLEN ALMIRA DOW.

No longer strive thyself to run in mold
  Preparéd for another man; nor make
  A model for thyself; but gladly take
The matchless form that man has borne of old
When morning stars with song did dawn enfold,
  And sons of God with shouts of joy did break
  The silence of the spheres and echoes wake
That through the æons ring in dale and wold.

Forgotten then will be the days of pain;
  The nights wherein no peaceful rest was found.
The sense of loss will never come again,
  For everlasting arms shall fold thee round.
This, passing through the door of Truth, attain—
  Yet know it is not reached by sudden bound.

SENTINELS OF SPECIAL VALUE.

The Publishing Society has in stock a number of copies of *Sentinel* No. 6, Vol. IX., containing the article "What Our Leader Says" as last published, and *Sentinel* No. 14, Vol. IX., containing the article "Harvest," also by our Leader. As these articles are of abiding interest and value to the Field the Society will be glad to supply them, postpaid, at the following prices: 1 copy, 5 cents; 5 copies, 15 cents; 10 copies, 25 cents; 25 copies, 50 cents; 50 copies, 85 cents; 100 copies, $1.50.

On foreign orders add 2 cents a copy to cover postage.

SELECTED ARTICLES.

[Extract from speech before the Pennsylvania Legislature.]

[We are glad to present herewith some excerpts from a speech by General Hulings on a medical bill which was under discussion by the upper house of the Pennsylvania Legislature. The speech throughout was deeply interesting, and characterized by a spirit of liberality and progressiveness as well as freedom from mere personal bias.—EDITOR.]

I have a very high regard and appreciation of the members of the medical profession as I know them, and yet I sometimes think they are more prone to professional jealousies than are the members of almost any of the other professions. Twenty-eight years ago, as a member of the House, I found the regular physicians fighting tooth and nail to prevent the recognition of the homeopaths. Today I find the regulars cheek by jowl with their formerly detested enemies the homeopaths, making common cause to keep the other fellows out. Now, it would be all very well to prohibit all persons from practising medicine unless they happen to be of a certain school, if the public were sure that this school knew all there is to be known of the healing art, but there are hundreds of thousands of good sensible people in this state who do not think that any of the so-called schools know all there is to be known.

When John Drawbaugh invented the telephone down here in Lancaster county, his neighbors thought him crazy. He spent much of his time in an upper room of his house, talking into a box, and the wise ones thought him insane; but he was simply putting into operation laws of which his neighbors knew nothing. The wizard of Menlo Park called into operation new laws, and we have the telephone, the phonograph. Marconi, in the discovery of that strange and mysterious power to send messages thousands of miles without even a telegraph wire, created nothing new. He simply called into operation laws which had always existed, but which, until his day, were unknown. These people of whom I speak claim that there are still great things to be known. They claim that there are forces which, properly invoked and set in operation, will add enormously to the power of the healer and his command over disease. So far as I am personally concerned, I have given my faith and adherence to the splendid men of the regular medical profession whom I have from time to time called into my family in case of illness. But I do not shut my eyes to the fact that there are hundreds of thousands of people in this country—in this state—who say that the world is moving; who believe that there have been wonderful discoveries in this regard made in the healing art, and I am not prepared by my vote to say that through legislation of this sort they shall not be at liberty to call to the ministration of their diseases men who practise the arts in which they believe. I am not prepared with my vote to say that they in case of illness shall be obliged to call in as physicians men who practise in a school of medicine in which they do not believe.

[Albert E. Miller in *Philadelphia Inquirer*.]

Your review rather leaves the impression that Christian Scientists cling to their religious belief, to the exclusion of medical treatment, through a fanatical sense of faith in prayer, rather than upon what is believed to be a rational reliance upon medicine.

The average Christian Scientist has had a surfeit of medicine. In many instances he has been reclaimed through Christian Science from a condition of almost hopeless disease. He discards medicine for something better, and naturally prefers to share with his family the benefit of his own experience. If the results did not justify this proceeding in the Christian Science household, it would be speedily deserted and the family physician recalled, for the average Christian Scientist shows at all times a determination to live and enjoy good health. The children of such a household are by no means permitted to suffer without proper attention. Their ailments are carefully looked after and corrected through Christian Science treatment, and the slightest evidence of the presence of contagious or infectious disease is deemed sufficient reason for calling upon a licensed physician to diagnose and report such cases, thus bringing these diseases directly under the supervision of public health authorities.

In their faithful effort to banish disease from thought and conversation, the members of Christian Science households maintain a better order of health and happiness than before awakening to the necessity of excluding from the thought what one does not desire to have manifested physically.

[J. V. Dittemore in *Auburn* (N. Y.) *Citizen*.]

Our critic is right in stating that Christian Science "is nothing if it is not a religion" and a very old one. Webster defines religion as "the recognition of God as an object of worship, love, and obedience." Christian Science accepts this definition and affirms that men's apprehension and understanding of God and His laws will bring to humanity today as of old the full measure of blessings promised by the Master to "them that believe" and understand. It is also true that Christian Science "is an old religion," because God has always existed and His laws have been ever operative and ever available to those who have apprehended and demonstrated their verity. Christian Science affirms that the so-called miracles of Jesus were based on a definite, unvarying, ever-operative, divine Principle: that they were not supernatural and in contravention of law, but that they were the natural and inevitable results of his spiritual understanding and correct application. The supremacy of spiritual power over material conditions has been demonstrated by prophets and apostles of all climes and ages.

The clergyman is wrong, however, in stating that Christian Science "antagonizes every fundamental tenet of the word of God, and entirely undermines the foundation of Christianity." It would be correct to state that Christian Science uncovers and makes plain to mortals the fallacies of man-made theology which have become confused with the true "word of God," and it is also true that Christian Science "undermines the foundation" of that false conception of Christianity which bases its claims on superstition, ignorance, and blind, unreasoning prejudice. The doctor's conception of Satan is certainly interesting. He tells us that "next to God" he is the most powerful being in the world. If there were such a being as Satan, and if he had any power whatever, God would no longer be omnipotent. Fortunately this medieval superstition is today confined to a very small coterie of theologians, and in the light of intelligence the world is rapidly perceiving that the only "devil" is impersonal evil, and the only "hell" the suffering we experience for our sin, ignorance, and obedience to false man-made beliefs.

Our critic has an erroneous idea of the Christian Scientists' conception of the unreality of matter. The entire import of the teachings of the Master was to show that "heaven and earth," the material sense of existence, "shall pass away," but that his "words," the truth he voiced—the spiritual understanding of God and His laws, "shall not pass away." In relation to mortal man he said, "It is the spirit that quickeneth; the flesh profiteth nothing."

The critic is nearer the truth in stating that Christian Scientists affirm sin to be "an error which can be thought away." All sin is of mental procurement. The thought precedes the action. Therefore, as mortals "put off the

Digitized by Google

old man" and gain more of that Mind "which was also in Christ Jesus," ignorance and false beliefs will diminish until they disappear, and it will then be obvious that they were destructible, therefore unreal, and no part of the reality or permanence which characterize the true creations of Deity.

The clergyman is forced to admit that "Christian Scientists can quote the Bible freely." This should convince him that they are at least seeking for truth. As a matter of fact, Christian Scientists depend wholly on the spiritual import of the Scriptures. They trust their very lives to its teaching, and surely no better evidence of one's faith in the teachings of the Bible could be given.

[George Shaw Cook in *Oak Leaves*, Oak Park, Ill.]

Our critic's assumption that the Christian Scientist in the treatment of the sick is entirely without discrimination as to differing types of disease, and, as he puts it, sees no "difference between smallpox and pimples," is hardly warranted by the facts. However, it may be truly said that Christian Scientists do not carry the question of discrimination to the extent of saying that one class of diseases may be healed by divine power, while another class may not be so cured. They find no warrant in the Scriptures for concluding that fundamental and nervous disorders may be cured by the power of God, but that organic diseases must be left to the skill of man, thereby putting human skill above the divine power. The psalmist declares that God "healeth all thy diseases," and it is not recorded that Jesus differentiated between the classes of disease in his treatment of the sick.

The success of Christian Science in the healing of physical disease seems to be the feature which is very frequently emphasized in discussions of the subject, probably for the reason that this is the phase of Christian Science which at first most strongly appeals to the average investigator. However, while this successful healing of "all manner of disease" is a matter of intense interest to those who have heretofore been engaged in a desperate and unsuccessful warfare with sickness, nevertheless it is a fact that one cannot be long acquainted with Christian Science without discovering that its chief work is that of moral regeneration. Indeed, one could not possibly be healed in Christian Science without becoming, in some degree at least, less sinful. In this connection it is interesting to note that the critic often makes the mistake of supposing that Christian Science teaches that sin is "best conquered as it is ignored."

No one who is correctly informed on this subject would suppose for one moment that Christian Scientists believe that they can get rid of sin by ignoring it or by simply calling it a delusion. Christian Science woos the sinner from his sin by convincing him that he need not fear sin and cannot love it, because it is not of God. It shows him that God does not create sin, and that He does not permit its existence. It teaches him that sin and evil are entirely contrary to the will of God and that they have nothing to do with God's man. Thus it induces the sinner to abandon his belief in the reality, power, and pleasure of sin, and enables him to win forgiveness by forsaking sin. For this reason it will be seen that it is a mistake to suppose that in teaching the unreality of sin Christian Science encourages the indulgence of sin. On the contrary, it awakens the sinner to the absolute necessity of gaining a love for goodness that will enable him to abandon not only the flagrant forms of immorality and vice, but also the more subtle phases of evil.

[C. R. Munro in *Sarnia* (Can.) *Canadian.*]

Christian Science teaches that in the realm of ever-present Spirit there is no sin; and so does the Bible, as for instance in the text, "Whosoever is born of God doth not commit sin; for his seed remaineth in him: and he cannot sin, because he is born of God;" but sin is very real to one who indulges in it thinking he finds pleasure therein. Christian Science does not ignore sin, but it does insist that sin was never created by God, who made all that was made and pronounced it "very good." Being no part of His perfect creation, it therefore has no real existence, and hence is only temporal or mythical. The mere denial of sin, however, will not overcome it, and Mrs. Eddy says in Science and Health (p. 29) that Christians "must grapple with sin in themselves and in others, and continue this warfare until they have finished their course." By ceasing to indulge in sin, by putting it aside and by realizing the ever-presence and omnipotence of God, in whom there is no sin, we prove its unreality and its powerlessness over us, and are able to rise above it and destroy it. And this is the denial of sin in Christian Science.

The charge that Christian Science denies the personality of God is misleading. If by "personality" is meant finite personality, then Christian Science does deny that God can be a finite personality, for how can a God who is infinite, eternal, ever present, and all powerful, be at the same time finitely personal? Mrs. Eddy says in Science and Health (p. 116): "If the term personality, as applied to God, means infinite personality, then God *is* infinite *Person*,—in the sense of infinite personality, but not in the lower sense. An infinite Mind in a finite form is an absolute impossibility."

To speak of Mrs. Eddy's book as the "Bible of the sect" is entirely misleading. Science and Health is in no sense a substitute for the Bible, and has never been considered so either by Mrs. Eddy or by Christian Scientists. It is simply what its title indicates, a "Key to the Scriptures;" in other words, it is the Christian Scientists' commentary on the Bible, and they have as much right to use it in that way as the reverend critic himself has to use his denominational commentaries on the Bible.

[H. Coulson Fairchild in *Newark* (N. J.) *Star.*]

We would like to ask our critic if he considers the Mind which was in Christ to be too extreme when this Mind healed all manner of sickness, raised the dead, and cast out all the errors of the human mind with the word of Truth. It seems to us that it is our privilege in this age to know that the Mind which was in Christ Jesus is equal to any and every emergency. There seems to be danger, in this material age, of limiting the power of infinite Mind, "who forgiveth all thine iniquities; who healeth all thy diseases." The tendency of some movements is thus directed toward the human mind or animal will as a curative agent. Now we all know that human will-power is hedged about with limitations. These limitations of the human will preclude any possibility of permanent or successful healing by means of will-power.

Our critic says "it does not logically follow, because the mind can cure one disease, that it can cure all." We answer that if it be the Mind which is God, the Mind which was in Christ Jesus, which causes the sick to be healed and the sinner to reform,—that this infinite Mind is absolutely unlimited. All things are possible with God; hence it follows that so-called functional and organic diseases are healed by one and the same Christlike method.

Christian Science healing admits of no limitations, as it is based upon the omnipotence, omniscience, and omnipresence of God. Our conclusion, therefore, must be that any system which admits its limitations in the healing of sin or disease cannot be depending upon the divine Mind for its healing power. Such systems must therefore be without a real curative Principle, and dependent either upon blind belief or upon faith in the power of the human will, which St. Paul describes as the carnal mind, and which he declares is "enmity against God."

[Willard S. Mattox in *Toronto* (Ont.) *World*.]

The gentleman who is discussing Christian Science in your columns begins his article by venturing the prophecy that Christian Science "will never become popular—never become the religion of the common people." Unfortunately for his argument, the fact is that Christian Science has already become popular, and a glance at the composition of its churches will prove that it is distinctively the religion of the common people. All classes are represented in its ranks, and the reason for its popularity is that it gives results, it satisfies those who are seeking a whole salvation,—not only a surcease from sin, but a panacea for physical suffering.

Christian Science does not repudiate the Scriptures, as some of our critics would have the public believe. We simply differ in our interpretation of the Scriptures, just as Martin Luther differed from the orthodox church of his day, just as John Wesley differed from the established church of his day, and just as dozens of other religious thinkers have dissented from some form or other of popular religious dogma. In attempting to understand the Scriptural exegesis of the Christian Scientist, its fundamental premises must be kept in mind. The whole teaching of Christian Science is based upon the primary statement that God is Spirit, and since God is declared in the Scriptures to be the only creator, we have in Christian Science the corollary proposition that all causation is spiritual. We have the Scriptural warrant for believing also that Spirit is not matter, nor like matter, but rather that it is the very opposite of matter. Paul said, "The flesh lusteth against the Spirit, and the Spirit against the flesh: and these are contrary the one to the other." Holding such views, sustained, as we believe they are, by the Scriptures, it will be understood that the Christian Scientist's interpretation of the Bible is not material or physical, but rather spiritual or supersensible. Now we believe most emphatically in the resurrection, and we also believe that it is "the immediate effect of our Lord's coming," but we hold that the statements as to the resurrection of the dead are to be construed not literally, nor materially, but metaphysically.

Jesus said, "The flesh profiteth nothing:" and at another time he said, "Ye do err, not knowing the scriptures, nor the power of God. For in the resurrection they neither marry, nor are given in marriage." These statements do not, in the opinion of Christian Scientists, warrant them in believing that matter is to be perpetuated eternally; consequently they do not think of heaven as a locality peopled with material bodies. We cannot do better than to quote Mrs. Eddy's spiritual definition of resurrection, which she gives on page 593 of Science and Health as "spiritualization of thought; a new and higher idea of immortality, or spiritual existence; material belief yielding to spiritual understanding." It will be seen that the resurrection thus defined is "the immediate effect of our Lord's coming," that when the Christ or the spiritual idea appears to man, there takes place that awakening from a sordid material outlook on life to a wider and higher spiritual understanding, which is really the resurrection. It will be remembered that Jesus said to Martha, "I am the resurrection, and the life," and this he declared before his crucifixion and resurrection from the tomb; consequently we feel justified in believing Jesus meant to convey not a literal but a metaphysical sense of the resurrection, else why would he have described himself at that period of his personal existence as "the resurrection."

Basing all of its teachings about life, present and to come, upon the Scriptural statement that God is Love, Christian Scientists find it impossible to believe in the eternal and never-ending death of any part of God's creation. We are, if you please, universalists with respect to the question of salvation. Paul said, "For as in Adam all die, even so in Christ shall all be made alive." Here is no indication that any of God's children are to be consigned to eternal punishment. Jesus is spoken of as "able also to save them to the uttermost that come unto God by him, seeing he ever liveth to make intercession for them." If he "ever liveth," and is always ready to make intercession, then there cannot be a time when man is hopelessly lost, when salvation through Christ is not available. Mrs. Eddy very clearly states the Christian Science view in the third of the tenets of the church: "We acknowledge God's forgiveness of sin in the destruction of sin and the spiritual understanding that casts out evil as unreal. But the belief in sin is punished so long as the belief lasts" (Science and Health, p. 497).

It would, according to Christian Science, be inconsistent with the teaching that Deity is infinitely good and all-wise, to suppose that He could condemn His own offspring to eternal suffering, and that, too, for a temporal and finite misdemeanor. The punishment would be disproportionate to the crime. No amount of theology or logic or law can make it apparent how the sin of a day or even of a human lifetime could merit endless punishment. Even our human laws are more humane than that, and endeavor to fit the punishment to the crime. Christian Science teaches that sin punishes itself, and that so long as man believes in sin he will suffer, but that when the resurrection comes to us, when we fully understand life in God, there will be nothing left "which deserves to perish or to be punished" (Science and Health, p. 251).

[Charles K. Skinner in *Detroit* (Mich.) *Free Press*.]

A recent criticism delivered at the Museum of Art is certainly a remarkable expression for a thinker of the present hour. A local clergyman said: "I think Christian Science is the most preposterous thing on earth, but I have sent to Scientists patients afflicted in spirit. I knew just what ailed them, and that they were just the kind to be affected by the impressive imbecility of Mrs. Eddy's book." Think of it! Patients afflicted in spirit, sent by a minister of spiritual things to a doctrine of "imbecility" for help! Strange consistency this! The claim of certain of the clergy has always been that Christian Science is not Christian, although some of the broader ministers have admitted that it does heal. Now, if Christian Science is not Christian, why should a Christian minister send patients to it for spiritual help? Imbecility has never been considered a healing agency, neither has it been known to restore confidence in God or man.

Is it not possible that the reverend gentleman knew better than he was willing to admit before his audience of doctors and others? He certainly would not wish to be considered less intelligent than scores of the orthodox clergy and of other professional men who have read and studied Mrs. Eddy's works with such success as to be restored to health and peace, which neither the medical profession nor his own had been able to bring them. The critic was, however, right in sending patients to Christian Science for spiritual help, as thousands of his peers will tell him, for of all the benefits which this religion has to bestow, none is greater than the spiritual uplift which gives to man a higher understanding of God and man's relation to Him, by which he realizes his birthright of dominion.

ADMISSION TO MEMBERSHIP.

The next admission of candidates to membership in The Mother Church will be June 4, 1909. Applications should be in the hands of the Clerk on or before May 12, 1909. Application blanks may be had by addressing William B. Johnson, C.S.D., Clerk, at the church edifice, Falmouth, Norway, and St. Paul streets, Boston.

CHRISTIAN SCIENCE SENTINEL

EDITORIAL

MRS. EDDY TAKES NO PATIENTS.

The author of the Christian Science text-book takes no patients, and reads no letters on disease, distress, or error of any kind. Reliable news concerning Mrs. Eddy will be found in the Christian Science publications.

THE COMMITTEE ON PUBLICATION.

RECENTLY we received a letter from a member of the committee on publication, in which he called attention to what he deemed a lack of interest in and support of the work of this important committee; but we cannot believe that this lack is so general as our correspondent would seem inclined to think, for some idea of the splendid work that is being done by this committee all over the field is shown in the several pages of excerpts from their communications which are published in the *Sentinel* from week to week.

Every Christian Scientist is interested to have the misrepresentations of Christian Science which appear in the public press corrected, but he should know that this can be done only through a carefully planned system of organization, which necessarily involves some considerable expense. It is an old saying that "whatever is worth doing is worth doing well," and if, in order to carry on this work properly expense must be incurred, then this expense should be borne by the branch churches as a part of their regular outlay, just as they provide for their annual or semiannual lecture.

The board of lectureship and the committee on publication were established by our Leader as adequate means with which to meet the criticisms of Christian Science that are published or promulgated from time to time, and it is vitally important that both of these agencies should have the liberal support of the branch churches if Christian Science is to be clearly understood and availed of by the world at large.

It has been proved over and over again that the sick are healed and the sinful are reformed by Christian Science, and while humanity's need of the healing gospel of the Master is as great as it is today, no effort should be spared correctly to set before them the revealed truth, this message of salvation from sickness and sin, in order that those who are in need of its immediate aid may not be deterred from a trial of its efficacy by reason of some public misrepresentation of its teaching, which has remained unnoticed by the publication committee through lack of means to carry on the work.

If there is a condition of apathy in any branch church in relation to the support of the committee on publication, it is a matter which should be looked into and the condition corrected.

ARCHIBALD MCLELLAN.

HONESTY.

WE are all familiar with Pope's saying, "An honest man's the noblest work of God," and there are few who would not endorse the sentiment which it expresses. The pity is that so many believe honesty to be of doubtful value, so far as practical results are concerned. They fail to see that it stands for power, in that it represents justice, which is an attribute and quality of God; hence the one who stands alone with God is ever in the majority, and he may well sing with the psalmist, "Though an host should encamp against me, my heart shall not fear."

In Science and Health we read: "The good you do and embody gives you the only power obtainable. Evil is not power." We also read: "Honesty is spiritual power. Dishonesty is human weakness, which forfeits divine help" (pp. 192, 453). Christian Science presents the concept of a God who is absolutely just and who is also all-powerful,—not a God who makes us suffer for the sins of others, or who is powerless to deliver us from any and every phase of evil; therefore, having "an honest God," there can be no excuse for a dishonest man. In our Leader's "Miscellaneous Writings" (p. 112) she, however, tells us that we must know "*how* to be just." This of course means that we must also know *how* to be honest, as honesty is the actual working out of our spiritual concept of divine justice. So far from being excused from the performance of our ordinary duties and obligations by the coming of the truth into our consciousness, much more is demanded of us, for the great Teacher said, "Unto whomsoever much is given, of him shall be much required."

The quickening which truth brings should arouse us to meet all our obligations promptly, both for our own sakes and also because Love impels us to lighten the burdens of others in every possible way. The Mosaic law, "The wages of him that is hired shall not abide with thee all night until the morning," may be otherwise rendered, "Thou shalt love thy neighbor as thyself." If we fail to come up to the ordinary standards of honesty, we are apt to have a condemning thought from the one who is made to suffer from our delinquency, and possibly the condemnation of others as well, so that honesty is really "the best policy." If we are prompt and just in meeting our obligations, whether we are employers or employed, we are helping the whole world, for dishonesty is obstructive to progress, consequently unhealthful and unprogressive in every sense of the word.

Christian Science gives the highest and broadest sense of honesty. It insists upon the recognition of absolute right at all times, and demands obedience to divine Principle to the full extent of our understanding. We should gladly acknowledge our obligations to Truth, and to the Cause of Truth, not alone in words but also in deeds, and if we do this we shall not be backward in meeting our obligations to those who serve us in any capacity, indeed we should never incur an obligation which we are unable to meet. We are never hurt by the splendid discipline of self-denial, which invariably brings expansion on the spiritual side of our nature and prepares us for having all things "added" unto us without depriving others of their dues.

It was the Master who said that the "word" must be sown in the soil of "an honest and good heart," and in the early church they chose "seven men of honest report, full of the Holy Ghost," to advance the cause of Christ. Should we not, then, take Paul's advice, and "think on these things"?

ANNIE M. KNOTT.

A HAZARDOUS CONCLUSION.

ILLOGICAL thought is not only profitless, it is misleading, deceptive, and therefore immeasurably harmful in its ever-widening influence. One of its commonest forms is that in which a universal conclusion is drawn from a particular premise; it is the habit of those who ground a final and inclusive judgment on the facts of a particular experience, and against the seductions of this habit we as Christian Scientists have occasion to be no less watchful than others, especially in view of the far-reaching significance of our thought and example to the Cause which we represent.

Digitized by Google

To illustrate, it is not infrequently discovered that a patient suffering from a given disease is cherishing a marked degree of envy, jealousy, or other sinful sense, and to the practitioner who has learned that all causation is mental this fact may awaken the suggestion that the relation of the specific sin to the specific ailment is that of cause and effect. If such an experience were repeated, the conviction might be reached that the given mental state is always conducive to the ill thus associated with it, and hence that any one suffering from this ill has been indulging the sin in question. This conclusion would be hazardous, because it is unsupported by the logic of the facts in hand; nevertheless the endeavor to verify it might be prompted, and at the same time the temptation might come to explain a failure to heal by the assumption that the causative sin is unforsaken, though the sufferer may declare that he has no consciousness of its indulgence. This would constitute a clearly defined case of the mental stumbling referred to, and the seriousness of the results attending its multiplication need not be emphasized.

In speaking of the cause of disease, Mrs. Eddy has very definitely stated certain considerations which should affect our judgment in any and every case. She says, "By universal consent, mortal belief has constituted itself a law to bind mortals to sickness, sin, and death." "Human hypotheses first assume the reality of sickness, sin, and death, and then assume the necessity of these evils because of their admitted actuality. These human verdicts are the procurers of all discord" (Science and Health, pp. 229, 481).

While a given sin may be the occasion for the manifestation of one or more diseases, the procuring cause of the susceptibility of the individual to this or that phase of abnormity may in human belief be any one or all of a dozen things,—heredity, congenital weakness, lust, previous injury, mental malpractice, etc. Struggling against a swirling tide of these material beliefs, human consciousness would have little hope of escape were it necessary to identify the source and name of every current of the flood in order to realize our dominion over it. Such a necessity would practically involve a science of evil, the establishment of a basis of cause and effect in a realm which is inherently lawless and unreal! Moreover, the belief that every form of physical weakness is traceable to a specific sin which should be known and named as its sponsor, would call for such a devotion to the analysis of evil as would inevitably render the realization of the allness of good a side issue, and thus subvert the fundamental requirement of Christian Science, "Thou shalt have no other gods before me." It would call for the recognition of as many sins as there are diseases, and it would bring to the unwise the temptation to anticipate, if not prophesy, the coming of a definite ill upon every fellow-man who had not yet wholly escaped from the tendency to indulge a given sinful disposition or habit.

The conviction that a specific mental state or offense is probably chief among the many causal contributions to a specific case of sickness may be perfectly clear and satisfying, but it is a far cry indeed from such a conviction to the making of a catalogue of human ills with the assignment to each of its explanatory transgression. Jeremiah is right when he says, "Thine own wickedness shall correct thee." In other words, "the divine method of paying sin's wages involves unwinding one's snarls, and learning from experience how to divide between sense and Soul" (Science and Health, p. 240). The need of uncovering error in order that it may be cast out is imperative, but, happily for humanity, the capacity to detect a state of moral obloquy in ourselves or others does not call for a studied analysis and elaborate classification of evils, it demands rather the ever-increasing knowledge of God and His idea.

JOHN B. WILLIS.

LETTERS TO OUR LEADER.

Kansas City, Mo., March 31, 1909.

Mrs. Mary Baker Eddy.

Beloved Leader:—I wish to express my sincere gratitude to you for Science and Health. It has explained to me the Science of being, which I had long desired. I did not come into Christian Science through or for the physical healing, but by the understanding of its clear logic. Coming from a strict orthodox family, and not being satisfied with their explanation of the Scriptures, I sought in vain through the now prevalent philosophies for a rational solution of the Science of being,—the cause of my existence,—but not until I carefully studied Science and Health had I the least understanding of the Bible—of man or his relation to his Maker; so I am indeed grateful for your book, which is more advanced than poor humanity can realize, and for which each individual can best express his gratitude to you by daily living its teachings.

Your loving follower,

FRANK HOUSEHOLDER.

Northampton, Mass., April 7, 1909.

Mrs. Mary Baker Eddy.

Dear Leader:—Through you I have learned the saving truth, as expressed by the enclosed lines, that Christ, Truth, lives and heals now as Jesus did when here among men. For the proof you have given of that knowledge, I love you and thank you, for that truth has given me new life, and an understanding of God, good.

Faithfully yours,

LOUISE DELISLE RADZINSKI.

San Francisco, Cal., April 5, 1909.

Mrs. Mary Baker Eddy, Brookline, Mass.

Beloved Leader:—It is with the deepest gratitude and love that I acknowledge the good which has come to me from the study of "Science and Health with Key to the Scriptures," and your other writings. I would like you to know how much good has been gained in the last year from "Angels" (Miscellaneous Writings, p. 306) by myself and many others who have referred to those inspiring lines. Also "Pulpit and Press," beginning with line 22 on page 3 and ending with the second paragraph on page 4. I am daily striving to show my gratitude for the spiritual understanding that has come to me from the daily study of this wonderful truth which you have given the world, by bringing forth the fruit which the understanding bears in healing the sick and uplifting humanity.

Six years ago I was given a copy of Science and Health by some friends in Ohio, and from the first day that I began to read I commenced to apply the truth, and by that application sorrow, disease, and lack have been overcome. Instead of looking forward to an old age of helplessness, as I did before the book was given me, I begin each day with an assurance of strength, of might, and of power. I had used glasses for seventeen years, but it is now four years since I put them aside. All that has been gained I owe to the understanding which has come from the study of your writings.

With deepest gratitude,

MRS. SUSAN A. BEAUCHAMP.

St. Louis, Mo., April 11, 1909.

Mrs. Mary Baker Eddy, Boston, Mass.

Dear Mrs. Eddy:—On this beautiful morning I am prompted by the gratitude which fills my heart to write

Digitized by Google

and thank you for giving us Christian Science. It has been ten years since I began the study of Science and Health, and during all that time I have relied upon the truth, as taught in Christian Science, to meet and conquer every difficulty that has presented itself. I rejoice to say that added strength has always been felt with every overcoming of error. My prayer is that I may so live as to be worthy of the name of Christian Scientist.

Gratefully yours,
TYNA P. STILLWELL.

New York, N. Y., April 2, 1909.

Mrs. Mary Baker Eddy, Brookline, Mass.

Dear Mrs. Eddy:—We rejoice to inform you that a Christian Science Society of Columbia University, New York, has been formed. At this our initial meeting we send love and greetings. We appreciate the wisdom which has made it possible for this society to be organized.

VIRGINIA TAYLOR, *President,*
SADIE LILA JACOBSON, *Vice-President,*
SALLIE B. TANNAHILL, *Secretary-Treasurer,*
EUNICE G. HILLER,
Executive Committee.

[Telegram.]

Montreal, Quebec, April 2, 1909.

Mary Baker Eddy, Chestnut Hill, Mass.

First and Second Churches of Christ, Scientist, Montreal, having assembled in love and harmony to unite as one church, desire as their first act to send you a loving message of heartfelt gratitude, devotion, and loyalty; and we pray that the love which you teach may illumine the life of every member.

KATHARINE MCBEAN, MARGUERITE LYNN,
BLANCHE S. SHANNON, *Committee.*

New York, N. Y., April 5, 1909.

Mrs. Mary Baker Eddy.

Dear Leader:—My heart is so full of gratitude to God for the marvelous healing that has been given to me through Christian Science, that a deep sense of duty prompts me to write to you a statement of the wonderful restoration of health which has brought sunshine into my life. For many years I had been a victim of periodical attacks of asthmatic trouble. I had tried all the material remedies suggested by kind and well-meaning friends, without getting relief. For six years I had also been tormented with a double hernia, had worn various kinds of appliances, and been told by surgeons that on account of my being in declining years there was no cure for me, and that I must expect to wear a truss the remainder of my life. Last April I had an attack of the asthmatic trouble which was very distressing and alarming. My daughter, who had been healed of an agonizing pain in her side by Christian Science, urged me to go to a practitioner in First Church of Christ, Scientist, in New York, who had been instrumental in healing her, and yielding to her wishes, I consented. I frankly stated to the practitioner that I had not been able to accept the teachings of Christian Science, although I had been reading Science and Health, but I asked her to help me. I explained to her my asthmatic condition, but said nothing relative to the hernia. After receiving six treatments the former trouble entirely disappeared, and the morning after my sixth treatment I discovered that I no longer needed the truss, that the double hernia was completely healed. There was no sign of it in evidence,—no more soreness, no pain, no scar from a surgeon's knife,—a perfect healing. Nearly a year has passed since this marvelous healing brought happiness to me, and no language at my command can fittingly express the gratitude in my heart. Christian Science is a glorious demonstrable truth, as shown in the wonderful healing it has given to me.

Most gratefully and sincerely yours,
CHAS. L. DUNHAM.

Sydney, Australia, Feb. 26, 1909.

Mrs. Mary Baker Eddy, Brookline, Mass.

Dearly Beloved Leader:—With deepest gratitude that words can never express, I thank you for your pure, noble life, and for your uplifting books, Science and Health and "Miscellaneous Writings," which have been to me fountains of living water. I had never believed in the church, and had remained aloof from it for many years. To me the prayers were always "vain repetitions," and I always felt that I could pray just anywhere. I have not had a very bright life, and a good deal of it has been spent with an invalid friend, but all the dark clouds are rolling away, thanks to your loving guidance. I have only been in Science barely a year, but have had many demonstrations of the ever-presence of divine Love, two of which were instantaneous.

I never cease to thank God for your pure life. That you "dwell in the secret place of the most High" is shown by your loving care for all your followers.

Very lovingly, your humble follower,
GERTRUDE E. SALTER.

Wiesbaden, Germany, April 1, 1909.

Mrs. Mary Baker Eddy.

Beloved Leader:—"Science and Health with Key to the Scriptures" has been to me

A shining light, a guiding star;
A loving message from afar;
A book of peace, of hope, of love;
A word to guide to heights above;
A path in which my feet have trod,
To find a home on earth with God.

"Actions speak louder than words," and by mine I am striving each day to thank you.

Obediently,
MARY RICE BRINTON.

Boston, Mass., April 7, 1909.

Dear Mrs. Eddy:—A worker in the news department of our increasingly useful *Christian Science Monitor,* I turn to you in gratitude and love for the privilege we now have of serving our Cause—the Cause of all humanity. My experience here is daily proving for me the power of good, and enabling me to realize more and more your wondrous definition of Love. God is helping us all to show our real affection for you, the revelator of Truth, in obedience and better service.

Faithfully,
JOHN F. PHILLIPS.

THE MANUAL.

The 80th edition of The Mother Church Manual, containing all of the recent changes, has been issued and is now on sale.

Subsequent editions of the Manual will be issued when new By-laws are made or when important changes are made in By-laws already in effect; and due notice of each new edition will appear in the *Sentinel.*

Address all orders to Allison V. Stewart, Publisher, Falmouth and St. Paul streets, Boston.

THE LECTURES.

LECTURE IN THE MOTHER CHURCH.

The semiannual lecture on Christian Science, under the auspices of The First Church of Christ, Scientist, was delivered by Judge Septimus J. Hanna, Thursday evening [April 15] in the auditorium of The Mother Church. The lecturer was introduced by Judge Clifford P. Smith, the First Reader, who said,—

Twenty years ago there lived in a western city a prominent lawyer, who was practising his profession after having filled honorable positions in the military, civil, and judicial departments of government. Witnessing some of the healing works which attest the verity of Christian Science, he sought and received through its ministry the restoration of his own health. Having become convinced that Christian Science is the law of God, he found himself in the same situation as the men who recognized the call of Truth while casting a net in the sea of Galilee. Like the fishers who left their nets and became fishers of men, this lawyer left his law-books and became an advocate of Christian Science. Since then he has labored without ceasing to awaken all mankind to the possibility of present salvation from sin, disease, and death; and it is not too much to say that through his efforts the kingdom of heaven is more nearly at hand. The man to whom I refer is Judge Septimus J. Hanna, who will now address you.

The Christian Science Monitor.

CHICAGO, ILL.

Mrs. Sue Harper Mims lectured at Seventh Church of Christ, Scientist, on Sunday, March 28. She was introduced by Judge Ben M. Smith, of the Superior Court of Cook County, who said,—

I assume that all here this afternoon attend not out of idle curiosity but for the purpose of learning something that will be beneficial both materially and spiritually. As I understand it, Christian Science does not advise evasion or concealment, but on the contrary invites and welcomes the close inspection and careful, conscientious study of all.

We are living in an age unsurpassed in the investigation and thought of the material and finite, and I believe that we are rapidly approaching an age unequaled in its advancement and learning in the spiritual and the infinite. That Christian Science has had a most remarkable growth all candid and intelligent people must concede. And why this great growth? Is it satisfactorily answered by mere statement—that Christian Science is an illusion or a mere theory of this or of that? Is it a mere theory, so cleverly conceived that it misleads and deceives thousands upon thousands of honest and discriminating people from every avenue of life the world over? Is it a mere theory that when rightly understood and applied the sick and suffering become well and free of pain? Is it a mere theory that God does not recognize sin and evil but acknowledges only the pure and the good? No. Christian Science is not a mere theory—it is a demonstration of Truth, the divine Principle.

A child states, believing it to be true, that three times three are seven. The child fails, but the fact that three times three are nine remains unchanged. So if at times it may appear that Christian Science does not demonstrate the truth, do not acclaim the failure of Christian Science. The individual may be in error and fail, but the divine Principle never—it is the same now and forever. We do not wish to be laggards, moving only as our surroundings force us, but rather should we be ambitious to be among those who seek and strive to attain understanding and knowledge of that which brings order, harmony, and love, which uplifts all mankind and makes of them better men and women.

Christian Science is based upon the Bible, and it is a presentation and unfolding to all humanity of the truth and the love of God. This truth and love have always existed and will always exist. It is for us today as it was in the time of Christ Jesus. He taught it then, and we are but learning it now. To learn, to know, and to practise it, is our highest duty. The attempt to do this—to follow the wise and loving Galilean Teacher in some particulars—is approved by all Christians. To redeem the sinner is glorious to all, but to attempt to obey the command to heal the sick is considered by many to be sacrilege. By what right is that distinction made? By what rule or authority is such judgment rendered? Christian Science teaches that both are right and good. And why not? Has time or have our limitations subtracted or eliminated any part of those teachings and commands? Certainly not. That wonderfully inspiring Sermon on the Mount is in its entirety for us today as it was for the people of that time.

Correspondence.

ST. JOSEPH, MO.

Between twenty-five hundred and three thousand persons gathered yesterday afternoon [March 28] at the Auditorium to hear the lecture, under the auspices of First Church of Christ, Scientist, by Bicknell Young of Chicago on Christian Science. The speaker was introduced by Frederick Neudorff, who spoke as follows:—

I never overlook the opportunity to speak a kind word for the religion of optimism whenever and wherever the occasion presents itself. Though not a member of this church, it has my warmest and sincerest sympathy, and I would be pleased to be numbered as a member with the other good people who make up its membership if the processes of my mind permitted me to understand fully its teaching. My faith in the goodness and the fulness of the love of the All-Father is a precious privilege which I enjoy with these good people, and I rejoice with them in the abundance of optimism that makes of the earth a heaven within the keeping and the enjoyment of those who accept it. One great church has lately canonized that virgin of French history, "The Maid of Orleans," who led the hosts of France to victory in battle; but those who venerate that great woman, the Founder of Christian Science, do so because for them she has banished not only physical pain, but that more intense horror, mental fear of death and future punishment; and in this fact she rises supremely above all the women of history. She has filled her people's world with happiness, the legal tender of the soul; the happiness that fills the eyes with light and every heart with joy.

TESTIMONIES OF HEALING.

It is always such a help and encouragement to read the testimonies in the *Sentinel* and *Journal* that I feel I am not being sufficiently grateful if I do not acknowledge all that Christian Science has done for me. I used to be full of fear,—fear of the future, fear of people, and I was even afraid of the food I ate. Now, all these fears have gone or are fast disappearing, and in all around me I am learning to see God's reflection. Before I heard of Christian Science I wore glasses when I wanted to see off any distance. Without taking any thought on the subject, and while studying "Science and Health with Key to the Scriptures" by Mrs. Eddy, I used my glasses less and less; till one day I found that I needed them no more. I had been interested in Christian Science only a short time when I was stung by a wasp. I did not tell any one, and could not go away by myself to work against the sense of pain, except for a moment, as friends were waiting for me; but I declared the truth constantly, and when I returned home all pain and discomfort had gone. Through the knowledge of this truth I have also been able to overcome colds, internal pain, and other ailments. I have taken no medicine since I heard of Christian Science, now nearly three years.

All this, however, seems small compared to the greater understanding and love of the Bible, and the practical guidance that comes from the daily study of the Lesson-Sermon. I do not live near any other Scientist and sometimes would be glad of advice and help, but I have found that in proportion as I empty myself of all self-will, the needed guidance comes, either through the Lesson-Sermon or through prayer, as understood in Christian Science. At first I did not want to be grateful to Mrs. Eddy, but now I am indeed grateful to her,—grateful for the pure life she has lived, which has enabled her to write Science and Health, and for her wise guidance of everything connected with the Christian Science movement, providing the *Sentinel*, *Journal*, and lectures, which are all such a help to those living out of reach of a church. For all these blessings I am indeed grateful.

MRS. ELSIE UPTON, South Weald, Essex, England.

It is my hope that this testimony may reach some one who is standing where I once stood. Some two years ago, after giving Christian Science what I considered a fair trial, by paying for a practitioner's services, purchasing some books, and going to church, I came to see that it requires something more than that. I failed to get the results which others claimed to have had, although unconsciously I was being healed in other ways which were far greater than physical healing, yet I was half discouraged and on the verge of turning back, thinking I would not get the desired results, when at this point a dear Scientist offered me this helpful parable: "There was a big tree which held the thought, 'I am so powerful that nothing can cause my downfall.' One day, a wood-chopper, who knew from experience that he could fell the tree, undertook to cut it down, but as the tree was of immense size it took some time to do the work. It happened that a little boy who had been watching the slow progress remarked, 'You have been chopping nearly two days trying to get this tree down, and it's just as straight as ever.' 'You are right, little one,' said the man, 'but I know that if I keep on chopping it will come down sooner or later.' Just then he gave one more blow with his ax, and down came the tree."

This little story helped me greatly, for it brought to me the thought that disease and sin were as the "tree of the knowledge of good and evil," spoken of in the Bible as the one to beware of, and this is the tree which we are trying to destroy. The understanding of the truth was the ax, and I was the ignorant, doubting child; but now I know that Christian Science does heal, for I, like many others, have had it proven to me, and if one understands the Principle he can prove it for himself.

MORRIS LEVI, Chicago, Ill.

As it is now over three years since I was healed in Christian Science, I feel that I should like to tell something of what it has done for me. It was in February, 1905, I took my first treatment in Christian Science. At the time I was suffering with severe stomach and bowel trouble, and other complications. I had tried different doctors; change of climate; operations; osteopathy, dieting, and finally "mental suggestion," but the only hope held out was from another operation. I was then induced to try Christian Science, which I considered a beautiful religion, although I doubted its promise to heal. After my first treatment, however, I ate what I wished and all I wished, and have done so ever since. In a short time I did indeed find my freedom, and now, as I look back, I seem to have come from great darkness into a marvelous light. I have found that I can trust God for everything, and I am learning what Love is.

I lately had occasion to visit the home of a neighbor, where there was a case of fever. It seemed to be contagious, as they all had it in turn and were very sick and under a doctor's care. I sat with the little girl for some time to relieve the mother, and a few mornings later I awoke to find myself seemingly very ill, so that it was impossible for me to sit up. I said to myself, What is the trouble? what does all this mean? At once came the thought of contagion, and I at once denied its power. I declared that as God's child I could reflect only good and not evil, and I was very much relieved at once, so that I was able to attend to my morning duties. I kept this thought in mind and did each task as it came. By noon I was entirely healed, and even forgot all about the suffering. I did an unusual amount of work that day, and in the evening, when I did remember, I was indeed grateful for the truth that makes us free. Words cannot express my gratitude for all that Christian Science has done for me.

I was brought up in an orthodox church, and while there is a tender spot in my heart for the old church home, I cannot give up the new, for it has many advantages over the old, and the peace and happiness and the blessings that have come to me are priceless. As I love the parents who guided my footsteps in childhood, so I love the dear ones who brought me the message of hope and life, and I love and revere Mrs. Eddy, who made all this possible. I feel that only loyalty to Truth can pay my debt of gratitude.

MRS. CLARA J. SWANETS, Elmhurst, Cal.

I am glad indeed to express publicly my gratitude for what Christian Science has done for me. I knew almost nothing of this truth, and had never heard of a cure by its means, when I first went to a practitioner for treatment, which was in August, 1907. I had read only things which were unfavorable to Mrs. Eddy, and was prejudiced against her. I had never been strong, and after I was married and my two children came I seemed to have less strength as time went on. I was never well, and was obliged to have help in my work all the time. I tried medicine and osteopathy, with great faith in the latter especially, but I experienced no relief from either.

Finally, to my surprise, my husband suggested that I try Christian Science, as he said it seemed to help some people. I was perfectly willing to try it, though I could hardly believe that it could help me. I took one treatment,

Digitized by Google

and bought a copy of the text-book, "Science and Health with Key to the Scriptures." The next day I felt the healing power, and found a new strength which has never left me. I began to do my own work, and discovered that my strength was equal to all demands upon it, and it has been ever since. It is a constant wonder to my neighbors, among whom I have lived for eight years, that I can do things I had never been able to do in all those years, and experience no weariness; but the Bible tells us that "they that wait upon the Lord shall renew their strength; they shall mount up with wings as eagles; they shall run, and not be weary; and they shall walk, and not faint." I had worn glasses constantly for fifteen years, but thinking one morning of Mrs. Eddy's words, "Divine Love always has met and always will meet every human need" (Science and Health, p. 494), and realizing that the truth had thus far never failed me, I took off my glasses, and I have never needed them since.

I feel that the spiritual uplifting which has come to me through Christian Science is a far greater blessing than the physical healing. There is such freedom from worry and care, more of love for all, and less of envy and selfishness. I think I never knew before what constitutes true happiness, but now my heart rejoices in the knowledge that all is good and "evil is not power" (Science and Health, p. 192). My heart is filled with love and gratitude to Mrs. Eddy, who has shown me the way to God and opened my blind eyes. I am most grateful also for those helpful publications, the *Sentinel* and *Journal*, which carry with them such courage and good cheer.

MRS. SUSAN AMES DEERING, Arkansas City, Kan.

It is about nine years since I came into Christian Science. At that time I was attending the Sunday services and the testimonial meetings with other members of the family, and was a slave to tobacco and strong drink. After attending these meetings six times, the tobacco and liquor habits were destroyed. This is only one of the many proofs of the power of Truth that we have had. I wish to speak of another demonstration which I have had recently, with an attack of throat trouble, which was overcome with the understanding of this passage from Science and Health (p. 251), "Divine Mind makes perfect, acts upon the so-called human mind through truth, leads the human mind to relinquish all error, to find the divine Mind to be the only Mind, and the healer of sin, disease, death." I am indeed thankful to God, and grateful to Mrs. Eddy, for my deliverance from the bondage of sin and sickness.

ERNEST RUOFF, Bucyrus, O.

I wish to express my thankfulness to God for what Christian Science has done for me. For nine years Truth has been our only physician, and we have had great proof of its healing power. There have been times when we have had to ask for help, but in most cases the ailment has been overcome by reading aloud from the Bible and our text-book and looking to God as our deliverer. Two years ago last winter I was injured internally from a fall. Through the reading of Science and Health and the aid of a kind practitioner the injury was overcome in two weeks, and I feel very thankful to God, and to our Leader, Mrs. Eddy, for all the blessings I have received.

MRS. CORA RUOFF, Bucyrus, O.

I wish to express my heartfelt thankfulness for the many blessings received through Christian Science. I suffered greatly from a serious stomach trouble, also a paralytic affection of one limb, and was in constant pain. My physician was very kind, and did all he could to relieve my suffering, but only through the use of an opiate did I find any rest, and in this way I formed the drug habit.

It is now eight years since I was healed in Christian Science. I have felt this healing touch of Truth morally and mentally, as well as physically. I am very thankful to God, and to Mrs. Eddy, our dear Leader, who has so faithfully and unselfishly worked to help us into this truth.

MRS. HATTIE L. PHILLIPS, Littleton, N. H.

Christian Science has done so much for me, it seems that I could not tell it all. At the time when this truth was brought to me I was in despair, all hope gone. I had prayed to God until I felt that if there was a God He had forgotten me. I was suffering from a catarrhal trouble, which was supposed to be hereditary; but, thanks be to Christian Science, I can say with Paul, "The law of the Spirit of life in Christ Jesus hath made me free from the law of sin and death." Everything that could be done by physicians was done, including serious operations at different times. I was constantly using medicine, and the thought occurred to me very often, Will I always have to take medicine? It seemed as if there was no other way, but the time came when even medicine was of no avail. My throat had become so affected that swallowing was extremely painful, and my tongue was in a dreadful condition. I was even obliged to sit up in order to sleep, but I had no desire to go to a doctor, for I had lost all faith in them.

When Christian Science was brought to my notice, I said I would try it. The Bible, which I used to read more from a sense of duty than for love of it, because I did not understand it, I now read with joy and gladness, for its pages are illumined by Truth and Love. I thank God for Christian Science, as it has given me a God who is Love, and "perfect love casteth out fear."

MRS. MARY FELTON, New York, N. Y.

Humbly, prayerfully, and with an earnest desire that this may be helpful to some one in need, I write my acknowledgment of benefits received in Christian Science. Never more fully than at the present time have I realized how much I owe to its Discoverer and Founder for her gift of love to the world. For nearly fifteen years I have been reaping the fruits of Mrs. Eddy's sowing, and the seed has indeed proved good, springing up, as it has, from such unpromising soil. After having been a partial invalid for several years, with no hope of ever being well,—being able to walk but little and always with fear, suffering from nervous illness in a chronic form, a loss of muscular power which the doctors claimed could never be regained, and with no love for God in my heart, as I then believed Him to be the author of my suffering,—I was slowly and surely healed when I turned to the life-giving truth, as found in the Bible and the Christian Science text-book.

At first I received treatment from a practitioner, and was freed from the sense of limitation in walking, besides improvement in many ways. Then I took up the task of eradicating all inharmonious conditions from the body by the understanding of the truth. For three years I studied and worked, struggling with recurring symptoms, on account of my inability to become as "a little child," until I at last found myself free. In the mean time, a change far greater than the physical was being made in my mentality, for which I am trying to show my gratitude by striving to follow in the footsteps of the great Way-shower. Having gained, in some degree, an understanding of what God is and of man's relationship to Him, I have been enabled to help others to drop their burdens at the feet of Christ and "bear a song away," thus proving the truth of these beautiful words of our Master: "Come unto me, all ye that labor and are heavy laden, . . . For my yoke is easy, and my burden is light." The light of Love and of spiritual understanding brings no burden.

I. I. HILDRETH, Lowell, Mass.

Digitized by Google

I wish to express my deep gratitude for Christian Science—the true understanding of God, Life. In the place of sorrow, unhappiness, dissatisfaction, and restlessness, it has brought me joy, happiness, satisfaction, and that peace "which passeth all understanding;" as some one else has said, it has answered all the longings of my heart. It has explained the so-called mysteries of the universe, and where at one time I did not care to live, I now love life because I know what it is and what it means. Christian Science is each day a grand revelation to me, coming as it did in the darkest hour of need; and I feel as did the psalmist when he wrote, "Thou hast turned for me my mourning into dancing: thou hast put off my sackcloth, and girded me with gladness; to the end that my glory may sing praise to thee, and not be silent."

While words seem poor to express the deep gratitude I feel, I hope to prove in works my appreciation of this grand truth. Although the spiritual help means more to me than anything else, I have also derived much physical benefit. It has been proven to me many times that God is "a very present help in trouble." For five years I wore glasses, the last two years thinking I could not be without them one waking moment. Now I use my eyes at more confining work than ever before, and have never felt the need of glasses since removing them over a year ago. A skin disease has been healed; headaches, colds, and the like disappear almost instantly, and oh, the freedom I now enjoy compared to the bondage to physical ills and to self before I knew the right way!

I am deeply grateful to Mrs. Eddy for her unselfish years of study and work in following our Master's teachings; in proving them to us, and in helping us to live in the way he taught, leading us day by day "from a material sense of existence to the spiritual" (Science and Health, p. 566).—GRACE N. DEMING, Minneapolis, Minn.

I am glad to be able to add my testimony to those of the many who have been healed and blessed by Christian Science. I was for several months afflicted with an illness which was gradually getting worse, so that I was compelled to lie down a great deal of the time. I could not stand the least exertion and was not able to walk any distance at all. I had medical attendance from the first, but got no help. I became very much discouraged over my condition, as I had a large family to work for and was able to do very little.

My husband then called in a Christian Science practitioner, who talked very kindly to us and thus gained our confidence, for we knew almost nothing of Christian Science. My husband also bought a copy of Science and Health, which we began to read and study, with the result that in two weeks I was much improved. I received a few treatments, and was soon quite well and strong,—able to walk a long distance and attend to my household duties without the least discomfort or fatigue.

It is now one year since I took treatment, and I have had no return of the trouble. My husband has also received many benefits through Christian Science. I am very thankful to God, also to Mrs. Eddy, for what this truth has done for me.

MRS. MARGARET E. HAMANN, Eureka, Cal.

About two years ago I was a complete wreck from the use of morphine, a habit acquired in the endeavor to get relief from suffering. Through a period of over two years I was a slave to the use of this drug, resulting in loss of appetite and sleep. My family were in constant fear that in my partially unconscious state I would end my own life or destroy theirs. I went to a noted sanitarium, where I remained five months. I then took a well-known "cure," and was under the care of the best physicians at different sanitariums, but all efforts to obtain relief were ineffectual and the craving for the drug undiminished.

I had heard of the wonderful cures through Christian Science, but did not think it possible that it could help me; besides, so far as I knew, they had no sanitarium in which to confine their patients, and it was not considered safe for me to have my liberty. I told the Christian Scientist to whom I applied for help that I had no hope, but that I was willing to try this as a last resort. The practitioner assured me that God did not need to put a man in prison in order to heal him of a sinful or diseased habit, and that an absolute trust in God would make me free. Following instructions as best I could, I obtained a copy of "Science and Health with Key to the Scriptures," and continued treatment with a most patient practitioner. Getting my help from the one supreme power, I was entirely healed, and I now have not the slightest desire for opiates or intoxicants of any kind.

For the great blessings that have come to me through Christian Science I am truly thankful.

WILLIAM PECK, Kansas City, Mo.

It is with the greatest pleasure that I submit my testimony to what Christian Science has done for me, trusting it may help to guide some brother on the upward way. I first became interested in Christian Science through the healing of my sister from a long-standing case of eye trouble. I am indeed young in Science, having been interested in this healing truth for only about a year and a half. It was in the autumn of 1906 that I had a serious fall while pole vaulting, and it was over two months before I was able to do anything at all. Even then the doctors told me that I would undoubtedly be troubled with a weak back many a year and perhaps all my life. All that winter I was seriously troubled; so much so, in fact, that in the spring I was obliged to discontinue all work.

At this time a friend advised me to try Christian Science, and finally I did try it as a last resort. I took treatment for nearly two months, the healing being rather slow, yet when it did come I was more thankful and joyful for what this truth had done for me than words can express. Soon after this I was also thoroughly healed of a long-standing eye complaint, for which I had worn glasses over twelve years. For all of these and many other blessings I am truly thankful to God, and to our beloved Leader, Mrs. Eddy, for her wonderful book, Science and Health.

FRANK S. HORNBECK, Chester, Conn.

Before Christian Science was brought to my notice I had come to the conclusion that to be good was dangerous, for goodness seemed to attract calamity. Every sorrow or trouble was spoken of by the good people I knew as a chastening of the Lord, and divine love manifested in divine displeasure did not appeal to me; so while I kept up a perfunctory attendance at church, I wandered away in thought from all religious beliefs and formulated a philosophy,—to eat, drink, and be merry today, for there was no hope in tomorrow,—this composed about all the religion I had. The continual pursuit of pleasure may look amusing to the outsider, but the effort to find any peace or happiness in it is a sad failure. Every material possession turns at last to dust and ashes in our grasp, and the nothingness of everything I reached out for became appalling.

I was buried in materiality, and I feel that Christian Science has been my resurrection. It has taught me to understand the omnipotence of God in place of having a belief in the omnipotence of evil. It has brought me health, happiness, and peace, where before there was sick-

Digitized by Google

ness and discontent. My gratitude to God for Christian Science is beyond measure, though I hope to prove my sincerity by loyal obedience and service to this Cause for which our beloved Leader, Mrs. Eddy, has done so much.

JEAN C. GREEN, Jamestown, R. I.

Seven years ago I learned what it means to "trust in the Lord with all thine heart." For years I had hungered and thirsted after righteousness, and had prayed to be made unselfish and good, but when I think of my present happiness and then go back in memory to the days before I knew about Christian Science, I am indeed thankful to God. I did not come to Science for relief from physical suffering, but from a sorrow which seemed almost unbearable, and now in place of worry and grief I find peace and joy in the understanding of divine Love.

My constant desire is to live so that I may reflect the saving truth that has been revealed in Christian Science. My husband was healed of organic heart trouble, and my little girl, nine years of age, has never tasted medicine since she was two years old. I am filled with gratitude to God, and to our dear Leader, Mrs. Eddy, who through her faithfulness has led me into the path of peace.

MRS. W. J. CANTONWINE, Walla Walla, Wash.

My heart is full of gratitude for my understanding of Christian Science as revealed and taught to us by our loving Leader, Mrs. Eddy, and I am anxious to contribute my testimony of healing, in the hope that it may lead others to follow in the path of love and truth. For nearly thirty years I had spells of mental trouble, and was often an inmate of asylums, where I remained for several months at a time, or until I was restored to my right mind. Three years ago, while working on a farm in Century, Fla., I became insane, and my employer, under the state law, was compelled to take me again to an asylum. Before I left, my employer's wife, who is a Christian Scientist, recommended to my wife that I have treatment in Christian Science, and said she would write to a practitioner; which she did. In the mean time I was sent to the asylum, but in six weeks I was a well man. I returned to my home and work, and now three years have passed and there has been no return of the trouble. I enjoy the *Christian Science Quarterly*, and every day I arise early and go over the sections before going to my daily labor. At times I feel a sense of the old trouble creeping over me, but after reading the Lesson I know I can do a good day's work, as Truth casteth out error.

My wife has had several demonstrations, and we know that "divine Love always has met and always will meet every human need" (Science and Health, p. 494). A number of our colored friends are becoming interested in Christian Science, and we hope in time to have a society, where we can meet and go over our Lesson-Sermon. I am very grateful to our dear Leader, who has shown us the way to declare the truth.

ANDERSON JEFFERSON, Former Pastor, Missionary (colored) Baptist Society, Century, Fla.

In gratitude to God for all the blessings which have come to me and mine through Christian Science, I gladly bear testimony. Seven years ago, when suffering from severe rheumatic trouble, a dear friend advised me to try Christian Science treatment. I rather laughingly consented, not understanding in the least what it was. I was also advised to tell the practitioner of a trouble in my foot of twelve years' duration. I had when a child seriously injured a bone in my foot, with the result that the least wrench would cause it to be exceedingly painful. Material remedies had never given any more than slight temporary relief. I promised to mention this to the Scientist, but said I did not believe anything could help that, as every one said this trouble would increase with age. I also had other physical ailments of less serious character. Imagine my joy when I found myself perfectly healed in less than a week's treatment by a faithful student of our beloved Leader. This practitioner advised me to study Science and Health, assuring me that it would indeed prove itself to be a "Key to the Scriptures," and that each one might find God a very present help.

Space will not permit me to enumerate the blessings we as a family have derived from Christian Science, but I would like to add that since my healing seven years ago our family of four has never in any way made use of material remedies, every manifestation of disease being quickly overcome through the prayer of understanding taught in our text-book. For the constant help received from our authorized literature, and for our church services, including the Sunday School, I take this opportunity to return thanks.

MRS. CAROLINE A. BREADNER, Ottawa, Can.

It is with deep gratitude for Christian Science that I tell of the healing of our little girl, aged twenty months. She seemed a dangerously sick child. She had high fever, was not able to eat anything, and had large lumps on the jaw and neck. She lay very still in her father's arms, and he became frightened and said that something must be done. So we sent for a practitioner, and in less than ten minutes after her arrival baby was resting quietly, without a sign of fever or suffering, and neither returned. Again, about a month later, while playing on a high porch she fell, striking her head on a nail. A young lady who heard the child cry ran out, but when she went to pick her up she found the nail had penetrated the forehead so deeply that considerable effort was necessary to get it out. We called the same practitioner as before, and all evidence of the injury was quickly destroyed. Many of the neighbors saw the child fall, and when they came to inquire how she was, and saw her playing happily, they were astounded. She has never taken any medicine.

These are only two instances of help out of many which we have received in our home. We have found, thanks to Mrs. Eddy, the ever-present help. How glorious is the Bible, when understood and taught aright.

MRS. NINA M. BALL, Alpena, Mich.

[Written for the *Sentinel*.]

REASSURANCE.

MARION COOK STOW.

GOD'S thought is not our thought, His infinite care
Deviseth ways and means beyond our ken,
And all unseen by our blind selves, as when—
In spite of seeming darkness here or there—
A waiting glory showeth us how fair
His slightest promise is; how groping men
May know His tender love, or now or then,
And in this love find rest beyond compare.

Know patience then, O hungry, questioning child!
Let error spend itself—thou art secure,
The everlasting arms around thee thrown!
Truth knoweth not a lie, but, undefiled,
With consciousness as powerful as pure,
Shall lead thee gently upward to thine own!

FROM OUR EXCHANGES.

[*Christian Register.*]

Out of our daily life has gone the meaning of primitive Christianity, and just as surely has departed the call of the Puritan. We are not now preparing for another world. The Calvinistic God is as dead as the god of Homer, and no amount of preaching, in one church, or in ten churches, can awaken him. We need a church to help us live, and not to help us die. We need a church that shall teach us to love our neighbors as ourselves, in the violent struggle of modern life. Shifting the ground to lectures on economics and on poetry does not meet the demand. Taking out of our sermons everything vigorous does not fill up the need. Man is yet alive to the same vast spiritual requirements. The business of the church is not to sprinkle him with water, nor is it to feed him with sweetened pap and bid him believe. We are in an age of vigorous thought; the common people are here. They cannot be satisfied with homilies on the saints or on the sacraments, or with mere fellowship, without any twang of quarreling. We must grapple with the problems of a higher manhood and stronger character.

[*Universalist Leader.*]

We must dig deep if we would discover the spiritual unity of the experience of Jesus. His intimacy with men is inseparable from his intimacy with God. His perfect sympathy with men is the sequel of his perfect sympathy with God. Yonder he is lost in his sense of his Father. This way he is lost in humanity. Our Master has arrived. He has reached the spiritual goal. He has completed his humanity, yes, and his true divinity. Through perfect expression of that will in his love for men he has become the Son of man. Only let us be reminded once more that these things are spiritual, not metaphysical, and as spiritual things must be spiritually discerned, so also spiritual relationship with God and man must be spiritually achieved.

[*Churchman.*]

One of the most encouraging signs of the soundness of popular opinion is the loyal spirit in which present-day Christianity is criticized. From all parts of the world, entirely irrespective of church traditions or affiliations, or the absence of both, come these appeals for reform. Those who would do away with religion altogether receive only slight popular hearing anywhere, while those who would make the churches more efficient in the life of the world are everywhere eagerly listened to. It is felt that there is an unused mass of spiritual force outside the church, only waiting wise and statesmanlike guidance to be placed under the service of Christ.

[*Christian World*, London.]

The social conscience is practical Christianity. It is the gospel of the kingdom coming at last to its own. Not in cathedral fanes, not in ceremonies, or in priesthoods, or in theologic dogmas is it coming, but in the hearts of the people, in inspirations there to a common good, the highest there is, a highest which is to be shared by all.

[*Christian Work and Evangelist.*]

Service is becoming more and more the practical and national expression of religion. All churches are recognizing that, important as creeds may be, still that church is a Christian church which is trying to be in the world what Christ was and do what Christ did.

[Rev. C. A. S. Dwight in *New York Observer.*]

Do the necessary duty, but decline the unnecessary burden. Be all that God wants you to be, but do not essay the thankless task of trying to be a hundred things besides.

SPECIAL ANNOUNCEMENTS.

FROM THE PUBLISHER OF MRS. EDDY'S WORKS.

THE CHRISTIAN SCIENCE TEXT-BOOK, "SCIENCE AND HEALTH WITH KEY TO THE SCRIPTURES."—This work contains many important changes and additions by the author, and also contains a photogravure portrait of Mrs. Eddy, together with a facsimile of her signature.

SOME OF MRS. EDDY'S WRITINGS IN NEW BINDINGS.—One volume containing Unity of Good, Rudimental Divine Science, No and Yes, Retrospection and Introspection; a second volume containing Christian Healing, The People's Idea of God, Pulpit and Press, Christian Science *versus* Pantheism, and the Messages of 1900, 1901, and 1902. These volumes are printed from new plates and are uniform in size with the pocket edition of Science and Health. Bound in morocco, limp, round corners, gilt edges, heavy Oxford India Bible paper. The prices of these books prepaid are as follows: single copy, $3.50; six or more copies of either volume to one address, each $3.25.

THE CHURCH MANUAL.—Containing all the By-laws of The Mother Church, The First Church of Christ, Scientist, in Boston, Mass. Each new edition of the Manual will have special notice in the *Sentinel*. Price, single copy, prepaid, $1; six copies to one address, $5; twelve copies to one address, $9.

Attention is called to the Library Edition of Mrs. Eddy's works, description and prices of which will be found on the outside cover page of the *Sentinel*.

Address all orders for books named above to ALLISON V. STEWART, Falmouth and St. Paul Streets, Boston, Mass.

FROM THE CLERK OF THE MOTHER CHURCH.

CHURCH TENETS.—The tenets of The First Church of Christ, Scientist,—The Mother Church,—printed on folded sheet for the use of Branch Churches of Christ, Scientist, with space for the names of churches and their by-laws, can be had at seventy-five cents per hundred.

Not less than one hundred are sold. Postage stamps are not taken for payment.

MEMBERSHIP.—Correspondence relating to membership with The Mother Church, and requests for blank applications for membership, should be addressed to the Clerk.

All correspondence and orders relative to the above should be sent to WILLIAM B. JOHNSON, Clerk, The First Church of Christ, Scientist, Falmouth, Norway, and St. Paul Streets, Boston, Mass.

FROM THE CHURCH TREASURER.

PER CAPITA TAXES.—Per Capita Taxes and Contributions to The Mother Church, The First Church of Christ, Scientist, in Boston, Mass., should be sent to the Treasurer. Please do not send currency.

Remittances for the above should be sent to STEPHEN A. CHASE, Treasurer, Box 56, Fall River, Mass.

FROM THE SOCIETY.

Attention is called to the announcement over our Leader's signature, which appeared in the *Sentinel* of Jan. 9, to the effect that Christian Scientists in the field who send four subscriptions to the *Monitor* for one year, will receive their own paper gratuitously.

The Publishing Society has decided to discontinue its custom of furnishing free of charge to branch churches and societies copies of the *Sentinel* for distribution after lectures. Orders sent before this notice is received will be filled as heretofore; on subsequent orders the usual quantity rates will be charged. It is believed that many periodicals will, in the future, be contributed for distribution by subscribers who otherwise might not put them in circulation.

Digitized by Google

THE CHRISTIAN SCIENCE JOURNAL

FOUNDED APRIL, 1883, BY THE AUTHOR OF "SCIENCE AND HEALTH WITH KEY TO THE SCRIPTURES," MARY BAKER EDDY, DISCOVERER AND FOUNDER OF CHRISTIAN SCIENCE

This monthly Magazine is the official organ of The First Church of Christ, Scientist, in Boston, Massachusetts, and correctly represents the Christian Science Movement. It contains interesting discussions of the teaching and the practice of Christian Science, and in addition to dissertations, lectures, and contributed articles, publishes always a number of reports from cases of spiritual and physical healing, which practically illustrate the redemptive work of Christian Science.

TERMS OF SUBSCRIPTION: Single copy, one year, $2.00. Quantities TO ONE ADDRESS: ten or more, each, $1.90; twenty-five or more, each, $1.80; fifty or more, each, $1.60. These rates apply in the United States, Canada, Mexico, and Cuba. In all other countries add forty cents for postage on each subscription. Six months' subscriptions received at half the above rates. No subscriptions received for less than six months.

TERMS OF SALE: Postpaid to any address: Per copy, twenty cents. Quantities TO ONE ADDRESS: ten copies, $1.70; twenty-five copies, $4.00; fifty copies, $7.00; in the United States, Canada, Mexico, or Cuba. To all other countries, per copy, twenty-five cents. Quantities TO ONE ADDRESS: ten copies, $2.10; twenty-five copies, $5.00; fifty copies, $9.00.

BOUND VOLUMES: Current year and two years previous, cloth, $2.50; half calf or half morocco, $3.00. On earlier volumes write for prices.

THE CHRISTIAN SCIENCE MONITOR

Published every afternoon except Sunday

A daily newspaper for the home. Adequate news service. The various departments of a modern newspaper. Unique home forum page. Entire page of editorials dealing with the vital topics of the day. Contributions for the columns of the MONITOR should be addressed, Managing Editor, THE CHRISTIAN SCIENCE MONITOR.

SUBSCRIPTION PRICE: For the United States, Canada, Mexico, and Cuba, $5.00 a year, $3.00 for six months; all other countries, $8.00 a year, $4.50 for six months, postpaid. In the Greater Boston postal district the MONITOR will be delivered by carrier through the local news-dealer at the customary rate of 12 cents a week payable to the news-dealer. If desired by mail in Boston district $2.75 should be added to the annual subscription rate to cover extra postage.

The Christian Science Quarterly

Published January, April, July, and October

Contains the Lesson-Sermons which are read at the Sunday Services throughout the year in all the Christian Science churches. These Lessons, which present citations from the Bible and "Science and Health with Key to the Scriptures," are valuable for daily study.

TERMS OF SUBSCRIPTION: For one year, 50 cents; fifty copies or more to one address, 50 cents yearly for each copy. Foreign subscriptions, 60 cents. Yearly subscriptions only received.

TERMS OF SALE: One or more copies, postage paid, each, 15 cents; fifty copies or more to one address, each 12½ cents, postage paid.

Der Herold der Christian Science

Published Monthly.

A magazine printed in German, which publishes original and translated articles bearing upon Christian Science, and also testimonies of healing from Germany and America. It contains about thirty-eight pages of such reading matter, also the Lesson-Sermons which are read at the Sunday services in all the Christian Science churches, and is valuable as an authorized representative of the movement.

SUBSCRIPTION PRICE: For the United States, Canada, Mexico, and Cuba, 10 cents a copy, $1.00 a year in advance; all other countries, 12 cents a copy, $1.25 a year, postpaid.

PAMPHLETS AND REPRINTS

CHRISTIAN SCIENCE. THE RESTORATION OF PRIMITIVE CHRISTIANITY. A Lecture. By CLARENCE C. EATON. 29 pages.

CHRISTIAN SCIENCE: A REASONABLE AND RATIONAL VIEW OF ALL THINGS. A Lecture. By FRANCIS J. FLUNO, M.D. 37 pages.

CHRISTIAN SCIENCE: THE RELIGION OF THE BIBLE. A Lecture. By JUDGE SEPTIMUS J. HANNA. 23 pages.

CHRISTIAN SCIENCE: HUMANITY'S HELPER. A Lecture. By PROF. HERMANN S. HERING. This pamphlet is also printed in German. 29 pages.

CHRISTIAN SCIENCE: ITS ADVANTAGE TO MANKIND. By EDWARD A. KIMBALL. A lecture delivered in London. 47 pages.

CHRISTIAN SCIENCE: MAN'S DOMINION OVER EVIL. By EDWARD A. KIMBALL. A lecture delivered at Harvard University. 28 pages.

CHRISTIAN SCIENCE: ITS NATURE AND PURPOSE. A Lecture. By BLISS KNAPP. This pamphlet is also printed in French. 25 pages.

CHRISTIAN SCIENCE: DEMONSTRABLE RELIGION. A Lecture. By FRANK H. LEONARD. 31 pages.

CHRISTIAN SCIENCE: OR, DELIVERANCE FROM EVIL. A Lecture. By REV. WILLIAM P. MCKENZIE. 29 pages.

CHRISTIAN SCIENCE: THE CHRISTIANITY OF JESUS. A Lecture. By MRS. SUE HARPER MIMS. 28 pages.

CHRISTIAN SCIENCE: BOTH CHRISTIAN AND SCIENTIFIC. A Lecture. By REV. IRVING C. TOMLINSON. 36 pages.

CHRISTIAN SCIENCE: ITS PRINCIPLE AND METHOD. A lecture delivered in London. By BICKNELL YOUNG. 31 pages.

CHRISTIAN SCIENCE: ITS COMPASSIONATE APPEAL. Four articles reprinted from the JOURNAL. This pamphlet is also printed in German. 50 pages.

CHRISTIAN SCIENCE IS SCIENTIFIC CHRISTIANITY. A Lecture. By REV. ARTHUR R. VOSBURGH. 33 pages.

CHRISTIANITY IS SCIENCE, AND SCIENCE IS DEMONSTRABLE. A Lecture. By MISS MARY BROOKINS. 37 pages.

PROPHECY: FULFILMENT: REVELATION. By CHARLES ADOLPHUS MURRAY, Seventh Earl of Dunmore. 42 pages.

THE LOS ANGELES CASE. Testimonials given in Court as to the healing efficacy of Christian Science. 81 pages.

THE MINISTRY OF TRUTH. Five articles reprinted from the JOURNAL. This pamphlet is also printed in German. 50 pages.

PRAYER AND CONFIDENCE. Four articles reprinted from the JOURNAL. This pamphlet is also printed in German. 50 pages.

THE CHRISTIAN SCIENCE CHURCH. Its Organization and Polity. By CAROL NORTON. 38 pages.

PRICE: One copy or more, six cents; twelve copies to one address, sixty cents; fifty copies to one address, $2.25; one hundred copies, $4.00. Orders for above pamphlets may be assorted as desired.

Works on Christian Science

Written by MARY BAKER EDDY, Founder of Christian Science and Author of its Text-book

SCIENCE AND HEALTH WITH KEY TO THE SCRIPTURES. In one volume, 700 pp. Containing many important changes and additions by the author. THE ORIGINAL, STANDARD, and only Text-book on CHRISTIAN SCIENCE MIND-HEALING. This edition contains a fine photogravure portrait of Mrs. Eddy, together with a facsimile of her signature.

Price (cloth), single copy $3.18
Two to twelve books (cloth only) to one address, each 3.00
Twelve or more books to one address, each 2.75
Full leather, stiff beveled boards, gilt edges, same paper as in cloth binding, single copy 4.00
Twelve or more to one address, each 3.75
Morocco, limp, round corners, gilt edges, Oxford India Bible paper, convenient for pocket, single copy . . . 5.00
Twelve or more to one address, each 4.75
Levant, divinity circuit, leather-lined to edge, round corners, gilt edges, silk sewed, heavy Oxford India Bible paper, single copy 6.00
Twelve or more to one address, each 5.75

Orders for Science and Health in lots of twelve or more to one address may include any or all of the different styles of binding. The above prices are all prepaid.

MISCELLANEOUS WRITINGS—1883–1896. A book of 471 pages, containing articles published in THE CHRISTIAN SCIENCE JOURNAL since 1883, with revisions and additions.

Price (cloth), single copy $2.25
Twelve or more books to one address, each . . . 2.00
Morocco, limp, round corners, gilt edges, convenient for pocket, single copy 4.00
Twelve or more to one address, each 3.75
Levant, divinity circuit, leather-lined to edge, round corners, gilt edges, silk sewed, single copy 5.00
Twelve or more to one address, each 4.75

The above prices are all prepaid. Orders for Miscellaneous Writings in lots of twelve or more to one address may include any or all of the different styles of binding.

No discount will be allowed on orders for twelve books which include both Science and Health and Miscellaneous Writings.

CONCORDANCE TO SCIENCE AND HEALTH. This work contains about eighty thousand references (more than ten thousand words being indexed). It also contains an index to the Marginal Headings, and a list of the Scriptural Quotations in SCIENCE AND HEALTH. 607 pages, 10 x 7, and addendum, bound in cloth, marbled edges. Price, prepaid, single copy . $5.00
Twelve or more to one address, each 4.50

CHURCH MANUAL. Containing the By-laws of The Mother Church. Price, prepaid, single copy, $1.00; $5.00 per half dozen; $9.00 per dozen.

CHRIST AND CHRISTMAS. An illustrated poem.
Price, prepaid, single copy $3.00
Twelve or more books to one address, prepaid, each . 2.50

UNITY OF GOOD AND OTHER WRITINGS. One volume containing: Unity of Good, Rudimental Divine Science, No and Yes, Retrospection and Introspection, uniform in size with the pocket edition of Science and Health. Bound in morocco, limp, round corners, gilt edges, heavy Oxford India Bible paper. Price, prepaid, single copy, $3.50; six or more copies to one address, each, $3.25.

CHRISTIAN HEALING AND OTHER WRITINGS. One volume containing: Christian Healing, The People's Idea of God, Pulpit and Press, Christian Science *versus* Pantheism, Messages of 1900, 1901, 1902, uniform in size with the pocket edition of Science and Health. Bound in morocco, limp, round corners, gilt edges, heavy Oxford India Bible paper. Price, prepaid, single copy, $3.50; six or more copies to one address, each, $3.25.

UNITY OF GOOD. It lays the axe at the root of error, elucidating and enforcing practical Christian Science, thus affording invaluable directions for all true Scientists. Library edition, 64 pages, cloth binding, marbled edges. Price, prepaid, single copy, 65 cents; $3.00 per half dozen; $5.50 per dozen. Leather covers (pocket). Price, prepaid, single copy, $1.00; $5.00 per half dozen; $9.00 per dozen.

RETROSPECTION AND INTROSPECTION. A biographical sketch of the author. The way she was led to the discovery of Christian Science; its growth and fundamental idea. Library edition, 95 pages, cloth binding, marbled edges. Price, prepaid, single copy, $1.06; $5.00 per half dozen; $9.00 per dozen.

PULPIT AND PRESS. A unique work of importance in the history and to the readers of Christian Science; containing Dedicatory Sermon delivered at The Mother Church, and scintillations from the press of that occasion. 132 pages, cloth binding. Price, prepaid, single copy, $1.06; $5.00 per half dozen; $9.00 per dozen.

RUDIMENTAL DIVINE SCIENCE. An interesting and valuable book, containing a brief and concise statement of Divine Science, *alias* Christian Science, in the form of questions and answers. 17 pages. Leatherette covers, gilt top. Price, prepaid, single copy, 37 cents; $3.00 per dozen. Library edition, cloth binding, marbled edges. Price, prepaid, single copy, 55 cents; $2.50 per half dozen; $4.50 per dozen.

NO AND YES. A brief statement of very important points in Christian Science. 46 pages. Pebbled cloth covers. Price, prepaid, single copy, 27 cents; $2.50 per dozen. Library edition, cloth binding, marbled edges. Price, prepaid, single copy, 60 cents; $3.00 per half dozen; $5.50 per dozen.

MESSAGES TO THE MOTHER CHURCH. By Mary Baker Eddy, including Christian Science *vs.* Pantheism, and the Messages of 1900, 1901, and 1902. In one volume. Library edition, 94 pages, cloth binding, marbled edges. Price, prepaid, single copy, $1.56; $7.50 per half dozen; $13.50 per dozen.

CHRISTIAN SCIENCE *versus* PANTHEISM. The Pastor Emeritus' Message delivered at the Communion Season in The Mother Church in Boston, June, 1898. A clear and strong refutation of the charge that Christian Scientists are pantheists. 15 pages. Price, prepaid, single copy, 26 cents; $2.50 per dozen.

MESSAGE TO THE MOTHER CHURCH. The annual message of Mary Baker Eddy to The Mother Church on Communion Sunday, June, 1900. Leatherette covers, deckled edges. 15 pages. Price, prepaid, single copy, 26 cents; $2.50 per dozen.

OUR LEADER'S MESSAGE. The annual message of Mary Baker Eddy to The Mother Church on Communion Sunday, June, 1901. Deckled edges. 35 pages. Price, prepaid, single copy, 50 cents; $4.50 per dozen.

COMMUNION MESSAGE. The annual message of Mary Baker Eddy to The Mother Church on Communion Sunday, June 15, 1902. Deckled edges. 20 pages. Price, prepaid, single copy, 50 cents; $4.50 per dozen.

TWO SERMONS. CHRISTIAN HEALING and PEOPLE'S IDEA OF GOD. In one volume. Library edition, cloth binding, marbled edges. 36 pages. Price, prepaid, single copy, 60 cents; $3.00 per half dozen; $5.50 per dozen.

CHRISTIAN HEALING. A sermon delivered in Boston. 19 pages. Paper covers. Price, prepaid, single copy, 21 cents; $2.00 per dozen.

PEOPLE'S IDEA OF GOD. A sermon delivered in Boston. 14 pages. Paper covers. Price, prepaid, single copy, 21 cents; $2.00 per dozen.

FEED MY SHEEP. Words by Mary Baker Eddy. Music by Lyman F. Brackett. Price, prepaid, single copy, 50 cents; $5.00 per dozen.

(THE CHRISTIAN SCIENCE WEEKLY)

PUBLISHED EVERY SATURDAY BY

THE CHRISTIAN SCIENCE PUBLISHING SOCIETY

Falmouth and St. Paul Sts., Boston, Mass., U. S. A.

ARCHIBALD MCLELLAN, Editor.

JOHN B. WILLIS, ANNIE M. KNOTT,

Associate Editors.

SUBSCRIPTION PRICE

Single copy, one year, $2.00.

Ten copies or more to one address, one year, each copy, $1.90.

Twenty-five copies or more to one address, one year, each copy, $1.80.

Fifty copies or more to one address, one year, each copy, $1.50.

These rates apply in the United States, Canada, Mexico, and Cuba. In all other countries add 50 cents for postage on each subscription.

Six-months subscriptions received at half the above rates.

No subscription received for less than six months.

Subscriptions to the *Sentinel* will be entered to begin with the first of the month, and will include all issues for the month named as expiration date on the wrapper. The receipt of the periodical by the subscriber will be our acknowledgment of the subscription.

TERMS OF SALE

Five cents a copy, postpaid to any address in the United States, Canada, Mexico, and Cuba. In quantities to one address: twenty-five copies, $1.00; fifty copies, $1.80; one hundred copies, $3.00.

To all other countries, six cents a copy, postpaid to any address. In quantities to one address: twenty-five copies, $1.25; fifty copies, $2.30; one hundred copies, $4.00.

Bound Volumes: Current year and two years previous, cloth, $3.00; half calf or half morocco, $3.50. On earlier volumes write for prices.

Entered at the Boston, Mass., post-office as second-class mail matter.

ITEMS OF INTEREST.

National.

There is no longer any necessity for polluting American cities with volumes of smoke, as practical smoke-consumers can be obtained at reasonable prices and operated with economy. Such is the assertion of the technologic branch of the Geological Survey. The experts assert that in their experiment station at Pittsburg they are successfully operating a smokeless plant and making steam economically with a coal heretofore regarded as refuse and delivered at the station for eighty-eight cents a ton. They declare further that they have found similar conditions in a number of mercantile establishments, and that the belief that smokeless plants cannot be operated on a commercial basis is without foundation. The experts say that bituminous coals high in volatile matter can be burned without smoke; that large plants can be operated without smoke, and that by the use of proper appliances great pecuniary saving will be effected.

Senators Cummings of Iowa and Bailey of Texas have each introduced bills in the Senate for the taxing of incomes. The bill of the former provides for a graduated tax from two to six per cent upon individual incomes exceeding $5,000, and lays no tax upon the net incomes of corporations as such. Incomes of $100,000 or more would pay a tax of six per cent. This would raise a revenue of about $40,000,000 a year. The bill of Senator Bailey, which would raise about fifty million dollars, specifically exempts incomes from federal, state, county, and municipal securities.

The action of the Burlington Railroad in announcing a two and one-half cent rate in Missouri as a compromise rate, is regarded as a diplomatic move which will end the litigation between that state and the railroads, all of which are expected to follow the Burlington's lead. The state two-cent fare law was declared unconstitutional, whereupon the railroads announced their intention of resuming a three-cents-a-mile rate. The state secured a temporary injunction restraining them from this action, and the roads have since continued to operate at two cents a mile.

Nearly three millions of acres of fertile western lands will be made available by President Taft for home-seekers during the next nine months if the plans of the Department of the Interior are followed out. The settler may make his selection in any one of the three states of Idaho, Montana, and Washington. The sections under consideration include 310,000 acres at Cœur d'Alene, Idaho; 64,000 acres at Lemhi, Idaho; 1,200,000 acres near Flathead, Mont.; 153,600 acres near Spokane, Wash., and 1,145,000 acres in the vicinity of Yakima, Wash.

In a recent trial for damages for personal injuries caused by an automobile, Justice Fitzgerald of the New York Supreme Court instructed the jury to find for the plaintiff and to disregard the fact that the owner of the automobile was not an occupant of the vehicle at the time of the accident. The case establishes the principle that the owner of an automobile is responsible for the negligence or recklessness of his chauffeur, irrespective of whether or not he is himself an occupant of the machine at the time of the display of this negligence or recklessness.

Secretary of War Dickinson, accompanied by a party, embarked from Charleston last week on the naval yacht Mayflower for Colon. The secretary expects to be away about a month, most of which time he will spend in the Canal Zone, familiarizing himself with conditions there. On his return trip he will stop at Havana for a short time.

Last week a balloon, which ascended at North Adams, Mass., reached Byfield, Mass., a distance of 110 miles, in two hours and forty minutes. The landing-place was about thirty miles from Boston, the objective point. The first "point-to-point" race in the state was also started from North Adams in August of last year.

The United States Government has filed in the United States Circuit Court a bill in equity against the alleged combination of fiber and manila paper manufacturers, praying for a decree dissolving the combination and prohibiting the members thereof from operating further under such combination.

An increase of about fifty per cent is reported in the number of applicants for civil service positions in New England for the last year. Throughout the United States the increase has been fully eighty per cent in the number of applicants for civil service positions in general.

The expenditure of $3,250,000 on the Canal Zone during the month of January has brought the total expenditure of the Zone, toward the construction of the canal, civil administration, sanitation, and plant building, up to $93,915,000.

A bill to provide the President of the United States with $25,000 traveling money is before the Senate.

International.

Nearly if not quite $500,000 of American money goes annually to Turkey for the support of the various missionary enterprises and to conduct the large number of American colleges, hospitals, and printing establishments. There has been invested in real estate and in buildings for the purposes of these various institutions and enterprises $6,000,000.

The Spanish Minister of Finance has introduced a bill in the Chamber of Deputies authorizing a four per cent loan of $200,000,000. The bill provides that this money is to be devoted to public works, such as colonization, reforestation, irrigation, and the construction of canals, bridges, highways, and public buildings.

The extension of the railroad system of China is proceeding steadily, if rather slowly. At the present time the total amount of road in active operation is 2,170 miles. There are 806 miles of new road under construction; provision has been made for the construction of an additional 2,232 miles; and 3,286 miles of new line are projected.

Japan will be represented at the opening of the Alaska-Yukon-Pacific exposition on June 1 by a training squadron of two cruisers commanded by Admiral Ijichi. The squadron is expected to arrive on the Pacific coast this week, and will remain until June 10.

The official scandal disclosed by the arrest of nine members of the lower house of the Japanese Diet in connection with the alleged misconduct of the officers of the Japanese Sugar Company, is growing, and more arrests among the legislators are expected.

Industrial and Commercial.

The head waters of the St. John River are in Maine, but its mouth is in Canadian territory. The timber cut along its banks in Maine is floated o mills in New Brunswick, leaving only stumpage fees to Maine owners. In order that the double profit from timber and lumber may remain in the state, interested parties are planning the construction of a railroad from the "Allagash" region of western Aroostook county southward, to connect there with existing railroads that reach the Maine coast. This great river basin contains approximately 944,000 acres, rather more than the area of the state of Rhode Island. On the lands tributary to the St. John River system in Maine, of which system the Allagash is the chief stream, there are now standing about seven billion feet of spruce timber, more than four hundred million feet of pine, about two billion feet of cedar, and vast quantities of hard woods. It is estimated that the annual growth or natural increase of the spruce alone in the valley of the Allagash is eighty million to one hundred million feet. The Allagash River is about one hundred miles long, and from Chamberlain Lake to its confluence with the St. John the stream falls 308 feet. Ample water storage is afforded by 127 square miles of lake surface, and it has been estimated by competent engineers that five dams constructed on the main river would afford thirty-five thousand horse-power, or, if the waters of Chamberlain Lake were to be included, about fifty thousand horse-power for twelve hours in every working day.

The Mauretania, on her last trip from New York to Liverpool, concluded the last portion of her trip from Queenstown to Skerries Islets, about two hundred miles, in six hours and ten minutes. This works out to the very high speed of twenty-nine knots an hour, a feat never before accomplished by an ocean liner.

It is proposed to have the projected line of the Grand Trunk Railway in New Brunswick operated by electricity. Electric power for manufacturing and other purposes, estimated at a minimum of 120,000 horse-power, would be available.

The physical merger of the Mexican Central and the National Railways has become effective, and the Mexican government has taken over 7,012 miles of line.

The Boston and Maine Railroad has adopted plans involving an expenditure of nearly five million dollars for new equipment and a repair plant.

The cargoes unloaded on the wharves of Duluth and its neighbor Superior last year ran to 6,594,915 tons and represented a value of $66,664,997.

It is stated that French silk manufacturing plants worth about ten million dollars are soon to be transferred to the United States.

CHRISTIAN SCIENCE SENTINEL

"WHAT I SAY UNTO YOU, I SAY UNTO ALL — WATCH" JESUS

THE PUBLISHING SOCIETY.

BLANCHE HERSEY HOGUE.

LONG ago the prophet Isaiah wrote: "How beautiful upon the mountains are the feet of him that bringeth good tidings, that publisheth peace; that bringeth good tidings of good, that publisheth salvation; that saith unto Zion, Thy God reigneth!" The Christian Science Publishing Society, which has been established in Boston in connection with the other activities of the Christian Science movement, is an open doorway for a salvation of mighty import and of far-reaching influence. This work of publishing salvation was inaugurated by the Leader of the movement, Mrs. Eddy, by the publication in 1870 of her first pamphlet on the subject of Christian Science, and carried on through the first issue of her complete book, Science and Health, in 1875, and through her other writings, up to the establishment of the Christian Science periodicals,—the *Journal, Quarterly, Sentinel,* and *Monitor.* With formal provision for their continued publication, the effort of this one woman to publish "good tidings" has broadened into a great institution for good, the extent of which cannot at present adequately be measured. Manifesting law and order, carrying on its great work for the purification of a self-darkened world, standing as a gateway through which the word of God and the testimony of those who bear witness to the healing power of the word of God may enter human consciousness, this Publishing Society embodies the highest and best of twentieth century human endeavor; and it should commend itself to all Christian peoples, since it really belongs to every student of the Scriptures who would make any effort to quicken the understanding of God's Word in the world at large.

For its wide-spread and ever-growing circulation of the Scriptures, for the word of revelation which the Christian Science text-book brings to him who would better understand the Scriptures, for the ever-widening opportunities opened for those who long to prove the healing promises of the Scriptures, the entire world owes to The Christian Science Publishing Society a debt of gratitude. The outward and visible sign of a mighty spiritual impulse which is opening to mankind a highway of thought heavenward, this Publishing Society is the inheritance of all men, though universal thought may not yet see nor understand the glory in its midst. Those, however, who have been touched by the redemptive healing action of Christian Science in their own experience are divinely constrained to join the goodly company of those who publish salvation, and to them The Christian Science Publishing Society becomes a personal possession.

One may ask, "How can I, unfitted to speak or to write or publicly to testify, discharge my obligation to this duty of publishing good tidings?" And divine Love may answer that Love's ways for spreading Love's message are manifold. Just the moral and financial support of the publishing work in Boston, with subscriptions for and circulation of its publications, does much, for the Society's swift-winged messengers carry the word of redemption to the thousands where the individual can speak it only to the tens, and the message that each individual witness to God's goodness would bear to his fellow-men is thereby indefinitely multiplied. Again, the Christian Scientist learns that The Christian Science Publishing Society is not alone a set of buildings, nor a set of printing-presses, nor a staff of individuals fulfilling the duties attending the editing, printing, and circulating of publications, but rather the entire company of individuals whose thoughts and deeds and lives publish the glad tidings of Christ's coming in the hearts of men. He finds himself an integral part of that Society, bearing his mental relationship and responsibilities to it, and knows that his good deeds have their place in the spreading of God's message. That student of Christian Science who is the most remote from Boston is as near the Publishing Society as is the resident of the city in which the Society's presses are doing their work, for the spiritual activity itself is not materially placed or confined. A center of activity must be maintained, but the boundaries of that activity are so broad as to include the most geographically isolated Christian Scientist, and this individual is as entitled to feel that the work is his to maintain and to enjoy as if he were under the same roof with the actual labor of it.

It becomes, therefore, the Christian Scientist's joy to be a "publisher" of salvation in every way that is open to him. The silent lesson of a good example, quickened by his study and application of the Word of God, is his greatest testimonial. Springing from this, the intelligent effort to bring healing to his brother, the spoken word of love and cheer which is a cup of cold water to his thirsting neighbor, bear witness. The springing forth of church buildings in which the inquirer may be sheltered when he seeks to hear the Word of God, in prayer and Lesson-Sermon; the maintaining of public Reading Rooms in which a quiet hour may be found by all who would rest beside "still waters;" the cheerful and punctual attendance upon all church duties which bespeaks the growing of the structure of the church of Christ in the heart,—these things publish, through self-sacrifice, the Word of Life. And a consistent worker does not confine his efforts to his branch church or his home field, but lifts his eyes to the privilege of supporting the center of the publishing activities of the Christian Science movement. Though there may be many to help with the center and few to help at each remote point on the circumference, yet any one of the few in any small group who gives broadly enough to include the central work, finds he has more for his local work. A loved hymn reads.—

> Ceasing to give, we cease to have,
> Such is the law of love.

Only as the Christian Scientists properly house and equip their publishing efforts in Boston, only as they support lovingly every step toward increasing facilities and multiplying opportunities for spreading God's Word, only, in fact, as they eagerly and gladly give of what God has

Copyright, 1909, by Mary Baker Eddy.

given them for the detail of buildings and equipments which serve them but which they may never see, can they expect abundant increase in the work which they do see, for nourishment must enter through roots and trunk ere branches may blossom. Contributing to the source, its richness flows outward. Supporting the greater, the dependent lesser more vigorously lives. Christian Scientists are learning that their work knows no "mine" nor "thine," and they are coming to see, in like manner, that the demands of the Christian Science movement know no "here" nor "there." One Father, one human family on earth, and one unbroken redemptive work upon the earth, is revealed to him who is single of purpose and pure in heart, and the "publishing society" upon the earth is truly the united purpose and effort to carry the message of a practical salvation into every sin-clogged, pain-burdened nook of consciousness, that human living may be cleansed and eased.

To this end, may the Christian Scientists, this company of publishers, blending their efforts with the superb achievements of their Leader, so support the outward and visible sign of their activity, The Christian Science Publishing Society in Boston, that through its ever-broadening channels all mankind may be reached, quickened, attracted to the grace of goodness, and lifted to the highways of right thinking which compass redemption. Then indeed may it be said that its feet are beautiful upon the mountains, for, obeying Christ, it carries world-wide "good tidings of good;" it "saith unto Zion, Thy God reigneth!"

"WAIT PATIENTLY."

MYRA B. LORD.

DURING the past few months the equal suffrage question has been unusually to the fore in this country, due in a measure, perhaps, to the propaganda carried on by visiting suffragists from abroad, where, largely because of vigorous governmental opposition, the campaign is waged with somewhat more of aggressiveness than obtains here.

We are apt to think of equal suffrage as a comparatively modern movement, but the argument therefor harks back to the creation. When God who made all things pronounced them "good," man, whom God had created "in his own image, . . . male and female," was included. The sameness of nature and the common right to equality of opportunity of the two sexes, as well as their mutual interdependence, were thus established from the beginning; but as time went on, women came to be considered as merely personal chattels, regarded by the head of the family as

Something better than his dog, a little dearer than his horse.

Those were the days of barbarism, and to elevate the sex again to the plane of equality was the task set themselves by the women of later centuries. One by one the barriers have yielded, and one open door has led to another. Recalling the marked success that has attended their efforts for higher education, for security in property rights, for admission to professional and business life, there is no room for doubt that ultimate triumph awaits the endeavors of women to obtain the ballot, in order that they may have a voice in the making of the laws they obey.

Some one has said that "there are no arguments against woman suffrage, but there are many prejudices;" and prejudices are apt to be the more stubborn and difficult in the overcoming. But when it is recalled that less than seventy-five years ago suffrage for women was limited to a very few places in Europe, a glance over the field today shows a marvelous gain. In nearly every country of the civilized world some form or other of suffrage is gaining a footing; and once that is secured, the ascent of the ladder is a matter of patience and persistence, qualifications in which women have had a dear schooling.

Amid the conflicting opinions of intelligent and progressive women as well as men respecting this question, it is clear that if the protection of the home and the children is indissolubly related to the casting of the ballot, then this privilege belongs to woman as a functional and inherent right. Upon the wife and mother the larger responsibility for the purity and protection of these fundamental interests certainly rests, and it is not difficult to see that, in seeking to meet her responsibilities in this regard, woman may and often does find herself utterly thwarted and defeated by social conditions which are subject only to the governing power of the municipality or state. Under these circumstances, the righteousness of her demand that she shall be permitted to aid the moral forces of the community in the endeavor to remove these causes of the corruption of her home and the degradation of her children, can but appeal to all, and the long and heroic struggle waged for the privilege of exercising this right has won the cause many a champion, even among the sterner sex. Half a century ago Henry Ward Beecher said, "Since the world began, to refine society has been woman's function. You may be sure that she who has carried refinement to the household, to the church, to social life, to literature, to art, to every interest except government, will also carry it to legislation and the whole of civil and public procedure, if it is to be carried there."

Mrs. Eddy's clear-sighted judgment on the question of the rights of women led her to say: "Our laws are not impartial, to say the least, in their discrimination as to the persons, property, and parental claims of the two sexes. If the elective franchise for women will remedy the evil without encouraging difficulties of greater magnitude, let us hope it will be granted" (Science and Health, p. 63). In "No and Yes" (p. 45) she says: "Let it not be heard in Boston that woman, 'last at the cross and first at the sepulcher,' has no rights which man is bound to respect. In natural law and in religion the right of woman to fill the highest measure of enlightened understanding and the highest places in government, is inalienable, and these rights are ably vindicated by the noblest of both sexes. This is woman's hour, with all its sweet amenities and its moral and religious reforms."

Quite recently Judge Lindsey of Colorado wrote: "We have in Colorado the most advanced laws of any state in the Union for the care and protection of the home and the children,—the very foundation of the Republic. These laws, in my opinion, would not exist at this time if it were not for the powerful influence of woman suffrage." In another article he said, "It does not take any mother from her home duties to spend ten minutes in going to the polls, casting her vote, and returning; but during those ten minutes she wields an influence which is doing more to protect that home, and all other homes, than any power or influence in Colorado."

So much for the influence of women in a state where suffrage has been tried. Not long ago Prof. Borden P. Bowne of Boston University, who presided at a meeting addressed by two prominent English suffragists, said: "What might be the outcome of granting suffrage to women, no one could certainly tell. I should not myself anticipate any immediate entrance of the millennium. I should, however, expect a good many improvements in our social and political life from giving women the vote, and I am somewhat confirmed in this opinion by the present character of the opposition. But, even if this were not the case, I should still insist upon it as something that ought to be done for the removal of a great injustice; and I believe it is always safe to be just, and that in the long run justice will vindicate itself by its results."

With such open champions of the cause of woman suffrage as these, it is to be regretted that both in this country and abroad the call in some quarters for militant

Digitized by Google

methods has found numerous adherents, and the movement which has been slowly but steadily gaining ground by a series of ever-lessening defeats would seem to be in danger from overzealous partizans in its own ranks. "What is worth having, is worth working for," runs an old saying, but in our impatience for results we are too prone to tear open the bud, and thereby ruin the fair fruition of all our hopes. We cannot do better in this, as in other problems that confront us from day to day, than to seek divine guidance. The psalmist said, "Rest in the Lord, and wait patiently for him: . . . those that wait upon the Lord, they shall inherit the earth." Our Leader's counsel is along the same line. She says, "Wait patiently for divine Love to move upon the waters of mortal mind, and form the perfect concept. Patience must 'have her perfect work'" (Science and Health, p. 454).

In any righteous cause the few must win the victory for the many, but in all history there is no parallel to that movement which owes its inception and success to the courageous woman who forty-four years ago gave to the world the healing truth she had discovered, and faced alone the storm of protest and opposition which the publication of Science and Health aroused. She who could then counsel, "Wait patiently," bore unmurmuringly "the burden and heat of the day," and gently and persistently she won her way. Confident in the ultimate triumph of the right, her life has been a practical exemplification of the Scriptural teaching, "Be not overcome of evil, but overcome evil with good."

So should it be with the cause of equal suffrage. The woman who was created on an equality with man was dowered with an inalienable right against which national and state constitutions shall not always prevail. The educative campaign which is being carried on in the home and in every department of social life, in the school, the church, and the public press, is wielding a silent but tremendous influence that can but result in victory. A cause which has for its object the protection of that sacred institution the home, is a cause that must prevail if its adherents but work, watch, and "wait patiently,"—

> For right is right, since God is God,
> And right the day must win.

THE CHRISTIAN SCIENCE PRACTITIONER.

WENTWORTH BYRON WINSLOW.

ONE of our Lord's greatest utterances is found in the 3d chapter of John's Gospel, where he says to Nicodemus, "God sent not his Son into the world to condemn the world; but that the world through him might be saved." This statement may be pondered daily by every student of Christian Science, with profit to himself and others. Not infrequently we hear reasons assigned by Christian Scientists as to why such and such a case was not healed while under Christian Science treatment. The failure is seldom laid at the door of the practitioner, but is often attributed to the unreceptivity of the patient's thought, to his environment, perhaps to the antagonism of his family, or mayhap the prejudice of old orthodoxy in the town wherein he lives; but the teachings of the Bible as understood in Christian Science prove conclusively that such statements will not bear careful analysis.

It goes without saying, that if we give power to aught but good, then that other seeming thing (evil) immediately becomes powerful to us in belief; and therefore, just to the extent that we allow it, no more and no less, both ourselves and our patients are subject to this belief in the power of evil. St. Paul says, "To whom ye yield yourselves servants to obey, his servants ye are to whom ye obey; whether of sin unto death, or of obedience unto righteousness." It is doubtless true, that when we first learn of Christian Science we have less understanding than in later years, but that does not excuse the practitioner nor put the blame on the patient. It is far better manfully to acknowledge one's failure, and resolve to fast from materiality more, and to pray more constantly, rather than to attempt to justify oneself by giving outside reasons for failure.

Jesus met the same conditions that we meet, but we never read that he blamed others for his failure to accomplish perfect results. Thus, unlike his Galilean experience, concerning which it is related that "he did not many mighty works there because of their unbelief," he healed the ear of Malchus, the servant of the high priest, in the very teeth of the malice, venom, hatred, and unbelief of the Jewish mob. From the foregoing it seems probable that Jesus was not as conscious of the omnipotence, omnipresence, and omniscience of God in the earlier years of his ministry as he was in the latter, and from the same records it may be deemed proven that the surrounding thought made no difference whatsoever to Jesus when he more fully understood God; hence it becomes the practitioner's duty so to understand and know God as to overcome the opposing belief even as the Master did. These are his words, "Be ye therefore perfect, even as your Father which is in heaven is perfect."

It is to be noted that when Jesus healed the blind man whose case is recorded by the apostle John, he did it through his own reflection of divine Mind; moreover, he was not prevented from healing him by the antagonism of the people. Certainly he did not receive any help from the man's parents, who appear to have been fearful and who plainly stated that they knew nothing of the method which Jesus used. So, too, when he healed the impotent man at the pool of Bethesda, it is clearly proven that the man's receptivity was not taken into consideration, for he evidently had no thought that the Christ-healing was about to be made manifest in his own case. In fact, when the man was asked if he would be healed, he replied that he had no one to put him in the pool,—direct evidence that he believed in material means of healing. Did Jesus take his mental blindness into consideration? No. He said, "Rise, take up thy bed, and walk;" and the man did it immediately, despite the fact that so much antagonism surrounded the case that the Jews "sought the more" to kill Jesus.

To show more conclusively that Jesus knew that neither mortal mind nor minds had any power whatsoever to prevent him from healing through his reflection of the divine Life, let us note the healing of the epileptic, as recorded by Matthew. On this occasion his disciples had failed to heal the boy in question, and having witnessed the marvel of his restoration, they asked Jesus why they had been unable to do so. Did Jesus say it was because the people were antagonistic, or the boy's mother did not believe in his method, or that the father only wanted the truth applied to heal even as he would administer a dose of medicine, or because the boy was not receptive? Not so. Jesus said, "Because of your unbelief." And Mark, who relates the same incident, records that he also said, "This kind can come forth by nothing, but by prayer and fasting;" which seems to imply that the disciples were solely to blame, because of their insufficient understanding of God and lack of consecration.

Do not all these cases go to show that the power of God reflected by the faithful worker is able to cope with and destroy the sin, disease, or discord of those who wish to be healed? It is the practitioner's work to be so consecrated to God and so confident of God's power and omnipresence that evil or error of whatever sort in or around the patient is absolutely of none effect. Concerning this our Leader says in Science and Health (p. 424), "It is not more difficult to make yourself heard mentally while others are thinking about your patients or conversing with them,

Digitized by Google

if you understand Christian Science;" and she says again (*Ibid.*, p. 149), "If you fail to succeed in any case, it is because you have not demonstrated the life of Christ, Truth, more in your own life,—because you have not obeyed the rule and proved the Principle of divine Science."

THOUGHTS ON HUMILITY.

GERTRUDE BALDWIN.

TRUE humility comes only as we gain true knowledge. A little learning often puffs us up; we think we know so much and possess so much, and we are very proud of our knowledge until we discover how little we do know. The more real knowledge we gain concerning the object we are pursuing, the more we realize all there is for us to know. The farther we travel, the wider the expanse stretches out before us that is still to be traversed. It is only as we ascend the mountain that we begin to realize how much climbing there is to be done before its summit is reached.

There is more pride manifested in the child's little "first piece" of music than in the grand oratorio of the true genius, because the knowledge gained reveals limitless possibilities and the ever unfolding beauties of harmony. This is so in all things—the clearer the view, the wider the horizon, the more we really see and know, the more humble we must become, for we can but bow in silent wonder before the infinite vastness and beauty of God's creation. As Christian Scientists we know that all true knowledge is but the reflection of divine Mind. As we grow in knowledge of God and man, it uplifts our thought, broadens our outlook, deepens our sympathies, and teaches us how to understand another's need, how to put ourselves in the place of others and see from their view-point, and so get at the true motive and incentive behind any seeming mistake. Only then are we able to give the right word of encouragement and help, the understanding touch of love that heals pain and wrong which otherwise might have met with only a rebuke.

It is often but our false concept of things that makes them appear wrong to us, and we need to learn how to put aside our own opinions and seek humbly to see things as they really are, to look below the surface and judge according to motive and not according to mere appearances. As we do this we shall love our brother more and understand him better, and we must learn somewhat of this lesson before we can help each other as we should, and we shall grow more humble in the learning; indeed we can but be humble when we know ourselves and others as God knows us.

If a thought of pride or self-conceit comes to us because of some knowledge gained, something accomplished, it is because we have not gone far enough; we have but to go a little farther and we come to the experience that must come to all true seekers, viz., "the valley of humiliation," the starting-point of all true work for God, for it is there we get a view of the work that lies before us and there is no room for pride, only an humble, earnest striving after the infinite knowledge of God, good. It is only as we really grow in knowledge that we grow truly humble, for as some one has said, "It takes a lot of knowledge to show us how ignorant we are."

God doth not need
Either man's works or His own gifts; who best
Bear His mild yoke, they serve Him best; His state
Is kingly; thousands at His bidding speed,
And post o'er land and ocean without rest;
They also serve who only stand and wait.

MILTON.

SELECTED ARTICLES.

[Judge L. H. Jones in *Lexington* (Ky.) *Leader*.]

In my last article I said, "It is not recorded that Jesus ever authorized anybody to preach that he did not immediately couple with the commission an injunction to heal the sick." The doctor quotes this statement of mine and immediately adds: "Again I have my critic where quibbling and explaining will not avail. The 'great commission' is given three times, and in only one of these is the question of healing referred to." Then he quotes Matthew and Luke and continues: "The commission as given by Mark does assert the healing power, but at best this would be a ratio of two to one. It will not do to say that Christ implied it in the two other instances."

Now what does the doctor mean? He seems to imply that the "great commission" was given at three different times, and yet he certainly knows that it was given but once, and that his quotations from Matthew, Mark, and Luke are but three different accounts of a single occurrence. Does he mean to discredit Mark's account of what occurred, and to insinuate that because Matthew and Luke omit the injunction to heal from their accounts that Mark has added something which did not occur? Alas, to what straits a good man may be driven! He evidently suggests a possible contradiction between the three accounts and implies a rejection of Mark's version "at a ratio of two to one." Having thus arrayed two of the Gospels against the other, he quotes from Paul's letter to Timothy, as if to array Paul against Jesus. "Here, then," exclaims the doctor in exultant glee, "is a command to preach, and yet not one word about healing."

Very well, doctor, if you prefer a commission from Paul to the "great commission" from Jesus, very well; you are at least consistent. But if you undertake to preach under a commission from Jesus you must heal the sick; for, as I have said, he never commissioned anybody to preach that he did not join inseparably with it an injunction to heal the sick.

Continuing, the doctor says, "It is cheerfully admitted that Christ did confer the power to heal on some in the beginning of the gospel, but this, according to the verdict of history, was confined to the apostolic period." Now, I beg your pardon, doctor, but I do not find any such verdict in history. On the contrary, it appears to be the universal verdict of history that the healing of the sick was a matter of common occurrence in Christian communities for several centuries after the apostolic age. Irenæus, who died A.D. 202–3, says, "And oftentimes in the brotherhood, when, on account of some necessity, our entire church has besought with fasting and much supplication, the spirit of the dead has returned, through the prayers of the saints."

Commenting upon this, Philip Schaff, the learned editor of "Nicene and Post-Nicene Fathers," Vol. I, page 121, says, "This resurrection of the dead recorded by Irenæus is very difficult to explain, as he is a truth-loving man and we can hardly conceive of his uttering a direct falsehood. Even Augustine (A.D. 354–430), 'the iron man of truth,' records such miracles, and so the early centuries are full of them. The Protestant method of drawing a line between the apostolic and post-apostolic ages in this matter of miracles is arbitrary, and based on dogmatic, not historical grounds. The truth is that no one can fix the point of time at which miracles ceased."

But, says the doctor, the power that Jesus conferred raised the dead! In reply I say that the fact that the Christian Scientists do not raise the dead is no more proof that they are not using the power of Jesus than the fact that the apostles failed to heal the epileptic boy proves that they were not using Jesus' power. For further reply, I say that

Digitized by Google

one of the greatest hindrances to Christian healing today is the effort of the ministers to destroy the faith of the people in Christian Science healing by discounting, limiting, and explaining away the healing promises and power of the word of God as contained in the New Testament record. In this manner they weaken the faith of the people in the healing power of Jesus' gospel and create an atmosphere of doubt and antagonism such as obtained at Nazareth, the home of Jesus, where, it is said, Jesus himself "did not many mighty works there because of their unbelief."

The doctor shares the mistake of so many in supposing that the power to heal the sick was a gift in some way belonging to the personality of Jesus, which he transferred to certain favored persons. But Jesus said, "I can of mine own self do nothing;" "The Father that dwelleth in me, he doeth the works." Jesus came to reveal the Father, and he always revealed Him as a healing Father. Wherever there was suffering, sickness, or pain, Jesus revealed this gracious Father by destroying it. These works Jesus called the works of the Father. Is not this Father present in the world today as much as He ever was, and are not his works "the same yesterday, and to day, and for ever"? "I know that, whatsoever God doeth, it shall be for ever: nothing can be put to it, nor any thing taken from it." This revelation of God as an active healing presence in the world is the gospel of Jesus, and no man can believe and preach the gospel of Jesus without preaching it as a healing gospel.

Why should any Christian Scientist take the extraordinary trouble to produce for the inspection of the doctor or his committee persons who have been healed in Christian Science? The monthly and weekly periodicals of The Christian Science Publishing Society are full of testimonies of healing from persons whose names and addresses are attached, and he has the liberty enjoyed by any one else of making his own investigation. Instances of such healings are daily multiplying on every hand, and he has but to hold himself amenable to the ordinary avenues of information to know of them, as well as another. Why should these people be supposed to be either deceived or deceiving? One certainly may be supposed to know when he is sick and when he is healed. Thousands of them are quite the doctor's equals in any and every respect, in point of achievement, in education, in social standing, in intelligence, in integrity of character, in Christian living.

What possible motive could they have for falsification? They offer their testimony about facts of which they have the most intimate personal knowledge, knowledge that comes from personal experience of the healing. Many of them came to Christian Science for healing in a critical and skeptical attitude of mind, not because they either believed or wanted to believe in Christian Science, but because they were driven to it by the sore stress of circumstances and not until they had abandoned all hope of other deliverance. If further confirmation of their sincerity were needed, it is to be found in the transformed lives and spiritual regeneration of those who have been healed by this truth.

As to the sick friend for whose healing the doctor offers his certified check for a thousand dollars, I can but repeat to him what Jesus said, viz., if his gospel be preached to her and she believe, she will be healed. Jesus said so, and I cannot hope to offer a Christian minister better authority than Jesus. I will not say to him what Peter said to a certain pert gentleman who offered him money on a not altogether dissimilar occasion, "Thy money perish with thee."

The doctor demurs to my allusion to Gamaliel, because, as he says, he "was not a Christian," yet his advice was certainly in the spirit of true Christianity. He advised against the persecution of Christians, while the doctor not only persecutes the Christian Scientists, but cites with approval their arrest and imprisonment. Gamaliel did not believe Jesus when he said he was the Messiah, and the doctor apparently does not believe him when he says his gospel will heal the sick. After all, the difference between them is one of degree merely, and that not always in the doctor's favor. But, if he will not take Gamaliel's advice and let the Christian Scientists alone, perhaps he will take the advice his Master gave to the disciple John, who on a certain occasion became unwisely zealous in his Master's cause: "And John answered him, saying, Master, we saw one casting out devils in thy name, and he followeth not us: and we forbade him, because he followeth not us. But Jesus said, Forbid him not: for there is no man which shall do a miracle in my name, that can lightly speak evil of me. For he that is not against us is on our part."

I have said that a thing may be unreal and yet be more than "purely imaginary:" and any school child should know this without consulting a dictionary. Everything that is purely imaginary is unreal, but everything that is unreal is not purely imaginary. The doctor's idea that he has administered a spanking to anybody in the course of this correspondence may, however, be safely pronounced "purely imaginary."

[Mabel S. Thomson in *Onlooker*, London.]

One of the most common objections made to Christian Science is, that it cannot be a spiritual system because it is so largely concerned with the healing of the body. But it is remarkable that when the disciples of John the Baptist came to ask Jesus if he really were the Christ, he did not refer them to the spirituality of his teaching or of his way of living, but to the fact that the sick were healed, "confident," as Mrs. Eddy says, "that this exhibition of the divine power to heal would fully answer the question" (Science and Health, p. 132). Christian Science deduces from this incident the fact that true spirituality should have a healing effect, and the honest student of Christian Science makes the proving of this fact an essential part of his practice, thus establishing a most stringent test of his spirituality, in that he is thereby called upon to prove his faith by his works.

Again, a very common belief regarding spirituality is that it should entail some kind of asceticism. The hollow cheek, the deep-set eye, the careless dress, the abstraction from ordinary matters, are all indications in the popular mind of what it vaguely thinks is spirituality. No one could be farther removed from asceticism of any kind, one would think, than the Founder of Christianity, who went in and out among the people, rich and poor, attended their weddings and their feasts, and shared their common daily life, yet gave out such a tremendous spiritual power that the demons cried out at his approach. These two points will sufficiently indicate that Christian Science regards spirituality as being entirely removed from the sphere of the emotions, of sentiment or of asceticism, but as being such an all-pervading, animating force in consciousness that it governs every thought, and therefore every detail, every trifle, in daily experience, in sickness as in health.

The spirituality of Christian Science has as its basis the First Commandment, "Thou shalt have no other gods before me," and in obedience to that great law the genuine Christian Scientist allows the things of the Spirit to take the first place in his thoughts, and the things of the flesh the second, believing, as he does, that this command entails the abandonment of every acknowledgment that there can be any power, any will, any desire but that which is spiritual. It follows, then, that he must regulate his thoughts and actions by the understanding that his being is governed by a spiritual law which is irresistible and unchangeable, and that, in so far as he acknowledges God in all his ways, and leans not to his own understanding, or to the impulses

Digitized by Google

of the human will, the troubles, worries, and fears, the diseases and terrors which beset the human mind and body, disappear, and, as a natural consequence, he becomes a more reliable member of society.

It is not difficult to see that one whose mind is thus dwelling constantly on the spiritual and moral facts of being must become largely free from the petty contentions of the "daily round,"—from the jealousies, resentments, intrigues, and embarrassments which pursue the average man and woman. In such a case those conditions must necessarily dwindle into very secondary importance, and therefore his mind will be capable of a clearer, larger grasp of affairs, he will be less swayed by opinion, by selfish considerations, or by personal ambition. Also, he will be less subject to the fluctuations of capacity produced by changes of health. Spirituality, as viewed by Christian Science, can thus be brought into and made the dominating factor in every relation of life, and in proportion to his mastery of that fact does the individual begin to realize within himself something of the "peace of God, which passeth all understanding."

[Olcott Haskell in *San Francisco Call.*]

It should be noted that the majority of those who turn to this Science for relief do so only after all other means have failed, or after they have seen for themselves convincing proof of its safety and success. It is well known that Christian Science is one of the most effective means for the cure of insanity, and in nearly all of its churches may be found persons who thankfully testify to having been saved from depression and despair, and even from suicide, through the joy and peace brought by its teachings. These are the natural results to be expected, for, as our critic himself admits, the relief of mental troubles also relieves the body; and since Christian Science teaches unlimited reliance upon God,—upon the all-power and all-presence of a loving Father,—it should follow that its mental (and consequent physical) relief to those in distress must be more complete than that offered by any other system. Years ago, in answer to a question, Mrs. Eddy, the Discoverer and Founder of Christian Science, explained that this teaching could not prove injurious to any one, and that it would, where properly applied, heal the insane.

Christians should remember that a science which inculcates the highest standards of morality; which encourages daily prayer and Bible study; which reiterates Jesus' commandment to love one another, and which causes every adherent to strive for that Mind to be in him "which was also in Christ Jesus," must prove strengthening and uplifting to all who come under its influence.

[Gray Montgomery in *Silver and Gold,* Boulder, Col.]

Christian Science is not a speculative theory nor a man-made philosophy of the human mind, it is a system of divine metaphysics based wholly upon the Bible; the definite rule for its application being completely and logically presented in the Christian Science text-book, "Science and Health with Key to the Scriptures" by Rev. Mary Baker Eddy. The spiritual interpretation of the Bible as given in this text-book, teaching that God is infinite divine Mind, that man in the image and likeness of God is perfect and spiritual, destroys sin and disease, freeing mankind from the darkness of despair and bringing him into "the glorious liberty of the children of God." This absolute and spiritual sense of the allness of divine Mind and its manifestations precludes the belief in the real or eternal existence of mortal mind or matter.

The doctor's statement that the cures of Christian Science may "be explained as the result of suggestion," is diametrically opposite to the correct *modus operandi* of Christian Science, for the healing is purely the result of prayer, the effectual, righteous prayer of understanding which enabled Jesus to restore sight to the blind, to make the lame to walk, to cause the winds and waves to obey him, to multiply the loaves and fishes to feed the multitude, to bring back from the dead the rich ruler's daughter, and finally to accomplish his own glorious ascension.

[James Phelps in *Milwaukee* (Wis.) *Sentinel.*]

The dominant thought of the critic's discourse is that Christian Science is getting ahead of the other churches. He also charges Mrs. Eddy with purposely digging a chasm between her organization and the other churches, which is the exact reverse of the truth. Considering the vast number of denominations into which the Christian church is split, isn't it passing strange that our good brother should be so exercised over one more division? I assume that each denomination exists because it has a different interpretation of the same Bible which Christian Scientists use; a different idea of some of the essentials of religion. Why then berate our denomination for having a different idea than all others, for forming our own organizations and worshiping God according to the dictates of our own conscience? We attend strictly to our own business,—preach the gospel, heal the sick, and strive to reach the perfect stature of manhood which was exemplified in Jesus of Nazareth. In none of the thousand or more pulpits of the Christian Science faith from which the gospel is expounded every Sunday, is any other denomination assailed.

Another glaring inconsistency in the critic's position is that he insists that Christian Scientists heal by means of suggestion or autosuggestion, as he claims to do, yet he admits that his methods cannot possibly effect the cure of an organic disease; while Christian Science is healing organic diseases every day. He claims divinity, not only for his own methods, but for the methods of physicians and surgeons; yet there is no authority in the Bible for either medicine, surgery, or suggestion. Those divine rules of conduct and of living, known as the Ten Commandments, are silent on the subject. David tells us that it is God who "healeth thy diseases;" Christ Jesus healed the sick without physicians and drugs. He said: "The Father that dwelleth in me, he doeth the works," "I can of mine own self do nothing," "Not my will, but thine, be done." Such statements as these surely do not sound like suggestion or autosuggestion.

[Written for the *Sentinel.*]

ILLUMINATION.

MIRIAM ORMONDE SMALLWOOD.

NIGHT covered me. My blinded eyes
Saw not the gracious rays
  Of Love's soft light—
  Power infinite
To cheer and bless my days.

My dulled ears heard nor sound nor word,
And reason slept, unheeding
  The gracious call—
  Lo, God is All,
And with thee pleading!

Till, crushed by error, doubt, and fear,
I reached out for Thy hand—
  Now Truth is here,
  The way is clear—
I see and understand.

THE LECTURES.

TACOMA, WASH.

Prof. Hermann S. Hering of Concord, N. H., delivered an interesting and able lecture to a large audience at the Tacoma Theater last night [March 22] on "Christian Science, the Science of Salvation." Professor Hering was introduced by Clarence C. Eaton, who spoke in part as follows:—

Inasmuch as Christian Science does not need you or me, but we need it, I understand that no attempt will be made by the speaker directly to urge any one to augment the number of its adherents. All questions concerning the well-being of mankind Christian Science treats as paramount and privileged ones, and the believers in this Science would rejoice to see relegated to a deserved oblivion the practices so commonly resorted to in religious meetings of attempting to influence men unduly upon spiritual questions. The public addresses provided for by this movement are not designed to persuade individuals to think as we do, but to think independently for themselves. We plead for a candid and unprejudiced investigation of all spiritual truths. It is of first importance that we know the truth, because the promise of Christ Jesus is that our freedom from sin and disease is contingent upon such Christian knowing. Moreover, life eternal is to be obtained through a knowledge of Truth. Christian Science promises much to the world, and in the light of its accomplishments thus far, there is every reason to believe that these promises, and even more than we can think or ask, will be naturally, lawfully, and scientifically fulfilled through the truth.

As all that concerns our present happiness and future joy rests upon the acquirement and conscious possession of a knowledge of God and His Christ, I am constrained to urge that, to the extent we are privileged to exercise our volition this afternoon, the speaker's message receive our impartial judgment and consideration, in order that we as listeners, individually and collectively, may profit by the vital truths to which it will be his great joy to give expression.—*Tacoma Ledger.*

RUTLAND, VT.

A lecture on Christian Science by Bliss Knapp was given March 28. He was introduced by H. L. Hindley, editor of the *Rutland Herald,* who said in part,—

Religious and social life, especially, is in a condition of evolution. We have passed the stage of revolution, and a great many standards fixed by churchmen and religionists of the past have been found insufficient. I will not say that they have been found not good, but insufficient. The growth of Christian Science has been so phenomenal, and the character of the citizenship attracted to its churches so superior, that it has long passed the stage of being scoffed at or treated with indifference. Unwise and meddlesome people have also been attracted to this movement, just as they have been attracted to all others, and their sins and errors, using the word in no cryptic sense, have sometimes overshadowed the propaganda set up by a rather quiet, tolerant people, whom we find intelligently behind the churches of Christian Science.

The latter, in your experience and mine, are living evidences of the effect of their belief. However they may have reached it, and whatever the explanation, we must confess that their lives, their works, and their serene confidence prove them to be Christians, and I use the word in its broadest sense of Christ-men and Christ-women. Whether they are also scientific is the question that you and I have before us to decide this evening. Many of us believe that all Science is Christian, but few of us would say that all Christianity is scientific.—*Correspondence.*

KOKOMO, IND.

Bicknell Young lectured on Christian Science at the Sipe Theater March 30. Conrad Wolf, who introduced the lecturer, said,—

During the nineteenth century there was a great growth in the human mind, and a great growth in the knowledge of the reign of law. This growth was along the line of natural science. It was a great growth, but along with it the reign of natural science finally came to have a grip upon the human mind, until it seemed to many people that under what has been called, and truly called, materialistic science, the human mind was no longer free. Even the Almighty Himself was a prisoner within His own laws. Then the human mind began to revolt against that thing, unconsciously with some and consciously with others, and out of this revolt came a great movement known as Christian Science. Many of us are not Christian Scientists,—we do not accept the system for its teachings as a whole,—but I think we may all say tonight that so far as it looks in the direction of freedom, as it has its face set toward the light, just so far at least as it helps to lift and bear the burdens of humanity, we may all bid it welcome.—*Correspondence.*

PALO ALTO, CAL.

A crowded house greeted the lecturer on Christian Science last evening [April 1] at the Christian Science church. The speaker, Prof. Hermann S. Hering, was introduced by E. A. Totten of Palo Alto, who said in part,—

Nearly two thousand years ago there lived a prophet who said, "And I, if I be lifted up from the earth, will draw all men unto me." The influence of Christ Jesus has outlived the ages. There has been no man in history whose words and acts have so left their imprint upon the minds of men as have his. Like many great men, he lived in advance of his time. He lived in advance of this present age, and, like many great reformers, his mission was not understood, neither is it fully comprehended today. His life and teachings form the moral and religious standard by which the Christian world is governed. Out of his life has grown the greatest power for good the world has ever known. The beginning of Christianity was quite crude, being fettered by dogma and tradition.

Christ, our Exemplar, never missed an opportunity to do good. He never turned any one away who sought the truth. His whole life was given over to others. Among the first injunctions he gave to his disciples and followers were "Heal the sick" and "Cast out devils." His fundamental thought was to give man help here and now, striking at the very foundation of social and religious life—healing the fountain that the stream might be pure. This healing of the sick and destruction of evil was lost sight of after the apostolic age. The church slept for centuries. Every great event, whether it be political revolution or social and religious reform, forecasts its shadow. Out of this darkness came the great Reformation. This was a long stride in advance. Then came the period of unrest, infidelity, researches, and criticisms. It did not measure up to human needs. At this juncture a discovery was made by Mrs. Eddy which brings back to earth the Christ-life—the Mind of Christ. Her teaching is not dogma, or mere traditional Christianity. It is Christ. He is the center around which men cluster and reflect his image. "Let this mind be in you, which was also in Christ Jesus."—*Palo Alto Times.*

CHRISTIAN SCIENCE SENTINEL

EDITORIAL

MRS. EDDY TAKES NO PATIENTS.

The author of the Christian Science text-book takes no patients, and reads no letters on disease, distress, or error of any kind. Reliable news concerning Mrs. Eddy will be found in the Christian Science publications.

"GOD'S WILL."

WE take pleasure in quoting the following item from the *New Rochelle* (N. Y.) *Press*, for in taking this broad-minded Christian stand Dr. McGregor honors both himself and the denomination which he serves as a minister:—

Rev. Robert Gardner McGregor, of the North Avenue Presbyterian Church, spoke on "Christian Service" last Sunday, but one of the papers inadvertently made the notice read "Christian Science." The minister, in correcting the misapprehension under which a number doubtless attended, said:—

"As long as I remain in this pulpit or Christian sect, those striving to do God's will, will not be preached against, and as for this particular sect, my position in regard to them is found in Acts 5th chapter, 38th and 39th verses: 'And now I say unto you, Refrain from these men, and let them alone: for if this counsel or this work be of men, it will come to nought: but if it be of God ye cannot overthrow it; lest haply ye be found even to fight against God.'"

The real test of any form of Christianity is whether it encourages its followers to strive to do God's will, and at the same time gives them some reasonable hope of success in their endeavors. Jesus said to his disciples, "My meat is to do the will of him that sent me, and to finish his work." In order to learn what Jesus accepted as the will of the Father who had sent him into the world as a means of salvation for sin and disease-burdened humanity, it is only necessary to scan the record of his earthly ministry. The list of so-called miracles which he performed, as enumerated in the cyclopedic concordance of the Oxford Self-Pronouncing Bible, number thirty-six in all, and twenty-six of these are instances in which he healed the sick or raised the dead.

When we take into account the fact that practically one half of the four Gospels is given over to the account of this ministry of the Master, there can be no reasonable doubt as to the will of God as manifested through His Son, Christ Jesus, and no doubt whatever about the legitimacy and lawfulness of the healing work thus described, unless Jesus was entirely mistaken about his mission, and his enemies justified in their assertion that "this fellow doth not cast out devils, but by Beelzebub the prince of devils."

Unless the healing of the sick, which was so prominent in Jesus' ministry, is to be accepted in these days as it was accepted then,—as the coming of the Christ to human apprehension,—then we are without proof of the truth of present-day Christianity and its availability for the redemption of the race. Jesus gave an authoritative and comprehensive definition of a Christian, and an infallible test by which his followers might be known, when he said, "And these signs shall follow them that believe; In my name shall they cast out devils; they shall speak with new tongues; they shall take up serpents; and if they drink any deadly thing, it shall not hurt them; they shall lay hands on the sick, and they shall recover."

We shall do well to consider the pertinent question which Mrs. Eddy asks in Science and Health (p. 37): "When will Jesus' professed followers learn to emulate him in *all* his ways and to imitate his mighty works?" Whether the teachings of Christian Science are enabling its followers to do the works which Christ Jesus said should "follow them that believe," is a question of great importance to humanity, and it behooves the sensible man to investigate these works which are being done today "in his name." Until he has done this, he should heed the words of Gamaliel so aptly quoted by Dr. McGregor.

ARCHIBALD MCLELLAN.

HAVING AND GIVING.

THE world's greatest story-book has few tales that are more touching and instructive than that of the widow of Zarephath, whose "fiery trial" and obedient faith were made known to the Christian ages as the result of a prophet's plea for a bit of bread.

The famine had brought the weak and decrepit to such extremity that but for its wearisomeness death seemed not uninviting, and for this event the poor woman was calmly preparing when the man of God appeared upon the scene and assured her that her own supply would not fail if she would but give him a part of her remaining morsel. The readiness with which she believed and acted upon his word, regardless of the wailing of her famished child,—this tells of a faith which had surely reached the threshold of spiritual understanding. No doubt she had been thinking, as have most of us all our lives, that though with much labor good things may be gotten, their possession is a matter of such uncertain tenure that it is ever attended by care and anxiety. Human thought has come to entertain the belief that it is even more difficult to keep coveted things than to gain them, and the consequent fear of loss is ever present to mar human joy in having and, so far as it can, to stay generous impulse in giving, until, like the Preacher of old, many a man who has gotten "much goods" has been led to say with heaviness of heart, "All is vanity and vexation of spirit."

The way in which Elijah spoke to this needy woman makes it apparent that he had a sense of possession which was in marked contrast with this still prevailing human thought. He had come to understand one of the fundamental and revolutionary teachings of Christian Science, namely, that all true wealth is in consciousness, and hence that no real possession can be lost; it can neither be taken from us nor can we give it away. Though we share it with all the needy, our cruse will not fail, our store will not be lessened. The bread and the oil still serve as the common symbols of the supply of common needs, but an uncommon realization of spiritual reality has given us that new and true sense of both having and giving which made the prophet's ministry so genuine and so adequate.

Every real possession is an eternal possession. It is a divine impartation to man. It has become a factor of consciousness, and it can never be taken from us. It was to this comforting and inspiring truth that the great apostle referred when he exclaimed exultingly, "I am persuaded, that neither death, nor life, nor angels, nor principalities, nor powers, nor things present, nor things to come, nor height, nor depth, nor any other creature, shall be able to separate us from the love of God, which is in Christ Jesus our Lord." To attain to this realization is not only to begin to solve our own problem of supply, it is to find freedom and fitness, the loving impulse and the perception of real need which will enable us to give wisely and well, for the real betterment of others and for the abiding joy of our own hearts. We begin to see that to give truly and helpfully one must have and bestow an heavenly manna; he must be a Christ-man, and then give himself as did the Master.

The Christian world has been saying that Jesus gave his material body and blood for the world's redemption, but Christian Science reveals the greater gifts thus symbolized, even his consciousness of spiritual reality, his pos-

Digitized by Google

sessions of Truth and Love. This higher sense of having and of giving opens a way of escape not only from the fear of want and from the stinginess and unbrotherliness of human sense, but from the mistake of failing to make our every contribution to the relief of physical distress and want a vehicle and expression of that nobler giving which constitutes and exemplifies the ministry of Christ.

JOHN B. WILLIS.

"AN HELP MEET" FOR MAN.

IN the spiritual record of creation, found in the first chapter of Genesis, we are told that God's likeness was expressed in the male and female of His creating, of whom Mrs. Eddy says, "The ideal man corresponds to creation, to intelligence, and to Truth. The ideal woman corresponds to Life and to Love." She says further, that man and woman are "unchanged forever in their individual characters, even as numbers which never blend with each other, though they are governed by one Principle" (Science and Health, pp. 517, 588). In the second account of creation, which is based upon the belief of a material origin, and of creatures with qualities wholly unlike the spiritual, we are told of the coming of a woman who was to be "an help meet" for Adam. Unfortunately—for themselves and the whole race—the woman, according to this allegory, partook with her husband of the forbidden fruit,—the knowledge of good and evil,—and together they lost their way to the "tree of life." In spite, however, of the woman's mistake, the promise of redemption came in the declaration of Truth, that there should be perpetual enmity between the serpent and the woman, until her seed should bruise the serpent's head—crush out error.

Throughout the entire history of the human race we find that woman has been made to hold a subordinate position, whenever and wherever materiality dominated the beliefs of any people. On the other hand, we see that when spirituality has prevailed woman has been accorded her rightful place, at least to the extent of having an opportunity to prove her fitness for sharing in the heroic task of elevating and purifying the race, and thus establishing universal righteousness, with its inevitable harmony and peace.

At this period, as never before, thought turns to the life and inspired teaching of Christ Jesus, and it is indeed refreshing to discover therein the honored place accorded to woman. Beginning with the adoring song of the virgin mother, we have a continuous record of woman's ministry, up to the resurrection morn, when the risen Lord commissioned Mary Magdalene to go and tell the unbelieving brethren that he had triumphed over death and the grave. We also read that women were present with the apostles at the founding of the first Christian church, and in spite of some evident prejudice on the part of St. Paul, we find many passages in his epistles which tell of the prominence of women among the early workers, notably in the 16th chapter of Romans, where he classes them among the saints. He reaches the truth, however, in his statement that when we "put on Christ . . . there is neither male nor female," for all are to be one in Christ Jesus.

Much may be said respecting the rights and privileges of women, but Christian Science makes it clear that only as woman gains in spirituality does she attain to the true sense of power; then divine Mind opens up to her each and every channel by means of which she best becomes "an help meet" to man, whether in the home, the church, the place of business, in courts of justice, or in legislative assemblies. In no way can woman so mightily help man as in strengthening his faith in the reality and power of good,—of purity, of justice, of absolute right; and this she must do, if at all, by her own unwavering allegiance to divine Principle, at all times and under all circumstances. In the presence of this glorious task, the follies and frailties of the sense world can make no appeal, for Truth bids woman to rise to the heights and come to her own,—the reflection of Life and Love.

ANNIE M. KNOTT.

LETTERS TO OUR LEADER.

North Yakima, Wash., March 23, 1909.

Dearly Beloved Leader:—Having just finished my daily study of the Lesson-Sermon (Reality), I am filled with such an overwhelming sense of the magnitude of the service you have rendered mankind in pointing out the straight and narrow way between all the "'isms" and "ologies" of these later days, that I am impelled to add this to the burden of thanksgiving that is pouring forth from so many appreciative hearts to you. No words of mine can portray the mental distress from which your teachings have saved me. As a professional nurse I was burdened with a sense of the world's great need of healing, both physical and moral. I longed to be a help, but many failures caused me to cry, Oh, how utterly helpless is a woman to baffle sin! It was my ambition for many years to take the training needed to become a missionary,—a medical missionary among the unfortunates in the city's slum,—but many things seemed to prevent, and in my discouragement I prayed that God would open the way.

This prayer was answered when I turned to Christian Science for relief in time of great need. Ere this need was fully met, the Christ-idea dawned on my consciousness, and I beheld my missionary work made plain. I entered the service at once by reforming the slums which Truth revealed to me in my own mental city. The surest way to reform the world proved to be the reforming of my own consciousness. The Bible has proved a treasure-house of healing balm for the mental, moral, and physical ills of mortal man, when unlocked by the "Key" you have given, but best of all, the personal striving for the redemption of souls was calmed, for Christian Science is our missionary; the healer and the healing; the preacher and the creed. And woman is not helpless, but "mighty through God," for our work is to rejoice in ever-present Love; as the "voice of one crying in the wilderness" of mortal woe.

In proportion to my capacity to rejoice have I been able to prove the efficacy of the prayer that "availeth much" to meet all human need. Could there be anything for which one should feel more grateful, than for a given rule by which to work out all life's problems? And who is there who would deny me the joy of loving you for so great a blessing! Through obedience to divine Love, God helping me to apprehend, I would prove my loyalty to you and to humanity.

Your grateful student,

LEONORA HEARLE.

St. George, N. Y., April 2, 1909.

Beloved Leader:—We, the members of First Church of Christ, Scientist, Staten Island, N. Y., in annual meeting assembled, wish to express to you our deepest love and unswerving loyalty. It is our earnest prayer that this branch of The Mother Church may ever rest on a purely spiritual basis; and we realize that this can be accomplished only as each member builds in consciousness "the structure of Truth and Love" (Science and Health, p. 583).

Lovingly yours,

LUCY S. SEAMAN, *Clerk.*

Digitized by Google

Buffalo, N. Y., April 5, 1909.

Dear Mrs. Eddy:—We, the members of Second Church of Christ, Scientist, Buffalo, N. Y., in annual meeting assembled, with one voice wish to express to you our love and willingness to serve you and our Cause in sincerity and truth. We appreciate with growing gratitude our periodicals, especially the new departure in journalism, *The Christian Science Monitor*. Your spiritual insight and unselfish application of Principle have indeed brought abundant blessings to mankind.

From our hearts we thank you, and pray that within us a clearer, deeper, more abiding realization of the oneness of man may find expression in deed.

GEORGE L. VAN ALLEN, MRS. MARTHA K. BARDING,
MRS. LENA R. DAYTON, *Committee.*

Pasadena, Cal., April 8, 1909.

Mrs. Mary Baker Eddy, Boston, Mass.

Beloved Leader:—We, in meeting assembled, turn to you in deep and grateful appreciation, that we may share with you our joy over this mile-stone in our progress—the laying of the corner-stone of First Church of Christ, Scientist, in Pasadena. We recognize that "the corner-stone of all spiritual building is purity" (Science and Health, p. 241), and further, that as each member of the church strives "to reach the Horeb height where God is revealed," the walls of our church will rise above the corner-stone which was placed with prayerful ceremony March 30, 1909.

Through your unswerving fidelity to Principle we have your inspired definition of "church," and this is the premise for all our church work, "rousing the dormant understanding from material beliefs to the apprehension of spiritual ideas and the demonstration of divine Science, thereby casting out devils, or error, and healing the sick" (*Ibid.*, p. 583). "To square accounts with each passing hour" (Messages to The Mother Church, p. 91), is only one of the many lessons we have already learned from church building, and our listening thought is ever ready to receive from you, through the channels you have provided, every message which illumines for us the path of progress, which is the law of being.

In this church building may we "reflect in some degree the Church Universal and Triumphant" (Church Manual, p. 19) which you, our revered Leader, have established in consciousness in the revelation given us in Science and Health.

In obedience and love,
FIRST CHURCH OF CHRIST, SCIENTIST,
Pasadena, Cal.

Memphis, Tenn., April 9, 1909.

Mrs. Mary Baker Eddy, Brookline, Mass.

Beloved Leader:—Long ago the psalmist wrote, "Out of Zion, the perfection of beauty, God hath shined." Today, recognizing in part how your life example and our priceless text-book, "Science and Health with Key to the Scriptures," have come to us through your demonstration of Truth, dispelling the darkness and revealing God to our apprehension, we, the members of First Church of Christ, Scientist, of Memphis, in quarterly meeting assembled, send you greeting of love and deep gratitude. If we cannot yet bring the full sheaf of wheat to add to your garner, we can bring, as the dove brought back to Noah, a leaf from the branch of olive. Our church structure is not complete, but we are building it, and have been able to worship herein since January. Through knowing, as we read in Genesis, that "God saw every thing that he had made, and, behold, it was very good;" and as John tells us, that "all things were made by him; and without him was not any thing made that was made," we are able to destroy error and discord of many kinds.

Humbly and fervently, "we watch, and pray for that Mind to be in us which was also in Christ Jesus" (Science and Health, p. 497), to love one another, and to strive, as you have bidden us, to follow you as you follow Christ.

With dear love, gratefully and loyally,
MRS. DAISY B. NORRED, MARY VILEY LITTLE,
CHARLES N. CHURCHILL, *Committee.*

Detroit, Mich., April 16, 1909.

Mrs. Mary Baker Eddy, Brookline, Mass.

Beloved Leader and Friend:—The members of First Church of Christ, Scientist, of Detroit, in annual meeting assembled, desire to express their heartfelt thanks and love to the great Giver of all good, for this most wonderful truth of Christian Science, which has come to the world through your spiritual receptivity, loving-kindness, patience, and gentleness, expressed at all times and to all persons. We are grateful to you for the encouraging word, the wise and timely advice, and, when needed, the stern rebuke to wilful sin. We are learning more and more the truth of your words on page 186 of Science and Health, "If mortal mind knew how to be better, it would be better." We are earnestly striving to give the living testimony of daily deeds, which are only possible through the understanding of divine Principle made operative in cleansing the sinner and healing the sick, as shown by your words and life.

May the realization of the words, "There is no separation in love," grow stronger and stronger in the thoughts of mankind toward you.

With tender affection we are,
ELIZABETH L. LEIGH,
CHARLES K. SKINNER,
Committee.

Ogden, Utah, April 9, 1909.

Mrs. Mary Baker Eddy, Brookline, Mass.

Beloved Leader:—In behalf of the members of First Church of Christ, Scientist, I herewith enclose copy of resolution which was adopted at our last quarterly business meeting, April 8, 1909.

With love to you for your untiring efforts and ceaseless prayer for humanity, and earnestly praying that we may be faithful to our trust,

Loyally yours in Christ,
SOPHIE C. ROBERTS, *Clerk.*

[Following is the resolution to which reference is made. —EDITOR.]

Inasmuch as we, the members of First Church of Christ, Scientist, of Ogden, Utah, are enjoying numerous blessings, notably a goodly share of harmony and all that goes hand in hand with it, and believing that this most desirable condition is largely due to the unity which prevails in our church as a result of the uniting of members of former First Church and those of the former Christian Science Society, for the purpose of bringing out the most good to all:—

Be it resolved: That we, in quarterly meeting assembled, unite in returning our beloved Leader, Mary Baker Eddy, our heartfelt gratitude for the many blessings, both spiritual and physical, which have come to us, and for making it possible for us all to live in brotherly love and work shoulder to shoulder for the advancement of our beloved Cause, Christian Science, which is enlightening the world.

Be it further resolved: That a copy of this resolution be mailed Mrs. Eddy by our clerk.

Members of First Church of Christ, Scientist.

AMONG THE CHURCHES.

LONDON, ENG.

Third Church of Christ, Scientist, in London, which has hitherto made its headquarters in the Portman Rooms in Baker street, has, we are informed, acquired a valuable site in Curzon street, where, as soon as the ground has been cleared, a church of its own will be built. The purchase price of the site alone is said to have amounted to £40,000, while the building will cost at least an equal amount.

Onlooker.

OAKLAND, CAL.

Plans have been accepted by the Christian Scientists for a new church at the southwest corner of Central avenue and Walnut street, and building operations on the edifice will begin shortly. The church will be of the old mission architecture, and similar to the Adelphian club hall, directly opposite the property owned by the Christian Science church. It will be built on a larger scale than the club-house and will have a seating capacity of eight hundred. The estimated cost of the new edifice is twenty-five thousand dollars.—*Oakland Tribune.*

ASHEVILLE, N. C.

The regular eleven o'clock service of First Church of Christ, Scientist, will be held this morning [April 4] in the Auditorium Building. This change is made on account of the building which has been used for services being moved to the rear of the lot at 64 North French Broad avenue, preparatory to beginning the erection of a new church building on the front of this desirable lot. The plans for the new church are being prepared, and show a very attractive building of Grecian architecture.

Asheville Citizen.

LOS GATOS, CAL.

The Christian Science Reading Room and chapel at Los Gatos has been completed at a cost of thirty-five hundred dollars. It will meet all the requirements of the congregation until the permanent church contemplated is constructed on the same lot. The exterior of the building is very attractive in finish. The auditorium is finished throughout in Oregon pine and furnished in harmony. It is twenty-five by thirty-four feet in dimensions. The building covers a ground space of forty-eight by forty-nine feet six inches, and the auditorium will accommodate over one hundred and fifty people. The construction and fitting expense of the house of worship has been fully met.

San Francisco Chronicle.

HOQUIAM, WASH.

Christian Scientists who live about the Harbor have just reason to be proud of the stately edifice erected by the Christian Science Society. The new structure, which stands in architectural beauty at the corner of Seventh and L streets, has been building for five months past and is already in daily use as regards the ground floor. Material for the dome has arrived and is being placed in position this week [March 18]. All of the rough work in the main auditorium of the church has been completed by skilled artisans, and by May 1 the congregation expects to be holding services in the main room of the edifice, where a seating capacity of three hundred and fifty has been provided.—*Gray's Harbor Washingtonian.*

GALESBURG, ILL.

An arrangement has been consummated by the terms of which First Church of Christ, Scientist, has come into possession of the fine property at the southwest corner of South Cedar and West South streets. It is the intention of the members of the church to remodel the house already on the property and make a chapel out of it, though how soon this will be done is not definitely known at this time. At present services are being held in Beecher Chapel, which is leased for the purpose until the second Sunday in September. It is the object of the membership to have some day a fine church edifice on this corner, and certainly a finer location could not be had. It is considered ideal in many respects, one being that its surroundings are as good as could be secured. There are two lots in the plot, which is eight rods by eight rods, and the church when built could set well back from the street in both directions.

First Church of Christ, Scientist, is in a very flourishing condition at present, and could well undertake these increased activities. Until last September, it will be remembered, there were a First and a Second church of this denomination in the city, but the two were joined and the united branches are doing most excellent work, and a very satisfactory growth has been made.

Galesburg Republican Register.

HORNSEA, HULL, ENGLAND.

On Jan. 6, First Church of Christ, Scientist, Hornsea, was dedicated. This is a small field in a very out-of-the-way part of England, cut off by the sea on one side, and the Humber on another, but we are sure that the report of the progress of the work here will prove of interest to other small fields and an encouragement to them in their undertakings.—*Correspondence.*

BALTIMORE, MD.

Owing to the large increase in members and attendance at Second Church of Christ, Scientist, it has been found necessary to seek larger quarters, and as a result the main auditorium of Albaugh's Theater has been secured. The church owns a lot at St. Paul street and Mt. Royal avenue, upon which it is proposed to build a church.

Baltimore American.

NEWMAN, ILL.

First Church of Christ, Scientist, held its opening service in "The Cottage" on North Broadway last Sunday [April 4]. The usual order of service was observed with the exception of the reading of a short history of the local church by the First Reader. "The Cottage" has been made into a very pleasant and attractive place of worship and work.—*Newman Enterprise.*

THE PUBLISHING HOUSE BUILDING FUND.

Contributions to the Publishing House Building Fund should be sent to Stephen A. Chase, Treasurer, P. O. Box 56, Fall River, Mass. These contributions will be thankfully received and promptly acknowledged.

ADMISSION TO MEMBERSHIP.

The next admission of candidates to membership in The Mother Church will be June 4, 1909. Applications should be in the hands of the Clerk on or before May 12, 1909. Application blanks may be had by addressing William B. Johnson, C.S.D., Clerk, at the church edifice, Falmouth, Norway, and St. Paul streets, Boston.

TESTIMONIES OF HEALING.

For about eleven years my only healer has been "Science and Health with Key to the Scriptures" by Mrs. Eddy. When our Leader's writings were handed me by a kind friend (with whom I am now privileged to be a coworker), I at once recognized what I had always desired to know, viz., how Jesus healed the multitudes. By reading the Christian Science literature, in faith believing, I was healed of many ailments,—severe stomach trouble of years' standing, rheumatic and neuralgic trouble, headaches. All these thorns of the flesh left me, and the habit of constantly worrying, which was worse than physical suffering, was overcome completely. I had also worn eye-glasses for fourteen years, and was unable to do any kind of work which required the use of my eyes without them. It took longer to lay aside the glasses than to get rid of the other errors, principally because I was so anxious to read all I could about Christian Science. I felt impatient at spending so much time in trying to read several sentences without glasses; but finally I came to see that it was time gained to read ever so little without them, and when I did this I found that each day I was able to see better and read more. It was only a short time until I was able to do all kinds of work, even sewing or anything that required close application. This was about ten years ago, and I do rejoice in the understanding that sight is spiritual.

At a time when grief seemed so intense that nothing in the whole world could bring comfort, Christian Science, as revealed to this age, was proved to me beyond a doubt to be the promised Comforter. It brought me sweet rest and peace, so much so that my tears were dried and sorrow turned into joy in giving comfort to others. At first a copy of the *Journal*, and then "Miscellaneous Writings," were my constant companions. Later I became the owner of a copy of Science and Health, which together with the Bible has been my healer, my preacher, my friend, my guide, and my counselor day by day. For all these blessings, and many more that Christian Science has brought to me and others, I am daily grateful. Above all, I am so glad that this teaching dawned upon my consciousness as the truth. In the Preface to Science and Health (p. vii.) we read, "The only guarantee of obedience is a right apprehension of Him whom to know aright is Life eternal."—Mrs. Christie McLean Numan, Canton, O.

Having found my health and a priceless and practical truth in Christian Science, I gladly testify of it, hoping it may help a weary searcher for the truth and for health, such as I was about three years ago. While I was visiting in Johannesburg, an acquaintance advised me to go to the Christian Science Reading Room just opened in that city. The first *Sentinel* which came to hand interested me, and after I had read a bit I asked the lady in attendance whether there were any practitioners in South Africa. I was then a sufferer from hereditary asthmatic trouble, besides other ailments, all of long standing. I had tried several doctors, various remedies, etc., all without getting any permanent relief. It was then that Christian Science treatment was given me, and I received in a week more help than in all the previously given material treatments combined.

Under the application of this blessed truth a peace of mind came to me such as I had not experienced since childhood, which left to me no doubt as to the truth of Christian Science. Life had seemed a burden to me, but through the study of "Science and Health with Key to the Scriptures," health and happiness have been restored and life is now a blessed privilege. Being a Hollander, I thank God that I got acquainted with the English language, and I am now rejoicing in the beautiful unfolding of the truth, which has made the Bible a new book to me. I thank God, and am grateful to His faithful messenger, Mrs. Eddy, for giving this pearl of great price to the world and to me. I am striving meanwhile to live a life worthy of the name Christian Scientist.

J. W. Reinders, Potchefstroom, Transvaal, S. Africa.

With thanks to God, and to dear Mrs. Eddy, our beloved Leader, I will tell some of the good I have received through Christian Science, as I could not enumerate all of the blessings that have come to me through this healing truth. A little over three years ago I suffered from a second attack of abdominal trouble. I was packed in ice and my people thought I could not recover. The physician was very kind and did all he could for me, and while I did recover from this attack, yet I was unable to do any work whatever, and I was continually oppressed with the fear that I might at any time have a relapse. I was advised to have an operation, but to this I would not submit, even though I was very tired of living constantly in pain and fear. I also had a number of other ailments,—rheumatic and catarrhal trouble, headaches, etc.

One day a dear friend said to me, "Come up to my house tomorrow and I will tell you of something better than an operation." This was just like having a stone lifted from my heart, to hear of something better than an operation, and I lost no time in availing myself of her invitation. This friend told me that her mother, then seventy-eight years old, had been healed in Christian Science, and she gave me a dear little book to read, "Rudimental Divine Science," by Mrs. Eddy.

One statement that I read in this book, "The emphatic purpose of Christian Science is the healing of sin; and this task, sometimes, may be harder than the cure of disease" (p. 2), especially appealed to me, as I was at that time a member of an orthodox church and very well satisfied in my belief, also an earnest worker in the church. My sister urged me to see a Christian Science practitioner, and I did so, thinking I would first investigate, and learn if the healing came from God. When I asked the practitioner this question, he informed me that in Christian Science God is understood to be Love and all-power. I then asked about the Ten Commandments, and he again kindly explained that Christian Scientists believe that when they keep the First Commandment they keep all of them. I had never before realized there is so much in the First Commandment. I then asked for treatment, and in about two months I was entirely healed. After the first few treatments I walked about a half mile to and from the practitioner's office. I am happy to say that all the other ailments have left me. My eyes also had troubled me, so that I had to wear glasses, but I have not put them on since having Christian Science treatment and my eyes are perfectly well. Here I would like to say that I have not taken any medicine since my healing in Christian Science, and I am feeling better then I ever did before.

Need any one wonder that I am thankful to God, and to our beloved Leader, Mrs. Eddy, for this truth that has made me free? The Scriptures say, "Ye shall know the truth, and the truth shall make you free," and I find in the Lesson-Sermons my daily food and inspiration. Although physical healing must come through spiritual understanding, yet to know the truth about God and man means most to me, and it is my earnest prayer to grow in the understanding of Christian Science. I am realizing more every day that I can show my gratitude best by right thinking and living, and we can all learn how to think rightly by studying our inspired text-book, "Science and Health with Key to the Scriptures" by Mrs. Eddy. I am glad to say that through its study the Bible has become a new book to me.—Miss Margaret C. Von Essen, Santa Ana, Cal.

It is with deep gratitude that I give the following testimony. I sought Christian Science about a year ago, not because of any serious physical illness, but because of a severe mental strain. My condition was such at this time, that it seemed to me I would have to give up everything. I seemed to be a nervous wreck, but with a few treatments in Christian Science I found that the trouble had all disappeared, and with it all my fears. This was a revelation to me, but even this paled into insignificance when I found the spiritual healing, for it brought that joy and peace which passeth all understanding.

I am deeply grateful to God, and to our dear Leader, Mrs. Eddy, for what this truth has done for me.

CLINTON B. WEAMER, Atlantic City, N. J.

On a bright Sunday morning in August, 1907, a railroad train was speeding through a canyon of the Rocky Mountains toward the region of everlasting snows. I was sitting in the train, entranced by the beauty and grandeur about us, when I found myself suffering with the symptoms of heart failure. This ailment had seemed to hold me for months previous, and it had not been without some fear that I had set out on a trip which would take me to some of the highest points in the mountains. But I knew, as one of our beautiful hymns phrases it, that it is "in atmosphere of love divine we live, and move, and breathe," so I had undertaken the trip, determined that I could and would trust God as fully upon the hilltops as in my own home. Now I must prove my reliance to be genuine. There were no Scientists present, so I turned to my books, sat apart from our party, and read the Lesson of the day, which was on "Mind." Never had a Lesson seemed so clear or meant so much to me. When the last word was finished I again looked out upon the surrounding beauty, and my heart sang, "How beautiful upon the mountains are the feet of him that bringeth good tidings"! Every sign of discomfort was gone, and I was breathing naturally. We were then nearing the top of Marshall Pass, an altitude of nearly eleven thousand feet. I spent some days in the mountains, climbing and tramping, without experiencing the slightest return of the disease, and on our homeward trip over Tennessee Pass I was still entirely free.

This is but one of the blessings which have come to me since I learned of Christian Science through the healing of those dear to me. A predisposition to heavy colds has been overcome, and twice I have had all the symptoms of a fever met within three days. In an every-day business life one learns the truth of the promise, "And the rough ways shall be made smooth." I am indeed thankful for Christian Science and its many blessings. By right thinking and right living, thereby bearing witness in our daily life to the healing and uplifting influence of this great truth, do we express true gratitude to our Leader, Mrs. Eddy, for her many years of self-sacrificing work to teach mankind the true way to God, who is "a very present help in trouble." I pray that as the years pass I may be able by living aright to show the true gratitude which fills my heart today, but which words fail to express.

MISS HARRIETTE L. PHINNEY, Denver, Col.

It would take pages to tell even a portion of what Christian Science has done for me and my family. For fifteen years we have been endeavoring to understand and to live the truth as taught by Mrs. Eddy in "Science and Health with Key to the Scriptures," and her other writings, and we have been convinced times without number that Mrs. Eddy has given to the world a correct knowledge of God and man's relation to Him. On page 197 of Science and Health Mrs. Eddy says, "Many of the effeminate constitutions of our time will never grow robust until individual opinions improve and mortal belief loses some portion of its error." This statement applied to my case exactly. I seemed delicately constituted and was liable to almost any ailment. A predisposition to catch cold had resulted in an unhealthy condition of my whole system, and I often suffered almost the entire winter season. I became subject to severe headaches, which continued throughout my girlhood and motherhood and increased in severity as the years went on. Weak heart action caused much anxiety to those dear to me, on account of a predisposition to faint. I experienced serious discomfort whenever it was necessary for me to inhale air that was not pure, and traveling seemed a great hardship.

When I began the study of Christian Science I was afflicted with a disease considered incurable, and many physicians agreed that nothing but the removal of the troublesome organs would bring relief, but I am now entirely free from this disease. I am indebted to Christian Science for my healing, and contrary to the verdict of physicians a child has been born to me since I was healed. About four years ago I took my seat in the coach of a suburban train, thinking that I would rest a little before the train started on its way. I fell asleep, and was awakened by the coughing and sneezing of many of the passengers. On looking about me for the cause of all the commotion, I discovered that our coach was filled with dense smoke and coal gas. I was breathing naturally and not suffering in the least. This caused me great surprise, for all my life I had been subject to asthmatic trouble, and to inhale gas of any kind, or air laden with dust or smoke, brought on distressing attacks. I then realized that I had been healed of this ailment also! The children have passed through most of the ills said to be common to childhood with no serious inconvenience. In nearly every case I have been able to do the healing work unaided, and to one held in the bondage of fear as I was,—lest one of the children should pass beyond,—this freedom brings me the greatest happiness and gratitude.

We have with some measure of success applied the Principle of Christian Science to whatever difficulties have beset us during the period of time from 1893 to the present. Space forbids my telling in detail of the spiritual uplift which we have gained by demonstrating in a practical way —the way which Mrs. Eddy teaches—that All is Mind; there is no matter.—LOUISE S. ANDREWS, Chicago, Ill.

I would like to give expression to the gratitude I feel for the benefits received through Christian Science. Fifteen months ago I was drinking to excess; the habit seemed to be fixed, and I was in despair. I resolved time and again to abstain, but was powerless to do so. A friend of mine, who saw the probability of my ultimate ruin, asked me to go with him to a Christian Science practitioner, but at first I refused. I had taken several drinks that morning, so I asked him to wait until some other time, as I did not want to present myself to a practitioner with the scent of liquor on my breath. He insisted, however, and more to please him than for any other reason, I went. Of course I wished to be healed, but had no faith whatever in this method. Thanks be to God, and to the teachings of Mrs. Eddy, I was healed by the first treatment.

Our home has been transformed from one of discord and misery to a happy and contented one. We have had several demonstrations in our family of the power of Truth over disease, and we are truly grateful for the spiritual understanding that has come to us. I have gained many friends, and my business has improved wonderfully since I was healed. I am not yet a member of any Christian Science church, but expect to take this important step very soon.—GASTON D. PHARES, Wilmington, N. C.

Digitized by Google

It is with joy and gratitude to God for the truth that has come to us through the teaching of Christian Science, which has done so much for suffering humanity, that I give this testimony. Some years ago I was suffering from a stomach trouble, for which I had taken medical treatment five years, all to no benefit. Indeed I rather grew worse, as no food or drink could be retained and even the medicine would be rejected. The last physician I consulted informed me that it was of no use to take medicine longer, and advised an outdoor life and simple food. I could see nothing left but to make this change, and was getting ready to go away when I learned of Christian Science and went to see a practitioner. After listening to a few convincing words of truth, I knew that Christian Science was what I needed, and I started to take treatment. I can say truthfully and joyfully that I was healed and reformed. For misery, sorrow, and pain I now have peace and gladness; for the bondage that sin brought I have liberty. Christian Science is lifting me out of sin and ignorance and teaching me the reality of life, for which I am thankful to our dear Leader. She has made the truth so plain to us through the teaching of "Science and Health with Key to the Scriptures."

J. W. O'BRIEN, San Diego, Cal.

Our baby girl had been ailing for some time with a serious bowel trouble, and as it was her second summer conditions were considered very serious. We were looking for her to pass on at any time, as the physician said he could give us no more hope. At this time a neighbor, who was a Christian Scientist, called, and asked us to try Christian Science treatment for her. We were in such absolute ignorance of this teaching, that we did not know a baby could have treatment, but supposed the patient would have to be a person who could understand and have faith. However, this dear woman's presence inspired us with courage, and we were glad to have her try to help the child. She asked us to leave her alone with the baby, and she stayed with the child that night from nine to eleven o'clock. She then came out of the bedchamber and told us that all was well with our dear little one, that she was resting quietly, and that she would likely remain asleep until the next morning. She also advised us to go and rest. The baby slept all night, and awakened between eight and nine the next morning greatly improved. When our doctor arrived he could not understand her rapid and strange recovery. The practitioner gave the child a treatment each morning and evening and she soon recovered her health. We have also noticed a sweetness and quietness to her disposition, while previously she had a certain nervousness and irritability from her illness.

We feel that Christian Science cured our little one, and through the knowledge of its healing efficacy which we obtained from that experience, we realize the wonderful power of divine Love. We have the text-book, Science and Health, and although we have not united with the church, we are thankful for the blessings we have received in Christian Science and we are firm believers in its healing power.—MAY T. D. ZANE, Atlantic City, N. J.

Eleven years ago a wonderful case of healing through Christian Science took place in my home, at a time when the attending physicians had given the patient but a few hours to live. This so impressed my husband and myself that we at once purchased a copy of "Science and Health with Key to the Scriptures," and took up the study of God and man according to its teaching. Since then we have never turned to material means for help, as this truth has met our every need.

Six years ago a son came to us, and I can bear witness that the curse has been removed which said, "In sorrow thou shalt bring forth children," for peace and joy were with me during all the time. With but one exception the child has never been ill. An eruption appeared on his back, but with the thought of our Father, the one name to be hallowed and revered, the disease was completely healed in a short time. An older child, after having been ill a week with every indication of acute lung trouble, was almost instantaneously healed with the declaration and realization of the truth. This same child had a horse step on his little bare foot, and as I was away from home at the time, he did his own work in Science. Upon my return home another member of the family told me of the occurrence, in wonder at the child's courage and endurance.

A disease, diagnosed as a skin trouble by a physician, attacked me at one time. My grandparents had contracted this disease during the Civil War, from nursing the soldiers, and had passed away within a week of each other. In consequence, my family were much alarmed at my illness, and predicted many calamities if medical attention were not given me. My grandfather had practised medicine very successfully, according to the allopathic school, yet could not save either himself or his wife; so I felt I was safer in God's hands, and with the aid of a Christian Science practitioner I was completely healed in ten days. With deepest gratitude to the sincere and faithful workers in our midst, my prayer is constantly to strive for more humility, purity, and consecration.

MRS. ANNIE M. NEWBOLD, Louisville, Ky.

About nine years ago I was having trouble with my eyes. For nearly two years I had been unable to see, and was obliged to stay in a dark room at times. Five doctors in Chicago had done everything they could for me, without being able to effect a cure. Some of them advised the removal of one of my eyes, hoping thereby to restore the sight of the other, but I could not bring myself to consent to that. The doctors agreed that my case was a strange one, and there must have been twenty or thirty different doctors who examined my eyes on various occasions. One of them lectured before a medical society on my case and wrote it up for a medical journal. I was terribly discouraged, but about this time I became acquainted with a lady in Chicago who told me of Christian Science. I had no faith in it, and became very angry whenever she talked about it, but one day, after a very discouraging interview with my doctor, I decided to try Christian Science as a last resort. That evening I told my friend of my decision, and made an engagement to go next day to visit a practitioner. I did so, and after a few weeks' treatment I was able to read and go to work again, and ever since I have had no trouble whatever with my eyes.

It came to the knowledge of the practitioner that besides the trouble with my eyes I was a drunkard, and that whisky had a pretty firm hold on me. She became interested in me, and sat down and talked to me as no one ever had before. I had never known a mother's love, and she impressed me, but I told her that I had will-power enough never to let whisky make a slave of me, and I would not listen to her helping me on the liquor question. Well, I drifted along, drinking at times, and finally went to California. There I would be sober for a month or two, and then I would go on a regular spree, sometimes for a month at a time. I can truthfully say I never loved liquor, and I fought against it with all my boasted will-power, but I kept getting worse, and after I had gone through the horrors of the calamity which struck the beautiful city of San Francisco, I lost all control of myself. When I look back and think of what a life I led my wife those years, I do not see how she ever stood it. We came East, and I got so bad that she just had to give me up. At last I

Digitized by Google

found myself with no money, home, or friends; in fact, I had reached the end of my rope. Finally I was obliged to sober up for want of money to buy drink; then I began to look around me. Where were my friends? I could not get a dollar to save my life. After thinking the matter over, I made up my mind that right here was where I needed Christian Science, and I needed it badly! I sat down and wrote my former practitioner, begging her to help me. I shall never forget the letter she wrote me! She certainly showed me who and what I was. I had sunk about as low as a human being could and live, but she said that if I was in earnest and really wanted to be taken out of the gutter and become a man, she would do all she could to help me. Strange to say, not an angry thought entered my mind while I was reading her letter, for I knew that every word of it was true, but a feeling of peace and thankfulness came over me, and from that moment I have never had the least desire for liquor.

I am very grateful to dear Mrs. Eddy for showing us the way to accomplish what was done for me. I know I am thoroughly healed and my life is happier in every way. My wife is again with me. She knows she has no reason to fear that I shall ever again yield to the temptation to drink. My business is getting better, in fact everything is better than it ever was before, and I do hope that some poor unfortunate, as I was, will be benefited by reading my story and be led to go to the only source of all real help, through Christian Science.

J. E. HIBBARD, Oshkosh, Wis.

I became interested in Christian Science about two years ago, and it is a great pleasure to speak of the benefits I have received from it, both for myself and family. When my baby girl was about six weeks old, my mouth became very sore. I thought it would be all right soon, but instead it grew worse rapidly, until I could neither talk nor eat. I called in a Christian Science practitioner, who gave me faithful attention, and the trouble yielded slowly but surely to the truth. What a glorious thing it would be if every one would seek to understand this practical Christianity. To love and help one another in truth is my desire.

MRS. GEORGE R. CLEMENT, Lovelock, Nev.

In December, 1907, I met with an accident which injured my hip and was very painful. Not believing in material methods, I asked my wife to write to a Christian Scientist, as there was none near us. She did so, and I was relieved as soon as the practitioner received the word, and I was healed in a short time. I also wish to say that a year ago I had a nephew treated for the liquor habit by the same practitioner, and he now rejoices in his freedom from such bondage. Words cannot express my thankfulness for what Christian Science has done for me and mine. I am striving to learn more of the truth which our Leader has discovered for us.—JOHN R. MCVAY, Baker City, Ore.

I feel it my duty to acknowledge publicly what Christian Science has done for me. A little more than a year ago it found me without God or hope in the world, a great slave to personal idols and to sin. Today I not only have a God, but one that I know, one I can understand and love, a God who is Love. Through the study of the Bible, which had been a closed book to me for years, and Science and Health, together with the help of some dear Scientists, these conditions have all been overcome. It is indeed with a deep sense of gratitude, both to God and to dear Mrs. Eddy, that I hereby acknowledge these great blessings received through Christian Science.

GEORGE B. CAMPBELL, Los Angeles, Cal.

Before coming to Christian Science I was an invalid, unable to attend to my household duties, and obliged to lie in bed most of the time. I had severe stomach and bowel trouble, and the doctor said it would be a long time before I got over it, if I ever did. One of my neighbors, who had been treated by Christian Science, brought me the text-book, "Science and Health with Key to the Scriptures" by Mrs. Eddy, and the nurse who was attending me at the time read it to me, as I thought I could not read for myself. Both the nurse and I thought it was very good, and after a while I asked my neighbor to take me to a Christian Science practitioner. I had been treated but a very few times when the bowel trouble left me; in a week or two I could use the sewing-machine all day long, for which I was very thankful. It seemed as if I could not do enough, and soon I was able to do all of my work, including the washing and ironing for a family of six.

About the same time my daughter was cured of an intestinal trouble for which the doctor thought she would have to be operated upon. Some months after this, my son, then a boy of twelve years, was taken very sick. My sister, who was with me at that time, had had a good deal of experience in fevers, and she said it was a severe case. I called a Christian Science practitioner on Saturday, and the next Wednesday my son rode ten miles on his bicycle and was as well as ever. Since that time many ailments have been overcome in my family, for which I am very thankful.—MAY S. SMITH, Barrington, R. I.

For three years, from 1899 to 1902, I suffered from a complication of diseases,—heart, stomach, catarrhal, and bowel trouble. I was attended by three eminent physicians, one of whom said my recovery depended entirely upon my diet. I followed directions, but continued to grow worse and was finally confined to my bed with no hope of recovery. As a last resort I decided to try Christian Science, and called in a practitioner. Within ten days I was about the house and able to do my housework.

Three years ago, while my son was working in a shingle mill, he cut his hand badly on a saw. He went to a physician and had the cut sewed up and dressed, after which he was treated in Christian Science. He suffered no pain whatever, and within three weeks his hand was entirely healed so that he could resume his work. I am thankful to divine Love not only for this demonstration through Christian Science, but also for many others which my family and myself have received.

MRS. JULIA FRENCH, Alpena, Mich.

One night I was suffering so badly from stomach and bowel trouble that I felt I could endure it no longer, so I called up a Christian Science practitioner and asked for treatment. The lady treated me that night and the next morning, and I was immediately relieved, and have been free of the trouble ever since. I am very thankful for the physical and also the spiritual help I have received in Christian Science.

MRS. CHARLES E. PURDOM, Lawton, Okla.

It isn't raining rain to me,
  It's raining daffodils;
In every dimpled drop I see
  Wild flowers on the hills.
The clouds of gray engulf the day
  And overwhelm the town—
It isn't raining rain to me,
  It's raining roses down.

ROBERT LOVEMAN.

FROM OUR EXCHANGES.

[*Universalist Leader.*]

How little those have understood this book of the divine life in men, who have tried to draw from it fixed and unchanging interpretations of the life of God in the souls of men. Had the genius of the book been like that of an Augustine or a Calvin, where truth is riveted into iron-bound inelasticity, it would have passed out of the world's experience long ago. The greatness of Biblical faith lies here: that the last man, the man of today, educated or ignorant, finds himself at the end just where those men did. He stands on the edge of the world and looks off across land or sea toward the unknown. And he knows with his soul, even when with his lips he denies, that he would give all to face that mystery with the splendid confidence of those old heroes of the faith. We have yet to learn the deepest lesson of Biblical religion, which is this attitude of open-minded anticipation, this taking the world on trust, this ability to push off our boat or set our sail toward the great mystery of tomorrow or eternity with an exultant cry of anticipation and an unquestioning confidence in the universe and in God.

[*Churchman.*]

The leaven of the resurrection is changing the ideals, strengthening the faith, and cheering the hope of humanity. "I am the resurrection and the life: he that believeth in me, though he were dead, yet shall he live." The resurrection is not the cause of new life, but it is the revelation of the power of him who is the resurrection and the life. And wherever his power over sin and death, over ignorance and oppression, over isolation and indifference is made manifest, through a resurrection from these and every other form of evil into a life of self-sacrificing service to God and to fellow-men here and now, there is not only the promise but the reality of the power of the resurrection.

[*Examiner.*]

The great desideratum is that the minister have a message from God to the people and that he worthily fulfil his office as an "ambassador for Christ." His supreme duty may be said to be that he be efficiently "a worker together with God" in all his ministry. His power with the people will be mainly in the measure in which the Holy Spirit operates through him upon the hearts of his congregation. When under his ministry the hearts of the people "burn within them, as he opens to them the Scriptures," because in him and in his message Jesus really talks with them by the way, then he will surely be fulfilling, really filling full, his ministry.

[*Standard.*]

It should be remembered that there are some things concerning which Jesus did not express himself. He laid down great inclusive principles, and from these deductions may be made concerning every emergency in life; but it is well to call them by their true names. If they are our deductions, let us say so, and not call them the "truth as it is in Jesus." Our deductions may be correct, and of course we consider them so, but even then it is better to catalogue them among the results of our personal cogitation rather than assign them to Jesus.

[*Living Church.*]

If the church were doing her duty toward society, we might abandon all direct missionary effort, for the inevitable result of such a condition would be that all well-meaning men would flock into the churches, because they would perceive their value.

SPECIAL ANNOUNCEMENTS.

FROM THE PUBLISHER OF MRS. EDDY'S WORKS.

THE CHRISTIAN SCIENCE TEXT-BOOK, "SCIENCE AND HEALTH WITH KEY TO THE SCRIPTURES."—This work contains many important changes and additions by the author, and also contains a photogravure portrait of Mrs. Eddy, together with a facsimile of her signature.

SOME OF MRS. EDDY'S WRITINGS IN NEW BINDINGS.—One volume containing Unity of Good, Rudimental Divine Science, No and Yes, Retrospection and Introspection; a second volume containing Christian Healing, The People's Idea of God, Pulpit and Press, Christian Science *versus* Pantheism, and the Messages of 1900, 1901, and 1902. These volumes are printed from new plates and are uniform in size with the pocket edition of Science and Health. Bound in morocco, limp, round corners, gilt edges, heavy Oxford India Bible paper. The prices of these books prepaid are as follows: single copy, $3.50; six or more copies of either volume to one address, each $3.25.

THE CHURCH MANUAL.—Containing all the By-laws of The Mother Church, The First Church of Christ, Scientist, in Boston, Mass. Each new edition of the Manual will have special notice in the *Sentinel*. Price, single copy, prepaid, $1; six copies to one address, $5; twelve copies to one address, $9.

Attention is called to the Library Edition of Mrs. Eddy's works, description and prices of which will be found on the outside cover page of the *Sentinel*.

Address all orders for books named above to ALLISON V. STEWART, Falmouth and St. Paul Streets, Boston, Mass.

FROM THE CLERK OF THE MOTHER CHURCH.

CHURCH TENETS.—The tenets of The First Church of Christ, Scientist,—The Mother Church,—printed on folded sheet for the use of Branch Churches of Christ, Scientist, with space for the names of churches and their by-laws, can be had at seventy-five cents per hundred.

Not less than one hundred are sold. Postage stamps are not taken for payment.

MEMBERSHIP.—Correspondence relating to membership with The Mother Church, and requests for blank applications for membership, should be addressed to the Clerk.

All correspondence and orders relative to the above should be sent to WILLIAM B. JOHNSON, Clerk, The First Church of Christ, Scientist, Falmouth, Norway, and St. Paul Streets, Boston, Mass.

FROM THE CHURCH TREASURER.

PER CAPITA TAXES.—Per Capita Taxes and Contributions to The Mother Church, The First Church of Christ, Scientist, in Boston, Mass., should be sent to the Treasurer. Please do not send currency.

Remittances for the above should be sent to STEPHEN A. CHASE, Treasurer, Box 56, Fall River, Mass.

FROM THE SOCIETY.

Attention is called to the announcement over our Leader's signature, which appeared in the *Sentinel* of Jan. 9, to the effect that Christian Scientists in the field who send four subscriptions to the *Monitor* for one year, will receive their own paper gratuitously.

The Publishing Society has in stock a number of copies of *Sentinel* No. 6, Vol. IX., containing the article "What Our Leader Says" as last published, and *Sentinel* No. 14, Vol. IX., containing the article "Harvest," also by our Leader. As these articles are of abiding interest and value to the Field the Society will be glad to supply them, postpaid, at the following prices: 1 copy, 5 cents; 5 copies, 15 cents; 10 copies, 25 cents; 25 copies, 50 cents; 50 copies, 85 cents; 100 copies, $1.50.

On foreign orders add 2 cents a copy to cover postage.

THE CHRISTIAN SCIENCE JOURNAL

FOUNDED APRIL, 1883, BY THE AUTHOR OF "SCIENCE AND HEALTH WITH KEY TO THE SCRIPTURES," MARY BAKER EDDY, DISCOVERER AND FOUNDER OF CHRISTIAN SCIENCE

This monthly Magazine is the official organ of The First Church of Christ, Scientist, in Boston, Massachusetts, and correctly represents the Christian Science Movement. It contains interesting discussions of the teaching and the practice of Christian Science, and in addition to dissertations, lectures, and contributed articles, publishes always a number of reports from cases of spiritual and physical healing, which practically illustrate the redemptive work of Christian Science.

TERMS OF SUBSCRIPTION: Single copy, one year, $2.00. Quantities TO ONE ADDRESS: ten or more, each, $1.90; twenty-five or more, each, $1.80; fifty or more, each, $1.60. These rates apply in the United States, Canada, Mexico, and Cuba. In all other countries add forty cents for postage on each subscription. Six months' subscriptions received at half the above rates. No subscriptions received for less than six months.

TERMS OF SALE: Postpaid to any address: Per copy, twenty cents. Quantities TO ONE ADDRESS: ten copies, $1.70; twenty-five copies, $4.00; fifty copies, $7.00; in the United States, Canada, Mexico, or Cuba. To all other countries, per copy, twenty-five cents. Quantities TO ONE ADDRESS: ten copies, $2.10; twenty-five copies, $5.00; fifty copies, $9.00.

BOUND VOLUMES: Current year and two years previous, cloth, $2.50; half calf or half morocco, $3.00. On earlier volumes write for prices.

THE CHRISTIAN SCIENCE MONITOR

Published every afternoon except Sunday

A daily newspaper for the home. Adequate news service. The various departments of a modern newspaper. Unique home forum page. Entire page of editorials dealing with the vital topics of the day. Contributions for the columns of the MONITOR should be addressed, Managing Editor, THE CHRISTIAN SCIENCE MONITOR.

SUBSCRIPTION PRICE: For the United States, Canada, Mexico, and Cuba, $5.00 a year, $3.00 for six months; all other countries, $8.00 a year, $4.50 for six months, postpaid. In the Greater Boston postal district the MONITOR will be delivered by carrier through the local news-dealer at the customary rate of 12 cents a week payable to the news-dealer. If desired by mail in Boston district $2.75 should be added to the annual subscription rate to cover extra postage.

The Christian Science Quarterly

Published January, April, July, and October

Contains the Lesson-Sermons which are read at the Sunday Services throughout the year in all the Christian Science churches. These Lessons, which present citations from the Bible and "Science and Health with Key to the Scriptures," are valuable for daily study.

TERMS OF SUBSCRIPTION: For one year, 50 cents; fifty copies or more to one address, 50 cents yearly for each copy. Foreign subscriptions, 60 cents. Yearly subscriptions only received.

TERMS OF SALE: One or more copies, postage paid, each, 15 cents; fifty copies or more to one address, each 12½ cents, postage paid.

Der Herold der Christian Science

Published Monthly.

A magazine printed in German, which publishes original and translated articles bearing upon Christian Science, and also testimonies of healing from Germany and America. It contains about thirty-eight pages of such reading matter, also the Lesson-Sermons which are read at the Sunday services in all the Christian Science churches, and is valuable as an authorized representative of the movement.

SUBSCRIPTION PRICE: For the United States, Canada, Mexico, and Cuba, 10 cents a copy, $1.00 a year in advance; all other countries, 12 cents a copy, $1.25 a year, postpaid.

One volume containing: Unity of Good, Rudimental Divine Science, No and Yes, Retrospection and Introspection, uniform in size with the pocket edition of Science and Health. Bound in morocco, limp, round corners, gilt edges, heavy Oxford India Bible paper. Price, prepaid, single copy, $3.50; six or more copies to one address, each, $3.25.

CHRISTIAN HEALING AND OTHER WRITINGS. One volume containing: Christian Healing, The People's Idea of God, Pulpit and Press, Christian Science *versus* Pantheism, Messages of 1900, 1901, 1902, uniform in size with the pocket edition of Science and Health. Bound in morocco, limp, round corners, gilt edges, heavy Oxford India Bible paper. Price, prepaid, single copy, $3.50; six or more copies to one address, each, $3.25.

UNITY OF GOOD. It lays the axe at the root of error, elucidating and enforcing practical Christian Science, thus affording invaluable directions for all true Scientists. Library edition, 64 pages, cloth binding, marbled edges. Price, prepaid, single copy, 65 cents; $3.00 per half dozen; $5.50 per dozen. Leather covers (pocket). Price, prepaid, single copy, $1.00; $5.00 per half dozen; $9.00 per dozen.

RETROSPECTION AND INTROSPECTION. A biographical sketch of the author. The way she was led to the discovery of Christian Science; its growth and fundamental idea. Library edition, 95 pages, cloth binding, marbled edges. Price, prepaid, single copy, $1.06; $5.00 per half dozen; $9.00 per dozen.

PULPIT AND PRESS. A unique work of importance in the history and to the readers of Christian Science; containing Dedicatory Sermon delivered at The Mother Church, and scintillations from the press of that occasion. 132 pages, cloth binding. Price, prepaid, single copy, $1.06; $5.00 per half dozen; $9.00 per dozen.

RUDIMENTAL DIVINE SCIENCE. An interesting and valuable book, containing a brief and concise statement of Divine Science, *alias* Christian Science, in the form of questions and answers. 17 pages. Leatherette covers, gilt top. Price, prepaid, single copy, 37 cents; $3.00 per dozen. Library edition, cloth binding, marbled edges. Price, prepaid, single copy, 55 cents; $2.50 per half dozen; $4.50 per dozen.

NO AND YES. A brief statement of very important points in Christian Science. 46 pages. Pebbled cloth covers. Price, prepaid, single copy, 27 cents; $2.50 per dozen. Library edition, cloth binding, marbled edges. Price, prepaid, single copy, 60 cents; $3.00 per half dozen; $5.50 per dozen.

MESSAGES TO THE MOTHER CHURCH. By Mary Baker Eddy, including Christian Science *vs.* Pantheism, and the Messages of 1900, 1901, and 1902. In one volume. Library edition, 94 pages, cloth binding, marbled edges. Price, prepaid, single copy, $1.56; $7.50 per half dozen; $13.50 per dozen.

CHRISTIAN SCIENCE *versus* PANTHEISM. The Pastor Emeritus' Message delivered at the Communion Season in The Mother Church in Boston, June, 1898. A clear and strong refutation of the charge that Christian Scientists are pantheists. 15 pages. Price, prepaid, single copy, 26 cents; $2.50 per dozen.

MESSAGE TO THE MOTHER CHURCH. The annual message of Mary Baker Eddy to The Mother Church on Communion Sunday, June, 1900. Leatherette covers, deckled edges. 15 pages. Price, prepaid, single copy, 26 cents; $2.50 per dozen.

OUR LEADER'S MESSAGE. The annual message of Mary Baker Eddy to The Mother Church on Communion Sunday, June, 1901. Deckled edges. 35 pages. Price, prepaid, single copy, 50 cents; $4.50 per dozen.

COMMUNION MESSAGE. The annual message of Mary Baker Eddy to The Mother Church on Communion Sunday, June 15, 1902. Deckled edges. 20 pages. Price, prepaid, single copy, 50 cents; $4.50 per dozen.

TWO SERMONS. CHRISTIAN HEALING and PEOPLE'S IDEA OF GOD. In one volume. Library edition, cloth binding, marbled edges. 36 pages. Price, prepaid, single copy, 60 cents; $3.00 per half dozen; $5.50 per dozen.

CHRISTIAN HEALING. A sermon delivered in Boston. 19 pages. Paper covers. Price, prepaid, single copy, 21 cents; $2.00 per dozen.

PEOPLE'S IDEA OF GOD. A sermon delivered in Boston. 14 pages. Paper covers. Price, prepaid, single copy, 21 cents; $2.00 per dozen.

FEED MY SHEEP. Words by Mary Baker Eddy. Music by Lyman F. Brackett. Price, prepaid, single copy, 50 cents; $5.00 per dozen.

Direct all orders for above works, and make remittances payable to

ALLISON V. STEWART, FALMOUTH AND ST. PAUL STS., BOSTON, MASS.

Bound Volumes: Current year and two years previous, cloth, $3.00; half calf or half morocco, $3.50. On earlier volumes write for prices.

Entered at the Boston, Mass., post-office as second-class mail matter.

ITEMS OF INTEREST.

National.

Two hundred and twenty-six commercial organizations, representing a membership of several hundred thousand merchants, manufacturers, and business men of various lines throughout the country, have joined in a movement to stop the present tariff agitation and provide for a board of experts to study the whole question and revise the schedules in the light of their researches. The movement has grown out of the national convention for a tariff commission held in Indianapolis last February. Some of those who are interested in the subject estimate that about $10,000,000 a day is lost to merchants and manufacturers by the bickerings in Congress and what they call grasping selfishness of overprotected interests.

The Board of United States Army Engineers which was recently designated by the War Department to make a survey for the construction of a continuous water-way, inland were practicable, along the Atlantic coast, met at Providence last week. The proposed water-way from Boston to Long Island Sound includes a water-way from Narragansett Bay through ponds and lagoons lying along the southern coast of this state, from Bissels Cove at Wickford, to Watch Hill, the route to be continued to Fisher's Island, thence to New York bay, across the state of New Jersey to a suitable point on the Delaware river, or bay; thence to Norfolk, Va., to the sounds of North Carolina, and Beaufort Inlet.

With a view to reducing the number of fatal accidents on street-car lines, the Public Service Commission of the First District of New York has issued orders that every street railway company operating within the limits of greater New York must equip its surface cars with fenders or wheel guards, and in some instances with both. The safety devices must be approved by the commission, but various types are offered for selection.

The Governor of Colorado has signed the campaign expenses bill, which provides that the state shall contribute for campaign expenses, every two years, twenty-five cents for each vote cast at the preceding general election, the sum to be divided among the political parties according to the vote cast for their respective candidates for governor.

Last week, for the first time in the history of Rhode Island, a jail sentence was pronounced upon an automobile operator convicted of violating the speed laws. In Massachusetts, also for the first time, a reckless driver of an automobile was sentenced to a term of imprisonment instead of the payment of a fine.

That a city can compel a railroad company to bridge its street-crossings when the street has been established subsequent to the laying of the railroad tracks, just as it can when the tracks follow the laying out of the street, is a late decision of the Supreme Court of the United States.

By a decision of the United States Circuit Court at Columbus, O., the Hocking Valley Railroad is ousted from ownership and control of coal-mining interests and required to confine itself strictly to its business as a carrier. This decision has an important bearing upon other similar combinations.

The Governor of Kansas has established an ozone scholarship at the Kansas State University. The fellowship is for $1,000 a year, and provides that the student is to devote his entire time to the investigation of ozone and find practical uses for it.

The Governor of Pennsylvania has signed a bill providing for a graduated registration of automobiles. The New York Assembly has also passed a similar bill, and makes a speed of thirty miles an hour presumptive evidence of reckless driving.

The Governor of New Hampshire has appointed a commission to consider plans for the construction of a dam at the entrance of Great Bay. This would provide a deep-water basin sufficient to accommodate the navies of the world.

The National Association of Cotton Manufacturers met in Boston last week.

International.

The *Government Gazette* of Southern Nigeria recently published a statement showing that the quantity and value of lint cotton exported from the two British colonies, Northern and Southern Nigeria, during the calendar year 1908 were 5,232 bales, with a total weight of 2,204,356 pounds, valued at $259,382, and cottonseed in bags, with a total weight of 5,591,076 pounds, valued at $29,777. Seven years ago no cotton was raised for export in this region. This cotton sold for twelve cents during the first quarter of the year, for eleven cents during the second quarter, and for eight and a half and nine and a half cents per pound during the third and fourth quarters. It is claimed that fully fifty thousand bales, of an average weight of four hundred pounds each, are produced in the Niger country annually, nine tenths of which is manufactured by the natives into native cloths.

The British Chancellor, David Lloyd-George, estimates the revenue in 1909-10 at $741,050,000 and the expenditure $820,760,000. It is pointed out that the increased expenditure is due mainly to old-age pensions and appropriations for the navy. Dealing with the past year's finances the Chancellor says that nearly all branches of trade and industry suffered serious depression, the foreign trade returns showing diminution in value to the amount of nearly $570,000,000 as compared with 1907.

The annual meeting of the Permanent International Association of Navigation Congresses is to be held at Brussels on May 17. This congress is held at intervals of about three years, and at its sessions questions concerning inland and maritime navigation are considered and other matters connected with the improvement of water-ways discussed. Each of the countries represented at the congress pays an annual subsidy, Belgium paying the highest amount, $1,600, while the United States, France, Germany, Italy and other countries subscribe about $1,000.

The Russian column under General Snarsky is continuing its march toward Tabriz, regardless of the reported understanding between the Shah of Persia and the Nationalists. The Foreign Office believes that it would be injudicious to recall these troops, no matter how many fair promises the Shah may make, since the danger to Europeans in Tabriz would again become acute immediately this pressure was removed. The expedition will be kept in Persia until the Shah's pledges to institute a proper government actually are put into effect.

Abdul Hamid, Sultan of Turkey, was last week taken prisoner by the army of the Young Turks, and, by a vote of the Parliament and a decree of the Sheik-ul-Islam, later deposed. His brother was immediately proclaimed Sultan in his stead. The late Sultan is now a prisoner in a palace at Salonica, where he is likely to be brought to trial. It is probable that the barracks and parade grounds of the Sultan's army will be converted into a residential quarter and that the imperial palace at Yildiz will be used as a museum.

The Bundesrath has ratified the new patent treaty between the United States and Germany. The new pact eliminates the requirement that the article be manufactured in the country issuing the patent. The result of this is to permit the issuance of patents by either country and have them continue in force if the article patented is manufactured in another country and imported. The treaty was ratified by the American Senate April 15.

Servia is considering the proposal of an American corporation to build a navigable water-way through Servia and Macedonia, along the course of the Morava and Vardar rivers, connecting the Danube with the Gulf of Salonica. This enterprise will, it is hoped, bring new capital into Servia, and tend to promote trade and agriculture, in addition to creating a cheap system of transportation.

The birth last week of a daughter to Queen Wilhelmina was made an occasion of great rejoicing by the Hollanders.

Industrial and Commercial.

The report that Mr. Harriman had commissioned leading corporation counsel to devise a plan for merging the New York Central lines into a billion dollar corporation, with a central management and one treasury, has been denied by the president of the road. This, if effected, would operate more than twelve thousand miles of railroad, including the New York Central, West Shore, Lake Shore and Michigan Southern, Cleveland, Cincinnati, Chicago and St. Louis, Pittsburg and Lake Erie, Lake Erie and Western, Canada Southern and a number of other lines now controlled by or allied with the New York Central.

For the seven months of June to January inclusive, the importations of domestic merchandise from the States to Hawaii were of the value of $9,832,703, and exportations for the same period to the States were $18,747,243. The chief exports were sugar, raw and refined, coffee, fruits, nuts, wool, and rice.

An expenditure of about four million dollars on improvements in Massachusetts in 1909 has been decided upon by the Boston and Albany Railroad.

CHRISTIAN SCIENCE SENTINEL

"WHAT I SAY UNTO YOU, I SAY UNTO ALL — WATCH" JESUS

THE LIGHT OF THE WORLD.

WILLIS F. GROSS.

IN Science and Health (p. 270) we read, "The prophets of old looked for something higher than the systems of their times; hence their foresight of the new dispensation of Truth." Isaiah's clear discernment of the eternal truth of being lifted the veil of material sense, and he saw that God would be revealed to human consciousness in a larger and fuller sense than the world had ever known Him. Concerning this revelation of Truth, which he doubtless foresaw would come just as soon as the world was prepared to receive it, he wrote, "The people that walked in darkness have seen a great light: they that dwell in the land of the shadow of death, upon them hath the light shined." In the fulness of time the prophecy was verified. Suddenly and unexpectedly a man appeared to confound the wisdom of the ages with his words and works. He came "not to destroy, but to fulfil." The great work of liberating humanity, which Moses had begun nearly sixteen hundred years before and the prophets had carried on according to the light that was given them, could not suffer at his hands. It is true that many errors were rebuked and many misconceptions were corrected, but nothing was done that did or could in any way conflict with law or prophecy.

Even though the personality of Christ Jesus was unknown to Isaiah, yet his character was clearly discerned and portrayed, as may be seen by comparing the words of the prophet with the teachings and works of the one in whom the prophecy was fulfilled. The forerunner of the Messiah was "a man sent from God, whose name was John. . . . He was not that Light, but was sent to bear witness of that Light." The preaching of John the Baptist was more spiritual, and hence it was better adapted to humanity's need than was the preaching of the accepted religious leaders of his day, but the fulfilment of law and prophecy was not to be found in his life and words. He spake of himself as "the voice of one crying in the wilderness." To his disciples he said, "Behold the Lamb of God, which taketh away the sin of the world." Again he said, "He must increase, but I must decrease. . . . For he whom God hath sent speaketh the words of God: for God giveth not the Spirit by measure unto him."

In Jesus of Nazareth the saving Christ was made known to the world,—the Christ that saved and still saves humanity from sin and sickness. There never lived a man who claimed less for himself or ascribed more power to God. "My doctrine is not mine, but his that sent me," he said when the people marveled at the wisdom of his utterances. Of the wonderful works that were wrought through him he said, "I can of mine own self do nothing." It is evident, then, that whenever he speaks of himself he in no wise refers to anything that a mortal man might seem to have, or be, separate and apart from God. He realized man's helplessness without God, and he also knew his power to overcome all evil when he was conscious of what belonged to him as the Son of God. And here let it be said that Jesus claimed no more for himself than he realized belonged to every one of God's children. He affirmed and reaffirmed that all which he did was possible to all who obey God's law, since God, the one infinite good, changes not and is no respecter of persons. His oft-repeated declaration of his unity with the Father is in strict accord with the teaching of Christian Science that the real man cannot be separated from God and that "he has not a single quality underived from Deity" (Science and Health, p. 475).

Because man's unity with God is not understood, many sayings of the Master are not readily understood. On one occasion he said, "I am the light of the world: he that followeth me shall not walk in darkness, but shall have the light of life." This utterance, being the word of Truth, is just as true now as when it was first spoken to the disciples. So we ask, What is the I, or ego, that is the light of the world? It cannot be anything that was a part of or belonged exclusively to the human Jesus, otherwise the light would have ceased to shine when the earthly life of the Master was ended. The I, then, must be something unknown to, or unrecognized by, the material senses. The light of the world is here, even though it shines in the darkness and is not comprehended. When mortal belief is corrected, the "eyes of the blind shall see out of obscurity, and out of darkness," and the light of Truth and Love will illumine the way. That which made plain the way for Jesus was what he knew about God and man. He must have referred to this spiritual understanding when he said, "I am the light of the world." The understanding of what God is and what man is, emanates from divine Mind; it cannot originate in that which is mortal and material. This understanding dispels the darkness of ignorance, doubt, and fear, and how true it is that he who has this light "shall not walk in darkness, but shall have the light of life." When it is understood that all the discord and suffering of earth, all the sin, sickness, and death, are the shadows of darkness, it will be seen that the light of spiritual understanding is the one and effectual remedy.

Evidence of the correctness of this interpretation of the Master's words is found in the Sermon on the Mount, when he said to those who had risen above mortal sense sufficiently to gain some spiritual perception, "Ye are the light of the world." His words could not have referred to the personality of his hearers, but they did refer to the sense of good that was manifest through those earnest seekers for Truth. A single ray of light cannot dispel the darkness of midnight, but it does not shine in vain. And so it was that the slight spiritual discernment of the disciples was worthy to be called "the light of the world." The understanding of the disciples was not to be compared with that possessed by the Master, but it was not to be esteemed lightly. For this reason the command was given: "Let your light so shine before men, that they may see your good works, and glorify your Father which is in heaven." In other words, let what you know about

God and man find expression in deeds, and those who have eyes to see and ears to hear will accept the proof of "God with us" and will rejoice in the revelation of His goodness and power.

Those who walk in the darkness of mortal, material belief know not whence they came nor whither they are going. Fear, doubt, and uncertainty beset them on every hand if there is no spiritual perception to illumine the darkness. Jesus knew the origin and ultimate of man's being. He was able to distinguish between that which is and that which only seems to be. Because he knew whereof he spake, he was able to say, "I am the light of the world." This is the light spoken of in Genesis when "God said, Let there be light: and there was light." Without this light no man is able to see things as they are. His sense of things is no nearer the reality of being than is the child's concept of the object that is dimly seen in the darkness. The fear and uncertainty occasioned by the darkness often ascribe to familiar objects the hideous shapes and power for evil that these objects do not and could not possess. So mortal man, dwelling in the darkness of materialism, has a very erroneous concept of God's creation, and that which was pronounced "very good" in the beginning is believed to be the source of evil and must needs be feared accordingly. Isaiah said, "Woe unto them . . . that put darkness for light, and light for darkness;" and Jesus said, "If therefore the light that is in thee be darkness, how great is that darkness!" If the darkness of materialism is the only light a man has wherewith to direct his steps, what a crooked path he must travel in his efforts to find harmony and reality.

The teaching of Christian Science is Scriptural and in strict accord with the life and works of the Master. God is Spirit. Man made in His image and likeness is spiritual. Man can be, or do, only what God created him capable of being or doing. He is subject to the law of God and to no other. Claiming no life, intelligence, or substance apart from God, he is forever saved from the discords resulting from the belief that man is material, that he has a mind which is capable of thinking evil, and that his life is mortal and inheres in a material body.

The difference between the material and the spiritual view of God, man, and the universe, is the difference between darkness and light. The physical, mental, moral, and spiritual benefit experienced by those who are forsaking the material for the spiritual, is proof positive that those who are following the Master because they understand his teachings, at least in part, and in some degree comprehend his works, are not walking in darkness but have the light of life. They have heard and responded to the call of the prophet, "Arise, shine; for thy light is come, and the glory of the Lord is risen upon thee." They are learning from experience that the kingdom of heaven, the reign of eternal harmony, is at hand, and that life—not death—enables them to enter.

THE TRUE IDEA OF HEALTH.

ALICE M. SWARTHOUT.

MANY who seek for healing in Christian Science are looking for this harmony to be manifested according to their present sense of what constitutes health. They little realize that the only way to health and harmony is in rising to that divine consciousness where one knows that harmony is already established through the word of God and not according to the way of mortal man's appointing. The externalization of the true health comes with the advancing steps of spiritual understanding, and cannot be found by watching the body to see whether or not it is manifesting certain organic or functional conditions which mortal mind declares necessary for health.

For many years mortal man's sense of health has been established through the testimony of the material senses. So fixed have our beliefs become in regard to this, that when the body does not manifest that which human sense says is health, we become fearful, and this very fear serves to intensify the inharmonious condition. It has come to be that we are quite as much the slaves of our beliefs about health as we are to our beliefs about disease. Jesus said, "Take no thought for your life," and Mrs. Eddy says (Science and Health, p. 261), "Look away from the body into Truth and Love, the Principle of all happiness, harmony, and immortality." Since we are to look away from the body, let us see how Jesus brought about the healing which he accomplished. We have no account that he made any study of disease or had any knowledge of the remedial agents used in that day, or that he ever made any concessions to the so-called laws of health. Before he began his healing ministry, he went into the wilderness, where he overcame the temptations of the devil (evil) and was enabled to return in the power of the Spirit into Galilee.

In the New Testament records which follow this return into Galilee we find that Jesus everywhere turned thought to Spirit, God. In the power of the Spirit he laid hands on the sick and they were healed, the lips of the dumb were opened, the lame walked, and the dead were raised. Christ Jesus came refuting the testimony of the material senses. He came in the power of spiritual sense, and Mrs. Eddy defines spiritual sense as "a conscious, constant capacity to understand God" (Science and Health, p. 209). On the other hand, she says, "Material sense can report only a mortal temporary sense of things" (*Ibid.*, p. 298). It then follows that should the material senses declare the body to be healthy, this is merely a temporary sense of things, a mortal sense of health which, being based on material sense testimony, is subject to change at any time the individual's beliefs about himself become changed.

How then shall we find the true health and harmony? Must it not be in the way of God's appointing? That is, we must pass through the wilderness of human conjectures and beliefs of health and disease, and overcome these, one by one, until in the advanced understanding which follows we see the real man of God's creating and know that he is neither sick nor sinful; that he is subject to no material laws of health or disease, but is above them. Then we have found the true idea of health, and from it there can be no relapse into the darkness of mortal discord.

The preceding line of thought was forcibly impressed upon the writer while she was living in the same house with a physician, who made numerous statements as to material laws of health. The constant repetition of these statements about the body seemed to arrest my attention to such an extent that I found myself watching my body to see if it manifested what mortal mind called health. Previous to this time I had been unusually well, but with this constant watching to see if certain functional conditions coincided with the material sense of harmony which I heard voiced so constantly, I found myself manifesting a variety of ailments, and before long was scarcely able to be about. It was only when the realization came that mortal mind standards of health are quite as illusory as its concepts of disease, that I came to an understanding of the true idea of health which externalized to human sense a healthy body. This made clear to me that whatever human sense says about the body is a temporary sense of things, a false estimate of harmony and the foundation of human discord; that if we would be healthy we must find health not through consulting the body, but through the spiritual apprehension of man as God's idea, governed by divine Principle.

THE TURN OF CAPTIVITY.

MARY I. MESECHRE.

It has been said that human life is made up of contrasts. To us who have begun to know life in its true meaning, as interpreted through Christian Science, it is given to see more and more clearly the disparity between our former sense of existence and our present attainments, and to foresee in some measure the growth which will bring us to a realization of the standard of ultimate perfection which hourly demands our unceasing efforts, and to whose loving insistence we gladly and gratefully yield.

At some point on our journey "from sense to Soul" (Science and Health, p. 566), this contrast between past and present is so startling as to impress itself upon our consciousness with the effect of a sudden awakening. Till then we have been dreamers, we have been sleep-walkers; we have grown, truly, but as it were in darkness, dimly conscious of light. But in an instant our consciousness is flooded with the knowledge of that ineffable light which has so long shone upon our closed eyes, of that insistent Love which has so long enfolded us in its tender ministering, of that invincible Truth whose voice has so long sounded vainly to our dulled ears—and the dream breaks, we begin to awaken, to find ourselves no longer the hopeless bondmen of materiality, but the freemen of God. We have passed from serfdom to sonship; we have reached the turn of our captivity.

The psalmist sang: "When the Lord turned again the captivity of Zion, we were like them that dream. Then was our mouth filled with laughter, and our tongue with singing." Is there anything equal to the joyousness of a newly awakened soul? It is a new creation, for all things "are become new." We wonder how we could have dreamed so long. We forget everything but the joy and freedom of being awake. All sense of bondage has fled, and we speak only to rejoice and sing praise to Him who hath turned our captivity into freedom. But there is more than this to freedom. Joyousness is so rare that it is proportionately attractive, and all about us are those still fettered by material sense, longing in the midst of their bonds for the touch of the liberator, and our joy makes known to them our release from captivity, and they begin to say of us, "The Lord hath done great things for them."

Truly "the Lord hath done great things for us; whereof we are glad;" and we must not be selfish in our rejoicing. Nothing can be possessed which cannot be shared. Our gladness must bring brightness to the careworn; our joy must distil its oil for the anointing of all who mourn; our freedom must tend to liberate those still struggling in bonds; our gratitude for all that God has done for us must so illumine our faces that they who still wander in the desert of materiality will be drawn thereby to seek "the Father of lights," and there find surcease from all their loneliness and doubt. And because we begin to realize that we have still much to overcome within our own consciousness, the more we become conscious that the eyes of others are resting upon us, the more are we led to watch and work that we be not again entangled in bondage, and that we may so manifest the liberty of the truth as to exemplify to all about us that increasing dominion which is the heritage of all of the children of God.

Nor is this all. Beyond our grateful review of past deliverance, above our joyous recognition of present blessedness, it is given us to glimpse somewhat of the ultimate reward of the faithful,—the assurance of attainable perfection; not ours alone, but free to all mankind. We see that tearful sowing is always succeeded by joyful reaping, until all tears are wiped away and our joy is full. To all who bear the precious seed,—the word of God,—though our going forth, our sowing, may be attended by sorrow and weeping, there comes the comfortable assurance that we shall not return empty-handed, but we shall come rejoicing, laden with our sheaves. "Turn again our captivity, O Lord, as the streams in the south." Give us a constantly increasing consciousness of that liberty which is our rightful heritage, until we, and all mankind, awaken fully from our dreaming, to be "satisfied with thy likeness."

THE TESTIMONY MEETINGS.

EDWARD W. DICKEY.

A Christian Science testimony meeting is for the purpose of making known to a suffering world that our redeemer still lives, and that today, as in the days of primitive Christianity, people are being healed of all manner of disease and reclaimed from all forms of sin. These meetings should, therefore, be a matter of deep concern to every Christian Scientist. Those who have tasted of the fruits of the Spirit should strive that no obstacle arise in these meetings which would in any way prove a stumbling-block to "the stranger that is within thy gates." There should attend every meeting a dignity that would mark it as a place whose atmosphere is spiritual. Its tone should be such as would say to every wave of sin and sorrow, "Peace, be still." The reading should be such selections as emphasize the healing power of Christ, Truth.

The testimonies should be simple and concise. A brief statement of one's condition at the time of turning to Christian Science, and the physical, moral, and spiritual benefit derived therefrom, will always suffice. (See Art. 8, Sec. 24 of Church Manual.) Testimonies should not be given that would be likely to cause visitors to go away in confusion or in a spirit of opposition to Christian Science. In order that this may be avoided, it is always well to be careful of the testimony given, as well as the manner of delivery. This does not mean the exclusion of any case of sickness or sin, or that the delivery should be polished. It does mean the exclusion of all testimonies that cannot be readily grasped by the inquirer, and the avoidance of all technical terms.

From time to time articles and editorials have appeared in the *Sentinel* which request that we avoid the use of the word "claim" in our testimonies. Why this request? Because the ordinary inquirer does not understand its use in this connection, and the value of the testimony is wholly or partially lost. This also applies to an unexplained use of the phrases "mortal mind," "demonstration," "error," and "belief." Christian Scientists are rapidly learning the unreality of all disease, but they are certainly not afraid to say they had suffered from what was to mortal sense some particular disease, when by so doing they can help a suffering brother. It is, however, usually better to speak plainly, rather than to say, "I had a claim," or "I had a belief," and thereby possibly cause some one to go away in uncertainty as to the speaker's meaning.

The chief purpose of the Wednesday evening meetings is that testimonies of healing may be given. These may be of physical healing, mental enlightenment, or spiritual benefit. So manifold are the blessings of Christian Science that there should never be a lack of good testimony. A testimony may be repeated many times to advantage. It will never be told in quite the same way and some one will no doubt hear it for the first time. Do we not read and reread chapters in the Bible and pages from our textbook, and are we not benefited thereby? Would not the same be true of a well-told testimony? The kind of testimony known as "hearsay" has no more value in a Christian Science testimony meeting than it has in a court of law. This by no means excludes the recital of cases known by the speaker to have been healed, but it does exclude all those known only by "hearsay."

No one can measure the good done by the testimony meetings. Thousands turn to Christian Science for help

Digitized by Google

solely from the "good news" voiced by those who testify. To hear one recite his escape from some dread disease or bad habit carries conviction to the auditor. The maximum good will be attained when we address ourselves to those who are strangers to Christian Science, and speak in language that they can understand. We shall be aided in these efforts when we realize the significance of giving a testimony for Christian Science. It means far more than the rehearsal of benefits received; it carries with it the power of the Word.

There is also a peculiar sacredness to a Christian Science testimony, and we should be careful that we do not criticize the speaker. It is no small task for the average person to speak in public and we should be most cordial in our approval of his efforts. When we needlessly criticize one who is endeavoring to express his thankfulness to God for His loving care, and to our Leader for her heroic efforts to give us Christian Science, we are heaping condemnation upon ourselves, which ere long will bring its own fruits. We all have great cause for gratitude, and let us do all we can to help each other in the important work of voicing it to the world.

SHADOW VS. REALITY.

MARY V. LITTLE.

IN the seventh book of Plato's "Republic" there is a dissertation on education and a description of the philosopher or teacher, which is very suggestive of the unreality of the world of material sense. Plato says:—

"Imagine a number of men living in an underground cavernous chamber, with an entrance open to the light, extending along the entire length of the cavern, in which they have been confined from their childhood, with their legs and necks so shackled that they are obliged to sit still and look straight forward, because their chains render it impossible for them to turn their heads round; and imagine a bright fire burning some way off, above and behind them, and an elevated roadway passing between the fire and the prisoners, with a low wall built along it, like the screens which conjurors put up in front of their audience, and above which they exhibit their wonders.

"Also figure to yourself a number of persons walking behind this wall, and carrying with them statues of men and images of other animals, wrought in wood and stone and all kinds of materials, together with various other articles, which overtop the wall; and, as you might expect, let some of the passers-by be talking and others be silent."

"You are describing a strange scene and strange prisoners."

"They resemble us. For, let me ask you, in the first place, whether persons so confined could have seen anything of themselves or of each other, beyond the shadows thrown by the fire upon the part of the cavern facing them?"

"Certainly not, if you suppose them to have been compelled all their lifetime to keep their heads unmoved."

"And is not their knowledge of the things carried past them equally limited?"

"Unquestionably it is."

"And if they were able to converse with one another, do you not think that they would be in the habit of giving names to the objects which they saw before them?"

"Doubtless they would."

"Again: if their prison-house returned an echo from the part facing them, whenever one of the passers-by opened his lips, to what, let me ask you, could they refer the voice if not to the shadow which was passing?"

"Unquestionably they would refer it to that."

"Then surely such persons would hold the shadows of those manufactured articles to be the only realities."

"Without a doubt they would."

"Now consider what would happen if the course of nature brought them a release from their fetters and a remedy for their foolishness in the following manner: Suppose one has been released and compelled suddenly to stand up and turn his neck round and walk with open eyes toward the light."

To quote further is hardly expedient, but Plato goes on to describe this one's progress in becoming acquainted with realities instead of shadows, and he considers the result when the liberated one returned to his companions in the cavern and told them of the real world, and also when he endeavored to break their chains and lead them to the light; how he was considered a laughing-stock, and would even have been put to death were such a thing possible.

In representing the objects of material sense to be unreal, Plato's illustration offers a parallelism to the teaching of Christian Science. But the recognition in Christian Science that the material sense world is a counterfeit of the spiritual world, does not authorize the assumption that the tragedy and abnormity of material sense has its counterpart in the realm of true being. In Christian Science we perceive that mortal man is bound by chains of false sense; that he is looking upon shadows, and hearing only echoes, and the truth has come to break in pieces these material bonds, to open the dim eyes, and to unstop the dull ears. One great and brave woman, our beloved Leader, Mrs. Eddy, broke from her own bondage and stepped into the radiant light of Life, Truth, and Love, knowing God as the All-in-all. By working, reading, praying she attained an apprehension of the divine realities contained in the Scriptures and demonstrated by Christ Jesus. Then, remembering her former companions living in the cavernous chambers of sense, the belief of life in matter, she embodied the great truths which she had gained, through cross-bearing and prayer, in the Christian Science text-book, "Science and Health with Key to the Scriptures." For these many years has she struggled and labored with patience and love to lift sin-sick humanity to perceive man's God-given dominion over sin, sickness, and death. Though persecution and ridicule have attended her, yet to her clear thought, these, too, were but lies, which disappear before the effulgence of Truth.

Is not Christian Science the way out of all error? Shall we not strive, watch, and pray that we may clearly discern spiritual realities, and that we may be strong and fearless in upholding the standard so nobly borne forward by our Leader?

[Written for the *Sentinel*.]

"THE TRUE LIGHT NOW SHINETH."

ADIN E. BALLOU.

THE wisdom of this world, so Paul once said,
Is foolishness with God! And still men pore
O'er lettered Dead Sea fruit and sigh the more
For something lacking in the volumes read;
There's a heart-hunger that demandeth bread!
There is a thirsting for the perfect law;
Yet vainly searching man tries many a door,
Only to turn away uncomforted.

But now is come salvation, and the light
Shineth again unto the seeing eyes,
While Truth, joy-vibrant for the hearing ears,
Gives peace to those new-learned to seek aright,
And all the sorrow of the centuries
Shall vanish in the reign of Love's own years.

SELECTED ARTICLES.

[Editorial in *Los Angeles* (Cal.) *Daily Times.*]

We claim neither authority nor ability to determine the controversy between the orthodox churches and Christian Science on the merits of the case. Our only interest is that of the general public. Looking at it from this point of view, it seems to us that the way in which a New York clergyman attacks Christian Science will not succeed. There are certain fundamentals involved in this controversy, and certain facts in the case which must not be overlooked. The fact is that a very large number of thoroughly intelligent persons have adopted the form of religion known, whether accurately or otherwise, under the name Christian Science, and from all outward appearances they are as sincere and earnest in their profession of faith as any other religious body in the country.

It appears to many lookers-on as if the success of Christian Science has depended very largely upon a few plain facts. In the first place, there are very few persons in this generation or in any former one entirely of sound health of body. Our ailments are many, various, and involve the whole race. A remedy for our ills is at all times the thing which occupies our thoughts. Anything that promises alleviation to our physical and mental sufferings will always command attention. Again, Christian Science, in promising relief from bodily suffering and mental woes, is dealing with the every-day life of the people, with the things in which they are most intimately interested.

We do not know, of course, but only reason from analogy in asking what kind of a religion this clergyman preaches to his people. Is he concerned with their every-day life, with the concerns of the people whom he addresses? Or, on the contrary, is his gospel concerned only about their salvation at some future period of life, their existence in some future world under conditions unknown to us, unknowable to us here? Or does he openly preach politics and tell his people how they shall vote? If such is the preaching of this clerical critic, he will have a hard time to hold many of his congregation steadfast in their faith and protect them from the "insidious lies" of Christian Science, as he terms it. The fact is, whether this cult is scientific or Christian, the teaching of the Founder of the Christian church was very much concerned with the every-day life of the people as they found themselves then and there. There is in the Gospels very little preaching about a future state of existence and the preparation therefor, or of a future salvation. The whole tenor of the fragmentary teachings of Christ that we possess is salvation. The pulpit which concerns itself more with "the recognition of friends in heaven" than the recognition of neighbors upon earth will probably continue to lose its hearers to a cult which concerns itself largely about their every-day life here, its concerns and its blessings.

No form of faith was ever broken down by being branded as "idiocy" and "lies" by somebody intent upon building up a congregation upon some different creed. After all, the Founder of Christianity, we are told, spent all his life going about "doing good," not sitting still talking about some future world and some state of existence different from that now. Has any one ever known a congregation, whatever its theoretical creed may have been, which imitated the Founder of Christianity, did good in its day and generation, saved men from suffering, sorrow, and sin right now in this world in which we live, and failed? If this clergyman will set his people earnestly at work doing good among their neighbors, he will accomplish more in holding together his own congregation, in building it up and protecting it from the "insidious assaults" of those professing other creeds, than he will by any fulmination in the way of coarse abuse of those who differ from him —or by preaching politics and demonstrating his ignorance of what he is talking about.

[William Royle in *Manchester* (Eng.) *Guardian.*]

Christian Science depends for its healing entirely upon the realization of God as the divine Principle or Mind of all that is or that has reality, and it is through this understanding of the divine Mind as a fixed Principle, or the operation of law, not in a miraculous but in a divinely natural way, that Christian Scientists are enabled to heal not merely nervous or functional diseases, but organic and structural ills also, and in ever-increasing numbers. The human mind is not in the least degree a factor in Christian Science healing, and if an attempt were made to heal any one by personal suggestion or hypnotic influence it would be contrary to the teaching of Christian Science, and consequently would not be Christian Science. The elimination of the personal element and the recognition only of the divine Mind, is necessary for both the understanding and practice of Christian Science.

The religion of Christian Science is not "morbid psychology," since it embraces not only the healing of all manner of disease, functional and organic, but also includes among its beneficiaries the drunken, the vicious, and the profligate. Not only have these widely differing one-time sufferers been healed, but no human personal suggestion or hypnotic influence could have maintained for these beneficiaries such immunity as they have received through Christian Science. It is the spiritual and therefore the better way.

[James D. Sherwood in *Dallas* (Tex.) *Times Herald.*]

Our critic is mistaken in his statement that Christian Scientists "place Science and Health above the Bible." All religious denominations have their books and commentaries which are intended to assist their students in making a careful study of the Bible. In like manner Christian Scientists have their commentary, which is the text-book of Christian Science and entitled "Science and Health with Key to the Scriptures" by Mary Baker Eddy, the Discoverer and Founder of Christian Science.

Some persons with a very limited knowledge of a given subject undertake to teach others, and thus are liable to misrepresent what they do not understand. In such cases it would be wiser for one thoroughly to acquaint himself with the matter before undertaking an explanation of it. Such a course would prepare him to demonstrate what he knows well, just as it is with mathematics and music. In this instance a proper understanding of Christian Science would qualify our critic to prove for himself that the claims of Christian Science are demonstrable. A correct knowledge of God enables one to heal the sick, and thus prove for himself and for others the promise of the Master, "He that believeth on me, the works that I do shall he do also." Christ Jesus said, "This is life eternal, that they might know thee the only true God, and Jesus Christ, whom thou hast sent."

In his reference to Mrs. Eddy the language of our critic indicates his ignorance of her true character. Mrs. Eddy only claims to be what she is, the Discoverer and Founder of Christian Science. This Science is applied Christianity. Its teachings bring comfort and hope to sorrow-filled hearts. Its practice demonstrates the gospel of divine Love, which comes with healing in its wings. Unnumbered persons who have come out of great tribulation are testifying daily of the marvelous blessings they have received through the healing ministrations of Christian Science.

[M. S. Bruen in *Irish Independent*, Dublin, Ire.]

It is to be regretted that some members of the medical profession should allow themselves to believe that any

Digitized by Google

Christian system which aims at—and accomplishes—the lessening of disease in this country, is an enemy. The heroism of the doctor who unselfishly devotes himself to the alleviation of suffering is beyond praise. We cannot believe that the noble members of this profession do not welcome every right means of cure, whether in line with their preconceived ideas or not. All reasonable people will agree with their wish—expressed at the meeting of the Leinster branch of the British Medical Association last week—that there should be a proper supervision and regulation of drugs and patent medicines. Many of these are harmful and poisonous, according to their experience.

Christian Science does not use drugs, and is on quite a different plane. Christian Scientists have no wish to enter into competition with doctors, but their mission is so to live that they themselves, and those whose aim is in the same direction, cannot help being finer and healthier specimens of humanity. They take the words of their great Exemplar, Christ Jesus, quite literally, and believe it to be the duty and happiness of every Christian believer to "heal the sick" in the same way that he did. Christian Science shows that the healing of sickness and the destruction of all kinds of evil follow necessarily on the practice of his teaching. The first Christians were all healers, without using medicines or drugs of any sort. It was only when Christendom lost something of its earliest ideal, and tried to combine the old with the new, that Christians returned to the use of pagan methods.

Why quarrel with Christian Science because it has returned—or rather advanced—to a purer practice, and has shown in thousands of well-authenticated cases that the power of God is now present to heal and bless mankind? The primary object of Christian Science is not the healing of the sick, but the reformation of the human race. It is the tender call of the Shepherd to His flock, the message of peace and good will to men, which constantly reminds us that man is not the child of sin, but the offspring of God; that his nature is spiritual, and not animal. This regenerating influence is blessing all the world.

[Charles K. Skinner in the *Commercial*, Three Rivers, Mich.]

It is not pleasant to think that one professing to be a follower of the Master would wilfully distort and misrepresent the teachings of other professing Christians. For that reason I prefer to consider that the clergyman whose sermon recently appeared in the columns of the *Hustler* has been a superficial reader of the text-book of Christian Science, and that his views are misapprehensions based on a wrong conception of the real teachings of Christian Science.

This critic told his hearers that "Christian Science denies the Bible teaching regarding sin, the personality of Christ, and the reality of matter." It is true that Christian Science teaches the unreality of sin and sickness in the sense that God is not their creator, nor is He responsible for them. The Bible teaches plainly that God made all that was made and without Him nothing was made. It also states that "God saw every thing that he had made, and, behold, it was very good." From this view-point there is but one of two positions for any Christian to take: either that sin and sickness and all their attending evils are good, and therefore the creations of God, and cannot be destroyed by human power; or else they are not His creations, hence not real to Him or to the spiritual man who, according to the Bible, was created in the image and likeness of God.

Jesus, the great Exemplar, took the position that sin, sickness, and death are not real, but fraudulent claims of a belief in a power opposed to God, another mind or intelligence separate from Him; and with a sweep of his clear understanding he consigned them to oblivion and destruction. Had the Master considered evil the creation of God, he would never have attempted its destruction, for he told the people plainly that he came not to destroy, but to fulfil. In like manner Christian Science teaches that the false claims of sin and sickness must be wrestled with as falsities, and overcome by the power of God. Mrs. Eddy says in Science and Health (p. 29): "Christians must take up arms against error at home and abroad. They must grapple with sin in themselves and in others, and continue this warfare until they have finished their course." The Christian Science text-book, "Science and Health with Key to the Scriptures," abounds in such statements.

Christian Science does not deny the personality of the Christ or of the man Jesus, as our critic asserts. Jesus was the corporeal man, and Christ the infinite personality of Spirit, uniting in, as Paul so clearly expresses it, "one mediator between God and men, the man Christ Jesus." As to what this critic is pleased to call the "puerile denial of matter," his statements show that he has failed to keep pace with his teachers, the physical scientists, in their admissions regarding matter. Professor Ostwald of the University of Leipsic, Germany, says, "Matter is a thing of thought, which we have constructed for ourselves, rather imperfectly to represent what is permanent in the change of phenomena;" and many other scientists of deep research have taken the same position.

Mrs. Eddy says in "Miscellaneous Writings" (p. 87), "Matter is a frail conception of mortal mind; and mortal mind is a poorer representative of the beauty, grandeur, and glory of the immortal Mind." When she first took the position of the unreality of matter, she stood alone, and her assertions called forth torrents of ridicule from materialists, but today the thinking, investigating scientist admits that she is correct. Christian Science is today cleansing the sinner, reforming the drunkard, healing the sick, all over the land. For which of these works does our brother stone us?

[Frederick Dixon in *Isle of Wight Observer*, Ryde, England.]

Christian Science teaches that pain is a mental effect, and in doing this it follows the long line of idealist thinkers, who have upheld the theory stated by Huxley in the words that "nothing exists beyond the facts of consciousness and the substance of mind." If this is the case, it logically follows that the way to prevent pain is not by reducing the human mind to temporary unconsciousness by the administration of gas, but by changing the human belief. Jesus said, "Repent: for the kingdom of heaven is at hand," and the word translated repent means, of course, change of mind; consequently when a man changes his mind from a belief in physical law, with its accompaniment of sickness and sorrow and pain, to an understanding of the spiritual law, expressed in infinite harmony, he finds, indeed, that "the kingdom of God cometh not with observation: neither shall they say, Lo here! or, lo there! for, behold, the kingdom of God is within you." And in this it must not be forgotten that the human mind which produces pain is not the Mind which destroys it, else the same fountain would indeed bring forth sweet water and bitter. The Mind "who forgiveth all thine iniquities; who healeth all thy diseases," is the divine Mind, the Mind which was in Christ Jesus; therefore has Mrs. Eddy written on page 496 of Science and Health, "Hold perpetually this thought,—that it is the spiritual idea, the Holy Ghost and Christ, which enables you to demonstrate, with scientific certainty, the rule of healing, based upon its divine Principle, Love, underlying, overlying, and encompassing all true being." In teaching this, Christian Science transcends the idealism of the philosopher and the natural scientist, and severing itself from them, relentlessly presses home the conclusion, "There is no life, truth, intelligence, nor substance in matter. All is infinite Mind and its infinite manifestation, for God is All-in-all" (Science and Health, p. 468).

[Editorial in the *Herald*, Grand Rapids, Mich.]

In these tolerant days with so many varying religious beliefs, it is not an easy matter in any progressive state to get a law on the statute-books that seems in any way to trench on any of them. In Missouri, as well as in Michigan, this wholesome fact has just been illustrated. The senate judiciary committee, in reporting out a bill for "the regulation of the practice of medicine and surgery," attached thereto this clause: "The provisions of this act shall not apply to persons who merely practise the religious tenets of their church, without pretending knowledge of medicine or surgery, provided, that quarantine regulations relating to contagious or infectious diseases are not infringed upon."

The author of the bill had declared that one of its purposes was to put a stop to Christian Science healing practices, and Jefferson City advices state that protests against the bill as introduced, signed by more than fifty thousand, were presented to the committee by Christian Science delegations from all parts of Missouri.

[Algernon Hervey-Bathurst in *Surrey* (Kingston, Eng.) *Comet.*]

A discovery cannot be considered apart from the discoverer, but Mrs. Eddy needs no justification at my hands, her life and actions are sufficient proof of what she, the Leader of the movement, is. The fact that men and women today, in well-nigh every land, bear grateful testimony to the freedom from the bonds of sickness, sorrow, and sin which has come into their life through the study of the Scriptures in the light of the Christian Science textbook, "Science and Health with Key to the Scriptures" by Mrs. Eddy, is proof enough that what she has revealed is the truth. Our critic surely cannot imagine that to turn people to the Bible, to make the spiritual meaning of the Scripture clear, to lay stress on the importance of fulfilling the injunctions of the Master as does Mrs. Eddy, is a work that can do other than uplift humanity! Christian Science is based on the healing of the sick and the reforming of the sinner; and, as is well known, the healing of the sick was considered as essential a part of religion as was the reforming of the sinner, for some three hundred years after the crucifixion, in fulfilment of the distinct command of the Master to preach the gospel and heal the sick. Our critic should regret as much as should every one else that gradually this great command was divided, and men began to turn to drugs instead of to God for healing, and instead of endeavoring to uphold the divided garment we should thank God that the world was able to receive the rediscovery of the omnipotence and omnipresence of Him "who forgiveth all thine iniquities; who healeth all thy diseases," which has been made clear to all earnest students of the Christian Science text-book.

Christian Science does not heal the sick by the mental influence described by our critic, but by following the teachings of the greatest metaphysician the world has ever known, and, as Mrs. Eddy has said, on page 313 of Science and Health, "the most scientific man that ever trod the globe." "This is life eternal," said Jesus, "that they might know thee the only true God, and Jesus Christ, whom thou hast sent." God is good, and to the extent, therefore, that we know God or good aright, we must lose the consciousness of evil, and it is as we humbly endeavor to let "that mind" be in us "which was also in Christ Jesus" that we shall succeed in demonstrating the knowledge of Christ, or Christian Science. Jesus clearly destroyed sickness and sin, thereby revealing the fact that neither sickness nor sin was legitimate, real if you please, or part of God's law, which he said he had come not to destroy but to fulfil. Now the Master's "mighty works" were not the result of the working of the mortal or human mind, viz., suggestion, mesmerism, or hypnotism, but they were the result of understanding, as said Jesus, that "I and my Father are one," and that, in the words of John, "now are we the sons of God,"—having dominion, that is, over everything which is unlike God and His perfect creation.

The attitude of Christian Scientists to those who do not agree with their views is not one of antagonism or competition. Christian Scientists hold in highest esteem the efforts of all engaged in healing the sick and preventing sin and suffering, and they very fully appreciate the motives of self-sacrifice and love for humanity that have prompted the efforts of so many great physicians throughout the world; nevertheless they maintain that the method of healing taught and practised by Jesus and his disciples is the right way; and they know that to understand and apply his teachings is not refusing "to use all wise means for combating disease." To those who hold other views they say, in the words of Abram, "Let there be no strife, I pray thee, between me and thee, . . . for we be brethren."

[Willard S. Mattox in *Bridgeport* (Conn.) *Herald.*]

The suggestion conveyed is that Christian Scientists are unsympathetic with those who suffer, and that they are fanatical and dogmatic in preaching the doctrine of Christian Science to others, and arbitrary in insisting upon its practice by those around them. Now nothing could be farther from the facts. The Christian Scientist is glad he is a Christian Scientist, and is always generous in meeting calls for assistance, but beyond a friendly word of recommendation he does not intrude his views upon others, even upon members of his own household, because he is trying to make practical the Golden Rule; and inasmuch as he insists upon his own individual right to think as he pleases, he consistently endeavors to accord the same right to his relatives and friends.

[Olcott Haskell in *San Francisco* (Cal.) *Bulletin.*]

Christian Science is founded on the understanding of Truth, and teaches strict adherence to the spirit of the Mosaic Decalogue and to the teachings of Jesus. These teachings are held by all Christians to promote safety and progress in society. How, then, can Christian Science be correctly characterized as "one of the greatest menaces of modern times"? If Christian Scientists are not always successful in realizing God's presence and protection so clearly as to heal disease, should they be censured more than should other Christians who pray to God and at the same time employ *materia medica* and yet are frequently known to fail in spite of both these attempts? As a matter of fact, whenever actual statistics have been brought forward, it has been found that the Christian Scientists were more successful in healing than were the various schools employing material remedies.

When apple-boughs are full of bloom,
And nature loves her fellow-men
With all the witchery of spring,
How can you hate a fellow then?

ALICE WELLINGTON ROBINS.

ADMISSION TO MEMBERSHIP.

The next admission of candidates to membership in The Mother Church will be June 4, 1909. Applications should be in the hands of the Clerk on or before May 12, 1909. Application blanks may be had by addressing William B. Johnson, C.S.D., Clerk, at the church edifice, Falmouth, Norway, and St. Paul streets, Boston.

CHRISTIAN SCIENCE SENTINEL

EDITORIAL

MRS. EDDY TAKES NO PATIENTS.

The author of the Christian Science text-book takes no patients, and reads no letters on disease, distress, or error of any kind. Reliable news concerning Mrs. Eddy will be found in the Christian Science publications.

TO WHOM IT MAY CONCERN.

In view of complaints from the Field, because of alleged misrepresentations by persons offering Bibles and other books for sale which they claim have been endorsed by me, it is due the Field to state that I recommend nothing but what is published or sold by The Christian Science Publishing Society. Christian Scientists are under no obligations to buy books for which my endorsement is claimed.

Mary Baker Eddy.

Box G, Brookline, April 28, 1909.

A CLEARER UNDERSTANDING.

On April 29 our Leader, Mrs. Eddy, made an important change on page 55 (69 of the old edition) of "Unity of Good," and requested that it be published in the *Sentinel*. This change does not in anywise alter the meaning of paragraph four of the chapter, "Suffering from Others' Thoughts," but it more clearly elucidates the scientific meaning of Job's words, and will help Christian Scientists to a clearer and better understanding of this well-known and much-discussed passage of Scripture. The wording of this paragraph from this date will be as follows:—

"Job's faith and hope gained him the assurance that the so-called sufferings of the flesh are unreal. We shall learn how false are the pleasures and pains of material sense, and behold the truth of being, as expressed in his conviction, 'Yet in my flesh shall I see God;' that is, Now and here shall I behold God, divine Love."

We are sure that our readers will be greatly pleased with this evidence of our Leader's constant thought and labor in their behalf.—Editor.

CONSIDERATION FOR OTHERS.

Among the incidents of "going to church," the meeting of our friends is perhaps one of the pleasantest, and a quiet interchange of greetings with those who like ourselves have much for which to render thanks to God, is a privilege to which no reasonable person could object. In too many cases, however, these greetings are supplemented by what takes on the complexion of a very worldly conversation, which disturbs the thought and breaks in upon the peace and quietness of all within earshot. To those who have come to church in a purely devotional frame of mind, and who are trying to preface the service by a few minutes of silent preparation which will enable them to understand more clearly the Lesson-Sermon and to assimilate the teachings of the Scriptures which it sets forth, it is somewhat trying to have to listen to a conversation which, although entirely suitable for some other place and some other occasion, is here quite out of keeping.

To people of an instinctive care for the rights of others, and who in return expect consideration for their own feelings and rights, this distracting hum of conversation seems an uncalled for and wholly unnecessary intrusion upon their thought. There is no intention on their part to interfere with the joyful greeting of friends, nor do they expect that the long countenances associated by so many with religious affairs shall be in evidence, but they do ask that each one be as thoughtful for the comfort of others as they should be, and in this it would seem their position is well taken.

Mrs. Eddy says in Science and Health (p. 241), "The substance of all devotion is the reflection and demonstration of divine Love, healing sickness and destroying sin." If we are mindful of the purpose for which the Church of Christ, Scientist, was instituted, viz., "to commemorate the word and works of our Master" (Manual, p. 17), we shall ever strive to show that thoughtful consideration for others which marked the Master's daily walk and conversation.

Archibald McLellan.

THE HOLY CITY.

In reading the 21st chapter of Revelation, we are reminded that many nations have had a "holy city," around which centered their patriotism, their chivalry, and, alas, in some instances their superstition and intolerance. None the less, the best and purest aspirations of the human heart have ever clung to the hope of an ideal city, to be realized, perchance, at some distant day, and the Revelator responds to this desire, this mute prayer of the ages, when he speaks in no uncertain terms of the coming of this city down to men. Strangely enough, despite this prophecy, people have been taught to believe that they must die and go out into the unknown in order to find the "holy city;" but this is not what the Bible teaches at all, for we are told therein that St. John, nearly two thousand years ago, saw the ideal city "coming down from God." Now this was undoubtedly a spiritual fact, but how wonderfully it fits in with human need! We are told of the passing of all sorrow, sickness, sin, and death before the light and glory of the divine presence; of the fountain of the water of life, and of the destruction of all evil in the consuming fire of divine Love.

John called his ideal city "the new Jerusalem," and well he might, for Jerusalem had been for long years a city of high and holy hopes, yet it was of this city that Jesus said, after it had rejected the healing truth which he came to offer the world: "O Jerusalem, Jerusalem, thou that killest the prophets, and stonest them that are sent unto thee, . . . Ye shall not see me henceforth, till ye shall say, Blessed is he that cometh in the name of the Lord." Jesus himself wept over Mt. Zion, but it was there that he "proved Life to be deathless and Love to be the master of hate," to use Mrs. Eddy's words (Science and Health, p. 44). John at length came to understand this great victory, and so he was ready to see the "holy city,"—a city redeemed from sin, disease, and death.

Professor Drummond has said that "one Christian city, one city in any part of the earth, whose citizens from the greatest to the humblest lived in the spirit of Christ, where religion had overflowed the churches and passed into the streets, inundating every house and workshop, and permeating the whole social and commercial life,—one such Christian city would seal the redemption of the whole world." He also said that the first object of Christ, as a social reformer, "was to provide the world with better men." If we are to follow the Master's example, we must begin as he did, and as he taught his followers to begin their work, namely, by casting out devils (evils). The "holy city" did not appear till "the former things," the evil things, had passed away. To the darkened human sense there was sorrow, pain, and death, but these vanished, as the truth was understood, and the heaven and earth of God's creating appeared to St. John in the sunlight of Truth and Love.

Where is the "holy city" to be found today? Christian Science answers, Everywhere that the overcoming, spoken of in Revelation, has begun to take place. It comes down to men as they learn how to overcome that which defileth or

Digitized by Google

maketh a lie. John could see the holy city when it was yet invisible to mortal sense, and so can we when spiritual sense is more real to us than the material. (See Science and Health, p. 573.) We learn that this city has foundations of eternal Truth, which will withstand all the shocks of changing mortal beliefs, and that its gates shut out the "dogs," "sorcerers," and "idolaters," the fleeting shadows of that unreal world which passes away with "the lust thereof." Bonar calls this city "the meeting-place," and thus describes it:—

Where no shadow shall bewilder,
  Where life's vain parade is o'er,
Where the sleep of sin is broken,
  And the dreamer dreams no more.
. . . . . .
Where we find the joy of loving
  As we never loved before,
Loving on, unchilled, unhindered,
  Loving once and evermore.

ANNIE M. KNOTT.

"THOU SHALT NOT KILL."

THE command, "Thou shalt not kill," is all-inclusive, unequivocal, and uncompromising. It accepts no excuse for companionship with or the indulgence of any thing or thought that leads to death. The promise is to those only who overcome sin, and who thus escape the disease and death to which it leads, through that heroic contention for righteousness which eliminates from consciousness all that ought to die or that can die.

Whether its end is achieved in a longer or shorter period, in a crisis of abnormity and despair, or in the unnumbered, seemingly normal moments of our consent to the belief that satisfaction attends the indulgence of material sense,—given its way, error always registers its unvarying effect in its own destruction, since it knows and can know no life, no truth.

In the light of Christian Science it is seen that this cycle of mortal belief must inevitably be endorsed and advanced by our every assent to the claim that there is life, substance, and intelligence apart from God. Belief in materiality, its power to give pleasure or pain, to dominate consciousness for good or ill,—this tips the beam in every fatality. Men look to mortal conditions as a life-goal, and whether their course be confined to the anticipated and familiar experiences of a life of sense gratification, or whether it chronicle the headlong extravagance of wilful impulse, in the end they are always deceived and defeated. Whatever the circumstance or condition, all have the same lessons to learn, namely, that the pleasures of sense cannot satisfy the heart; that every alliance with error is suicidal, and that the penalties which attend carnal belief are not escaped from by a mere change of our plane of consciousness. With the pen of a preacher and prophet Mrs. Eddy has written, "Existence continues to be a belief of corporeal sense until the Science of being is reached." "The so-called sinner is a suicide. Sin kills the sinner and will continue to kill him so long as he sins" (Science and Health, pp. 77, 203).

Since all sin is self-destructive, no one can indulge it in any form or degree without inviting death and incurring the condemnation which must rest upon all, yes, upon even the weary and heavy laden, if they fail to respond to the Master's loving call, "Come unto me." In so far as we come to realize the nature and effect of every least immorality or untruth of thought and deed, we shall view the temptations to minor transgression, our favorite little sins of omission and commission, in an entirely new light; we shall relate them to human destiny as we have not before, and we shall also understand and be impelled to respond to that importunity of divine Love which, in the words of the olden prophet, is ever calling to the children of men, "Turn ye, turn ye from your evil ways; for why will ye die, O house of Israel?"

JOHN B. WILLIS.

LETTERS TO OUR LEADER.

Des Moines, Ia., April 1, 1909.

Beloved Leader:—The officers, teachers, and pupils of the Sunday School, First Church of Christ, Scientist, Des Moines, send you their love and gratitude for the "Order of Exercises for the Sunday School" as published in the Manual. We have taken it for ours also, and a higher sense of law and order has been manifested.

FRANCES M. NAGEL, *Superintendent.*
NETTIE S. JOHNSON, *Assistant Superintendent.*
BLANCHE FOX, *Secretary.*

Seattle, Wash., April 11, 1909.

Beloved Leader:—Today my heart goes out to God in silent communion, to receive more of His Christ,—of Truth, as revealed to us in Christian Science, through you the revelator. For your untiring work for all mankind we owe you unspeakable gratitude. Through your teachings I am learning how to pray for that "Mind to be in us which was also in Christ Jesus."

Faithfully yours,
ERIKA FREDRIKSEN.

Boston, Mass., April 13, 1909.

Mrs. Mary Baker Eddy, Chestnut Hill, Mass.

Beloved Leader:—On this the anniversary of my first year of freedom from "the law of sin and death," my heart goes out to you in loving gratitude for what you through God have so lovingly and wisely given to humanity in "Science and Health with Key to the Scriptures," and I find myself continually praising God for it. May His richest blessing, a fuller and higher understanding of His will, be yours.

Lovingly and gratefully,
GEORGE E. EVELYN.

Mt. Vernon, Ia., April 27, 1909.

Mrs. Mary Baker Eddy, Brookline, Mass.

Dear Mrs. Eddy:—I love you, and am more grateful for Christian Science than I can ever tell you. It is the truth, and in proportion as I gain the understanding of and am obedient to its teachings, it is making me free from the bondage of material law. You have verily been a "Daniel in the lions' den," and have proven Love omnipotent and the lions harmless. I thank you for all the good that has come to me through your life and works. I thank Sybil Wilbur for her labor, which helps me to appreciate you. My one desire and endeavor is to know and to live the truth.

Humbly and sincerely your follower,
ROSE T. NEFF.

Boston, Mass., April 17, 1909.

Mrs. Mary Baker Eddy, Chestnut Hill.

Beloved Leader:—I cannot help writing you that I am quite in love with *The Christian Science Monitor,* and when one of the little newsboys on Wednesday evenings stands before the door of The Mother Church, crying out, "*The Christian Science Monitor,* the best paper on the earth," I heartily agree with him. I love the *Monitor* for the good and true news it brings, I enjoy both the serious and the humorous part of it, but most of all I love it on account of its impartial justice to all nations. It is indeed the spirit of true brotherhood which pervades its pages, and this thought, coming daily through a newspaper to the homes of thousands and thousands, will, together with our other well-loved periodicals, do wonderful work in establishing the universal brotherhood of man.

Digitized by Google

This brotherhood is always so very clear to me, when I am in our beautiful Mother Church, which in its simple grandeur is to me a symbol of the simplicity of divine harmony, in which the thoughts of all peoples and nations are united in the ever-harmonious concord of love. And then, beloved Leader, I thank God for your selfless life.

Lovingly yours,
FANNY VON MOLTKE.

Reading, Pa., April 17, 1909.

Mrs. Mary Baker Eddy, Brookline, Mass.

Revered Leader:—I note with joy the new By-law in the last Manual in regard to "Literature in the Reading Rooms," which meets a great need, for we are constantly receiving letters relating to books or mottoes. I am pleased to say that we made it a rule some months ago to have no literature in our Reading Room except that purchased from The Christian Science Publishing Society.

I wish to make grateful acknowledgment for all that Christian Science has done for me and mine. As you say in Science and Health, "Divine Love always has met and always will meet every human need." If we are obedient to Truth, our needs are met in God's good way.

Lovingly yours,
LAURA D. THORN, *Librarian.*
First Church of Christ, Scientist.

Elmira, N. Y., March 15, 1909.

Mrs. Mary Baker Eddy, Brookline, Mass.

Beloved Leader:—We, the members of First Church of Christ, Scientist, Elmira, N. Y., in annual meeting assembled, send to you, our revered Leader and guide, our offering of love and gratitude, manifested in a united and harmonious body. We know that "as the branch cannot bear fruit of itself, except it abide in the vine" (John xv. 4), so we must be a healthy, harmonious branch in order to bear the fruit of righteousness.

Public thought in Elmira is awaking to this blessed truth very rapidly.

Yours in love and truth,
MARY A. BALLY,
ELIZABETH HASKINS,
Committee.

New York, N. Y., March 21, 1909.

Beloved Leader:—Let me thank you from the depth of my heart for your example of wisdom, long-suffering patience, and love, as well as for your fearlessness in pressing Godward, in really trusting in His love alone at all times and under all circumstances. The reading of your book, Science and Health, our beloved text-book, healed me fifteen years ago, after the doctors could do no more for me. That is why I am writing these lines, and I wish to express my gratitude to you for our helpful Christian Science literature, as I have seen so much good work done by these helpful articles.

May all your followers be blessed abundantly by a clearer understanding of your wise counsel, and may your Easter lily blossom as Sharon's rose in all our hearts.

Faithfully your true follower,
CHARLES JOSEPH STROBEL.

San Diego, Cal., Feb. 11, 1909.

Mrs. Mary Baker Eddy.

Beloved Leader:—While reading our helpful literature, as attendant in the Reading Room of First Church of Christ, Scientist, in this far-away southwest corner of our favored land, an overwhelming sense of gratitude for the untold blessings that have come to me and to thousands of others, through the revelation of Truth, given by divine Love through you, fills my heart to overflowing. Time 'was when my longing desire was to see you and ask many questions, which I did not then realize would be answered for me as I continued to "study thoroughly the letter and imbibe the spirit" (Science and Health, p. 495). Now I know that humble, loving, faithful performance of my daily duties where Love has placed me, is the best means of serving you, which I so long to do and count the greatest honor and privilege. That you have taught us to leave the old, personal sense of God and man, to learn that man is "an individual consciousness, characterized by the divine Spirit as idea, not matter," and that "Love is impartial and universal in its adaptation and bestowals" (*Ibid.*, pp. 76, 13),—not personal but spiritual, born of God,—is the priceless blessing for which I am most grateful.

Yours lovingly and loyally,
MARY L. CHEWNING.

Mt. Pleasant, Mich., March 7, 1909.

Mrs. Mary Baker Eddy, Chestnut Hill, Mass.

Beloved Leader:—I have been trying to live worthy of the name of a Christian Scientist for some years, and have many times wished to address you with words of praise and thanksgiving for the many benefits I have received, yet have felt that I was not competent to address you. Today, by realizing that God is my intelligence, and it is through the study of your wonderful book, Science and Health, that I am able to reflect this intelligence, I am sending this letter. Though it should go to the waste-basket, I shall feel that I have performed a duty I owe to you.

We have a pretty little church here, which is very dear to us all, and while the material structure was built with hands, it would never have been erected but for the unity and love that we were able to realize by your teaching and counsel. I feel more grateful every day for this understanding of God and His relation to man, and for the blessing given us in the Thanksgiving Lesson, which is so inspiring and uplifting to the hungering heart. I am grateful, too, for the *Sentinel,* which brings us food for the week, and now we have the *Monitor,* which is another message to uplift the human race. May God bless you as you have blessed so many weary mortals.

Lovingly yours,
ELIZABETH E. VALLANCE.

New York, N. Y., April 2, 1909.

Beloved Leader:—I wish to express my deep gratitude to you for all that Christian Science has taught me. My heart is filled with love for you, and my prayer is to follow more closely the Principle which you teach in Science and Health, to be less critical, to judge no one, and to see God's man as perfect, knowing that error has no power and cannot hold any of God's children in bondage to a belief calling itself evil or error. I pray that the Christ may reign in me, to the overcoming of self. I have fought many hard battles, and Principle has always been the victor. I am honestly striving for that Mind which was in Christ Jesus, "to be merciful, just, and pure," to forgive and forget all wrongs, and to know absolutely that there is a divine Principle by which we may work out life's problems in an orderly way. Every snarl will be unraveled as we become willing to let God work for us, putting out self-will, human will, and allowing the divine will to govern, and lead us closer to God, who is divine Principle.

I hope to prove my gratitude by being a pure avenue for God's work (no matter what it is); to be more gentle, kind, loving, and patient with others who are struggling through the wilderness of mortal mind, and always ready to give a helping hand where duty calls me.

With a heart full of gratitude and love,
Your student's student,
MARY I. APPLETON.

THE LECTURES.

TOLEDO, O.

An audience that completely filled First Church of Christ, Scientist, last evening [Feb. 1], listened to the lecture of Prof. Hermann S. Hering of Concord, N. H. He was introduced by Coles A. Raymond, assistant engineer at the Toledo plant of the American Bridge Company, this city, who spoke in part as follows:—

Each of us is in his own way a seeker after happiness. Some seek it in worldly possessions and the pleasures of the senses, and after attainment find themselves still unsatisfied and still seeking—groping about in darkness. But when we have found that which is the source of true happiness, nothing can keep us from expressing it. It is then a pleasure to testify to the peace and uplift that have come to us through even a slight understanding of Christian Science. During the past forty-three years it has been making itself felt more and more as a power for good, through the healing of many thousands in both body and mind. It has lifted many from the gutter and has made of them respected citizens. It has raised thousands from beds of sickness to the activities of life when death seemed the inevitable. It has brought multitudes into the kingdom of heaven on earth to which Christ Jesus came to direct us. Is it any wonder that we love the one who has brought it to us so clearly, our Leader, Mrs. Eddy, and that we want to tell others of what we have received and all may receive.—*Toledo Times.*

LOUISVILLE, KY.

Before a large audience at Macauley's Theater last night [April 4], the Hon. Clarence A. Buskirk of St. Louis told why he is a Christian Scientist. Dr. Arthur K. Lord, Second Reader of First Church of Christ, Scientist, introduced Judge Buskirk as follows:—

If with an honest purpose we are seeking for the good and true, we are sure to find it. Whatever our religious opinions may be, we should be willing to seek further enlightenment and welcome any investigation that may bring us good. We can all of us readily understand and appreciate the fact that the world looks brighter, happier, and better to all if we see and enjoy its beauties and blessings through healthy eyes and strong bodies. Christian Science is a practical Christianity, a religion of love, which finds expression in goodness. It is upbuilding in character, it is making happier homes, it is producing better citizens, and, through its understanding, thousands will truthfully testify to being healed of all kinds of physical and mental ailments.—*Courier-Journal.*

CAMBRIDGE, MASS.

Mrs. Sue Harper Mims of Atlanta, Ga., lectured on Christian Science in Brattle Hall, on Tuesday night [April 6], and again on Thursday night. Mrs. Mims was introduced by the First Reader, George Leonard McNeil, who said in part,—

The rapid growth of the Christian Science movement seems marvelous to those who are not acquainted with its teachings, but to those who have received benefits from its ministrations, have investigated and accepted it as their religion, and are witnessing the good it is accomplishing for others as well as for themselves, the reasons for its wider acceptance are apparent. There is a demand for a practical religion—one which will not only fit us for a future life, but which will make our present life more harmonious, healthful, happy, and useful. Christian Science has been proven to be an extremely practical religion by many thousands of persons in our own country and in other lands. Through the understanding they have gained, they have been able to solve successfully every problem which has presented itself, and to rely upon it to help them with the small as well as with the great things of life.

A person does not become a Christian Scientist because he is urged, but because he has become convinced that Christian Science is the religion which meets his needs, and because he has, at least in some measure, proven its truth for himself. Consequently, while the growth of the movement is rapid, it nevertheless rests upon a permanent foundation and is, moreover, under the direction of a Leader whose wisdom we have had many occasions gratefully to acknowledge.—*Cambridge Tribune.*

WARREN, O.

A lecture on Christian Science was delivered in the Warren Opera House April 11 by Bliss Knapp of Boston. He was introduced by the Hon. W. B. Kilpatrick, who said,—

With most of us, our lives are divided into compartments. We have our religious compartment, our political compartment, our business compartment, and our social compartment, and we never allow one compartment to interfere with another. A man may be a church-member,—what he may deem a Christian,—be a good man in the home, treat his family as he should, and yet when he goes into the business world become a thief. A man may stand well in society, and yet not be a Christian. A man may be a church-member, one who prays for civic betterment, and yet be a knave in politics. So I say, friends, with most of us, our lives are divided into air-tight compartments. We never allow the moral side to interfere with the business side, nor with the social side, nor with the political side.

If I may speak of Christian Science,—being one who is not identified with the movement,—I must say this of it: it is a power which is exerting itself in every community for the purpose of doing away with these compartments, and making something better not only of the religious life, but of the moral life, the spiritual life, and also of the business, the social, and the political life. It is not only being a good man on Sunday; it is not only living up to the teachings of Christ in your own family, with your own friends; but living up to those teachings in every single walk of life. Now, friends, as I say, so far as Christian Science is concerned, it is all this, as perhaps many of you here today understand it. I only understand it superficially, but I know that when a certain thing or a certain teaching goes forth against opposition and against sneers, and waxes strong and gains evidence and does good to those people, it is certainly a thing worthy of growth.

TESTIMONIES OF HEALING.

It is a number of years since I got my first news of Christian Science from a jest on the subject in a daily paper. As the doctor was a constant visitor to our home, my interest was roused to a hopeful wonder as to whether my child and husband might not be benefited, if all that was claimed for Christian Science were true. I seemed to feel that those scornful remarks covered a truth, and if so, they could be explained. And they were, by two gentlemen, both of whom have written ably on this subject. My debt of gratitude to these faithful watchmen is very large. We wrote to one of them to inquire for the whereabouts of literature, after trying at a bookseller's—to his evident amusement, in those early days (1900). Very soon after the arrival of the text-book, "Science and Health with Key to the Scriptures," I was healed in three treatments of a painful internal trouble; then my husband took treatment, and was so greatly benefited that we knew this was the truth of which Christ Jesus spoke. So we buried our medicine-chest in the garden, and resolved to "trust in Truth, and have no other trusts" (*Sentinel*, July 4, 1903). We have never regretted this step and no medicine of any kind has been in our home since, nor has a doctor ever visited us professionally in all that time.

On one occasion my little daughter was sent home with the news that a fever had broken out in the school and it was feared she had taken it, as she had all the symptoms except the rash. I knew even then that my duty as a Scientist was to call a doctor if this went on, but I decided to go to God first. So I put the child to bed, then went to my room to fight with my great fear, at the foot of God's throne, as it were; "alone with God," for we had lost three children and this was our only one. My cry for help was a silent one, but it speedily brought me absolute calm, and I did my first work to the best of my very small understanding in the "closet" of a mother's "earnest longings" (Science and Health, p. 15), asking divine Love to mold them aright. Half an hour later I stole to the child's bedside, and my heart danced with joy; for the flaming cheeks and hot skin were cool and moist, and she slept as one healed! There was no need to send for a doctor, and next morning she was quite well.

We went to the seaside that year—the first time for fourteen years—without physic, or lotion, or flannels, and were all better than on any former occasion. I had a sharp attack of bronchial trouble, but this my husband was able to meet for me, so that I was very soon relieved. It, however, came up later, and had to be destroyed by further treatment. Our child, from being delicate, was now strong and ate well. She had been a source of great worry, so delicate had she been, and obliged to wear a truss since her birth. Science and Health told us not to worry, and I had become so weary of worries that I gladly obeyed. As soon as I did this, the child began to get better. It was heaven to feel that God's care is so perfect that we had liberty to rest and "take no thought" for the body, either in the case of ourselves or the child. Just about this time her truss was broken, and fear presented itself, but God's loving care as shown in the past gave us confidence to trust Truth again. We had, however, to strive very hard this time, for we all three knew it was to be a stiff test, but in a few days we conquered our fears, and in a few weeks we all three actually forgot she had ever been in such bondage. It was after three years, when we were trying to remember our blessings gained in Science, to count them over, that among other things we suddenly thought of that particular one. It has now been six years since she was healed and she can run, jump, and lift very heavy weights for a girl of her age (eighteen), without ever having worn another truss. Numberless have been our small demonstrations since then.

As our friends were mostly professing Christians, we thought how gladly they would receive the truth; but either we were not clear channels, or their eyes were dim to the spiritually beautiful, for instead of the communion we hoped to enjoy we came up against walls of stone, as it were, and progress seemed painful and slow for some years. But during a serious illness we kept true to Science, because we could no longer trust the old method, and a faithful practitioner who came to us then, patiently led us back to the starting-point. Now joy is again ours, self-control is being restored, and I am able to work with more method and knowledge, with divine Mind alone. I thank God, and our Leader, that this is possible.

MRS. E. KYLE BATTLEY, Thornton Heath, England.

Over a year ago, while crossing a bad place in a country road, I was thrown from a heavy coal wagon, and one wheel passed over my right arm, injuring it terribly. A man who witnessed the accident brought me to town in his buggy, and took me to a sanitarium, insisting that they were better prepared to care for me there than in my own home. I told them I wanted to go home as soon as the arm was dressed, and that I wanted Christian Science treatment; but they put me under chloroform and worked over my arm for several hours. When my son called to see why I had not come home, the nurse told him I was in a very critical condition, and that no one would be allowed to visit me for two days. My son went at once to a Christian Science practitioner and laid the case before her, and she said she would give me absent treatment. I did not suffer any pain, and was pleased when my son told me I was having help in Christian Science. The third day the surgeon told me they were now sure of saving the arm, but that I would never be able to use it again. I, however, felt that all things were possible with God, and I did all I could to help myself. In ten days I was taken home, and the remark was made that anything like the healing of those wounds had never been seen.

In about three weeks I began to move my arm, and in three more weeks I went to the coal yards and did light work. I have been driving a team again for several months now. When the nurse asked the surgeon if he had ever known of a limb being used again after the ligaments had been severed, as in this case, he said, "It is beyond me; I don't know what to make of it." At another time he made the remark that God must have had a special care over me.—T. G. WILLIAMS, San Diego, Cal.

I should like to tell how grateful I am to God, and to Mrs. Eddy, our beloved Leader, for the manifold blessings I have received since coming into Christian Science, which was about nine years ago. When I first became interested I was suffering from rheumatic and catarrhal trouble, also several other ailments. I was healed of the first-named trouble through the reading of Science and Health. This healing I attribute to my close study of the text-book, particularly the platform in the chapter entitled "Science of Being." I memorized the last ten pages of the chapter, and by the time I had done so (it took about six months) I suddenly woke up to the fact that these diseases had both disappeared. Before I came into Christian Science I was compelled to use remedies which caused me much suffering, and they did not seem to help me at all. I should like to add that I have never had a return of either of these ailments since that time.

Words are inadequate to express my appreciation of what Christian Science has done for me, and also for other members of my family. I should like to tell of a beautiful demonstration which occurred about three years ago, in the case of my sister's year-old daughter. The relatives

Digitized by Google

had all been telephoned to, myself included, and upon arriving at the house found that according to material sense the baby was nearly gone. The doctor had just left the house, having told the parents he could do nothing more, and my brother-in-law was kneeling beside the bed, weeping, but I told him that God is the Life of all. I then put the baby on a pillow, and walked the floor with her, repeating the 91st Psalm. In half an hour the child was sleeping naturally. From then on she began to improve, and even the doctor admitted that it was Christian Science which had healed her. I wish to add that they did not give the child any more medicine, and that today she is a fine, healthy little girl.

I feel that I can never be too grateful to our beloved Leader for having given us such an understanding of the Bible that we can utilize it for our daily needs and in all times of trouble. While I have not yet worked out of all my old beliefs, I find that one by one they are fading away —like a dream. I am also grateful for our *Sentinel* and *Journal*, as well as our other periodicals, and many times I have been healed of severe attacks by reading some article. I have but one prayer and one desire, and that is for more humility and more love.

CATHARINE M. NOBLE, Roxbury, Mass.

[Translated from the German.]

For some time I have felt it a duty to express my gratitude for Christian Science and for the many benefits which I have received thereby. In the year 1904 I became very ill, and the physician to whom I applied for help told me that all the internal organs were affected and that I should eat only light, digestible food; but the medicine I took did me no good, and I could not retain my food. I then had two other physicians, and later on a homeopathic doctor, but none of them could help me. For three years I had hardly any sleep, was confined to my bed most of the time, and could not read at all.

I am happy that I have now found the way to Truth through Christian Science. I am able to eat anything, I sleep as I never slept before in my life, and I have gained considerably in weight. My heart is filled with gratitude for this revelation of divine Love, and I strive daily to come nearer to God, divine Mind, and to relinquish all error. I thank God that the way to health and peace has been shown to us by Mrs. Eddy, our beloved Leader.

FRAU GOERKE, Berlin, Germany.

It has been my desire for a long time to express through the *Sentinel* my gratitude for all that Christian Science has done for me, with the hope that it may encourage some one who reads these lines to seek God through the study of Christian Science, and find in divine Truth his all. When the subject of Christian Science was presented to me by a friend, six years ago, it found me sick in body and mind, arranging to go to a hospital for the third time. This friend, from Kansas City, Mo., was visiting here, and though the subject was new and strange to me, I was in that mental state where anything was preferable to what I knew I would experience in going to the hospital. I made arrangements to take absent treatments, a method which seemed unusual to me, but when the practitioner informed me it is God who does the healing and that God is everywhere present, I tried to rely on Him as my physician.

Those who have put their faith in medicines all of their lives, will know what it meant for me to give up every material remedy and to rely on a God who seemed to be very far away, but I am truly grateful that my first steps were kindly but firmly directed into the narrow way which leads to health, holiness, and happiness; to reliance on the God who is Father-Mother, Life, Truth, and Love. My progress was slow but sure in the nine weeks of treatment from the practitioner and the study of Science and Health by me. How sweet it was to be relieved from pain and to feel that peace which the world cannot give. I knew it was the truth that had made me free, and then I set to work to understand the Principle as revealed in "Science and Health with Key to the Scriptures." This book reveals to me more clearly each day that the spiritual interpretation of the Bible can be applied with certainty of success, according to our understanding of it, to every problem in life, but that only as we obey and live the truth it teaches can we claim its blessings.

The spiritual uplifting grows more beautiful to me as I grow in the understanding of God, and I have applied it enough to know that the truth does make free. I am grateful to God for all the blessings I have received, grateful to Christ Jesus the Wayshower, and to Mrs. Eddy for her toil and loving sacrifice for a world of suffering humanity.—MRS. CLARA DERLETH, Centralia, Ill.

I want to give my testimony to the beautiful demonstration that was made through Christian Science over a fall which I had about two years ago. I fell as I stepped from the porch on to the ice-covered stone walk, striking on my back and head. I seemed to be dazed for a few seconds, but soon realized the truth. I tried to get up, but could not, and a young man who had seen me fall came to help me up. He assisted me up the steps, when I thought I could go alone, but once inside, I dropped on the floor and began to throw up blood. A Scientist who was staying at my house came to me, and tried to help me get upstairs to my room, but I fell again on the landing. She then telephoned for a practitioner, and in a short time the practitioner came and began to treat me, but I did not seem to get any relief and asked them to send for my husband. I thought I was dying, for all aches and pains had left me and I was not conscious of my body. In a short time I felt better; my husband arrived and helped to place me on a cot, and I fell asleep. When I awoke the thought came to me that it was the evening of our lecture, and I spoke of it to the practitioner. She said there would be other lectures, but I still thought of it as she sat by the cot reading to me. She asked me to try to sit up in bed. I did so, then I lay down again; but soon I said to her, "I am all right. I want to get up and dress, for I am going to the lecture tonight." The practitioner said that there was no reason why I should not go. I went, and sat through the lecture without an ache or pain, and never felt better in my life.

This healing is but one of the many blessings I have received through Christian Science, for which I am truly grateful to God, and to our Leader, Mrs. Eddy.

MRS. LODEMA WILSON, Franklin, Pa.

It is with love and much gratitude to God, and to our dear Leader, that I give this testimony of physical healing, which occurred in August of 1906. One warm day I was suddenly attacked with chills, and in fact every symptom of fever. A Christian Science practitioner was called about eight o'clock in the evening; Science and Health was read to me, and silent and audible treatment given. At ten o'clock I was resting quietly, and the following day I was able to be about my daily work. My daughter also has been much benefited by Christian Science, and I gratefully acknowledge the avenue through which these blessings have come to us.—DOLLIE B. MINCKLER, Oswego, N. Y.

[Translated from the German.]

I, too, wish to give thanks for all the blessings which we have received in Christian Science. For ten years I

Digitized by Google

had been suffering from liver complaint and gall-stones, and had been treated by different physicians. I had also tried several "cures;" but nothing could help me permanently, and after a short time the pains would come back again worse than before. Three years ago we became acquainted with Christian Science. I took treatment, and in a very short time I was free from the disease. My health has been perfect since my healing. My husband, too, has been healed of severe nervous trouble and a catarrhal affection of the lungs.

I would also like to give thanks for the spiritual uplifting. Before I was in Christian Science, whenever I did not feel quite well I would reach immediately for some drug, believing it would help me. Now I do not need any such thing, as I know that there is no other power but God; that God is my Life, my strength, and my "great Physician," who is always ready to help, whenever we turn to Him. I shall strive to know more and more of this great truth, and to walk in the path which Jesus has shown us.

For all these blessings which we have received, we give heartfelt thanks, above all to God, and to our faithful Leader, Mrs. Eddy.

FRAU FRIEDA FREIDANK, Berlin, Germany.

After reading other people's testimonies in the *Sentinel*, I feel I ought to tell what Christian Science has done for me. For eight years I was a great sufferer from many ailments. I had medical treatment until I lost faith in doctors, as they could give me only temporary relief. I had come to the conclusion that life was nothing to me, and Christian Science found me in this frame of mind. Now I have the best of health and have never seen a sick day since the truth came to me, which is over two years ago, and I am now able to help others as well. About a month ago my mother had a severe attack of rheumatic trouble, so that she could not move in bed. I treated her in Christian Science, and in less than three hours she was up and as well as ever. That afternoon she went fishing and remained until dark.

Words are inadequate to express my thankfulness for the many benefits I have received through the understanding of Christian Science.

MRS. A. R. VON HARTMAN, Ivanhoe, Col.

I am indeed thankful for the many blessings which have come to me from the realization of the truth that Christian Science unfolds to us. Glasses which I had been obliged to wear for many years (one pair for reading and the other for distance) were taken off after one treatment by a Christian Science practitioner, and the headaches that formerly followed if I went without the glasses for half an hour were overcome at the same time. I have never used glasses since that day, more than three years ago. The demonstration was slower in the overcoming of difficulty in reading fine print; there seemed always a little fear that I could not see it, but now I am entirely free from this false sense. A bladder trouble, which had caused me suffering and much inconvenience for years, has gone to its native nothingness, also a cough of many years' standing.

For these and many other demonstrations of the power of Truth I am most grateful to God, and to our revered Leader. I am so greatly uplifted in realizing this truth for others that I praise and glorify God.

MARY VIRGINIA GAULT, Baltimore, Md.

I take this opportunity to express my gratitude for the benefits received in Christian Science. I am especially grateful for a healing which took place about a year ago, from what seemed to be a severe attack of poisoning. One day, soon after lunch, I was suddenly taken with severe pains, nausea, and dizziness, and reached home in a state of total collapse. Those who saw me told me afterward that my appearance was most alarming. A Christian Science practitioner was called in, and sat by my bedside for two hours. I was relieved almost immediately, and felt much better when she left. I fell asleep, and after resting for some time I awoke with terrible cramps in my limbs. My wife telephoned to the practitioner, and after a short while I was relieved and rested comfortably all night. In the morning I ate a hearty breakfast. The practitioner soon rang up, and asked me to call at her office. At first this surprised me, as I did not think I would be able to leave the house that day, but I soon recognized her wisdom in making the request, and went to see her. Although I felt well, there was a slight sense of weakness as I walked, but after receiving treatment I felt strong and was able to resume my work in the afternoon.

I am very thankful to God for this wonderful demonstration, as I was practically snatched from the jaws of death. Christian Science has surely proven to me many times that God is a very present help in time of trouble. I am also very grateful to Mrs. Eddy for having made plain to us this truth which makes free, and which has so many times proven a blessing to me and mine.

GEORGE MACMEEKIN, Palo Alto, Cal.

About eight years ago, I was healed in Christian Science of rheumatic trouble. I was entirely helpless, and, like the woman whom Jesus healed, I was almost bowed together, and had been told that I would never be straight again. But I was brought out of this condition by Christian Science, and am straight and active and well. I have never had a doctor or used medicine of any kind since my healing in Christian Science. I feel as if I could never be thankful enough to God, and also to Mrs. Eddy, for all the good and the help I am daily receiving.

MRS. E. L. BOWEN, East Providence, R. I.

It is with deep gratitude to God, and to Mrs. Eddy, the Discoverer and Founder of Christian Science, that I desire to give my testimony of its healing power and spiritual uplifting. Eighteen months ago I was entirely healed of bowel trouble, from which I had suffered at times ever since childhood, also of stomach trouble of over ten years' duration, together with other physical and mental troubles. Before trying Christian Science I was continually taking medicine, but was constantly growing worse. I finally decided to try physical culture, with strict dieting, not eating any meats or cooked foods of any kind. I kept this up for some time, and found that I was growing more irritable and nervous every day, besides losing in weight; but the worst feature of all was that my stomach and bowels were getting worse instead of better, so that I gave this up thoroughly discouraged.

I had seen what Christian Science had done for my mother and sister, and knew there must be something in it, although I was not willing to try it then. Having heard much, however, about The Mother Church, and being in Boston shortly after I had given up the treatment mentioned, I decided to attend the Sunday afternoon service. I was so impressed by the beautiful edifice, the simple yet satisfactory service, and more than anything else by the happy and intelligent countenances all about me, that I thought if Christian Science could make this great number of people look so well and contented it could surely heal me. Before the service was over I had decided to begin treatment at once, for a feeling came to me that God never made me sick, and that I could be healed and have perfect health. I began treatment the following day, and God's promise did come true, for I was healed of the stomach

Digitized by Google

trouble in the first treatment, and in four weeks I had been healed of the other trouble. Since the first treatment I have taken no medicine or material remedies of any kind, Christian Science having proved more than sufficient for all my needs. Besides the blessing of good health, I am very thankful for the spiritual blessing, for a better understanding of the Bible, and for a feeling of more brotherly love toward my neighbors.

These are only a few of the good things for which I am thankful to God, and to Mrs. Eddy, who has given to the world that wonderful book, "Science and Health with Key to the Scriptures," in which is found the way to health and happiness, through the understanding and practical demonstration of God's promises.

RUSSELL I. RHODES, North Attleboro, Mass.

I must return thanks to God, divine Love, for His great mercies to me in leading me from darkness to the light, and for uncovering the revelation through our noble Leader, Mrs. Eddy. All my life I had malarial trouble, the doctors said, and I often wondered how I could feel well enough to attend church, but I rarely missed a Sabbath. After coming to Washington, D. C., where my husband was a senator for seven years, I seemed to grow worse. Some copies of the *Christian Science Sentinel* were sent to me, but I threw them away, thinking it was some new fad. After going back to Louisiana I still continued to feel very miserable from severe rheumatic trouble, which caused me to lose my eyesight for seven years. I was not able to put my heel to the ground on account of pains from knee to foot. There was also some trouble with my heart. I sent for a doctor, and he said that there was something wrong, but he could not tell what it was. I was praying constantly, till I thought I would lose my mind, for more light, more of the Holy Spirit, and I could not understand why the world was so beautiful, and still so much poverty and sorrow.

Three years ago some more *Sentinels* were sent to me from Nashville, and this time God in His mercy led me to grasp the truth. I sent for a copy of Science and Health, and read on and on. My strength came back to me, and my eye trouble vanished "as a tale that is told." In a few months I was reading in the daytime, without my glasses, and I am now writing my thanks without them.

"They shall mount up with wings as eagles," is a promise of divine Love. I am rewarded, for I walk and am not weary, although I am sixty years of age. I have not yet overcome all error, but for the blessings which I have received I give thanks to the great "King of kings." May all the earth be filled with the knowledge of God and His Christ. I am ever striving to reflect Love, and to know that God is All.

MRS. DONELSON CAFFERY, Franklin, La.

With a deep sense of joy and gratitude to the Cause of Christian Science, I offer the following testimony of healing. Last summer I had a sudden attack of acute rheumatic trouble, which affected my hands and feet. I was entirely helpless and suffered terribly. Although God seemed so far away, I felt, as did the psalmist, that "it is better to trust in the Lord than to put confidence in man," for He had been my only physician during the last nine years; therefore I sought no other remedy but Christian Science treatment. After one week the bonds of evil were broken, and I was again able to use my limbs. My strength returned rapidly, and after a few more days I walked downstairs and moved about as formerly. This touch of Truth's healing power was to me a great proof of God's love and care; it has strengthened my confidence in God, divine Mind, and increased my love of the truth. It has also given me a keener appreciation of the love and patience manifested in the noble work of Christian Science practitioners. Thanks be to God for giving us the truth of spiritual being through dear Mrs. Eddy.

FRIEDA ENGELKE, Cincinnati, O.

I am glad to have this opportunity to acknowledge the help I received through Christian Science. I suffered four years with female trouble, and spent large sums of money to be cured, but without avail until I went to a Christian Science practitioner. After four weeks' treatment I was like a new person, so I cannot say enough for Christian Science, or tell how appreciative and how thankful I am. I hope that many others will learn what I have learned of the power of Truth to heal.

MRS. E. D. CHAURETTE, Chicago, Ill.

It is now over four years since I turned to Christian Science for physical aid, after several years of suffering which could not be cured by medicine. Through the patience, love, and understanding of a faithful practitioner I, as well as the other members of our family, have been brought out of various physical ills, and from the darkness of many material beliefs. For even the slight understanding of this truth which we have gained we are very grateful, and by our faithfulness and perseverance we hope to advance each day toward that knowledge of God which the Master said is "life eternal." The Christian Science publications are of untold benefit each week, and we are learning to appreciate more and more the wonderful courage and love for God and humanity expressed by Mrs. Eddy in her unceasing labor for the good of all mankind.

MRS. LOTTIE M. REYNOLDS, Wollaston, Mass.

The love of Christ constrains me to give this testimony of healing through the goodness of God as made known in Christian Science. In July, 1905, after undergoing the amputation of a finger from blood-poisoning, I was taken suddenly with rheumatic trouble, which finally terminated in an organic affection of the spine. I was examined by a skilful physician, who said he had never known an adult to be cured of so severe a curvature, and advised me to go to the Massachusetts General Hospital for examination by a specialist. I had been attending Christian Science services, and felt that my only chance of help would be in that way, so I went to a practitioner for treatment. Three weeks later I was examined by the physician who had seen me before, and he pronounced it a perfect cure.

Since that time Science and Health has been my daily companion. Circumstances made it necessary for me to live where I had neither Christian Science companionship nor a chance to attend the meetings; but the sustaining power of the infinite has been my support, enabling me to conquer difficulties and enjoy a greater degree of health than I otherwise should have done. Taking God's Word and promises for my guide, I have been kept from dangers seen and unseen. I am indeed thankful, and am eagerly watching for opportunities to help others who are seeking this new-old way of salvation from sin, disease, and death. For the blessedness of knowing that the "great Physician" now is here, I have not words enough to express my gratitude.—NELLIE S. WILSON, New Ipswich, N. H.

The pleasantest things in the world are pleasant thoughts, and the greatest art in life is to have as many of them as possible.—ANON

FROM OUR EXCHANGES.

[*Churchman.*]

The power of the resurrection grows in majesty and glory as the knowledge of Christ and his work is more really and widely experienced. The need of a rising from the dead finds expression in every new experience of the common hope of all humanity. Every new avenue of knowledge, every new bond of fellowship, every new sense of common brotherhood, intensifies the significance of existence and increases the faith in and the hope of an enduring common life here and hereafter. Wherever there is an arising from death to life, from a lower to a higher civilization, from imperfect to better relations between peoples, from a selfish and isolated to an unselfish and interrelated existence,—there God is fulfilling Christ's resurrection and his life.

[Robert Stuart MacArthur in the *Standard.*]

Let us make our religion intensely practical. This conception of our duty to God brings us into right relations with Him on the one side, and with our fellow-men on the other. He may be orthodox in his creed, regarded simply as an intellectual belief, but he is utterly heterodox in his creed, regarded as a spiritual confession of faith in God, who is neglectful of his duties to his fellow-men. Creeds that are not translated into deeds are worse than useless: they are contemptible in the sight of men and abominable in the sight of God.

[*Universalist Leader.*]

I do not like to think that the Holy Spirit had to wait until Christ was born and died. It must have been in all the ancient world. It revealed itself in human life with new power and with wonderful results when Jesus spoke to men. When he went away this same Spirit of the living God still guided the followers of the one who died on Calvary. So God's Spirit is still guiding us. So He is here. This is our Palestine. We can make this land where we live a Holy Land if we listen to the voice of the Spirit today.

[*New York Observer.*]

The world expects of the professed follower of Jesus a perpetual patience. It will make no excuse for him if he loses his temper, betrays irritation, or resents an injury. Its standard for the Christian is very high, while, by a curious inversion of ideas, it imagines that it itself may break the laws of God with impunity and give way to its passions without hindrance. The Christian may accept this implied compliment from the world, and should certainly endeavor to set before it a striking example of patience.

[*Christian Work and Evangelist.*]

Let us be brave for the sake of the timid. Let us lead the way in for the sake of those who will never lead but are ready at once to follow. If one speaks the word of truth that ought now to be spoken, there are many others waiting to speak it after you. Be first to stand for the right today, and you will be suprised how many others will then stand with you. Give up some habit that is bringing ill to others, and many will give it up after you who have not courage to be first in the effort.

[*British Congregationalist.*]

From the first, men have lingered over the thought that Jesus had been tempted, and found in this his power to help those who are tempted. His experience had, they felt, to overlap ours; he had to be made like his brethren; he had to be touched "with the feeling of our infirmities"—be able to sympathize and be tempted in all respects like us.

SPECIAL ANNOUNCEMENTS.

FROM THE PUBLISHER OF MRS. EDDY'S WORKS.

THE CHRISTIAN SCIENCE TEXT-BOOK, "SCIENCE AND HEALTH WITH KEY TO THE SCRIPTURES."—This work contains many important changes and additions by the author, and also contains a photogravure portrait of Mrs. Eddy, together with a facsimile of her signature.

SOME OF MRS. EDDY'S WRITINGS IN NEW BINDINGS.—One volume containing Unity of Good, Rudimental Divine Science, No and Yes, Retrospection and Introspection; a second volume containing Christian Healing, The People's Idea of God, Pulpit and Press, Christian Science *versus* Pantheism, and the Messages of 1900, 1901, and 1902. These volumes are printed from new plates and are uniform in size with the pocket edition of Science and Health. Bound in morocco, limp, round corners, gilt edges, heavy Oxford India Bible paper. The prices of these books prepaid are as follows: single copy, $3.50: six or more copies of either volume to one address, each $3.25.

THE CHURCH MANUAL.—Containing all the By-laws of The Mother Church, The First Church of Christ, Scientist, in Boston, Mass. Each new edition of the Manual will have special notice in the *Sentinel*. Price, single copy, prepaid, $1; six copies to one address, $5: twelve copies to one address, $9.

Attention is called to the Library Edition of Mrs. Eddy's works, description and prices of which will be found on the outside cover page of the *Sentinel*.

Address all orders for books named above to ALLISON V. STEWART, Falmouth and St. Paul Streets, Boston, Mass.

FROM THE CLERK OF THE MOTHER CHURCH.

CHURCH TENETS.—The tenets of The First Church of Christ, Scientist,—The Mother Church,—printed on folded sheet for the use of Branch Churches of Christ, Scientist, with space for the names of churches and their by-laws, can be had at seventy-five cents per hundred.

Not less than one hundred are sold. Postage stamps are not taken for payment.

MEMBERSHIP.—Correspondence relating to membership with The Mother Church, and requests for blank applications for membership, should be addressed to the Clerk.

All correspondence and orders relative to the above should be sent to WILLIAM B. JOHNSON, Clerk, The First Church of Christ, Scientist, Falmouth, Norway, and St. Paul Streets, Boston, Mass.

FROM THE CHURCH TREASURER.

PER CAPITA TAXES.—Per Capita Taxes and Contributions to The Mother Church, The First Church of Christ, Scientist, in Boston, Mass., should be sent to the Treasurer. Please do not send currency.

Remittances for the above should be sent to STEPHEN A. CHASE, Treasurer, Box 56, Fall River, Mass.

FROM THE SOCIETY.

Attention is called to the announcement over our Leader's signature, which appeared in the *Sentinel* of Jan. 9, to the effect that Christian Scientists in the field who send four subscriptions to the *Monitor* for one year, will receive their own paper gratuitously.

The Publishing Society has in stock a number of copies of *Sentinel* No. 6, Vol. IX., containing the article "What Our Leader Says" as last published, and *Sentinel* No. 14, Vol. IX., containing the article "Harvest," also by our Leader. As these articles are of abiding interest and value to the Field the Society will be glad to supply them, postpaid, at the following prices: 1 copy, 5 cents; 5 copies, 15 cents; 10 copies, 25 cents; 25 copies, 50 cents; 50 copies, 85 cents; 100 copies, $1.50.

On foreign orders add 2 cents a copy to cover postage.

THE CHRISTIAN SCIENCE JOURNAL

FOUNDED APRIL, 1883, BY THE AUTHOR OF "SCIENCE AND HEALTH WITH KEY TO THE SCRIPTURES," MARY BAKER EDDY, DISCOVERER AND FOUNDER OF CHRISTIAN SCIENCE

This monthly Magazine is the official organ of The First Church of Christ, Scientist, in Boston, Massachusetts, and correctly represents the Christian Science Movement. It contains interesting discussions of the teaching and the practice of Christian Science, and in addition to dissertations, lectures, and contributed articles, publishes always a number of reports from cases of spiritual and physical healing, which practically illustrate the redemptive work of Christian Science.

TERMS OF SUBSCRIPTION: Single copy, one year, $2.00. Quantities TO ONE ADDRESS: ten or more, each, $1.90; twenty-five or more, each, $1.80; fifty or more, each, $1.60. These rates apply in the United States, Canada, Mexico, and Cuba. In all other countries add forty cents for postage on each subscription. Six months' subscriptions received at half the above rates. No subscriptions received for less than six months.

TERMS OF SALE: Postpaid to any address: Per copy, twenty cents. Quantities TO ONE ADDRESS: ten copies, $1.70; twenty-five copies, $4.00; fifty copies, $7.00; in the United States, Canada, Mexico, or Cuba. To all other countries, per copy, twenty-five cents. Quantities TO ONE ADDRESS: ten copies, $2.10; twenty-five copies, $5.00; fifty copies, $9.00.

BOUND VOLUMES: Current year and two years previous, cloth, $2.50; half calf or half morocco, $3.00. On earlier volumes write for prices.

THE CHRISTIAN SCIENCE MONITOR

Published every afternoon except Sunday

A daily newspaper for the home. Adequate news service. The various departments of a modern newspaper. Unique home forum page. Entire page of editorials dealing with the vital topics of the day. Contributions for the columns of the MONITOR should be addressed, Managing Editor, THE CHRISTIAN SCIENCE MONITOR.

SUBSCRIPTION PRICE: For the United States, Canada, Mexico, and Cuba, $5.00 a year, $3.00 for six months; all other countries, $8.00 a year, $4.50 for six months, postpaid. In the Greater Boston postal district the MONITOR will be delivered by carrier through the local news-dealer at the customary rate of 12 cents a week payable to the news-dealer. If desired by mail in Boston district $2.75 should be added to the annual subscription rate to cover extra postage.

The Christian Science Quarterly

Published January, April, July, and October

Contains the Lesson-Sermons which are read at the Sunday Services throughout the year in all the Christian Science churches. These Lessons, which present citations from the Bible and "Science and Health with Key to the Scriptures," are valuable for daily study.

TERMS OF SUBSCRIPTION: For one year, 50 cents; fifty copies or more to one address, 50 cents yearly for each copy. Foreign subscriptions, 60 cents. Yearly subscriptions only received.

TERMS OF SALE: One or more copies, postage paid, each, 15 cents; fifty copies or more to one address, each 12½ cents, postage paid.

Der Herold der Christian Science

Published Monthly.

A magazine printed in German, which publishes original and translated articles bearing upon Christian Science, and also testimonies of healing from Germany and America. It contains about thirty-eight pages of such reading matter, also the Lesson-Sermons which are read at the Sunday services in all the Christian Science churches, and is valuable as an authorized representative of the movement.

SUBSCRIPTION PRICE: For the United States, Canada, Mexico, and Cuba, 10 cents a copy, $1.00 a year in advance; all other countries, 12 cents a copy, $1.25 a year, postpaid.

Entered at the Boston, Mass., post-office as second-class mail matter.

ITEMS OF INTEREST.

National.

The New York Legislature has passed an act broadening the conditions under which the public service commission may grant franchises for rapid transit lines. Under the present regulations, as laid down in the Elsberg law, subways may be built by private capital only in the single case of extensions to existing lines; otherwise they must be built with the city's money, or with the city's credit, the franchises or leases running not more than twenty-five years, with renewals of twenty years, periods too short to attract private capital. The amendments just passed permit the building of subways in three ways. First, by private capital, under an indeterminate franchise, which may be terminated by the city at any time after ten years on the payment to the traction company of the actual cost of the road, plus a profit of fifteen per cent. Secondly, by the use of the city's money, with provisions for an operating lease. Third, by assessment, either of the whole or a part of the cost of construction, upon the property which would be benefited by the construction of the subway.

A camera has been invented and is now used by Boston policemen, which promises much in the way of accurately determining the speed of automobilists. It contains two plate-holders, one above the other, with a stop-watch between the two. The operator takes his place within focusing distance of the road, and when the automobile is at a certain distance, the upper plate is exposed. This takes a picture of the position of the automobile on the road and also records the face of the stop-watch, showing just where the hand is at the second the picture is snapped. The camera is then turned at a certain angle up the road, and a second picture is snapped. This also records the face of the stop-watch, showing how much time has elapsed between the first and second exposures and also gives the position of the automobile on the road. By mathematical calculation the exact distance traveled by the automobile is secured and the stop-watch shows the exact time that transpired between the first and second exposures. From this the speed of the automobile is secured.

The United States Government made a profit of $10,415,371 during the year of 1908 on the coinage of silver, nickel, and one-cent bronze pieces. These figures represent the difference between the price paid by the Government for the metals and their coinage value. Silver bullion purchased for subsidiary silver coinage during the past year aggregated 18,819,279 standard ounces, and mutilated and uncurrent United States silver coin of the face value of $1,162,982 was received for recoinage. There was purchased 525,833 ounces of silver bullion for the Philippine government, the cost of which, $205,054, was reimbursed to the United States by that government. The coinage executed by the mints of the United States during 1908 amounted to $107,238,377 in gold. The amount of subsidiary silver coinage was $16,350,477, which is the largest subsidiary silver coinage executed in any one year since 1877. The amount of minor coinage was $1,046,008.

The establishment of the United States Court of Customs Appeals and the appointment of an additional assistant attorney general for the prosecution and trial of all cases of appeal from decisions of the Board of general appraisers are provided for in the amendments to the customs administrative act reported by the Senate finance committee. This proposed court will consist of a presiding judge and four associate judges, to be appointed by the President with the advice and consent of the Senate. Nine judicial circuits are provided for in which the court will hold sessions. The judges of this court will receive a salary of $10,000 a year.

The Supreme Court has decided that the "commodity clause" of the interstate commerce act of 1906, known as the Hepburn railroad rate law, is constitutional. The matter came before the court on an appeal by the railroads from a lower court, where the right of railroads to own and handle coal properties was denied. The Supreme Court holds that railroads may own stock in other corporations.

An agreement between the mine operators and workers of Pennsylvania has been signed which continues in force, until March 31, 1912, the awards of the anthracite coal strike commission of ex-President Roosevelt. The mine workers' union is not officially recognized, the members of the miners' committee simply signing the agreement "on behalf of the representatives of the anthracite mine workers."

During the summer President Taft and Attorney General Wickersham will consider carefully plans for the reorganization of the department of justice, the interstate commerce commission, the bureau of corporations, and the legal branches of other departments, whereby greater harmony may be brought about.

Oscar S. Straus, secretary of commerce and labor in ex-President Roosevelt's administration, has been named for the post of ambassador to Turkey. Mr. Straus has already served as the diplomatic representative of the United States in Turkey under three Presidents, Cleveland, Harrison, and McKinley.

Criminal proceedings, as an outgrowth of the Government's suit against the American Sugar Refining Company, which resulted in disclosures of wholesale underweighing of sugar imports, have been begun by the Federal authorities in New York against those charged with fraudulently manipulating the scales in weighing sugar.

The first wireless despatches ever transmitted between New York and Chicago were sent last week. Messages were sent from the wireless office in the Auditorium Annex, Chicago, to the receiving tower above the Waldorf-Astoria, New York, and from there telephoned to various newspaper offices.

More than one hundred thousand dollars will be contributed by motorists toward the maintenance of state highways in Massachusetts this year, in the way of fees to the highway commission for operators' licenses.

At the Government fish hatchery at Green Lake, Maine, there are something like 2,500,000 young trout, salmon, and togue. Distributions will begin next month.

Something like $125,000,000 worth of warships were launched by the principal nations in the year 1908.

The second national peace congress convened in Chicago last week.

International.

The new budget presented in the House of Commons by David Lloyd-George, chancellor of the exchequer, has an interest for all the world as an evidence of a disposition on the part of the present British government to extend greatly the doctrine of state aid. The new taxation, by which the estimated deficit of nearly sixteen million pounds is to be made good, is the most comprehensive rebate of the British fiscal system since the Gladstonian free trade budgets of sixty years ago. The chancellor's proposals embody almost all the schemes that have been advanced in radical programs for the last twenty years. The list includes a supertax on incomes of over five thousand pounds, a tax on mining royalties, a tax on urban undeveloped land, a tax on the unearned increment, increased death duties, a tax on stock exchange speculation, a whisky duty increased by one-third, a tobacco duty increased eight pence a pound, and an increased tax on motor cars.

According to the new contract between the French Cable Company and the government of Venezuela, the company will cede to the latter, as indemnity for the alleged complicity in the Matos rebellion and as a payment for the new monopoly, all the coast cables belonging to the company. These connect all the principal coast cities from Maracaibo on the west to the island of Margarita on the east. The contract gives the cable company a monopoly of cable communication with the outside world for twenty years.

It is reported that the Shah of Persia has accepted the project for reforms advanced by Great Britain and Russia. The details of the memorandum have not been published, but it is known that it included a provision for a restoration of the constitution, and a refusal, until Parliament should give it sanction, to lend any financial assistance to the realm. The two Powers have arranged to grant a loan to Persia as soon as the date of the elections shall have been decided on.

The Saskatchewan government has purchased all the long-distance lines, local exchanges, and equipment of the Bell Telephone Company in that province.

The beleaguered city of Tabriz, Persia, was entered last week, with little opposition, by a Russian relief expedition.

Industrial and Commercial.

Through trains were placed in operation last week between Spokane and Portland over the Spokane, Portland and Seattle Railroad, familiarly known as the "North Bank." Between Portland and Pasco the maximum grade is two feet in a thousand, and between Pasco and Spokane four feet. The maximum curvature is three degrees. The road passes through a country of magnificent scenery along the Snake and Columbia rivers, and of great fertility, more than fifty million bushels of wheat being produced annually in the river-basins between the Cascade Range on the west and the Bitter Root mountains on the east.

CHRISTIAN SCIENCE SENTINEL

"WHAT I SAY UNTO YOU, I SAY UNTO ALL — WATCH" JESUS

RESISTING EVIL.

CLARENCE W. CHADWICK.

A SUBTLE argument which often presents itself to the Christian Scientist is to the effect that it is best not to resist certain phases of evil for fear of resorting to human will-power. A careful analysis of this thought will reveal the fact that the certain phases of evil referred to are not usually classified under the heading of sickness or disease, but are more likely to be some erroneous or sinful habit, the indulgence of which is supposed to be pleasurable rather than painful.

The teaching of Holy Writ is, "Resist the devil, and he will flee from you;" and our text-book says plainly: "Rise in the strength of Spirit to resist all that is unlike good;" "Resist evil—error of every sort—and it will flee from you" (Science and Health, pp. 393, 403). None of these passages conflict with Jesus' admonition to his followers that they "resist not evil." This passage is plainly a warning against the attempt to combat evil with evil, under the Mosaic law of "an eye for an eye, and a tooth for a tooth." Jesus did not teach that certain arguments of evil were to be ignored and others denied; nor does Christian Science teach this. It is one's love of the good that enables him to resist evil intelligently; his love for evil will dispose him to ignore the task of resisting that which is supposed to afford him pleasure. To "rise in the strength of Spirit" is the problem that confronts the Christian warrior, if he would successfully cope with evil and overcome its false pretensions.

The marvelous achievements of Christian Science are due wholy to the fact that its students are rising above the prevailing belief that human will-force, so called, can accomplish anything for the betterment of mankind. They are rising in thought to find out that, if God is omnipotence, power must be and is divine, not human. It is this recognition of truth which enables one to say with the Master, "I can of mine own self do nothing," and to probe fearlessly into the very depths of evil thinking, with the understanding that it is God who worketh in him "both to will and to do of his good pleasure."

The Master's admonition was to "watch" unceasingly the trend of one's thoughts. If this is done, all that is unlike God, good, must be resisted in consciousness; his habitation of thought must be kept clear from every evil suggestion. One's love for and understanding of the good alone can qualify him for this work. If he has faith in evil, he is bound to indulge evil in one form or another; and while in this condition of thought he will be found arguing for evil instead of against it. There is just one result that can come to those who insist upon any compromise whatsoever with evil; namely, that "if a house be divided against itself, that house cannot stand." So long as evil is looked upon as a God-permitted entity or power, existing for some wise purpose, it is not and cannot be resisted or overcome. Only as good is recognized to be the sole reality of being, and therefore all inclusive, will humanity begin to contend intelligently and scientifically against the suppositional belief in evil.

The Christian world for centuries has been dealing with evil in the belief that it is one of the most potent and real factors in human existence. It has been unwilling to classify it as human nothingness, because good has not been understood as the great and only somethingness of being. Christian Science has come to reeinstate the demonstration of the healing and redemptive Principle of the Christ, which reveals the all-inclusiveness of God and His perfect spiritual creation, and the consequent nothingness of evil. Hence the importance of understanding this healing Principle and of learning how to live in accord with its spiritual and eternal demands. Not until one has experienced Truth's healing effect in mind and body can he really begin to resist evil in the way that Jesus did.

One of the greatest mistakes of the ages has been the attempt to resist evil with evil's own weapons. Christian Science alone corrects this mistake through a practical explanation of what constitutes omnipotence, the one infinite power, which is God, good, acting through spiritual law and not material. This infinite power is found in Science to be the one Mind,—that Mind which was in Christ Jesus, that Mind which neither thinks, knows, permits, nor includes evil. This Mind is not expressed through anything that is finite, mutable, or mortal, any more than a knowledge of what is pure and holy can be expressed through the consciousness of impurity and sin. Only as one adopts a purely Christian basis of thought and action can he begin to utilize the power of Mind to resist and to overcome evil with good. Human selfishness, under whatever guise it may appear, cannot enter into the activities of the one Mind. It is Immanuel, "God with us," who can do, act, perform, or bring to pass. Man reflects the power, wisdom, and activity of Mind, and without this Mind he can do nothing. It is the province of every true Christian to know the truth about God and man, so that he may "be endued with power from on high;" then he can begin to resist evil intelligently. One of the first signs of this Christlike activity will be the healing of sickness and sin. Evil habits will be conquered, false appetites destroyed, and every taint of unrighteousness will give way to an all-absorbing, all-inclusive, all-satisfying love of good.

At this point both the friendly onlooker as well as the harsh critic will remind us that there are many in the ranks of Christian Science who have not attained to the standard of perfection demanded by Christ Jesus, and this criticism should stimulate all Christian Scientists to higher and holier thought and effort. While the goal of perfection is not reached in a day, the Christian warrior must not forget that the divine law of progress demands a constant "Forward, march!" If there are certain pleasurable beliefs or habits, the indulgence of which tends to hold thought in bondage to the self-destroying belief of life in matter, the sooner such habits are resisted scientifically, the sooner will friend and foe alike find nothing to criticize but everything to emulate in the lives of Christian Scientists.

Copyright, 1909, by Mary Baker Eddy.

Digitized by Google

An experience in practice will possibly encourage some who may be slaves to certain habits and who, in the allurement of false enjoyment therein, are resting in a state of non resistance, consoling themselves with the thought that Science will sometime overcome these habits for them. A man who for years had been addicted to the tobacco habit and who had been reading Christian Science literature for quite a while, had been advised not to resist the inclination to indulge his false appetite, but to continue the use of the filthy weed just as long as he cared to. He was treated for weeks by a practitioner without any perceptible change, when he felt led to seek further counsel. This time he was advised to make use of what he already knew of Christian Science, and when he felt inclined to smoke, to "resist the temptation to believe in matter as intelligent, as having sensation or power" (Science and Health, p. 218). He obeyed, and in a short time was entirely healed. He had caught a glimpse of the eternal fact that God's man never has the desire or temptation to use tobacco in any form; that corporeal sense alone is addicted to such habits.

In the case of so-called pleasure-giving propensities, there is often too much leaning on the side of "suffer it to be so now" and not sufficient inclination to resist the indulgence of the belief in intelligent matter. If God endows men with intelligence and power, they must be found exercising such faculties in the overcoming of every erroneous habit which would hold thought in matter and away from God. If they would ever understand the Science of being, they must learn to be even more diligent in resisting the belief of pleasure in matter than they are to protest against the belief of pain in matter. If the heart is inclined to resist the one and not the other, why repeat with the lips, "There is no life, truth, intelligence, nor substance in matter" (Science and Health, p. 468)?

PROGRESS WITHOUT SUFFERING.

VIOLET KER SEYMER.

ASSUMING that a Christian Scientist has reached the point where he daily strives after reformation and complete redemption from sin, granted that he is willing to make every sacrifice for holiness, and to subordinate every lesser desire to the supreme one of working out his salvation, should this warfare seem to be grievous and discouraging? Our text-book tells us that "progress takes off human shackles," that "progress is the law of God," and that "there should be painless progress" (Science and Health, pp. 250, 233, 224). It is significant that our Leader, who is ever speaking the word in season, should be withdrawing, here and there, certain expressions indicative of painful progress such as formerly found a place in our text-book. As far back as 1800, when "Miscellaneous Writings" was published, Mrs. Eddy tells us that she sought to remove "the pioneer signs and ensigns of war, and to retain at this date the privileged armaments of peace" (Pref., p. xii.).

Even while students of Christian Science are faithfully resisting the claims of evil and compelling them to flee before Truth, perhaps some gloomy theological superstition yet suggests to them that the effort is irksome, because it is seemingly so difficult to do right, and so easy to do wrong. This is a topsyturvy suggestion, for if such were indeed God's plan, the reward of virtue would be perpetual effort, and heaven and hell would seem to be forever allied, instead of forever separated. If the theory that righteousness involves suffering were accepted as true, and were pushed to its logical conclusion, it would be found that God Himself in causing us to do right is exposing us to suffering, and that He Himself is the greatest sufferer of all! Since no penalty attaches to God for right-doing, none attaches to man either. It is resistance to the right which causes mortals to suffer, as when selfishness seems to make a kind action labored, whereas it should be spontaneous.

Until Christian Science showed us that evil alone punishes the evil-doer, in so far as it deprives him of man's birthright of sinless joy, we believed God to be the castigator, quite forgetting that His ideas have never fallen into temptation nor needed correction. The evil one sometimes whispers to faithful Christians that, since they are ceasing to suffer from wrong-doing, they will now suffer on account of right-doing. Suffering seems to be the evil one's way of preaching the gospel, but this fresh plea is only another attempt to delude mortals into placing God's seal and sanction upon discord. The spiritual plan of creation, as revealed in our Leader's inspired analysis of the book of Genesis, provides for no suffering, because it includes no evil whatever.

The theological superstitions and serpentine suggestions which crucified Jesus, and which seek to impose martyrdom upon his consecrated followers, have had their day, and are henceforth rendered unavailing by the science of protection which attends the revelation and practice of Christian Science. As now understood, unfettered righteousness and peace go hand in hand, and the mental activity that knows enough to reflect the good that is here rather than persistently battle with the evil that is nowhere, glorifies God and is eminently progressive. We are especially impressed with the fact that Jacob, when he wrestled with error, was alone. Is it not a joyful thought that because all are in the omnipresence of good, none are ever in the presence of enemies? The fulfilment of the ancient prophecy, "Thou shalt not see evil any more," is fast approaching; but this is no warrant for the previous fatal blindness to the claims of evil which rendered mortals oblivious of danger and victimized them at every turn; rather does it foretell that expanding realization of God's nature and plan before which the deluded belief in evil shrinks like a mental dwarf, whom we know better than to fear or to foster any longer.

THANKFULNESS.

A. B. FICHTER.

THE expressions of gratitude so frequently heard at our testimonial meetings are perhaps, for outsiders, the most unusual part of the Christian Science services. It is quite a wonderful experience to find a set of people who joyfully, like children, show and share with others their good things, testify to the receiving of great benefits, and express their gratitude, sometimes so fervently that the visitor is astonished. But it is not so strange after all that Christian Scientists should be grateful, because the benefits they have received are in many instances equal to those which the contemporaries of Jesus experienced and enjoyed, and which in ordinary parlance would be called miracles. The remembrance of such a deliverance would surely bring the beneficiary to his feet, over and over again, "in wonder, love, and praise."

Besides many wonderful physical healings, however, Christian Scientists have more vital reasons for being grateful. Invariably they testify to the spiritual uplifting which the new light on the Scriptures has wrought in their hearts; where formerly they could only by a suppression of natural impulses bring themselves to love and worship an inscrutable Deity, they have now learned to plead constantly the allness of Love, and in that way to prove to their entire satisfaction the truth and reliability of the Bible.

Every uplifting thought that blesses our brother blesses us, and should make us grateful. Every good thing that comes to another proves to us anew the healing truth and the truth of healing, and it makes us thankful. The lines

Digitized by Google

upon lines of enlightened thought from the pens of consecrated workers, and the grateful acknowledgment of blessings received, which fill our literature, increase our gratitude, because through the strength of others we are strengthened and encouraged to increased activity and love. Christian Scientists should sometimes look back to where they were before the truth found them,—what used to be their daily experiences, what problems, what perplexities, what inharmony, what self-pity and self-condemnation,—and in so doing they would find renewed reasons for fervent gratitude.

When we think that all this was made possible and has come to us through the fearless, unselfish, and self-sacrificing life and work of our revered Leader, and still comes to us daily in the inspiring, uplifting, liberating words from her consecrated pen, then we understand why Christian Scientists are ever grateful to Mrs. Eddy for her work for humanity, and that they praise God for the light that has thus come to them. One of the chief reasons for this gratitude is the very fact that we are continually reminded in Christian Science to be grateful, reminded how Jesus before every one of his demonstrations gave thanks, and that all through the Gospels and Epistles gratitude is enjoined as one of the foremost fruits of the Spirit.

To every worker in the field, with eyes to see, it must be plain that where a spontaneous gratitude wells up in the heart in response to benefits received in Christian Science, the unfoldment and the healing is generally much more marked. I, for one, am glad to acknowledge these benefits, for before this experience I hardly knew how to be grateful, and I consider the Christian Science demand for grateful recognition, for continued gratitude, for the cultivation of a sense of unreserved thankfulness and the frequent public expression of this acknowledgment, not the least among the many most uplifting teachings of Christian Science.

LOVE AND LIGHT.

ADIN E. BALLOU.

PERHAPS no part of the message of Christian Science is more misunderstood than is its teaching concerning the unreality of evil. This is particularly the case in the criticisms made by those of the so-called orthodox churches, yet it is in the same Scriptures which are loved and studied by all Christian denominations that the students of Christian Science find full and complete foundation for all that Mrs. Eddy teaches on this point.

If all things are of and from God, if "in him we live, and move, and have our being," it follows that when we recognize evil of any sort as a reality, and give it power, we are imputing evil to a creator whom Jesus and his disciples, including Paul, declared to be an ever-present perfect Father. We have the key to the problem when we grasp the great truth that the only reality and power evil can have in our daily life is that which mortal sense gives it by its own erroneous thinking. John declared that the message of Christ Jesus was, "God is light, and in him is no darkness at all;" and when we have learned that there is no occasion of stumbling to the real man, who by reflecting Love walks in this light, we have learned how to keep evil from blocking our path or barring our access to ever-present good.

No one will deny that in the three years the Master was doing his wonderful work, every manifestation of evil, however real it may have seemed to those who struggled in its grasp, was destroyed by the light and power of his spiritual understanding. We know, however, that his unchanging consciousness of the impotence of evil before the expression of perfect Love was often misunderstood, even by his disciples. In the eleventh chapter of John we read that when he announced his intention of going into Judea again, to answer the call of the sisters of Lazarus, his disciples sought to dissuade him, and gave reality and power to evil by fearing for his life. Then Jesus rebuked them in that short but limpid parable: "Are there not twelve hours in the day? If any man walk in the day, he stumbleth not, because he seeth the light of this world. But if a man walk in the night, he stumbleth, because there is no light in him."

Ah, yes, the Master walked with his face turned always to the light, and the presence and power of God, divine Mind, were to him the only reality. With such illuminating sentences as, "Be ye therefore perfect, even as your Father which is in heaven is perfect;" "Let your light so shine before men, that they may see your good works, and glorify your Father which is in heaven," he sought to open the spiritual understanding of his hearers and convince them that, with the infinite resources of Life and Truth and Love to draw upon, the works of the devil (evil) could be destroyed. In perfect accord with these teachings, Mrs. Eddy says (Science and Health, p. 228): "There is no power apart from God. Omnipotence has all-power, and to acknowledge any other power is to dishonor God." And again, on page 192, she gives that great basic statement in four words, "Evil is not power."

John, with his clear understanding of the teaching of Jesus, says in his first epistle: "He that saith he abideth in him ought himself also so to walk, even as he walked. . . . because the darkness is past, and the true light now shineth." Those whom the message of Christian Science has reached today with its power and joy, know indeed that the light does shine. Daily they are learning to overcome evil, and daily they are learning to reflect Love. Thus with increasing hope and joy they strive for the perfect knowledge of the perfect man, to whom all is light, and that light is Love.

"THY WILL BE DONE."

WILLIAM LLOYD.

WE have been accustomed to regard the pathetic resignation of the human will to the divine which Jesus expressed in the garden of Gethsemane, as a phase of thought most difficult to enter into, but upon giving the matter serious consideration, we find this, like many of our other preconceived ideas, to be an entirely false concept of the prayer, that instead of being the most exacting, it is really the easiest and most natural petition to offer. Let any of us of middle age look back over the past twenty or twenty-five years and ask, Of what value has been our own guidance or will? Speaking for myself I can say that some of the very things that seemed misfortunes—things I would have prevented if I possibly could—have turned out to be blessings; while some I have striven with all my might to attain, and have gained, proved worthless, and I lived to regret my seeming success in these directions. If this be true with all of us, as I believe it is, then we can place no reliance on our own will and guidance—and what is left us? What but the divine will and guidance! Then comes the question, What kind of a God do we believe in?

Our former concept of God as an enlarged human personality, not nearly so active as that other supposed personality, Satan, whose activities He apparently interfered with but little,—this concept did not encourage us to say, "Thy will be done." Such a God—one day angry with us, another day pleased; supposed to be all powerful, yet creating or at least permitting evil—seemed to possess a will as little to be relied upon as our own, and I do not now wonder that we seriously doubted the possibility of offering this prayer with sincerity.

But when Christian Science discovers to us the real

Digitized by Google

God, then our concept of this supplication to the Almighty is entirely altered, for we find an unchanging God, "with whom is no variableness, neither shadow of turning." We find that God is not a person in the human sense, but is infinite Mind; that this Mind is also intelligence, wisdom, Love,—all pervading,—"in whom," as St. Paul told the Athenians, "we live, and move, and have our being;" that this God has no consciousness of evil, has never sent sorrow or pain to any of His children; that all sorrow and pain are the direct and inevitable sequence of broken law—broken by mortals through fear, ignorance, or sin. So, given infinite Mind—at one and the same time intelligence, wisdom, and Love,—unchangeable and ever-present, we find that we cannot go where He is not, nor get outside of His wisdom and care. Then, like tired children, we lay down our poor fallible human wills, and gratefully and naturally say, "Thy will be done," and at last we understand Jesus' saying, "Come unto me, all ye that labor and are heavy laden, and I will give you rest."

Finally, having found our own wills to be quite unreliable and God's will entirely trustworthy, I submit that it is but common sense to go forth each day with implicit trust in God, doing that day's work as it comes, cheerfully, without fear, and as well as it can be done, knowing that God can and will order and direct all things so that they will "work together for good to them that love God."

"NO CONDEMNATION."

G. HARRIETTE BLAKE.

IT is St. Paul who says, "There is therefore now no condemnation to them which are in Christ Jesus." The Master had said, before this, "The Father judgeth no man, but hath committed all judgment unto the Son." The teaching of Christian Science gives a very beautiful meaning to these quotations. The impersonal Christ, the stature of the perfect man, being our standard, "there is . . . no condemnation to them which are in Christ Jesus, who walk not after the flesh, but after the Spirit,"—to those, in other words, whose lives measure up to the divine standard. In so far as we fall short of it, the standard itself, while remaining firmly in its place, becomes the judge, pointing sternly, implacably to the distance between our achievement and the perfect requirement. "The Father judgeth no man, but hath committed all judgment unto the Son."

Jesus the Christ, after trials immmerable, attained the goal of perfect demonstration, and for sorrowing humanity's comfort and encouragement he said, "He that believeth on me, the works that I do shall he do also; . . . because I go unto my Father." When our thought rises to the spiritual altitude of the Father, we also shall attain to the standard of the perfect man. In the meantime we need not be discouraged by our failures, nor become utterly overwhelmed by human condemnation, knowing within ourselves, as no one else can know, how earnestly we are working and how sincerely we desire to be faithful until the day when we shall "all come in the unity of the faith, and of the knowledge of the Son of God, unto a perfect man, unto the measure of the stature of the fulness of Christ."

Not in the blare of trumpets are the fruits of victory bought,
Not midst the people's plaudits is the nation's welfare wrought,
Not in the workshop's turmoil is the wireless wonder thought,
Not in the gay world's glitter are the gleams of Spirit caught,
But in the secret closet, where immortal Truth is sought.

EUPHEMIA HOLDEN.

SELECTED ARTICLES.

[From an editorial in *San Francisco* (Cal.) *Town Talk.*]

We are not authorized to speak for Christian Science. We are not versed in its doctrines, but from what little we do know of them we are convinced that the critic's acquaintance with them is so distant that he is, to say the least, imprudent in affecting an intimate familiarity. Apparently he assumes that the doctrine of the influence of the mind and the will over matter is the basis of Christian Science. Now as a matter of fact the basis of Christian Science is faith in God, which after all was the basis of original Christianity.

[Prof. J. R. Mosley in *Augusta* (Ga.) *Herald.*]

Christian Science teaches that the veil of illusion which to mortal sense seems to obscure God and His perfect creation has been woven by ignorance, materiality, and sinfulness, and will be removed and is being removed by the spiritual appearing of Christ. In other words, Christ is seen to be the ideal truth about God, man, and the universe, which removes the illusions and appearances of sin, sickness, materiality, and death, and which reveals the new (real) heavens, the new (real) earth, and the new (real) man. The reason that he does not come more abundantly and universally through the Spirit of truth, or the Comforter, is because we are not more ready to receive him.

Christian Science practice, from the highest point of view, is simply the welcoming of the light, or the Christ-idea and spirit that reveals God as present and as All-in-all, and that casts out evil as unreal. Viewed in terms of active response on our part, it is the effort to keep the heart so full of love, the mind so full of truth, and the life so full of good deeds that there is no room left for evil. A Christian Science prayer or treatment is the desiring, the believing that we receive, the accepting, and the rejoicing in the good that God is always more ready to give than we are to receive. Christian Scientists naturally do not believe in hypnotic suggestion nor any mesmeric control; neither do they rely upon the subconscious to reform and heal the conscious, but know that the divine Mind governs both the conscious and the so-called subconscious mind.

[From an editorial in *Daily Standard*, Kingston, Ont.]

Christian Science is not a fad; it is not chance. It is a great religious movement which, whether we agree with it in all respects, we must admit has been a wonderful agency for good and for the uplifting of humanity. It numbers its adherents not alone by the hundreds, nor yet by the thousands. In the principal cities of the United States their church properties are of the finest in the land. As for the Scientists themselves they are essentially a religious people. They read the Bible and also Science and Health every day of their lives, for that in fact is a part of their religion. They believe absolutely in God and in Jesus, and in God's omnipresence and omnipotence. They believe in the law of love, of brotherhood, of humanity, of peace on earth, good will to men. To those who care to read her book, the Founder of this religion has offered it "in the spirit of Christ's charity" (Science and Health, Pref., p. xii.). There is no room for sneering at that; neither is there justification for sneers.

When Unitarians, Presbyterians, Episcopalians, and other religious denominations seek incorporation, we do not question nor quarrel with their beliefs, though we may differ with them. We are satisfied that they are Christian, and that in their own way they will contribute to the

Digitized by Google

betterment of humanity. To the Christian Scientists we can afford to be no less generous. Their religion has come to stay.

[Frederick Dixon in the *Times*, London, England.]

In a review, under the heading "A Medieval Journey to Jerusalem," in your issue of late date, there is a statement of the Christian Science teaching with respect to evil which is so crude as to be positively misleading. In these circumstances you will, I am sure, permit me to explain briefly what this teaching really is. In a lecture on "Scientific Materialism," delivered some years ago before the Association of Natural Philosophy at Lubeck, Professor Ostwald made the statement that matter was unreal. Shorn of its context this pronouncement might be, and actually has been, distorted to imply that the lecturer had affirmed the non-existence of matter as a phenomenon. The world, however, is sufficiently acquainted with the doctrines of natural science to reject such a perversion as a travesty of the lecturer's meaning. Unfortunately, the world is not yet sufficiently acquainted with the doctrines of Christian Science to reject as travesties the numerous perversions of that teaching which annually stream through the press.

From one end to the other of her book, Science and Health, Mrs. Eddy has made the teaching of Christian Science with respect to evil so clear that there is really no excuse for misunderstanding it. She has shown that evil is simply the negation of good, and has just as little actual existence and power as any other negation of truth. She has never suggested that it did not make a claim to activity in the human consciousness; she has, on the contrary, shown that it is only in proportion to our spiritual progress that this activity is fully unveiled to us. She has given no excuse for the reproach that it is possible to indulge in evil under the assumption of its unreality; she has, on the contrary, exposed the rank dishonesty of such reasoning. But this she has done: she has refused to admit that there is any "jot" of truth in the lie called evil, or to concede any "tittle" of power to that which is the denial of omnipotent good. God made all that was made, and God is good, and Jesus said, "A good tree cannot bring forth evil fruit, neither can a corrupt tree bring forth good fruit." The sooner humanity begins to realize the profoundness of that great truth, the sooner will it experience the joy of that other saying of the Saviour, "The kingdom of God is within you."

[From an editorial in *San Francisco* (Cal.) *Chronicle*.]

It may be that men ought to flock to the churches to hear weekly expositions of abstract Christian doctrine, but as a matter of fact they won't. There have been periods in the world's history when the people of certain races were completely absorbed in the niceties of Christian doctrine and took keen delight in hair-splitting differentiation of truth from heresy, a feeling and a practice which destroyed the unity of the Christian church. Those days have passed and will not return. The modern church is built up only as the church of Christ was built up—by healing the sick, the dispensation of charity, the inculcation of the moral virtues, respect for authority, and faith in the benevolence and wisdom of a Supreme Being. And in so far as the churches follow the plans of their Master, and only in so far, is there any approach to Christian unity and an increase of Christian influence.

[Frederic C. Hotchkiss in *Middletown* (Conn.) *Penny Press*.]

Our critic states that Christian Science is illogical. Among its adherents are many men and women of broad thought and culture, who, in their study of the Christian Science text-book, find its teachings eminently logical. It states, as its premise, the omnipotence of a God who is good, Spirit, the only creator, and it accepts without flinching the conclusions from this premise. Christian Science works according to Principle, and the results prove it a religion of practicality and common sense. As it is based on the omnipotence of God, it does not limit His healing power to "nervous disorders." Jesus worked on this basis, and he healed organic as well as functional diseases.

Mrs. Eddy's attitude toward her followers is not that of a "monarch." Although the pioneer movements of the church have depended on her steadfast endeavor, she has always put the work of Christian Science into the hands of her students as fast as they were able to carry it. She has taught the church to work for Principle, and not for any personality.

[Lindley Fogg in *Akron* (O.) *Times*.]

In his argument the clerical critic says, "At length Christian Science came. It is associated with a great human interest. Exemption from limitation, pain, sorrow, defeat; freedom from the conditions of finite existence, life liberated from mortal restraint, buoyant and full in the might of the eternal, is surely a great aspiration. Who is there who does not sympathize with it?" He follows this with the suggestion that Christian Science attempts to secure these desirable ends through a species of intoxication which makes one "oblivious to the restraints of finite existence." That these good results are secured through Christian Science is proved by thousands of people who have made a thorough study of the subject, and who will unite in saying that its conclusions are the logical result of right reasoning from the plain statements contained in the Bible as to the infinite goodness and power of God, and the admonitions and commands of Jesus to his followers.

There has been a constant effort among philosophers and deep thinkers of all ages to free mankind from the depressing tendencies of finite existence. The prophets of olden times looked for the coming of the Christ who would make plain the way of salvation from the evils of the world. When he came, in fulfilment of prophecy, he was "despised and rejected of men." The scribes and Pharisees would not accept him because his teaching was not in accord with their preconceived ideas, but demanded a more absolute reliance upon spiritual power than they would concede. The tendency of the advanced religious thought of the world today is toward a more absolute acceptance of all the commands of the Master, and to remember that he not only told his followers to "preach the gospel," but also to "heal the sick."

[From an editorial in *Ocean Park* (Cal.) *Journal*.]

It is a poor form of reasoning to attack one's belief and characterize it as "blasphemous," "idiotic," "hysterical," and an insult to the intelligence of reasoning people, because that peculiar form may not agree with ours. The reverend gentleman and all of his kind will awake to the realization that things are not like what they used to be a century ago, when the congregation would blindly accept every statement made by the man in the pulpit as something so overwhelmingly true and sacred that it was an unpardonable sin to act or even think differently. Whether the cult [Christian Science] be scientific or Christlike, it is gentle, charitable, patient, and apparently full of that tender belief so meekly expounded by him who went among the lowly and unrighteous and sought to do good by example instead of expounding theoretical creeds and loudly denouncing other forms of worship.

Digitized by Google

[Alfred Farlow in *New Bedford* (Mass.) *Standard.*]

The gentleman does not state whether he accepts Mrs. Eddy's definition of God, but I sincerely hope that he does, for as a matter of fact Mrs. Eddy's definition is in exact accord with the teaching of Jesus Christ. The Master said on one occasion, "God is a Spirit;" on another occasion, that God alone is good; and one of his disciples declared "God is love;" another, "The Spirit is truth." Putting all these definitions together, we have the Biblical teaching that God is Spirit, Love, Truth, good. Upon this as a foundation, Mrs. Eddy has builded the entire structure of Christian Science. We are therefore not a little surprised that any theologian should consider such teaching "a joke." Since the teaching of Christian Science is founded upon the teaching of our Lord, it appears that Mrs. Eddy is in very good company.

In her research Mrs. Eddy has discovered the Science of Christianity which the Bible includes, and has thus made God's Word more practical. That she has succeeded is answered by the increased harmony and goodness in the lives of those who have been fortunate enough to incorporate the teaching of Christian Science into their experiences. While Christian Science agrees with the Scriptural teaching that sin and disease are the products of the adversary of good, that is, an erroneous sense of creator and creation, and that these are no part of the divine economy, they do not ignore the evils and discords of life, but recognize that evil must be dealt with and overcome in a scientific and Christian manner.

[James Phelps in the *Menomonie* (Wis.) *Times.*]

Our critic's attempt to explain why so many people have espoused Christian Science evokes a smile when one knows the class of men and women who have been attracted to it. Clergymen, physicians, lawyers, judges, editors, educators, authors, artists, and level-headed business men by the thousands are enrolled under its banner of purity and love. Lawyers and judges are particularly well fitted by their training to reason closely and weigh evidence carefully, yet this profession is, perhaps, better represented than any other. I do not remember of having read a criticism of our faith from a lawyer of this great commonwealth, and very few indeed in the entire world.

Christian Science teaches the permanence of joy, peace, bliss, harmony, when sought in the spiritual; it causes the cruel person to become merciful. It emphasizes and gives us a reasonable understanding of St. John's words: "Now are we the sons of God, and it doth not yet appear what we shall be: but we know that, when he shall appear, we shall be like him; for we shall see him as he is." When this mental state is achieved, when the truth shall appear in our consciousness, we shall not grow old, decay and die, nor lose our friends.

Christ Jesus was the first in history to proclaim an absolutely good God and His tender relationship to man. The old pagans conceived of many gods—some good, others bad; of the latter they were greatly in fear. The Hebrew concept of one God, who loved His chosen people and hated all others,—that is, a God who is partly good and partly bad, was an advance, doubtless, but it left much to be desired; and this was supplied by the Master. Later, his professed followers fell away from this pure concept of Deity, as one too pure to behold evil, and who could not look on iniquity, but this concept has been reestablished by Mrs. Eddy, and for this the world owes her everlasting gratitude. Gratitude and love she is receiving from an ever-increasing host of men and women who have been ransomed from enslaving fear, debasing vice, and desolating sin; from skepticism, from agnosticism, from atheism.

[George Shaw Cook in *Oak Leaves*, Oak Park, Ill.]

The Mind referred to in Christian Science is not the finite human mind which is supposed to have its abiding-place in the brain of mortal man, but the infinite, divine Mind—that Mind "which was also in Christ Jesus." It was this Mind, which is God, divine good, to which Christ Jesus referred when he said, "The Father that dwelleth in me, he doeth the works." Christian Scientists believe that this same universal Father, the same infinite, divine intelligence or Mind which "was also in Christ Jesus," is present today and is potent today just as it was twenty centuries ago. It is no reasonable argument against the sanity of this belief to say that Christian Scientists do not always succeed in healing their cases and that they do not always heal their patients immediately. No Christian Scientist considers that he has yet attained sufficient spirituality and goodness to heal as Jesus did,—instantaneously and infallibly,—although he knows that it will some time be possible, for Jesus himself said, "He that believeth on me, the works that I do shall he do also; and greater works than these shall he do." If Jesus did not mean what he said, it remains for some one to explain what he did mean by this declaration.

My critic complains that in my last letter I did not squarely "meet the issues raised between Christian Science and common Christianity," but that I allowed my pen "to wander over the familiar messages of historic Christianity from the beginning." Permit me to say that a writer on Christian Science could not well do otherwise, for the simple reason that Christian Science is "common Christianity," if by that is meant the primitive Christianity of Jesus and the apostles. Mrs. Eddy does not claim to have originated, invented, or created anything in giving Christian Science to the world, but simply to have discovered, revealed, and restored to humanity that which has for centuries, to a greater or less extent, been obscured by materiality.

[J. V. Dittemore in *New York Globe.*]

Christian Science declares that the self which Jesus urged his followers to deny was the material self, the "old man" referred to by Paul. With this interpretation, abstinence becomes something more deeply searching, more comprehensive than a mere fleshly penance. Only through unceasing prayer can we approach the standard of righteousness demanded by the Master. Not at one time more than another is it necessary to strive for that Mind "which was also in Christ Jesus," for only by bringing forth the "fruits" of Christianity continually can we prove our right to be called his true disciples.

The mission of the Christian religion is to save men from evil, to disclose the beauty of holiness, and to make goodness a practical and every-day possibility. This was the mission of the Founder of the Christian religion, who said, "The Son of man is come to seek and to save that which was lost." Jesus' theology was in advance of the Mosaic law. He preached the gospel of divine Love, which heals and saves. The Mosaic law was a code of condemnation, and St. Paul saw that there was "no condemnation to them that are in Christ Jesus." It is this rejuvenating doctrine of divine compassion and love which Christian Science is preaching today. Under its illuminating instruction men are making a consistent and cheerful effort to recognize themselves in the image and likeness of God. Under this benign teaching of our Lord, to which Christian Science calls attention, men are learning that it is worth while to be good, to be Godlike, not because they are in fear of a penalty for wrong-doing, but because they have what Mrs. Eddy calls "an affection for good according to Science" (Science and Health, p. 327). The gospel of Jesus Christ shows the way by which we are to work out our own salvation. Fasting to the Christian Scientist is more

Digitized by Google

a mental than a material process; it is an aspiration rather than an effort at repression. To fast is to deny the appeal of materiality; it means entrance into "the secret place of the most High."

When Christian Science discloses to its students the substance of Mind, the reality of being in God, the permanence and glory of spiritual existence, self-surrender is no task. To deny self, according to Jesus' theology, was not to deny one's existence, nor yet did it mean to give up any good thing. With the understanding supplied by Christian Science it is not so difficult to deny the self of material existence, because we are learning that this denial entails no loss, but means only the discovery that man is a son of God.

[Gray Montgomery in *Denver* (Col.) *Post.*]

It is well known that Christian Science is aiding in the purification of the world from evil. Christian Science presents only the teachings of Christ Jesus, which expound a scientific method of overcoming sin and sickness. It thus presents a true solution of social problems. Christian Science is true Science, because it is of God,—a revelation from God,—giving to the world a higher and better understanding of Truth than humanity has ever before been willing or ready to comprehend. While it recognizes that scholarship cannot take the place of spirituality, Christian Science endorses education to the fullest extent. Mrs. Eddy says, "Observation, invention, study, and original thought are expansive and should promote the growth of mortal mind out of itself, out of all that is mortal. It is the tangled barbarisms of learning which we deplore,—the mere dogma, the speculative theory, the nauseous fiction" (Science and Health, p. 195).

Christian Science teaches that God and His manifestations constitute all reality; that God is Love and governs with supreme wisdom. The real man is perfect and spiritual, God's image and likeness, as recorded in the first chapter of Genesis; but sinning mortal man is material, and is not this likeness. Mortals can get rid of materiality only by ceasing to sin and by living in harmony with God, the creator of all good. Christian Scientists are taught always and under every circumstance to overcome evil with good, to express toward others only kindness, love, and good will. They are instructed to love all, without regard to religion, profession, or condition.

[W. E. Brown in the *Los Angeles* (Cal.) *Herald.*]

In a late issue of the *Herald* a critic thinks Christian Science is a refuge for the intellectually lazy. Christian Science does not permit any one to escape the "obligation to take hold for the righting of material wrongs." On the contrary, this is the very mission of Christian Science, and it rights the wrongs in a most effectual manner by overcoming and destroying the erroneous mental conditions which cause them.

When all are truly Christian Scientists, all will do right and there will be no wrongs to overcome. Christian Science believes the practice of the Golden Rule to be the most efficacious method extant for the remedying of existing wrongs. If those who feel inclined to criticize Christian Science will be fair and just enough to become acquainted with what Christian Science really is, much of what is now voiced against it would be left unsaid.

A man's happiness and success in life will depend not so much upon what he has, or upon what position he occupies, as upon what he is and the heart he carries into his position.—PROF. S. J. WILSON.

AMONG THE CHURCHES.

ONTARIO, CAL.

The Christian Science society of Ontario received its articles of incorporation, under the laws of the state of California, on March 8, and thereby takes its place among the local religious bodies, on precisely the same footing as the others. It was on July 5, 1895, that a Christian Science Bible class, consisting of four members, commenced to meet at a private house. For three years these meetings were held at the homes of the members, and in July, 1898, the Scientists rented Odd Fellows Hall. In October, 1902, a branch of this society was established at Upland; that is to say, some members of the Ontario society organized in the neighboring community, which body developed into the present Upland society. In July, 1908, the Ontario Scientists organized as a Christian Science society, and the recent incorporation was the next important step in the course of this progressive body.

The society holds, free of all incumbrance, the deed of a lot 48 x 177 feet, on West B street, and contemplates, during the year, the erection of a church edifice which shall contain rooms in which may be held their Sunday and their Wednesday evening meetings, and also a reading-room open to the public.—*Ontario Record.*

FLORENCE, COL.

Easter Sunday [April 11] marked a memorable day for the Christian Scientists of this city, the dedicatory service of their church edifice being held on that day. Services were held at 10.45 A.M., 3 and 7.45 P.M. A number of out-of-town Scientists shared the enjoyment of the occasion. Special features preceding the Sunday Lesson-Sermon were the dedicatory address by the First Reader of the church, and its history by the Second Reader; also telegrams and letters of congratulation from Scientists in the state were received and read.

While services have been held in the church prior to the dedication, it is a custom of Christian Scientists never to dedicate a church until it is complete and free from debt. The handsome little building is now complete at a cost of nearly $6,000, including furnishings.—*Ex-Parte.*

MILL VALLEY, CAL.

Members of the Christian Science church at Mill Valley have decided to build a church of their own. The site chosen for the new house of worship is the corner of Lovell and Olive avenues. The proposed construction of a church has been under consideration for some time, and sufficient money has already been subscribed to defray the expenses of buying the property and erecting the building. It has been decided to construct the edifice along the lines of a rough artistic bungalow. It is planned to have the building completed this summer.—*San Francisco Call.*

ALAMEDA, CAL.

The Christian Scientists of Alameda have accepted plans for a new church building, to be erected on a site at the southwest corner of Central avenue and Walnut street. Construction is to be commenced without delay. The plans call for a building of the mission style of architecture. It is to have a seating capacity of eight hundred, and will be built at a cost of $25,000.—*San Francisco Chronicle.*

SHELDON, IA.

The members of the Christian Science church of Sheldon have purchased the Dr. Gilmour property, and it is to be fitted up for church and reading-room purposes.

Register-Leader, Des Moines, Ia.

CHRISTIAN SCIENCE SENTINEL

EDITORIAL

MRS. EDDY TAKES NO PATIENTS.

The author of the Christian Science text-book takes no patients, and reads no letters on disease, distress, or error of any kind. Reliable news concerning Mrs. Eddy will be found in the Christian Science publications.

THE BUILDING FUND.

WE are pleased to announce that the fund for the enlarging of the publishing house, to meet the immediate requirements of *The Christian Science Monitor*, has been subscribed.

In making this announcement we take the opportunity to thank the Field for its support in this as well as in all other important undertakings for the extension of the Cause of Christian Science. Some have asked why the space needed for the *Monitor* was not taken into account in the original plans of the publishing house, and to these friends we would say that at the time the plans were made the publication of a daily newspaper was not contemplated. Our Leader saw, however, in August last, that the time had come for the launching of a paper such as the *Monitor* has proved to be, and as no provision for such a purpose had been made in that part of the building which was then practically finished, it became necessary to call upon the Field for further contributions. That a considerable part of the additional building fund was subscribed before the publication of the *Monitor* was announced, and that all has now been paid in, is a source of great satisfaction to those concerned.

THE CHRISTIAN SCIENCE BOARD OF DIRECTORS.

A NEW FIELD OF USEFULNESS.

WHEN the contemplated publication of *The Christian Science Monitor* was announced in the *Sentinel* last October, it was promised for the paper that its mission would be "to publish the real news of the world in a clean, wholesome manner;" and a proof that this promise has been kept is the large number of letters received at this office which express commendation of the *Monitor* as a clean newspaper. The paper has found one particular field of usefulness, however, which was quite unexpected, and the wide-spreading influence for good which the new field thus opened up promises, is clearly shown by a letter received from Christian Scientists at Wilmington, Del., and again by a news item published in the Milwaukee *Free Press*.

We quote from the letter as follows:—

There are in our community two reform schools, one for girls and the other for boys. The rules governing these institutions have in the past prohibited all newspapers, on account of the erroneous mental pictures called forth by the sensational character of the daily press. Interested Christian Scientists have recently introduced the *Monitor* in both of these reformatory institutions, and our board of directors have had communications from the management of both schools, expressing their deep appreciation of this excellent paper, and the helpful influence it has seemed to exert on the student-body.

The *Free Press* said:—

Through the courtesy of Sheriff H. E. Franke, prisoners in the county jail are finally allowed to read a daily newspaper every morning. This grant is made in spite of the fact that in former administrations reading material for the prisoners was restricted to the use of censored novels and biographies only. Formerly sheriffs issued a daily allotment of reading material for the prisoners to while away the long hours behind their steel-barred doors. But although there is little doubt that the men behind the bars improved their time, they were still at a loss for a way to keep in touch with the affairs of the outside world. Sheriff Franke recognized this fact as soon as he took office, and one of his first acts was to subscribe to *The Christian Science Monitor*, a daily paper issued regularly in Boston, and distribute copies to prisoners every morning.

"It is no violation of custom whatever," said Sheriff Franke, in speaking of his change, "for the paper is not strictly religious, nor does it contain criminal news. It is this elimination of crime notices and publication of the good being done in the world that led me to adopt the publication as one that would keep the prisoners in touch with the times; and they seem to appreciate it."

The objection to other newspapers was made on grounds that the perusal of criminal accounts was not beneficial to men charged with committing offenses of various natures. Sheriff Franke's substitution of a daily containing only optimistic news accounts and eliminating criminal stories has resulted in gratitude of the prisoners as well as the commendation of the county board of supervisors in his selection.

It is gratifying to have the good points of the *Monitor* so frankly recognized, and now that attention has been drawn to this new avenue of opportunity, we feel sure Christian Scientists will see to it that every institution of the character referred to is well supplied with copies of this paper.

ARCHIBALD MCLELLAN.

"THE LAST ENEMY."

THERE has ever been a feeling, no less universal than instinctive, that being is life, and the normality as well as the ideality of death has been denied in every impulse and assertion of that desire for immortality, the defeat of death, which has moved men from the beginning. It has thus come about that while the teaching of Christian Science, that "all is Life, and there is no death" (Science and Health, p. 331), may have provoked the smile of amused incredulity or the sneer of pious prejudice, it has voiced the deepest instinct and longing of the human heart, and the acceptance of this teaching is compelled, in the instance of every intelligent person who believes in God, the moment he realizes the utter incongruity of the association of death with the manifestations of infinite Life. Being absolute opposites and contradictions, Life and death can no more exist together than can light and darkness, and since Life, God, is infinite, "in whom all things consist," death has no existence at all, even as twice two is five has no existence.

To believe that infinite Spirit is the source of all existence is to see that all breakdown and disintegration are necessarily but the phenomena of a false sense of being, hence to say "there is no death" is simply to stand for the integrity of God's universe; it is to honor the spiritual and ignore the claims of its opposite; it is to endorse the logical outcome of that divine idealism which is dominating philosophic thought; in a word, it is to be severely sensible. From this idealistic point of view it is no more startling to think of overcoming death, the outcome of false belief, than it is to think of doing away with false belief itself.

Christian Science knows no death save that of error, and this means life because it is the conscious escape from bondage to sin and sickness. Speaking in his paradoxical way, St. Paul said, "I die daily." He might have said, "I am realizing each hour the ever-enlarging freedom which Truth brings from the enslavement of material sense." This is to "die" to sin, in fulfilment of Ezekiel's declaration and prophecy, "The soul [sense] that sinneth, it shall die." Says our Leader, "Mortals claim that death is inevitable; but man's eternal Principle is ever-present Life." "We can, and ultimately shall, so rise as to avail ourselves in every direction of the supremacy of Truth over error, Life over death" (Science and Health, pp. 312, 409). The supreme problem of humanity thus becomes distributed. We escape from a doomful and foreboding generalization, and lay hold upon a concrete proposition which we may begin to solve today. Instead of accepting the necessity of the unequal struggle of the valley of shadows, the rightly instructed Christian man is knowingly overcoming death in every realization of Truth, every spiritual

Digitized by Google

choice, every demonstration over sin and the sickness which attends it.

In Christian Science it is seen that no one can suffer the climax of sin without consenting thereto, either personally or by proxy. Said Jesus, "Whosoever liveth and believeth in me shall never die." Christian faith in general has held that the character of the life lived has had nothing to do with the inevitability of death, but in Christian Science right thinking is seen to be right being, it is the reflection of Life, and it is not subject to death. Truth cannot die, and error has no life to give up: hence in Christian Science there is no death save that passing of false belief which is experienced as we attain the Christ-Mind.

The significance and serviceability of the Christian Science point of view thus appears not only in its recognition of the practical possibility of the present "attainment of eternal life," but in the stimulus it gives to the immediate and continuous endeavor to separate oneself from every thing or thought that has no right to live.

JOHN B. WILLIS.

OBEDIENCE TO LAW.

IN reading the Old Testament, one cannot help being impressed by the emphasis laid upon the necessity for obedience to divine law, and no less upon the need of understanding it. In Deuteronomy Moses tells the people that the keeping of God's law means life to them, and he calls upon them to awaken to the blessedness of having God so nigh unto them "in all things that we call upon him for;" then he goes on, "And what nation is there so great, that hath statutes and judgments so righteous as all this law, which I set before you this day?" Again and again are the people bidden to teach the commandments "diligently" unto their children, and to keep them ever before their own mental vision, for thus alone could they "go in and possess the land." Long centuries after Moses' day the great Teacher said, "Whosoever therefore shall break one of these least commandments, and shall teach men so, he shall be called the least in the kingdom of heaven; but whosoever shall do and teach them, the same shall be called great in the kingdom of heaven;" and then he went on to show that obedience to the commandments must begin in mind, and include every thought, word, and deed.

It is not necessary to remind Christian Scientists of their Leader's insistence upon obedience to God's law, at every point, and her wise provision that the children be taught to understand and reverence this law. The older students of Christian Science see very clearly the reason why the Decalogue should be "diligently" studied in our Sunday Schools, namely, because it is founded upon justice and right and is the basis of all human codes which aim to maintain law and order. It is a mistake to suppose that any one on the human plane does not need to study the Ten Commandments, for even admitting that one might not be tempted to break them, he would still need their protection from the evil beliefs of the carnal mind,—its hatred of Truth and of justice. Our children need to know the might and majesty of God's law. To the one who understands and obeys it, divine law is both sword and shield; as the prophet has said of him who obeys it, "No weapon that is formed against thee shall prosper."

A few years ago, a Jew was tried for murder in one of the middle western states. The evidence against him was very damaging, but his counsel made a strong point for the defense in showing that almost none of his race were to be found in the penal institutions of the country; that they were law-abiding citizens, and that this was due to the fact that through the long centuries of their history the children had been taught the absolute necessity of obedience to the Ten Commandments. It was also shown that obedience to parents and resultant love in the home were characteristic of Hebrews, and with this virtue in childhood the commission of crime in later years would be well-nigh impossible.

Our revered Leader, in "Miscellaneous Writings" (pp. 65–67), gives a wonderful interpretation of the "law and gospel," distinguishing between the material sense, and the spiritual sense which is life-giving. She tells us that "obedience to these commandments is indispensable to health, happiness, and length of days." Moses substantially said this, also Christ Jesus, and Mrs. Eddy not only insists that we and our children shall know and obey God's law, but she tells us, in no uncertain terms, *how* we may do so. In all her writings she makes it clear that the spiritual man "delights" in God's law,—to use the psalmist's word,—because he finds, in obedience to this law, health, happiness, holiness, here and now.

ANNIE M. KNOTT.

LETTERS TO OUR LEADER.

Honolulu, Hawaii, April 11, 1909.

Beloved Leader:—More and more, as I strive to "learn what in thine own mentality is unlike 'the anointed,' and cast it out" (Miscellaneous Writings, p. 355), does the beauty and grandeur of your life and the wonder of our text-book dawn upon me; and I seem to see the "lone footsteps, so far ahead,"—as Mr. Bliss Knapp said, in that sweet tribute which he paid you in a letter published in the *Sentinel* some months ago. I am so glad I never have a doubt that it is the truth which you have given to the world.

Not long ago I was thinking that if only I had understanding enough, were living Science well enough, and doing good enough work to be of service to you, and to be called to your home, how happy I would be. Immediately came the thought: "Why, her home is in Mind, and through all of her writings she is constantly calling each and every one of us to that home." I also realized that your request or desire that every Scientist subscribe for and read the *Monitor* is an individual call to serve you by serving mankind, for whose redemption you are ceaselessly toiling. I know that God is blessing you, and that the windows of heaven are wide open for the pouring of the riches of His love into your prepared and waiting thought. Although I was very young in Science at the time of the trial, I felt I was well grounded, because I knew you were rejoicing (Matthew v. 11, 12). God's will is your will—and God's will is done!

I am, as you have expressed it in "Miscellaneous Writings," "constantly homesick for heaven;" but because of your faithfulness and purity, instead of being in despair, —"having no hope, and without God in the world,"—as formerly, I now turn to Principle, which never fails us, and I find help. For this my thought goes out to you in love and gratitude many times a day. Although realizing that I can add nothing to the happiness of one so close to God, I reverently offer this acknowledgment of the priceless treasures you have given to us, with the prayer that I may learn to be as faithful as you are, and that like you, I may always say, "Thy will be done."

Gratefully yours,

SALLIE J. UPTON.

Boston, Mass., April 17, 1909.

Mrs. Mary Baker Eddy, Brookline, Mass.

Beloved Leader:—Yesterday morning I was reading with great interest a wonderful testimony of healing from sin and sickness,—of a life redeemed by Truth,—and just then my attention was called to the newspaper account

Digitized by Google

of the splendid addition to our church property by the securing of the land in front of the church on the Falmouth street side. The relation between this extension of our borders and the healing work of Christian Science impressed me so deeply that the tears rained down upon the testimony which I held in my hand. Then I remembered that only the day before I had been moved to strong indignation because of certain cruel and unjust attacks upon our Cause and Leader, but now I was able to say from the depths of my heart, "Father, forgive them." I wished, too, that we all might be ready to share in the blessing which must come to the dear and generous member who has given part of this land, by a readiness to do all in our power for our glorious Cause,—in the support of all its activities as well as in the healing of the sick.

Lovingly your student,
ANNIE M. KNOTT.

Cedar Rapids, Ia., April 30, 1909.
Mrs. Mary Baker Eddy, Brookline, Mass.

Dear Leader:—I feel prompted, and accept the privilege, on the appearance of the new by-law in the latest edition of The Mother Church Manual, defining the class of literature for sale and on exhibition in the Christian Science reading-rooms, to express my thankfulness to God, and to you, our dear Leader,—"Mind and Mind's idea," —for the spiritual import and impetus that is transmitted to the Cause of Christian Science in the enactment of this very important by-law. With prompt and strict compliance with the full meaning of this new order, will follow the purification of the mental atmosphere of the reading-rooms; and the literature emanating therefrom, bearing healing on its wings to the whole world, will fulfil its divine mission.

We recognize that the need for each branch of the work has been and will be met by infinite wisdom, at the right time and in the right way, and that the establishment of this new rule for the regulation and operation of the work of the reading-rooms will be known as another one of the wise and wonderful acts brought out by you for the general good of our Christly Cause. We rejoice to inform you that our reading-room committee, in prompt obedience to this new by-law, decided at once to comply with it strictly, in the letter as well as in spirit, by removing everything except your writings and the literature published or sold by The Christian Science Publishing Society. In Science and Health, page 223, you write, "God will overturn, until 'He come whose right it is.' Longevity is increasing and the power of sin diminishes, for the world feels the alterative effect of truth through every pore."

Mrs. Smith joins me in sincere love to you.

Lovingly and loyally yours,
CHARLES TAYLOR SMITH.

Peterborough, Ont., April 30, 1909.
Mrs. Mary Baker Eddy, Brookline, Mass.

Beloved Leader:—First Church of Christ, Scientist, Peterborough, Ont., in annual business meeting assembled, in peace, unity, and love, realize our debt of gratitude to you, our Leader, for this demonstration, and wish to convey to you our appreciation of the same. We have great reason to be grateful to you for the many blessings received during the past year. In so far as we have listened to and obeyed your call of warning, counsel, and encouragement, we have been protected, instructed, and prospered by divine Love. We assure you we enjoy and are pleased to have the privilege of living and demonstrating the truth revealed through and reflected by you to us and all mankind. We are all aware that the degree of health and harmony of mind and body which we enjoy is due to demonstrating the rule of Love and Truth given us in "Science and Health with Key to the Scriptures."

We enter the new year with all accounts paid, and a full staff of officers united in love, desirous of giving good service in the practical understanding of Christian Science. Leaning on Christ, Truth, and looking to God, our Father and Mother, for guidance, we know our efforts will not be fruitless in right doing, if we follow you as you follow Christ.

In behalf of the members, we are,

Loyally and lovingly yours,
MABEL YOUNG, WM. J. TODD,
A. E. BIRCHARD, *Committee.*

St. Augustine, Fla., May 4, 1909.

Dear Mrs. Eddy:—For many years I have wanted to write to you, but did not wish to take any of your valuable time. Today I am only a babe in the understanding of your wonderful book, "Science and Health with Key to the Scriptures," but I am very grateful for my small understanding and I know if I hold fast to the truth and study your book faithfully, with the Bible, I shall attain wisdom. I did not come into Christian Science through the physical healing, but one year after accepting its teachings I had a terrible accident, and as I had lost faith in material remedies I turned with all my heart to the truth, which enabled me to rise from my bed the third day, strong and well. When in need of help I could not always get a practitioner, but in my darkest hours I had your dear book, and I thank you for it. You are, dear Leader, and forever will be, "kept by the power of God."

With deepest gratitude,
MRS. AUGUSTA WILSON.

Mechanicsville, Ia., April 30, 1909.
Mrs. Mary Baker Eddy, Brookline, Mass.

Dear Mrs. Eddy:—It is my desire to write and tell you of the benefit which Christian Science has been to me. Through its means I have been healed of sorrow and pain, and it is my daily guide and comfort. I rejoice with you in knowing that mankind can today be made free from all the phases of evil.

Sincerely and lovingly,
SUSIE L. BRADSHAW.

Portland, Ore., April 26, 1909.

Dear Leader:—You will know what Christian Science means to me. I lost my father, my mother, my sister, also our business and our home, through consumption, and the doctors said that I could not live. I could not read or write, and was at the county hospital, and from there to the poor-farm, and then it seemed the grave would be next. I found the truth by reading Science and Health, by you, and was healed. I am well now, and working. His will be done.

Lovingly yours,
HENRY W. RUGE.

Dayton, O., May 1, 1909.
Mrs. Mary Baker Eddy, Brookline, Mass.

Beloved Leader:—Under date of April 28, I received a letter from the Dayton Public Library, accepting the *Monitor*. The librarian writes, "I have been quite interested in the laudable effort of the Christian Scientists to give to the public a clean newspaper, suggestive of good instead of parading all the evil there is in the world." I hope during the year to distribute many copies of the *Monitor* in this part of the state. The *Monitor* will speak for itself regarding its great mission of reform.

Affectionately yours,
LLOYD B. COATE.

THE LECTURES.

FRESNO, CAL.

Prof. Hermann S. Hering spoke on Christian Science at the Barton Opera House last night [April 5] to a large audience. He was introduced by City Trustee Klette, who said in part,—

Nineteen centuries ago, in the far East, Jesus of Nazareth went forth throughout the land preaching a new doctrine, the fatherhood of God and the brotherhood of man. He taught, saying, "Be ye therefore perfect, even as your Father which is in heaven is perfect." He laid down the great commandments, "Thou shalt love the Lord thy God with all thy heart, and with all thy soul, and with all thy mind. This is the first and great commandment. And the second is like unto it, Thou shalt love thy neighbor as thyself." These great commandments encompassed his teachings. And he went forth and healed the sick. The lame were made to walk; the blind were made to see; the lepers were cleansed. Yea, he raised the dead. And then, that a doubting world might understand and believe, he raised himself after his crucifixion and appeared to his followers.

He sent his disciples forth, and commanded them, saying, "Heal the sick, cleanse the lepers, raise the dead, cast out devils: freely ye have received, freely give." He said again, "And these signs shall follow them that believe; . . . they shall lay hands on the sick, and they shall recover." And he gave to all the world for all time a great promise when he said, "He that believeth on me, the works that I do shall he do also; and greater works than these shall he do; because I go unto my Father." He plainly meant that all people in all ages who followed his teachings could heal the sick and raise the dead, as did he. Some of his followers for a brief time understood his teachings and were able to heal, but soon the great truth of the Christ-healing was lost to the world.

It remained for a woman in our day and age to rediscover and give to the world this great truth. The world owes a debt of gratitude to Mrs. Eddy for having given to it Christian Science. Christian Science is not a new religion or a new creed. It is eminently the religion of Christ, explained and understood. It assumes to be nothing more; it is nothing more. As a result of Christian Science there has been a great spiritual awakening throughout the world, and the so-called miracles of Christ in healing the sick and raising the dead are no longer miracles to the Christian Scientist who understands they are but the natural effect and result of the law of Spirit.

Fresno Republican.

FAYETTEVILLE, N. C.

Mrs. Sue Harper Mims of Atlanta, Ga., delivered a lecture on Christian Science in the LaFayette Theater yesterday afternoon [April 11], before a large and representative audience. The lecturer was presented by A. H. Slocomb, who said in part,—

Christian Science, in the broadest application of the term, is no new thing. It is as old as Christianity itself. During the nineteen centuries of the Christian era it has been the study of the wisest men and the most profound thinkers. The question of Pilate, at the trial of Jesus, "What is truth?" is the question of the ages. Learned and devout men have wrought out their faith through a life-time study of the holy Gospels, and out of their different interpretations has sprung a multitude of different Christian denominations.

Within the last generation the Christian world has witnessed the advent of a new denomination, the Church of Christ, Scientist. Though of recent origin, it has erected a great many temples, which are thronged with hundreds of thousands of intelligent, sincere, and enthusiastic worshipers, and it has extended its influence throughout the civilized world. It has been a power for good in every community where it has obtained a foothold. Nor can we ignore the testimony of many thousands of truthful men and women who have been healed of their bodily ills and restored to perfect health by the application of the Principle taught by Mrs. Eddy.—*Fayetteville Observer.*

PATERSON, N. J.

That there is considerable interest shown in matters relating to Christian Science was exemplified last evening [April 15], when the Rev. William P. McKenzie addressed a large throng at Orpheus Hall. The auditors comprised many of the leading business men of this city, who took advantage of this opportunity to learn something of the faith which has been discussed so widely during the past few years. Former Congressman Henry C. Allen introduced the Rev. Mr. McKenzie, and said,—

A sect, or a cult, if you please, or a religion, which, starting with its Discoverer and Founder and a few faithful adherents, gathers into its fold many thousands of people scattered throughout the nations of the civilized world, drawn from all classes and denominations, challenges the interest of mankind. Such is Christian Science. Its following numbers many thousands, and it was founded but a few years ago. Many have been drawn to it by its physical healing. Many have come from the ranks of its most bitter detractors. "By their fruits ye shall know them" has been wonderfully exemplified by this progress, and it is to hear of this work and to learn something of this wonderful Science that we have gathered here tonight.

I accepted the invitation to present the lecturer of the evening with a great deal of pleasure, for the opportunity it gives me to express my deep sense of personal gratitude to Christian Science, not alone for the wonderful physical healing, but for the daily help it has been and is to me in meeting the problems and temptations of every-day life, for it is an every-day religion.—*Paterson Call.*

LOCK HAVEN, PA.

A fair-sized audience was present in the Opera House last evening [April 9], to hear the lecture by Bliss Knapp on the subject of Christian Science. He was introduced by Albert Sharpe of Williamsport, who said in part,—

Christian Scientists fully appreciate the fact that one does not become a Christian Scientist by merely listening to a lecture on Christian Science, but by the understanding and daily living of its teachings. The followers of Christian Science are sincere and earnest, and live their religion each day, as I can solemnly attest.—*Daily Democrat.*

TESTIMONIES OF HEALING.

After years of faithful research among the physical sciences and philosophies, and an extended study of both eastern and western religions, I came to the conclusion that there was undoubtedly a God somewhere; but since immutability could not be manifested through mutable phenomena, we could have no possible means of knowing or understanding Him, and I therefore abandoned my search.

For a long time I had been incapacitated from any steady employment by reason of a severe heart trouble, which would cause me to remain unconscious for hours at a time. At last I thought I had found a medicine which, when taken frequently enough, so stimulated my energies that I was able to work more continuously, although the attacks did not cease, but were more likely to occur at night. One evening I fell in the street, and when I became conscious I was at the other end of the town, utterly unable to collect my thoughts or discover my whereabouts. After some friends had seen me home, I went to my physician, who told me that these attacks resulted from the drugs I had been taking, and that the doses must be curtailed or my reason would suffer. I told him I would take no more drugs, if that was the case. He assured me that it would be impossible to leave them entirely alone without occasioning intense suffering and even endangering my life.

It is not necessary, even if it were possible, for me to describe the agony of the next seventy-two hours, without sleep to ease my suffering, but on the fourth day I said to a friend, with whom I had once studied philosophy, "Can't you give me a thought or a problem to think about, so that I shall not go mad?" "Yes," he said; "think of this: 'All is infinite Mind and its infinite manifestation, for God is All-in-all'" (Science and Health, p. 468). How absurd the quotation seemed—little manifestation could I see of the infinite! My friend then handed me a copy of Science and Health, on condition that I return the book next day, telling me to read it while awake that night. I did so, but could only understand portions of the chapter on Prayer.

It was after midnight when I gave up the struggle and said to myself: "If all is infinite Mind and its infinite manifestation, God can see only that manifestation, and He can know nothing of my sins or my ignorance. To Him I can only be as the reflection of His work. I know nothing of Him. If then He is to answer my prayer, it must be through an impersonal law of which I know nothing. I can therefore do nothing but trust." Then these words came into my thought, and repeated themselves over and over again, "Underneath are the everlasting arms." I heard it strike three o'clock, and then I must have slept. When I awoke the lamp was still burning, the book was open on the bed, the morning sunshine was streaming through the window, and I was healed. I quickly dressed and hurried to my friend's house. When I said to him, "Did you ever see such a beautiful morning in October?" he clasped my hand with the words, "I'm so glad!"

Having received life, reason, health, a God whom I could trust and a Bible which I could understand, all through one sentence from the Christian Science text-book, what could I do but with a thankful, earnest humility study and demonstrate more of its truth in the following years. I had much to unlearn and much more to learn, but with unspeakable gratitude for the beautiful life which is being spent to give and preserve for us the truth, I add this testimony, that, without a single exception, Christian Science has stood the test of every question and answered every problem upon which I have brought it to bear. My study of the Christian Science text-book has persuaded me that the effort to understand and demonstrate the truths it unfolds to the world must become the supreme quest in life. I have turned to its pages when the shadows of fear, ignorance, pain, and death itself have seemed to darken my way, to find it, as the psalmist said, "a lamp unto my feet, and a light unto my path." Though oftentimes a careless and backward scholar, I have proved enough of its truth and power to trust to it in every difficulty that has arisen since my first healing, and this trust has never been betrayed.

ALBERT R. CHAPPELL, Santa Barbara, Cal.

It is with the hope that I may help some one who is laboring under a condition similar to mine, that I send my testimony to the *Sentinel*. From the time I was two years old my mother watched what seemed to be evidences of a possible deformity, and with this grew the fear that I could never be like other children. When I was six years of age I was subjected to osteopathic treatments for several months, but they did me absolutely no good. By the time I was twelve, the case was termed a serious spinal difficulty, and was pronounced incurable. It was then decided to try Christian Science, in which my mother had been interested for some time. A practitioner was accordingly consulted, and we were assured that "with God nothing is impossible," whereupon it was decided to try the treatment. I received treatment for exactly three months, during which time my shoulder was raised so that one would scarcely notice any difference between my left shoulder and the right, and my hip was lowered to its correct place. For this demonstration, and numerous others as well, I am deeply grateful; and although all my faults are not yet overcome, I know that man is "the full and perfect expression" (Science and Health, p. 591) of divine Principle, and that sooner or later these faults will be met and done away with.—LILA LUCILE PORTER, Peoria, Ill.

With gratitude I give my testimony, trusting that it may be helpful to others. When doctors failed to help me I turned to Christian Science, and received the healing which I had sought in vain elsewhere. I had often felt quite convinced that there was a coalition between sin (evil traits) and sickness. Finally the day came when I was to be enlightened, and I found that sickness and sin had been partners from the beginning, as Jesus said, "When he speaketh a lie, he speaketh of his own: for he is a liar, and the father of it." A lie is defined as "that which is not true." So I found in Christian Science all the fabrication of sin and sickness to be untrue, for God, good, only is true, and All-in-all. The metaphysical healing of disease shows the reality of the mission of Jesus; that it is "the Lamb of God, which taketh away the sin of the world." Jesus yearned to be understood, and all of us in turn yearn that the dawn of light may break in upon the long night of materialism, and guide our dear ones to reach out for their glorious inheritance; for the truth is indeed as the "pearl of great price," for which the merchant "sold all that he had, and bought it." But, as Paul says, it must come to "every man in his own order: Christ the firstfruits; afterward they that are Christ's at his coming."

I thank God for this blessing; and as others have said, I am grateful that I live in the same age with Mrs. Eddy, its Discoverer and Founder.

MRS. MARY L. HAZARD, Brooklyn, N. Y.

I wish to express my heartfelt gratitude to God for what Christian Science has done for me. I was taken ill with what the doctors pronounced appendicitis and gall-stones. I was treated by one physician for about three months, and

Digitized by Google

as I failed to gain any strength or to be relieved of the intense pain, my husband, who thought it his duty to get me relief if possible, called in another physician. The two physicians held a consultation, and decided that they could not operate then, as my condition was too serious, and that it would be necessary to wait until I could gain in strength. I was, however, so slow in gaining that our physician said the only thing which would help me was to undergo the operation. At this time I weighed only about seventy-two pounds. My husband then discharged the doctor, and hearing of an osteopathic physician, we thought it best to try that method. After doing so I seemed to feel stronger, but still suffered intense pain and could not eat anything without great suffering.

After a month's trial of this treatment, in which I failed to receive proper relief, we decided to try Christian Science. My husband and I called on a practitioner, and I can truthfully say that I was healed in one treatment of the pain in the abdomen, but I continued to take treatment for weakness, of which I was healed in seven treatments. Since taking up the study of Christian Science, two years ago, we have had many beautiful demonstrations in our home, and I can say that I have perfect health, for which I am truly grateful. My daily prayer is to learn more and more of this healing truth which has been revealed to us through our beloved Leader, Mrs. Eddy.

MRS. H. C. SPITLER, Canton, O.

I wish to express my gratitude for the healing that has come to me though Christian Science. I suffered from heart trouble for six years, and tried a number of physicians, but they said that I could not be cured and that I might expect to pass away at any time. A friend then advised me to try Christian Science, and I resolved to do so. After having a few treatments (one week), I was entirely healed of this disease. Some time later, I was attacked with severe throat trouble. I called a practitioner, and with a few treatments I was again healed. I was also healed spiritually, and other sicknesses in the family were overcome. I wish to say once more that I am very thankful to God, and to our Leader, Mrs. Eddy.

HENRY E. WEISS, Stamford, Conn.

One evening while out walking, I accidentally fell, and upon rising I found that one ankle was severely injured. I finally reached my home, but the pain seemed to be increasing. In the night it was very severe, but knowing that the understanding of Truth heals all of our diseases, and that all things are possible with God, I went peacefully to sleep. When I awoke in the morning there was "no more pain," and I know that divine Mind healed me through the understanding of Truth. I had relied upon *materia medica* most of my life, until the understanding of Christian Science came to me, and I feel very grateful to know this truth which makes free.

FLORA B. HINMAN, Boston, Mass.

[Translated from the German.]

I am unable to express in words the blessing which this wonderful truth has brought me. Christian Science found me in a sorrowful condition. For three years I had been hopelessly ill from nervous trouble in its worst form, coupled with a supposedly inherited organic disease of the heart, so that I looked death in the face daily and hourly. Just as I was about to resign myself to what seemed to be the inevitable, help came; the promise that darkness would be dispelled by light was fulfilled in my experience. God led me to get acquainted with the only Christian Science practitioner in the city, and she had been here but a short time. I shall never forget the first words she spoke: "Why do you not cast your net on the right side?" and the marvel of my healing occurred. From that day and hour I kept feeling better, and since a year ago I cannot thank God enough for the wonderful healing. All this has been done through the explanation of the true Christian faith, as given by our revered Leader, Mrs. Eddy. No one can sufficiently thank her in words, but I wish that very many of my poor sick brethren and sisters may comprehend fully the true Christian and spiritual illumination of Christian Science.

FRAU HELENE ZIMMER, St. Petersburg, Russia.

I am glad to testify to the help received from Christian Science. I had a badly scalded arm, and shortly after my hand became very painful, and both the hand and arm presented an alarming appearance. I went to a physician, who lanced the finger and said I had a severe case of poisoning. He warned me to be careful, and to come to see him the next day. The pain continuing, I, however, concluded to try Christian Science, and went to see a practitioner. After the first treatment the pain ceased, and after the third treatment the swelling and soreness both left. The physician told me not to do any work, but under Christian Science treatment I used my arm as usual in doing my work.—HATTIE JENNINGS, Moscow, Idaho.

Every testimony in the *Sentinel* is helpful to me, and for this help I feel very grateful. Perhaps one way of expressing this gratitude is for me to give my own testimony to the wonders of Truth. For several years before coming into Christian Science, I had a number of diseases, and in the fall of 1902 we started out and traveled almost a year, trying to find a location which would agree with me. We went South and spent the winter; then in the spring we went to western Kansas, and while visiting relatives there I heard of Christian Science. Although I did not then accept it, the belief that medicine had any power to help me disappeared, and I found myself without any faith in *materia medica*. I did not then know enough of Christian Science to have faith in it, but the time came when I had to decide.

I wrote to this relative and told her there was a Christian Science church in our town, but that I would have to be helped before I could get there. I did not know any one in the town who was a Christian Scientist, and had not enough interest, when I was visiting this relative, to find out much about Christian Science. I was, however, helped to get to church, and have been able to go ever since. A lady loaned me a copy of "Science and Health with Key to the Scriptures" by Mrs. Eddy, and I tried to read it, but it was like an unknown tongue to me, and I did not seem to understand anything I read. I would lay the book aside, thinking that others might understand it, but that I could not. I, however, continued to read, and was healed of kidney, stomach, and throat trouble, also of female disease, headaches, etc., and above all of a disagreeable temper. Then, after these ailments had disappeared, lung trouble seemed to fasten itself upon me, and as I was young in Science my relative treated me, and in three weeks I was healed. A sister had passed on with this same disease over two years before, and relatives and friends said I would be the next to go. I therefore feel that if it had not been for Christian Science I would not be here to testify today.

I am thankful to God, and to Mrs. Eddy, for all the blessings that have come to me through Christian Science, and I would say to those who do not seem to understand the text-book at first, to keep on reading, and the light will come if they are faithful.

MRS. S. F. JAGGAR, Parsons, Kan.

Digitized by Google

I wish to give thanks for what Christian Science has done for me. Ten years ago I was a hopeless invalid, and some friends who knew of my condition urged me to try Christian Science. I reluctantly gave myself up to be treated by a practitioner living in Boston. Not knowing what Christian Science is, I had no faith in it, or that I should ever be well, as I had been ill many years, although I had what we thought to be the best of physicians. After taking up Christian Science, to my great joy, I was healed of a growth on my side almost immediately, other troubles yielding more slowly. I am now well, and I feel very thankful to Mrs. Eddy for discovering Christian Science, which teaches me how to understand God.

I would also like to mention some healing which has taken place in the family since my own healing. My son, who was seven years old at the time, was healed of a severe attack of acute lung trouble. As it seemed a severe case it was thought best to call a practitioner nearer home. This Scientist came to us, and in a few days the boy was healed. My husband was healed of a severe attack of an eruption which affected his face and eyes. For this healing I thank God, and those who had the understanding of how to heal. As our Leader says, "God will heal the sick through man, whenever man is governed by God" (Science and Health, p. 495).

Words fail to express my thankfulness for what Christian Science has done for us all, but I hope these few words may help others to look into Christian Science, that they also may receive the blessing.

EVELYN M. BOSWORTH, Barrington, R. I.

Very gratefully do I give this testimony, which is a proof of the truth of Christian Science as taught in the Bible and made plain in the Christian Science text-book, "Science and Health with Key to the Scriptures" by Mrs. Eddy. Less than three years ago I knew nothing of the healing power of God as revealed in Christian Science. I was groping in "outer darkness" mentally, and physically was fast becoming a nervous wreck. I was miserable living, and very much afraid to die. I had catarrhal and stomach trouble, constant and severe headaches, bronchial trouble of a very serious nature, and many of the minor ills to which human flesh is heir, but Christian Science has healed me of all these diseases.

Because I know that divine Mind is the only cause of everything that really exists, that I live and move and have my being in God, and that He works in me "to will and to do of his good pleasure," I am well, and have dominion over the body to which I was once a slave. I am striving to know more of God by following, to the best of my understanding, in the footsteps of our Master, as the way has been shown to us by our Leader, Mrs. Eddy, who is ever going on before us.

J. L. BRUCE, Enid, Okla.

About three years ago, while using gasoline, I was almost overcome with the fumes. I managed to crawl from the place where I was working into a room where I was alone, but my husband came home in a short time, and found me in a very bad condition. He started at once for a Christian Science practitioner, and in less than an hour the trouble was entirely overcome. I have also been cured of severe headache of long standing, and though I have laid aside the glasses which were worn to correct this trouble, the headaches have not returned. I am very grateful to God for revealing this truth to us through our dear Leader, Mrs. Eddy.—MRS. LINA B. WEBB, Franklin, Pa.

With the hope that some one whose release from bondage is seemingly slow, may be encouraged by reading my experience, it is here given somewhat in detail. While in attendance at an academy, from which I graduated about ten years ago, I incurred what is termed the periodical liquor habit, together with its kindred vices, such as gambling, love of fast company, etc. For three years after I engaged in business, I indulged from time to time these practices, which soon were considered a part of my personality. At the end of that period my position, together with the confidence of my friends, associates, and family, was seemingly lost, notwithstanding I had earnestly sought through human will, and with the loving assistance of a good father and mother, to abandon the companions and practices which had brought about my undoing.

I then removed to a distant city, where I again entered the service of a railway company, though at a much less salary and in less pleasant surroundings, and doing so with a great sense of loss and discouragement. At this time Christian Science, of which I knew something through my mother, who had persuaded me to call upon a practitioner some years previously, presented itself strongly to my attention. In the next four years I consulted three Christian Science practitioners in as many different cities, also studied Science and Health intermittently during this time. Each time the work seemed to be done, and surely the good practitioners did their duty; but I was unwilling to give Truth the credit, and a relapse inevitably resulted.

It was then my good fortune to meet a gentleman whose concept of God as the only power was so absolute, and his inspiration to impart his understanding to others so great, that within a few months I suddenly realized the demonstration was made, and the feeling of gratitude and freedom that flooded my consciousness cannot be described. I do not want to convey the impression that my healing came about in a mysterious manner and with no effort on my part. I had been led to realize fully the necessity of obedience to the command, "Work out your own salvation." The past two years have been beautiful with progress in the understanding of "Him whom to know aright is Life eternal" (Science and Health, Pref. p. vii.). I am now earnestly striving to know more of this great truth, that I may help some unfortunate brother who has fallen a victim to the false and pernicious mortal belief that a young man must "sow his wild oats."

I am indeed very thankful to God, and to Mrs. Eddy, the divinely ordained Leader of this great Cause, who has so lovingly and patiently shown us the way.

BURTON W. MUDGE, Chicago, Ill.

A medical doctor claimed that my eyes were in a very serious condition. I then talked with a Christian Science practitioner, who said that others had been healed, and why should not I. She gave me a treatment and I have never worn glasses since. I was also healed of paralytic trouble, both sides being affected, also my speech; asthmatic trouble, and other ailments too numerous to mention have likewise been overcome. Truth is helping me to walk in the straight and narrow path. I have all of Mrs. Eddy's writings and I enjoy studying them. I am so thankful to God, and to our dear Leader, Mrs. Eddy, for Christian Science. I hope this testimony will benefit some one.

M. ROWENA MCNEIL, Clinton, Ia.

Although for twelve years the beautiful teachings of Christian Science have been healing, purifying, and uplifting my consciousness from material modes of living and thinking, the past year has been so varied in experience, so rich in demonstration, so many victories have been won, that to express my gratitude through our periodicals is the least I can do. While the physical healing I have expe-

Digitized by Google

rienced through Christian Science has been wonderful, it seems small in comparison to the growth of thought from a material to a spiritual basis. To feel the absolute assurance that divine Love is always "our refuge;" to be able to prove daily and hourly, through demonstration over self, sin, disease, and sorrow, that the Comforter is indeed revealed in this age to all who look for the truth,—all who "hunger and thirst after righteousness,"—surely this is infinitely greater than any relief from physical suffering.

I was a very delicate child; as I grew older serious diseases made their appearance, and I never knew what it was to be free from suffering. Each physician who was called in agreed that there was not a single healthy organ in my body; the only relief they could give me was through administering large quantities of opiates, and that also failed finally. Then it was that Christian Science was brought to my notice; and I shall never forget the sense of joy which flooded my consciousness when, after giving me my first treatment, the practitioner said, "'God is Love,' and you do not have to die." I never doubted that I should be healed after that, even though it was several years befor health was fully made manifest.

My thought was so filled with the sense of suffering, both mental and physical, that it was not strange, even with the help of consecrated and successful practitioners, that my healing was very slow. I had to be "transformed" by the renewing of the mind, and finally was divinely driven to "work out" my own salvation. All who have had a similar experience will know the manifold blessings which attend every step out of the false consciousness of existence into a realization, in some degree at least, that "life and intelligence are purely spiritual" (Science and Health, p. 14).

For the many beautiful and uplifting articles published in our periodicals, weekly and monthly, and especially for the marvelous wisdom, sublime courage, and unfailing love and guidance of our revered Leader, Mrs. Eddy, I am profoundly grateful. I know full well that the only worthy proof of our gratitude is to follow the commands which our Master gave to his disciples, "Go ye into all the world and preach the gospel to every creature," "Heal the sick," and this I am striving to do in his name.

MABEL J. FOYLE, Long Beach, Cal.

[Translated from the German.]

I give this testimony with a feeling of deep gratitude for all that has come to me through Christian Science. It has freed me of bronchial and asthmatic trouble, a so-called incurable disease. Three years ago I had a severe bronchial attack, and went to a physician, but although I remained under medical care, the disease spread more and more and asthmatic trouble set in. The attacks were infrequent at first, but became more and more severe and would overtake me often, so that I would not be able to attend to my work. At such times I was entirely helpless, and had even to be dressed and undressed. I tried one physician after another, and followed strictly their prescriptions. I, however, believed my trouble was incurable, and people would tell me, "You will not get rid of it, but you may live to become very old," which is surely a poor lookout for one who has become diseased at twenty.

Through acquaintances I heard of Christian Science and was advised to look into it. I went to a practitioner, took treatment, and was healed. I am well now, and need not be afraid of cold or damp air; I can have a cold drink without having to think that it may harm me. I can again be joyful as I used to be, and I owe this, next to God, to Mrs. Eddy, who has shown us the way to perfect health and happiness.

PAULA POTSCHICK, Berlin, Germany.

It is with a deep sense of gratitude that I write these lines to the *Sentinel*. When Christian Science came to me I had several bottles of medicine on hand, which I was using as a last resort for a complication of troubles, for I had tried many physicians and many different kinds of medicines, but they all failed to help me. I was treated with electricity for two years or more, as a physician told me it was the only means by which I could be healed. The physician, however, passed on before the time he had set for the accomplishment of my cure, and I was soon in a worse condition than before. I had also suffered for about twenty years from catarrhal trouble, which helped to make my life very miserable, but this was overcome some time ago through Christian Science. I have been helped so much in every way through the understanding of God, as given by Mrs. Eddy in "Science and Health with Key to the Scriptures," and feel that I can best express my appreciation and gratitude for this by striving to live "the life that approaches the supreme good" (Science and Health, p. 496).

I am truly thankful to God that a better way has been revealed, by which the ills of the flesh can be healed and the errors of mortal thought cleared out. I am also thankful to Mrs. Eddy for being pure-minded enough to discern true spirituality, and being willing, for the good she may bring to the world, to bear the burden of helping mankind.—M. G. AMENT, Lancaster, Pa.

For several years I had been in very poor health. It seemed as if I had almost all the diseases that mortal man is heir to. Two years ago I was on the point of going to a hospital for an operation, then I had neuralgic trouble or an abscess of the bowels. In June, 1907, I was in bed almost the whole month with acute lung trouble. Since coming into Christian Science, however, my troubles have all passed away. After having worn glasses constantly for over eighteen years, I took them off about the middle of April, 1908, and have not needed them since. I can read the finest print and do not know what a headache is any more, although I had suffered terribly with my head and eyes for years. I have been free from all these troubles since December, 1907, when I commenced to attend the services at a Christian Science church and to read "Science and Health with Key to the Scriptures." In this way I learned of the truth, for which I am very grateful. I feel so well now that I can hardly realize I am the same man I was before I took up the study of Christian Science. I cannot say enough for Science and Health and our dear Leader who gave it to us.

CHARLES E. HILANDS, Maywood, Ill.

Having been benefited many times through Christian Science I wish to add my testimony. Three years ago, I was suffering with a severe stomach trouble, diagnosed and treated by a physician. At times I was in great distress and was compelled to take medicine both night and morning, but with only temporary relief. I finally gave up the medicine and began to take absent treatment in Christian Science. I received almost instant relief, and since that time I have not taken any medicine. I am very grateful for the physical healing and all other help which I have had in other directions.

HENRIETTA P. OLIVER, Alpena, Mich.

As children, in life's work and play,
Love leads us on and on each day
From strength to strength the upward way.

ELIZABETH ALLEN MALLORY.

FROM OUR EXCHANGES.

[*Christian World*, London.]

Spiritual teaching requires as its first condition a spiritual teacher. Unless we have ourselves breathed the upper airs, felt the things unspeakable, known in inmost soul the mystery of the divine life, no cleverness, no learning will qualify us for this work. It is here that all the confusion has arisen. Men without scholarship but with pure humble souls have been enriched with the hid treasure and made others wealthy in the sharing. And the multitude who have felt their power, and found others furnished with all that academies could give them, lacking in this essential, have too easily concluded that the mental was a hindrance to the spiritual. The real point is that it can never be a substitute for it, can never be a substitute for the pure heart that sees God. What the world is in need of most of all is the sweet gracious souls who, walking with God, diffuse from their very aspect and bodily presence an influence that sets men, aye, and little children, longing for goodness and for God. You meet them in the humblest ranks.

[*Congregationalist and Christian World.*]

We may treat ourselves as children of death, and so drag the growing weight of our years mournfully and doubtfully along toward the grave that shall cover them. Or we may accept by faith the call to an experiment of living the resurrection life, and find—as thousands in every generation have found—that we are children of immortality. The question, after all, is not so much of the future as of the present. If we think of mere succession of years, no man can lay his hand upon any future day or hour. We must learn to think in terms of continuing growth and far-reaching, broadly planned endeavor. It is not reasonable or becoming in the children of the eternal Father to plan as if they were the creatures of a day. This hour must stand related to the life of God, or it is an hour misspent. So, as the days go on, the faith of the resurrection vindicates itself and assures itself in our enjoyment and employment of the passing hours.

[*Universalist Leader.*]

As we read the story of the Gospels there emerges from their pages the personality of one who impresses us as having found what we all seek, his own will in the will of God. He is no weakling. He moves through the story far and away the strongest character in the whole play. He handles men and truth with the touch of one who never hesitates. He knows what he wants and he moves toward it like a runner whose every nerve is set to attain the goal. Yet there is never haste, never impatience, always the solidity and certainty and unchangeableness of one who feels himself in complete harmony with the universe.

[Rev. Charles E. St. John in *Christian Register.*]

What you can appreciate now of beauty and of inspiration, that is heaven to you now; and, just as fast as you can expand the scope of your imagination, so as to see the glories that God has prepared for the coming of His children, so fast can you broaden and beautify your heaven and make it a condition that shall keep you close to the souls that you love most.

[*Churchman.*]

The demand for dogmatic unity, which means universal agreement upon man-made definitions, has even been the efficient cause of division. The abandonment of that demand will mark the beginning of the healing of divisions.

SPECIAL ANNOUNCEMENTS.

FROM THE PUBLISHER OF MRS. EDDY'S WORKS.

THE CHRISTIAN SCIENCE TEXT-BOOK, "SCIENCE AND HEALTH WITH KEY TO THE SCRIPTURES."—This work contains many important changes and additions by the author, and also contains a photogravure portrait of Mrs. Eddy, together with a facsimile of her signature.

SOME OF MRS. EDDY'S WRITINGS IN NEW BINDINGS.—One volume containing Unity of Good, Rudimental Divine Science, No and Yes, Retrospection and Introspection; a second volume containing Christian Healing, The People's Idea of God, Pulpit and Press, Christian Science *versus* Pantheism, and the Messages of 1900, 1901, and 1902. These volumes are printed from new plates and are uniform in size with the pocket edition of Science and Health. Bound in morocco, limp, round corners, gilt edges, heavy Oxford India Bible paper. The prices of these books prepaid are as follows: single copy, $3.50: six or more copies of either volume to one address, each $3.25.

THE CHURCH MANUAL.—Containing all the By-laws of The Mother Church, The First Church of Christ, Scientist, in Boston, Mass. Each new edition of the Manual will have special notice in the *Sentinel*. Price, single copy, prepaid, $1; six copies to one address, $5; twelve copies to one address, $9.

Attention is called to the Library Edition of Mrs. Eddy's works, description and prices of which will be found on the outside cover page of the *Sentinel*.

Address all orders for books named above to ALLISON V. STEWART, Falmouth and St. Paul Streets, Boston, Mass.

FROM THE CLERK OF THE MOTHER CHURCH.

CHURCH TENETS.—The tenets of The First Church of Christ, Scientist,—The Mother Church,—printed on folded sheet for the use of Branch Churches of Christ, Scientist, with space for the names of churches and their by-laws, can be had at seventy-five cents per hundred.

Not less than one hundred are sold. Postage stamps are not taken for payment.

MEMBERSHIP.—Correspondence relating to membership with The Mother Church, and requests for blank applications for membership, should be addressed to the Clerk.

All correspondence and orders relative to the above should be sent to WILLIAM B. JOHNSON, Clerk, The First Church of Christ, Scientist, Falmouth, Norway, and St. Paul Streets, Boston, Mass.

FROM THE CHURCH TREASURER.

PER CAPITA TAXES.—Per Capita Taxes and Contributions to The Mother Church, The First Church of Christ, Scientist, in Boston, Mass., should be sent to the Treasurer. Please do not send currency.

Remittances for the above should be sent to STEPHEN A. CHASE, Treasurer, Box 56, Fall River, Mass.

FROM THE SOCIETY.

Attention is called to the announcement over our Leader's signature, which appeared in the *Sentinel* of Jan. 9, to the effect that Christian Scientists in the field who send four subscriptions to the *Monitor* for one year, will receive their own paper gratuitously.

The Publishing Society has in stock a number of copies of *Sentinel* No. 6, Vol. IX., containing the article "What Our Leader Says" as last published. As this article is of abiding interest and value to the Field the Society will be glad to supply it, postpaid, at the following prices: 1 copy, 5 cents; 5 copies, 15 cents; 10 copies, 25 cents; 25 copies, 50 cents; 50 copies, 85 cents; 100 copies, $1.50.

On foreign orders add 2 cents a copy to cover postage.

The supply of *Sentinel*, Vol. IX., No. 14, is exhausted.

THE CHRISTIAN SCIENCE JOURNAL

FOUNDED APRIL, 1883, BY THE AUTHOR OF "SCIENCE AND HEALTH WITH KEY TO THE SCRIPTURES," MARY BAKER EDDY, DISCOVERER AND FOUNDER OF CHRISTIAN SCIENCE

This monthly Magazine is the official organ of The First Church of Christ, Scientist, in Boston, Massachusetts, and correctly represents the Christian Science Movement. It contains interesting discussions of the teaching and the practice of Christian Science, and in addition to dissertations, lectures, and contributed articles, publishes always a number of reports from cases of spiritual and physical healing, which practically illustrate the redemptive work of Christian Science.

TERMS OF SUBSCRIPTION: Single copy, one year, $2.00. Quantities TO ONE ADDRESS: ten or more, each, $1.90; twenty-five or more, each, $1.80; fifty or more, each, $1.60. These rates apply in the United States, Canada, Mexico, and Cuba. In all other countries add forty cents for postage on each subscription. Six months' subscriptions received at half the above rates. No subscriptions received for less than six months.

TERMS OF SALE: Postpaid to any address: Per copy, twenty cents. Quantities TO ONE ADDRESS: ten copies, $1.70; twenty-five copies, $4.00; fifty copies, $7.00; in the United States, Canada, Mexico, or Cuba. To all other countries, per copy, twenty-five cents. Quantities TO ONE ADDRESS: ten copies, $2.10; twenty-five copies, $5.00; fifty copies, $9.00.

BOUND VOLUMES: Current year and two years previous, cloth, $2.50; half calf or half morocco, $3.00. On earlier volumes write for prices.

THE CHRISTIAN SCIENCE MONITOR

Published every afternoon except Sunday

A daily newspaper for the home. Adequate news service. The various departments of a modern newspaper. Unique home forum page. Entire page of editorials dealing with the vital topics of the day. Contributions for the columns of the MONITOR should be addressed, Managing Editor, THE CHRISTIAN SCIENCE MONITOR.

SUBSCRIPTION PRICE: For the United States, Canada, Mexico, and Cuba, $5.00 a year, $2.00 for six months; all other countries, $8.00 a year, $4.50 for six months, postpaid. In the Greater Boston postal district the MONITOR will be delivered by carrier through the local news-dealer at the customary rate of 12 cents a week payable to the news-dealer. If desired by mail in Boston district $2.75 should be added to the annual subscription rate to cover extra postage.

The Christian Science Quarterly

Published January, April, July, and October

Contains the Lesson-Sermons which are read at the Sunday Services throughout the year in all the Christian Science churches. These Lessons, which present citations from the Bible and "Science and Health with Key to the Scriptures," are valuable for daily study.

TERMS OF SUBSCRIPTION: For one year, 50 cents; fifty copies or more to one address, 50 cents yearly for each copy. Foreign subscriptions, 60 cents. Yearly subscriptions only received.

TERMS OF SALE: One or more copies, postage paid, each, 15 cents; fifty copies or more to one address, each 12½ cents, postage paid.

Der Herold der Christian Science

Published Monthly.

A magazine printed in German, which publishes original and translated articles bearing upon Christian Science, and also testimonies of healing from Germany and America. It contains about thirty-eight pages of such reading matter, also the Lesson-Sermons which are read at the Sunday services in all the Christian Science churches, and is valuable as an authorized representative of the movement.

SUBSCRIPTION PRICE: For the United States, Canada, Mexico, and Cuba, 10 cents a copy, $1.00 a year in advance; all other countries, 12 cents a copy, $1.25 a year, postpaid.

Five cents a copy, postpaid to any address in the United States, Canada, Mexico, and Cuba. In quantities to one address: twenty-five copies, $1.00; fifty copies, $1.80; one hundred copies, $3.00.

To all other countries, six cents a copy, postpaid to any address. In quantities to one address: twenty-five copies, $1.25; fifty copies, $2.30; one hundred copies, $4.00.

Bound Volumes: Current year and two years previous, cloth, $3.00; half calf or half morocco, $3.50. On earlier volumes write for prices.

Entered at the Boston, Mass., post-office as second-class mail matter.

ITEMS OF INTEREST.

National.

President Eliot of Harvard was invested last week with the decoration of the first class of the Order of the Rising Sun of Japan, by Baron Takahira, Japanese ambassador, acting for the Mikado. In making the presentation, the ambassador said: "The Emperor, my august sovereign, fully appreciative of the great services you have rendered for the welfare of human life as one of the foremost educators of the age, and for the making of many useful men of Japan who have come here to study at Harvard University during the forty years of your presidency over that institution, thus largely contributing to the advancement of our country, has been graciously pleased to confer upon you the grand cordon of the Imperial Order of the Rising Sun, as a mark of his Majesty's good will toward you."

In view of the inefficiency and practical insubordination among the Spanish, Italian, and Grecian laborers on the Isthmian Canal, Chairman Goethals has given notice to the consuls from these countries that he intends to place the laborers from their respective countries on the same footing as that upon which Americans must labor on the Canal. On account of the contractual obligations recognized by the Canal Commission in importing European laborers, they have been permitted hitherto to retain their special checks, which entitled them to receive twenty cents an hour, American currency, even though their services were unsatisfactory. This, and freedom from fear of dismissal, have resulted in the European laborers deliberately reducing the output of their work.

A permanent injunction, restraining from operation the Fiber and Manila Association, under which name it was charged that twenty-five paper manufacturing concerns had formed a combination in restraint of trade, was ordered in a decree handed down in the United States Circuit Court at New York last week. The companies composing this association were fined $2,000 each in June, 1908, for membership in the combination, which is now ordered to be enjoined.

The total excavation at the Panama Canal Zone for the month of April was 3,454,649 cubic yards place measurement. Total amount of excavation since May 4, 1904, when the United States began the work, has been 73,124,849 cubic yards, more than half of which has been taken out in the last twelve months. There remains to be excavated 101,541,746 cubic yards, estimated.

A two-million-dollar taxicab combination effecting the consolidation of four of the largest taxicab companies in Chicago, has been launched. The new concern is to be known as the Chicago Taxicab Company and, it is stated, will control approximately sixty-five per cent of the taxicab business of Chicago.

Indictments for conspiracy have been found by the Federal grand jury at New York against the former superintendent of the docks of the American Sugar Refining Company in Brooklyn, and six other employes of the company, alleged to have been implicated in the sugar underweighing fraud.

The United States Circuit Court of Appeals has decided that the earthquake of April 18, 1906, was not the cause of the fire that occurred after the earthquake. The decision affects favorably several hundred suits pending against insurance companies for losses suffered in the great fire.

A movement is on foot to make the office hours of Government employes in Washington from 8 to 3.30 during the summer months, instead of from 9 to 4.30, the present schedule, as this would give greater opportunity for the enjoyment of outdoor pleasures.

An anti-tipping law in the state of Washington goes into effect in June. It prohibits the giving of tips to employes of public houses or public service corporations, and one who gives or receives a tip may be fined $250 or imprisoned ninety days.

The biennial conventions of the Order of Railway Conductors of America and of the Ladies' Auxiliary were held in Boston the past week. It is estimated there were between seven and eight thousand persons in attendance.

Savings bank deposits in Massachusetts exceed $710,000,000, and there are nearly two million depositors with an average deposit of about $359.

The annual meeting of the General Society, Daughters of the Revolution, was held in Boston last week.

About twenty-six million immigrants have come to the United States since 1820.

International.

The British, French, and German financiers have come to an agreement with reference to the Canton-Hankow Railway loan, which the Chinese government awarded recently to the Germans, whereby the British and French are admitted to participation. The Germans also have withdrawn from the construction of the road and will have no part in controlling the expenditures. In return for this concession the Germans will have a share in the Hankow-Szechuen Railway loan of $12,500,000. At the joint proposal of British, French, and Germans, the Canton-Hankow loan has been raised to $27,500,000.

The Russian Douma has passed the third reading of the agrarian legislation which dissolves communal institutions and will facilitate the transfer by peasants of property to individual ownership. The vice minister of the interior announced that up to Jan. 1, 1,300,000 peasants had declared their intention of withdrawing from the communes and that of these six hundred thousand already had obtained title-deeds to individual holdings.

The continued opposition from Russian reactionaries and courtiers near the Czar threatened to bring about the resignation of the premier and his cabinet. The demand was made that the Czar support the policy of the cabinet in the appointment of a general staff for the navy and dissociate himself from the hostile campaign. The matter has been satisfactorily adjusted and the crisis has passed.

The Cunard line steamship Mauretania on her last eastward trip beat her own previous and all other eastward records by twenty-four minutes. Her time from the Ambrose lightship to Daunt's Rock was four days, eighteen hours, and eleven minutes. She covered the entire distance, 2,935 knots, at an average speed of 25.70 knots an hour. The daily runs were 588, 605, 610, 600, and 532.

Arrangements are being conducted at The Hague for the hearings of the Anglo-American fisheries questions by the Court of Arbitration toward the end of 1909. It is expected that the arbitration of the questions in dispute between the United States and Venezuela will be taken up early in 1910.

The British government has appointed a commission to investigate and conduct experiments in aerial navigation.

Industrial and Commercial.

The Baldwin Locomotive Works has just turned out two powerful engines, for use on the heavy grades of the Harriman lines in the Sierras. The capacity of these engines is double that of the heaviest now in use on that road. The new engine weighs 600,000 pounds, including the tender, which carries 9,000 gallons of water and 2,250 gallons of oil, it being an oil burner; its length over all is 93 feet 6½ inches; driving-wheel base 29 feet and 4 inches, and its weight on the drivers is 390,000 pounds. Each of these engines cost $35,000.

Print paper and other pulp products are now being manufactured of okra stalks. The woody fiber of the stalk is used for paper making and the tough outer bark for making twine, string, and rope. The paper bleaches as well as that made from white wood pulp and without destroying its tensile qualities.

The total mileage of railroads operated under the block system on Jan. 1, 1909, was 59,548 miles, a net increase during the year of 870 miles. The manual block mileage has decreased during the year 517 miles, while the automatic block mileage has increased 1,387 miles.

Trade conditions in practically all sections of the commercial world show a decline, measured in values of merchandise imported and exported, as compared with those of a year ago, according to figures of the Bureau of Statistics.

Fall River cotton mills for the second quarter of 1909 have declared dividends amounting to $306,400 on a total capitalization of $20,525,000, an average of 1.59 plus per cent.

General.

To cope better with fire among inflammable liquids a German has devised an apparatus consisting of a metal cylinder, provided with a long spout, and divided into two chambers, one charged with an aqueous solution of potash, alum, and sodium sulphate, the other with a similar solution of sodium bicarbonate, sodium sulphate, and licorice root extract. The result of the chemical action when the liquids are mixed is the production of carbon dioxide, which, in contact with the licorice solution, forms an exceedingly stiff and persistent foam. Such a layer of foam, containing an inert gas, upon the surface of a burning liquid effectually cuts off all access of air, and combustion ceases.

CHRISTIAN SCIENCE SENTINEL

"WHAT I SAY UNTO YOU, I SAY UNTO ALL — WATCH" JESUS

NOT EXPLANATION BUT CORRECTION.

SAMUEL GREENWOOD.

THE writer is in receipt of a list of questions which practically cover the entire problem of human existence and destiny, but he could only refer the questioner to the Christian Science text-book for his answers. The teachings of Christian Science, as elucidated in Mrs. Eddy's writings, afford the only scientific or effective explanation of the phenomena of mortal existence, an explanation which divests the material concept of all claim to reality, and reveals the allness of God. The purpose of Christian Science is to deliver mankind from their belief that intelligence and life are separate from God, not to solve any mysteries or accept the illusions of that belief. As has been well said, it is not explanation mortals need, so much as a knowledge of the truth that makes free.

The difficulty sometimes experienced in readily apprehending the teachings of Christian Science is largely due to one's former education, wherein good and evil were held to be equally real, and man to be of both human and divine creation. It is obvious that Christian Science would seem obscure viewed from that standpoint. Believing in evil as real, mortals naturally believe it to have a real origin, and until the infinitude of God is discerned in Christian Science their search for that origin goes on. When the ordinary person begins to look into the subject of Christian Science he generally measures his concept of it by his former beliefs, or attempts to reconcile the new with the old, but in either case he usually encounters many problems which he thinks should be explained. Even after the new student becomes convinced of the truth of Christian Science, he is apt to ask the how and the why of conditions which he admits are not true, not realizing that, in asking these questions, he assumes that error has some truth to be explained.

All that any one needs to be saved from is error of some sort. The boy who knows that two and two are four needs no salvation from such knowledge, because it is true; but the boy who believes that two and two are five does need salvation from that belief, because it is not true and leads to wrong results. When he learns the mathematical truth involved in that problem his salvation from mathematical error is accomplished, for his false belief is thereby destroyed. Now if this boy were to ask an explanation of how he came to believe that twice two are five, what would you answer him? How would you account for the figure five on his slate? What could you truthfully tell him except that it was a mistake, and therefore not true? Evidently the only effective way to explain the situation would be to prove to him that twice two are four, which would leave no error to be explained. In like manner, the only effective way to solve the problem of evil is to demonstrate the reality of good. To attempt the explanation of what one believes to be untrue is to place oneself in the predicament of having to be saved from his own explanation.

Error may properly be defined as ignorance of truth, and evil as ignorance of good; and the conclusion may be correctly drawn that, since ignorance is but the negation of knowledge, these conditions cannot in any true sense be known or understood. But logic alone does not dispose of this problem. Errors call for correction, and nothing short of their correction will eliminate them from human belief and experience. Mortals do not reason on this subject from abstract conclusions. Here, they say, are so much crime, disease, sin, sorrow, pain, poverty, death, holding the preponderance in human consciousness, and what are you going to do with them? What is to stop their pernicious influence in human life? Christian Scientists do not meet this position with counter-arguments, nor confine their answer to an abstract denial of these conditions, but they point to the practical operation of Christian Science in ameliorating and destroying human sin and suffering. What other explanation can one give of the unreality of evil?

Mortals may be sure that the belief in evil will continue its delusions until the omnipresence of God is recognized and demonstrated; but in the degree that good is allowed to dominate consciousness, evil becomes literally nothing, and its mystery vanishes with it. The individual demonstration of divine Love destroys hate so thoroughly in that person's thought that it needs no explanation; and so with all the phases of evil. But, you say, thus to overcome all evil will take a long time, and what is one to do meanwhile with all the difficult questions and unexplained points involved in his problem? Nothing is worth doing at any time but to demonstrate the allness of God, good; and if this work fully occupies one's thoughts, he will not trouble himself about having the mistakes of mortals explained.

It is not only difficult but impossible to see truth clearly from opposite standpoints, for contrary premises imply contrary conclusions. The real need of mankind is not to have the phenomena of evil and matter explained, but to turn their thought away from these conditions and seek the spiritual understanding of Life, for in no other direction can harmony be reached. The material sense of man and the universe is an error which only the spiritual sense of being corrects. If the student becomes perplexed over "the mysticism of opposites" (Christian Science *vs.* Pantheism, p. 13), he should cease his puzzling and get to work. One form of error corrected or one experience of discord destroyed, on the basis of Christian Science, presents a more satisfactory solution of the human problem than all the fine-spun theories or arguments one might put forward in a year.

How soon do you think the boy would solve his problem of the addition of two and two so long as he waited for an explanation of his mistake, or while he persisted in retaining the wrong figure in his work? Yet are not mortals working just as absurdly at their life-problems in clinging to the thought of both good and evil as realities? Our work is different from the boy's only in the kind and degree of the errors confronting us. Admitting that God is

Copyright, 1909, by Mary Baker Eddy.

Digitized by Google

infinite, it is inevitable that evil of all kinds is as much an error as the boy's belief that two and two are five, and like that error it is capable of correction but not of explanation. We can see how the correction of any one error places it beyond the need of explanation, then why not apply that fact to every unsolved phase of our problem, in the assurance that all sense of an opposite to infinite good will disappear as the truth of being is better understood and God is seen to be All-in-all.

The sooner the student realizes that only truth can be explained or understood, the sooner he will be ready to work out his salvation intelligently, and to enter into the fruition of that work. Christian Science defines and explains the infinite nature of God and His creation as divine Principle and idea, and this explanation is healing sin and discord constantly, showing that it has been correctly given; but no amount of attempted explanation of error can correct a single mistake or solve the smallest problem.

Christian Scientists have learned the folly of attempting to explain or account for conditions which they know are untrue, for their whole attention is needed in gaining that knowledge of Truth which corrects these errors. In Christian Science as in mathematics the explanation and correction of error are one and the same. Whatever offers to explain evil while leaving it still in the field, is an error of itself, and is a case of the blind leading the blind. The basis upon which Jesus taught and performed his works was that God is All, and consequently that evil—whatever is unlike God—is a lie; and this is the basis of Christian Science.

CIVIC DUTIES.

JUDGE JOHN D. WORKS.

CHRISTIAN SCIENTISTS are growing so rapidly in numbers that their influence in the affairs of government should be recognized as a power for good and a support for civic righteousness. Many seem to hesitate to take an active part in public affairs and the administration of government, national, state, or municipal, a hesitation based upon the theory that our work is spiritual, therefore we should take no part in material affairs or the administration of human laws. This, however, is a mistake that may deprive Christian Scientists of much of the influence which they might and should exert for the betterment and purification of politics and official service, and for the elevation of the public conscience. Human laws are, or should be, founded upon the divine law. Their enforcement should be with a view to the reformation of the criminal, the guardianship of the morals of the people, and the attainment of justice among men. The laws of a country may be just, equitable, and humane, but their proper administration and enforcement depend upon the election to public office of just, upright, and humane men. If this is not done, just laws in themselves amount to but little.

One of the greatest and most sacred duties of the electors of a country is the faithful and intelligent exercise of the elective franchise. In this country it lies at the very foundation of our free institutions, by which the responsibility of government is placed not upon kings or a selected few, but upon the people at large. Every man is himself a ruler, and his duty as a citizen of a country like ours is a sacred trust. This trust is shared by every Christian Scientist, and he should not, he cannot, escape it by the argument that his work is spiritual and not material. We are glad to make every exertion to improve our health, even in a physical way, and to free ourselves individually from sin and disease. This we do by the elevation and purification of thought, the overcoming of the propensity to do evil or even to think it. So we should do for the body politic. Our work for the public welfare should be for the elevation of thought in public affairs, and for civic righteousness. One of the means at hand, and of which we should make use, is the elective franchise. None but upright and trustworthy men should be elected to office. Thus only can the just enforcement of the laws making for civic virtue and righteousness, and against evil in all its forms, be secured.

Christian Scientists should not be partisans. Above all things, they should stand for righteousness and justice in public as well as in private life. When the *Monitor* was instituted, Mrs. Eddy was asked by the public press to make a statement of her politics. Nothing could be clearer or more succinct than her reply: "I have none, in reality, other than to help support a righteous government; to love God supremely, and my neighbor as myself" (*Christian Science Sentinel*, Nov. 7, 1908).

Not long since, this entire nation was doing honor to one of the greatest of American citizens, Abraham Lincoln, chiefly because of his devotion to duty as a servant of the people and his unswerving honesty and integrity in public office. Christian Scientists joined heartily and sincerely in these public expressions of love and appreciation of his unselfish devotion to and loving sacrifices for the country and its people, as well they might. Abraham Lincoln's life was one to be emulated, his example of private and public virtue and righteousness one to be followed. How can we better follow that example than to stand, as did he, for all that is good in public life? His religion was not of creeds, or even of churches, but his faith in God was unbounded and his life one of consecration to duty and love and charity for his fellow-men.

Christian Science is not a religion of creeds or dogmas, but of good works. It is not a religion of mere theories, but of practical usefulness in every walk of life. Our religion stands for civic righteousness, as well as devotion to duty, wherever we may be placed. The public service needs to be elevated and purified. The morals of the people, especially in the larger cities, need to be protected. In every effort to bring about better things, in both the enactment and enforcement of the laws and the elevation of the public service, Christian Scientists should be found in the forefront of the battle; but in this, as in all things, wisdom must be sought. Personality should have no place in our striving for civic righteousness. Evil should be rebuked, but without malice. Public trust should be placed only in the hands of the worthy and withdrawn from the unfaithful. Christian Scientists should stand rigidly for right conduct and faithful service in public office.

The teachings of Christian Science, if heeded, cannot fail to make better citizens and more efficient as well as more upright and conscientious public servants. Christian Scientists should stand in the very front rank of the best citizens, ready at all times to strive for the best in public as well as in private life. Are we doing our full duty in this respect, or are we content to leave the labor of elevating the citizenship of our country to others less able to deal with the subject scientifically and as the teachings of Christ Jesus would require us to deal with evils which affect the public welfare?

The Christian Scientists of Los Angeles, the writer's own city, have lately been put to the test in respect to the duty they owe their municipality as good citizens. Public reforms have been before the people in the form of proposed amendments to the city charter, tending to take the election of city officers out of the hands of political bosses and manipulators and place it more securely in the hands of the people, followed by the enforcement of what is known as the "recall," to oust any officer charged with having been unfaithful to his trust. In these movements, so necessary for the public welfare, Christian Scientists have borne an active and prominent part, taking their stand firmly for purity in politics and fidelity in public office. They have openly identified themselves with the advocates of civic righteousness and purity of life, as the opponents of vice and evil in all its forms, with which evils the officers of the

Digitized by Google

city are obligated to deal. Christian Scientists can do much, if they will, to accomplish right results, in the right way, in the attempt to reform conditions and overcome evil, without the bitterness and ill will that generally accompany such a struggle against evil; and also to set an example of the right method of overcoming evil, namely, without the malice or vindictiveness toward persons so common in controversies of this character.

Our Leader has at all times taken an active interest in the welfare of the nation, as well as of her state and the community in which she has made her home. She has made it clear by her own example that Christian Scientists should be not only good citizens themselves, but active in the effort to bring about better and more wholesome conditions in public affairs and higher ideals of government and official duty. Her patriotism is a marked characteristic of her life of usefulness and devotion to the welfare of humanity. It has been marked not alone by passive sentiments, but by active interest in good works intended for the advancement of the public welfare.

Let us not be found among the self-righteous or "holier than thou" citizens who hold themselves too good to participate in politics; nor with the selfish seekers for wealth who can find no time to devote to the affairs of their country. Christian Scientists should be instant in action where the public good demands action, and self-sacrificing in the support of every conscientious effort to better conditions in governmental affairs, from the nation down to the smallest political division in which officers are to be selected and public services rendered. They should not shun the duties and responsibilities of electors, because politics are corrupt and public position as a consequence without honor, but they should seek in every right and honorable way to purify politics and make office honorable and honored among men. This is a civic duty that no good citizen should neglect.

SELF-EXAMINATION.

HATTIE S. GALE.

How can we at this period, as students of Christian Science, answer a few questions that must necessarily arise in the thoughts of all wide-awake, active, loyal workers in our beloved Cause? When I think of the wise moves that have been made by our dear Leader, in the giving up of our yearly gatherings and "greetings," I am impelled to write what has come to me many times, and now in a more searching manner than ever before; and I am asking myself questions like the following: Am I a Christian Scientist? Mrs. Eddy says in Science and Health (p. 192), "We are not Christian Scientists until we leave all for Christ." How much am I giving up for our Cause and for all mankind? Would I study our Leader's works just as faithfully if no person knew how much or how little I did? Would I be just as loyal if our Leader did not know me? Would I attend all the church services if no person knew me? Would I take patients who could not pay just as readily as those who could? Am I actuated in my daily life-work by Principle, or personality? Am I judging my brother by the personal senses, or seeing him as reflecting the Father's image? Am I holding thoughts for all mankind that will purify and heal? Am I myself reflecting Love as taught through the understanding of Science and Health? Am I living the Golden Rule?

These and many other questions come to me so often that I am constrained to give expression to them, for we who are students of Christian Science have "enlisted to lessen evil, disease, and death" (Science and Health, p. 450); and how shall we accomplish this work unless we reverse the evidence of the senses and see man as God sees him, keeping ever in thought the perfect model? We have had sufficient teaching, and we have our Leader's works and the example of her unselfish and untiring devotion to Christian Science and to the whole world. Let us therefore put down self and go and do likewise. Let us overcome personal likes and dislikes and put our understanding of the truth into practice, that our lives and our works may prove that we have something which the world can neither give nor take away.

MATHEMATICS AND SPIRITUAL PROGRESS.

WILHELM SEGERBLOM.

MANY a beginner in Christian Science finds it difficult to grasp the conception of the infinity of Life, Truth, and Love; in other words, the conception of the allness of God. The writer has been helped to grasp this concept by a thought of mathematical relations, and he ventures to speak of it with the hope that it may be of help to others.

The student of arithmetic often indicates a case of division by the use of a common fraction, putting as the numerator the number to be divided, and as the denominator, the divisor. He gets as many common fractions as he has cases of division. When he advances to the study of algebra and uses the letters a, b, c, etc., instead of actual numbers, he still finds that he can indicate a case of division by a common fraction. For instance, if he wishes to divide some definite number that for the moment is represented by a by some other definite number that for the moment is represented by b, he uses the fractional form, a/b, and this means as much to him as did the fractions he manipulated in arithmetic.

Let us look at our algebraic fraction closely. Suppose in a given case a equals 100 and b equals 50; the answer of course is 2. Now suppose that a remains constantly 100 but that b changes gradually; if b equals 25 the answer is 4; if b equals 10 the value of the fraction is 10; if 5, the value is 20. It will be readily seen that, given a constant numerator, as the denominator decreases the value of the fraction increases. When b equals 1 the value of the fraction is 100, and as b gets still smaller, *i.e.*, less than 1, and approaches zero, the value of the fraction increases and is now more than 100; for instance, if b equals 0.5, the value of the fraction is 200. It can easily be proved by the theory of variables and limits that as b approaches zero the value of the fraction gets larger and larger, and reaches infinity when b reaches zero.

By this time the reader will probaby have seen that those poor mortals who have not yet learned the method of evaluating themselves according to the method prescribed by the great Teacher and Wayshower, are still "common fractions," generally less than unity in value, and not able to reach a constant value because they "denominate" themselves mortal, that is, have mortal or material beliefs for their denominators. On the other hand, the student of Christian Science, having proceeded to the advanced mathematics of being, is an "algebraic fraction." The denominator (his material beliefs) is gradually decreasing, while his numerator (the Principle of his being) remains constant; and as his material beliefs approach zero or nothingness his value increases ("unto him that hath shall be given"), until with the final and complete disappearance of material concepts the real man stands revealed, at-one with infinite Mind, Spirit, Truth, God.

Furthermore, as the common fractions with their individual and separate values represent (mortal) "minds many," so the algebraic fractions represent those who are becoming of one Mind because they are all approaching the same infinite value. In this connection it is interesting to read Mrs. Eddy's definition of "man" on page 591 of "Science and Health with Key to the Scriptures:" "The compound idea of infinite Spirit; the spiritual image and likeness of God; the full representation of Mind."

THE NOTHINGNESS OF EVIL.

L. N. BLYDENBURG.

THE effort to destroy evil does not really arouse it to increased activity, although it may seem to do so. It only throws a stronger light on evil and brings it into stronger contrast with good, thus presenting a vivid mental picture of evil, which gives the impression of aroused activity. Notwithstanding we are taught the nothingness of evil, and that it has no power, except the seeming and temporary effect which false belief gives it (though evil has in fact no intelligence), we sometimes hear it said that evil is subtle, aggressive, arrogant, aroused, active, etc., when it is only seemingly so. To those who understand the teaching of our Leader, and who know that evil has really no power, these expressions may not be misleading, but to others they are contradictory and seem to imply an independent intelligence and active energy in evil. For such, an explanation of the cause of the seeming activity of evil may be necessary.

Mrs. Eddy writes "Evil calls itself something, when it is nothing" (Science and Health, p. 287). Christ Jesus characterized the belief in evil as a liar from the beginning. The following may serve to furnish a practical illustration: An evil habit has been acquired, and the victim of the habit, upon realizing that it is abnormal and vicious, is seeking to abandon it. So long as he continued to indulge the habit, he did not realize its negative strength; but once resistance to it becomes active, the habit seems to take on activity to hinder its destruction. The real activity is in the direction of reform, which unmasks the power of a habit that is based entirely on the false belief in the desirability of the harmful course of action. When the belief is destroyed which was the sole source of the seeming power of habit, the destruction of the habit follows as a natural consequence, and right living asserts itself as the only real way, for there is no intelligent reason for the continuance of any wrong habit, and the governing impulse of the habit is entirely destroyed because it had no foundation in the law of God, good. It is then seen that the habit was destroyed when ignorance of the truth was dispelled.

Christian Science teaches that good is active and positive. Evil seems resistant only because of human ignorance and the failure to perceive the power of good. Evil seems attractive only to those who are ignorant of good; it is repulsive to those who have the understanding of good, and this is the law of the destruction of evil. The seeming power of evil is in inertia and stagnation, not in progress and unfoldment. We become conscious of the seeming resistance of evil when we attempt progress in the line of right thinking and doing, and therefore it seems to become aroused and active, but if active efforts for reform continue, the seeming power of evil diminishes to the degree that the power of good governs our actions. The railroad train, when it is standing still, has the same resistance of inertia to the power which causes motion, as it has when the attempt to start is made, but it is not noticed till the driving-wheels of the engine begin to slip on the track and the friction so caused generates the flying sparks. The false mortal sense which fails to perceive the eternal activity of good, makes evil appear to mortal sense and produces the destructive friction of evil in mortal existence.

Truth understood reveals only the eternal harmonies of the universe of God, good, and destroys forever the belief in the reality and power of evil. "Thou art of purer eyes than to behold evil, and canst not look on iniquity," says the prophet. Christian Science teaches that as there are no false mortal beliefs in the consciousness of God, therefore evil has no place in the divine consciousness.

SELECTED ARTICLES.

[A. E. Goodson in *Detroit* (Mich.) *Journal.*]

Permit me to voice my sentiments on the recent vitriolic attack of a clergyman against Christian Science in your issue of April 12. It is characteristic of the middle ages, but, thank God, we of the present day are living in an enlightened age. The truth will prevail in spite of any organization that would attempt to smother thought. It might as well protest against the great sea waves, as to attempt to stop the progress of any movement whose only aim is the spiritual uplift of humanity. I am not writing as a Christian Scientist, as I do not belong to any church and only recently have I looked into their tenets. Up to that time I was in an infidel state of mind. Speaking from personal experience, I will say that since my investigation of the subject, I view the Bible from a very different standpoint than formerly.

This critic says, "We are at fault in not defending the gospel. Christian Science is the worst form of heresy that confronts the true teachings of the Scriptures, and hardly a page of the Bible is not contradicted by it. It is superlative idiocy, and the most insidious, dangerous, and destructive thing that opposes itself to the gospel of Jesus Christ." Assuming that he has been correctly quoted, it seems to me his criticism is harsh and decidedly unchristian. I would ask him to open his Bible at the seventh chapter of Matthew and read the first five verses, which will give him some good advice from the Master himself. Why "superlative idiocy"? Simply because it has ideas not contained in his creed? Because we do not understand a thing is no reason it may not be a fact.

I would suggest to this brother that he go to the Christian Science church, to the experience meeting, some Wednesday evening, and go early, as there are no vacant seats after 7.40 P.M. I think he will have a change of heart. At a recent meeting which I attended, out of curiosity, the speaker asked all those who had been benefited by Christian Science to rise. Out of a congregation of eight hundred people, fully seven hundred arose. To me, they appeared like very intelligent people. Were these people "dupes, idiots, deluded"? They did not look it to me. "Judge not, that ye be not judged," said the Master. This is just as applicable in 1909 as it was when uttered. Jesus was reviled and persecuted, and even put to death. He said, "Father, forgive them; for they know not what they do." From what I have heard of Mrs. Eddy, she takes this stand toward critics such as this brother. I wish he would read the thirteenth chapter of I. Corinthians. If he, then, has anything further to say, say it; if not, forever after hold his peace.

[Olcott Haskell in *Palo Alto* (Cal.) *Times.*]

Whenever knowledge of any science is accurate and exact, then we find absolute agreement among all faithful students of the subject; but such uniformity of thought and action cannot rightly be attributed to the following of any personal leader, for it is the unity of the subject-study that produces unity among its students. So it is with Christian Scientists. While they love and respect their teacher, Mrs. Eddy, yet it is not the following of her personality that has given life, growth, and unity to this movement. Every student is encouraged to discern the great truths of God and man for himself; and every practitioner must absolutely succeed in doing this, or he can have little success in helping others. Such workers have long ago learned that the problems of life are not to be solved by any creed or formula, but must be met on the ground of understanding—even that under-

Digitized by Google

standing which reaches results through the application of divine Principle.

Those of the onlookers who today acknowledge that Christian Science does produce results in the healing of both sickness and sin, but who have not yet looked long enough nor deep enough to discern the underlying Principle, adopt the most absurd theories to account for these successes. No action can be correctly explained to a thinking mind without the admission of intelligence—Mind, and since matter is not self-intelligent, we are forced to the recognition of an intelligence apart from and above the forms of matter. Defined thus, intelligence, or God, is the Principle of all true being, and the universe may then be consistently explained. This was the truth upon which Jesus stood, and all his acts were natural deductions from this premise of the rule of a good, all-powerful, and intelligent God.

We may enlarge upon this concept of God by employing different terms to express different views of His all-inclusive nature. Thus Mind may be used as a synonym for God if by this term we mean not the circumscribed and sinful human mind, but the infinite, loving, acting intelligence of the universe. Similarly Life may be used as a synonym for God, if it is taken to mean the Life of all life, the living, loving Principle of all true being. Thus used the words mind and life should always be written with initial capital letters, to distinguish such usage from the commonly accepted association of life with organized matter and animal forms.

[J. V. Dittemore in *New Rochelle* (N. Y.) *Standard.*]

The attempt to belittle the efforts of Christian Scientists because the results of their practice are not always instantaneous will not find a very hearty response in the minds of just and tolerant readers. If consecration and earnest prayers are of any avail, the healing works of Christian Science will continually approach a greater degree of efficiency. Our critic should rejoice in the accomplishment of good through any system, instead of endeavoring to tear down and destroy simply because the convictions of his fellow-religionists are not in strict conformity to his own. Christian Scientists do not boast. They do not consider themselves better than others. They only try to be grateful that they are better than they formerly were.

[Alfred Farlow in *Bloomington* (Ill.) *Pantagraph.*]

When the Master of Christianity declared, "It is the spirit that quickeneth; the flesh profiteth nothing," he evidently meant that the only thing which gives life and existence to creation is Spirit, and that the flesh, which means the physical or material in contradistinction to the spiritual, is altogether unprofitable. Why unprofitable? What can be the constituency or nature of that which our Lord declared to be altogether unprofitable? Science teaches that the material is simply a material sense of the spiritual and real universe; that creation exists as it was primarily created, and has never lapsed into a material condition. Jesus said, "That which is born of the flesh is flesh; and that which is born of the Spirit is spirit," which implies that Spirit is not the author of matter, is not the author of the physical or material. The Scriptures declare that God saw all that He had made, "and, behold, it was very good," and that "without him was not any thing made that was made."

We have now established two premises from a Scriptural point of view: first, that God is Spirit, Mind, Truth, Love, good; second, that His creation is spiritual and not material. These are the premises in the Christian Science syllogism. We do not contend that they accord with material observation, nor do we contend that they are acceptable except to those who are willing to accord first place to the spiritual, and to accept the Scriptural teaching that the material is altogether unprofitable.

Our critic declares that "science tends to show that Spirit and matter are only different forms of the same thing; just as (for analogy) ice and water are different aspects." This amounts to a declaration that matter is Spirit in the process of cooling, or that Spirit is matter in the form of steam. Moreover, it is a pantheistic belief, since it implies that the creator and creation are identical. It contradicts the Scriptural teaching which draws a distinctive line between matter and Spirit. It also contradicts the teaching of "ordinary science," that the effect must be like its cause, all of which we conclude by the use of the "dictionary."

[W. J. Bonnin in *Southport* (Eng.) *Visiter.*]

That Mrs. Eddy, by her years of unswerving loyalty and courage in the cause of a pure, practical, and sustaining Christianity, has enabled a great multitude to share in the peace and happiness and freedom that Christian Science stands for, is certainly true; and it is also true that there is, as a consequence, bestowed upon her a wealth of gratitude earned by but few in the history of the world. Christian Scientists know, however, that nothing beyond this is either desired or accepted; indeed the occasions have been by no means rare when a gentle, but none the less pointed, rebuke has been administered, where an exuberant gratefulness had induced a confusion of Principle with personality—that first step in the direction of apotheosis so fatal to many a good man and many a good cause.

Christian Science rests solely upon the basis of absolute and demonstrable truth, and as a demonstrable religion, and only as such, does it stand and does it hope to stand. It is turning people to the consideration of the real in place of the supposititious, the eternal in place of the temporal, the good in place of the evil. It will be seen that such a religion can no more truly be said to rest upon the personality of its discoverer than can wireless telegraphy be said to rest upon the personality of Marconi, or America to rest upon the personality of Columbus.

[Frederick Dixon in the *Onlooker*, London, England.]

Christian Science teaches that the effect of drugs and food on the human body is the result of the belief attached to them, and that consequently, speaking absolutely, there is no difference between them. The relative force, however, of these beliefs varies very considerably. No one presumably believes that a drug is necessary to existence, but the entire world believes that food is. The Christian Scientist, therefore, who overcomes sickness without the use of medicine merely proves that it is possible to heal without the use of a drug; the Christian Scientist who succeeded in doing without food would have triumphed over death. Paul wrote to the church at Corinth: "The last enemy that shall be destroyed is death." At the same time Christ is the way, and Christ Jesus showed, in the temptation in the wilderness, that man could subsist without food, just as he showed in his ministry of healing that every manner of disease could be destroyed without the help of material means.

[Gray Montgomery in *Leadville* (Col.) *Herald-Democrat.*]

Christian Science is the fulfilment of the teaching of Jesus the Christ. Thousands of intelligent people, healed through its ministrations, subscribe to its religious tenets, which endorse the sacred and inspired teachings of the Bible and acknowledge Christ as the Son of God and the Wayshower. Christian Science teaches the allness of

Digitized by Google

God, or divine Mind, and His manifestations, but it does not deny nature nor its beauties. Christian Science gives the student a keener delight, a more vivid appreciation, and a grander and higher concept of nature. His mental view is lifted away and above the fading material sense of things up to the spiritual facts of existence, so that his sense of nature becomes more beautiful. Mrs. Eddy says (Miscellaneous Writings, p. 331): "As mortals awake from their dream of material sensation, this adorable, all-inclusive God, and all earth's hieroglyphics of Love, are understood; and infinite Mind is seen kindling the stars, rolling the worlds, reflecting all space and Life,—but not life in matter. Wisely governing, informing the universe, this Mind is Truth,—not laws of matter." We learn, therefore, from Christian Science that matter is but the concept of the mortal mind, and when hatred, malice, envy, sensuality, and error in its many other forms are displaced by truth, the perfect Mind that Christ Jesus possessed is gained, the true sense of creation is understood.

In referring to material objects Christian Scientists use the same terms as material scientists, but to reach the spiritual understanding of God and His universe it is necessary to adopt a more spiritual terminology and vocabulary, as the terms of the material scientists and the language of the shop and the street are inadequate to explain spiritual truths. The earnest Christian student, willing to learn and accept the definitions of the metaphysical words used, can readily comprehend the teachings of Christian Science. Instead of denying "that God made the heavens, the earth, and the star," Christian Science teaches that "the heavens declare the glory of God; and the firmament showeth his handywork."

It is alleged that "in the face of fever and pestilence, Christian Science says that none of these things exist." Christian Science recognizes that while these errors may seem real to human mortal sense, they are destroyed by the realization of God's infinite love to man, and by understanding that "God saw every thing that he had made, and, behold, it was very good."

[Charles B. Jamieson in *Foster's Democrat*, Dover, N. H.]

Through understanding that God is Spirit and All, the only cause and creator, and that Spirit's substance and creation are spiritual, Christian Science overcomes the carnal belief in material cause and material effect, and thus destroys the results of such belief on the body, thereby healing the sick and reforming the sinful by this spiritualization and purification of consciousness from material sense. This was the method of Christ Jesus, and is Christian Science. Therefore the difference in the method and practice of Christian Science and that of all other systems is fundamental.

[John L. Rendall in *Muscatine* (Ia.) *Journal.*]

It is very true that Christian Science considers much of the dogma and creed, much of the man-made systems and beliefs which pass current as Christianity, as unnecessary and superfluous. It is also true that "Christian Scientists claim the commission given to the disciples was for all time." This is because Truth is infinite, unlimited; because God changes not; in Him, as the apostle James states, is "no variableness, neither shadow of turning;" it is because the Christ is "the same yesterday, and to day, and for ever."

Christian Scientists recognize clearly that to the mortal sense of things which Paul described as the "carnal mind," sin, disease, and death are very much of a reality, and that all the reality there is to these things is fully covered in his statement, "To be carnally minded is death; but to be spiritually minded is life and peace." Christian Science makes a clear and positive distinction between the human sense of things, or the "carnal mind" sense of things which is miscalled man, and the real man which, according to Genesis i. 27, God created "in his own image," and it is this real and ideal man which Mrs. Eddy refers to in the quotations which our critic erroneously applies to the mortal or finite concept of man. It is clear to every Christian Scientist that this finite concept called man must be displaced by the true idea or "image of God" which is the real man.

Every effort of every Christian Scientist is intelligently directed toward this end. If our brother were better acquainted with the real objects and aims of Christian Scientists, if he had a more comprehensive understanding of what they are trying to do, he would have less disposition to criticize them. Christian Scientists are striving to help humanity according to their sense of the best way to do it, and they must abide by the basis of judgment established by our beloved Master: "By their fruits ye shall know them."

[William E. Brown in *Fresno* (Cal.) *Tribune.*]

Christian Science is a religion, the religion of Jesus Christ, and accomplishes its healing and redemptive work by the same method employed by Jesus and his disciples, thus fulfilling the Scriptural promises: "And these signs shall follow them that believe; . . . they shall lay hands on the sick, and they shall recover." "He that believeth on me, the works that I do shall he do also." At this juncture some of the critics of Christian Science maintain that these commands were intended for the disciples only, but this view is dispelled by the following command of Jesus: "Go ye therefore, and teach all nations, . . . teaching them to observe all things whatsoever I have commanded you."

From the Scriptural quotation it will be seen that true belief must always (not may sometimes) be accompanied with the ability to heal the sick as well as reform the sinner. Inasmuch as the Christian Science interpretation of Jesus' teaching does confer this healing power, thus fulfilling the promises of the Master, it is conclusive proof that its interpretation is correct. An influence that comes into one's life, cleansing him from all sin, healing him physically and morally, freeing him from the bondage of drugs, alcohol, and tobacco, making him a consecrated follower of Christ Jesus, must be and is divine.

Christian Science accepts the teachings of Jesus in their entirety. It believes that all his commands are to be executed, and that it is obligatory on all Christians in all ages to obey them. It believes that the command to heal the sick is inseparably connected with that to preach the gospel.

[Frank C. Barrett in *Portland* (Me.) *News.*]

Among the vast number of Christian Scientists are to be found thousands of men and women whom the world has recognized as "intelligent," and who have won honor and distinction in their field of endeavor,—judges, lawyers, business men, clergymen, college professors, doctors, teachers, authors, and many others. These have all come to seek refuge from many cares, worries, etc. They were sick, or they wanted salvation for their souls, a more satisfactory explanation of God and their being; and at last they have found health, happiness, and peace, the peace that "passeth all understanding;" secure in the understanding of what the psalmist meant when he sang, "He that dwelleth in the secret place of the most High shall abide under the shadow of the Almighty;" that is, he who dwells in the consciousness of the omnipotence, omniscience, and omnipresence of God, good,—Life, Truth, Love,—is under the protection of the Almighty; he is in a place where sin,

Digitized by Google

sickness, and death cannot reach him,—"hid with Christ" in the "secret place of the most High." But this place of the "most High" was a profound secret to all these intelligent people until they found it in Christian Science, and I venture to say that there are still many thousands of intelligent people who have earnestly sought health, happiness, and salvation for their souls, who will find what they are seeking when they turn to Christian Science.

Christian Scientists do not limit God's power to the healing of only functional diseases, but they take the Bible at its word, that it is He "who forgiveth all thine iniquities; who healeth all thy diseases." Those who would use the arguments of mortal mind as a "backfire to Christian Science" are on dangerous ground, for Christian Science has exploded the fallacy that the human mind or will is a real healing agent. All real healing comes from God, the divine Mind from whom all blessings flow. As if to answer the question for all time, the apostle Paul wrote, "The carnal mind [human will] is enmity against God: for it is not subject to the law of God, neither indeed can be."

[W. J. Bennin in *Manchester* (Eng.) *Dispatch.*]

In a recent issue you publish an interview with a medical practitioner, according to which that gentleman would have the public believe that the healing method in Christian Science consists in merely telling a sufferer that he is not suffering. The intelligent person, confronted with the spectacle of the man he knew yesterday as sick and wasted and with no hope of recovery extended to him by friend or physician, today restored to radiant health, will not be satisfied with such an explanation. The now practically undisputed fact that hundreds of thousands of cases have been healed, embracing not only all manner of sickness, nervous and functional, structural and organic, but also drunkenness and drug mania and other forms of moral delinquency, seems to demand a more scientific basis than mere verbal assertion.

No, Christian Science restores men to their rightful heritage of health and happiness in the divinely scientific way, the way the Master who came to do the will of God inculcated, the way the disciples and the apostles demonstrated, and the way practised by the Christian church in patristic days. How? By the realization of the fact that it is no part of God's will that disease should exist; that if it does seem to exist it does so, like other material manifestations, only in the human consciousness, and not by virtue of any inherent reality; and, finally, that man has the power, through him who came "that they might have life, and that they might have it more abundantly," to correct such an erring consciousness or false belief and to manifest health and harmony as the result.

Christian Scientists believe that this healing work is not only the privilege but the duty of the Christian, and that the injunction to preach the gospel and heal the sick was given, not for a favored few only in a bygone age, but to all men in all ages, emphatic, unequivocal, and indivisible.

Sometimes, I ween, the Master smiled—
There budded in his eyes a glow
Which on his lips bloomed sweet and slow
To win a little child.

And when the morning breeze he quaffed
After a quiet night of prayer,
Ah, then, for zest of joy most rare
Perchance the Master laughed!

AMY RUTH WENZEL.

AMONG THE CHURCHES.

SPOKANE, WASH.

The new edifice of First Church of Christ, Scientist, was dedicated with a simple but impressive service Sunday, March 28. Speaking of the growth of the movement in Spokane, Mrs. Margaret Crane, the Second Reader, said in part,—

"With the gathering together in 1897 of a few earnest seekers for truth to read the Sunday Lesson-Sermons, seed was sown in good ground, where it has grown and waxed strong. The society was incorporated as a church in November, 1898. As our numbers increased from time to time, it was necessary to find more commodious quarters, and it soon became evident that a permanent home must be secured. In October, 1902, the lots upon which this church stands were purchased, and on May 5, 1904, active work began. On the first Sunday in the following September, under a temporary roof, with the sun and fresh breeze of heaven coming through innumerable openings, a happy and grateful people worshiped in the basement of the building. The superstructure went up slowly, and as a tender mother watches the unfoldment of her offspring, so the little band watched the walls ascend and the building take form and outline. Those were days of consecration and unity of purpose, and many times faith would have to rise to understanding to know that God could furnish a table in the wilderness. It is with grateful hearts that we remember our Leader, Mrs. Eddy, who has brought to the world this practical religion, a religion which brings peace to the sorrowing heart, and healing to the sick and sinful."

The dedicatory address was delivered by Clarence C. Eaton of the Christian Science board of lectureship, who said in closing.—

"In this house there is no place for contention, strife, or vainglory; no clamor for place or preferment; no room for aught but humility and love and a manifest willingness to serve and wait. The high purpose for which this structure has been erected can only be realized when, as we assemble within its borders for business deliberation or sacred meditation, we blend our thoughts and hearts in demonstration of that oneness of mind which reveals spiritual man, the true image and likeness of his Maker, here and now in the full possession and enjoyment of his freedom and conscious of his spiritual dominion."

Correspondence.

WORCESTER, MASS.

The Worcester Christian Science church has purchased a tract of land at the corner of Oberlin and Main streets for the purpose of erecting a new church. It is the plan of the committee in charge to start work as soon as possible. The site is a spacious tract and is located directly across Oberlin street from the South Unitarian Memorial church.

Worcester Gazette.

POMONA, CAL.

The Christian Scientists will soon be enlarging their chapel on West Center street, near Main. At every service the chapel is filled, and often people are turned away at the doors.—*Pomona Daily Review.*

CORRECTION.

Our reference in the *Sentinel* of May 1 to the erection of a new church edifice in Oakland, Cal., was faulty. This enterprise pertains to First Church of Christ, Scientist, Alameda.

CHRISTIAN SCIENCE SENTINEL

EDITORIAL

MRS. EDDY TAKES NO PATIENTS.

The author of the Christian Science text-book takes no patients, and reads no letters on disease, distress, or error of any kind. Reliable news concerning Mrs. Eddy will be found in the Christian Science publications.

NOTICE.

I HEREBY request Christian Scientists throughout our continent and in other lands to observe the following By-law.

MARY BAKER EDDY.

AN AMENDED BY-LAW.

ARTICLE XXIII.

NO INTERFERENCE.—SECT. 10. A member of The Mother Church may be a member of one branch Church of Christ, Scientist, or of one Christian Science society holding public services, but he shall not be a member of both a branch church and a society; neither shall he exercise supervision or control over any other church. In Christian Science each branch church shall be distinctly democratic in its government, and no individual, and no other church, shall interfere with its affairs.

"SPREADING THE SUNSHINE."

THE *Spectator*, a weekly paper published in Portland, Ore., referring to an attack which had been made upon Christian Science, says: "If Christian Science is not what it professes to be, it will not endure; fighting it will but give it strength. If it is what it professes to be, its opponents in attacking it are kicking against the pricks. In the meantime it seems to be spreading the sunshine of peace and contentment among the people. And this is something."

If the above is true,—and it is,—the question, What is Christian Science? becomes of vital importance. Suppose some one had told us of the practical benefits to be derived from a knowledge of the science of numbers, and we desired to avail ourselves of this opportunity. What would be the natural course to pursue? We would first study the text-books on this subject, and then try to put into practice the rules or information to be found therein; thus proving for ourselves, in the demonstration of our problems, the practical value of the knowledge we had acquired.

Christian Science possesses its text-book, "Science and Health with Key to the Scriptures" by Mrs. Eddy, and all who wish to learn for themselves what is this wonderful truth that is offering mankind a merciful surcease from its sin and suffering, will have no difficulty in obtaining from this book the desired information. Moreover the person who has not studied Science and Health and sought to put into operation the rules to be found therein, is no more competent to tell what Christian Science is than is the person who, without having studied a text-book, or even added a column of figures, would attempt to explain or to condemn arithmetic.

Further questions to be considered are: Does Christian Science heal the sick? Does it heal in the way that Jesus did, and as he taught his disciples to do? That the sick have been and are being healed in Christian Science today, without the administration of drugs, is a fact which ought to be known and openly acknowledged in every Christian community; nor should the recognition be lacking that these practical demonstrations of scientific Christianity are of kindred nature with the deeds of loving compassion to which the greater portion of the New Testament record of our Master's work is devoted, those deeds of mercy to which he referred when called upon to prove his Messiahship. It cannot be, therefore, that the opposition to Christian Science is based upon the supposition that it is either impossible or illegitimate to heal the sick without the use of material remedies.

If in our study of the science of numbers we became perplexed, or failed to grasp the meaning of its rules, our first impulse would be to seek some one versed in the science, who would make clear to us the statements we had failed to understand. The same course is open to the seeker for the truth of Christian Science. If he needs help in acquiring a knowledge of its teachings, the sensible way to obtain this information is to apply to Christian Scientists themselves, rather than to those who are incompetent to pass judgment upon it.

ARCHIBALD MCLELLAN.

SPIRITUALITY.

FOR no other thing, perhaps, are we more indebted to Christian Science than for its revelation of what constitutes spirituality. Webster defines spirituality as "that which belongs to the church, or to a person as an ecclesiastic, or to religion, as distinct from temporalities." Outside of Christian Science it has been very generally believed that spirituality stands for what some one has called "otherworldliness,"—something which has no necessary relation to our present-day problems; hence it has been thought that while the spiritual-minded might be safe so far as a future existence is concerned, they are not well equipped for the exigencies of the present time. This opinion has had its rise in the belief that mere abstraction from worldly affairs, and a good deal of religiousness, constitute spirituality, which is of course a serious mistake. Mrs. Eddy says, "To Jesus, not materiality, but spirituality, was the reality of man's existence, while to the rabbis the spiritual was the intangible and uncertain, if not the unreal" (Science and Health, p. 352).

If we examine carefully the results of human belief, we shall see that a false estimate of Spirit and spiritual things leads to failure in every direction. Christian Science teaches that as God is Spirit, all that He creates must of necessity be spiritual and—by the same logic—perfect. It therefore follows that our spirituality, to be genuine, must reflect the divine nature, its law and order, its perfection and power; hence the careless or imperfect performance of any task can never be attributed to spirituality, but rather to the lack of it. The healing work of Christian Science proves this by arousing one from the lethargy and indolence which are often induced by superstition and fear, and by awakening a realization of the true man's capabilities and possibilities, which begets an energy that is expressed in the bodily functions as well as in all that "thy hand findeth to do."

Spirituality might be defined as Godlikeness or Christlikeness. It implies limitless possibilities on the side of good, and the utter exclusion of evil. The truly spiritual man could no more be tempted by evil than could the master Christian, to whom the approach of an evil suggestion but meant an opportunity to crush the head of the serpent To the spiritual-minded the appeal of want would present an occasion to prove the infinite and ever-present supply of divine Love for all human need. So far from true spirituality lessening one's interest in the welfare of others, or of human progress, it quickens his interest in the advance

Digitized by Google

of humanity by showing him how this can best be attained, and that happiness is most surely realized by forgetting self in service for others. Spirituality means the possession of power, which can never be abused because it is never separated from its divine Principle. Jesus promised that his followers should be "endued with power from on high," and in Christian Science this promise is assuredly being fulfilled. They are realizing "power to tread on serpents and scorpions, and over all the power of the enemy," even as he said. They are proving the powerlessness of all evil in the ratio of their spirituality, and by this test one's Christianity must stand or fall.

Last but not least, spirituality stands for healthfulness of mind and body; not a belief in health and strength supposedly derived from matter or dependent upon it, but health as a manifestation of the understanding of Spirit, of Mind, as governing all. Without this health we are unfit to work out the problems which are presented to every pupil in earth's great school. Our revered Leader says that we are required to lay down "fleshliness and gain spirituality;" and she adds, "This is done through self-abnegation" (Science and Health, p. 266).

ANNIE M. KNOTT.

THE SUMMER'S DAWN.

OTHER things being equal, mankind's most effective helper is he who is best able to discern the signs and possibilities of good, and who does not allow any show of stupidity or false sense to disturb his hold upon the promise of better things in those to whom he would minister. Human nature presents so much of gaunt uncanniness, it is not infrequently so separated not only from the fruits but from the leafage of truth and beauty, that unless one sees beneath the surface, is able to perceive and rightly interpret the intimations of the spiritual life, the primal hints of manhood, he is likely to yield his thought to the habit of judging by appearances, and thus withhold his interest and his sympathy from many whom he might otherwise reach and raise up.

As one looks out into the world and notes the aims, impulses, and habits of individual men, he is often tempted to entertain a sense of hopelessness respecting racial redemption, to think that it is impossible to remove or even to penetrate the ignorance, superstition, and materiality in which the great body of human belief is embedded; hence, in so far as man is reckoned for what he seems to be and what much religious teaching declares him to be, in so far the paralysis of Christian endeavor is easily explained. The manifest sense of incapacity upon the part of many people, to make any personal contribution to the gospel-enterprise, however ready they may be to support the efforts of others, is in evidence that, despite Christ Jesus' unequivocal command "to preach the kingdom of God, and to heal the sick," they look upon the undertaking as altogether unpromising.

To all this pessimistic, uninspiring thought Christian Science brings the rebuke of spiritual understanding, the true inner vision of man. It comes, as comes the summer's dawn, to awaken so-called nature to better and brighter things. For many months the trees and shrubs have seemed altogether lifeless; they have been "barren and unfruitful," and if one had judged them from appearances he would have said they were dead; but the voice of spring was heard, and it was the voice of a true prophet and teacher; it made appeal to the imagination and to hope. Its themes were life and growth and beauty, and in its splendid variations upon them it left no chord untouched. Its completeness was yet in miniature, but to the thoughtful and the sensitive it brought a wealth of meaning. It tested the depth and compass of the observer's insight, and to such as had eyes to see it revealed untold riches of truth and beauty. They saw the dainty tints and infoldings of the little buds, and they saw very much more—even the glory of summer harvests and of autumn garnerings; they were not troubled, therefore, with the roughness of the enswathing bark, nor with the nakedness of the leafless boughs, for they were looking forward to and living in tomorrow's good.

In all this the attitude of Christian Science toward human sense conditions is outlined and illustrated. It lifts thought to the divinely possible in human life, it impels us to keep our eyes ever fixed on the glint of hope's fair sky, our faces ever turned toward the anticipated coming of the "Son of man," and all this regardless of appearances and of the claims of human sense. Guided thus by Truth's enlightening prophecy, we shall not only perceive the beginnings of a nobler to be, but we shall make a significant and continuous contribution to that spiritual sunshine which evokes the flowers and fruitage of the Christlike life.

JOHN B. WILLIS.

LETTERS TO OUR LEADER.

Boston, Mass., April 30, 1909.

Mrs. Mary Baker Eddy, Chestnut Hill, Mass.

Beloved Leader:—Your willingness that I should serve in this part of the Master's vineyard, instead of that wherein I have labored for so many years, gives me courage and strength to take up the new duties which have been assigned to me. Your loving interest, shown in so many ways, will always be an inspiration in my work. Divine Love will bless and prosper all that you have sown, and I rejoice that I am accounted worthy to be one of the laborers.

Gratefully yours,

ALBERT E. MILLER.

Chelsea, London, S.W., England.

Mrs. Mary Baker Eddy.

Dear Leader:—With an ever-increasing sense of gratitude, I want to thank you for Christian Science; thank you for the wisdom and love that induced you to organize class teaching, and again for the reflected loyalty to Truth, gained through the faithful study of your teachings, which has enabled my teacher to bring to me a moral healing for which I had prayed many years unavailingly. I can only repeat my thanks, while I try to live Christian Science.

Yours in loving gratitude,

ALICE MARSHALL.

Buffalo, N. Y., March 3, 1909.

Mrs. Mary Baker Eddy, Brookline, Mass.

Dearly Beloved Leader:—With a heart full of gratitude for the good that Christian Science has been to me and mine, I would like to write to you that which I believe will give you much pleasure. I am not yet a member of your church, but hope to become a member of it this next June. In the last five years I have given much study to the subject of Christian Science, and in doing so have had to listen to much that was meant to be derogatory. In a certain town, about a year ago, it became quite the fashion for the ministers in the various churches to preach against Christian Science, or against that which they thought it to be. Some eight or ten of these ministers had had their say, and one day it became the turn of a certain clergyman to preach his sermon. I went to hear him with the thought that I might hear some very bitter things, but at least I would hear what he truly believed. I wanted to hear both sides before I finally cast my lot either for or against this religion. I believed in the physical

Digitized by Google

healing,—I had been healed,—but I had heard much of the want of morality and my heart was sore concerned.

That morning the reverend gentleman took his text from John xvii., and after having read the entire chapter he began his address by saying, in substance, "It has become quite the fashion for clergymen in our various churches to speak of Christian Science, and wishing to be up to the prevailing fashion, I will also endeavor to acquaint you with some facts concerning this much-talked-of subject, and the woman who is at the head of the movement." Then pausing, as if to give stronger emphasis to what was to follow, he continued by saying, "I know of no one hundred clergymen or Christians in this community, or in any other community, that has done the one thousandth part that Mary Baker Eddy has done to lift up fallen manhood and womanhood."

This was all. Not another time did he so much as mention Christian Science during the sermon, and such a sermon! It was simply the 17th chapter of St. John made plain; and it seemed that I could hear the Master saying again to me, through the dear woman who has followed so closely in his footsteps, "For I have given unto them the words which thou gavest me; and they have received them, and have known surely that I came out from thee, and they have believed that thou didst send me."

Today, nearly a year since hearing that sermon, comes a confirmation of the reverend gentleman's words. During my medical practice, like all other earnest physicians, I have had to meet with some in the depths of sin and degradation. During my stay in a certain city I had for a patient a woman of good family, but one of whom we might say that she was morally undeveloped or depraved. More than once I have taken her off the street so drunk that she knew not even her assumed name. One stormy night I had a hurry-up call at the hospital. It was this woman, her head split open with a beer bottle. I dressed the wound, and for three weeks she was confined in the hospital. This long spell of sobriety revealed the "grain of gold" supposed to exist in all humanity. To make a long story short, she consented to be taken to the Salvation Army Refuge in Cleveland, O. It was some three weeks more before I could accompany her to the Refuge, and during that time I kept her in my own home. I was at that time myself taking Christian Science treatment from a local practitioner, and interested this good woman in my protegé. It transpires now that this practitioner, in addition to many good talks, gave the woman a copy of Science and Health. To use her own words, she wanted to throw the book at the Scientist, but for decency's sake she merely placed it at the very bottom of her trunk. But some things that the practitioner had said to her stuck by her, and she now writes me:—

"During all that long horrible suffering I was conscious of but one thing. Mrs. —— had told me that in this book I would find help to lead a better life, and, doctor, I never wanted a drink so bad in all my life as I wanted to get at that book in the bottom of my trunk. When I was able to crawl I lost no time in getting it, and I have read and reread and am still reading it. It is seven years now since you brought me here, and never once since then have I touched liquor or done the things of which I would be ashamed to have you know. To Christian Science I owe my salvation, and if it be not a sacrilege for me to say it, I want to say, God bless Mary Baker Eddy for what she has done for me. I have been working for Mrs. —— five years and she will tell you all I write is true."

Another letter in the same mail tells of a man who had been cured of the appetite for strong drink, has not touched a drop in two years, and is leading a useful and happy life.

With love from a faithful student in divine Science.

AGNES V. A. KELLEY, M.D.

Savanah, Ga., April 28, 1909.

Dearly Beloved Leader:—I cannot longer remain silent when I have so much for which to thank you; I must express to you some of the gratitude that is always welling up and overflowing into feeble efforts to help along this great Cause that is eventually to destroy all mortal belief in everything that is not good. I was an invalid for years, and to mortal sense a great sufferer from a complication of diseases. I had "suffered many things of many physicians." I had sought relief through change of climate for years, and was no better, but rather grew worse. Finally Christian Science was brought to me, and I was practically healed in the second treatment. A great cloud seemed to roll away, and "there was light." I accepted at once the great fact of its teaching that sickness, suffering, and all evil are unreal, and can be overcome and destroyed by learning our way in truth. This "way" I saw was revealed in Christian Science.

For five and a half months your book, "Science and Health with Key to the Scriptures," was scarcely out of my hands. At first I seemed to take it in by whole chapters, and then I would be still and try to assimilate what I had read. Need I add that all my illnesses, some of a very serious nature, were speedily healed. This was two and a half years ago, and I have since been daily watching and praying that I may enter into that kingdom which shall have no end. My efforts are being blessed as the clouds of sense leave and the radiant beams of Truth unfold in consciousness. I would like to add that I was instantaneously healed at different times before coming into Christian Science, but I did not stay well, thereby proving the truth of your teaching (Science and Health, p. 398) that "even a blind faith removes bodily ailments for a season:" but it remained for Christian Science to teach me the way out of sickness and fear of disease, into life and health, through the "renewing of the mind."

Yes, beloved Leader, you have taught this age how to lay the burden down and "bear a song away," and in return streams of love are ever flowing to you. You have taught us really to know that our Redeemer lives, and that He is an ever-present help to deliver us from all the ills of the flesh and to plant our feet in the pathway of Spirit, which leadeth to that eternal city which hath a sure foundation. We long for a greater unity of effort to garner in the sheaves of your sowing.

Yours in life and love,

FLORENCE SANBORN GIGNILLIAT.

Toledo, O., April 29, 1909.

Dear Mrs. Eddy:—As I think of the years of patient work that you have done for mankind and a few of the results of that labor, we seem to be doing so little in return! As I recount the steps,—first the publishing of Science and Health; then following on with the establishment of the church, the mid-week testimonial meeting, and the impersonal preacher (the Lesson-Sermon); also the *Journal, Sentinel,* and *Monitor,* in their order,—I am filled with gratitude to God for giving you such wisdom as has been yours, and also to you for your untiring application of it for mankind. You have led, and are leading, the children of Israel of this age through the wilderness of materiality into the promised land of Spirit. Nor can I omit the Board of Lectureship, which is doing so much to dispel the darkness of falsehood and misconception as to what Christian Science really is and what Christian Scientists really believe.

I am realizing more and more that it is not what we are trying to do but what we do, that shows how much we are gaining.

Yours truly,

ARTHUR A. HALL.

THE LECTURES.

GIRARD, PA.

The Hon. Clarence A. Buskirk lectured here on Christian Science April 6. He was introduced by C. B. Burgess, who said in part,—

At first received generally with indifference, then with ridicule, then with controversy and violent opposition and misrepresentation, but more recently with respect and even attempts at imitation, the mightily growing movement of Christian Science has quietly established itself more and more firmly in the thought of this age, until it is now widely recognized as a most important factor of modern life and progress. No religious movement can have such a strong, rapid, dignified growth, can so vitally and permanently change the hearts and lives of its adherents, which does not meet some elemental need of mankind. Christian Science meets the demand of the human mind, satiated with worldliness and materiality, for a more spiritual interpretation of life, in the only way in which it can ever be met, namely, by showing the possibility and the necessity of a truer understanding of the teachings and a more implicit obedience to the commands of Christ Jesus.—*Correspondence.*

LONG BEACH, CAL.

Prof. Hermann S. Hering lectured on Christian Science at the Auditorium April 8. He was introduced by Robert W. Foyle, First Reader, who said.—

It is conceded that Christianity as taught and demonstrated by Jesus of Nazareth was applicable to all human needs, that his disciples or students continued this practical application of his teachings in healing the sick and raising the dead, and that these demonstrations or proofs of divine power continued in the early Christian church during the first three centuries of the Christian era. Did Jesus mean that these manifestations of spiritual power should continue until the whole world was redeemed from sin, sickness, and death? Christian Science asserts that this was just what Jesus taught in both precept and example; that for this purpose he lived, died, and rose again; that this was what he promised when he said: "And these signs shall follow them that believe; in my name shall they cast out devils; they shall speak with new tongues; they shall take up serpents; and if they drink any deadly thing, it shall not hurt them; they shall lay hands on the sick, and they shall recover."

Christian Science is not a new religion. It is as old as its Principle, God; but the apprehension of this truth in this age has come through our Leader, Mary Baker Eddy. Through her discovery unnumbered thousands have found health and happiness, have found a key that has unlocked for them the treasures of the Bible; have found that divine Love meets every human need; and many thousands more are seeking to learn something of the teachings of this Science.—*Correspondence.*

HAMBURG, N. Y.

Judge Septimus J. Hanna lectured on Christian Science at Kopp's Opera House April 11 under the auspices of First Church of Christ, Scientist. The lecturer was introduced by Ottamar Hamele, Esq., of the Erie County bar, who spoke in part as follows:—

Though often dwarfed and stunted, leading him into the quagmires of error and superstition, there is an instinct in every man which drives him to love and to seek the truth. Down through the ages, in this great quest for the eternal, frail man has made many mistakes, and the greatest of these, to my mind, is the idea that the race of God's prophets now is, and for centuries has been, extinct. I do not believe that we draw our spiritual sustenance from a single banquet, but rather that we are supplied with the manna of God as the times and our needs require, and that there are more divinely inspired prophets in the world today than there ever were before. Although not a Christian Scientist, I cannot say that Mrs. Eddy is not one of these, and when we think of the great army of honest, intellectual, and conscientious men and women who have enrolled under the banner of this new church, are we not forced to admit that beneath the splendid superstructure there must be solid walls? Then let us lay aside any prejudice that we may entertain, and with open minds listen to the message that comes to us this afternoon.

Correspondence.

OTTAWA, ILL.

In introducing Frank H. Leonard, on the occasion of his lecture on Christian Science in First Church of Christ, Scientist, on April 20, Richard C. Jordan said in part,—

We have turned aside from the excitement of warring political factions, with which our city is unusually convulsed tonight, to the confines of this beautiful sanctuary, for the contemplation of things that are higher and to listen to the unfolding of a philosophy which gives promise of something more ennobling. Out of the evolution of religions there has come to the world one of another name, not antagonistic to but built upon the teachings of "the man of sorrows." Notwithstanding some of us may not fully comprehend or endorse all that has been written by that truly great woman, Mrs. Eddy, the fact that the Christian Science church during its thirty years of existence has experienced a greater growth than did the Christian religion in its first one thousand years, and the further fact that it has brought happiness to multitudes of human beings, are sufficient to commend it to the thoughtful attention of all who reverence the truth, and to render welcome any information that will cast upon it additional light.

TESTIMONIES OF HEALING.

Whenever I have thought of giving testimony to the power of Truth as it has been revealed to us in Christian Science, and which has completely revolutionized my life and thought, I have been largely deterred by a sense of bewilderment as to where best to begin or what to enumerate. So overwhelmingly have I been blessed, that mere human intelligence fails to grasp the half of it. The erroneous material beliefs out of which Christian Science has enabled me to struggle,—often desperately and painfully, because of their tenacity, but never hopelessly,—were piled high like "Pelion upon Ossa;" but, in accordance with Isaiah's prophecy that "every mountain and hill shall be made low," so it has come to pass in my life with each difficulty, however huge and mountainous, that has presented itself in my path. It has been a source of emphasized gratitude that even the "stony ground" spoken of in our Lord's parable of the sower may become, by the erosion of mental and physical suffering, receptive soil for the word of divine Love, for this has been the way by which God has brought me out of a valley dark as that of "the shadow of death." Those who have suffered the pangs which must inevitably come as the fruit of yielding one's self a servant to obey the violent and tyrannical dictates of the so-called emotional temperament, know that bitterer than all the ashes of the Dead Sea is this apple of discord. On the other hand, whoever has found redemption from the sway of passion and self-love can say, with the psalmist and from the bottom of a "contrite heart," "He brought me up also out of an horrible pit, out of the miry clay, . . . And he hath put a new song in my mouth."

Though for six or seven years I was a chronic sufferer from ills too numerous to mention in detail, I did not take my first steps in Christian Science for the physical healing. It came to me at a time when, after an operation, I had removed from my former home in Nashville, Tenn., to southern California, where I was convinced that I would become better—there was a peculiar lull in my storm of physical ailments, though my mental condition was acutely distressed. After having tried to anchor my frail bark of faith in the harbors of two different orthodox churches, I found myself, in spite of a final frantic search for God, cut adrift on the sea of agnosticism, with leanings toward Hindoo occultism. I thought that if all I read in the Bible—its promises given to those who strive after God—were not true; if a sorely-smitten heart, struggling for light in darkness, is not to be vouchsafed the smallest ray, but gains instead a deeper gloom (and this is what the material interpretation of the Bible was fast plunging me into); if Christ's mission was for a limited time and a favored age, why should I longer hold to the cold comfort that it is respectable and in good form to believe in the Bible, especially (and why this should be the accepted world-thought I have never been able to puzzle out) for women. The doubts which beset me intensified a nature prone to despondency and fatalism under that most deceptive covering, a happy-go-lucky exterior, until—between the warring elements of what seemed inextricably mixed as good and bad in me—I was fast becoming morbid to the verge of self-destruction; but out of this valley of the shadow of worse than material death, for which I had come to pray as the only solution of my difficulties, Christian Science lifted me with mercifully strong and tender hands.

A dear friend asked me if I would read daily in Science and Health, if she gave me the book, and being greatly impressed with the evidence of the consolation which she was getting from her religion in a time of terrible sorrow, I accepted the "little book" with gratitude, and immediately began to read it. I found myself giving up the afternoon naps which had seemed absolutely necessary after my hard days at newspaper reporting, in order to follow up the reading, and from the first there seemed to be "healing in its wings." My tired, bruised heart came back into a sense of rest and peace under the touch of this "balm in Gilead." Its first especial appeal seemed to be to my intelligence. I hardly thought of myself as needing its application to my physical condition, until one day I became acutely conscious of a recurrence of an intestinal trouble which at intervals for a year or more had caused me to suffer great pain and made inroads on my not very large amount of vitality. At the time of the last attack a very prominent and most kindly physician had told me that it was a condition for which little could be done, except to diet and be quiet. Almost unconsciously I thought that I would see the physician in the morning, for it was something that I greatly dreaded because of the acute suffering and also because, after several weeks of pain and inability to retain the simplest food, I had always been weak and utterly unfit for my work. Almost on the heels of my thought that I would consult a doctor, came the question, "If your intelligence approves so unqualifiedly of what you have been reading, and if you have always looked for just this practical proof of God's power, why not put it to the test?" Next day, instead of consulting a doctor, I went to a Christian Science practitioner and received treatment. I told her of having always had to diet when in this condition, and her reply was that I must not have any fear that food could affect me in any way. This was just before luncheon, and when I went to the restaurant the first item I saw on the bill of fare was cucumbers. This was indeed a test. From my earliest childhood these had been the "forbidden fruit," and not even the healthiest members of our large family were allowed to touch them so long as we were under our father's eye. For a moment I was frankly appalled at this phase of things, but I was determined to see the matter through. I asserted as best I knew how my new-found laws of freedom, and ate heartily of the tempting cucumbers. Almost to my surprise there was no bad effect from the eating, and within forty-eight hours the trouble had disappeared—never to return, though two years have passed and at one time for three months my food came almost entirely from tin cans.

This was only the beginning for me of the overcoming of divers troubles that presented themselves to me, following the uncovering of all the miserable errors and wrong habits fostered by my own and inherited beliefs. Divine Principle has been all-powerful in putting to flight the armies of the enemy, even when my understanding was very slight, and I was in a remote spot in the wild hills of Arizona, sixteen miles from a railroad or telegraph station, when there were presented to me some of the hardest problems in a woman's experience. Life has taken on a new meaning. An overshadowing sense of evil that, like a huge bird of prey, seemed always to have hovered over me from my childhood and enveloped me in a sense of some impending doom, has gone from me like the hideous nightmare that it was. Love has wiped out a past full of blunders, suffering, heartache, and regret, and given me a foretaste of that "peace of God, which passeth all understanding," even in the midst of conflict. I am persuaded that I shall come into the perfect peace when I shall have increased in spirituality to the degree that my mind is absolutely stayed on God.

Gratitude, increasing daily and hourly, must spring responsive to this most gracious gift and blessing, of which I would have known nothing had not our Leader's communion with God borne fruit in her message to this age,—Christian Science,—because of which we strive each day to make more acceptable our "living sacrifice" of praise and glory to the one omnipotent, omnipresent, omniscient God, good.—ANNE GOODWIN NISSEN, San Fernando, Cal.

I have thought it a duty I owed to God, to our dear Leader, and to the kind friends who have helped me, to acknowledge the many blessings which have been mine for the last five years or more. I had what is called a paralytic seizure. For four months I was quite unable to help myself, and the doctors said they could do no more for me. One day a kind lady called and told me about Christian Science, and I took treatment. Since then, heart, throat, and bowel trouble, from which I had suffered for over thirty years, besides many other ills, have been healed through Christian Science. I have not yet overcome the lameness, but feel sure that I shall do so.

I send this testimony to encourage any who may think that their healing is slow, as I have been encouraged when reading in the *Sentinel* of others whose healing has been slow. It is very uplifting to know that God's promises never fail, and also that "divine Love always has met and always will meet every human need" (Science and Health, p. 494). Just lately I have been healed of bladder trouble, for which healing I am thankful. For the spiritual enlightenment which I have received since taking up the study of Christian Science, I take this opportunity to express my gratitude.

MRS. WALKER, Beverley, Yorkshire, England.

Man in the image and likeness of his creator cannot be called either old or young at eighty, but mortal mind must use some finite measurement. Take my own fourscore years, during which period I cannot remember one year in which I was free from rheumatic trouble. Forty years ago it drove me from the field of battle to the hospitals; twenty-five years ago, I had to leave a country practice as my hands were disabled for surgery, and no longer having any confidence in medicine, I quit both. As a sort of compromise I accepted the position of health officer in a country village, it being my duty to protect the people from infectious and contagious diseases. Certain germs, microbes, etc., are charged with causing these diseases, and my business was to destroy the germs while other doctors treated the people with their favorite medicines. I found, however, that the use of material remedies, against either mortal germs or the diseases which they are supposed to cause, is a losing battle, so I gave it up; but the rheumatic trouble still held to me closer than a brother.

Truly the designs of God are inscrutable to the finite mind. Forty years with path obscured, not a ray of spiritual light to guide my feet! It is true there came floating upon the air some perverted notions which were intended to caricature the Science; for example: "When you are sick, just deny that anything ails you, and you will quickly be well;" or, "It is faith-cure." These definitions sometimes came from a brother "medic," but I must say that even these would be as good as the orthodox cure alone. Having in vain tried that faith for many years in early life, I turned from "faith without works" as something dead. Thus the Christ-cure found me about one year ago. The life-time case of rheumatic trouble has vanished before it like the night dew before the morning sun. An attack of illness in the winter of 1907–8 was cured by the truth in Christian Science in two hours. An attack of the same disease had held me a prisoner for two months some years before.

When I first began to listen in church to the reading of the Bible and "Science and Health with Key to the Scriptures" by Mrs. Eddy, I could only hear an occasional word, but now I hear distinctly from any part of the auditorium. I am yet troubled with defective vision, of which I feel that nothing but the Christ-cure can make me free, but I can now read pages where at first I could read only lines.—DR. D. W. FLORA, Grand Rapids, Mich.

When Christian Science was first presented to me, nearly three years ago, I was suffering from a severe attack of a stomach trouble of many years' standing. There were many things which I could not eat, as they always seemed to cause suffering. I had been sick for nearly a month, and the physician who was treating me gave me very little encouragement. He said he was doing all he could for me, so I continued to take the medicines which he prescribed, and to eat the few things which he said I might eat. But instead of getting any better, I was continually growing worse.

One day a friend suggested Christian Science. She was not a Scientist herself, but she thought it could do no harm to try it, as medicine was not helping me. I said I had no faith in it, but that afternoon I was taken very sick, and after hesitating for some time, I finally decided to try Christian Science. I received my first treatment that evening, and slept all night, something very unusual at that time. The next morning I had very little pain, and ate everything that was placed before me that day, though half expecting to feel worse from it, because this was something I had not been able to do for years. I, however, felt better than I had for a long time, and two days later I was perfectly well. I now eat anything that I want and it does not hurt me at all.

I have had many demonstrations of Truth's power since that time, but that which means more to me than all the physical healing, is the spiritual help and the peace, contentment, and happiness that have come to me through the study of Christian Science. I am very grateful to God, also to Mrs. Eddy, who has given us this blessed truth.

ANNA M. GRAFELMAN, Lincoln, Neb.

My life has been so blessed through the teachings of Christian Science, that I feel it is through loving obedience alone I can express my gratitude. I have learned that it is only mortal belief which causes sin, sickness, and death; and we are freed from this belief in proportion as we learn that God is omnipotent. I have been able to overcome many errors; and at times, when it has seemed very dark, like the Israelites I cried unto the Lord in my troubles, and He delivered me out of my distresses.

Last summer a very painful swelling manifested itself on my foot, and at times I could hardly walk. I applied what little knowledge I then had of the truth, trying to realize that "Mind is the source of all movement, and there is no inertia to retard or check its perpetual and harmonious action" (Science and Health, p. 283). Although the healing was not instantaneous, I now know that it was all because I left the door of mortal thought open for discouragement and doubt to creep in; but after four months, with the loving and untiring help of a dear friend, I was entirely freed from this bondage. I was also healed in a very short time of a badly injured arm. Before the demonstration was entirely made, I was called upon to do some work which required continual movement of that arm; but I did it, thereby proving that there is no law of reversal in truth. At another time I was freed from a terrible shock resulting from a fall from a trolley-car; without any specific treatment I have been cured of throat trouble, to which I had been subject every winter. I could tell of many other things which have been overcome, proving that divine Mind is the only healer.

The spiritual uplifting is, however, of far greater importance to me. I seemed to find pleasure in worldly things, but I am glad to add, that when the truth of Christian Science was revealed to me, I found that true happiness comes from Spirit, God, not from worldly pleasures. What a blessing it is to know that there is an ever-present Father, who is all-loving, omnipotent good, and by faith-

Digitized by Google

fully watching and praying, and by knowing each day that God is Life, Truth, and Love, I am enabled to demonstrate harmony instead of discord. My earnest desire is to be able to lift others up out of darkness and chaos, into the true light. May I live the gratitude I feel toward God, and also to Mrs. Eddy and the kind friends who have patiently and lovingly helped and encouraged me.

ETHEL M. HENDREN, Brooklyn, N. Y.

I wish to express my gratitude for the benefit received from Christian Science. About two years ago I became interested through my wife, and took up the reading of Science and Health. This alone healed me of the drink habit. I was also a great smoker and had been for many years. Some time ago a growth started on the inside of my lower lip, which caused me great worry and annoyance. I then called upon a Christian Science practitioner for help, and within five weeks I was entirely healed.

My gratitude to God, and to Mrs. Eddy, for the physical healing, is great, but it is not to be compared with what I feel for the benefits received from the spiritual understanding which I am gaining through the study of the Bible and Science and Health.—WM. BARTLING, Los Angeles, Cal.

I am very glad to testify to my healing in Christian Science of what was pronounced organic heart trouble and other so-called incurable diseases. Christian Science found me at a time when there seemed to be no help from any other source, as the physicians whom I employed gave me no encouragement that I could even be relieved, but in a few days after trying Christian Science I was entirely healed of one of my distressing ailments. This was indeed proof to me that there is something in Christian Science, and it gave me faith to cling to it, until in a few months I was entirely free from all my diseases. I am very grateful for all the love and patience shown me at that time and since. It is now over seven years since I was first benefited in Christian Science, and in that time I have had many proofs of God's power to heal. I am truly grateful to our dear Leader, Mrs. Eddy, for this wonderful and beautiful teaching which regenerates and purifies.

MRS. JUNA A. HAUSE, Fort Wayne, Ind.

Among the most common of the objections urged by those who are antagonistic to Christian Science are the following: that it is based upon will-power, etc., and that if it heals at all it is applicable only to those whose maladies are imaginary. Against these objections I would place the following: I am a sergeant gymnastic instructor in the Royal Marines. I was attracted by the beautiful teaching of Christian Science and the consistent lives led by its followers, insomuch that I immediately purchased a copy of "Science and Health with Key to the Scriptures" by Mrs. Eddy. I commenced the study of this inspiring book, with the result that very shortly I felt impelled to destroy several works on mesmerism, will-power, etc., which I possessed, as I found that they were entirely at variance with the teachings of Christian Science. Moreover, the study of these volumes, coupled with an iron will and dogged determination on my part, had entirely failed to relieve me of the tobacco and other bad habits; but by the uplifting of thought which followed and was entirely due to the earnest study of Science and Health, I was healed of the craving for tobacco. This craving had seemed to me far from being "imaginary." I had used to great excess the strongest tobacco procurable, and though I tried time and again to give up this habit and failed, yet Christian Science effectually destroyed all desire for tobacco. For three years I have touched neither tobacco, alcohol, nor material so-called remedies of any kind, neither have I had any desire to do so.

Any attempt to express in words my gratitude to God, and to Mrs. Eddy, who has so lovingly pointed out the straight and narrow way, would but feebly do so. I feel that it is only by the consecration of my life to the furtherance of the Cause of Truth that I can make an adequate return for all the benefits which I have received.

FRANK B. KEMP, Deal, England.

[The following is in verification of Sergeant Kemp's testimony.—EDITOR.]

Having been asked by Sergt. F. B. Kemp to verify his testimony, I can say that he was healed by Christian Science, and that he has never smoked since. Also that he destroyed some books on mesmerism, will-power, etc., which he had been reading. In fact, the truth taught in our Leader's writings has wrought a wonderful change in him for good. I am a member of The Mother Church, Boston, Mass., and prior to coming to Portsmouth, was a Reader at Deal, Kent, where I am known by several who attend the services there.

SERGT. R. G. S. CARTER, Royal Marines, Portsmouth, England.

For twelve years after the birth of my boy I had much trouble and pain; the conditions grew worse, and finally our physician advised an operation. A year before this —now two years ago—I had begun the study of Christian Science, and had caught the idea of an ever-present God, a God who saves from disease and death, when we learn how to trust in Him, and remembering this, I refused to have the operation performed. The struggle went on, error against the truth, for a number of weeks, and one night the fear was very great, for the physical evidence pointed very surely to death. But the study in Christian Science of the past year had laid a firm foundation of the power of Christ, Truth, in my consciousness, so not once through this night of wrestling did my trust and confidence in God's willingness and power to save from death waver. He is indeed an ever-present God—here and now.

When the dawn came, the worst conditions had been overcome through the reading of Science and Health and in realizing the all-power of God. Over a year has passed since this experience, and there has been no return of the trouble. I thank God for Christian Science!

MRS. MARY STANDE, Hoboken, N. J.

In November, 1905, the truth taught in Christian Science was presented to me. I accepted it, and was healed of invalidism of ten years' standing. The last two years of that time I was unable to walk, except for a short period when I could take a few steps at a time, but with much difficulty and pain. At the time I came to Christian Science, I could not stand, or even sit up for more than a few minutes at a time, could not sleep, could eat but little, and was unable to see any one. Sometimes I had to send my husband and child from the room. Everything was done for me that could be done by my husband and parents. Hundreds of dollars were spent, and if at times I seemed to get a little better in some respects, each relapse that followed left me feeling worse. I tried physicians of various schools, besides osteopathy, electricity, rest-cure, etc. A surgical operation only added to my suffering and the expense. I spent a month in a sanitarium, and came home worse than when I went. I also had nurses in my home.

During one year of the last two of my illness, my brother, who is a physician, was practising in Bellevue Hospital, N. Y., and he consulted physicians there in regard to my

Digitized by Google

case, so that I had the best of advice and care from a material standpoint, and the physicians and all concerned did everything they could to help me, for which I am grateful to them all. A change of climate was recommended, and decided upon if I got able to travel. I was determined to go, though I did not think it would cure me, but hoped it might be more comfortable for me, as I could scarcely keep warm in this climate in summer. I did not, however, get able to travel, but turned to Christian Science, of which I knew nothing, and I soon found I did not need to change climate to get well, as God could heal me in any place. I was taken twenty miles from home for treatment, my husband having to carry me to the buggy which took me to the train. That evening I had a talk with a Christian Science practitioner, who worked very faithfully for me, and I then knew I had found the truth, and that I would love it and try to live it, even if I were not healed. I began to improve at once, though slowly, and in a few days I was able to walk a little, and could sleep better and eat anything I wanted. In three and a half weeks I came home, but this time I did not have to be carried. I then had absent treatment for a while and a couple of visits from the practitioner during the winter.

My improvement was slow, and there were dark days and times when I seemed to be losing all I had gained, but I do not now regret this, for it meant work, and work meant the growth in understanding which I so much desired. Many times I have done things which it seemed I could not do, but I knew that God's promises are true, and I would repeat the Scriptural passages, "As thy days, so shall thy strength be;" and "I can do all things through Christ which strengtheneth me." When discouragement seemed to be getting control, I clung to this promise: "Ask, and it shall be given you; seek, and ye shall find; knock, and it shall be opened unto you." I do all my own housework now with more ease than ever before.

I am a pioneer in Christian Science here, and have been able to help others, which was one of my greatest desires when I began to learn what Christian Science is. Some of the ailments to be overcome in my case were extreme nervous trouble, enlargement of the liver, heart, kidney, and bladder trouble, an asthmatic condition, almost constant headaches, etc. Besides all these, there was an irritable disposition and mental depression. No one but myself, not even the physicians, knew how much there was to be overcome. Many times have I prayed to die, and yet I was afraid to die, although I had been a church-member for years. During the entire ten years of my illness I could read or sew but very little, and an eye specialist once told me I should put on my glasses the first thing in the morning and take them off the last thing at night. When I turned to God absolutely I had no more need of glasses, and could read all I cared to. Our boy, now almost twelve, was never well from his birth, being troubled with many serious ailments, and when able to go to school in winter, went clad in the heaviest wraps. I have never had to ask for help for him but twice, and he now rejoices in perfect freedom and that he can do as other boys do. I am exceedingly grateful that fear of cold and damp weather has been destroyed for me. My husband was healed of one form of the tobacco habit during our stay in the town where I went for treatment, and he has been helped in other ways. We drive ten miles to a Christian Science church every Sunday that the weather is favorable, and I am a member of The Mother Church.

While the physical healing has meant much to me, I am even more grateful for the spiritual uplifting and the understanding of the Scriptures gained by the study of Science and Health. I can never be thankful enough to God, and to Mrs. Eddy. I am also grateful for all our literature, and rejoice that there is need of enlarging our publishing house. I have work yet to do for myself, but I know that "in due season we shall reap, if we faint not." I would say to any who may be discouraged, Never give up, but work on and you will be rewarded.

MRS. DOT D. COYLE, Ashmore, Ill.

Words cannot express my deep feeling of love and gratitude for the many blessings which Christian Science has brought to me and mine. In the five years that we have been interested in Christian Science we have had many wonderful physical healings. One instance in particular of which I would speak, was that of my little daughter three years ago. She had every symptom of dumbness, and I am sure she would never have spoken a word had it not been for this blessed truth. She was healed in a few months' treatment. We have had other healings, in cases of fever, etc., and on two occasions an alarming attack of throat trouble was instantaneously healed. I am truly grateful to God, and to our Leader, Mrs. Eddy, for this healing truth.—MRS. C. H. WILLIAMS, Canton, O.

Following the birth of my only child, I was an invalid for six years, and much of the time could not attend to my household duties. I was rapidly growing weaker and unable to be on my feet, when I was examined by a specialist in Minneapolis, who informed my husband that I had but a few weeks to live. We then realized that God was our only help, and turned to Christian Science. Through the faithful work of a practitioner the physical troubles were overcome in a few months, so that I assumed my housework as well as many new responsibilities. My husband was given immediate relief from lung trouble and other ailments, through absent treatment.

Greater, however, than all the physical healing is the spiritual healing,—the joy and peace that abide with us, and the "Life that maketh all things new." No words can express our gratitude to God, and to our dear Leader, Mrs. Eddy.—MRS. J. E. STILES, Wells, Minn.

Words cannot express my gratitude for all that Christian Science has done for me. For over twenty years I suffered from severe headaches and stomach trouble, for which I took medicine constantly. I used to buy the medicine by the pound, but there were times when for days all the nourishment I could take was lime water and milk. In June, 1904, I first read "Science and Health with Key to the Scriptures." I am a German and do not read or write well in English, so understood only a little of what I read in our text-book, but I soon realized that the headaches were gone. I stopped taking medicine for the stomach trouble, and found I could eat anything I liked and whenever I wanted to do so, without bad effects. The following January I took my first Christian Science treatment, and was instantaneously healed of bowel trouble of many years' standing. Last August I was taken very ill with a fever, and through the help of a practitioner I was completely healed in a few weeks; whereas some years before, when I was sick with the same disease, I was under a physician's care for eight months before I was relieved.

All that I have and all that I am I owe to Christian Science. I am very thankful for our text-book, "Science and Health with Key to the Scriptures" by our beloved Leader. While the physical help has been very marked, I am, if possible, more grateful for the spiritual uplifting, —the understanding of God as Life, Truth, Love. I am also glad that Mrs. Eddy was ready to explain to the world this truth which heals the sick as well as the sinner, just as it did when Jesus was on the earth. I can only say, "Glory to God in the highest, and on earth peace, good will toward men."—ROSA BROWN, San Francisco, Cal.

FROM OUR EXCHANGES.

[Rev. Charles S. Macfarland, Ph.D., in *Christian Work and Evangelist.*]

The minister must send out from his church wage-earners who will go to their unions and wrest them from their bad leadership. He must send out men who in a spirit of righteousness will control and guide our political order. He must send forth women who will break in pieces like a potter's vessel the specious social castes of human society, and bring in the true democracy of womanhood. We talk a great deal about something which we call public spirit. What is it? It is always the unselfish spirit of an individual or of a group awakening, moving, and dominating the people. It is thus only that the voice of the people becomes the voice of God.

[*Congregationalist and Christian World.*]

Brotherhood is on the way; never so nearly here as at the present, but it is yet in most instances limited and partial. It has boundaries that man and not God has set up. The work of the Christian church is in kindly and friendly co-operation to lead the souls of men to the ideals of brotherhood which Jesus had, and break down false boundaries by the impact of his spirit. We are set to broaden the circle of men's sympathies until they shall reach unto the utmost man, and leave no child of God without.

[*Universalist Leader.*]

Religion is just as natural to the soul of man as education is to the mind or food to the body. Much of the indifference to the church today is due to the fact that so many believe it stands for something strained, queer, and unnatural, and people think they cannot adjust themselves to it. Let the grandeur and joyousness and inspiration of religion possess us, and then speak and look and act and live it naturally.

[*Christian World,* London.]

We know faith by faith, prayer by praying, love by loving, inspiration by being inspired. The gospel of Jesus satisfies us in proportion as we pass through its forms to its inwardness; in proportion as we know the mystery of its renunciations, the greatness of its cross and passion, the depths of its love, its fellowship of the divine, its taste of eternity.

[*British Congregationalist.*]

Things are going forward which prophets and kings desired to see and saw not. There are swifter movements than Isaiah dreamed; there are deeds mightier than Paul ever beheld in his day. Once again it seems as if the church were about to know the fellowship of the mystery of Christ, and his name shall once more be called "Wonderful."

[*Examiner.*]

About the humanity of Jesus there is nowadays no question at all. He was a man, he lived the life of a man, he was the ideal man, the "Son of man." . . . The preacher of the gospel who thinks he can preach Christ and ignore his divinity is not preaching either Christ or the gospel. He is preaching a vain and fruitless philosophy, a human philosophy without life or saving power.

[*Christian Register.*]

The noisy reformer deals with symptoms, but they who do the real work remove the causes and make little fuss about it.

SPECIAL ANNOUNCEMENTS.

FROM THE PUBLISHER OF MRS. EDDY'S WORKS.

THE CHRISTIAN SCIENCE TEXT-BOOK, "SCIENCE AND HEALTH WITH KEY TO THE SCRIPTURES."—This work contains many important changes and additions by the author, and also contains a photogravure portrait of Mrs. Eddy, together with a facsimile of her signature.

SOME OF MRS. EDDY'S WRITINGS IN NEW BINDINGS.—One volume containing Unity of Good, Rudimental Divine Science, No and Yes, Retrospection and Introspection; a second volume containing Christian Healing, The People's Idea of God, Pulpit and Press, Christian Science *versus* Pantheism, and the Messages of 1900, 1901, and 1902. These volumes are printed from new plates and are uniform in size with the pocket edition of Science and Health. Bound in morocco, limp, round corners, gilt edges, heavy Oxford India Bible paper. The prices of these books prepaid are as follows: single copy, $3.50; six or more copies of either volume to one address, each $3.25.

THE CHURCH MANUAL.—Containing all the By-laws of The Mother Church, The First Church of Christ, Scientist, in Boston, Mass. Each new edition of the Manual will have special notice in the *Sentinel.* Price, single copy, prepaid, $1; six copies to one address, $5; twelve copies to one address, $9.

Attention is called to the Library Edition of Mrs. Eddy's works, description and prices of which will be found on the outside cover page of the *Sentinel.*

Address all orders for books named above to ALLISON V. STEWART, Falmouth and St. Paul Streets, Boston, Mass.

FROM THE CLERK OF THE MOTHER CHURCH.

CHURCH TENETS.—The tenets of The First Church of Christ, Scientist,—The Mother Church,—printed on folded sheet for the use of Branch Churches of Christ, Scientist, with space for the names of churches and their by-laws, can be had at seventy-five cents per hundred.

Not less than one hundred are sold. Postage stamps are not taken for payment.

MEMBERSHIP.—Correspondence relating to membership with The Mother Church, and requests for blank applications for membership, should be addressed to the Clerk.

All correspondence and orders relative to the above should be sent to WILLIAM B. JOHNSON, Clerk, The First Church of Christ, Scientist, Falmouth, Norway, and St. Paul Streets, Boston, Mass.

FROM THE CHURCH TREASURER.

PER CAPITA TAXES.—Per Capita Taxes and Contributions to The Mother Church, The First Church of Christ, Scientist, in Boston, Mass., should be sent to the Treasurer. Please do not send currency.

Remittances for the above should be sent to STEPHEN A. CHASE, Treasurer, Box 56, Fall River, Mass.

FROM THE SOCIETY.

Attention is called to the announcement over our Leader's signature, which appeared in the *Sentinel* of Jan. 9, to the effect that Christian Scientists in the field who send four subscriptions to the *Monitor* for one year, will receive their own paper gratuitously.

The Publishing Society has in stock a number of copies of *Sentinel* No. 6, Vol. IX., containing the article "What Our Leader Says" as last published. As this article is of abiding interest and value to the Field the Society will be glad to supply it, postpaid, at the following prices: 1 copy, 5 cents; 5 copies, 15 cents; 10 copies, 25 cents; 25 copies, 50 cents; 50 copies, 85 cents; 100 copies, $1.50.

On foreign orders add 2 cents a copy to cover postage.

The supply of *Sentinel,* Vol. IX., No. 14, is exhausted.

THE CHRISTIAN SCIENCE JOURNAL

FOUNDED APRIL, 1883, BY THE AUTHOR OF "SCIENCE AND HEALTH WITH KEY TO THE SCRIPTURES," MARY BAKER EDDY, DISCOVERER AND FOUNDER OF CHRISTIAN SCIENCE

This monthly Magazine is the official organ of The First Church of Christ, Scientist, in Boston, Massachusetts, and correctly represents the Christian Science Movement. It contains interesting discussions of the teaching and the practice of Christian Science, and in addition to dissertations, lectures, and contributed articles, publishes always a number of reports from cases of spiritual and physical healing, which practically illustrate the redemptive work of Christian Science.

TERMS OF SUBSCRIPTION: Single copy, one year, $2.00. Quantities TO ONE ADDRESS: ten or more, each, $1.90; twenty-five or more, each, $1.80; fifty or more, each, $1.60. These rates apply in the United States, Canada, Mexico, and Cuba. In all other countries add forty cents for postage on each subscription. Six months' subscriptions received at half the above rates. No subscriptions received for less than six months.

TERMS OF SALE: Postpaid to any address: Per copy, twenty cents. Quantities TO ONE ADDRESS: ten copies, $1.70; twenty-five copies, $4.00; fifty copies, $7.00; in the United States, Canada, Mexico, or Cuba. To all other countries, per copy, twenty-five cents. Quantities TO ONE ADDRESS: ten copies, $2.10; twenty-five copies, $5.00; fifty copies, $9.00.

BOUND VOLUMES: Current year and two years previous, cloth, $2.50; half calf or half morocco, $3.00. On earlier volumes write for prices.

THE CHRISTIAN SCIENCE MONITOR

Published every afternoon except Sunday

A daily newspaper for the home. Adequate news service. The various departments of a modern newspaper. Unique home forum page. Entire page of editorials dealing with the vital topics of the day. Contributions for the columns of the MONITOR should be addressed, Managing Editor, THE CHRISTIAN SCIENCE MONITOR.

SUBSCRIPTION PRICE: For the United States (except in the Boston Postal District), Canada, Mexico, and Cuba, $5.00 a year, $3.00 for six months; all other countries, $8.00 a year, $4.50 for six months, postpaid. When delivered by carrier through a local news-dealer, 12 cents a week payable to the news-dealer. In the Boston Postal District, by mail, $7.25 a year.

The Christian Science Quarterly

Published January, April, July, and October

Contains the Lesson-Sermons which are read at the Sunday Services throughout the year in all the Christian Science churches. These Lessons, which present citations from the Bible and "Science and Health with Key to the Scriptures," are valuable for daily study.

TERMS OF SUBSCRIPTION: For one year, 50 cents; fifty copies or more to one address, 50 cents yearly for each copy. Foreign subscriptions, 60 cents. Yearly subscriptions only received.

TERMS OF SALE: One or more copies, postage paid, each, 15 cents; fifty copies or more to one address, each 12½ cents, postage paid.

Der Herold der Christian Science

Published Monthly.

A magazine printed in German, which publishes original and translated articles bearing upon Christian Science, and also testimonies of healing from Germany and America. It contains about thirty-eight pages of such reading matter, also the Lesson-Sermons which are read at the Sunday services in all the Christian Science churches, and is valuable as an authorized representative of the movement.

SUBSCRIPTION PRICE: For the United States, Canada, Mexico, and Cuba, 10 cents a copy, $1.00 a year in advance; all other countries, 12 cents a copy, $1.25 a year, postpaid.

Bound in morocco, limp, round corners, gilt edges, heavy Oxford India Bible paper. Price, prepaid, single copy, $3.50; six or more copies to one address, each, $3.25.

CHRISTIAN HEALING AND OTHER WRITINGS. One volume containing: Christian Healing, The People's Idea of God, Pulpit and Press, Christian Science *versus* Pantheism, Messages of 1900, 1901, 1902, uniform in size with the pocket edition of Science and Health. Bound in morocco, limp, round corners, gilt edges, heavy Oxford India Bible paper. Price, prepaid, single copy, $3.50; six or more copies to one address, each, $3.25.

UNITY OF GOOD. It lays the axe at the root of error, elucidating and enforcing practical Christian Science, thus affording invaluable directions for all true Scientists. Library edition, 64 pages, cloth binding, marbled edges. Price, prepaid, single copy, 65 cents; $3.00 per half dozen; $5.50 per dozen. Leather covers (pocket). Price, prepaid, single copy, $1.00; $5.00 per half dozen; $9.00 per dozen.

RETROSPECTION AND INTROSPECTION. A biographical sketch of the author. The way she was led to the discovery of Christian Science; its growth and fundamental idea. Library edition, 95 pages, cloth binding, marbled edges. Price, prepaid, single copy, $1.06; $5.00 per half dozen; $9.00 per dozen.

PULPIT AND PRESS. A unique work of importance in the history and to the readers of Christian Science; containing Dedicatory Sermon delivered at The Mother Church, and scintillations from the press of that occasion. Library edition, 90 pages, cloth binding. Price, prepaid, single copy, $1.06; $5.00 per half dozen; $9.00 per dozen.

RUDIMENTAL DIVINE SCIENCE. An interesting and valuable book, containing a brief and concise statement of Divine Science, *alias* Christian Science, in the form of questions and answers. 17 pages. Leatherette covers, gilt top. Price, prepaid, single copy, 37 cents; $3.00 per dozen. Library edition, cloth binding, marbled edges. Price, prepaid, single copy, 55 cents; $2.50 per half dozen; $4.50 per dozen.

NO AND YES. A brief statement of very important points in Christian Science. 46 pages. Pebbled cloth covers. Price, prepaid, single copy, 27 cents; $2.50 per dozen. Library edition, cloth binding, marbled edges. Price, prepaid, single copy, 60 cents; $3.00 per half dozen; $5.50 per dozen.

MESSAGES TO THE MOTHER CHURCH. By Mary Baker Eddy, including Christian Science *vs.* Pantheism, and the Messages of 1900, 1901, and 1902. In one volume. Library edition, 94 pages, cloth binding, marbled edges. Price, prepaid, single copy, $1.56; $7.50 per half dozen; $13.50 per dozen.

CHRISTIAN SCIENCE *versus* PANTHEISM. The Pastor Emeritus' Message delivered at the Communion Season in The Mother Church in Boston, June, 1898. A clear and strong refutation of the charge that Christian Scientists are pantheists. 15 pages. Price, prepaid, single copy, 26 cents; $2.50 per dozen.

MESSAGE TO THE MOTHER CHURCH. The annual message of Mary Baker Eddy to The Mother Church on Communion Sunday, June, 1900. Leatherette covers, deckled edges. 15 pages. Price, prepaid, single copy, 26 cents; $2.50 per dozen.

OUR LEADER'S MESSAGE. The annual message of Mary Baker Eddy to The Mother Church on Communion Sunday, June, 1901. Deckled edges. 35 pages. Price, prepaid, single copy, 50 cents; $4.50 per dozen.

COMMUNION MESSAGE. The annual message of Mary Baker Eddy to The Mother Church on Communion Sunday, June 15, 1902. Deckled edges. 20 pages. Price, prepaid, single copy, 50 cents; $4.50 per dozen.

TWO SERMONS. CHRISTIAN HEALING and THE PEOPLE'S IDEA OF GOD. In one volume. Library edition, cloth binding, marbled edges. 36 pages. Price, prepaid, single copy, 60 cents; $3.00 per half dozen; $5.50 per dozen.

CHRISTIAN HEALING. A sermon delivered in Boston. 10 pages. Paper covers. Price, prepaid, single copy, 21 cents; $2.00 per dozen.

THE PEOPLE'S IDEA OF GOD. A sermon delivered in Boston. 14 pages. Paper covers. Price, prepaid, single copy, 21 cents; $2.00 per dozen.

FEED MY SHEEP. Words by Mary Baker Eddy. Music by Lyman F. Brackett. Price, prepaid, single copy, 50 cents; $5.00 per dozen.

Direct all orders for above works, and make remittances payable to

ALLISON V. STEWART, FALMOUTH AND ST. PAUL STS., BOSTON, MASS.

All orders for periodicals, or literature other than the above works, should be sent with remittance directly to The Christian Science Publishing Society.

CHRISTIAN SCIENCE SENTINEL

(THE CHRISTIAN SCIENCE WEEKLY)

PUBLISHED EVERY SATURDAY BY

THE CHRISTIAN SCIENCE PUBLISHING SOCIETY

Falmouth and St. Paul Sts., Boston, Mass., U. S. A.

ARCHIBALD MCLELLAN, Editor.

JOHN B. WILLIS, ANNIE M. KNOTT,

Associate Editors.

SUBSCRIPTION PRICE

Single copy, one year, $2.00.

Ten copies or more to one address, one year, each copy, $1.90.

Twenty-five copies or more to one address, one year, each copy, $1.80.

Fifty copies or more to one address, one year, each copy, $1.50.

These rates apply in the United States, Canada, Mexico, and Cuba. In all other countries add 50 cents for postage on each subscription.

Six-months subscriptions received at half the above rates.

No subscription received for less than six months.

Subscriptions to the *Sentinel* will be entered to begin with the first of the month, and will include all issues for the month named as expiration date on the wrapper. The receipt of the periodical by the subscriber will be our acknowledgment of the subscription.

TERMS OF SALE

Five cents a copy, postpaid to any address in the United States, Canada, Mexico, and Cuba. In quantities to one address: twenty-five copies, $1.00; fifty copies, $1.80; one hundred copies, $3.00.

To all other countries, six cents a copy, postpaid to any address. In quantities to one address: twenty-five copies, $1.25; fifty copies, $2.30; one hundred copies, $4.00.

Bound Volumes: Current year and two years previous, cloth, $3.00; half calf or half morocco, $3.50. On earlier volumes write for prices.

Entered at the Boston, Mass., post-office as second-class mail matter.

ITEMS OF INTEREST.

National.

The Reclamation Service announces that the Pathfinder dam in Wyoming, which has cost $1,200,000 and has been three and one half years in the building, has been completed. It rests on a bed of solid granite, and locks a very narrow gorge with vertical walls, through which the North Platte river flows. It is a concrete rubble masonry arch two hundred and fifteen feet in height and five hundred feet long on top. It intersects a drainage area of twelve thousand square miles, including the run-off of a large mountainous territory in Colorado and Wyoming. Back of the dam is a natural reservoir which has now become one of the largest artificial lakes in the world, its capacity being 1,025,000 acre feet, or, three hundred and fifty-eight billion gallons. The reservoir will accommodate the largest flood ever known in the river at this point, and prevent the great destruction of property in the valley occasioned by the enormous floods. The great irrigation system being constructed in connection with it is now well on its way to completion.

President Taft has signed an order creating a central agency in Washington for the purchase of supplies for the several departments of the Government. The belief is that by centralizing the agencies for the purchase of ice, coal, and other supplies used in the Government departments, it will be possible to effect a saving of several thousand dollars a year. It is among the possibilities that the Government will establish its own ice-plant in Washington, as it is alleged that the American Ice Company at present sets its own price on the ice which it sells to the Government.

The fifteenth annual peace conference, in session at Lake Mohonk, N. Y., last week, was the most representative gathering which ever assembled in this mountain retreat. England, Germany, Canada, China, Japan, Mexico, Austria-Hungary, Bolivia, and other countries sent able men. Delegates came from many states in the Union, and bench and bar, law and diplomacy, pulpit and college, army and navy, finance, commerce, and industry had their advocates of peace.

The International League for Highway Improvement has adopted a bill asking Congress for an appropriation of $1,000,000 to support the work of that body through eight commissioners to be appointed by President Taft. The League purposes to open permanent headquarters in Washington, and its first effort will be to build a national model highway from Maine to Florida.

The House has passed a resolution calling on the Attorney General of the United States to inform it, if not incompatible with the public interest, what steps, if any, have been taken to annul the contract whereby the United States Steel Corporation acquired interests of the Tennessee Coal and Iron Company.

President Eliot of Harvard on May 19 retired from his official connection with the university, having completed on that day forty years of service as president. He is succeeded by Prof. A. Lawrence Lowell, who, while entering now upon his duties, will not be inaugurated formally until Oct. 6.

The Supreme Court of the United States has rendered a decision in favor of a Chicago woman who brought suit against a Chicago paper for publishing her portrait in connection with an advertisement of whisky.

The total population of the District of Columbia is 363,003, according to a police census just completed, an increase of 3,600 over the census of last year. The negro population is 97,142.

International.

A proposal by Sir Robert Parks of London has been laid before the Canadian government to undertake the construction of the Georgian Bay Ship Canal, provided the Canadian government would guarantee the bonds of his company for three per cent. He offered to begin at once the eighty miles of the French river section on the western end and to continue the other sections afterward. The Canadian government may fix the tolls and may at any time take possession of the canal by paying the actual cost of construction. The Georgian Bay scheme is a ship canal with a minimum depth of twenty-two feet, of sufficient width to accommodate boats of the large lake size of twenty feet draught. It will connect Lake Huron with the St. Lawrence river at Montreal, by the way of the Georgian Bay, the French and Pickerel rivers, Lake Nipissing, and the Ottawa river, a distance of 440 miles. Only 108 miles will require excavation work, leaving 332 miles of natural channel. The summit of the canal will be 650 feet above Montreal, and 90 feet above Georgian Bay. This will be overcome by 27 locks, with lifts of from five to fifty feet. The summit level embraces Lake Talon, the Little Mattawan river, Turtle and Trout lakes. These waters will have their present level raised by locks to 677 feet, a rise in Lake Talon of 41 feet, and 15 feet in Turtle and Trout lakes.

The fact that the dominion government and the provincial government of New Brunswick now have under joint consideration a proposal to operate by electricity the eastern section of the National Transcontinental Railway from Quebec to Moncton, draws attention to the readiness of the Canadian authorities to undertake experiments on a large scale in government ownership and operation of public utilities. If the project should be carried out it will be the most important electric railway system in the world, so far as mileage is concerned. The dominion government already has the Intercolonial Railway, and the National Transcontinental is under construction. Ontario owns the Temiskaming Railway, which taps the Cobalt mining region, and the province also owns and works the Gillies mine, while the installation of the most ambitious power transmission system in the world is now progressing under direct government supervision. Manitoba several years ago took over the trunk telephone lines from the Bell Company and is making a handsome profit; Saskatchewan has done the same within the past month, and Alberta is preparing to do so. State ownership of all the grain elevators in the West is now being urged upon the government at Ottawa, a deputation representing thirty thousand farmers having interviewed the cabinet.

Owing to the shortage of American and Canadian cattle landed at Birkenhead, and allegations that the United States was withholding supplies with a view to raising prices, the Liverpool Chamber of Commerce is urging the Board of Agriculture to remove immediately the embargo on live cattle from the Argentine Republic.

Negotiations between Venezuela and the French government for the reestablishment of diplomatic relations have been brought to a successful conclusion, and a protocol to this effect will be signed shortly.

Taxicabs in London represent an investment of $10,000,000.

Industrial and Commercial.

The Pennsylvania Railroad is planning to set out this spring more than one million trees. This will make a total of 3,430,000 trees which have been planted in the last three years to provide for some of the company's future requirements in timber and cross-ties. Of the trees that are to be set out this spring, 803,000 are red oak, 40,000 Scotch pine, 20,000 locust, 14,000 hardy catalpa, 14,000 pin oak, 5,000 European larch, 30,000 chestnut, 3,000 yellow poplar, 2,000 black walnut, and 1,000 white pine. The policy of encouraging reforestation on the part of the public has been pursued actively this spring. Some 151,000 trees have been furnished, practically at cost, to private corporations and individuals. In addition, 8,000 hedge plants have been supplied to private individuals, and 7,000 are to be set out to ornament boundary lines along the company's right of way. A special effort has been directed this season to growing ornamental shrubbery for use on the lawns around stations and unoccupied spaces along the roadway.

At the close of the fiscal year 1908, the total number of miles of railway lines in the United States was 230,000, as compared with 136,883 in 1888 and 184,648 in 1898. The net capitalization is $13,000,007,012, an increase of 30.8 per cent over the figures of 1898. The gross earnings for 1908 of $2,448,835,000 were nearly double those of 1898. Ten years ago the total number of passengers carried one mile was about 13.3 billions. In ten years' time this has increased over 120 per cent, reaching a total of 29.5 billions. The number of tons of freight carried one mile in 1898 was over 114,000,000,000; last year it was over 122,000,000,000. Ten years ago the total number of locomotives was 36,234, and now there are 57,156. The number of passenger cars has increased from 35,595 to 44,623; freight cars from 1,248,826 to 2,130,110; employees from 874,558 to 1,451,000.

The owners of the Canadian Northern system of railways in Canada are planning to build about five hundred miles of new road this summer into the wheat-field regions. It has been rumored in Boston that they have had engineers looking over the field with a view to building three hundred miles of road between Montreal and Boston, at a cost of $15,000,000, in order to give their system an eastern outlet.

It is estimated that the strawberry crop of Delaware this season will yield a return of at least $750,000 on a basis of 3½ cents a quart.

CHRISTIAN SCIENCE SENTINEL

"WHAT I SAY UNTO YOU, I SAY UNTO ALL — WATCH" JESUS

HIS ANGEL.

BLANCHE HERSEY HOGUE.

IN the 23rd chapter of Exodus it is written, "Behold, I send an Angel before thee, to keep thee in the way, and to bring thee into the place which I have prepared." In the text-book of Christian Science, "Science and Health with Key to the Scriptures," Mrs. Eddy writes, "Human conjecture confers upon angels its own forms of thought, marked with superstitious outlines, making them human creatures with suggestive feathers; but this is only fancy" (p. 298). Her own interpretation of angels, as "God's thoughts passing to man; spiritual intuitions, pure and perfect; the inspiration of goodness, purity, and immortality, counteracting all evil, sensuality, and mortality" (*Ibid.*, p. 581), establishes them on the spiritual rather than the physical plane.

The students of Christian Science make no attempt to set forth a dogmatic interpretation of the Scriptures, but from the basis furnished them by Christian Science, which resolves things into thoughts and lifts their analysis from the material to the spiritual view-point, they draw from Scriptural narrative, parable, or promise, the lessons which are of the greatest value in their own mental and moral growth. In this manner, much that is recorded in this chapter of Exodus becomes, in the light of Mrs. Eddy's uplifted and spiritualized perception concerning angels, a positive inspiration toward the renovating of individual thought and life. When the promise reads to the student that God will send a pure and perfect spiritual intuition to keep him in the way, and to bring him into the place which God has prepared, the mental process of spiritual guidance can be comprehended. When it is seen that an angel is not an etherealized person, but a right idea, and that such right idea can become a dominating influence in the mind of the individual who cherishes it, mortals need no longer grope in doubt concerning divine help, for they learn that the angel of one's highest sense of good lies within, not without, the borderland of one's own thinking, and consequently is an ever-available help in every problem of life. This angel, admitted, understood, and obeyed, fosters the right living which naturally follows right thinking; and so salvation can begin today, and the place which God has prepared can be, in a degree, a present possession.

In the chapter under discussion, the offices of the angel, the things required of him who would follow it, and the happy results of obedience to it, are clearly stated. God sends His angel to each receptive heart. His highest idea of good then goes before the mortal, keeping him, bringing him into the prepared place. The mortal is admonished to "beware of him, and obey his voice, provoke him not; for he will not pardon your transgressions." Truly, every would-be Christian has long since learned that his highest ideal has no pardon for the unworthy and the base, but holds him unwaveringly to his highest and best performance! "For my name is in him," continues the record,—the seal of divinity marking every right idea as its own, declaring every pure and perfect thought God's offspring! Then the promise follows, the reward of obedience: "But if thou shalt indeed obey his voice, and do all that I speak; then I will be an enemy unto thine enemies, and an adversary unto thine adversaries." By simple obedience to the highest monitor of heart and conscience, right purpose and endeavor are strengthened, and every Christian warrior may find himself equipped for the battle with the hosts of self, wherein God's angel is indeed an adversary unto all the foes of righteous manhood.

It is further written: "For mine Angel shall go before thee, and bring thee in unto the Amorites, and the Hittites, and the Perizzites, and the Canaanites, the Hivites, and the Jebusites: and I will cut them off." To these tribes about Israel, the Israelites' deadliest enemies, the angel of God was to "bring in" the children of Israel. Their enemies must be faced, if vanquished, and according to the text, Israel was to be led by the angel to a direct encounter with that which was to be overthrown. Herein is illustrated one of the greatest lessons of Christian Science; that the office of a newly discovered good is to uncover and destroy hitherto unrecognized evils, and that the angel of right thinking leads directly to the detection of the evil nature of evil thinking.

The carnal mind has for ages sought to cover much of its own carnality and call it good. It has sought a future heaven for the carnal under its guise of good, and has failed to see that the carnal must disappear, because only absolute Christlikeness is fit for heaven. Despite Jesus' uncompromising statements that "that which is born of the flesh is flesh," and that "there is none good but one, that is, God," mortal mind has persistently wrapped its cloak of self-righteousness about it and has gone on striving to occupy the land, the prepared place in consciousness wherein right thinking alone is entitled to dwell. Christian Science, revealing the real man to be only that which is faithfully and perfectly the likeness and image of God, uncovers all mental deformities as the enemies which must be "cut off" from the land,—banished from individual thinking. God's angel does indeed bring the earnest Christian to a recognition of the unlovely and the undesirable in his own consciousness, and this highest idea of good, which has led to this discovery, serves him further as it sustains him in obeying the accompanying command: "Thou shalt not bow down to their gods, nor serve them, nor do after their works: but thou shalt utterly overthrow them, and quite break down their images."

Mrs. Eddy writes on page 366 of Science and Health, "The physician must also watch, lest he be overwhelmed by a sense of the odiousness of sin and by the unveiling of sin in his own thoughts." Only the illumination of a higher knowledge of good can expose to the honest heart the winding subtleties of its own selfishness, that selfishness which has been for so long half-hidden under the guise of "disposition" and "temperament" that analysis of it has been well-nigh impossible. Only the revelation, in Christian Science, of perfect spiritual manhood, the abso-

Copyright, 1909, by Mary Baker Eddy.

Digitized by Google

lute Christian ideal, is able to bring to the light the imperfection of the so-called man of the material senses. And only the courage born of this revelation can sustain the individual in his warfare against the selfishness, the wilfulness and the vagaries, the habits and the sins, he has formerly called himself. It requires both insight and bravery to call one's own unhappy emotions and moods self-love, envy, resentment, self-pity, cowardice, self-justification, criticism, vanity, greed, appetite, indolence, anger, or malice, yet spiritual intuition often leads one to just such discovery, and to the righteous conquest of just such enemies, before any abiding peace can be obtained. For this purpose Christian Science has come into the world, and its task is not accomplished till Christian practice and profession are so quickened as to "utterly overthrow" these evil habits and "quite break down their images."

In the Exodus lesson, tender promises follow these stern commands. "And ye shall serve the Lord your God," reads the text, "and he shall bless thy bread, and thy water; and I will take sickness away from the midst of thee." Well do the students of Christian Science know that this rich inheritance is theirs, and that sickness shall be taken away from the midst of them, for they rest in the promises of God. They are learning as well, however, that they must follow the "angel" unfalteringly, and through its guidance face and overthrow the self-distorted images of their own wrong thinking, if they would escape the pain and disease attendant upon such thinking. When healing is delayed, the humble prayer which leads either patient or practitioner to the discovery of his own "stone of stumbling," leads him past it to that place in consciousness wherein he knows he is not separate from any God-given good. Then has he earned the promised healing, for he has followed his angel wherever it has led him, and comes by God's ways to the place which God has prepared.

The command of this Exodus chapter continues, forbidding covenant with Israel's enemies, prohibiting any serving of their gods, and the promise reads: "I will not drive them out from before thee in one year; lest the land become desolate, and the beast of the field multiply against thee. By little and little I will drive them out from before thee, until thou be increased, and inherit the land." Not with one great demonstration, not with spectacular rush or climax, but by patient, faithful endeavor toward the highest and the best, is this promised land to be inherited. Many weary battles with the tribes of unlawful thoughts may mark the way, but as the angel guide is followed to and past such encounters, Love itself will bless the never-ending supply of bread and water, and sickness will not be found within the borders of the inheritance. The wayfarer needs but to follow and obey. Divine Love cares for the fulfilling of the promise. Henry Van Dyke has written:—

Self is the only prison that can ever bind the soul;
Love is the only angel who can bid the gates unroll.
And when he comes to call thee, arise and follow fast;
Its way may lead through darkness, but it leads to light at last.

THE POSITIVE NOTE.

ROBERT NALL.

THE positive nature of Christian Science teaching and practice cannot be too strongly emphasized. Because it is idealistic, it is sometimes looked upon and described as visionary and impractical, but it does not require a very profound acquaintance with philosophy to know that life without ideals would be worthless. The main thing is to see that these ideals are pure and perfect, and that in our reasoning we adopt the deductive method so clearly evidenced by Mrs. Eddy in giving to the world a system of thought the most practical, because of its spiritual basis, that the world has known.

There is weakness and vacillation in much of the writings of ancient as well as modern philosophers, because in groping their way in the "thorny road of truth" many of them had little or no conception of a spiritual theory of the universe. Some modern philosophers have been emphatic enough in promulgating their theories, but time, research, and revelation have proved them to have taught quite erroneous opinions because of their failure to reason deductively. One of these, dominated by pronounced materialism, declared that metaphysics, which deals with the essence of things and the search for reality, being an impossible science beyond our senses, should be "relegated to the lumber-room of useless objects." Mrs. Eddy, however, brushing aside the imperfect and unsatisfying theories of philosophers, went straight to the purest and best Teacher and teaching, and won her way to the absolute conclusions found in Christian Science "through divine revelation, reason, and demonstration" (Science and Health, p. 109).

It was the profound conviction that what had been revealed to her was the unadulterated truth taught by Jesus, which impelled her, without doubt or fear, to give it to the world, and thus to become one of its greatest reformers. That this conviction has never weakened is evident from the wonderful history of the past forty years. With undimmed vision, with steady purpose, with unwavering solicitude, with burning zeal for God and humanity, there has been a persistent and consistent declaration and manifestation of the truth that is today a mighty force in winning men and women to the acceptance of Science and to all the beneficent results that follow therefrom. What is it that has made a few men and women all down the centuries such potent influences for good? Not mere intellectual knowledge, not wealth, not rank, not special opportunities or advantages, but a spiritual passion that with almost divine vision saw, above and beneath and beyond the frailties and sufferings of humanity, that kingdom of righteousness wherein God's purposes for His children are fulfilled and His will is done.

It is said of Savonarola that he realized his power as "a messenger of the supreme righteousness," and oftentimes felt himself "full charged with divine strength." In a measure this should be true of every Christian. If he be "rooted and built up" in Christ, Truth, and well "stablished in the faith," the practical positive character of his religion will be witnessed not only in daily walk and conversation, but in the spiritual activities he is impelled to undertake because he has experienced and desires to manifest the altruism of true Christianity.

As Christian Scientists we are charged with a definite mission. Our charter is set forth in the words and works of Christ Jesus and interpreted to us in Science and Health, and here "he that runs may read." The noblest followers of Christ have always been those whose creed was the simplest and whose faith was not beclouded by the perplexing and harassing definitions of Scriptural expositors. Much learning in this respect has too often resulted, and still results, in unsettled conviction and in an obscured sense of the truth. Truth is clear to the pure vision. It is always strong and positive. It allows for no weakness in the industry with which it is sought or the tenacity with which it is held. It permits no half measures. Neither does truth wrest Scripture to suit current philosophy or theology. We need to be alert against the tendency to accept and act upon what are euphemistically called "half-truths." There are no half-truths in the line of the spiritual, and he who seeks to interpret inspired utterances so as to deflect from their obvious meaning is undertaking a serious responsibility.

In nothing is it more imperative that interpretation should not be strained or twisted from the obvious meaning than in instructions and admonitions that have come down

Digitized by Google

to us from those who gained their strong spiritual understanding from contact with the Master. Hence when we find a prelate of the church declaring that the "literal interpretation" of the text in James, "Is any among you sick? . . . let them pray over him," is "wrong," for "with bodily sickness the guidance of the medical profession should be sought," we are led to wonder how far this limitation of the purpose of prayer extends. There is no more positive instruction in the Scriptures than this. If it is "wrong" to pray for the sick, then who are the proper recipients of the blessings that follow from prayer? What warrant is there for seeking to weaken the force of an apostolic utterance that is obvious truth, proved to be such throughout all the Christian era? The Lambeth Conference admitted, in its reference to "Ministries of Healing," that there were "truths which the church had failed to set forth fully," and although the progress of Christian Science is awakening thought in the direction of bodily healing to an extent undreamt of a few years ago, the reluctance to proclaim and apply the full-orbed gospel of Jesus is strikingly manifest.

In the desire to revive that essential fact of primitive Christianity which so long lay dormant, there is a marked disposition to adopt only tentative measures. But experience is a great teacher, and error's ways are neither ways of pleasantness nor paths of true progress. When once it is conceded that the Master's message is capable of becoming a divided garment, one part of which is true and the other of which may be,—about which there is no certainty,—there enters an element of weakness which is the seed of failure. It is possible that herein lies the reason why some students of Christian Science have not yet reached that attitude of thought which would enable them to prove that the teaching in Science and Health is positive Christianity, based upon such an absolute faith in the divine message given to the world by Jesus as to render it impossible that its impeachment should ever do more than temporarily retard its acceptance by humanity. "Truth remains true; the fault's in the prover." And the truth finds its most faithful exponents in those who with an "eye single" to the divine perfection, refuse to recognize error in any form as a reality, and seek to demonstrate the nothingness of everything which is not the creation of the divine Mind.

Herein, if there is to be effective power for service, the Christian Scientist finds that it is necessary to be constantly on the watch-tower. He needs to be on the alert that he is not deceived by a growing laxity in clear religious teaching,—a tendency to discard defined spiritual knowledge which is a reaction from the thraldom under which men lived in their efforts to be loyal to creeds of scholastic theology. Broadness of thought, which at first meant emancipation from many dominant beliefs formulated in these creeds, and in rites and ceremonies superadded to the simple Christianity of the Christ, has come to mean a latitude which, gathering momentum in its growth, produces a lamentable indifference to spiritual life. This rebound would undoubtedly have been a hundredfold more widespread but for the timely advent of Christian Science, appealing as this does to men and women in every walk of life as the most spiritual, Biblical, logical, demonstrable, and practical of all religions.

Just when what is called physical science had evolved a system of thought, and hailed, as remarkable, discoveries in the realm of nature and in the origin of life which threatened to, and for a time actually did, intensify the disposition toward materialism, with all its attendant evils, there came this revelation of the divine purpose and will, bringing "to light Truth and its supremacy" and revealing "incontrovertibly that Mind is All-in-all, that the only realities are the divine Mind and idea," and that here is the "sovereign panacea" for the ills of humanity (Science and Health, pp. 293, 109, 407). "If thou wilt enter into life," said the great Master, "keep the commandments." There was no tone of weakness or doubt in his words or works. His followers were to be humble as little children. They were to "abide" in the truth, they were to "strive" and "watch and pray," and they were to apprehend that the works which he did could be done by his followers, but only by those who spiritually understood that this comes by "prayer and fasting."

These are some of the commands which the author of the Christian Science text-book has never ceased to proclaim. The "wooing note" is there,—the note so beautifully exemplified in the "come unto me" of Jesus,—but there is no modification of the strong appeal for perfect trust in a perfect God. The call, therefore, to every Christian Scientist is to be loyal to the positive truth embraced in the divine message that it is his privilege to have received. He who falters is in danger of drifting into an anemic Christianity that fails in proportion to its distance from the perfect standard. He who has proved that Christian Science makes no claim which cannot be successfully subjected to the highest test, will grow in the consciousness of its enfoldment, and will be more and more impressed with the fact that it would be impossible for any real progress to be made in its higher mission of reclaiming sinful humanity, were it not a perfectly consistent and harmonious exposition of the teachings of Christ Jesus.

OUR LIGHT SHOULD BE SEEN.

LOTTIE M. ST. CLAIR.

JESUS said to his disciples: "Ye are the light of the world. A city that is set on an hill cannot be hid. Neither do men light a candle, and put it under a bushel, but on a candlestick; and it giveth light unto all that are in the house." These words of our Master show us the necessity of unceasing labor. "Ye are the light of the world;" that is, the truth which each of us has grasped and made his own is a light to guide him and others out of the darkness of materiality into the realm of the spiritual, the real. If each one's light, *i.e.*, all the truth he knew, were put into practice,—lived every moment,—and all our lights were shining as one, the resulting radiance would dispel earth's gloom and annihilate all mortal dreams.

The light of Truth is set on a hill. We must rise above the valleys of depression and the mists of sense and reach a height from which our light can be seen. The glimpse of the truth which you and I have discerned and proven, be it ever so tiny a ray of light, is eternal; we can never lose it. Then, why do we ever seem to be in darkness after we have proven somewhat of Truth? Is it not because we have covered our light (our understanding of Truth) with a bushel (a measure of evil or error), so that its rays no longer penetrate the darkness of the error we are holding in thought? Thus for a time we may be plunged in darkness, and some needy one who is standing near may continue to suffer because he cannot see our light.

There is never a time when the Christian Scientist can afford to let the light that is within him be darkness, for the "poor" we have always with us. We may never know how much we might have helped another had our light been brightly burning instead of being so dimmed with error that our neighbor failed to see its gleam in time of need. Let us not hold on to the discarded garments of sin, when once Truth has shown us what they are. Let us turn forever away from them and refuse to allow them to touch us again. If we have parted company with the world, the flesh, and the devil, let us persistently remain separate from them, for to return to that which we know to be sin is to cover our light with a measure. If our

Digitized by Google

besetting sin is a cruel, blighting, unreasonable temper, shall we rid ourselves of it by indulging it under any circumstances?

Every one who has taken the name of Christian Scientist has accepted a solemn obligation to learn of God daily; and to live what he learns of Truth's teaching. To fail to do so is to assume a false attitude, and the world will despise such an one, as well it may. Neither have we any time for idleness. None of us is so good but that he might improve his time by learning how to be better. If our lives are not bringing forth "fruit unto holiness," it is because we are failing to let our light shine. Let us search our mental household for the unlovely, the repellant sin that prevents our light from shining and that keeps us from accomplishing the good works which others may see and be led thereby to glorify our Father.

One can scarcely imagine a more unworthy position to occupy than that of a recipient of the rich blessings which Christian Science bestows, who fails to "strangle the serpent of sin" (Science and Health, p. 569), thus permitting himself to be a stumbling-block and an offense to those who might accept the blessing of Science were we living it so that they could see its beauty. Let us be honest, earnest, worthy followers, if we would not hinder the progress of others. Let us not be found wanting. To be a follower means to follow, and according to Webster to follow is "to strive to obtain; to copy after; to attend upon closely." If we study the life and works of our Master and our loved Leader, we shall find that we have much to do in order to be worthy followers. We may stumble in our best efforts to follow where they lead, and like the disciple we may sometimes follow "afar off," but we should not be weary in well-doing; rather should we continue to follow; to strive to obtain. Then will our efforts be blessed and we shall not need to waste precious time in vain regrets and self-condemnation, but use it in loving, in working, in overcoming, for in this way and in no other are we of any benefit to the world.

WHY AND WHEN.

FRANK B. HOMANS.

SOMETIMES those who come to the Christian Science practitioner for treatment ask him: "Do you think you can cure me?" "How long will it take to heal me?" Such questions are perhaps quite natural, but the practitioner has learned that the doubt and limitation thus expressed do not aid in the work to be done. These inquiries can, however, be easily answered, as the mooted point can be referred to God, who is the healer of all diseases. Again, when a case is not promptly met and the trouble cast out, it is sometimes asked, "Why do I not get healed, as well as my neighbor, who had a similar trouble and was healed in a few days?"

We find that a similar query was addressed to Jesus, after he had been in the mount of transfiguration with three of his disciples. When he came down, a certain man met him and prayed him to heal his son, who was a lunatic. The disciples had worked on the case and failed to effect a cure, but Jesus said to them, "O faithless and perverse generation," and instantly he healed the boy. When the disciples afterward questioned Jesus as to why they had not been able to do this, he said, "Because of your unbelief;" and later on he told them, "Howbeit this kind goeth not out but by prayer and fasting." While this answer is convincing, the question Why? may still confront the practitioner. It is possible that he may have had a case similar to one with which he is now unsuccessfully struggling, and which was healed very shortly. He may feel that he is working as faithfully on the present case as he did on the more successful one, and in his own heart he too may ask, "Why?"

There could be several reasons advanced to explain this seeming mystery. The first patient may have been very simple, childlike, and receptive to the truth, while the other may have repelled the truth which the Scientist tried to impart, concealing the error which the practitioner was seeking to uncover and destroy. On page 457 of "Science and Health with Key to the Scriptures," Mrs. Eddy says: "To pursue other vocations and advance rapidly in the demonstration of this Science, is not possible;" hence, a practitioner who divides his time between healing and business pursuits may successfully treat one seemingly difficult case, yet not succeed in a similar one, because the latter required more "prayer and fasting" than the former. Again, even as Jesus' disciples lacked his spirituality and failed to heal the lunatic, so a practitioner may, from lack of spirituality,—"because of [his] unbelief,"—sometimes fail to heal his patients.

A little material work which I did recently, seemed to answer this question for me. I had a plot of low swamp land, which was rendered dark, damp, and useless by a heavy growth of brush, briers, and trees. I undertook to clear these out, and progressed finely with the briers and small brush, but when it came to the large trees I was obliged to call a more experienced and stronger man to do the heavier work. The place thus cleared was greatly benefited in appearance. The sun shone in, giving light, warmth, and dryness, and everything looked improved, but it was clear that no quality which I possessed had brought about the change. The sun had been shining day after day, and was always ready—when given the opportunity—to shed its beneficent light upon the land. My part was to remove the briers and brush which excluded the light, but I found I lacked the strength and experience necessary to accomplish the heavier part of the work.

If a practitioner fails to heal a case, he is in the same position that Jesus' disciples were when he said to them, "O ye of little faith." There may be cases which no practitioner of this age could heal. Mrs. Eddy says in Science and Health (p. 495): "Truth casts out error now as surely as it did nineteen centuries ago. All of Truth is not understood; hence its healing power is not fully demonstrated." But of this we may be sure, that if we fail to succeed in any case, the fault is not with God nor with Christian Science. Divine Love is always at hand, and our Leader has taught us how to apply the truth. Let us be certain that we are doing all we can to advance in this glorious work,—to gain the spirit which enables one to heal the sick and sinning.

[Written for the *Sentinel.*]

BROTHERHOOD.

MARGARET C. LOWNDS.

THERE was a time when, in my selfish pride,
I watched the world go by. I stood aside,
And shared not in its joy; its grief
I cared not for, nor brought relief.
Mine own were safe. Why should I care
For strangers, or their sorrows share?

How poor I was! Those days are gone,
And I today one Father own,—
One loving Father over all the race;
And in its meanest, poorest wanderer trace
Some likeness to the good that in each one
Points upward. Dear Lord, today I own
No Jew nor Gentile, neither bond nor free;
But members each of each, and all in Thee!

[H. F. Porter in *Cornell Era*.]

Let me tell you what Christian Science has done for me in bringing out my true ability in athletics, as well as benefiting me generally. Many times I was on the point of giving up—for my early attempts were crude and unpromising; but I stuck, and by dint of persistent, earnest effort I slowly but surely improved. In the underclass track meet, in the fall of my freshman year, I jumped five feet and four inches. During the winter in the armory I got so that I could clear five feet and seven inches on a pinch. In the opening meet of the spring—the dual contest with Pennsylvania—I won first place with five feet and nine inches, which gave me my "letter." This marked my limit for that year. In the winter of my sophomore year, in the dual meet with Michigan at Ann Arbor, "Gary" Serviss and I shared first honors with six feet and one inch, making a new Cornell indoor record, which remains unbroken still. But this was a happy occurrence, one of those supreme moments that occur now and then to all men, in which they rise to the verge of their true ability. I never repeated this performance while in college, although by my senior year I had become a consistent performer at five feet and eleven inches, which was good enough to win second place in the intercollegiate. This was in 1905, and my points proved just enough to give Cornell the margin of victory, and thus her first intercollegiate championship. I always felt as if I could do much better, but extreme nervousness, such as is characteristic in the case of many athletes, always proved my undoing. My strength seemed to ebb out early in the contest, leaving me unfit for the supreme trial and practically worthless as an athlete for several days afterward. Why this was I never could understand—but I have since, and let us see how my enlightening came about and with what results.

It was little over a year after leaving college that Christian Science was brought to my attention. Before this I had known little or nothing about the teaching, and was neither prejudiced against it nor committed to any other system of religion or philosophy. But I was in distress. Lack of the same orderly life as at college, with its balance of exercise and sport, and its steady inspiration, coupled perhaps with a reaction from an exceedingly strenuous round of activities at college and the confusion common to college men upon first being plunged into the vortex of commercial life, presently manifested itself in poor health and low spirits, from which nothing seemed to be able to rouse and rescue me. Insomnia and indigestion, and other things, made existence a misery instead of a joy. Darkness threatened to engulf me.

It was in this state that Christian Science came to me—it was a light in the dark, the signal of hope from anear to the stranded mariner. I never shall, indeed cannot, forget the day a copy of Mrs. Eddy's book, "Science and Health with Key to the Scriptures," was placed in my hands to read. I did not read it—I devoured it. Herein was my own heart laid bare: all that I had at one time or another felt to be true, and had yearned but had not the confidence to express and practise, and much more, was herein set forth in chapters glowing with illuminating idealism and logic irrefutable, that dealt fearlessly and conclusively with every phase of life's problems. The reading of only a few of these chapters at the first sitting seemed to work wonders. I was lifted out of myself and my troubles. That night I slept like a babe once more, and arose the next morning feeling a brand-new individual. Three days later, I laid aside the glasses which a manifestation of astigmatism and far-sightedness, back in sophomore year, had compelled me to annex. It is over two years since then, and although I have used my eyes almost without limit or consideration, they have served me perfectly. And my health has been uniformly good, and my spirits growing daily steadier and stronger.

What Christian Science spelled for me was, "Liberty!" It became my "Declaration of Independence"—to be loosed from the bonds of ignorance and superstition; to be freed from the fetters of fear and doubt; to be absolved from all errors of mentality that limit, enslave, and condemn; the bitter taint of heredity, false education, and a worldly environment,—in short, to prove myself God's perfect man, limitless and undefiled, as the creator, Himself limitless in all attributes and perfect in every part, alone could have made man. Christian Science, indeed, points out the sure way of escape, and provides both the guide and the guard from the pitfalls, quagmires, and tangled wildwood of human ignorance, with its brood of evils, into the limitless light of life ruled by reason, right, and Love, harmonious and eternal.

Along with improved health and a clarified mentality came a fresh influx of youthful spirits—I felt returned, as it were, to my boyhood days, when I romped and played in sheer abandon to the joy of living. My fondness for athletics returned with force. I longed again to don the simple attire and sport on the field and track, and with greater keenness than ever before, I felt relieved of my burden of anxiety and bondage to any pet theories of diet and training. My chance to indulge this longing soon came. I attended the 1907 intercollegiate championships at Cambridge. My favorite event—the high jump—went to Moffitt of Pennsylvania, at the record height of six feet three and one quarter inches. Meeting the winner, whom I had met in competition several times while still in college and always bested, in the lobby of a Boston hotel immediately after, I half in jest challenged him to a dual contest. He took me up, and the Saturday aweek, on Franklin Field, Philadelphia, was appointed for the meeting.

Let it be remembered that I had not had on a spiked shoe in two years, and had not indulged myself athletically otherwise the while. With never a forethought or doubt, I repaired to the scene at the appointed time. There were present, among others, Trainer Mike Murphy of Pennsylvania, and "Bert" Page, Penn '88, the first American leaper to adopt the straight approach to the bar and the fearless flat layout crossing the bar. The bar was started at about five feet, and as we each cleared the successive heights, was raised by increments of two and three inches until it stood at six feet four inches. The exact height we were unable to determine, lacking a tape; but the reading on the standards was six feet, six inches—three eighths above the world's record of six feet, five and five eighths made by "Mike" Sweeney thirteen years ago. Allowing for the sag in the cross-stick, the probable height was as stated above. We each cleared this height on the first trial—we did not for some reason then raise it further, but tried again at the same mark. Moffitt failed on the retrials, but I succeeded in doing the trick twice again; thus I was declared the winner.

At this truly remarkable performance I no less marveled than did the onlookers—Moffitt was amazed. The facts are as stated—I leave my readers to form their own conclusions. I frankly give the credit to my knowledge and successful application of the Principle of Christian Science. It did nothing miraculous—simply by freeing me from mental rubbish, it made it possible for me to realize for the first time a fuller measure of the powers latent in me. By pure accident I had once before, at Ann Arbor in 1903, risen to the verge of my true ability—now the result followed naturally the application of correct teaching to the problem. This feature of my activities was thus removed from the realm of haphazard to the realm of certainty. Similarly, through the correct application

Digitized by Google

of the self-same Principle—in other words, thinking rightly—all the problems that confront and perplex mankind may be definitely and positively solved. Neither "Cornell spirit" nor invincible determination, both of which are more or less blind forces, could have brought about with any degree of certainty a similar or an equal result.

Four months later, in the indoor national championship at Madison Square Garden, without a bit of preparation, just living and attending to my daily duties in the ordinary way, I was successful in my event, winning at six feet one and one eighth inches. During the succeeding months of the indoor season, I was again successful in a number of competitions, clearing six feet two inches repeatedly; and once in the Columbia games in Madison Square Garden, six feet three and one half inches, eclipsing the world's indoor mark. This was not allowed, however, on account of a technicality. During all this time, although competitions were often several weeks apart, I never once had opportunity to practise the jump, and took no special exercise. Nor did I secure the customary slicking with the unction of oils and ointments, or go through the warming-up processes deemed so necessary by most athletes and trainers prior to entering a competition. I simply undressed, donned my jumping togs, went out and jumped. My only preparation was to get my thoughts as harmonious as possible, if perchance the tasks of the day had left me wearied and oppressed. Physical freshness I found to be coincident with mental freshness, and my maximum efficiency was always realized when perfect coordination of mind and body ensued. Then it was that, in pure abandon to the joy of action, with mind calm and serene and body under perfect control, I leaped almost without effort, and experienced no physical fatigue or reaction. Emerson wrote, "A man does his best things easiest." My best jumps are ever my easiest, demonstrating that when man conforms to Principle, and does things with proper exercise of intelligence, friction and failure are fled.

But the most remarkable demonstration was yet to come. The New York Athletic Club's annual indoor meet was scheduled for the 10th of March (1908), and I had promised to attend. At this time I was in Toronto, Canada, engaged on an engineering work. About a week before the date of the games I met with an accident to my right and jumping knee, a piece of machinery hitting me there with some violence. My knee became swollen and very stiff, such that I could hardly walk. At first the pain was also severe, but this I soon mastered. In spite of my attempted application of my understanding of Christian Science, the condition disappeared but slowly, and the eve of departure for the contest found the knee in no shape for vigorous usage. Nothing daunted, I set out for New York. To complicate matters further a very sleepless night ensued, in which I tossed with fever, and the next morning found me limp as a rag. During the day I was confined to my room in the hotel, could eat nothing, and was beset with alternate chills and fever. The knee also seemed to grow worse apace, and the hour for the games found me in sorry shape. I made my way to the Garden. Once inside I began to feel better, but to my friends who came up to greet me I could only reply to the usual query: "How are you?" weakly and with ghastly smile. Somehow, during all this trial I never for a moment doubted that when the time came I would be fit. And I was. When my event was finally called, I rose from my reclining-place near at hand and realized that I was absolutely well. The knee was no longer abnormal, nor did deadly inertia possess me. I was free! My performance—six feet two and one quarter inches—which was all that was required of me by the handicapping to win, was well up to standard. In fact I was never in better form.

Every fact stated can be affidavited. That the realization of the power and presence of God, as taught and demonstrated by Christian Science, is as efficacious today in casting out all erroneous conditions as it was nineteen centuries ago, is hereby conclusively demonstrated. That was the literal truth to which I clung throughout the trial, and when this faith in what I believed to be fact reached its supreme test and was not found wanting, I was rewarded, even as Abraham of old was rewarded for his steadfastness. The dream-shadow of inharmony simply vanished into its native nothingness. Neither "Cornell spirit," grit and nerve, nor all the *materia medica* and man-made codes of philosophy extant could have brought about this result. It was a problem of human experience that only the power of omnipotent, ever-present, and all-knowing God, applied solely and wholly through a knowledge of Christian Science, could solve.

Christian Science points out the sure and safe way to success—in this as in all other problems of human experience. It does not enable one to triumph, according to imperfectly gauged human standards, over mere personal rivals—far from it. But it does enable one, so far as one abides with the truth and is obedient to its leadings, to conquer every condition of thought, realizing harmony of mind, morals, and body,—the way is made clear for man's true ability to emerge. The *genus malus* that would balk and defeat man in all laudable undertakings, Christian Science not only enables one to overcome but to destroy absolutely, for in truth, since God is infinite good and there can be no other mind, might, or presence, no power opposed to limitless Deity, the one fact of being is harmony.

[Alfred Farlow in *Orangeville* (Ont.) *Banner*.]

It is the teaching of Christian Science that Jesus Christ is the way out of all evil. It is the mission of Christian Science to bring the Christ to the consciousness of the individual, and thus show mortals how to follow the example of our Lord. Christian Science recognizes the coming of Christ Jesus in the flesh and inculcates a high respect for his teaching and example.

The term good applies to God, not only in Christian Science, but in the Scriptures also. Jesus said, "Why callest thou me good? There is none good but one, that is, God." Of course the term "good" as well as the term "Principle" must be understood in a divine sense. These terms when used with reference to Deity are not used in the ordinary sense in Christian Science teaching. To say that God is Principle is to say that He is the one infinite creator, the only cause, the foundation or beginning of all that exists, the heavenly Father, the one intelligence which governs the entire universe. In her teaching, Mrs. Eddy declares that God is not person in an anthropomorphic sense, but in an "infinite sense."

A critic declares: "Mrs. Eddy says sin and death are native nothingness." He might have added that Jesus taught the same when he said of Jairus' daughter, "She is not dead, but sleepeth." The Master evidenced an understanding of death differing from that which was known and believed by the people of his time. He said of Lazarus: "Our friend Lazarus sleepeth:" but when he discovered that they did not understand his meaning, "then said Jesus unto them plainly, Lazarus is dead." These two experiences indicate an understanding that what seemed to be death was simply a dormant mental condition from which its victims could be awakened through divine power, and in both instances Jesus proved the fact by raising the dead. The Christian Scientist does not deny that sin and disease exist in what Solomon called "the error of life," although he adheres faithfully to the teaching that God made only the "very good" things. Consistently with this teaching he recognizes that evil has only a mythical existence, and can therefore be overcome by the power of Truth, by

Digitized by Google

putting "off the old man with his deeds" and putting "on the new man, which is renewed in knowledge after the image of him that created him."

[J. V. Dittemore in *Troy* (N. Y.) *Times*.]

Christian Science not only "says" it can cure organic as well as functional diseases, but it produces the evidence. This does not mean that every case of organic disease which is treated in Christian Science is healed, but it does mean that any failures in practice are the result of improper application or insufficient knowledge on the part of the practitioner, and in no way the fault of the Principle of Science. When Jesus came down from the mount of transfiguration we are told how a father brought to him his lunatic son. The disciples had been unable to restore the boy because of their "unbelief"—their limited understanding; but the Master, knowing "the will of the Father," proved the omnipotence of Spirit, "rebuked the devil," and "the child was cured from that very hour." Jesus said, "If ye love me, keep my commandments." The healing of the sick is as important as the destruction of sin; in fact, Christianity must be available for both, else it is not fulfilling the mission its Founder intended. It may also be noted that the Master never indicated that his method of healing was intended only for neurotics and hypochondriacs, while those suffering from organic disease should, in the words of our critic, be "turned away," unable to avail themselves of God's omnipotent love simply because their sickness had progressed beyond the "functional and nervous" stage.

Christian Scientists refuse to believe that mesmerism, suggestion, or any other phase of human will-power is in any way related to the activity of the divine Mind as demonstrated by Jesus Christ two thousand years ago and as again practised today in Christian Science. The various systems which are used today in connection with the work of different religious denominations are no more entitled to be called "spiritual healing" than they have been during past years, when the same systems have been used by members of the medical profession.

We are sure that our critic's inference that Christian Science is not in harmony with the teachings of Scripture cannot be substantiated by a study of its position in regard to the cause and cure of either physical disease or of sin. Our critic feels that the teachings of Christian Science "offend his intelligence" by "denying matter." I am sure that it is only his concept of the teaching of Christian Science on this point that effends him. Christian Science denies the existence of nothing that is a part of the creation of God, who made all things that were made and pronounced them "very good." It affirms, however, that God's creation is spiritual and perfect like Himself, and that the so-called material universe, the heaven and earth of our mortal experience which shall pass away, is but a mutable, destructible (and in that sense unreal) conception of the true universe of Spirit. When one has seen disease disappear and the discords of our mortal material existence yield to the harmony to which all mankind is entitled, then his faith in Christian Science increases and he is willing to learn that matter is impotent, the phenomena of human thought, and that salvation from all that binds must and shall come through recourse to the divine Mind, that "Mind which was also in Christ Jesus.

[Editorial in *Detroit* (Mich.) *News*.]

The minister who seeks to advance truth by attacking the beliefs of others is as far behind in his profession as the old teacher of the three R's who sought to overcome natural mental defects by a liberal use of the beech rod. The proposal of some members of the Pastors' Union to launch a campaign against Christian Science is bad judgment from the psychological, pedagogical, and religious points of view. It would show the lack of knowledge and wisdom on the part of those who are supposed to know the avenues by which truth finds its way to the mind.

The folly of the attack, the Pastors' Union's unpreparedness for it, is shown in the necessity of bringing in an outsider to do the fighting. Surely, if the pastors knew Christian Science to be all they hope to prove it to be, they would then know enough about it to see the utter uselessness of attacking it with a hammer. Here is a positive statement of principle. The principle is right or it is wrong. It is operative or it is not. To bring to bear on this statement of principle a negative, attacking campaign is to accomplish nothing. Christian Science has its appeal, which must be displaced by a better appeal, if Christian Science is to be uprooted—has the Pastors' Union formulated a better appeal? If Christian Science is a delusion, is the Pastors' Union prepared to produce a reality that responds to the deep cry of the race for an ideal that transforms?

Moreover, it is the experience of every cult that the more persecutions the greater its growth. Attacks are like the winds which toss the young tree and root it deeper. When Christian Scientists hear of the proposed campaign against them in this city, they will rest quietly and possess their souls in patience, for they know that Christian Science is due for a good boost here in Detroit. Attacks always work that way. The attacker is never quite as convincing as the man who merely states his principle and lets it do its own work in the mind. Unwittingly the Pastors' Union is lending itself to a Christian Science campaign.

It is a strange circumstance to be advising ministers, but their proposed action is so contrary to all the methods of good teaching, all the spirit of religion, that it is strange they do not see it. This everlasting spoiling for a fight that characterizes some of our city clergy is a positive detriment to the church. If there is any one who ought to dwell in serenity, who ought to speak his word without the venom of attack, who ought by his very demeanor to show his whole certitude without the disturbance of opposed teaching, it is the Christian minister. In his positive, quiet, veracious way he can combat more evil by crowding it out with truth and nobler affections, than by all the attack his malice or his jealousy can conceive. Instead of finding a lesson, humiliating perhaps, in the fact that thousands of persons were turned away from a Christian Science lecture in the Detroit Opera House, one minister professes to find cause for indignation in it. Such men need to be taught a while before they essay to teach others.

But all this was said in a better way very long ago in a book which the ministers should rely on more than they do. It was said by a doctor of the law who was opposing a campaign similar to the one now under consideration: "Refrain from these men, and let them alone: for if this counsel or this work be of men, it will come to nought: but if it be of God, ye cannot overthrow it; lest haply ye be found even to fight against God." The responsibility of the religious teacher is to teach what he conceives to be truth; by attacking what he conceives to be error, he simply digs about its roots and gives it the benefit of his tillage.

I believe that human loving is a lesson taught above,
I believe the cup of blessing is a willing cup of love:
Loving, when the heart is willing, is the sweetest drop of bliss;
Loving on—through pain and evil—is diviner still than this.—HELEN B. MORSE.

CHRISTIAN SCIENCE SENTINEL

EDITORIAL

MRS. EDDY TAKES NO PATIENTS.

The author of the Christian Science text-book takes no patients, and reads no letters on disease, distress, or error of any kind. Reliable news concerning Mrs. Eddy will be found in the Christian Science publications.

CLASS TEACHING.

MARY BAKER EDDY.

MRS. EDDY thus replies, through her student, Mr. Adam Dickey, to the question, Does Mrs. Eddy approve of class teaching:—

Yes! She most assuredly does, when the teaching is done by those who are duly qualified, who have received certificates from the Massachusetts Metaphysical College or the Board of Education, and who have the necessary moral and spiritual qualifications to perform this important work. Class teaching will not be abolished until it has accomplished that for which it was established, viz., the elucidation of the Principle and rule of Christan Science through the higher meaning of the Scriptures. Students who are ready for this step should beware the net that is craftily laid and cunningly concealed to prevent their advancement in this direction.

APPRECIATION OF THE MONITOR.

THE following letter, received by our Leader from a Christian Scientist at Wilmington, Del., is typical of the many expressions of appreciation of *The Christian Science Monitor* that find their way to Mrs. Eddy and to the Publishing Society, letters which show that the promises made in behalf of this paper, prior to its publication, are being fulfilled. The letter reads as follows:—

Wilmington, Del., May 6, 1909.

Mrs. Mary Baker Eddy, Boston, Mass.

Beloved Leader:—It is with great gratitude that I wish to express to you my appreciation of our daily newspaper, the *Monitor*. Not only do we get all the news worth having, but we know when we read an item in the *Monitor* that it is to be depended upon; we are not obliged to take our news, as heretofore, with "a grain of salt." I also wish to thank you for the Christian Science articles on the "Home Forum" page. They have been of great assistance to me in bringing to mind topics for the Wednesday evening meetings; for instance, the one in Tuesday's paper, entitled "Ask, Seek, Knock," suggested a theme which, when carried out in the Bible and Science and Health selections, called forth many expressions of gratitude from the congregation.

Gratefully and lovingly yours,
MARGARET H. KENT.

Not only does the *Monitor* print "all the news worth having," as this correspondent states, but it also prints it in such a clean, wholesome fashion as to make it fit reading-matter for any home. This is not all, however. The "Home Forum" page is of such value in an educational way that it must appeal to and interest all who read it, and while the special articles to which reference is made by this writer are given a place on this page for a purpose quite apart from that of suggesting a topic for the selections from the Bible and Science and Health for the Wednesday evening meetings, we are glad that at least one of them found this unexpected use.

It can but be gratifying that the *Monitor* has proved itself worthy of the hearty support of Christian Scientists, nor are indications lacking that it meets the approval of others who have declared themselves in favor of clean journalism.

ARCHIBALD MCLELLAN.

THE TRUE MINISTRY.

IF the recognition and confession of one's own faults is a preliminary of progress, then Protestant ministers as a whole are at the dawn of better things, for the freedom with which they are criticizing their own equipment and efficiency is quite remarkable. Just now the responsibility of theological seminaries for the inadequacy of theologians to meet the demand of the times is being discussed, both within and without the clerical ranks, and the canvass would give promise of good were there a clearer perception of the Christ-ideal of what ministers are called to do and to be.

When Christ Jesus instructed his disciples to preach the gospel and heal the sick, he very definitely outlined both their duty and their privilege. They were to bring to men spiritual illumination, and to set them free from the disabilities of material sense. Their ministry was to be genuinely philanthropic, *i.e.*, both enlightening and curative, and the history of all really successful endeavor to better human conditions emphasizes the wisdom of the philosophy of this Christ-method of helping mortals to help themselves. To give men a clearer apprehension of the spiritual meanings of life, its duties and privileges under the divine government, and to remove their physical limitations, is certainly to do the best thing possible for them.

Much of the Christian philanthropy of the past has not proved of great advantage to the many, and for the reason that it has cultivated not only a sense of dependence but a spirit of contentment with that sense. To give food, clothes, and protection is often most commendable, because it seems to be a temporary necessity in anticipation of a more important ministry; but it is only when we bring to men both spiritual inspiration to do, and enlarged freedom to do, that we really contribute to the permanent solution of their problems; and this is just as true today as it was nineteen centuries ago. The conditions under which men now find themselves do not differ essentially from those of the past, and they call for both spiritual illumination and relief from physical ills. Considerations for human need, no less than considerations for the divine law and order, demand of every would-be disciple that he meet the responsibilities which Christ Jesus' injunctions to his first followers imposed.

There can be no question respecting the effect of the ministry to which our Lord committed the twelve and the seventy. They realized a maximum of efficiency, though they knew nothing whatever of the bulk of the matter comprised in a present-day curriculum of theological study. Their fully demonstrated fitness for their work was the result of their apprehension of the truth of being, that knowledge of God which is the vital fact of Christian experience, which is demonstrable science, and upon which Mrs. Eddy has laid such supreme emphasis. Indeed Christian Science teaches that rightly to preach the gospel or declare the truth is to heal the sick. The two functions are not and cannot be separated in their beneficent activities.

In so far as theological schools fail to instruct and equip men to follow Christ as Peter and Paul and John followed him, in so far they are surely inadequate, and the increased contribution by these schools to the general culture of students, their familiarity with human life, its present social and economic problems, etc., which is so frequently urged, cannot make them adequate so long as students are left un-

Digitized by Google

inspired and uninstructed for the work of bringing to enslaved humanity both the physical and spiritual liberty with which Christ would make them free. Paul's reference to his own ministry may be commended to all clergymen today. He said, "My speech and my preaching was not with enticing words of man's wisdom, but in demonstration of the Spirit and of power."

JOHN B. WILLIS.

THE OVERCOMING OF EVIL.

THE dominant theme in the New Testament is overcoming, and in St. John's revelation it reaches a grand climax in the words, "There shall be no more death, neither sorrow, nor crying, neither shall there be any more pain: for the former things are passed away." How often did we read these words in days gone by, and catch a glimpse of the glory of spiritual being,—its absolute freedom and perfect joy,—but always with the belief that this heavenly state could be reached only through death. It was, however, well worth while to hold for even a few brief moments a concept of painless and sinless being, and it is important to note that one never thinks of this great good as anything which may be gained and then perchance lost. No! the permanence of good speaks for itself when the spiritual vision appears, and spiritual sense responds with a fervent endorsement of its reality and eternality.

In a recent article on "Miraculous Healing," by a noted religious teacher, we read: "The diseases of the age outstrip the medicine of the age, and, fast as science moves, the ailments incidental to an overstrained time with an unhinged faith move faster still." The writer follows with a fervent prayer that the church "might lift the load, part the gloom, and soothe the agony that rend the heart and rack the frame; that she might allay the human pain which now is felt to pierce human compassion as never before." Then he says, "Yet, by the revealed will of God Himself, there is but one sound and sure way to that power at last. . . . When the last sin has vanished, we shall be able to make the last woe cease."

Christian Scientists will all agree with the statement that "there is but one sound and sure way" by which divine power can be made available in human need, and St. John tersely expresses it when he says in the chapter already quoted, "He that overcometh shall inherit all things,"—not he that believeth, or prayeth, but he that "overcometh." It would seem that all advanced thinkers must agree that this overcoming can mean nothing less than the triumph of the spiritual over the material, for none, surely, would question that in the vision of the Apocalypse the last trace of materiality had vanished into the nothingness whence it sprang; there was no more pain, sin, sorrow, or death.

It is now very generally admitted that the close study of any form of disease in *materia medica* is very likely to induce that disease in the one whose thoughts are thus occupied; for instance, three noted specialists in this country have passed on within the last year from the specific diseases to which they had devoted years of study. In material medical practice there is practically no thought of overcoming disease, that is, of stamping it out so that one need never fear it again; and yet this is what overcoming means. Christian Science teaches that neither disease nor sin is any part of man's being, and, this admitted, we proceed to overcome both by the understanding of spiritual man governed by spiritual law. Mrs. Eddy says, "Unless an ill is rightly met and fairly overcome by Truth, the ill is never conquered" (Science and Health, p. 231). It is not true that one suffers in the effort to overcome disease, in Christian Science, more than do those who use material remedies, as some critics assert. The contrary is true, for the truth quickly overcomes pain and fear, and at the same time brings strength to the patient from the one infinite source; whereas in material practice the stupefying drugs employed soon lose their effect, and it is never even claimed that they heal. One who overcomes disease and sin by the understanding of spiritual power is more of a man than he had ever thought possible before he essayed to prove for himself the omnipotence of God. "Be of good cheer," said the Master, "I have overcome the world,"—its sin and its pain; and so shall we, if we follow where Truth leads.

ANNIE M. KNOTT.

LETTERS TO OUR LEADER.

London, England, May 11, 1909.

Beloved Leader:—I reached London yesterday afternoon, and have resumed my old work in the office of the committee on publication this morning. I feel that it would be difficult for me to express what I know I have gained by my months in the Christian Science publishing house. I do want, however, to tell you how grateful I am to you for giving me that experience, and also how deep is my appreciation of the consecration and example of the workers there. I could not possibly have received greater kindness than I did from every one whom I met, and I feel that I am bringing back to my work here a deeper understanding of the vast possibilities for good which the study of our text-book brings to all who strive to be faithful to its teaching.

Your loving follower,
FREDERICK DIXON.

Pasadena, Cal., May 13, 1909.

Mrs. Mary Baker Eddy.

Beloved Leader:—I send this date a copy of "Letters from China" which I have compiled. As I cannot receive my better bound copies for some time, I will at present send you the cloth bound. For twenty-two years I have been a student of your teachings in the revelation of Truth. With my studies I have striven to practise the rules learned. So far as I have succeeded in these strivings I have accomplished wonderful things in the Orient. The unselfish, impersonal logic of Christian Science opened the locked doors in China, and let in a little melody of this Christ-Science which touched harmonious chords, and we sang together. Thus, through your understanding and living of the warmth of Love, the steadfastness of Truth, and the activity of Life, you, our dear Leader, bless humanity far and near.

Affectionately,
SARAH PIKE CONGER.

Cambridge, Mass., May 12, 1909.

Mrs. Mary Baker Eddy, Brookline, Mass.

Beloved Leader:—The Christian Science Society of Harvard University, in annual meeting assembled, sends you loving greeting. We would, first of all, reiterate our appreciation of the great fact which underlies these college societies. Unity is the grand basis of Christian Science. Almost unique in the annals of our Cause, in their dual nature of being both Christian Science and college organizations, these societies owe their vital existence to the fact that they are authorized by the Manual of The Mother Church; hence their unity with the Cause of Christian Science. Harvard University is religious in the best sense, in that there is here both freedom and encouragement to believe according to conscience. The religious activities of the University have their center in Phillips Brooks House. Here we hold our semimonthly meetings, at which helpful testimonies are given. Besides the physical

Digitized by Google

benefits, we find that Christian Science gives us a standard for judgment and a perception which are valuable in guiding us in our college life and work,—as in the selection of studies.

As a part of the Christian Science movement active in a college community, we would especially mention your latest addition to our publications, *The Christian Science Monitor*. We have been gratified to notice the favor with which the paper has been received by students outside our number. To some it has appealed because of its clean general information; to others, because of its scholarly editorials and serious treatment of political and economic problems. Many have complimented the art, musical, and dramatic criticisms, and as a matter of course the strong athletic page finds its interested readers. The *Monitor* has something for all, and we feel it is a powerful missionary in the work of establishing Christ's kingdom of righteousness on earth, the Science of pure Mind. As young men we are grateful that our eyes have been opened to this truth.

Christian Science Society of Harvard University.
ARTHUR FAY FELKER, *President*.

East Orange, N. J., May 11, 1909.

Mrs. Mary Baker Eddy, Brookline, Mass.

Dear Leader:—As a little child opens her heart in gratitude to the mother whose love has saved her from stumbling and falling, so my heart has gone out to you many times, and today it helps me to write these words. I thank you for the blessed truth so simply and so clearly revealed to us in your writings, and each day, as we put this truth into practice, wherever we are placed, and overcome evil with good, we realize more and more what a gift you have brought to humanity.

Times innumerable, before coming into Christian Science, did my heart cry out for a practical, living religion, the religion that our dear Master brought to earth, but it was nowhere—until at last my prayer was answered as softly and as gently as the morning light breaks forth to greet the coming day. Since then, step by step, have these words of Scripture been proven: "I was an hungred, and ye gave me meat: I was thirsty, and ye gave me drink: . . . naked, and ye clothed me: I was sick, and ye visited me: I was in prison [of material thought], and ye came unto me."

With dear love,
ALICE FLORENCE WILLS.

New York, N. Y., May 1, 1909.

Mrs. Mary Baker Eddy.

Dear Leader:—My heart goes out in gratitude to you for your untiring efforts in behalf of poor and suffering humanity. It is two years ago that Christian Science was brought to me, and in that time the blessings which have come to me are innumerable. Health has been restored, and my happiness cannot be expressed in words for that greatest of all treasures, a knowledge of the truth, which I am gaining gradually through the study of the Bible in conjunction with our inspiring text-book, Science and Health, which is indeed a "Key to the Scriptures."

With sincere love, in which my mother joins me, believe me Yours most gratefully,
HELEN HUZBERGER.

Oxford, England, April 22, 1909.

Dear Leader:—It is with hearts full of joy and gratitude that we write to tell you of the first lecture on Christian Science, given today in this ancient university, where the varied currents of thought—agnosticism, extreme ritualism, material science, an intolerant Toryism, and equally strong doctrinaire socialism—all seemed so opposed to your message of peace and love. But Truth has again said to the waves of error, "Peace, be still." We are glad to say that perfect harmony reigned during the lecture, and Dr. Fluno was listened to with the most respectful and appreciative attention. The assembly-room of our Town Hall was crowded, many having to be refused admittance. This great demonstration over so much error and fear has been made possible by the calm, clear light of your wonderful teaching. You will also like to know, dear Leader, of the sympathy and kind help we received from our fellow-Scientists in this country, many of whom came from great distances to comfort and support us by their presence. With infinite love and thankfulness to you, dear Leader, for the great happiness which we owe to you,

We remain your devoted followers,
The Oxford Lecture Committee.
LAURA C. ALLEN, *Clerk*.

Riverside, Cal., May 12, 1909.

Revered Leader:—May I take just a few moments of your precious time to allude to the wonderful enlightenment and inspiration that have recently come to me as I have studied and restudied the lines at the top of page 496 of Science and Health, lines forming such an important part of that uplifting chapter, "Recapitulation," so dear to each and every loyal student of Christian Science? When trials in all their severity sought to overwhelm, when the path was enveloped by gross darkness, when defeat seemed inevitable, Truth directed my attention to these lines. At first they appeared impossible of a full, practical application, amid confusion, strife, opposition, and other sense testimony. Feeling, however, that sufficient light would finally break in upon me if I prayerfully kept at my study, I clung steadfastly to the letter, endeavoring with all my strength to imbibe its spirit. What was the result? Little by little an interpretation, glorious in its sustenance and quickening, came to my consciousness, wondrously dispelling the error which was laboring to gain a foothold. Little by little came the admonition, "Work out your own salvation . . . for it is God which worketh in you."

Never did I understand as I do today that "in Science there is no transfer of evil suggestions from one mortal to another, for there is but one Mind, and this ever-present omnipotent Mind is reflected by man and governs the entire universe." Never did I see as I do now that "in Christian Science the first duty is to obey God, to have one Mind, and to love another as yourself." Never was the thought of personality, the frailty of mortal mind, so subservient to the law of God, good, the law of immortal Mind, as it is today in my consciousness. How I rejoice with the coming of each new day that "Truth is revealed. It needs only to be practised" (Science and Health, p. 174)! How I rejoice that you, dear Leader, have striven in such a dynamically impersonal and loving way to follow in the footsteps of Jesus the Christ, thereby proving to men and women of the twentieth century that God, good, is all-powerful, an ever-present help; that each individual can partake of God's goodness, can exercise his God-given dominion, in so far as he strives to obey the injunction, "Seek ye first the kingdom of God, and his righteousness;" thus conquering the sins of the world, of flesh and evil!

Obediently yours,
STOKES ANTHONY BENNETT.

Baltimore, Md., May 14, 1909.

Dear Leader:—I feel I must thank you for the article in the *Sentinel* of May 8, "To Whom It May Concern." You are ever watchful to point out to us the "way of wisdom." Yours with gratitude,
MARY M. NORRIS.

THE LECTURES.

LONDON, ENG.

Last (Friday) evening [April 23], at the Queen's Hall, Langham place, London, a very interesting lecture on Christian Science was given by Francis J. Fluno, M.D. He was introduced by Major Robert Standen, who said in part,—

This large and representative assembly is another proof, if additional proof were needed, of the deep-seated interest which is being taken the world over in the message which Christian Science is bringing to humanity, and of a determination on the part of the public to know more of this practical, demonstrable Christianity. It does not need much study of the New Testament to be convinced that the teachings of Christ Jesus were intended by him to be put into practice by his followers, and that in all ages to come Christians were to be known by their fruits, the truth of their faith vouched for by the signs following. We find in the Gospel records an account of the instructions which the great Teacher gave to his followers prior to sending them away to demonstrate the truth of what they had learned from him. His positive commands to them were few: they were to invoke the blessing of peace upon every house in which they were cordially welcomed; they were to heal the sick that they found in every city they visited; and, lastly, they were to point out to the beneficiaries of their ministrations that in the healing touch the kingdom of God had come nigh unto them, a realization of the ever-presence and all-protecting power of divine Love. We know that these seventy students returned with joy, telling their dear Teacher how successfully the knowledge of the Christ, Truth, which he had taught them had been put into practice, and how devils (evils) had been subject to them through his name.

In like manner the glad tidings of Christian Science is today bringing its message of peace into all the homes and hearts where it is hospitably welcomed; its success as a prophylactic and curative agency can be borne witness to by any one who has attended a Wednesday evening Christian Science testimony meeting, and, finally, it is teaching those whom it benefits, physically and morally, that the kingdom of heaven is indeed near them, that God's tender care is over all His children.—*South Eastern Advocate.*

PARKERSBURG, W. VA.

Bliss Knapp of Boston delivered a lecture on Christian Science on Friday evening, April 30. He was introduced by Attorney J. Robert Anderson, who said in part,—

As I understand it, Christian Science does not claim to amend the Bible, but it does emphasize the Sermon on the Mount, and seeks to interpret it rather than to proclaim a creed entirely new. No doubt Christian Science has brought peace, comfort, and lasting joy to countless thousands. It says, "Blessed are they that mourn: for they shall be comforted." "We come not to destroy, but to fulfil." Admitting that faith cures the soul of its diseases, does or does not Christian Science make a claim upon the hearts of men, and thereby, with soul-throb and heart-beat lift humanity to a higher plane of honest thought and to a closer walk with God? Does it not obey the command of the prophet Micah, and do not the adherents of Christian Science "walk humbly before God"? If this be the fact, as is claimed,—and when we consider the average intelligence of the average disciple of Christian Science, the hopefulness, helpfulness, and cheerfulness with which they work and harmonize the divine plan and adapt it to humanity's needs and necessities—who shall dispute its right to live and to carry its blessings to every people and to every clime?

Parkersburg Dispatch-News.

PETOSKEY, MICH.

The floor of the Grand Opera House was packed Tuesday night [May 4] by our most discriminating people, who came to hear Bicknell Young expound the ethics of Christian Science. Leon Chichester introduced the speaker, saying in part,—

For two thousand years, ever since the day of Pentecost, the promised Spirit of truth has been abroad in the world, working for the betterment of the human race. Never has this truth rested. Never has the Christ been absent from the hearts of men. As the ages roll on, men have sought to give expression to his inspirations, whether fully conscious of their mighty source or not. Religions and creeds, reformations and revolutions, have arisen, waxed, and waned. Imperfect, man-made vessels though they were, yet they bore in them the vintage of the Spirit; and today there is poured out to us the accumulated blessings of those surging centuries. For religion—pure religion and undefiled I mean—through its ebb and flow has ever advanced; and we of today are the fortunate heirs of progress, whether we all realize it or no.

I am not a Christian Scientist, nor am I familiar enough with the teachings of Christian Science to discuss them intelligently. I am not here for that purpose; but I do fancy that I am broad and observant enough to see something of what it is doing, and the fruit is the proof of the excellence of the vine. When I see men and women set at ease in mind and body, when I observe joy and harmony and love of God and man where before there were the opposites of these conditions, all brought about professedly by this new influence, then am I led to only one conclusion, that there has been applied to the world's uplifting another mighty element of good. This being true, I for one can say no less than that Christian Science should be welcomed to the forefront of the church universal.

Petoskey News.

SANTA MONICA, CAL.

The North Beach Auditorium was taxed to its capacity last evening [April 9] with an attentive audience to hear a lecture on Christian Science by Prof. Hermann S. Hering of Concord, N. H. The lecturer was introduced by Judge Hutton, who said in part,—

I am very glad indeed to see so many of my fellow-townsmen here tonight, and feel that your presence betokens interest in a subject that is of world-wide significance. There has been no movement in the history of Christianity which has so occupied the thought of the thinking people as has Christian Science, and we are privileged tonight to listen to one who has given study, care, and much earnest thought to this important subject in which all are interested, whether they are Christian Scientists or not. Those who are familiar with its teaching know that it comes closer than anything else in our lives toward influencing our thoughts for good, and we hear of its speedy extension to every city, town, and hamlet on the civilized globe. There are thousands of men today who are not directly affiliated with the interests of Christian Science, yet they unfailingly, diligently, and carefully consult its text-book.

As Christian Science is not generally understood and often misconstrued, I am pleased at this time to introduce to you one who is eminently fitted to state to you the truth regarding it.—*Santa Monica Outlook.*

LECTURES AT OTHER PLACES.

TESTIMONIES OF HEALING.

I am very glad to make an acknowledgment of benefits received from Christian Science. I first attended the meetings in Chicago in 1893. I enjoyed these services, and purchased a copy of "Science and Health with Key to the Scriptures" by Mrs. Eddy, but as I did not then seem to understand its teachings, I put the book away and did not see it again until three years after, when I came East. I again attended meetings in my home city, and tried to read the book. I was told by a friend to keep on reading and I would understand. While attending these meetings, a throat trouble from which I had never been entirely free, vanished while I was striving for a cure of another and to my mind more serious trouble. This I have since been able to overcome by a faithful study of Science and Health.

Last winter I fell and injured my wrist. I had it set by a surgeon, and then telephoned to a friend for Christian Science treatment. After the first night (I had fallen in the early evening) I experienced absolutely no pain in it and used my fingers freely. I had the splints removed in three weeks, and am sure they might have been taken off much sooner. The doctor told me that in such cases the splints were as a rule worn six weeks, that the patient often suffered great pain, and that the hand was usually stiff and useless. Later he told me he had never seen such good results from that kind of an injury, as there was almost invariably a deformity, while my wrist was perfectly straight. Soon after the above experience I was taken ill with an acute ailment. I was also brought out of this condition in a short time by Christian Science, therefore I know I have cause to be very thankful for this truth, and for the good done through it to me and mine.

Although not yet wholly immune from sickness or accident, we have the unspeakable comfort of knowing where to go for sure relief, and such experiences teach us to be more faithful in our work.

ESTELLE HORN, Attleboro, Mass.

Many years ago I learned of Christian Science, but like thousands of others I made no practical use of it, until about seven years ago, when I had a stomach trouble which seemed to affect my entire system. The distress caused by this condition is indescribable. Three doctors failed to cure me, and one of them said he could do me no good. I was far from home, and the doctors told others that if I had a home, I had best go there, for my time was short. Soon after this I took Christian Science treatment, which helped me so much that I began to feel encouraged, and in a short time I was restored to good health. I remained so for several years, but in the winter of 1907 I was taken seriously ill. I was not myself at all. I was nearly crazed with pain. Both ears were discharging, and I was almost totally deaf, and besides this had bowel trouble. As my wife was ill at the same time I was in a most deplorable condition, but thanks to Christian Science I was restored to health in a short time, and my hearing is now as keen as ever. I think I surprised one of my good friends, who had told me not to trust Christian Science too far, when he saw that I had been healed by it alone.

CHARLES C. HORN, Attleboro, Mass.

For one who has received so many blessings through this wonderful truth revealed to us in "Science and Health with Key to the Scriptures" by Mrs. Eddy, not to express a word of gratitude would be very ungrateful to say the least. I did not come to Christian Science for physical healing, as so many have done, but I have been wonderfully healed. It is over ten years since I began the study of Christian Science, and I have been helped a great many times from nervous attacks which came on very suddenly, as well as from headaches, and other minor ills. Seven years ago, with the little understanding I then had of the truth, I was able to lay off glasses, though I had worn them for four years and had been told that I should have had them when a small child. I was also told that I could never go without them again, but when it became necessary to have the lens changed for the third time, it was then I realized that in God was my sight, and I was able to lay aside the glasses and to use my eyes early and late without any inconvenience.

About two and a half years ago, however, I seemed to experience some trouble with my eyes, and at times, when reading or sewing, I seemed to become totally blind. The fear of this trouble was so great that I had two weeks' treatment of a practitioner, but I soon found the work was my own to do, even if the result seemed slow, so I stood firm in the truth, knowing that I had the requisite understanding, and that "divine Love always has met and always will meet every human need" (Science and Health, p. 494). As I gained more understanding of the truth, with it came a wonderful spiritual uplifting, and the peace that passeth all understanding. I wish to say that my sight was never before as perfect as it is today. The last six months have been the happiest period of my life. I realize that I can turn to God for protection and that He supplies all my needs. I have been able not only to help myself but others as well, and my constant prayer is that I may so live as to prove my faith by my works.

Words cannot express my love and gratitude to God, and to our beloved Leader, Mrs. Eddy, for this wonderful truth that sets free.—JENNIE E. HEATH, Pasadena, Cal.

Often it is asked, "Can Christian Science stop the flow of blood from a cut artery, or heal a ruptured blood-vessel?" From my own experience I answer emphatically that it can. The doctor who attended me declared that the latter condition existed in my case. The loss of blood was steady, day and night, for months. I followed the doctor's directions conscientiously, as to diet, bathing, medicine, etc., but at the end of five months not a single condition had changed, except that I grew weaker and weaker, until I could not lift my head from the pillow.

At that time I heard the doctor say that if his treatment did not help me, he knew of nothing else that could; and when I saw the look of despair on my mother's face, I demanded Christian Science treatment, and had it at once. I was not cured quickly; being treated in Christian Science for two months. During all that time the loss of blood was as great as at any time throughout my illness, but yet I gained in strength steadily. The weakness left me with almost the first treatment, never to return. I grew stronger and stronger, until I could take up my duties again and be of some use in the world. Suddenly the flow of blood stopped, and stopped forever, and I was well. This experience proved for me then, and for all time, that neither weakness nor strength are contingent upon mere bodily conditions.

Like all those who are not content with the physical healing alone, but follow it up with study, application of the truth, and attendance at the church services, I have found peace and happiness, and an assurance in time of seeming distress not to be found in any other way but that pointed out by Christian Science, thus proving the prophecy of Isaiah: "And the work of righteousness shall be peace; and the effect of righteousness quietness and assurance for ever."—OLIVE WHITMORE, Brooklyn, N. Y.

Digitized by Google

I have been helped in so many ways by Christian Science, and have received so many blessings from reading the testimonies of others, that I would like to contribute my own. Every day we are helped in some way or other, but there is one demonstration in particular which I would like to mention. I had two large swellings, the one on the wrist and the other on the back of my hand, but by the understanding of divine Principle, Love, both were entirely removed. I feel that I owe my life to the faithful work done for me in Christian Science during childbirth. For these and countless other blessings I am unspeakably thankful.

I cannot close without expressing my gratitude to our dear Leader for all she has done and is doing for mankind.—MRS. MINA LARSON, St. Ansgar, Ia.

I deem it a privilege to tell a few of the benefits I have received through Christian Science. I started to read Science and Health with only a slight understanding, but as I continued to read, the light began to dawn. I have now gained enough understanding to demonstrate for myself the power of divine Love as ever present. Some years ago I was healed instantaneously of a severe cough by knowing that God is the only power and presence. I have had many ailments disappear before the power of the truth. I am glad to testify to the help received from Christian Science as taught in our text-book, "Science and Health with Key to the Scriptures," by our dear Leader, Mrs. Eddy.—ANNIE GILBERTSON, St. Ansgar, Ia.

It is over a year since we took up the study of Christian Science. My mother had been healed of a number of diseases, so I decided to try this treatment for chills and fevers, and was healed. At the same time I was also healed of kidney trouble, from which I had suffered for many years. I am very thankful to God for what Christian Science has done for us, and grateful to Mrs. Eddy for showing us this beautiful truth.

BERTHA RAPP CONYNE, Chicago, Ill.

I feel it a privilege to tell what Christian Science has done and is doing for me each day. I first became interested through physical healing, and then came a desire to know how this healing was accomplished. For years I had suffered with stomach and chronic bowel trouble. For days at a time I could eat nothing without suffering intense pain. I did not even try to eat more than two meals a day, and many days but one. I was taken to the hospital for an operation on the head. After the second operation I had a severe hemorrhage, and two doctors said that I could not possibly live—every hour seemed as if it would be the last. When life was apparently almost gone, the doctor injected a solution into the breast to stimulate the heart action. This resulted in an angry sore, which seemed as if it would never heal. All this time I had not been able to take any food into the stomach, and could not raise my head from the pillow or turn my body in any way myself. The trained nurse who cared for me could easily pick me up in her arms and move me, for I was so terribly reduced in flesh.

As a last resort, a Christian Science practitioner was called. After giving me a treatment, she told the nurse to give me something to eat. A bowl of soup was quickly prepared and enjoyed—enjoyed only as one nearly starved to death could enjoy food. In three days I was eating heartily of solid food, anything I wanted. It was not long before I could sit up in an easy-chair—my progress was very rapid and wonderful, so every one said. The stomach was all right, but the ear did not heal, neither did the sore which had resulted from the solution. One morning I discovered a small piece of bone working out from my ear; later several more came, one after the other. Finally the last bit came away and the place healed. These splinters were left at the time I was operated upon. The breast was also perfectly healed and I laid aside the glasses which I had worn for several years. I now eat anything and everything I want, with no injurious effect.

I am very grateful for the care so lovingly bestowed upon me through those dark days. The Bible is studied more faithfully and with greater enjoyment than it used to be. Science and Health teaches me every day to be a truer and kinder woman, to love God more and to try and have others receive the wonderful help that has come to me.

MRS. IDA H. MELVIN, Denver, Col.

I was a great sufferer for many years from a skin disease; tried everything that could be had, also had the best of physicians, but without any permanent cure. Having heard of Christian Science, I thought I would see if I could be helped, so I went to a practitioner and in a couple of months was entirely rid of that awful disease. I am very thankful to God for the healing, and to Mrs. Eddy for the uplifting truths of Christian Science.

SOPHIE SMITH, West Hoboken, N. J.

Some two years ago I had a serious throat trouble, which was so painful I could hardly eat, drink, or even talk. My wife asked me to try Christian Science, so I went to see a practitioner and told her my trouble. She gave me a treatment, and I went home feeling somewhat better, but the next morning I seemed to be as bad as before. My wife then wrote, asking for another treatment, and by five o'clock I was in perfect health. I have had no further symptoms of the trouble, and I am very thankful to Christian Science for the good I have received.

WALTER E. HEATH, Crawford, Neb.

I have been healed by Christian Science, and wish to express my gratitude. After suffering for about a year from extreme nervous, rheumatic, kidney, stomach, and heart troubles, I turned to Christian Science as a last resort. I had been treated by several of the leading physicians of this city, had taken various remedies, but received very little relief and no encouragement. In Christian Science I have found a system that is applicable to every human problem, and I consider it the greatest blessing that has ever come into our home. In a family of five it has been equal to every emergency. Our children have had some of the diseases said to be common among children, and have always been healed by Christian Science; laws of *materia medica* which condemned them to weeks of suffering were broken down, and they were healed in a very short time. Our oldest child, then about eight months old, was healed of summer complaint after medical treatment had failed. When a Christian Science practitioner was called she was unconscious, but in less than two hours she was laughing and playing, and has been in excellent health since.

We have used no medicine of any kind in the last three years, as we have found that even a slight understanding of God, as taught in Christian Science, enables us to meet and overcome every discord, be it sickness, sorrow, or financial worry, much better than in the old way of working. I feel that we have every reason to rejoice for this Science, and deem it a great privilege to belong to a Christian Science organization. To our beloved Leader we owe a great debt of love and gratitude. I rejoice, when I think of her untiring labor for humanity, that her consecrated labor has given us Christian Science, and I stand rebuked for every wrong and idle thought.

C. A. LORD, Joplin, Mo.

Through Christian Science the power of God was fully proven to me by the healing of an ugly sore on my face. In 1892 a growth made its appearance on my left cheek. It was very small at first, yet it caused me a great deal of worry and uneasiness, as I was always afraid it might give me trouble, and in the spring of 1904 I was compelled to say like Job, "The thing which I greatly feared is come upon me, and that which I was afraid of is come unto me." The growth commenced to enlarge rapidly, and words can but feebly express the pain and trouble it caused me. For a time I was almost frantic, but I knew something had to be done, and the thought of having an operation performed brought more suffering. I thought I would always have to remain in some secluded place, or be an object of pity for passers-by to gaze upon.

At last I decided to go to a Christian Science practitioner. I knew something of the power of Christian Science to heal, as my little boy had been wonderfully healed four years previous. A few days after I began to take treatment I could see a change for the better, but before the perfect healing took place the condition seemed much aggravated and I thought it was worse. The practitioner, however, calmed my fear, and a few days later, to my great joy, the whole thing dropped out, leaving a depression which was soon filled with healthy tissue, and this cheek is now as smooth as the other. My little girl, then ten years old, had never seen me without this blemish on my face, it having made its appearance before she was born. After my healing my friends were astonished to see me, and when they inquired as to what I had done I assured them that this had been accomplished through Christian Science. I have great reason to thank God, and our beloved Leader, Mrs. Eddy, for the truth she has given to the world.

MRS. WM. THURSTON, Eaton, O.

[Translated from the German.]

With joy I receive the *Sentinel* each week, through which we get so much that is good and are enabled to apply the truth successfully for our benefit and encouragement. My gratitude impels me to contribute a mite to its columns, by giving a demonstration which proved to me the unspeakable love and mercy of God in the healing of a poisonous snake-bite.

One Sunday evening I stepped into the yard in my bare feet, and at once felt that I had been bitten by something. Procuring a lamp, I searched and found a rattlesnake a foot and a half long, which I at once killed. My husband, who is not a Christian Scientist, was not informed of the occurrence, as I knew he would insist on my using material remedies. We live about six miles from town and from the home of the nearest Christian Science practitioner. It was therefore clear to me that I must work alone with God. I treated myself the best I could all night long, but nevertheless the limb seemed in a terrible condition Monday morning. I, however, did all my regular farm work, and succeeded in concealing my condition from my husband that day. I kept my thought fixed steadfastly on God all day, declaring that He alone is our help in time of trouble. A young girl from the neighboring farm, who had been helping me all the week, saw the snake and declared that I would lose my foot if I failed to apply the customary material remedies; but I reassured her and requested her not to mention the occurrence to my husband. In spite of my caution, however, he saw my condition on Tuesday, as I was preparing to drive to town with vegetables. His anger was aroused and he spoke bitterly of my depending upon Christian Science. I replied that if he would let me alone I would be all right. My heart was full as I drove to town, and the lines from the last verse of Hymn 92 in the Christian Science Hymnal kept coming to me again and again, "God's will is done, His kingdom come," etc. Each word seemed full of healing power, and stayed with me as I climbed in and out of the wagon selling produce. The swelling kept decreasing all the time, until by noon I could partly lace my shoe.

After my produce was disposed of I called on a Christian Science practitioner, and requested help to hasten the work, because of the predictions of disaster uttered by many who had seen the foot and doubted the healing power of Christian Science. I also feared that my husband might insist on applying material remedies when I returned home. The practitioner at once gave me an oral treatment, and quoted the Golden Text from the current Lesson-Sermon (which was May 31, 1908). She also read to me the references from Luke 10 : 1, 17–19; and Science and Health 514 : 26 to 10 next page; also quoting Isaiah 51 : 7. This, and one absent treatment the next day, completed the cure, and by Thursday the last trace of the snake-bite had vanished.

Can we ever thank Mrs. Eddy enough for giving us a Science like this? May God preserve her in her faithful labors for mankind, is my prayer. It is my fondest wish to be one of her worthy followers, and to help others to see this truth about God and man that has done so much for me. My experience has caused a great deal of comment, as I have a large circle of customers, to many of whom I related this demonstration, and many have requested Christian Science literature. The seed has been sown, and "God giveth the increase." The proof could not be gainsaid that Christian Science alone did the work. Thanks be to God!

MRS. MARY B. REIM, De Funiak Springs, Fla.

An editorial in the *Sentinel* on "The Activity of Law," brought to my thought an experience which had come to me two weeks before Christmas, 1907. On coming home one afternoon I found the house in great disorder, and saw at a glance that it had been burglarized. I immediately telephoned to a Christian Science practitioner, who came to see me and took up work in Christian Science. In looking things over I found that every article of jewelry in the house had been taken, among others a very valuable watch which had belonged to my late husband, and several other articles which had been in the family many years and were greatly prized. One morning, about a week after this, the door-bell rang, and upon answering the summons I saw a boy about fourteen years old standing at the door. He gave me a box, saying that a man had sent it to me and had said that I would pay his car-fare back, which I did. On the top of the box was written "Merry Christmas," and on opening it I found all the missing articles but one, a diamond ring, which was restored to me a few days later. The boy was found later, and admitted the theft.

This is only one of the many blessings which I have received in Christian Science, all showing the omnipotence and omnipresence of divine Love. I was healed of severe nervous illness ten years ago, and since then my children have been healed of fever, throat trouble, etc. I never realized fully, until I read the editorial I have spoken of, how necessary it is that we should all be constantly awake to the demands of Truth, and it has been a great incentive to me to live every day so that I may be worthy of this wonderful truth and the protection it gives us. Words cannot express my gratitude for what Christian Science has done for me and mine.

SUSIE K. ROBB, Detroit, Mich.

Trusting that this testimony may reach and point out a better way to some expectant mother than the old Adamic curse that woman shall bring forth children in pain and sorrow, I will relate my experience in overcoming the

Digitized by Google

mortal laws pertaining to childbirth. It is over five years since I first heard of Christian Science. I was not a member of any church, and did not take up the study of Christian Science for the physical healing; but I thought if a knowledge of God was good for some persons, it would be good for me too, and I have continued the study with numerous demonstrations. About a year after learning of Christian Science, I was about to become a mother, and as with my first child I had had such a dreadful experience, it was my prayer to be delivered with divine Love as my physician, and God is surely the "great Physician." We were living on a ranch, with no very close neighbors or telephones, and it was proved to me and others what divine Love could and would do, as I was left all alone on the ranch with my little two-year-old girl, my husband having been called away. In the evening I realized that baby was coming, and "perfect love" did cast out fear. The sense of pain was very slight and of short duration when the birth took place. I had never had any experience of that kind, or how to take care of a child, but divine wisdom guided me, and I washed and dressed the baby and then went back to bed again for a good night's rest. I continued with my general work the next day and felt no bad effects from it. Two other children have since been born to me, and in both instances I realized that God is ever-present.

These demonstrations, together with many others, have all been accomplished practically from the understanding I have gained through reading "Science and Health with Key to the Scriptures" by Mrs. Eddy. I am indeed very thankful to God for showing me the right path, and grateful to dear Mrs. Eddy for imparting to us her knowledge of God through her writings.

MRS. M. VENETA BUNTING, Merrill, Ore.

Thirteen years ago I was healed from a very severe attack of rheumatic trouble, which had been contracted in the Civil War. For thirty years I tried *materia medica;* traveled in search of health to many places, but kept failing until finally I was compelled to go about on crutches. A friend advised me to try Christian Science. I did so, and was instantaneously healed. I drove home from visiting the practitioner, and had no further use for crutches, nor has the malady ever returned. At this time I was without money, hope, or God; but, thanks be to Christian Science, I have found the Christ—"the divine manifestation of God, which comes to the flesh to destroy incarnate error" (Science and Health, p. 583).

I see from the *Sentinel* how so many are helped financially, and I wish to give a few facts which may be of great help to some poor weary pilgrim, since I have already made mention of being out of money. I had one cow, which I sold to pay for tuition in Christian Science, and I feel it was money well spent. This was about twelve years ago. Now, I have just returned from a trip of twenty-four thousand miles to the Holy Land, through Rome, Egypt, and across Europe. While in Jerusalem I was thinking why it was that God told Solomon to build such a beautiful temple, garnished inside with gold and silver and precious stones; and yet that it was destroyed. I could not see a trace of the temple—not one stone left upon another. Then I saw, more clearly than I had ever done, the temple which I must build, pure inside and out, the temple made without hands, eternal in harmony. In that temple at Jerusalem was the ark of the covenant, and I saw plainly that the ark of the covenant which I must have in my temple was, as Jesus had said, "Thou shalt love thy neighbor as thyself," for love is the fulfilling of the law. That is the covenant which we have, and it is the one which is pointed out by our dear Leader, Mrs. Eddy. Some may ask, How can we love our neighbor as ourselves? Saying that we love our neighbors is not the fulfilment of this law; we must prove it by our works. For myself I can truthfully say that I have received in Christian Science ten thousandfold, and can see more and more that God is our only source of supply.

THOMAS W. WILSON, Eureka, Cal.

Words fail to express my gratitude for the many blessings which I have received through Christian Science, especially the healing of my little daughter and myself. When my daughter was six months old she had an attack of lung trouble, and just as she recovered from this she had another illness, which it was said left her lungs in a very bad condition, so that she was under the doctor's care for three years. We were never without medicine in the house, but the cough never left her till she had Christian Science treatment. The doctor advised us to take her to the seashore, as he could do no more for her, and when I was told that she could be healed through Christian Science, I could not believe it. It seemed too good to be true, but I was willing to give it a trial; and she was healed in one month's absent treatment. She is now five years old and is strong and healthy.

At that time I knew practically nothing of Christian Science, and had no books with which to help myself in the least; but while my baby was being treated, the thought came to me that there might be help for me in the same way, as my health was very poor at the time. I had bowel trouble, headaches, and female weakness of a serious nature, from which I had never been free since the beginning of my married life. I had no expectation of being well again, as our doctor had advised an operation which I absolutely refused to have performed, for I had great fear of hospitals. I was in constant pain, but I had begun to think it was my duty to bear it. After my child's healing divine Love led me to where I could see what the truth could do and had done. We moved to Great Falls, where there was a Christian Science practitioner, and I was healed in four weeks' treatment.

It is a little over two years since I began the study of Science and Health, and I am more than grateful for its teachings. It has taught me the true living, and brought me spiritual uplifting. My love and gratitude to God is indeed great, and no words can express what I feel to our beloved Leader, Mrs. Eddy. I am continually striving to live this truth and to be obedient to our Leader's wise words and her faithful efforts to show us the way.

MRS. ADDIE LEWIS, Great Falls, Mont.

Words fail to express my thankfulness to God, and to our revered Leader, Mrs. Eddy, for giving the healing knowledge of Christian Science to a waiting world. As we learn our way in Christian Science, live the truth of its teaching, and are ready to give up the pleasures of the material senses, willing to give up the old for the new and become as a little child, in that proportion do we consciously become heirs of God, and partake of the precious promise, "Son, . . . all that I have is thine."

We have had many convincing demonstrations of Truth's power, one of which I will mention. Our youngest son was suddenly taken very ill. The trouble began with an enlargement in his throat, and the severe pain resulted in lockjaw. We declared the truth for him for some time, then he expressed the desire to have a Christian Science practitioner treat him; so we called on one for help, which was promptly received. In less than half an hour the boy was up and out of doors; all fear of the disease was gone, and he was healed. My daily prayer is to know more and more of the truth that makes free, and I am indeed thankful for the grand privilege afforded me of sending in this testimony.—ERDMUTH A. STEEG, Enid, Okla.

FROM OUR EXCHANGES.

[*Universalist Leader.*]

How little we know, and yet we judge. This one is "good" and that one is "bad." This one is "weak" and that one is "strong." This one is "wise" and that one is "foolish." But the "good" go wrong, and the "bad" on occasion reveal heroic qualities; the "weak" perform miracles of strength, and the "strong" collapse in the presence of danger; the "wise" grope in doubt and stand stock-still in the consciousness of limitations, while the "foolish" march with confident step into the unknown. We all know so much more than we can express and are so impatient at another's judgment. Others know so much more than we can understand, and yet we judge them. The foolishness of one age is the wisdom of the next, and the wisdom of one era becomes the foolishness of the succeeding. Dreams are transformed by time into realities, and the stable things dissolve as mist before the sun. Virtue in one place is sin in another, and the good of one condition is turned into evil in new surroundings. How little we know, and yet we judge!

[*Christian Register.*]

Our standards of living must rise to a height where persons and principles are placed before things and possessions; for all reduces itself in the end as to whether we live for the soul or the body and the senses, whether we make a god of possessions or worship the one true God, whether we have a clear eye for discovering high and noble persons and honoring them as they deserve to be honored, or bow cringingly before the so-called best people, who, if not the worst, are often corrupting by their example and the least fitted to establish the standard of an independent-minded and enlightened community.

[Rev. John McDowell in *New York Observer.*]

Surely the time has come when the Christian ministry must insist more than ever that moral laws apply with just as much force to public life as to private life, to corporate life as well as to individual life; that Christian morals are not affairs of latitude and of date, settled by vote and will of the majority in a given place and time. We must bring public opinion to the standards of eternal truth and eternal righteousness. We must teach men that it is impossible to substitute individual honesty for laxity in corporate rectitude and social trusteeship.

[Rev. P. C. Money in *Pacific Christian Advocate.*]

If the preacher have not love,—love burning in his soul, born of a clean heart and the infilling of the Holy Spirit,—he will be at best nothing but a "sounding brass, or a tinkling cymbal." I do not mean that he must be a crank on sanctification, but that there must be more preaching in the demonstration and power of the real Holy Spirit. It is only love vitalized by spiritual energy and toil that can convert souls or feed a congregation.

[Rev. Charles S. Macfarland, Ph.D., in *Christian Work and Evangelist.*]

Does the Christian church exist for the sake of herself or for the sake of humanity? She has not yet answered the question. Meanwhile, democracy has waited outside so long that she has turned her back; or, truer, gone on ahead without us. The church can no longer go on gathering from the world for the sake of herself; she must give herself for the sake of the world.

[*Christian World,* London.]

We have not reached the meaning of the word if we fail to see that truth is the holy of holies; that the search for it is a divine vocation; that to find it is to have a new vision of God.

SPECIAL ANNOUNCEMENTS.

FROM THE PUBLISHER OF MRS. EDDY'S WORKS.

THE CHRISTIAN SCIENCE TEXT-BOOK, "SCIENCE AND HEALTH WITH KEY TO THE SCRIPTURES."—This work contains many important changes and additions by the author, and also contains a photogravure portrait of Mrs. Eddy, together with a facsimile of her signature.

SOME OF MRS. EDDY'S WRITINGS IN NEW BINDINGS.—One volume containing Unity of Good, Rudimental Divine Science, No and Yes, Retrospection and Introspection; a second volume containing Christian Healing, The People's Idea of God, Pulpit and Press, Christian Science *versus* Pantheism, and the Messages of 1900, 1901, and 1902. These volumes are printed from new plates and are uniform in size with the pocket edition of Science and Health. Bound in morocco, limp, round corners, gilt edges, heavy Oxford India Bible paper. The prices of these books prepaid are as follows: single copy, $3.50; six or more copies of either volume to one address, each $3.25.

THE CHURCH MANUAL.—Containing all the By-laws of The Mother Church, The First Church of Christ, Scientist, in Boston, Mass. Each new edition of the Manual will have special notice in the *Sentinel.* Price, single copy, prepaid, $1; six copies to one address, $5; twelve copies to one address, $9.

Attention is called to the Library Edition of Mrs. Eddy's works, description and prices of which will be found on the outside cover page of the *Sentinel.*

Address all orders for books named above to ALLISON V. STEWART, Falmouth and St. Paul Streets, Boston, Mass.

FROM THE CLERK OF THE MOTHER CHURCH.

CHURCH TENETS.—The tenets of The First Church of Christ, Scientist,—The Mother Church,—printed on folded sheet for the use of Branch Churches of Christ, Scientist, with space for the names of churches and their by-laws, can be had at seventy-five cents per hundred.

Not less than one hundred are sold. Postage stamps are not taken for payment.

MEMBERSHIP.—Correspondence relating to membership with The Mother Church, and requests for blank applications for membership, should be addressed to the Clerk.

All correspondence and orders relative to the above should be sent to WILLIAM B. JOHNSON, Clerk, The First Church of Christ, Scientist, Falmouth, Norway, and St. Paul Streets, Boston, Mass.

FROM THE CHURCH TREASURER.

PER CAPITA TAXES.—Per Capita Taxes and Contributions to The Mother Church, The First Church of Christ, Scientist, in Boston, Mass., should be sent to the Treasurer. Please do not send currency.

Remittances for the above should be sent to STEPHEN A. CHASE, Treasurer, Box 56, Fall River, Mass.

FROM THE SOCIETY.

Attention is called to the announcement over our Leader's signature, which appeared in the *Sentinel* of Jan. 9, to the effect that Christian Scientists in the field who send four subscriptions to the *Monitor* for one year, will receive their own paper gratuitously.

The Publishing Society has in stock a number of copies of *Sentinel* No. 6, Vol. IX., containing the article "What Our Leader Says" as last published. As this article is of abiding interest and value to the Field the Society will be glad to supply it, postpaid, at the following prices: 1 copy, 5 cents; 5 copies, 15 cents; 10 copies, 25 cents; 25 copies, 50 cents; 50 copies, 85 cents; 100 copies, $1.50.

On foreign orders add 2 cents a copy to cover postage.

The supply of *Sentinel,* Vol. IX., No. 14, is exhausted.

Digitized by Google

THE CHRISTIAN SCIENCE JOURNAL

FOUNDED APRIL, 1883, BY THE AUTHOR OF "SCIENCE AND HEALTH WITH KEY TO THE SCRIPTURES." MARY BAKER EDDY, DISCOVERER AND FOUNDER OF CHRISTIAN SCIENCE

This monthly Magazine is the official organ of The First Church of Christ, Scientist, in Boston, Massachusetts, and correctly represents the Christian Science Movement. It contains interesting discussions of the teaching and the practice of Christian Science, and in addition to dissertations, lectures, and contributed articles, publishes always a number of reports from cases of spiritual and physical healing, which practically illustrate the redemptive work of Christian Science.

TERMS OF SUBSCRIPTION: Single copy, one year, $2.00. Quantities TO ONE ADDRESS: ten or more, each, $1.90; twenty-five or more, each, $1.80; fifty or more, each, $1.60. These rates apply in the United States, Canada, Mexico, and Cuba. In all other countries add forty cents for postage on each subscription. Six months' subscriptions received at half the above rates. No subscriptions received for less than six months.

TERMS OF SALE: Postpaid to any address: Per copy, twenty cents. Quantities TO ONE ADDRESS: ten copies, $1.70; twenty-five copies, $4.00; fifty copies, $7.00; in the United States, Canada, Mexico, or Cuba. To all other countries, per copy, twenty-five cents. Quantities TO ONE ADDRESS: ten copies, $2.10; twenty-five copies, $5.00; fifty copies, $9.00.

BOUND VOLUMES: Current year and two years previous, cloth, $2.50; half calf or half morocco, $3.00. On earlier volumes write for prices.

THE CHRISTIAN SCIENCE MONITOR

Published every afternoon except Sunday

A daily newspaper for the home. Adequate news service. The various departments of a modern newspaper. Unique home forum page. Entire page of editorials dealing with the vital topics of the day. Contributions for the columns of the MONITOR should be addressed, Managing Editor, THE CHRISTIAN SCIENCE MONITOR.

SUBSCRIPTION PRICE: For the United States (except in the Boston Postal District), Canada, Mexico, and Cuba, $5.00 a year, $3.00 for six months; all other countries, $8.00 a year, $4.50 for six months, postpaid. When delivered by carrier through a local news-dealer, 12 cents a week payable to the news-dealer. In the Boston Postal District, by mail, $7.25 a year.

The Christian Science Quarterly

Published January, April, July, and October

Contains the Lesson-Sermons which are read at the Sunday Services throughout the year in all the Christian Science churches. These Lessons, which present citations from the Bible and "Science and Health with Key to the Scriptures," are valuable for daily study.

TERMS OF SUBSCRIPTION: For one year, 50 cents; fifty copies or more to one address, 50 cents yearly for each copy. Foreign subscriptions, 60 cents. Yearly subscriptions only received.

TERMS OF SALE: One or more copies, postage paid, each, 15 cents; fifty copies or more to one address, each 12½ cents, postage paid.

Der Herold der Christian Science

Published Monthly.

A magazine printed in German, which publishes original and translated articles bearing upon Christian Science, and also testimonies of healing from Germany and America. It contains about thirty-eight pages of such reading matter, also the Lesson-Sermons which are read at the Sunday services in all the Christian Science churches, and is valuable as an authorized representative of the movement.

SUBSCRIPTION PRICE: For the United States, Canada, Mexico, and Cuba, 10 cents a copy, $1.00 a year in advance; all other countries, 12 cents a copy, $1.25 a year, postpaid.

MISCELLANEOUS

BIBLES. Clarendon Brevier (01483 x), heavy faced, very distinct type, Turkey morocco, size 6 1-2 x 4 3-8 inches, corresponding in size and binding to pocket edition of Science and Health. Price, $3.75.
Morocco cases, to hold pocket Science and Health and above Bible, may be had at $1.25.
Text Bible. (01561 x), pica square type, Alaska seal, size 7 1-2 x 6 1-4 inches, 1 1-2 inches thick. Specially adapted for use of Second Readers. Price, $7.25.

CHRISTIAN SCIENCE AND LEGISLATION. A pamphlet of one hundred and twelve pages, containing articles by JUDGE CLIFFORD P. SMITH, EDWARD A. KIMBALL, and JUDGE SEPTIMUS J. HANNA, together with testimonies of healing, editorial comments, etc. Single copies, 10 cents; twelve copies to one address, $1.00; twenty-five copies, $1.85; fifty copies, $3.50.

QUARTERLY COVERS, in black seal leather. Regular size, 5 1-4 x 7 3-4, $1.25 each or $12.50 a dozen. Pocket size, 4 1-2 x 6 1-2, $1.15 each or $11.00 a dozen.

QUARTERLY COVERS WITH CHANGE POCKETS.—Regular size, $1.50 each or $15.00 a dozen. Pocket size, $1.40 each or $14.00 a dozen.

THE MOTHER CHURCH. By JOSEPH ARMSTRONG. A History of the Building of The Mother Church, The First Church of Christ, Scientist, in Boston, Mass. One hundred and three pages. Illustrated. One copy, $1.50; six copies, $7.00; twelve copies, $12.00.

PICTURE OF THE MOTHER CHURCH. A half-tone reproduction, size 12 x 15 inches, mounted on a white mat 21 x 25 inches. Single copies, 50 cents; a dozen copies to one address, $4.50.

SOUVENIR POST CARDS, showing picture of The Mother Church, 25 cents per dozen.

THE CHRISTIAN SCIENCE HYMNAL. Cloth, per copy, prepaid, $1.15 each; per dozen, $9.00; per half dozen, $5.00. Half morocco, per copy, prepaid, $1.40 each; per dozen, $12.00; per half dozen, $6.50. Full morocco, $2.50 each. Levant, $3.50 each. Pocket Edition, size 4 5-8 x 6 5-8. Full morocco. Per copy, prepaid, $3.00; twelve or more copies to one address, prepaid, each, $2.50.

MUSIC. Poems written by MARY BAKER EDDY and used by special permission, have been set to music, as follows:—

"THE MOTHER'S EVENING PRAYER." By William Lyman Johnson. The arrangement for both high and low voice in the same copy. 75 cents the copy; $7.00 the dozen.

"CHRIST MY REFUGE." By William Lyman Johnson. Arrangement for high and low voice in same copy. 75 cents the copy; $7.00 the dozen.

COMMUNION HYMN.—"SAW YE MY SAVIOUR?" By William Lyman Johnson. Published in two keys for high and low voice. 50 cents the copy; $5.00 the dozen.

"BLEST CHRISTMAS MORN." By Frederick W. Root. Published in two keys, for high and low voice. 27 cents the copy; $2.75 the dozen.

"O'ER WAITING HARPSTRINGS OF THE MIND." By Frederick W. Root. Published in two keys for high and low voice. 27 cents the copy; $2.75 the dozen.

Please state when ordering any of the three last named whether high or low key is desired.

Our Catalogue for 1909, containing description and prices of above named literature and a selected list of Bibles, will be mailed free on application.

Remittances should be made by check, post-office money order, express money order, or exchange on Boston or New York. Currency or coin should not be sent by mail unless registered. Please send no money remittances or business letters to the Editor or Editorial Department.

Works on Christian Science

Written by MARY BAKER EDDY, Founder of Christian Science and Author of its Text-book

SCIENCE AND HEALTH WITH KEY TO THE SCRIPTURES. In one volume, 700 pp. Containing many important changes and additions by the author. THE ORIGINAL, STANDARD, and only Text-book on CHRISTIAN SCIENCE MIND-HEALING. This edition contains a fine photogravure portrait of Mrs. Eddy, together with a facsimile of her signature.

Price (cloth), single copy $3.18
Two to twelve books (cloth only) to one address, each 3.00
Twelve or more books to one address, each 2.75
Full leather, stiff beveled boards, gilt edges, same paper as in cloth binding, single copy 4.00
Twelve or more to one address, each 3.75
Morocco, limp, round corners, gilt edges, Oxford India Bible paper, convenient for pocket, single copy . . . 5.00
Twelve or more to one address, each 4.75
Levant, divinity circuit, leather-lined to edge, round corners, gilt edges, silk sewed, heavy Oxford India Bible paper, single copy 6.00
Twelve or more to one address, each 5.75

Orders for Science and Health in lots of twelve or more to one address may include any or all of the different styles of binding. The above prices are all prepaid.

MISCELLANEOUS WRITINGS—1883–1896. A book of 471 pages, containing articles published in THE CHRISTIAN SCIENCE JOURNAL since 1883, with revisions and additions.

Price (cloth), single copy $2.25
Twelve or more books to one address, each . . . 2.00
Morocco, limp, round corners, gilt edges, convenient for pocket, single copy 4.00
Twelve or more to one address, each 3.75
Levant, divinity circuit, leather-lined to edge, round corners, gilt edges, silk sewed, single copy 5.00
Twelve or more to one address, each 4.75

The above prices are all prepaid. Orders for Miscellaneous Writings in lots of twelve or more to one address may include any or all of the different styles of binding.

No discount will be allowed on orders for twelve books which include both Science and Health and Miscellaneous Writings.

CONCORDANCE TO SCIENCE AND HEALTH. This work contains about eighty thousand references (more than ten thousand words being indexed). It also contains an index to the Marginal Headings, and a list of the Scriptural Quotations in SCIENCE AND HEALTH. 607 pages, 10 x 7, and addendum, bound in cloth, marbled edges. Price, prepaid, single copy . $5.00
Twelve or more to one address, each 4.50

CHURCH MANUAL. Containing the By-laws of The Mother Church. Price, prepaid, single copy, $1.00; $5.00 per half dozen; $9.00 per dozen.

CHRIST AND CHRISTMAS. An illustrated poem.

Price, prepaid, single copy $3.00
Twelve or more books to one address, prepaid, each . 2.50

UNITY OF GOOD AND OTHER WRITINGS. One volume containing: Unity of Good, Rudimental Divine Science, No and Yes, Retrospection and Introspection, uniform in size with the pocket edition of Science and Health. Bound in morocco, limp, round corners, gilt edges, heavy Oxford India Bible paper. Price, prepaid, single copy, $3.50; six or more copies to one address, each, $3.25.

CHRISTIAN HEALING AND OTHER WRITINGS. One volume containing: Christian Healing, The People's Idea of God, Pulpit and Press, Christian Science *versus* Pantheism, Messages of 1900, 1901, 1902, uniform in size with the pocket edition of Science and Health. Bound in morocco, limp, round corners, gilt edges, heavy Oxford India Bible paper. Price, prepaid, single copy, $3.50; six or more copies to one address, each, $3.25.

UNITY OF GOOD. It lays the axe at the root of error, elucidating and enforcing practical Christian Science, thus affording invaluable directions for all true Scientists. Library edition, 64 pages, cloth binding, marbled edges. Price, prepaid, single copy, 65 cents; $3.00 per half dozen; $5.50 per dozen. Leather covers (pocket). Price, prepaid, single copy, $1.00; $5.00 per half dozen; $9.00 per dozen.

RETROSPECTION AND INTROSPECTION. A biographical sketch of the author. The way she was led to the discovery of Christian Science; its growth and fundamental idea. Library edition, 95 pages, cloth binding, marbled edges. Price, prepaid, single copy, $1.06; $5.00 per half dozen; $9.00 per dozen.

PULPIT AND PRESS. A unique work of importance in the history and to the readers of Christian Science; containing Dedicatory Sermon delivered at The Mother Church, and sermons from the press of that occasion. Library edition, pages, cloth binding. Price, prepaid, single copy, $1.06; .00 per half dozen; $9.00 per dozen.

RUDIMENTAL DIVINE SCIENCE. An interesting and valuable book, containing a brief and concise statement of Divine Science, *alias* Christian Science, in the form of questions and answers. 17 pages. Leatherette covers, gilt top. Price, prepaid, single copy, 37 cents; $3.00 per dozen. Library edition, cloth binding, marbled edges. Price, prepaid, single copy, 55 cents; $2.50 per half dozen; $4.50 per dozen.

NO AND YES. A brief statement of very important points in Christian Science. 46 pages. Pebbled cloth covers. Price, prepaid, single copy, 27 cents; $2.50 per dozen. Library edition, cloth binding, marbled edges. Price, prepaid, single copy, 60 cents; $3.00 per half dozen; $5.50 per dozen.

MESSAGES TO THE MOTHER CHURCH. By Mary Baker Eddy, including Christian Science *vs.* Pantheism, and the Messages of 1900, 1901, and 1902. In one volume. Library edition, 94 pages, cloth binding, marbled edges. Price, prepaid, single copy, $1.56; $7.50 per half dozen; $13.50 per dozen.

CHRISTIAN SCIENCE *versus* PANTHEISM. The Pastor Emeritus' Message delivered at the Communion Season in The Mother Church in Boston, June, 1898. A clear and strong refutation of the charge that Christian Scientists are pantheists. 15 pages. Price, prepaid, single copy, 26 cents; $2.50 per dozen.

MESSAGE TO THE MOTHER CHURCH. The annual message of Mary Baker Eddy to The Mother Church on Communion Sunday, June, 1900. Leatherette covers, deckled edges. 15 pages. Price, prepaid, single copy, 26 cents; $2.50 per dozen.

OUR LEADER'S MESSAGE. The annual message of Mary Baker Eddy to The Mother Church on Communion Sunday, June, 1901. Deckled edges. 35 pages. Price, prepaid, single copy, 50 cents; $4.50 per dozen.

COMMUNION MESSAGE. The annual message of Mary Baker Eddy to The Mother Church on Communion Sunday, June 15, 1902. Deckled edges. 20 pages. Price, prepaid, single copy, 50 cents; $4.50 per dozen.

TWO SERMONS. CHRISTIAN HEALING and THE PEOPLE'S IDEA OF GOD. In one volume. Library edition, cloth binding, marbled edges. 36 pages. Price, prepaid, single copy, 60 cents; $3.00 per half dozen; $5.50 per dozen.

CHRISTIAN HEALING. A sermon delivered in Boston. 19 pages. Paper covers. Price, prepaid, single copy, 21 cents; $2.00 per dozen.

THE PEOPLE'S IDEA OF GOD. A sermon delivered in Boston. 14 pages. Paper covers. Price, prepaid, single copy, 21 cents; $2.00 per dozen.

FEED MY SHEEP. Words by Mary Baker Eddy. Music by Lyman F. Brackett. Price, prepaid, single copy, 50 cents; $5.00 per dozen.

Direct all orders for above works, and make remittances payable to

ALLISON V. STEWART, FALMOUTH AND ST. PAUL STS., BOSTON, MASS.

All orders for periodicals, or literature other than the above works, should be sent with remittance directly to The Christian Science Publishing Society.

CHRISTIAN SCIENCE SENTINEL

(THE CHRISTIAN SCIENCE WEEKLY)

PUBLISHED EVERY SATURDAY BY

THE CHRISTIAN SCIENCE PUBLISHING SOCIETY

Falmouth and St. Paul Sts., Boston, Mass., U. S. A.

ARCHIBALD MCLELLAN, Editor.

JOHN B. WILLIS, ANNIE M. KNOTT,

Associate Editors.

SUBSCRIPTION PRICE

Single copy, one year, $2.00.

Ten copies or more to one address, one year, each copy, $1.90.

Twenty-five copies or more to one address, one year, each copy, $1.80.

Fifty copies or more to one address, one year, each copy, $1.50.

These rates apply in the United States, Canada, Mexico, and Cuba. In all other countries add 50 cents for postage on each subscription.

Six-months subscriptions received at half the above rates.

No subscription received for less than six months.

Subscriptions to the *Sentinel* will be entered to begin with the first of the month, and will include all issues for the month named as expiration date on the wrapper. The receipt of the periodical by the subscriber will be our acknowledgment of the subscription.

TERMS OF SALE

Five cents a copy, postpaid to any address in the United States, Canada, Mexico, and Cuba. In quantities to one address: twenty-five copies, $1.00; fifty copies, $1.80; one hundred copies, $3.00.

To all other countries, six cents a copy, postpaid to any address. In quantities to one address: twenty-five copies, $1.25; fifty copies, $2.30; one hundred copies, $4.00.

Bound Volumes: Current year and two years previous, cloth, $3.00; half calf or half morocco, $3.50. On earlier volumes write for prices.

Entered at the Boston, Mass., post-office as second-class mail matter.

ITEMS OF INTEREST.

National.

Fortifications to cost approximately seven million dollars are to be built to defend the Panama Canal. The most powerful and elaborate batteries are to be planted on the Pacific side. Three batteries will be erected there on islands lying from ten to fifteen miles off shore. Six miles up the Canal from the Pacific ocean there is to be a secondary battery, which will command the principal lock at Pedro Miguel. At Culebra, about the middle of the Canal, a military post will be constructed. On the Atlantic side a range of hills run down to the sea, commanding the entrance to the Canal. Upon them, at El Boco Point, modern batteries will be constructed at a cost of $2,500,000. It is planned to mount in these fortifications more than sixty of the highest-power disappearing guns.

Governor Hughes of New York has signed the bill to preserve the scenic beauties of the highlands of the Hudson. The bill creates a state forest reservation on the west side of the Hudson, lying in the towns of Cornwall, Woodbury, Highland, and Stony Point. It provides that this shall be known as the "Highlands of the Hudson Forest Reservation" and shall include all lands now owned or hereafter acquired by the state at this point. The control of this reservation is placed in the hands of the state forest, fish and game commission, and the forests thereon are to be preserved according to the methods of modern forestry.

President Taft has sent back to the War Department the estimates submitted to him for the support of the military establishment during the fiscal year 1911, and indicated his desire that they should be cut approximately $36,000,000. Assistant Secretary Oliver has succeeded in reducing the figures by $18,000,000, and they now have been submitted to Secretary Dickinson for final consideration. Secretary of the Navy Meyer has already accomplished his task of cutting $10,000,000 out of the naval estimates for the same period.

Three different passenger rates are now in effect in Missouri. The Missouri, Kansas and Texas Road charges three cents a mile and will not meet competition. The Burlington, the Rock Island and the Frisco systems will charge passengers two and one-half cents a mile. The Missouri Pacific, the Iron Mountain, the Cotton Belt, the Wabash and Santa Fé lines will continue under the two-cent rate until the writ of prohibition now pending in the State Supreme Court is ruled on.

There were in Georgia, says the *World's Work*, a few free negroes and a few slaves who were allowed to hire their time, who had, in 1863, possibly $50,000 worth of property, though it was probably much less. In 1907 the negroes of Georgia were assessed at $25,000,000, not including untaxed church and school property. They own one twenty-fourth of the land of the state, which is worth nearly $15,000,000. This is distributed in small holdings among a mass of people.

Teachers throughout the country have been invited by United States Forester Pinchot to cooperate with the Forest Service in an effort to obtain more definite knowledge of the characteristics of the most important forest trees of the United States. To do this it will be necessary to obtain a large number of volunteer observers, who will collect material on the time of leafing, blossoming, and fruiting of the various kinds of forest trees.

A committee of nineteen men has been named to act for the recent non-partisan conference at Cooper Union, New York. This committee will nominate a committee of one hundred men to conduct a non-partisan campaign in the fall. The smaller committee will have in charge the executive work of the movement for the election in the fall of city officials who will give an economical and businesslike administration.

After the present year automobiles are to be taxed in Massachusetts according to horse-power, cars of less than twenty horse-power paying a fee of $5; of twenty to thirty horse-power, $10; of thirty to forty horse-power, $15; of forty to fifty horse-power, $20; and all cars of fifty horse-power or more, $25 per year. Motor cycles are to pay a uniform fee of $2; and commercial motor vehicles a fee of $5 per year.

The Council of Fine Arts created by President Roosevelt and which was to have charge of the beautification of Washington, to pass upon the design of Government buildings throughout the country, etc., has been abolished by President Taft in an executive order, as Congress failed to appropriate money for its expense and salary list.

The Government clerks, in voting on the daylight hours movement, have decided, by a vote of two to one, that they prefer the present 9 to 4.30 arrangements. The chief reason given for rejecting the proposal was that the hour in bed in the morning was worth two or three on the ball field or golf course in the afternoon.

A Federal grand jury at Cheyenne, Wyo., has returned thirteen indictments charging conspiracy to defraud the Government of thousands of acres of valuable coal lands in Big Horn county. The grand jury also returned indictments against ten Laramie county ranchmen, charging illegal fencing of public lands.

That the total wages affected by the tariff amount to $2,277,848,537, and that the values of the products involved in the consideration of tariff revision reach the sum of $13,270,192,088, is the statement made by Senator Money in showing the vast importance of the question now being considered by the Senate.

One of the new departures in naval affairs to be inaugurated by Secretary Meyer, will be a system of making coal economy and efficiency in steam engineering competitive with all the ships of the navy. Prizes will be awarded for the winning ship of each class designated at the end of each year.

Restoration of the salaries of those Boston & Maine employees who agreed to accept a cut on Feb. 14, 1908, in view of the general financial depression and consequent loss of business by the railroad, has been ordered.

Subscribers of the Boston Opera Company to the number of about seven hundred and fifty met in Jordan Hall last week for the purpose of participating in the first distribution of seats for the opening season.

International.

Plans for the international exhibition of railways and land transport, which is to be held at Buenos Ayres during the summer of 1910, are well under way. The occasion will also be a centennial commemoration of the independence of the Argentine Republic. For the purpose $6,000,000 has been appropriated by the government, the idea being to give the world at large an opportunity to observe at close range the resources of the country and the possibilities of their development. At present there are in Argentina 14,738 miles of railways, of which nearly one thousand miles were added in 1908, with a total capitalization of $788,964,416. The number of passengers carried was 48,593,600, and the freight transported amounted to 31,930,600 tons.

The drink bill of England for the past year was $30,000,000 less than the year before, and $125,000,000 less than ten years ago. The past year was one of great suffering by reason of unemployment, and so steady a shrinking of the amount thus expended evinces a decided drift toward abstinence.

In the Austrian Reichsrath the financial minister, in a recent speech dealing with the budget, announced a plan for new taxes, including the "unearned increment" on land. Under the taxes, he said, $13,000,000 would be realized.

Industrial and Commercial.

Steel works, ultimately to represent an investment of $25,000,000, and to employ ten thousand hands, upon which $1,300,000 has already been expended by the United States Steel Corporation in preliminaries, are to be constructed at the head of Lake Superior. At the time the establishment of the new industry was decided upon, it was the intention to erect mills to cost $5,000,000 or $6,000,000. The site acquired for the plant fronts on the St. Louis river at the location known as New Duluth, and is approximately sixteen hundred acres in extent.

The plan to combine the fertilizing plants of Europe and this country in one $50,000,000 corporation to be known as the Independent Fertilizer Company, has been abandoned. The plans for the combination were formulated last winter, and it was intended to include not only sixty plants in the United States, but also to take over phosphate interests in Germany and other European countries.

The E. H. Harriman system of transportation comprises about 18,000 miles of railroad and 54,000 miles of water routes. About 80,000 men are employed.

General.

From an elevation of two miles in a balloon over central Massachusetts on a clear day, the Hudson river, St Lawrence river, the Atlantic, Long Island, the sound and ocean beyond, and with a powerful glass New York and Boston, are within the vision of aeronauts.

CHRISTIAN SCIENCE SENTINEL

"WHAT I SAY UNTO YOU, I SAY UNTO ALL—WATCH" JESUS

PERSONAL ATTACHMENT.

M. G. KAINS, M.S.

THE key-note of Christianity is that God is the sole cause and creator of all that really exists. Every advance in spiritual attainment is based upon the acceptance of this truth, first as a belief; then, as a result of cumulative evidence, as a fact. In other words, Christianity, reiterated in Christian Science, its present-day restatement, insists upon individual right thinking—the thinking of God's thoughts. It is emphatic and inexorable in its insistence upon obedience to the demand, "Thou shalt have no other gods before me." This recognition of God as the originator and sustainer of the universe precludes the existence of any other independent thinker than God or infinite Mind, and just as positively it precludes the existence of any kind of man other than the spiritual man who is cognized in Science as the highest divine manifestor of God's thoughts. Based upon this statement, man—spiritual man—has dominion over all the earth,—over the falsity or belief that there is any real power, or creation, or existence, or experience apart from God.

In taking this radical and scientific stand, Christian Science recognizes the spiritual creation as real and wholly real; and conversely, it designates the suppositional material universe, including the suppositional material man, as unreal and wholly unreal. To be sure, in our day no one has actually gone so far as this in the presentation of complete or concrete proof; but just as a traveler consulting a map recognizes the landmarks on his chart when he reaches them in his journey, so the student in Christian Science recognizes the correctness of his thinking or growth in spirituality by signs of self-healing, and from these signs he gains confidence of the rightness of his course and is encouraged to press forward. What if he has not fed the thousands, walked on the water, and raised the dead, did not Jesus do these mighty works? And did not Jesus declare that greater works even than these should be presented by all who adhere strictly to his teaching? These works are landmarks on the chart, and they will be reached in due course.

The whole purport of Jesus' ministry is individual reliance upon God, who must be constantly cognized as the ever-present help. In all his teachings Jesus constantly pointed away from himself to God as the sole cause, creator, and sustainer; in all his works he typified the work that each one of his followers must do,—the direction that each must take, the landmarks each must pass. Nothing so conspicuously characterizes Jesus' work as his utter reliance upon God as the All-sufficient. Nowhere in the imperfect record of his mission is there a hint that he ever looked to any other power, person, or thing for aid; on the contrary, the record teems with statement and proof that he knew God not only always had heard but always would hear his prayer, because he was praying according to God's law.

Not so all of Jesus' professed followers. After the Master's ascension the disciples continued to present such proofs as Jesus had presented, but it was not long before later followers began to lose sight of the Christ, or spiritual man, which Jesus typified, and to place their affection and worship upon the human man Jesus. The result was that the landmarks or signs which characterize Christian practice began to be obliterated and to be buried in this personal attachment. In time the road became choked with débris and the landmarks were buried; and had it not been for the writings of the less than half a dozen of his immediate disciples and a few other followers, the words and works of Jesus of Nazareth would today be mere tradition. All through the dark ages and down to the middle of the last century, tangible proofs of the authenticity of the New Testament record were conspicuously lacking, and no one can tell how much of spiritual import has been lost through translations back and forth.

All through these centuries, however, spiritually minded people have clung to the hope and belief that the statements are true, and thus in a sense have preserved the records themselves. Here and there some Luther, Baxter, or Wesley, whose faith was a light shining through the gloom, presented proofs that the accounts were more than wonderful stories, and upon their interpretations some of these men gained personal followings which have grown into prominent sects. When the immediate personal influence of these leaders was removed, the evil effects of personal attachment became evident; and because human opinions differ, doubts as to the road they pointed out arose, and led to more or less division in their flocks.

Personal attachment has been and still is the bane of religion. The comment is constantly heard that So-and-so has a wonderful influence because he preaches such scholarly sermons and fills his church with the best people in town, or because his parish work is so well organized, or because he is so strong in mission work, or for some other of a score of reasons. That is altogether fitting and proper, so far as it goes. On the other hand, the comment is common that So-and-so has a small influence, that he is weak in some or all of the score of ways a clergyman should be strong. Yet the former may not be as spiritually minded as the latter,—a condition evidenced in every one's experience, for who does not recall instances where the former has been replaced by the latter. What, then, is responsible? Personal attachment! It is strong in one case; weak in the other. In each case, however, it may divert the paramount object of religion—reliance upon God. In the first place this may be because the followers are attracted to the person; in the second, because they are repelled. In each case the person himself may share the opinions of his followers, and thus work injury. From whatever standpoint these typical cases are viewed, they are deplorable, because the creator is eclipsed by the personality of the creature; attachment to personality has in each case diverted thought from divine Principle.

Prominent among the aims of Christian Science is the effort to rebuke and correct this blind following of persons

Copyright, 1909, by Mary Baker Eddy.

Digitized by Google

rather than God; our Leader even classes "mere personal attachment" with animosity, as a thing to be shunned; indeed, animosity may be esteemed as the less dangerous of the two evils, because it is less hidden and hence the more easily combated. Support of these statements is found in the "Rule for Motives and Acts" in the Manual of The Mother Church (p. 40). Here Mrs. Eddy shows that all false motives originate through one or the other of these two arch enemies to spiritual progress when she writes, "Neither animosity nor mere personal attachment should impel the motives or acts of the members of The Mother Church." So essential to a correct understanding of Science does she consider this rule, that it is read at each service on the first Sunday of each month in order, by iteration, to impress its importance upon all students of Science; but so insidious is the argument of this personal attachment, and so strong has been its hold, due to former erroneous teachings, that many earnest students of Science seem to be oblivious of their own slavery to it.

No one who has followed the growth of the Christian Science movement can fail to have been struck by the radical changes Mrs. Eddy has introduced from time to time, with an eye single to the elimination of "mere personal attachment." Among these changes are her own retirement from public life; the abandonment of personal sermons, for which passages from the Bible and Science and Health have been substituted; the rotation of Readers in office, both in The Mother Church and in the branch churches; the establishment of triennial instead of annual gatherings in Boston on Communion Sunday in The Mother Church, and finally the abolishment of this feature altogether.

In spite of predicted disaster as a result of growth away from personal attachment, the Christian Science movement has certainly gathered strength and coherence. People have marveled, and have thus been aroused to investigate Christian Science and to determine for themselves wherein lie its strength and simplicity, its grandeur and beauty, its health, its peace, and its joy. If spiritually minded, if honest with themselves, if persistent in the pursuit of truth for truth's sake, they soon learn to do the works which Jesus and his disciples did; and this they do without the aid of any merely personal attachment, for the text-book, Science and Health, explains the Biblical teachings so clearly that they are enabled to prove the truth for themselves. Unless, however, they are alert to adhere constantly and insistently to the ever-present God as the only healer; unless they are radical with themselves in quelling all thoughts that suggest their own sufficiency; unless they recognize their own human personality as nothing and God as all, they are likely to gain a personal following when they begin to succeed in their work for others, and thus eliminate more or less the implicit and childlike reliance upon God alone which may have characterized the thought of their patients or students during their early experience in Christian Science.

Those who have had their attention called to this danger have sometimes asked: "Are we not to have honor, respect, love from those whom we help? Should we not gladly make sacrifices for them, and they for us, for the good of the Cause? How is it possible to be grateful to God for healing, for a more moral mode of living, for spiritual regeneration, and not be grateful to those through whom these changes for the better have been wrought? How can we distinguish personal attachment from spiritual reliance, how avoid the consequences? What are the consequences?"

In answer it may be said that devotion to personality becomes unwarranted and harmful in a practitioner when he assumes the right to think for his patient. In the patient, consent to this domination is shown in so far as he is willing to give up individual thinking and unquestioningly accept as his own the thoughts of another, instead of determining whether these thoughts measure up to God's unvarying standard. It may be temporarily necessary for the practitioner to lead the patient into right methods of thought, but from the first the effort should be to have the patient do his own thinking, irrespective of the practitioner. In this way the baneful effects of a false relation can be avoided, as for instance the desire to give or get advice, to do anything for policy's sake, to accept statements simply because some more experienced Scientist utters them, to pursue a certain course solely because it is thought another Scientist might like to have that course followed, etc.

No disasters occur where individual thinking is practised on the basis that God is the only Mind and that the spiritual man expresses God's thoughts. When each of two or of a million individuals is thinking in harmony with this divine Mind, each must necessarily be in harmony with all others thus thinking; it is impossible that it should be otherwise. Conversely, when separations threaten or actually occur, they result because one or more of the group has accepted an erroneous thought; and it is not invariably true that those in the minority are wrong. Jesus was once in the minority! Even when an erroneous thought is accepted, the separation cannot be permanent, for in due time the one in error must see that error, his innate honesty must overcome reluctance to acknowledge it, and those who have been constantly thinking rightly will welcome the wanderer back without a thought, much less a hint, of blame. It is every one's right to think for himself, and it is no one's right to judge another, whether his course be wrong or right. Perhaps it may be necessary for the wrong thinker to pursue his wrong course for a time, in order to prove for himself its futility.

At no time is personal domination so likely to be rampant as in periods of prosperity. The prosperous ones have proved their position and they are sure to have a lot of camp followers who, should a period of adversity arrive, would disappear. Such people never aid any cause or any leader, rather do they hinder it; because, lacking the spirit, they cannot interpret the letter, and thus too often they give a false idea of the purpose for which that leader stands. In the rule from which a quotation has already been made, we are cautioned that "in Science, divine Love alone governs man; and a Christian Scientist reflects the sweet amenities of Love, in rebuking sin, in true brotherliness, charitableness, and forgiveness." Wherever and whenever this rule is followed, in the spirit as well as in the letter, the miasma of devotion to personality can never gain a foothold, for all will be living instead of talking the First Commandment, which "signifies that man shall have no other spirit or mind but God, eternal good, and that all men shall have one Mind" (Science and Health, p. 340).

TEMPTATIONS.

WALTER SHAW.

JESUS once said, in effect, that a prophet has no honor in his own country, among his own kin, and that a man's foes are those of his own household. It is quite possible that the force of the latter remark has sometimes been felt to be peculiarly true by the student of Christian Science. One will say, "If you only knew what conditions I have to endure in the home, the family opposition, or the peculiarities of my business, you would understand how difficult it is for me to progress in Science." To entertain the sense of reality in opposition, however, is to give it power; and we may perhaps profitably inquire, What is our household? Is it not something beyond our domestic environment and business life? The thoughts we hold and the mental attitude we occupy, these are our true habitation. Hence the psalmist's assurance for

Digitized by Google

him "that dwelleth in the secret place of the most High." Our great Master, in passing through the many phases of our humanity, was, Paul tells us, "in all points tempted like as we are, yet without sin." The little glimpse we get of the home life of Jesus is instructive. Some of his brothers evidently did not believe him to be the Christ, and once ventured to direct him as to what course he should take next. To the Master's human sense, surely such an attitude of thought must have been distressing at times, and hard to bear, especially with all the proofs he had given them of his Messiahship.

The human longing to be understood by those whose affections we value sometimes appears to meet with slow response. A helpful thought given by a student in this regard is that God always understands us, and we may well rejoice that, through the teachings of our Leader, we are also growing to understand Him. This fact surely more than compensates for the temporary loss of some human friendships. If the great Wayshower murmured not, we students of Christian Science should not complain, but rejoice if permitted to share his "cup of sorrowful effort" (Science and Health, p. 26). Our problem is to work out of this material sense of life, and to the human self it can hardly prove a pleasant process. It is easy to talk about putting off "the old man with his deeds," but in practice it involves "many sacrifices of self to save us from sin" (*Ibid.*, p. 23), as our Leader has pointedly told us.

The old way of encouraging self-pity, self-love, and a sense of heroic martyrdom has to be eliminated. Often this "old man" resents being put off, and endeavors vigorously to reassert his seeming reality. Mrs. Eddy says in "Miscellaneous Writings," "The warfare with one's self is grand" (p. 118), but the student sometimes finds it difficult to "rejoice all the rugged way" (*Ibid.*, p. 398), until he remembers that verse in our Hymnal (p. 127):—

> Father, hear the prayer we offer:
> Not for ease that prayer shall be;
> But for strength that we may ever
> Live our lives courageously.

When we pause to think that the world is watching our lives (rather than heeding our words), we shall strive to become faithful witnesses to the truth of Christian Science. How often do we hear of people being attracted toward our Cause by the lives of its followers. May we ever uphold that high standard, so that the Christ-power may be evidenced through us, not only in healing the sick, but in that calm attitude of undisturbed reliance upon God, however adverse conditions may seem.

It sometimes happens that our very anxiety to help others, especially those near and dear to us, hinders rather than helps certain temperaments, and thus invites opposition. If we but realized that every one will ultimately come into the knowledge of Truth, we would learn more patience. The great influence of silent example can scarcely be overestimated, and it is helpful to remember this when tempted to argue with those whose only desire is to entrap the student into "vain disputations." All people are not yet ready for Christian Science, and no amount of talking will make it clear to them until the soil is made ready for the seed. In proportion as it is evidenced that opposition has no power to annoy us, the effort to antagonize will cease. To know constantly that "evil is not power" (Science and Health, p. 192), is our sheet-anchor, and, however the storm may rage, this thought maintained will hold us safe.

The writer is always very thankful for the manner in which Christian Science was first presented to him. Had he been approached in the unwise way occasionally evidenced by some students, it is probable that his interest in the subject might have been delayed for years. A great responsibility attaches to our method of presenting this sacred truth to those uninitiated. We shall do well to pray for wisdom, lest our zeal become a stumbling-block. Honestly and bravely to live up to our present knowledge of Truth, paves the way for advancement in divine Science. Our difficulties will subside gradually as we enter into a fuller realization of the certainty of God's unfailing care. No circumstances can hinder the spiritual growth of those longing to progress. Our Master has trodden every step of the road over which men must make spiritual advance, and his exhortations should ring in our ears: "Be of good cheer; I have overcome the world;" and, "Lo, I am with you alway, even unto the end."

THE EXPLANATORY NOTE.

ERNESTINE HADKINSON.

A SHORT time ago some friends who were just beginning to feel interested in the study of Christian Science, said that they liked the service, but they felt antagonized every time the "explanatory note" was read before the Lesson-Sermon was entered upon. The thought was that by declaring the Lesson-Sermon to be "uncontaminated and unfettered by human hypotheses," our Leader had not only said that her personal explanation of the Bible was the only right one, but that she also made herself superhuman.

I had never given the "explanatory note" any particular thought, accepting it naturally, without having noticed that I had myself no clear understanding of its profound meaning. Therefore, when the question was suddenly thrust upon me, I had to take the *Quarterly* and read carefully what was stated. Directly my eyes fell on the word in italics in the last clause, "*authorized* by Christ," and I pointed this out to the inquirers, making it clear to them that Mrs. Eddy claimed no supernatural power when she had shown us that there is only one Truth; that "Truth is demonstrable when understood, and that good is not understood until demonstrated" (Science and Health, p. 323); therefore that each individual would have to prove by his own experience and to his own satisfaction the truth of all her statements. St. Paul said: "But I certify you, brethren, that the gospel which was preached of me is not after man. For I neither received it of man, neither was I taught it, but by the revelation of Jesus Christ." Mrs. Eddy, when again preaching the same gospel, said, "No human pen nor tongue taught me the Science contained in this book, Science and Health; and neither tongue nor pen can overthrow it. . . . Its Science must be apprehended by as many as believe on Christ and spiritually understand Truth" (Science and Health, p. 110).

My friends were then satisfied to go on studying until they should understand more. I was specially reminded of this little incident at Christmas, when I was trying to realize more fully the meaning of "Christ." My eyes fell on a poem in the *Sentinel*, entitled, "When was Christ born?" and I saw that the Christ is first born in us at the moment when we get a glimpse of the glorious possibilities of man in the image and likeness of a perfect Principle. The "explanatory note" in the Christian Science service announces the true concept of Christ, as explained in "Miscellaneous Writings" (pp. 161–168). In Revelation we read: "Behold, I stand at the door, and knock: if any man hear my voice, and open the door, I will come in to him, and will sup with him, and he with me. . . . He that hath an ear, let him hear what the Spirit saith unto the churches." It is therefore of great importance that all who attend Christian Science services, and especially members of the Christian Science denomination, should clearly understand the import of the "explanatory note." If all Christian Scientists present at a service united in letting in the Christ more fully at that special moment, the spirit of Truth, of Love, of praise and gratitude would be so re-

Digitized by Google

flected that wrong thinking (animal magnetism) could find no place in consciousness, and the healing thought would go out constantly to demonstrate and bring into experience the true substance, the infinite supply.

Then would our beloved Leader's words (Christian Science Manual, p. 19) be worked out by her grateful followers, and the vision of St. John come into experience: "And there shall in no wise enter into it any thing that defileth, neither whatsoever worketh abomination, or maketh a lie: but they which are written in the Lamb's book of life. . . . And there shall be no more curse: but the throne of God and of the Lamb shall be in it; and his servants shall serve him: And they shall see his face; and his name shall be in their foreheads. And there shall be no night there; and they need no candle, neither light of the sun; for the Lord God giveth them light: and they shall reign for ever and ever."

EQUAL OPPORTUNITY.

HATTIE P. COLLMAN.

THE thought has been expressed by some prejudiced persons, that Christian Science is intended only for the rich, and that the poor have no place in its churches. Those who have any understanding whatever of the uplifting truths expressed in Christian Science, know that this religion is most practical, and is a wonderful help to the poor, so called, as well as the rich. It not only uplifts both classes spiritually, but is a comfort and a strength to them in performing their daily tasks.

I know personally of a German woman, a widow, who one year ago was healed of an abnormal growth of four years' standing. This healing was accomplished through the perusal of some copies of *Der Herold*. Three weeks from the time she received the magazines, the growth had entirely disappeared. She, naturally, feels most grateful for this healing, and although she cannot at present read English, she says she can never again depend upon any material means for healing, but upon God alone. She is obliged to earn her living by working out by the day, and she now feels physically able to do whatever is required of her. Has not Christian Science proved a boon to this struggling heart, this woman for whom there was apparently no help?

Several years ago, when taking my first steps in Christian Science, I heard a testimony given which so impressed me with the practicability of this great truth, that I have never forgotten the main facts of the case. A person who was obliged to earn her living by washing and ironing, related how, in former years, she had been considered careless in her work. Since coming into Christian Science, she had learned to love God supremely, and as only honest, conscientious work on her part could demonstrate this fact, she had learned, through even a slight understanding of this truth, to become so proficient in her work that no one could any longer complain of it.

In the Scriptures we are admonished, "Study to show thyself approved unto God, a workman that needeth not to be ashamed, rightly dividing the word of truth." We are also taught to understand the divine Principle of love and right living, and that "God is no respecter of persons." What a beautiful example of this fact we have in the life of our dear Master, whose every ministration is a constant reminder to us of a humility, gentleness, and meekness which we may well strive to emulate. Jesus chose his followers from among the simple-hearted and lowly fishermen, and it was of such as these that he said, "I thank thee, O Father, Lord of heaven and earth, because thou hast hid these things from the wise and prudent, and hast revealed them unto babes. Even so, Father: for so it seemed good in thy sight."

While studying the Lesson-Sermon on Sacrament, I was impressed more than ever before with the beautiful spirit of self-abnegation and humility shown by Jesus when he washed the feet of his disciples. It was in striking contrast to the pride and tyranny manifested upon every occasion by the Pharisees. I feel, too, that I can never express in words the love and deep gratitude which I have for our beloved Leader, Mrs Eddy, who has made it possible for me to grasp, even in a small degree, the healing truth revealed in Christian Science. I love it so dearly that language fails me in seeking to express the grandeur and infinitude of it all.

FOUND FAITHFUL.

FRANCES MACK MANN.

IF we were all faithful in the absolute meaning of the word,—faith-full,—there would be no room for improvement, for we should have attained unto perfection. We would be filled with the understanding of "the only true God," which Jesus said is "life eternal," and our work would be finished. Shakespeare wrote,—

> His words are bonds, his oaths are oracles,
> His love sincere, his thoughts immaculate.
> His tears pure messages sent from his heart;
> His heart as far from fraud as heaven from earth;

but we know we have not yet attained unto this condition of mind.

One who is faithful will keep faith with or without opportunity to aid or serve; will be firm in truth, worthy of confidence; conformable to fact. It makes no difference whether he is ill-spoken of or praised. He stands on the vantage-ground of Truth. The Master said, "He that is faithful in that which is least is faithful also in much: and he that is unjust in the least is unjust also in much." As faithfulness is lived, justice becomes manifest; a justice which gives advantage, privilege, and consideration equally to all, for a faithful person will endeavor to be just to all concerned. He will be a true citizen, a constant friend. He is neither vain nor self-righteous. He does not expect earthly reward, although he may occasionally receive one; he is working for the attainment of the invisible things of Spirit.

"A faithful witness will not lie; but a false witness will utter lies," wrote Solomon. Faithfulness is not a great talker. It has not the element of conceit or egotism. Also we find that one who is a tale-bearer and a tale-hearer cannot be faithful, for he reveals secrets and thus betrays the confidence placed in him. Discovered falsehood is a bar to confidence. Solomon also tells us that "as the cold of snow in the time of harvest, so is a faithful messenger to them that send him: for he refresheth the soul of his masters." Honesty is one of the characteristics of a faithful man. If a man is not honest in material matters, neither will he be in matters spiritual. It is impossible for the faithful man to steal or cheat or defraud. He alone who is faithful in love will show forth the truth; and this exact conformity to the fact in speech and action is a wayshower to this monumental virtue. Faithfulness is virtuous. It has the strength which comes from trial and victory. It is firm in its adherence to right; loyal to its highest concept of duty; worthy of confidence.

These pregnant words of the apostle, "I have sent unto you Timotheus, who is my beloved son, and faithful in the Lord," reveal to us a glimpse of this "beloved son" who was faithful to Principle, and Timothy becomes beloved by us. Like Paul in regard to Timothy, we find that he who is faithful is scrupulously careful to adhere to all known truth, in thought and word and deed. In

"Miscellaneous Writings," page 343, our Leader writes, "Among the manifold soft chimes that will fill the haunted chambers of memory, this is the sweetest: 'Thou hast been faithful!'"

FOLLOWING THE ORIGINAL.

REV. ELMER C. ANDREWS.

THAT many of the favorite passages of Scripture are capable of much clearer statement and purer interpretation than that given by the English text, was very forcibly brought to the writer's attention some weeks ago. In studying the Lesson-Sermons a fuller understanding seemed to be necessary, and turning to the ancient language with grave apprehensions, he began a study which eventuated in the lifting of a veil. Having a fair working knowledge of both Hebrew and Greek, which had proved of great value during his years of actual work in the ministry of one of the older denominations, he felt sure of success, so far as a translation was concerned, but the rending of the veil came to him as a revelation.

He had encountered many obstacles to both faith and theology in such a study, instead of which he now finds a spiritual uplift which is most wholesome and stimulating, which deepens the understanding and broadens the affections into a fuller knowledge of the Love that is God. It is with the hope that some such good may come to others that the following verses are here given, and as a slight tribute to our Leader, whose spiritual purity has brought to light so many blessings.

Psalm xci. 1: Dwelling in the supreme presence, one shall abide in the protection of omnipotence. That is, "sitting down" in the presence of God, one shall "stop over night" "in the shadow" of omnipotence.

St. John xiv. 12: I tell you of a great truth: Whosoever agrees to me, the works that I do, he will do and in like manner, and he will do greater [things] than these, because I live to the Father. "Agrees to" rather than "with" because more than mental assent is expressed. One's life must conform to the commandments of Truth, not only in an outward sense but with spiritual oneness, that one may "agree to" Christ. "Live to" rather than "go to," because, literally and fully, "by my daily acts I walk myself to the Father," hence he shows the spiritual way of unfoldment.

Deuteronomy xxxiii. 26, 27: Nothing is to be compared to the God of the people of Israel, riding the heavens for their protection, and the clouds of darkness in his majesty. The home is God, the Ancient One, and sustaining all is the infinite strength, and he will drive the adversary out from before thy face, and will command destruction. "Jeshurun" is a poetic and affectionate name for the people of Israel. "Clouds of darkness" rather than "sky" or merely "clouds," because the root word has no reference to the dew or rain cloud, nor to the expanse of the heavens, but means "to pulverize," "to reduce to dust;" hence "dust clouds" or "clouds of darkness," the night of error.

Though mortal sense may build a wall
  High as its eyes can see,
To shut the light of heaven from
  Our pathway up to Thee;

The love that knoweth Thee as near
  Sees naught to hide Thy face,
And Thou dost know the trusting heart
  Whose life reflects Thy grace.

The Lord is always on the side of right.

ABRAHAM LINCOLN.

SELECTED ARTICLES.

[William Wirt in *Detroit* (Mich.) *Journal*.]

The writer, non-sectarian in his religious belief, has perused with much interest and with no little indignation the criticism of a clergyman anent a brother pastor, which appeared in yesterday's issue of the *Journal*, also the annexed unchristianlike attack upon Mrs. Mary Baker Eddy and her Christian Science definition of the Holy Scriptures. While it is plainly evident that religious intolerance and bigotry are on the wane, that we are becoming more and more charitable in our judgments of those with whom we differ, we are none the less sensitive to such virulent attacks, as is shown in the case alluded to. If Christianity (the Christian life) is obedience to the divine command, "Thou shalt love the Lord thy God with all thy heart, . . . and thy neighbor as thyself," and we practise the admonition in spirit and in truth, what matters it whether we designate ourselves Jew or Gentile, Protestant, Catholic, or Christian Scientist? Differ though we may in our conception of Christian Science as an exponent of pure and undefiled religion, it is hardly possible that the most ultra upholder of dogmatic faith will question the sincerity of Mrs. Eddy in her religious convictions, and the purity of her motive in spreading broadcast the same.

Like her detractor, Mrs. Eddy bases her convictions and teachings upon the words of Holy Writ; but unlike the former, she finds no cause to traduce those who fail to agree with her.

Whether or not Mrs. Eddy's interpretations of the Scriptures are true to the claims made for them, this deponent saith not. If the merits of Christian Science are as safely established as is the laudable personality of its author, as compared with those who would revile and persecute her, it is altogether probable that Christian Scientists will decide to go on in the even tenor of their way regardless of such trifling obstacles as have thus far endeavored to check their progress.

[William E. Brown in *San Diego* (Cal.) *Sun*.]

Christian Science is the religion of Jesus, and accomplishes its healing and redemptive work in the same manner and by the same method employed by Jesus and his disciples. It has nothing in common with psychology, hypnotism, autosuggestion, mental science, or any other agency of the human or carnal mind. One clergyman critic thinks that cures "belong in the province of the physician rather than the minister." This is rather a startling declaration for a Christian minister, whose Master healed the sick and instructed his followers to do likewise. It will not do to say that these instructions were for the disciples only, for Jesus commanded them, "Go ye therefore, and teach all nations, . . . teaching them to observe all things whatsoever I have commanded you."

While Christian Science teaches that all which is not of God is not real or permanent, it recognizes the fact that sin and disease are a part of this mortal experience and not to be ignored, but to be destroyed through an understanding of the allness of God. If sin and disease are real, then they must be of God, as He is the only creator; and if they are a part of His creation, then it would be futile to strive against them. Fortunately they are not of God, and are subject to destruction through a knowledge of the truth possessed by Jesus, who said: "I must be about my Father's business."

Our critic also misinterprets the Christian Science concept of the work of Jesus. It does not represent that he "came principally to introduce a method of healing disease." This is the very opposite of the Christian

Digitized by Google

Science view, which believes that Jesus came to redeem the world from ignorance and sin—the disease and suffering being a consequence of sin—and by the term sin is meant all disobedience of God's laws, whether ignorant or wilful. Christian Science can fully cure no one without healing him of sin, physical healing being the evidence that spiritual improvement is going on.

In regard to the Christian Science interpretation of the Bible with which our critic finds fault, it can be said that this interpretation enables its possessor to heal the sick as well as the sinful, thus fulfilling the measure of proof established by Jesus. "And these signs shall follow them that believe; . . . they shall lay hands on the sick, and they shall recover." If the healing of the sick is the proof of true belief, what is to be said of a belief that does not confer this ability? After all is said and done, it is very easy to criticize and find fault, but it is works that count, not words, and the Scriptural text is still operative, "Ye shall know them by their fruits" (not words). Paul said to the Corinthians, "And my speech and my preaching was not with enticing words of man's wisdom, but in demonstration of the Spirit and of power." "The tree is known by its fruit," and the fruits of Christian Science certainly prove its divine origin.

That which comes into the lives of sick and sinful humanity, cleansing them from all evil, restoring them to health and usefulness, and best of all, making them consecrated followers of Christ Jesus, can have only one source, and that is the very throne of God.

[John L. Rendall in *Ames* (Ia.) *Intelligencer.*]

Christian Scientists are gratified at the somewhat tardy recognition of the fact that Christian healing is an essential of the Christian religion, and this same recognition though tardy is a justification of the efforts which they have made during the past forty years. It is difficult, however, for a Christian Scientist to see wherein Christian Science needs a "corrective." Its affirmations and its denials are both emphatically Christian. Its teachings are logical, reasonable, convincing, and demonstrable. It denies the reality of sin, sickness, and death only in the same way that these are denied in the Bible, at the same time recognizing that, to the human sense of things and according to ordinary experience, these are very much of a reality, and as Mrs. Eddy has said in Science and Health, on page 460, "therefore to be dealt with through right apprehension of the truth of being."

Christian Scientists do not affirm any more concerning the infinite all-power of God to heal all manner of diseases than has been affirmed or declared in the Bible for thousands of years. The psalmist said, "He sent his word, and healed them, and delivered them from their destructions." Again he said, "Bless the Lord, . . . who healeth all thy diseases." It was stated of Jesus that he healed "all manner of disease among the people." It is therefore a teaching of Scripture that the healing power of God is not limited to any particular phase of disease, but on the other hand is absolutely unlimited, adequate and sufficient for every need. This is one of the teachings of Scripture that Christian Science emphasizes, and in this emphasis there is recognized the fact that, as St. James states, God is without variableness, "neither shadow of turning;" and as St. Paul states, "Jesus Christ the same yesterday, and to day, and for ever." If consistent endeavor to follow the Scriptural teaching is "extremism," then Christian Scientists must plead guilty. Christian Science includes all that which makes for spirituality, as opposed to the intense materialism of this age, and its recognized success is due to its consistency with truth.

[Charles K. Skinner in *Niles* (Mich.) *Daily Sun.*]

The attack of an Eastern clergyman upon Christian Scientists, must cause the dispassionate thinking reader to wonder how one claiming to be a follower of the Christ could be able to reconcile such statements with the teaching he professes to believe. The gentleman says he has "made careful study of the so-called Christian Science, because he loves the truth and seeks it." That there are those who cannot or will not understand the religion, does not change the fact that Christian Science has proved the right to this title in millions of instances.

Our reverend critic says he is "a Christian Scientist in the true definition of the term," as he "believes in both Christ and science." In his wonderful chapter on faith St. James said to some of the believers of his time, "Thou believest that there is one God; thou doest well: the devils also believe, and tremble. But wilt thou know, O vain man, that faith without works is dead?" How much does this minister "believe in Christ"? Jesus said plainly, "He that believeth on [understandeth] me, the works that I do shall he do also; and greater works than these shall he do; because I go unto my Father." Here, then, is the proof of "belief" laid down. Is our brother living up to his light and doing these works? If not, why malign those who are so doing?

The gentleman says he "believes in science in its true sense." The definition of "science," according to the dictionary authories, is, "Knowledge; that which knows." Then, logically speaking, Christian Science means knowledge of the Christ. Granting this statement to be true, is there any better proof of that knowledge than by doing the works that Christ did? What would be thought of the individual who would stand before an audience and assert, "I am a believer in mathematics," and still not be able to demonstrate the problems in its science, while berating others who are doing them?

One of the most pointed rebukes of the Master was given to John, when that worthy disciple came to him with the words—"We saw one casting out devils in thy name; and we forbade him, because he followeth not with us." The critics who are familiar with Jesus' reply certainly cannot find much encouragement to attack other Christians. He said, "Forbid him not: for he that is not against us is for us."

[J. V. Dittemore in *Poughkeepsie* (N. Y.) *Enterprise.*]

Christian Science declares that it is man's rightful heritage to have health, joy, and abundance; that he must have all that is good if he realizes and demonstrates his "sonship with the Father." All that enters into our human experience of an imperfect and discordant nature is the result of mortal ignorance, sin, or fear, and today as of old deliverance from these conditions can come only through that metaphysical process declared by the great Nazarene as knowing the truth. Christian Science has brought to hundreds of thousands of lives peace, health, and happiness, and these fruits are its sufficient justification.

[A. P. Cochran in *Iola* (Kan.) *Register.*]

Jesus of Nazareth was an honest man who had a perfect conception of the message that he was to deliver to the world, and in no case did he fail in the performance of this duty. He called the twelve and sent them out to spread the gospel of Truth that he brought. He called the "other seventy" and sent them on the same mission. His assurance to those who believed on him was, "The works that I do shall he do also," and that those who obeyed should have the same confirmation of their authority as he—"signs following." This continued for

Digitized by Google

nearly three hundred years, and both sacred and profane history confirms this, and points very clearly to the fact that at this time the attempt of men to satisfy their desires for place and power and circumstance resulted in the loss of the true concept of the spiritual import of Jesus' life and work. His instructions had been, "Preach the gospel to every creature," but the admonition, "Follow thou me," was forgotten, and the sick were not healed, the lepers were not cleansed, and the dead were not raised, simply and only for the reason that he who had pointed out the "way" was not obeyed.

Mrs. Eddy turned to God, good, in exactly the manner pointed out by the Master, "What things soever ye desire, when ye pray, believe that ye receive them, and ye shall have them," and she received the reward of health and an understanding of the Principle he declared and the method for its application to the lives of mankind. It was an unaccepted, an unknown, an undemonstrated truth, and she discovered it and made it known to the world by its demonstration in her own experience and that of those who came to her for help.

[Gray Montgomery in *Greeley* (Col.) *Sun.*]

Christian Scientists feel that they have won freedom from mental slavery. They have been healed of suffering, sickness, and misery through Christian Science. Their mental power and ability to judge clearly and rightly have been greatly improved. Prominent business men testify that their knowledge of Christian Science has enabled them to overcome fear, malice, hate, and dishonesty; to become masters of their business in place of slaves, and to accomplish greater and better success.

Christian Scientists have great respect and love for their Leader, who has been so good and pure that the truth has been unfolded to her, enabling her to discern a spiritual interpretation of the Bible which lifts the veil of mystery from its sacred pages and discloses the method which enabled Jesus and the prophets to do signs and wonders.—to heal the sick and raise the dead. The Christian Science text-book teaches the mental and spiritual process of Christian healing, and through its study and the application of its teaching many have been reformed, regenerated, and healed. There are many cases of disease pronounced malignant by physicians and recorded by health officers and boards of health as such, that have been healed by Christian Science. These people know that they are healed, because they now have no sense of disease; there is no more suffering, no more misery, but wholeness, holiness, harmony, joy, and satisfaction in the higher understanding of God's loving care and government which they have gained through the Science of Christianity.

[James Phelps in *Antigo* (Wis.) *Journal.*]

When our critic challenges Christian Scientists to swallow poison, he places himself on the same plane as the devil when he challenged Jesus to cast himself down from the pinnacle of the temple; and Christian Scientists are following the example of the Master when they decline the invitation. The promise reads, "If they drink any deadly thing, it shall not hurt them," and well authenticated cases are on record where Christian Science treatment has neutralized the effects of poison.

[Frederick Dixon in *Medical Times*, London, Eng.]

The critic's method of denial, apart from its discourtesy, is perilously like that of the Jews towards a certain blind man whom Jesus healed. First they suggested he had never been blind, and when they found they could not substantiate this, they fell back on the simplest form of repudiation, "they cast him out." Still out of the record of that dispute, the simple testimony of the man has come crushing down the centuries, "One thing I know, that whereas I was blind, now I see." The human mind, if I may adapt a phrase of Talleyrand's, seems to forget nothing and to learn nothing. Thousands of people who have been healed in Christian Science are daily being told that they were never sick, but they know better, and those who love them know better, and so there is thundering out today, from a million voices, the shout, "One thing we know, that whereas we were blind now we see." Now, in the historic phrase of Captain Bunsby, "the bearings of this observation lies in the application on it," and the application of it is this, that the Christian Scientist has every whit as reliable evidence of the truth of his hypotheses as the natural scientist has of his.

Christian Science maintains that the one eternal First Cause is that divine Mind, or Spirit, which in some form or another men worship as God. It deduces from this that all causation is spiritual, and that there is no real law consequently but God's law. It maintains that this was the teaching of Christ Jesus, and that he demonstrated in his ministry the variability and consequently the lawlessness of all so-called physical law. This is why Mrs. Eddy has written on page 170 of Science and Health, "Spiritual causation is the one question to be considered, for more than all others spiritual causation relates to human progress."

When the critic reaches the conclusion that physical bodies, whether as phenomena resulting from matter, or mortal consciousness, are real, he reaches the point where his philosophy is contradicted utterly by the teaching of Christian Science, and the question resolves itself into one of demonstration. What he means by implying that Christian Science teaches that matter "is spirit or will ultimately resolve itself into spirit," it is impossible to conceive. Every statement of Christian Science is indeed a categorical denial of any such suggestion. The suggestion is indeed the inevitable outcome of the theological dual contention that God created all things and that matter is real, and this is the point above all others at which Christian Science severs itself from orthodox theology, for, as the doctor says, "it places spirit in the hands of the chemist."

"The incarnation," writes Canon Scott Holland, "is the announcement that Spirit is the ultimate reality of matter." Mrs. Eddy writes, on page 171 of Science and Health, "No more sympathy exists between the flesh and Spirit than between Belial and Christ."

[Written for the *Sentinel.*]

MY HOME AND CHURCH.

AGNES FLORIDA CHALMERS.

THIS is my home,—the consciousness of good,
Filled with the love of all earth's brotherhood—
A quiet resting-place, safe and secure;
A home which hath foundations and is sure,

This is my church,—the consciousness of Life,
Wherein Love hath destroyed all hate and strife,—
The church that gently calls: Come unto me,
And ye shall know the truth that makes men free.

Father, all-wise, this home and church of mine,—
Teach me to see that they are gifts of Thine;
And may I know that every thought must be
Within my home and church,—a thought of Love—of Thee.

CHRISTIAN SCIENCE SENTINEL

EDITORIAL

MRS. EDDY TAKES NO PATIENTS.

The author of the Christian Science text-book takes no patients, and reads no letters on disease, distress, or error of any kind. Reliable news concerning Mrs. Eddy will be found in the Christian Science publications.

"WELL DONE."

It is the hope, we might almost say the ambition, of every Christian Scientist, no matter what his business or official duties may be, at some time to devote his entire time and energies to the practice of the healing work which our Master commended to his followers, and those who are able to realize this hope are indeed fortunate. It is with sincere pleasure, therefore, that upon his retirement from the two important offices which he has held and filled so faithfully and acceptably we extend to Mr. William B. Johnson our congratulations. During the nineteen years that Mr. Johnson has been Clerk of The First Church of Christ, Scientist, and the seventeen years that he has been a member of the Christian Science Board of Directors of that body, he has given the best of his efforts and abilities to the advancement of the Cause, which he will still continue to serve with equal loyalty and devotion, although in another capacity.

To be a Christian Scientist today is a much easier task than it was nineteen years ago, and those of us who have been called into service in later years must not forget the debt we owe to the faithful men and women who became followers of our Leader, Mrs. Eddy, when Christian Science was but little known and its advocates were looked upon with suspicion and treated with scant courtesy.

Mrs. Eddy drew to the standard of Christian Science in the early years of her ministry many splendid men and women upon whose loyalty to Christian Science she could depend for the advancement of her Cause and the upbuilding of her church, and of these Mr. Johnson is a conspicuous example. Those who have shared with him the privilege of official labor for the church, and thereby have had opportunity to know of his sterling qualities, tender him their loving good wishes for his success in the consecrated labor of Christian healing, to which he is returning in the prime of mature and vigorous manhood.

ARCHIBALD MCLELLAN.

DIVINELY IMPELLED.

In reading the Gospel accounts of the experiences of him who has rightly been called the great Exemplar, we see more and more clearly, as we advance in spiritual understanding, the significance of Mrs. Eddy's words, "Jesus spares us not one individual experience, if we follow his commands faithfully" (Science and Health, p. 26).

Christians in general have admitted that we should follow Christ Jesus, but it has remained for Christian Science to show us *why* and *how* we must do this. Humanly speaking, Jesus was born in the orthodox church of his time; when he was only eight days old he was taken up to the temple for the rite of circumcision and to be given his name. Again, we find him in the temple when he was twelve years of age, asking questions which astonished the learned doctors of the law. Later, when he had reached mature manhood, as measured by years, we find him listening to that great preacher of repentance, John the Baptist, who was practically outside the pale of the church. His acceptance of baptism at the hands of John was a virtual admission of the inadequacy of that church, which, with all its rites and ceremonies, was not fulfilling in the least Isaiah's prophecy, "All flesh shall see the salvation of God."

Immediately following this experience, we are told by Mark that Jesus was driven by the Spirit into the wilderness (Matthew and Luke say "led"), there to face the great problem of the ages, viz., to prove that man as a spiritual being has dominion over all things, and that he can prove the powerlessness of evil, under whatever guise it may present itself. Matthew, Mark, and Luke agree in telling us that after this great victory Jesus began at once his healing and redemptive work, which was never laid down until he was crucified by the church of his fathers for doing this work, and had vanquished death,—the "last enemy" to be "destroyed."

It is impossible to read the record of his achievements, especially when one is oppressed by sorrow or suffering, without feeling an ardent desire to share the blessings so freely bestowed upon all who would accept his ministry. Thus it comes that many are driven by the Spirit away from the creeds and dogmas which fail to measure up to the standard laid down by Christ Jesus, "He that believeth on me, the works that I do shall he do also." Happily, however, unnumbered thousands of these are finding in Christian Science that which is promised in the Gospels, and they are standing by the truth which has made them free, regardless of the ban of a short-sighted ecclesiasticism, based upon a materialistic interpretation of the Bible. The letter which follows is from one who has been set free in Christian Science, and it practically explains itself. It is addressed to a Methodist clergyman in Detroit, who took his stand for fairness and toleration, in a recent ministerial discussion in that city, and reads as follows:—

> Away off here in Philadelphia I have been reading of your attitude toward the plan of attack upon the Christian Science faith by the ministers in your section, as given in the *Detroit Journal*, and I cannot refrain from writing you to express my gratitude for your courageous stand for the Golden Rule and the inherited right of every individual to think and act according to the dictates of his own conscience. I am a Christian Scientist, and am such because Christian Science teaches just these fundamentals, as well as for the fact that in this teaching I found a God of love and a satisfactory explanation of the truth as taught by Christ Jesus. I was a hopeless invalid, with the grave in near prospect, when this "good news" came to me. I was healed in a very short time (after I had exhausted everything that *materia medica* had to offer), and for twelve years I have found God very near, very dear, and the truth an all-sufficient remedy for every physical as well as mental ill that has assailed me. I assure you it always makes me happy to find those who are willing to be fair, and broad enough not to condemn a neighbor for deviating from the long-established lines of theological thought.

Should not every sincere Christian, whether minister or layman, rejoice that such testimonies are possible today, and that thousands, divinely impelled to declare the power of Spirit over every phase of error, are giving them to the world in the Christian Science periodicals and weekly meetings.

ANNIE M. KNOTT.

WARPED WORLDLY WISDOM.

In a recent address before a gathering of physicians, one of America's foremost educators, while speaking of the requirements now laid upon the medical profession, is reported to have said: "Another combat to be urged is that of scientific progress toward new knowledge, not the supernatural but the natural way, and it is for the medical profession to give warning against the new superstitions. Knowledge is by observation, and scientific study is the kind required."

Digitized by Google

This statement was manifestly aimed at the effort to realize by non-material means the end and purpose of the medical profession. It is a seemingly fair and logical phrasing, but it fails to make any definite statement while bringing to thought a legion of intimations.

The plea for progress is always an appealing one, and the declaration that it can be realized only as "new knowledge" is gained would be passed as a mere matter of course were it not for the fact that the nature and source of the "knowledge" referred to raises instant question. That it is not the knowledge of God which Christ Jesus declared to be "life eternal," and upon which Mrs. Eddy has called all men to rely for the solution of human problems, is apparent, since it is to be secured in the "natural way," by which the speaker evidently meant the way of physical investigation and conformity to material law. It is not to come by way of revelation or spiritual perception, since these channels are evidently classed as "supernatural," or in other words, superstitious! Thus to exalt the testimony of material sense and count down and out all that spiritual intuition stands for, certainly does not witness to great breadth of view, nor does it honor many of the most inspiring facts of human history, and yet this is precisely what many Christian ministers, as well as Christian physicians and physicists, are doing. The assumption that physical science is the place "whence cometh wisdom," and that human sovereignty is dependent upon its expansion, is a colossal mistake which finds its antipode in the declaration of Christian Science that "Christianity and the Science which expounds it are based on spiritual understanding, and they supersede the so-called laws of matter" (Science and Health, p. 274). This is the parting of the ways, the place where Christian Science takes its unequivocal stand for "the wisdom that is from above," and teaches that a knowledge of spiritual things is essential to all real progress.

This was the distinctive feature of the words and works of the Master, as it is of Christian Science. In the removal of sickness and abnormity the true healing gives satisfying proofs of itself upon the plane of physical sense, though it is neither effected nor determined by material means. Its explanation is found in the destruction of error by Truth. All know that drug treatment does not and cannot reach the final cause of disease. Back of heredity, contagion, poisons, and all germ generation, multiplication, and transmission, there exists a cause which Christ Jesus named sin, and which Christian believers of every name have recognized. With this *materia medica* has nothing and can have nothing to do; it is the truth that Christ Jesus taught which has made and still makes men free from sin and all its effects. There is nothing supernatural or superstitious about the process by which Christian Science is healing the sick. It is normal and natural. It is in keeping with divine law, with Christian idealism, and with our Lord's teaching and practice. It should be known for what it is by every intelligent person, and when thus known it can but command the good will and endorsement of all philanthropists and truth lovers.

JOHN B. WILLIS.

LETTERS TO OUR LEADER.

Brookline, Mass., May 31, 1909.

Mrs. Mary Baker Eddy, Chestnut Hill, Mass.

Beloved Leader and Teacher:—My dearest earthly friend, I hereby lovingly inform you that I have this day tendered to The Christian Science Board of Directors of your dear church my resignation as Clerk, also as a member of that honorable body.

As I look backward through the nineteen years in which I have served in these capacities, and through memory recall the sweet associations connected with the duties of these offices,—most especially the opportunities which these duties gave me to see you and to talk with you and to receive from you the priceless instructions, the counsels, and the blessings,—my lips are mute. The heart only can know its gratitude to you, dear one.

It is twenty-five years since you taught me the way of Life. I shall now devote all my time to the practice of what you have taught me.

With tenderest affection,

Your loving student,

WILLIAM B. JOHNSON.

Reading, Pa., May 21, 1909.

Mrs. Mary Baker Eddy.

Dear Leader:—I received a letter from one of the officers of the Reading public library, saying that they would be glad to accept *The Christian Science Monitor*. We have also placed the *Monitor* in the Burks County Prison. I am deeply grateful for all the blessings I have received through Christian Science.

Yours lovingly,

REBECCA A. BEARD.

Brockton, Mass., May 14, 1909.

Mrs. Mary Baker Eddy, Brookline, Mass.

Beloved Leader:—Since I read the history of your life, written by Sybil Wilbur, I have wanted to write to you and tell you that I love you, and that I am grateful for all the good which Christian Science has brought into my life, and into the lives of so many suffering ones. I love to think that there is no woman in the world today so widely and so well beloved as you, who are the Discoverer and Founder of Christian Science. In my daily prayer I ask God to bless you in your pleasant home, and all the faithful ones who serve you there. Much that has happened to me of late has taught me how constant must be the effort to bring into captivity every thought in obedience to Christ, in order that I may be as you would have all your followers—obedient, loyal, and faithful in the work.

Yours with loving gratitude,

MRS. ANNIE L. STURTEVANT.

Brooklyn, N. Y., May 1, 1909.

Dear Mrs. Eddy:—When I turned to Christian Science for help and healing, it found me, like thousands of others, in a perfectly hopeless state of mind, believing that there was not anything on earth or in heaven which could relieve or heal a most aggravated form of hay-fever of eighteen years' standing, accompanied by a deep despondency well-nigh unbearable. To be freed and healed enables me to spend my time out of doors, to be in the country, and to take car and railroad trips during the months of August, September, and October, things which were utterly unheard of for me to do (unless I went to Europe) before I sought treatment in Christian Science. This healing has led me to the study of Christian Science, and the benefits, the spiritual unfolding received therefrom, are too numerous to mention. It has also removed the sense of fear, especially the various kinds of fear connected with my profession as an artist,—fear of non-success, of lack, etc.

I hope to prove my thankfulness by living and doing the things that I have been taught, recognizing the fact with unspeakable gratitude that it is your book, "Science and Health with Key to the Scriptures," which leads to the understanding of Truth.

Lovingly yours,

ROSALIE PALMIE.

Digitized by Google

Fresno, Cal., May 4, 1909.

Mrs. Mary Baker Eddy, Brookline, Mass.

Beloved Leader:—Today being the end of the term of office for the board of directors of First Church of Christ, Scientist, Fresno, Cal., elected for the year 1908–1909, we wish to express to you our deepest gratitude for the glorious understanding of God that has been revealed to us through your inspired work, "Science and Health with Key to the Scriptures," for through this understanding of God as divine Principle,—All,—we have been enabled to demonstrate the nothingness of evil. May we attest our sincerity by our lives, and profit by the example you have so nobly set before us, and may the peace that passeth all understanding be yours.

LENA PURDY CASHIN, *Clerk.*

Wilmington, Del., May 4, 1909.

Mrs. Mary Baker Eddy.

Beloved Leader:—We, the members of First Church of Christ, Scientist, of Wilmington, assembled in annual meeting, express to you our deep gratitude for having revealed to us this blessed truth of Christian Science. We earnestly desire, as a branch church, ever to present a harmonious unbroken front to the shafts of error, and we wish to express our obedience by unswerving loyalty to you and to the Cause.

With love and gratitude,

MARGARET H. KENT, *First Reader,*
G. HAROLD PIM, *Secretary,*
Committee.

London, England, April 10, 1909.

Beloved Leader:—Often have I longed to write and express my gratitude to you. Christian Science means everything to me, but I know how far I am from being a true Christian Scientist. Our text-book, Science and Health (p. 192), tells us: "We are not Christian Scientists until we leave all for Christ." May God bless you for all your pure self-sacrifice, and may He teach us all the lesson you would have us learn by it. I read and read again those beautiful words on page 3 of our text-book: "To understand God is the work of eternity, and demands absolute consecration of thought, energy, and desire."

Yours in deepest gratitude and love,

CHRISTINA DOUGLAS.

Union City, Mich., May 24, 1909.

Beloved Leader:—Gratitude being the key-note of our last mid-week meeting, our society expressed a wish to send a few words of appreciation to you for the many blessings which have come to us individually from our study of the Bible and Christian Science, in the light of "Science and Health with Key to the Scriptures." We know that as we reflect love we shall progress. In removing from a private residence to a hall of our own (April 11, 1909), the utmost harmony prevailed and divine Love met our every need. The promise, "Before they call, I will answer," was verified to us. Increasing interest has been shown, and Love is liberating thought in many new directions. Our wish is that we may be obedient, watchful, loving, and worthy of our high calling.

Most sincerely yours,

J. W. SPENCER,
MARY A. SPENCER,
LYDIA A. BUELL.

Berkeley, Cal., May 18, 1909.

Dear Mrs. Eddy:—The Christian Science Society in the University of California sends you loving greetings. It is with great joy and thankfulness to God, and to you our Leader, that we wish to tell you of the lecture given under the auspices of the society by Bicknell Young of Chicago. The audience numbered about fifteen hundred persons, and was most attentive and sympathetic. Through the loving, helpful thoughts of the students, alumni, and friends, not only was there poured in upon us at this time a supply sufficient to meet all the demands for our lecture, but enough remained over to enable us to send sixty dollars to the publishing house fund, to place the complete library edition of your works in the university library, and a small balance in the bank for the Society's use at the beginning of next year. We had also to send out word that no more money would be received, as we already had an oversupply. In great meekness and great might, may this society be ever found receiving and giving the word of truth.

Lovingly and obediently yours,

EMMA ALICE KREUTZER, *President,*
IRA F. THOMPSON, *Vice-President,*
KATE FELT, *Secretary.*

Kansas City, Mo., May 17, 1909.

Mrs. Mary Baker Eddy, Chestnut Hill, Mass.

Dear Leader:—Yesterday (Sunday) I attended Mr. Young's lecture in our great Convention Hall, which seats fifteen thousand, and I am sure I am within the truth in saying that two thirds of the chairs were occupied. I never enjoyed a lecture more. Each statement of the truth, as Mr. Young presented it, was so apparent to me. I thought many times during and since the lecture that every truth spoken must have been clearly understood by each one present. It was very clear to me that we were all of "one mind," and "with one accord in one place." As I dwelt upon these truths I was made conscious of the gratitude we should all manifest to you for the discovery of this great Life-principle, and for having led us to assimilate the truth.

It is now ten years since I first read Science and Health. I was then in a very discordant state and sick, but the reading of the book healed me. After studying it five months I dropped the medical practice, as physician and surgeon. This step seemed radical, but I can truthfully say that I have benefited in every way by the stand I have taken. We are told in Science and Health (p. 312), "Whatever is learned through material sense must be lost because such so-called knowledge is reversed by the spiritual facts of being in Science." Paul has said, "The wisdom of this world is foolishness with God." Again, we are told in Science and Health (p. 505), "Spiritual sense is the discernment of spiritual good." How apparent these truths have become in my experience. I hope I have not seriously encroached upon your time. I wish to thank you.

Yours in love and truth,

A. L. HUNT.

Williamsport, Pa., May 3, 1909.

Mrs. Mary Baker Eddy.

Beloved Leader:—We, the members of First Church of Christ, Scientist, of Williamsport, Pa., assembled in our fourth annual meeting, desire to express our heartfelt love and gratitude to you for your life of consecration and obedience to God, which has enabled you to lead us out of the wilderness of sin and sorrow into the "land of Christian Science" as set forth in your wonderful book, "Science and Health with Key to the Scriptures." Through this teaching we have been enabled to claim our unity with the Father, and this has in some measure given us the liberty of the children of God. Our desire at this time is to press forward humbly and obediently in the way marked out by Christ, Truth.

Lovingly and faithfully yours,

Members of First Church of Christ, Scientist, Williamsport, Pa.

THE LECTURES.

LOS ANGELES, CAL.

In introducing Prof. Hermann S. Hering, April 11, to an audience of five thousand people, at the Shrine Auditorium, G. M. Giffen, First Reader of Second Church of Christ, Scientist, said in part,—

The great Teacher of Galilee said, "Ye shall know the truth, and the truth shall make you free," proving his knowledge and demonstrating his teaching by walking on the wave, feeding the multitude, healing the sick, raising the dead. He further said, "He that believeth on me, . . . greater works than these shall he do; because I go unto my Father." The world is longing for some plan, some sane, logical way to overcome the poverty, grief, fear, sickness, and sin of daily experience, and witness the fulfilment of the promises of the Galilean Prophet. Through Mrs. Eddy's discovery, as a result of her consecrated searching of the Scriptures, the Science of Jesus' teaching has been given to the people of the present day, and the works of the Master are being, in a degree, emulated. Increasing numbers of earnest thinkers are being added daily to the vast army of those who advocate her teaching—Christian Science.—*Correspondence.*

RICHMOND (SURREY), ENGLAND.

The Castle Assembly room was none too large to accommodate all who crowded there on Thursday evening [April 15] to hear a lecture by Francis J. Fluno, M.D. (member of the Christian Science board of lectureship, Boston, Mass.). The chair was taken by B. Haworth-Booth, who said there appeared to be at the present time, among all Christians the world over, a feeling that we were about to know more about God and Christ than before. Christian Science had come on the scene, and reminded us that God was willing to help in time of need; it taught the Christianity that prevailed up to the time of the third century, when the healing of the body was a part of the Christianity of the day. Christian Science taught that what was possible then was possible now. The greatest Teacher the world had seen said, "Come unto me, all ye that labor and are heavy laden, and I will give you rest." He also came to bind up the broken-hearted, and to give "the garment of praise for the spirit of heaviness," and Christian Scientists believed that these things were true for this world. Forty years ago there was but one Christian Scientist, Mrs. Eddy; today there are tens of thousands.—*Richmond Times.*

NEW LONDON, CONN.

On Sunday afternoon, April 18, the Hon. Clarence A. Buskirk lectured for this church to a large audience in the Lyceum Theater. Judge Buskirk was introduced by Charles B. Jennings, superintendent of public schools, who said,—

The importance of denominationalism as such has long since passed. I am a Congregationalist because my good father and mother were, and that is reason enough. It is not what a man believes, but what he does and how he lives. The measure of a man's love to God is his love to his fellow-men. The good Book says, "He that loveth not his brother whom he hath seen, how can he love God whom he hath not seen?" Again, the first and greatest commandment is this, "Thou shalt love the Lord thy God with all thy heart, and with all thy soul, and with all thy strength, and with all thy mind; and thy neighbor as thyself." These two passages seem to me to epitomize the teaching of the Scriptures.

As I grow older I hope that I grow broader. It may be that the Lord, looking down even upon the poor heathen bowing down to his god of wood or stone, may say in His omniscience, If My Son Jesus Christ were preached to him, he would believe on him; therefore I will have mercy upon him and will save him. Within recent years a new branch of the Christian church has arisen.—the church of the Christian Scientists. They are all earnest, good, kind people, who are trying to the best of their ability to promote Christ's kingdom on earth. I feel nothing for them but kindness and respect.—*Correspondence.*

ENID, OKLA.

A large audience gathered at the Loewen Opera House April 26, to hear a lecture on Christian Science under the auspices of First Church of Christ, Scientist, by Frank H. Leonard of Brooklyn, N. Y. The speaker was introduced by W. B. Harrison, editor of the *Enid Eagle,* who said in part,—

Creed and dogma had little place in the life of Jesus. Strike from the record of his career the accounts of his good works, of his demonstrations of divine power and authority over sin, disease, and death, and you would have but the shadow remaining. When questioned as to his claim to be the Messiah, he answered by pointing to his works, not his words. Today, after nearly two thousand years of groping through the mazes of scholastic theology, the world and the churches are awakening to the fact that "faith without works is dead."

On every side we see evidences of the need of a new force, a force that will conquer, here and now, in this life, the myriad evils we are combating, as well as insure for us harmony in the life which is to come; and all of us, no matter what our denomination or creed, hope for the dawn of a brighter day, when truth and right will reign because mankind has been regenerated. Instinctively we feel that the teachings of Jesus contain the key to the desired reformation. How to apply those teachings in such a manner as to bring about the desired result is a problem to which thousands of the noblest men and women in many ages have devoted their best efforts. Christian Science comes to us with the proclamation that it has discovered the way out of all inharmony. At first this claim seemed vain indeed, and the world scoffed. The pillory and the stake had been abolished before Mrs. Eddy delivered her message to mankind, but the heated iron of derision and the vials of bitter denunciation were still available, and they were freely used. Today public thought is changing. As we rise in the measure of intelligence, we become more anxious for all good, no matter under what name or form it may appear.

Forty years of unparalleled growth in the number of its adherents,—a growth due primarily to direct benefits received in innumerable and indisputable cases of diseases healed, sin destroyed, and harmony restored,—back up the claim of this doctrine for a fair and impartial hearing. No one here tonight will urge you to accept this teaching, but if you knew something which you believed would be of incalculable benefit to all the world, you would deem it your duty as well as highest privilege to tell the world about it, and it is in this spirit that First Church of Christ, Scientist, of Enid, has invited you here this evening.

Correspondence.

NOTICE.

Children and young people who wish to be employed during summer vacation are requested to send their names and addresses to the Circulation Manager of *The Christian Science Monitor,* at Falmouth and St. Paul streets, Boston.

TESTIMONIES OF HEALING.

Progress is necessarily a comparative experience, and without frequent retrospective glances it is difficult to measure advancement along life's highway. Looking backward, for this reason, will not infrequently correct what appears to be impressions to the effect that the milestones are very far apart. The earnest traveler, however, with his goal ahead, must feel encouraged when now and again he looks behind him and observes far in the rear loads of care and trouble, the removal of which from his own shoulders proves that he is overcoming the world to the best of his increasing knowledge and understanding.

The writer of this testimony can bear earnest witness to the rejuvenating influence of Christian Science and its effect on the mental and physical phases of human environment. Only as a court of last appeal was Christian Science considered as of service to the healing which in my case was the all-absorbing question. It would be merely a repetition of thousands of preceding testimonies for me to state here that intense suffering, an agony of despair, hopeless resignation to a condition from which there appeared no promise of relief, constituted the multitudinous array of ills which from the standpoint of medical experience were to be borne with patience until release from material bondage, as the world understands it, should occur. How fortunate that in my case the thought finally took possession that no material remedies could bring me health and happiness. Before such a light dawns, it is true one may have to run the gamut of untold disappointments; all other avenues must be closed before the "straight and narrow way" is entered, but nothing else than fire refines the metal fit for use.

In the writing of this testimony it comes home with compelling force how reluctantly mankind acknowledge benefits bestowed. Over two years ago Christian Science was embraced, with the result that almost from the very start an improvement set in, both in the mental and physical condition; but the voice of expectancy, which is never to be confounded with the sublime quality which crowns hope, kept whispering month after month that the time had not arrived for making acknowledgment of the blessings which had come to me through the study of that most wonderful piece of literature, worth more than its weight in gold to every Scientist. Today, however, I can say with full confidence, and without fear of contradiction, that Science and Health contains within its pages that elixir of life and youth which history in its more fanciful moods speaks of as the goal of the peoples of the earth. To the man or woman who is earnestly seeking relief from physical disabilities, the reading of this volume brings an unfoldment like that which only the Book of books has within itself to supply to humanity. It is the spiritual interpretation which Mrs. Eddy brings to the Scriptures that makes of Science and Health the bread and wine,—a real substance, giving sustenance to body and soul alike.

By a curious circumstance I was brought into Christian Science through an avenue which usually regards *materia medica* as the only means for the restoration of health. All else having proved unavailing, the suggestion was made by one who was then following the profession of nursing, that Christian Science might afford relief. Having known for years about Christian Science, through my occupation as a writer for the press and magazines, I knew that, whether it should prove to be of benefit to me or not, those who professed adherence to its teachings had found here something with which no earthly riches could make them part. I was yet to find out for myself what constituted this precious possession. It was also to be learned, through many trials and temptations, that nothing worth while can be obtained except by working for it. I was living in Philadelphia at the time I was brought into contact with a Christian Scientist, and that first meeting stands out sharply against a background then beclouded and indistinct. Preceding my visit to the practitioner had been a stop at the drug-store, for the filling of another of the innumerable prescriptions which had borne my name during years of suffering. When informed by the practitioner that all medicines should be discontinued, in order that the healing truth might find no obstruction, it rather grated on me that such radical methods were to be initiated; but the move was made, and from that time, no matter if now and again error tried to whisper of other agencies as available, the road lay clear and glistening ahead, and in proportion to my fidelity to divine Principle have I been able to show results. Confidence was restored, and the promise that nothing can alienate our affections if such is our real desire, rose wonderfully from out the mist and sorrow.

Thus a new era began in the experience of one individual, who gives to Christian Science all the honor and glory which is its due in the case of this healing incident. With the advancement of the study and the mingling with Scientists, all of whom most lovingly aided in establishing the desired balance, it was revealed more and more why Christian Science has gained so many adherents, and why nothing can swerve them from following where its Discoverer and Founder leads. Patience and obedience, however, are prime essentials for the complete understanding which is the desire of all who become students in this school of divine education. The road may not always be smooth and level; lessons have to be taken to heart which run counter to all preconceived notions and traditional teaching; snarls of one's own making must be untwisted before consciousness is sufficiently receptive for the admission of the new and uplifting; all that is useless and retrogressive must be discarded before the soil is fit for the sowing of the spiritual idea. As a writer, with ambitions sufficiently gratified to aspire to continuous success in my chosen line, the chief grievance that came to me when sickness laid me low was the belief that henceforth my usefulness was at an end. The specialty to which I devoted my efforts had been, before my illness, a constant source of pleasure. Having traveled considerably, here was a field that I found profitable, but when the old resourcefulness no longer appeared, a condition of utter hopelessness took its place. For years my health had been indifferent, and the work which was taken up now and then, would be followed by periods of inactivity. Several severe attacks of illness occurred during the ten years before I entered Christian Science, so it was only occasionally that an article, which with extreme difficulty I had been able to make ready, would appear.

While I have stated that from the beginning an improvement set in, yet it is necessary to add that except for this retrospective examination it would appear as if my progress had been slow. Last spring, however, when removing to Madison, N. J., the opportunity came to hand for both much study and application. The Christian Science society of Madison had been formed but a short time before our advent in that beautiful locality, and the intimate association which sprang from that summer visit will linger as a memory of the most beautiful demonstration of what Scientists represent. The large churches of the cities are inspiring, when on Sundays and Wednesday evenings Christian Scientists gather for worship and genial companionship. The ties of love and labor that bind the members of the congregations, and invite all outsiders to partake, are wonderful instruments for healing and education, but enough cannot be said for the small circle of the village and the town. Perhaps but half a dozen meet in some room for the reading of the Lesson-Sermon, or maybe half a hundred are able to gather to-

Digitized by Google

gether for the study of the Bible as spiritually interpreted in Christian Science. Growing up in such an atmosphere, the young Scientist can realize something of what must have been the experience of Mrs. Eddy, who faced the foe single-handed, while slowly the faithful rallied to her support. I feel that the small community offers perhaps the greatest and the noblest opportunities for Christian Science work, as each new comer gains direct admittance to the best that the Scientists have in their possession, and growth in such surroundings is accumulative.

This testimony would be incomplete without stating that the work of regeneration has resulted in a return to the old field. Spiritually guided, the profession of writing now yields a larger recompense than when materialism held dominant sway. In the midst of what the world may term excitement and strivings for supremacy, I no longer see the greed for gold or mad ambition in the eyes of men, but look beneath the surface for that spark which all humankind has in common. We have but to search deep enough, with real affection as the probe, and beyond the shadow of a doubt loving response rises to the surface, because nothing can resist the influence of love. I have had wonderful demonstrations touching the efficacy of kindness as a means to gain some point essential to my work. The financial district of New York is replete with opportunities for Christian Scientists to sow the seed of good will. Here, as everywhere, "Life, Truth, Love" is the open sesame, and none can resist the triune idea, because it is all-embracing and supersedes everything.

I join the thousands of Christian Scientists in expressing gratitude for what Mrs. Eddy has brought to the world; but as health is regained, as hope and future happiness loom large and clear, there must come to every Scientist the command to go forth and show others the way that the one-time hopeless individual had to seek out, either by himself or through another's guidance. It is only when conscience whispers, "Now you must prove your gratitude," that we speak words which heal the sick and reform the sinner. Not before this occurs are we ready to prove in a practical way that we have been healed by Christian Science. Progressive as is the study of Christian Science, each student adds to his own happiness and usefulness when he puts self aside and finds his own chief joy in supplying his brother's need. The harvest is indeed plentiful, and no laborer is refused when he offers to lend a hand.—JULIUS MORITZEN, New York, N. Y.

[Translated from the German.]

It is with a heart overflowing with gratitude that I give this testimony. When, a year and a half ago, I first heard of Christian Science, I was in a very miserable state, both mentally and physically. By great changes of fortune I had been deprived of all that in former times constituted my happiness; I felt lonely, depressed, and discouraged, weary with seeking in vain for long years a satisfactory solution of the problem of life, for as it appeared to me then, I could not find it worth living at all. As to my health, I had been suffering for more than thirty years from a large growth, for the extirpation of which I had undergone five very dangerous operations. Four of them only gave relief for a short time, and the last one was without any good result. In addition to this I was greatly troubled by constant pain in my feet. After having tried many different kinds of treatment, there was but little improvement, and I was compelled to wear iron soles in my boots.

This was my condition when Christian Science came into my life. The first service I attended in a Christian Science church made a deep impression on me, and I at once procured a copy of the text-book and of the *Herold* and began to read. Though I had but little understanding, I felt convinced that Christian Science is the way long looked for, and that it would lead me into health and harmony. I then called upon a practitioner and asked for help, and from that very day all began to change for me. My healing was not instantaneous, nor quick, and I often felt discouraged; but the kind practitioner never tired in lifting up my thought and understanding, and before a year had passed I was delivered from all my sufferings. I found myself happy and strong, and looking forward to a life spent with God.

The trouble, distress, and sorrow of former times have vanished as realities from my consciousness. I now know that God is with me, that He takes care of me, and that I have all help and needed supply so long as I trust in Him and cling to the truth of being which dear Mrs. Eddy has discovered and restored to us by her selfless love and life. I thank God every day for His love and protection wherever I go. I am also grateful to our revered Leader, and it is my fervent desire to prove my deep gratitude by living in obedience to God, that some day I may be deemed worthy to work in the vineyard of the Lord.

FRAU DR. GORITZ, Dresden, Germany.

It is now about three years since I was healed in Christian Science. A few years ago I broke down with a severe nervous affection, besides stomach and bowel trouble. For three long years I was unable to teach music. Then I made the acquaintance of a Christian Scientist, and had a few months' treatment. I improved very much, but I was not healed until I had a copy of Science and Health lent to me by a very dear friend, who came to see me and explained the unreality of sickness and how God never made sickness or sin. In a few days I was able to go out evenings, a thing I had not done for a long time without suffering. I continued to gain steadily, and now I can say that I never was so well as I am at the present time, thanks to our Leader, who has shown us the way in her book, "Science and Health with Key to the Scriptures."

LAVINIA E. RHODES, Attleboro, Mass.

When I first heard of Christian Science, I was a great sufferer from neuralgic and catarrhal trouble, from which I had suffered for several years. I began to read Science and Health through curiosity, but soon became much interested in its teachings, and before long I discovered that the headaches to which I had been subject were being healed. After reading this book a short time I decided to throw away the medicine I had been taking, and to rely on God for healing. At that time the way seemed dark, as all the other members of my family were very much opposed to Christian Science, it having been greatly misrepresented to them, and I was forbidden to attend Christian Science services. However, as I pressed on, I was enabled to secure a copy of Science and Health for myself, and through faithful study of this wonderful book, and attendance at the church services when I could, I was healed of the troubles mentioned, and have been enjoying constantly better health ever since. It is now over six years since I first decided to rely entirely on God for all my healing, and I have not during that time had even a day's sickness, although many forms of disease have been overcome by the truth before any one else knew they had claimed my attention.

While I am very grateful indeed for my healing, it seems a very small part of the blessing of Christian Science. The sense of protection provided by a loving heavenly Father, the illumination of our beloved Bible, the new world of spiritual reality opened before me,—these are some of the things for which I desire to thank our dear Leader, Mrs. Eddy, with a heart full of gratitude. I am

Digitized by Google

indeed thankful to God for leading me from darkness to light, and I can truly say that "each successive stage of experience unfolds new views of divine goodness and love" (Science and Health, p. 66).

MISS THESTER A. MCCLENNAN, Peterboro, Ont.

To tell in this testimony all that the study of Christian Science has done for me would be impossible. I had never been very strong, either as a child or young woman; had with great frequency attacks of neuralgic and throat trouble, severe headaches, colds and coughs. I was in a condition that made it difficult to perform my duties as wife and mother. I was under a doctor's care a good part of the time, although I always had physicians who stood high in their profession, and who, I am quite sure, were earnest in their efforts to help me. I listened with much curiosity and interest to what my friends told me Christian Science had done for them, but did not think of it for myself, though I so greatly needed help, until my eyes, which I was using constantly, became seriously affected.

When my physician told me to go to an oculist at once, and I knew that his first direction would be to give the eyes entire rest, I decided to try Christian Science. I did this without the knowledge of any of my family, and was just a little ashamed of it. The shame should have been felt when after a very speedy recovery I did not continue to have Christian Science treatment for other ailments, and I cannot now understand, after ten years of absolute reliance upon it, during which it has met my needs both physical and mental, why I delayed two years before having another treatment. This second time I was in a miserable condition, had been under a physician's care a long time, and as a climax to a long winter of pain and sickness, had a badly swollen foot, which grew worse despite the medical care given it. After three weeks of pain and anxiety, for I was apprehensive of blood-poisoning, my husband suggested that I try Christian Science treatment. I had not worn a shoe for three weeks, nor been able to walk except with crutches. After three days' treatment in Christian Science I was entirely well, and since that time I have had no medicine of any kind. Best of all, a desire to know the reason for this healing was then awakened, and the study has been constant. Each day brings some helpful experience, and while I feel that I am only in the a-b-c of this wonderful knowledge, the results seem to be out of all proportion to the work I do, and I am filled with wonder and gratitude. I am a picture of health, and am never tired, no matter what the duties are that devolve upon me. If problems present themselves, they are solved when I am faithful to the teaching of Christian Science.

Enough could not be said in praise of Mrs. Eddy's efforts on our behalf, and I hope my own life and works may attest the value I put upon her teachings.

CHARLOTTE SARGENT SMITH, Chicago, Ill.

Christian Science has done so much for us that I feel more gratitude than I can put into words. In our family of five we have used no medicine but Christian Science for about twelve years. In January, 1907, our youngest son was taken with a severe fever. For the first few days I treated him myself, but as he did not improve we sent for a practitioner. To mortal sense he was a very sick child, and while the demonstration was seemingly slow, every mortal mind law was met so completely that when he commenced to mend he gained very rapidly, and in a comparatively short time he was entirely well and has remained so.

I was taken with the same fever about a year later, and sent at once for the practitioner. I was in bed only one day, and for about ten days I would lie down several times during the day, but all the time I did the cooking for a family of five and ate my own meals regularly. In about four weeks I walked one and a half miles to church and back again. During the Christmas holidays one of our boys injured his knee very badly. He pushed the bone back into place, but could not use the limb or bear the least weight on it. This was on Sunday, and he hopped around on one foot with the help of a stick till Tuesday, when we asked for help in Christian Science. Thursday he walked half a mile and played ball, and the following Monday walked a mile and a half to school and came home to his dinner. He did not lose a day on account of his knee.

Is it any wonder I am grateful for Christian Science? Especially am I grateful to our Leader, Mrs. Eddy, for showing us the way.

MRS. LULU M. MCVICAR, Alpena, Mich.

To illustrate the benefit one receives from defending the truth or from agreeing heartily with its defense, I will tell of my own healing. I had been a sufferer from chronic throat trouble before taking up Christian Science, and afterward the attacks gradually diminished both in frequency and severity, but after an exposure to extreme cold I suffered the most severe attack I had yet experienced. Others failed to help me, and I was almost overcome with fear and nearly discouraged when I received the *Sentinel* of Dec. 19, 1901, which contained an account of the legal proceedings of Rex *vs.* Lewis. The whole account was read to me, and I was so overjoyed at Truth's victory that I entirely forgot my trouble. When I remembered later, I found that it had completely disappeared, and there has never been even a suggestion of its return.

MRS. CORDELIA A. FELKER, Burlington, Ia.

After studying Christian Science for nearly three years, I feel compelled to tell a little of my experience with our literature. At about the age of nineteen I was attacked with what the doctors called tubercular disease. I suffered four years from this plague and exhausted all material remedies that I thought could possibly help me, besides traveling over a good part of the United States. It was after I had made my third trip to Colorado from West Virginia, that I became really interested in Christian Science. I was then in Denver, Col., and no one who has not had some experience in Christian Science can know the change of thought and the freedom which it brought to me. With even a slight understanding of this truth I began to realize something of the meaning of the Scripture promises, and when I look back I can see clearly that all diseases are mental.

My healing has been for the most part a gradual overcoming of the complaints mentioned. I had four weeks' treatment over three years ago, during which time I was completely healed of bowel and heart trouble, and also of the tobacco habit, though later on I took up the filthy habit and smoked the weed for a year or more. The annoying cough gradually disappeared as I got more light from the study of the Lesson-Sermons and our other literature.

I have also had very beautiful demonstrations along the financial line since I began the study of this truth I know that poverty is a form of disease, and that it has its origin in fear the same as any disease. This I have demonstrated to my own satisfaction. I send this testimony with the prayer that if there are any as miserable as I was this may reach them. Christ Jesus said, "Lay not up for yourselves treasures upon earth, where moth and rust doth corrupt, and where thieves break through and steal. . . . but seek ye first the kingdom of God, and his righteousness; and all these things shall be added unto you." Christian

Digitized by Google

Scientists are realizing these things as facts in their daily lives. With deepest gratitude to the friend of humanity, Rev. Mary Baker Eddy, I give this testimony.

W. T. JOHNSON, Stratton, Col.

Words cannot express my deep feeling of gratitude for the many blessings I have received in various ways through Christian Science, and I am glad to give a testimony to the healing power of Truth. Last spring my little son was taken ill with acute lung trouble. I did all I could for him, but during the second night he seemed so much worse that at twelve o'clock I telephoned for my mother, who is a Christian Science practitioner. From that time he rested easier and slept a little. The next night I was compelled to call her again at one o'clock. The next two nights she came and stayed with him, and in one week from that time he was playing in the yard. Another case of healing was that of my baby, who had a serious attack of illness. My neighbors remarked that it was wonderful how good he was during the time. One would not have known there was anything wrong, only by the appearance of his neck. My husband was also healed of throat trouble, to which he had been subject for years. Our five children have never taken any medicine.

I am very grateful to God, also to Mrs. Eddy, for this wonderful Science.—MRS. MARY BELL, Altoona, Pa.

Having recently become a member of First Church of Christ, Scientist, in Corona, and with a deep appreciation of the manifold blessings I have received, I desire to contribute my testimony for the benefit of those who may be fettered with some of the countless ills to which mortals have too long believed themselves heirs. Some time ago a much esteemed friend brought several copies of the *Christian Science Sentinel* to my home, and the pleasure that I have derived from them alone is worth many times their price. She also brought me a copy of "Science and Health with Key to the Scriptures" by Mrs. Eddy, which unlocked for me the door, and let me in to the spiritual "home of the soul" (harmony). Through the perusal of the text-book, what formerly seemed the mysteries of the Bible are being made clear. With the ever-ready help of a friend who is also a Christian Science practitioner, those dear to me have found freedom from ills of long standing. I myself have been made freer from periodical bilious attacks, and a sense of exhaustion which prevented me from shopping or walking even short distances without extreme fatigue.

To Christian Science is due the amicable settlement of an apparent injustice; and it has brought other blessings too numerous to mention. Christian Science teaches that health and happiness is our rightful portion. "Seek ye first the kingdom of God, and his righteousness; and all these things shall be added unto you.

MRS. M. L. PEACH, Corona, Cal.

In 1890 I first heard of Christian Science, and I now wish to express gratitude for all it has done and is continually doing for me. I am thankful to God, and to Mrs. Eddy, for the wonderful truth contained in Science and Health, a "Key to the Scriptures" which has opened up to me that sacred volume, for I never before understood the Bible as I do now.

For many years I was in a miserable condition of health, often suffering intensely from stomach and bowel trouble, together with great nervousness, weakness, etc. I immediately felt the beauty of Christian Science, though my healing was somewhat protracted. When the road has seemed rough, this passage from Isaiah has helped me most wonderfully: "Thou wilt keep him in perfect peace, whose mind is stayed on thee: because he trusteth in thee." I am sincerely grateful to God for this beautiful teaching, and to the dear Founder of Christian Science, whose daily life is an example for all, and an inspiration to follow in her steps as she follows Christ.

JANE S. MCDONALD, Grand Forks, N. Dak.

I give my testimony in the hope that it will help some others who are suffering as I have suffered. About a year and a half ago I was suffering with severe stomach trouble. Having consulted some of the best physicians, and getting only temporary relief, I at last despaired of ever being well. As my case called for special attention, I was lectured upon before a number of medical doctors, students, etc., and they all failed to reach a definite understanding of my case.

I am glad to say that I was led through the persuasion of a dear friend to try Christian Science, and that I have been perfectly healed. When I began the treatments I was much reduced in weight, but my present weight indicates perfect health. Best of all, I am now free from all ailments. I most earnestly desire that I may gain more of the spiritual understanding. I am thankful to God, and to Mrs. Eddy, for these wonderful results.

A. D. FARSEL, Atlantic City, N. J.

With gratitude for all benefits received in Christian Science I give my testimony, hoping it may interest some one in this healing truth. When I became interested in Christian Science it was through the sincerity and happiness reflected in the daily life of a friend, and the practical knowledge I received in answer to questions concerning problems which had never been solved under the old thought. During the past winter I was taken very ill with what doctors would consider serious lung trouble. I applied to a practitioner for help in the afternoon, and went back to my work the next morning—healed. Again, through an accident I received a very severe injury, and for a week I tried to help myself with the little knowledge of Christian Science which I had, but one evening while out with friends, I was unable to walk without great pain. This was, however, met in one treatment, and I went home perfectly free. I have had numerous proofs of the healing efficacy of this truth, and words are inadequate to express my gratitude to God, and to the channel through which this truth has come.

I am also very grateful for the sunshine, the love, and the spiritual uplifting which have come into my daily life through the study of Science and Health, the Lesson-Sermons, the *Sentinel* and *Journal*. I wish to know and to live more of this truth, as brought to this age through our beloved Leader, the truth which is redeeming the world from sin and disease.

GORDON E. MUSSELMAN, London, Can.

[Written for the *Sentinel*.]

THE PATH OF JOY.

ISLA V. PASCHAL.

WITH eagerness he sought the path of joy.
With weariness he trod the road of pain!
And finding, where he sought the flower of peace,
The weeds of fear, he thought his search was vain.

Soul-weary grown, he chose the path to Truth.
He found a land sweet-scented. 'Round him lay
The wondrous flowers of peace. He learned at last
The path of joy is found no other way!

FROM OUR EXCHANGES.

[*Congregationalist and Christian World.*]

How is Christian unity coming and what will it be? It is nearly always anticipated as one organization based on one declaration of belief. The main efforts to bring in Christian unity are in the direction of adjusting differences of ecclesiastical government and of formulating a single creed that all Christians may be willing to sign. We do not see any real progress toward union along either of these paths. The only Christian unity that is coming, so far as we can see, is that which depends on a common attitude toward Jesus Christ of believers in him. That was the unity of primitive Christians. Church government and creeds vary in different times and countries and according to inherited ideas and degrees of education. Loyal devotion to Jesus Christ is everywhere the same among his disciples. It may be, therefore, that Christian unity is nearer than we have supposed; and some new and adequate expression of it that will impress the world may be at hand.

[Prof. H. H. Barber in *Christian Register.*]

The disciple is not only to believe rightly, but also to act worthily. It is not enough to admire and adore the perfection of God: he must himself strive to be perfect as his Father in heaven is perfect. It is not enough to love Christ: the disciple must keep his commandments, and live in the spirit of his life. It is not enough to pray for forgiveness: we must ourselves forgive our enemies, or our prayer avails not. It does not suffice to sow the seeds of virtuous principles, and tend them in the growth of high ideals and the beautiful blossoming of lofty sentiments: they must bear fruit. Christianity never lets go its hold on practical life. There are systems of philosophy, possibly there are systems of theology, which may be consistently held as theories only; but no Christian belief is adequate or worthy which does not make character nobler and life more serviceful and complete.

[*Christian Life*, London.]

In religion, nicety of creed is not elevation of sentiment; enthusiastic fervor of emotion is not elevation of sentiment; occupation in ceremonial forms is not elevation of sentiment; abstraction from the concerns of life is not elevation of sentiment. It is the progressive attainment of universal knowledge, the feeling of universal sympathy, the exercise of universal love. That is the true rising of the soul above the world, which draws the world itself upward and onward too. In manners, society, politics, morals, in all the affairs of life, all the world over, real elevation, real aspiration after the things which are above, must be found in the simplicity of wisdom and benevolence—living in love, which is to live in God and be in heaven already.

[Canon Henson of England, in Church Congress, Boston.]

There is in the world a force superior to man, yet kindred with him, which wins his free allegiance and transforms him visibly. The Holy Spirit of God has been active in the world since men were; humanity is unthinkable apart from His influence. Every religion worthy the name is His organ, addressing itself to the conscience, reordering and exalting conduct, making men, under whatever descriptions they may pass, "friends of God and prophets."

[*New-Church Messenger.*]

Heaven's blessings press upon us on all sides like the very atmospheres, but they can come into one only as some act appropriates them.

SPECIAL ANNOUNCEMENTS.

FROM THE PUBLISHER OF MRS. EDDY'S WORKS.

THE CHRISTIAN SCIENCE TEXT-BOOK, "SCIENCE AND HEALTH WITH KEY TO THE SCRIPTURES."—This work contains many important changes and additions by the author, and also contains a photogravure portrait of Mrs. Eddy, together with a facsimile of her signature.

SOME OF MRS. EDDY'S WRITINGS IN NEW BINDINGS.—One volume containing Unity of Good, Rudimental Divine Science, No and Yes, Retrospection and Introspection; a second volume containing Christian Healing, The People's Idea of God, Pulpit and Press, Christian Science *versus* Pantheism, and the Messages of 1900, 1901, and 1902. These volumes are printed from new plates and are uniform in size with the pocket edition of Science and Health. Bound in morocco, limp, round corners, gilt edges, heavy Oxford India Bible paper. The prices of these books prepaid are as follows: single copy, $3.50; six or more copies of either volume to one address, each $3.25.

THE CHURCH MANUAL.—Containing all the By-laws of The Mother Church, The First Church of Christ, Scientist, in Boston, Mass. Each new edition of the Manual will have special notice in the *Sentinel*. Price, single copy, prepaid, $1; six copies to one address, $5; twelve copies to one address, $9.

Attention is called to the Library Edition of Mrs. Eddy's works, description and prices of which will be found on the outside cover page of the *Sentinel*.

Address all orders for books named above to ALLISON V. STEWART, Falmouth and St. Paul Streets, Boston, Mass.

FROM THE CLERK OF THE MOTHER CHURCH.

CHURCH TENETS.—The tenets of The First Church of Christ, Scientist,—The Mother Church,—printed on folded sheet for the use of Branch Churches of Christ, Scientist, with space for the names of churches and their by-laws, can be had at seventy-five cents per hundred.

Not less than one hundred are sold. Postage stamps are not taken for payment.

MEMBERSHIP.—Correspondence relating to membership with The Mother Church, and requests for blank applications for membership, should be addressed to the Clerk.

All correspondence and orders relative to the above should be sent to WILLIAM B. JOHNSON, Clerk, The First Church of Christ, Scientist, Falmouth, Norway, and St. Paul Streets, Boston, Mass.

FROM THE CHURCH TREASURER.

PER CAPITA TAXES.—Per Capita Taxes and Contributions to The Mother Church, The First Church of Christ, Scientist, in Boston, Mass., should be sent to the Treasurer. Please do not send currency.

Remittances for the above should be sent to STEPHEN A. CHASE, Treasurer, Box 56, Fall River, Mass.

FROM THE SOCIETY.

Attention is called to the announcement over our Leader's signature, which appeared in the *Sentinel* of Jan. 9, to the effect that Christian Scientists in the field who send four subscriptions to the *Monitor* for one year, will receive their own paper gratuitously.

The Publishing Society has in stock a number of copies of *Sentinel* No. 6, Vol. IX., containing the article "What Our Leader Says" as last published. As this article is of abiding interest and value to the Field the Society will be glad to supply it, postpaid, at the following prices: 1 copy, 5 cents; 5 copies, 15 cents; 10 copies, 25 cents; 25 copies, 50 cents; 50 copies, 85 cents; 100 copies, $1.50.

On foreign orders add 2 cents a copy to cover postage.

The supply of *Sentinel*, Vol. IX., No. 14, is exhausted.

Digitized by Google

THE CHRISTIAN SCIENCE JOURNAL

FOUNDED APRIL, 1883, BY THE AUTHOR OF "SCIENCE AND HEALTH WITH KEY TO THE SCRIPTURES," MARY BAKER EDDY, DISCOVERER AND FOUNDER OF CHRISTIAN SCIENCE

This monthly Magazine is the official organ of The First Church of Christ, Scientist, in Boston, Massachusetts, and correctly represents the Christian Science Movement. It contains interesting discussions of the teaching and the practice of Christian Science, and in addition to dissertations, lectures, and contributed articles, publishes always a number of reports from cases of spiritual and physical healing, which practically illustrate the redemptive work of Christian Science.

TERMS OF SUBSCRIPTION: Single copy, one year, $2.00. Quantities TO ONE ADDRESS: ten or more, each, $1.90; twenty-five or more, each, $1.80; fifty or more, each, $1.60. These rates apply in the United States, Canada, Mexico, and Cuba. In all other countries add forty cents for postage on each subscription. Six months' subscriptions received at half the above rates. No subscriptions received for less than six months.

TERMS OF SALE: Postpaid to any address: Per copy, twenty cents. Quantities TO ONE ADDRESS: ten copies, $1.70; twenty-five copies, $4.00; fifty copies, $7.00; in the United States, Canada, Mexico, or Cuba. To all other countries, per copy, twenty-five cents. Quantities TO ONE ADDRESS: ten copies, $2.10; twenty-five copies, $5.00; fifty copies, $9.00.

BOUND VOLUMES: Current year and two years previous, cloth, $2.50; half calf or half morocco, $3.00. On earlier volumes write for prices.

THE CHRISTIAN SCIENCE MONITOR

Published every afternoon except Sunday

A daily newspaper for the home. Adequate news service. The various departments of a modern newspaper. Unique home forum page. Entire page of editorials dealing with the vital topics of the day. Contributions for the columns of the MONITOR should be addressed, Managing Editor, THE CHRISTIAN SCIENCE MONITOR.

SUBSCRIPTION PRICE: For the United States (except in the Boston Postal District), Canada, Mexico, and Cuba, $5.00 a year, $3.00 for six months; all other countries, $8.00 a year, $4.50 for six months, postpaid. When delivered by carrier through a local news-dealer, 12 cents a week payable to the news-dealer. In the Boston Postal District, by mail, $7.25 a year.

The Christian Science Quarterly

Published January, April, July, and October

Contains the Lesson-Sermons which are read at the Sunday Services throughout the year in all the Christian Science churches. These Lessons, which present citations from the Bible and "Science and Health with Key to the Scriptures," are valuable for daily study.

TERMS OF SUBSCRIPTION: For one year, 50 cents; fifty copies or more to one address, 50 cents yearly for each copy. Foreign subscriptions, 60 cents. Yearly subscriptions only received.

TERMS OF SALE: One or more copies, postage paid, each, 15 cents; fifty copies or more to one address, each 12½ cents, postage paid.

Der Herold der Christian Science

Published Monthly.

A magazine printed in German, which publishes original and translated articles bearing upon Christian Science, and also testimonies of healing from Germany and America. It contains about thirty-eight pages of such reading matter, also the Lesson-Sermons which are read at the Sunday services in all the Christian Science churches, and is valuable as an authorized representative of the movement.

SUBSCRIPTION PRICE: For the United States, Canada, Mexico, and Cuba, 10 cents a copy, $1.00 a year in advance; all other countries, 12 cents a copy, $1.25 a year, postpaid.

BIBLES. Clarendon Brevier (01483 x), heavy faced, very distinct type, Turkey morocco, size 6 1-2 x 4 3-8 inches, corresponding in size and binding to pocket edition of Science and Health. Price, $3.75.

Morocco cases, to hold pocket Science and Health and above Bible, may be had at $1.25.

Text Bible. (01561 x), plea square type, Alaska seal, size 7 1-2 x 6 1-4 inches, 1 1-2 inches thick. Specially adapted for use of Second Readers. Price, $7.25.

CHRISTIAN SCIENCE AND LEGISLATION. A pamphlet of one hundred and twelve pages, containing articles by JUDGE CLIFFORD P. SMITH, EDWARD A. KIMBALL, and JUDGE SEPTIMUS J. HANNA, together with testimonies of healing, editorial comments, etc. Single copies, 10 cents; twelve copies to one address, $1.00; twenty-five copies, $1.85; fifty copies, $3.50.

QUARTERLY COVERS, in black seal leather. Regular size, 5 1-4 x 7 3-4, $1.25 each or $12.50 a dozen. Pocket size, 4 1-2 x 6 1-2, $1.15 each or $11.00 a dozen.

QUARTERLY COVERS WITH CHANGE POCKETS.—Regular size, $1.50 each or $15.00 a dozen. Pocket size, $1.40 each or $14.00 a dozen.

THE MOTHER CHURCH. By JOSEPH ARMSTRONG. A History of the Building of The Mother Church, The First Church of Christ, Scientist, in Boston, Mass. One hundred and three pages. Illustrated. One copy, $1.50; six copies, $7.00; twelve copies, $12.00.

PICTURE OF THE MOTHER CHURCH. A half-tone reproduction, size 12 x 15 inches, mounted on a white mat 21 x 25 inches. Single copies, 50 cents; a dozen copies to one address, $4.50.

SOUVENIR POST CARDS, showing picture of The Mother Church, 25 cents per dozen.

THE CHRISTIAN SCIENCE HYMNAL. Cloth, per copy, prepaid, $1.15 each; per dozen, $9.00; per half dozen, $5.00. Half morocco, per copy, prepaid, $1.40 each; per dozen, $12.00; per half dozen, $6.50. Full morocco, $2.50 each. Levant, $3.50 each. Pocket Edition, size 4 5-8 x 6 5-8. Full morocco. Per copy, prepaid, $3.00; twelve or more copies to one address, prepaid, each, $2.50.

MUSIC. Poems written by MARY BAKER EDDY and used by special permission, have been set to music, as follows:

"THE MOTHER'S EVENING PRAYER." By William Lyman Johnson. The arrangement for both high and low voice in the same copy. 75 cents the copy; $7.00 the dozen.

"CHRIST MY REFUGE." By William Lyman Johnson. Arrangement for high and low voice in same copy. 75 cents the copy; $7.00 the dozen.

COMMUNION HYMN.—"SAW YE MY SAVIOUR?" By William Lyman Johnson. Published in two keys for high and low voice. 50 cents the copy; $5.00 the dozen.

"BLEST CHRISTMAS MORN." By Frederick W. Root. Published in two keys, for high and low voice. 27 cents the copy; $2.75 the dozen.

"O'ER WAITING HARPSTRINGS OF THE MIND." By Frederick W. Root. Published in two keys for high and low voice. 27 cents the copy; $2.75 the dozen.

Please state when ordering any of the three last named whether high or low key is desired.

Our Catalogue for 1909, containing description and prices of above named literature and a selected list of Bibles, will be mailed free on application.

Remittances should be made by check, post-office money order, express money order, or exchange on Boston or New York. Currency or coin should not be sent by mail unless registered. Please send no money remittances or business letters to the Editor or Editorial Department.

Works on Christian Science

Written by MARY BAKER EDDY, Founder of Christian Science and Author of its Text-book

SCIENCE AND HEALTH WITH KEY TO THE SCRIPTURES. In one volume, 700 pp. Containing many important changes and additions by the author. THE ORIGINAL, STANDARD, and only Text-book on CHRISTIAN SCIENCE MIND-HEALING. This edition contains a fine photogravure portrait of Mrs. Eddy, together with a facsimile of her signature.

Price (cloth), single copy $3.18
Two to twelve books (cloth only) to one address, each 3.00
Twelve or more books to one address, each 2.75
Full leather, stiff beveled boards, gilt edges, same paper as in cloth binding, single copy 4.00
Twelve or more to one address, each 3.75
Morocco, limp, round corners, gilt edges, Oxford India Bible paper, convenient for pocket, single copy . . . 5.00
Twelve or more to one address, each 4.75
Levant, divinity circuit, leather-lined to edge, round corners, gilt edges, silk sewed, heavy Oxford India Bible paper, single copy 6.00
Twelve or more to one address, each 5.75

Orders for Science and Health in lots of twelve or more to one address may include any or all of the different styles of binding. The above prices are all prepaid.

MISCELLANEOUS WRITINGS—1883–1896. A book of 471 pages, containing articles published in THE CHRISTIAN SCIENCE JOURNAL since 1883, with revisions and additions.

Price (cloth), single copy $2.25
Twelve or more books to one address, each . . . 2.00
Morocco, limp, round corners, gilt edges, convenient for pocket, single copy 4.00
Twelve or more to one address, each 3.75
Levant, divinity circuit, leather-lined to edge, round corners, gilt edges, silk sewed, single copy 5.00
Twelve or more to one address, each 4.75

The above prices are all prepaid. Orders for Miscellaneous Writings in lots of twelve or more to one address may include any or all of the different styles of binding.

No discount will be allowed on orders for twelve books which include both Science and Health and Miscellaneous Writings.

CONCORDANCE TO SCIENCE AND HEALTH. This work contains about eighty thousand references (more than ten thousand words being indexed). It also contains an index to the Marginal Headings, and a list of the Scriptural Quotations in SCIENCE AND HEALTH. 607 pages, 10 x 7, and addendum, bound in cloth, marbled edges. Price, prepaid, single copy . $5.00
Twelve or more to one address, each 4.50

CHURCH MANUAL. Containing the By-laws of The Mother Church. Price, prepaid, single copy, $1.00; $5.00 per half dozen; $9.00 per dozen.

CHRIST AND CHRISTMAS. An illustrated poem.
Price, prepaid, single copy $3.00
Twelve or more books to one address, prepaid, each . 2.50

UNITY OF GOOD AND OTHER WRITINGS. One volume containing: Unity of Good, Rudimental Divine Science, No and Yes, Retrospection and Introspection, uniform in size with the pocket edition of Science and Health. Bound in morocco, limp, round corners, gilt edges, heavy Oxford India Bible paper. Price, prepaid, single copy, $3.50; six or more copies to one address, each, $3.25.

CHRISTIAN HEALING AND OTHER WRITINGS. One volume containing: Christian Healing, The People's Idea of God, Pulpit and Press, Christian Science *versus* Pantheism, Messages of 1900, 1901, 1902, uniform in size with the pocket edition of Science and Health. Bound in morocco, limp, round corners, gilt edges, heavy Oxford India Bible paper. Price, prepaid, single copy, $3.50; six or more copies to one address, each, $3.25.

UNITY OF GOOD. It lays the axe at the root of error, elucidating and enforcing practical Christian Science, thus affording invaluable directions for all true Scientists. Library edition, 64 pages, cloth binding, marbled edges. Price, prepaid, single copy, 65 cents; $3.00 per half dozen; $5.50 per dozen. Leather covers (pocket). Price, prepaid, single copy, $1.00; $5.00 per half dozen; $9.00 per dozen.

RETROSPECTION AND INTROSPECTION. A biographical sketch of the author. The way she was led to the discovery of Christian Science; its growth and fundamental idea. Library edition, 95 pages, cloth binding, marbled edges. Price, prepaid, single copy, $1.06; $5.00 per half dozen; $9.00 per dozen.

PULPIT AND PRESS. A unique work of importance in the history and to the readers of Christian Science; containing Dedicatory Sermon delivered at The Mother Church, and scintillations from the press of that occasion. Library edition, 90 pages, cloth binding. Price, prepaid, single copy, $1.00; $5.00 per half dozen; $9.00 per dozen.

RUDIMENTAL DIVINE SCIENCE. An interesting and valuable book, containing a brief and concise statement of Divine Science, *alias* Christian Science, in the form of questions and answers. 17 pages. Leatherette covers, gilt top. Price, prepaid, single copy, 37 cents; $3.00 per dozen. Library edition, cloth binding, marbled edges. Price, prepaid, single copy, 55 cents; $2.50 per half dozen; $4.50 per dozen.

NO AND YES. A brief statement of very important points in Christian Science. 46 pages. Pebbled cloth covers. Price, prepaid, single copy, 27 cents; $2.50 per dozen. Library edition, cloth binding, marbled edges. Price, prepaid, single copy, 60 cents; $3.00 per half dozen; $5.50 per dozen.

MESSAGES TO THE MOTHER CHURCH. By Mary Baker Eddy, including Christian Science *vs.* Pantheism, and the Messages of 1900, 1901, and 1902. In one volume. Library edition, 94 pages, cloth binding, marbled edges. Price, prepaid, single copy, $1.50; $7.50 per half dozen; $13.50 per dozen.

CHRISTIAN SCIENCE *versus* PANTHEISM. The Pastor Emeritus' Message delivered at the Communion Season in The Mother Church in Boston, June, 1898. A clear and strong refutation of the charge that Christian Scientists are pantheists. 15 pages. Price, prepaid, single copy, 26 cents; $2.50 per dozen.

MESSAGE TO THE MOTHER CHURCH. The annual message of Mary Baker Eddy to The Mother Church on Communion Sunday, June, 1900. Leatherette covers, deckled edges. 15 pages. Price, prepaid, single copy, 26 cents; $2.50 per dozen.

OUR LEADER'S MESSAGE. The annual message of Mary Baker Eddy to The Mother Church on Communion Sunday, June, 1901. Deckled edges. 35 pages. Price, prepaid, single copy, 50 cents; $4.50 per dozen.

COMMUNION MESSAGE. The annual message of Mary Baker Eddy to The Mother Church on Communion Sunday, June 15, 1902. Deckled edges. 20 pages. Price, prepaid, single copy, 50 cents; $4.50 per dozen.

TWO SERMONS. CHRISTIAN HEALING and THE PEOPLE'S IDEA OF GOD. In one volume. Library edition, cloth binding, marbled edges. 36 pages. Price, prepaid, single copy, 60 cents; $3.00 per half dozen; $5.50 per dozen.

CHRISTIAN HEALING. A sermon delivered in Boston. 10 pages. Paper covers. Price, prepaid, single copy, 21 cents; $2.00 per dozen.

THE PEOPLE'S IDEA OF GOD. A sermon delivered in Boston. 14 pages. Paper covers. Price, prepaid, single copy, 21 cents; $2.00 per dozen.

FEED MY SHEEP. Words by Mary Baker Eddy. Music by Lyman F. Brackett. Price, prepaid, single copy, 50 cents; $5.00 per dozen.

Associate Editors.

SUBSCRIPTION PRICE

Single copy, one year, $2.00.

Ten copies or more to one address, one year, each copy, $1.90.

Twenty-five copies or more to one address, one year, each copy, $1.80.

Fifty copies or more to one address, one year, each copy, $1.50.

These rates apply in the United States, Canada, Mexico, and Cuba. In all other countries add 50 cents for postage on each subscription.

Six-months subscriptions received at half the above rates.

No subscription received for less than six months.

Subscriptions to the *Sentinel* will be entered to begin with the first of the month, and will include all issues for the month named as expiration date on the wrapper. The receipt of the periodical by the subscriber will be our acknowledgment of the subscription.

TERMS OF SALE

Five cents a copy, postpaid to any address in the United States, Canada, Mexico, and Cuba. In quantities to one address: twenty-five copies, $1.00; fifty copies, $1.80; one hundred copies, $3.00.

To all other countries, six cents a copy, postpaid to any address. In quantities to one address: twenty-five copies, $1.25; fifty copies, $2.30; one hundred copies, $4.00.

Bound Volumes: Current year and two years previous, cloth, $3.00; half calf or half morocco, $3.50. On earlier volumes write for prices.

Entered at the Boston, Mass., post-office as second-class mail matter.

ITEMS OF INTEREST.

National.

Ten years ago, when Porto Rico passed under the sovereignty of the United States, it had 551 schools with 21,000 pupils, and not a single building constructed for public instruction; now it has 2,400 schools, with 87,000 pupils, with 160 specially built school buildings; $35,000 was the annual appropriation for public education; today it is a million dollars. The 172 miles of macadamized road have increased to 624. The total of exports and imports has grown from $22,000,000 to $56,000,000, and the balance of trade has changed from $12,500,000 against the island to $2,500,000 in its favor.

The Territorial Board of Immigration of Hawaii has received requests from the various plantations asking that two thousand families of Portuguese or other European laborers be brought there. They offer $20 a month for the first year, $21 for the second, and $22 for the third of employment to male adult laborers, and from $10 to $15 a month for women and children; also a two-room cottage for families and an acre of ground, the house and land to become the property of the laborer on the completion of three years' service.

A decision just handed down in the United States District Court at Boston sustains the Bankruptcy Court in the contention that debts paid off and discharged under a common law assignment must be added to the claims as unpaid when the assignor is petitioned into bankruptcy. It is the first time that question has been fought out before a Federal Court judge, and merchants throughout the United States are especially helped by the finding.

Thirty leading business men and trade experts of Japan, with their wives and families, will arrive at Seattle from Yokohama, Sept. 2, and as the guests of chambers of commerce will visit every important manufacturing center of the country. Secretary of Commerce and Labor Nagel will assign five experts in different commercial lines to accompany the party on its tour.

The Interstate Commerce Commission has decided to investigate charges which have been filed against the United States, American, and Adams Express Companies. The complaint asserts that these companies are operating under a rate agreement, charge exorbitant prices, endeavor to control legislation in the various states, and in other ways violate the law.

The principle of indeterminate franchise and of profit sharing has been incorporated in a law just signed by Governor Hughes of New York, and already four of the interests that offered tentatively to build subways in case construction by private capital should, under an amendment, be permitted, will submit actual bids under the law as it stands.

A Congressional bill which gives the Federal Government jurisdiction over the protection of migratory birds in those states in which the birds do not remain permanently the entire year, provides that the Department of Agriculture shall establish regulations fixing closed seasons during which it shall be unlawful to shoot, kill, or capture such birds.

The estimate of appropriations for the Interior Department for the fiscal year 1911, as approved by Secretary Ballinger, shows a net decrease of $8,500,000, as compared with the appropriations for the fiscal year 1910. Reduction is made largely in the estimates for army and navy pensions, the Indian service, and the general land office.

The Government contemplates an immense irrigation project for the reclamation of the Big Bend country west of Spokane. A survey has been made which shows it is possible to reclaim five hundred thousand acres and by seventy miles of canals supply it with water from the Spokane river. Funds are lacking at present to carry out the project.

According to plans as now formulated the Glidden automobile tour will cover about 2,530 miles, starting from Detroit, July 12, and finishing at Kansas City, July 29. This makes an elapsed period of eighteen days for the tour and fourteen running days. Up to May 24 thirty-two cars had been entered.

A quarter of a billion of dollars will have been appropriated by Congress for the purchase and construction of the Isthmian Canal, if the estimates for the expenditures in canal construction for the fiscal year beginning July 1, 1910, are agreed to by Congress next winter.

President Taft at the White House gave the signal by telegraph that opened the Alaska-Yukon-Pacific exposition at Seattle, June 1. The exposition cost $10,000,000 and was built in two years. The first day's attendance was 89,286.

Uniform pure food laws, uniform bills of lading, and a desired amendment to the existing bankruptcy laws, were the leading topics under consideration by the National Wholesale Grocers' Association which convened in Detroit last week.

The trees which are used in the Government work of reforestation are grown at eight Government nurseries in the western forest reserves, which now contain some nine million trees from one to three years old.

With the arrival of a shipment of $7,500,000 in gold coin from San Francisco, the Denver mint now has $370,000,000 in gold stored in the Federal coffers there.

The estimates for the War Department for 1911 have been cut until they are about twenty million dollars less than the estimate for the fiscal year ending in 1910.

The treasury deficit for the month of May was $5,453,955 and for the eleven months of the current fiscal year $97,858,102.

International.

Englishmen are urging the feasibility and the desirability of the construction of a railway from the Mediterranean to India, which might be particularly useful if the Suez Canal were some time blocked. The westernmost section of the line would start from Port Said or Ismailia, traverse Arabia Petræa to the head of the Gulf of Akabah, and cross northern Arabia to Basra. Circling round the head of the Persian Gulf, the railway would traverse Persia by either passing through Shiraz, or by a more southerly line through Baluchistan as far as Karachi, where it would connect with the Indian system. The distances traversed would be approximately two hundred miles from the Mediterranean to Akabah, eight hundred miles from Akabah to Basra, and twelve hundred miles from Basra to Karachi.

The Montreal Harbor Commission has given out the details of the plans for a floating dry dock to be built there. The capital, $2,500,000, has been raised in Great Britain. The Dominion government is to expend $1,500,000 in the creation of a suitable site and to lease the same for a term of years to the company at a nominal rental. The dock will accommodate vessels of twenty-five thousand tons. The whole work of construction is to be completed within two years.

Immigration to Canada last year through ocean ports from European countries decreased 117,081 persons compared with the preceding year. In the twelve months prior to March 31, 159,832 settlers from the United States came into Canada, bringing with them money and effects the estimated value of which was $60,000,000.

For the year 1908 the English income tax produced for the government $165,000,000, being levied on a population of 44,500,000; while the inheritance tax yielded $94,230,000. Incomes under $1,000 are exempt from taxation, and graduated abatements are allowed on incomes between $1,000 and $3,400.

The law legalizing the sect of Old Believers, the first of a series of important measures designed to put into effect the principles of religious liberty enunciated in the Emperor's manifesto of May 13, was adopted in the Russian Douma last week.

Upward of three thousand scholars of international repute attended the seventh international congress of applied chemistry, just held in London. The next congress will meet in Washington in 1912.

A formal agreement has been reached between the oil producers at Galicia and the Standard Oil Company with regard to the taking over of the stock of oil in Galicia.

The report is denied that France and Russia recalled their ambassadors at Constantinople because they had been receiving monies monthly from agents of the late Sultan.

The Mexican budget for the year 1909-10 is ninety-seven million dollars, besides an extra expenditure of twenty-six million.

Emperor William and Czar Nicholas are expected to meet on the waters of the Gulf of Finland June 17.

The Cuban budget for the coming fiscal year is $33,825,448.

Industrial and Commercial.

It is reported that a contract for one hundred and five locomotives has been placed with the Baldwin Locomotive Works by the Harriman lines.

The Pennsylvania Railway the past year carried a total of 141,659,543 passengers without a single fatality.

CHRISTIAN SCIENCE SENTINEL

"WHAT I SAY UNTO YOU, I SAY UNTO ALL — WATCH" JESUS

[From *The Christian Science Monitor.*]

MISSTATEMENTS REFUTED.

A NEW YORK newspaper on Sunday published a statement by Mrs. Della M. Gilbert, alleging among other things that Mrs. Eddy was "no longer in the flesh." Numerous other newspapers throughout the United States also had articles based on the New York publication, and in answer Alfred Farlow, publication committee for The First Church of Christ, Scientist, has issued the following statement:—

Mrs. Della M. Gilbert's statement is but a reiteration of the oft-repeated and oft-refuted claim that Mary Baker Eddy is no longer the head of the Christian Science church. In fact Mrs. Eddy has never relinquished the active supervision of the Christian Science movement. She is in good health and mentally alert. Only two weeks ago she directed a change in one of the by-laws of The Mother Church, regulating the government of branch churches. Last week Mrs. Eddy published important directions concerning the methods of teaching Christian Science. She has been driving regularly this spring and despite the inclemency of the weather on Saturday took her usual ride. She also was out driving today.

Mrs. Della M. Gilbert of New York called at Mrs. Eddy's house on Thursday, May 20, 1909, was admitted to the library, and had a short conversation with Mr. Dickey, Mrs. Eddy's secretary, regarding an interview with Mrs. Eddy. She was not shown about the house and saw no one but Mr. Dickey and the maid who answered the door-bell. She was informed that no one but Mrs. Eddy made such appointments; that it was not within Mr. Dickey's power to make an appointment; that he would present the matter to Mrs. Eddy at the usual hour in the day for such business and would report to Mrs. Gilbert at her hotel. True to his promise, he presented the matter to Mrs. Eddy, who kindly declined the interview. Accordingly, Mr. Dickey reported to Mrs. Gilbert, whereupon she wrote the letter, part of which she gave to the press. The last sentence of this letter was: "I will give you from now until Monday evening at six to answer this letter." On Monday, May 24, the First Reader of The Mother Church of Christian Science, with another member of the church, called on Mrs. Gilbert at her hotel in Boston for the purpose of admonishing her in regard to her conduct, as required by the by-laws of the church in cases of discipline, and expostulating with her in regard to the course which she threatened in her letter to pursue. The same day she wrote and sent to the First Reader the following letter:—

(COPY.)

Parker House, Boston, Monday evening.

Mr. Clifford Smith.

My Dear Sir:—I shall leave tomorrow morning for New York—train leaves at ten o'clock—meanwhile I shall be guided in my future movements by the way through which Principle works to supply my needs. God has led me so far, and supply means demonstration to me—My thought is confused since my talk with you—Of course I realize that for my own sake, and the sake of God's great cause, I cannot afford to take one misstep—and have prayed for guidance as never before—My leading has come to me in this way—If Divine Love will send—give or loan to me the sum of five thousand dollars to reimburse me for my loss, so far—the loss of my position and salary—my office and furnishings, and the loss incurred from being unable to bring out my work at the Plaza—I will take that as a leading that I am wrong—and the money will enable me to recover myself and pay off obligations incurred while making a move which I thought was right at the time—The money would tide me over the next few months while I am trying to regain my lost footing, and enable me to start my church work in the fall in New York if at that time you think it is advisable. If I take my stand with you this time, and admit that I was wrong—that will mean that all of the old thoughts have been rooted out of my consciousness. But I am not going to trust my own feelings at the present time, but wait to see how God leads me in demonstration—If on the other hand I do not bring out the above outlined demonstration, I can by following my original plan secure a much larger sum of money, and as I told you this afternoon this whole move of mine has cost me what it would take years to regain in the simple way that Scientists are obliged to bring out substance—Please do not mistake my motives—They are not mercenary—God knows I have given up too much for His work to ever be accused of that—It is simply my way of figuring out God's leading—For if God is our source of supply—Then our source of supply is God.

Very sincerely yours,

(MRS.) DELLA M. GILBERT.

After this letter was received, Mrs. Gilbert's name was dropped from the membership-roll of The Mother Church. The discussion of Mrs. Gilbert's plan to establish a Christian Science service at the Hotel Plaza grew out of certain newspaper reports, which, as I remember, gave opportunity for wrong impressions concerning Mrs. Gilbert as well as the action of the Scientists in Boston, and so these reports had to be corrected.

A reporter for the *Boston Globe* who interviewed Mrs. Eddy at Pleasant View, and who was again received by her after she had moved to Chestnut Hill, yesterday [June 6] conducted an independent investigation concerning the charges made by Mrs. Gilbert. The following is what is published in the *Globe* today [June 7] concerning a trip to Chestnut Hill yesterday:—

"Conducting an independent investigation of the sensational charges made in Mrs. Gilbert's letter, a *Globe* reporter yesterday afternoon chartered a taxicab and went out to the Chestnut Hill section of Newton where Mrs. Eddy's estate is. The reporter knew from past experience that Mrs. Eddy usually goes to drive at one o'clock

Copyright, 1909, by Mary Baker Eddy.

Digitized by Google

in the afternoon, and timed his arrival so as to find her on her outing.

"The *Globe* taxicab circled the reservoir, about which Mrs. Eddy frequently drives, and nothing being seen of the well-known carriage, the chauffeur was directed to go back to the carriage drive, out of which the carriage of Mrs. Eddy, as it turned out, had emerged just before the taxicab had completed the circle of the reservoir. The tracks of the carriage were fresh in the gravel, and ordering the chauffeur to turn about, the taxicab went in pursuit of the carriage.

"Approaching the reservoir again, the carriage was sighted some distance in advance of the taxicab and going in the same direction. The chauffeur was directed to overhaul the carriage and to run by it at about the speed of the horses when he should come alongside, and to retain that speed until he was given orders to increase it.

"The chauffeur followed his directions to the letter, and quickly overtook the span of big black horses attached to the two-seated carriage. As the taxicab drew alongside the carriage, the first person the reporter saw was Calvin A. Frye, for many years known both as the footman and confidential private secretary of Mrs. Eddy. He was sitting on the left side front seat with the coachman.

"Looking closely into the carriage the reporter saw, first, Mrs. Laura Sargent, Mrs. Eddy's housekeeper and companion, sitting on the right side of the rear seat, and next to her, sitting on the left side of the seat, Mrs. Eddy herself.

"Mrs. Sargent was sitting well apart from Mrs. Eddy, and Mrs. Eddy herself was sitting bolt upright, apparently looking out of the window. She wore a quantity of fluffy white stuff about her throat, as is her custom, and her hat, something in the line of a toque, had some light color on it. Her dress was of dark material.

"As the reporter in question has twice interviewed Mrs. Eddy, and has seen her many other times at greater or lesser distances, there is no doubt but that she was the woman in the rear seat of the carriage yesterday afternoon with Mrs. Sargent.

"The last time the reporter interviewed Mrs. Eddy and the last time he saw her face to face was a year ago this month in her study at Chestnut Hill. The brief but comprehensive view which the reporter had of Mrs. Eddy in her carriage yesterday afternoon satisfied him there had been no marked physical change in her condition since he last saw her.

"The reporter had no opportunity of talking with Mrs. Eddy, and could of course form no idea as to whether or not there had been any change in her mental condition. He was, however, convinced by this visual demonstration that Mrs. Eddy is not dead, and that, so far as a cursory view showed, she seemed to look about as she did a year ago this month."

Newspaper men representing all the papers in Boston, and several from more distant points, gathered by special invitation at 12:50 p. m. on Monday [June 7] outside the grounds of Mrs. Eddy's residence, Chestnut Hill, to look over the premises and thoroughly assure themselves regarding her well-being.

The party was conducted to the house by Alfred Farlow, publication committee of The First Church of Christ, Scientist. In the reception-room on the ground floor Adam H. Dickey, assistant secretary to Mrs. Eddy, explained the purpose in inviting the reporters, and handed out Mrs. Eddy's signed statement [See p. 810]. Numerous questions were asked and answered and the party then moved out on the lawn.

Mrs. Eddy had just reached her carriage when the journalists arrived at the driveway. In describing Mrs. Eddy's leaving for her drive, Fred J. Wilson, New England manager of the United Press Association, one of the party of newspaper men present, sent the following to the newspapers throughout the world taking the United Press service:—

"And when she issued from the house for her customary afternoon drive, it was no decrepit mindless woman, but one in whose placid features shone the light of intelligence and purpose. As the carriage drew out from the *porte-cochere*, with Mrs. Eddy's secretary, Calvin A. Frye, and her coachman on the box and the venerable Christian Science Leader and her companion, Mrs. Laura Sargent, inside, Mrs. Eddy drew near to the window and smiled and bowed. She looked not more than her years would warrant, and it is doubtful if there are many women of her age in whom the fires of life burn more brightly. As her carriage sped down the driveway Mrs. Eddy leaned back in her seat and, smiling brightly, was gone."

The reporters were well satisfied that Mrs. Eddy was in good health. There was nothing in her appearance that betokened weakness or physical disability, but she looked well and active.

The reporters were then shown through the house. They were even taken upstairs and allowed to inspect thoroughly Mrs. Eddy's private suite on the second floor, a privilege never before extended to journalistic visitors. On the way Mr. Dickey explained the rooms and gave such information regarding the decorations and historical features of the furnishings as he thought would be interesting.

When the newspaper men had thoroughly satisfied themselves and asked all the questions they could think of, they were shown the rest of the house, including the kitchen. They then dispersed, after expressing appreciation for the unusual courtesies extended to them.

On their trip back to the city the reporters in their automobile encountered Mrs. Eddy's carriage on its return. As she passed Mrs. Eddy again greeted the newspaper men, looking smilingly through the window of the carriage and again waving her hand. Those of the reporting party were impressed with the fact that she had recognized them, which was considered clear proof that she is mentally alert. The windows of Mrs. Eddy's carriage were open at the time.

[From *The Christian Science Monitor.*]

MOTHER CHURCH ANNUAL MEETING.

The annual meeting of The First Church of Christ, Scientist, was held in the church edifice at two o'clock Monday afternoon. The following were announced as having been elected officers: William P. McKenzie, president; John V. Dittemore, clerk, and Stephen A. Chase, treasurer.

In answer to an invitation extended to Mrs. Eddy by The Christian Science Board of Directors to attend the annual meeting, Mrs. Eddy sent the following letter, which was read at the meeting:—

June 5, 1909.

The Christian Science Board of Directors.

Beloved Students:—I thank you for your kind invitation to be present at the annual meeting of The Mother Church on June 7, 1909. I will attend the meeting, but not in *propria persona.* Watch and pray that God directs your meetings and your lives, and your Leader will then be sure that they are blessed in their results.

Lovingly yours,

MARY BAKER EDDY.

President McKenzie, upon the motion of Ira O. Knapp, appointed a committee to draft a letter to Mrs. Eddy, in response to her kind and loving message, and the following epistle was prepared and sent:—

Digitized by Google

June 7, 1909.

Reverend Mary Baker Eddy, 384 Beacon street, Chestnut Hill, Mass.

Revered and Beloved Leader:—Your inspiring message to The Christian Science Board of Directors, sent in response to their invitation to be present at the annual meeting of your church, has been read to the members assembled at this meeting; and they beg to assure you of their profound gratitude for this evidence of your ever-watchful care over the welfare of your church. The events of today give us special reason for rejoicing that you have again made the refutation of false report an occasion for giving us a splendid assurance of the divine power and presence which has directed all your efforts for humanity throughout the years which have intervened since your discovery of Christian Science. The progress of Christian Science throughout the entire world during the past year gives us ample cause to look forward with glad anticipation to the fruition of the coming year.

Lovingly and faithfully,

The First Church of Christ, Scientist, in Boston, Mass.

JOHN V. DITTEMORE, *Clerk.*

WORK OF THE COMMITTEE ON PUBLICATION.

REV. JAMES J. ROME.

OUTSIDE the propaganda of Christian Science itself, there is no agency for which Christian Scientists have more reason to be grateful than that of the press. When we remember that the subject of Christian Science cannot be brought to the consciousness of any human being and leave that consciousness just where it found it, and when we remember also that there is no part of the world into the farthest nook of which the newspaper does not enter, we can readily see what a useful medium it is in helping to awaken universal thought to a knowledge of the truth.

The question as to whether Christian Science will be discussed in the columns of these papers is today hardly worth considering, since the subject has become of such public interest that no paper can afford to ignore it. It may not always be presented in the kindest and most favorable manner,—too often, indeed, there have been bitterness and injustice manifested,—but even then there is aroused a spirit of inquiry and investigation which has led many a weary heart to the source of all good, where they have found health and peace. On the other hand, the fair and respectful treatment given the subject by many of our leading newspapers has stood out in bold contrast with the inconsiderate and even harsh criticisms which have come from sources from which we might have expected gentler usage.

A public newspaper cannot afford to be the mere tool of prejudice, a biased course of reasoning being objectionable to the general public. The better quality of thought claims attention, and the demand for fair play asserts itself. This higher quality of human thought soon predominates; facts and fairness are its requirements, and Christian Science asks for nothing more. In view of this momentous power of the press, and in order that Christian Science may be properly and truthfully presented through this medium, the importance of establishing some organization or method for the purpose of keeping in touch with the newspaper world can readily be seen, and such an organization is found in the Christian Science committee on publication.

The work of this committee is both varied in nature and extensive in territory. First to be considered are the leading newspapers in our larger cities. The time was when they could and did make some wild and reckless statements, such as were calculated to convey very erroneous concepts of Christian Science. Today most of the papers have learned that they have a committee on publication to reckon with, and such statements are seldom made; or, if they are, the committee sees to it that they are immediately corrected. The committee does not confine its work to the large cities, but reaches out to those of less importance and keeps guard over the reports and statements made by the press there; even the smallest papers in the outlying towns come under its watchful eye.

But, it may be asked, what is the nature of the work accomplished? In the first place, false reports are sometimes published in which Christian Science is involved. For instance, one paper printed an account of a young woman who was kept under Christian Science treatment until she died. Of course she was regarded as a victim of neglect and wrong treatment. On investigation, a member of the committee on publication discovered that no such young woman had died in the place named. The facts were that the person spoken of had gone to another part of the country some time before her decease, she had not been treated by a Christian Scientist, and had no interest in Christian Science nor any connection with it. A member of the committee then went to the office of the newspaper and asked the editor to publish a correction of the mistake.

Another member of the committee went to an editor who was very much prejudiced against Christian Science, and after a little friendly talk showed him that his prejudice was without foundation. His bitterness, which had found expression in the columns of his paper, was overcome, and he even expressed his pleasure at having been corrected. There are also attacks on Christian Science made through the papers by contributors. In these attacks false statements are made and facts are misrepresented. The falsehoods need to be refuted and the mistakes corrected in a kindly spirit, and a committee specially appointed for this work is likely to be better fitted to deal with such conditions than any one else. Then, again, the columns of some papers are open for the publication of articles on Christian Science, and such articles must be furnished. All this and more is the work of the committee on publication, and there is a vast amount of it being done.

It takes time and expense to do all this, but it is well worth while. Each member of the church can have a part in this work, not only by supporting it financially, but by keeping in touch with the local paper on the one hand and with the publication committee on the other. These opportunities and privileges have been furnished us through the wisdom and forethought of our Leader, Mrs. Eddy, and we cannot afford to be indifferent to or delinquent in our duty to carry forward this important work.

THE RELIGION OF LOVE.

ISABEL LEE.

IN the first chapter of Genesis we read: "And God made the beast of the earth after his kind, and cattle after their kind, and every thing that creepeth upon the earth after his kind: and God saw that it was good." The writer desires to express her deep gratitude for certain articles which have appeared in the *Sentinel* and *Journal*, calling attention to the need of greater kindness and consideration for dumb creatures. It may be that those who penned these articles have not realized the great sense of appreciation which some readers have experienced while perusing, over and over again, their words inspired by compassionate, divine Love.

The sufferings in the writer's early childhood, which continued down through the years until she was healed in Christian Science, resulted in a quickened sense not only of the needs and sufferings of humanity, but also of the animal creation; and the tragedy which seemed to exist

Digitized by Google

in the lives of the fowls of the air and of the beasts of the field and of every living thing that "creepeth upon the earth," brought about by the blindness and selfishness of mortal mind, at times almost overwhelmed her with anguish. The piteous appeal too often encountered in the eyes of the dumb creatures, sank deep into consciousness, and even in childhood a sense of that divine, compassionate Love which is not willing that one of its manifestations should perish, filled her heart with a great yearning to help them. There was a longing, too, for utterances from the pulpits that should instruct the children and their parents to show love and tenderness to every living thing. But those utterances were not to be heard from the pulpits, nor was the subject taken up in the Bible classes for children or adults, and the childish heart starved for the coming of a religion of Love which should include all.

That religion of Love was even then revealed to the world, though she knew it not; a light was shining into the darkness of cruelty in all its forms, and it was to bring into manifestation those who should be incapable of indifference or neglect of any of God's creatures. The light of this religion is shining brighter and brighter; it is the light of Christian Science. The revelator of divine Love to this age says, in Science and Health (p. 514), "Tenderness accompanies all the might imparted by Spirit." Thus it is that the Christian Scientist feels and manifests this tenderness, if he desire indeed to know the "might imparted by Spirit" in its fulness, and the healing power of divine Love. Our text-book (p. 332) speaks of God's "tender relationship to His spiritual creation;" not to man alone, but to all creation; and how can we hope to understand Truth and do God's will if we are blind, indifferent, or wilfully negligent as to the needs of anything that He has made? In the broader, deeper meanings of Scripture that dawn upon thought as we journey toward the land of Christian Science, comes a light on this subject which, when seen and followed by Christian Scientists, will lift the curse not from a part but from all creation.

The appearance in our experience of a miserable, unhappy, neglected, forsaken little child, appealing to us for help, is not to be ignored or passed by unnoticed; and no more is the appearance of a miserable, unhappy, neglected, forsaken animal that comes to us for help, for "infinite Mind made all and includes all," and has time for all; and "the higher always protects the lower" (Science and Health, pp. 206, 518)—not sometimes, but always. If it be that the lesser manifestations of Mind seem of little consequence to us, let us remember that Christian Science teaches that there is but one creator and one creation; then we shall find that it is our own false sense of things that makes us indifferent, and not a mistake in the thing created. God has not made any mistakes; and when we awaken to see things as they really are, we shall find that our indifference, resulting in neglect, which is cruelty, was born of a material sense of God's works.

We clearly understand in Christian Science that we should see our brother as God's idea, not as matter; and it is likewise scientific, and therefore loving, to see all His ideas spiritually, not through false, material sense; and to understand the teaching in Science and Health (p. 550), that "God is the Life, or intelligence, which forms and preserves the individuality and identity of animals as well as of men," a statement which will surely preclude the possibility of indifference. The hour has struck when we are to learn and know that Love does indeed include all. The prayer of the little child is answered; she has found the church that in its ministry includes every living thing, and the Christian who sets at naught no living thing, nor leaves it to the mercy of evil. It is scientific to be loving, merciful, tender in our attitude toward the least spiritual idea, and nothing short of this is in accordance with the teaching of Christian Science.

THE GOLDEN RULE.

ABBY BEECHER ABBOTT.

THE great Teacher said: "All things whatsoever ye would that men should do to you, do ye even so to them: for this is the law and the prophets;" and he gave this as a practical rule to govern all mankind in their journey heavenward. The understanding of this rule makes it easy to occupy the place of another when passing judgment or trying to estimate the character. The elimination of self, when differences arise, will often avert discord. When we take into consideration the differing human opinions on any subject, we pray for patience and a larger, broader grasp of any question, with a realization of the fact that Science is so far-reaching that it overshadows all petty jealousy and mere human opinions, and turns and overturns until the highest condition of thought is manifested.

It has been very helpful to me, in my work as a member of the church, to make a personal application of the Golden Rule—to put myself in the place of the different officers in order to see how I would like to be treated. If I were a Reader, I should desire the love and confidence of the congregation. I should wish them to help me give the message of Love free from all personality or any condemning or critical thought. I should not want them to think how I looked, nor how I spoke, but to know that I was quick to hear and obey divine Love, and thus help me to realize the sacredness of the office and to know that the thought voiced is the word of God, with healing in its wings. If I were a director, I should wish the members to realize that intelligent appreciation and hearty cooperation do much to help the officers to bear the burden of service; that my only interest would be to advance the Cause of Christ, and help the Readers to bring out unity in the outward workings as well as in the spiritual thought of the church. If I were a Sunday School superintendent, I should want the children to know that obedience and promptness can be taught better if it is exemplified by the pupils. If I wished them to be loyal and kind to me, I must show loving loyalty to all the officers of the church. If I were a teacher in the Sunday School, I should wish the superintendent to feel that I was always ready to carry out any of his plans for the greater good to all, without consulting my own personal likes or dislikes.

To sum it all up, the carrying out of the Golden Rule would be obedience to law and order, with no thought of personality, but a broader, freer basis of what it means to do unto others what we would like to have done unto us. Mrs. Eddy said a short time ago (*Sentinel*, May 23, 1908), that "doing unto others as we would that they do by us is immortality's self. Intrepid, self-oblivious love fulfils the law and is self-sustaining and eternal."

[Written for the *Sentinel*.]

ASK FOR TODAY.

EDMUND K. GOLDSBOROUGH, JR.

ASK for today: tomorrow ne'er will come.
The love which kept you through the passing hour,
Has gently guarded every 'wakening flower,
In wisdom it will lead the pilgrim home;
Ask for today.

Ask for today; and Love will do the rest.
Perennial flowers are blossoming by the road,
And angels hover near to lift our load;
Only obey God's beautiful behest,
Ask for today.

SELECTED ARTICLES.

[Frederick Dixon in *World of Dress and Woman's Journal*, London, England.]

That the personal influence of Mrs. Eddy is a great moral force in the world, every Christian Scientist is only too eager to affirm. They know far better than any one else the patience, the courage, the fortitude, the long-suffering, and above all, the love which have carried her to the position she now occupies; and yet it is not upon her personality that they base their hopes, but upon the fact that she has shown them that there is an absolute spiritual law, —a law, that is, without variation,—from which men may proceed to demonstrate the Science of being, as Jesus taught it. The personal influence of the individual is a dangerous staff to lean upon; it may at any moment splinter, and pierce the hand. No one could have made this clearer than the critic, in claiming that this influence might be exerted either for good or evil. This is, of course, the inevitable deduction from the admission that the human mind is a factor in spiritual healing, and it is just this premise that Christian Science steadfastly repudiates.

Jesus said: "A good tree cannot bring forth evil fruit, neither can a corrupt tree bring forth good fruit." Now, the critic said that personal influence could turn the patient's mind toward good or evil. Granting that this is the case, does it not only prove that the so-called good is only a mitigated form of evil, inasmuch as the mind from which the two proceed must be a tainted source. The belief in the power of evil is necessarily the belief in sin as power, and by sin, wrote Paul to the Romans, death entered the world. Is this not what the writer of the allegory in Genesis had in mind when he wrote of the tree of knowledge of good and evil?

The question, consequently, resolves itself into this: Is there an absolute spiritual law, working out in unvarying harmony, of which the wayfaring man may avail himself? Mrs. Eddy maintains that there is, and points out that Jesus broke every physical law, and demonstrated in doing so that that law was not God's law. The truth is that he healed the sick not by breaking God's law, but by the strictest conformity to it. What he did break was the human sense of law. So long as men believe that physical causation is governed by law, they will be subject to that law; but when they learn that there is no law but God's law, they will realize why Mrs. Eddy has written on pages 52 and 313 of Science and Health, that Jesus of Nazareth was not only "the best man," but "the most scientific man that ever trod the globe." He knew more of law than any other man, because he knew more of God, of Truth; and, knowing more of Truth than any other man, he necessarily demonstrated that knowledge more fully. These demonstrations have been called miracles because they were wonderful to those who believed that law was physical, instead of understanding that it was the working of that divine Mind "with whom is no variableness, neither shadow of turning." And because this law really is law, it can be demonstrated today as it was demonstrated by Jesus. Indeed, it was he who made this demonstration the test of the understanding of his teaching, in saying that those who believed on him should do the miracles he did.

[George Shaw Cook in *Waukegan* (Ill.) *Sun.*]

Mrs. Eddy does not, as our critic says, refer in many places to the "duality of Christ's nature," though she does speak of the dual nature of Christ Jesus. Like many other critics of Christian Science, he fails to make the distinction between Christ and Christ Jesus. Christ, according to the teaching of Christian Science, is "the divine manifestation of God, which comes to the flesh to destroy incarnate error" (Science and Health, p. 583). In other words, Christ is the divine idea or spiritual idea of God, and necessarily is as eternal and as universal as God. Jesus was the man who best understood this divine idea and who most successfully demonstrated its power in the destruction of sin and disease. Christian Scientists look to Christ Jesus as the Way-shower and Exemplar. They believe that it is right for them to undertake the destruction of sins in the way that he destroyed them, and that it is possible for them to succeed in proportion as they are able to follow his example of spirituality and goodness.

No one who is correctly informed on this subject would suppose for one moment that Christian Scientists believe that they can get rid of sin by ignoring it or by simply calling it a delusion. Christian Science woos the sinner from his sin by convincing him that he need not fear sin and cannot love it because it is not of God. It shows him that God does not create sin, and that He does not permit its existence. It teaches him that sin and evil are entirely contrary to the will of God and that they have nothing to do with God's man. Thus it induces the sinner to abandon his belief in the reality, power, and pleasure of sin, and enables him to win forgiveness by forsaking sin. For this reason it will be seen that it is a mistake to suppose that in teaching the unreality of sin Christian Science encourages the indulgence of sin. On the contrary, it awakens the sinner to the absolute necessity of gaining a love for goodness that will enable him to abandon not only the flagrant forms of immorality and vice, but also the more subtle phases of evil. Thousands of sinners have been reformed by Christian Science, and many have been lifted by it out of the very depths of degradation. Indeed, it would be impossible for any one to be healed physically by Christian Science without becoming better morally.

No one who is at all familiar with the teaching of Christian Science concerning the cause of disease supposes that conscious and wilful sin is the only cause of disease. The Christian Science text-book shows plainly that fear, superstition, ignorance, and many other mental conditions cause disease. It also shows that the generally accepted beliefs of the human mind claiming to operate as law are responsible for much suffering. It, however, shows that every one of these causes may be annulled and their supposed effect prevented by a sufficient understanding of the law of God.

[R. Stanhope Easterday in *Frankfort* (Ind.) *Times.*]

If Christian Science did nothing more than to heal nervous and irritable women and make them sweet and lovable, it certainly would have proven itself an important factor in the solution of life's problems. The very fact, however, that in addition to this it has already in its forty years of history healed practically every known disease and antidoted all forms of sin, effectually refutes the critic's unjust and unkind insinuation as to Mrs. Eddy's mental caliber. It is further more generally conceded that the Christian Science following is made up largely of recruits from the best and most intellectual and cultured people in the various communities where its teachings are being promulgated throughout the whole world.

Christian Science heals the sick and reforms the sinner today as Jesus healed and reformed them almost two thousand years ago, not through mesmerism or mental suggestion, but through the wholesome, uplifting, and spiritualizing influence upon human minds and bodies of divine Truth and Love, emanating alone from the Mind that is God, or from that Mind "which was also in Christ Jesus," and it heals organic as well as functional diseases. Christian Science preaches the gospel and heals the sick, antidoting both sin and disease by the same process. It heals by its preaching and preaches by its healing.

Digitized by Google

[William E. Brown in *Los Angeles* (Cal.) *Express.*]

Christian Science is not merely a school of physical healing. It is a religion—the religion of Jesus—and has no other authority than the Scriptures. It is primitive Christianity in its fulness. It accepts Jesus' teachings and accepts all of them; it believes that his command to heal the sick is just as imperative as the command to preach the gospel; it believes that the promise of the Master, "He that believeth on me, the works that I do shall he do also," is true, and moreover is proving it to a very large degree.

Christian Science teaches that all the commands of Jesus are to be obeyed by all Christians and in all ages. That these commands were not intended, as some contend, for the disciples only, is clearly shown by their instructions given them by Jesus: "Go ye therefore, and teach all nations, . . . teaching them to observe all things whatsoever I have commanded you." As Christian Science is based upon the teachings of Christ Jesus, it is self-evident that it does not employ any of the agencies of the human mind. It is, therefore, opposed to hypnotism, mesmerism, or suggestion. Christian Science reforms the sinner and heals the sick in the same way that Jesus and his disciples did, and this method always improves the patient spiritually and morally, as well as physically—thus attesting to its divine origin.

It is sometimes said that "the teaching of Christian Science is dangerous, as it claims there is no sin." Such a conclusion could not be reached by any one who had studied the text-book of this Science, "Science and Health with Key to the Scriptures," for this book plainly teaches that sin is the foundation of all mortal discord and that this must be overcome and destroyed by the Mind of Christ before the individual can experience the peace and security that is the reward of him who understands and practises the teachings of Christ Jesus. Christian Science uses the term sin in its broadest sense, and includes in its definition all wrong thinking and acting, whether malicious or ignorant. While this Science teaches the unreality of all sin, it does so in the sense that it is not of God and therefore not permanent or eternal. This recognition of its abnormal and unreal existence enables the Christian to overcome it.

[John L. Rendall in *Creston* (Ia.) *American.*]

Christian Science as a distinctive religious denomination has been established about forty years. During that time it has had the most remarkable growth of any religious denomination. This growth is based entirely upon the demonstrated results in healing the sick by mental or spiritual means, and upon the fact that it is reformative in its mission, thus fulfilling the complete gospel of Jesus Christ as given to his disciples, when he said: "And as ye go, preach, saying, The kingdom of heaven is at hand. Heal the sick, cleanse the lepers, raise the dead, cast out devils: freely ye have received, freely give."

The fact that Christian Science has grown in a phenomenal way, and that thousands of people who had failed to find spiritual, mental, and physical healing by any other means have turned to it for such healing, constituted the reason for an effort upon the part of other churches to appropriate some of those things which Christian Science includes. It must, however, be clearly understood that back of all true mental or spiritual healing is a positive Principle, and that without an adequate understanding of this Principle all efforts to heal mentally must end in chaos. Jesus' precepts and example, together with the positive teachings of Scripture, are the only basis upon which successful Christian healing is accomplished. Science and Health, the text-book of Christian Science by Mrs. Eddy, explains the scientific Principle which underlies Christian healing, an understanding of which enables one to emulate the works of Jesus and of his disciples, in accordance with his words: "And these signs shall follow them that believe; In my name shall they cast out devils; they shall speak with new tongues; they shall take up serpents; and if they drink any deadly thing, it shall not hurt them; they shall lay hands on the sick, and they shall recover."

[A. P. Cochrane in *Free-Press,* Winfield, Kan.]

Least of all persons in the world can Christian Scientists be charged with substituting "imagination for faith." To them the answer of Peter to the Master, "Thou art the Christ, the Son of the living God," is the truth about him and the office he performed, and it is upon this truth that the church is founded. This acceptance is not based upon a blessing to be enjoyed in an uncertain way at an uncertain time, but upon the fact that we have found that obedience to the law as he declared it, in accordance with the methods he pointed out, brings present fulfilment of the promises he made. The lame do walk, the blind have their sight restored, the lepers are cleansed, all the discords that are thought to be the dominating factor in human experience vanish, and we know that the Christ is with us and will be, "even unto the end of the world."

[George W. Farlow in *Boston Times.*]

That Christian Science is the same doctrine which was taught by Jesus, is shown by the results which follow its practice, and is attested by the life of its Discoverer. Jesus was the highest human example of the real and spiritual man in the image and likeness of God, Spirit. While Jesus was in a sense the "Son of man," he showed forth in his life the sonship of God. He demonstrated that sonship which came from God, hence the positiveness of his utterances concerning God and the perfectness of his teachings. What Jesus knew, he gave to mankind that they might employ it in their lives and daily practices, thereby making life not a material burden but a spiritual pleasure. He had no time for worldly pleasures; no more have sinful mortals, but they cannot be expected at a single bound to reach the exalted station of Jesus. He taught the perfect plan of salvation and loved only the good, while that which was born of discord was absolutely distasteful to him. Nevertheless, he was filled with compassion for human woe and suffering, and healed the afflicted.

Christian Science healing is accomplished not by "suggestion" nor by "mind over matter," but by the silent recognition that divine Mind is the only power and presence, a recognition which overcomes all the imperfections of mortal existence. In this manner each Christian Scientist becomes his own practitioner, and the divine Mind, omnipotent Love, is the healer. Christian Science does not ignore evil. It recognizes the pretensions of evil in the false human consciousness, and destroys them by the understanding that there is no evil in ever-present spiritual consciousness, and thus evil is overcome by eternal good. It affirms that man in the image and likeness of God cannot know evil, since God is of "purer eyes than to behold evil."

The teaching of Christian Science, like that of Jesus, is not pantheistic. It teaches that God is good, infinite good; that man is His image and likeness, God's reflection; that the creations of God are spiritual, that every creature has its individuality, not as a part of God, but as a manifestation of God. Christian Science does not begin with mortal man, an erroneous representative of God, and thus undertake to determine what God is. It begins with God, the perfect being, to determine what man is, on the basis that man is God's "own image."

Jesus did not confine his words to his day and generation, but declared that all who obeyed his words would demonstrate the Principle which he taught, thus bringing into

Digitized by Google

subjection every phase of mortal existence. Being spiritually minded, Jesus was peculiarly fitted for the demonstration of Truth. He accomplished his works because he understood God and therefore knew how to pray. His work of healing the sick and overcoming discord and sin was done for the purpose of proving the truth of his teachings about God and spiritual existence.

[Algernon Hervey-Bathurst in *General Practitioner*, London.]

I regret that your correspondent "Truth Seeker" should find the teachings of Christian Science so difficult. The fisher-folk, uneducated men, accepted the teachings of Jesus the Christ, and were able to make them practical. Christian Science is merely proving to mankind that it is our privilege and duty today to obey implicitly those same teachings, which must be applied "with signs following." "Truth Seeker" evidently accepts the teaching of "the church" as to the omnipotence of God, and if omnipotence means anything at all, it means all-power; and if God is all-powerful, there is no room for the possibility of any other power, such as the power of evil. This may seem to be a "hard saying," but it is true, and it is exactly what Mrs. Eddy has stated for us in the Christian Science textbook, "Science and Health with Key to the Scriptures."

Because it is true, the students of Christian Science are enabled to prove it through the healing of sin and sickness. Now this healing is nothing more nor less than the knowledge, through spiritual perception, of the truth about evil, viz., that it is not true, or, as Mrs. Eddy has said on page 192 of Science and Health, "evil is not power." I quite agree with what your correspondent says about "science or scientific work," and Christian Science is the Science or knowledge of the Christ, Truth, which leads us out of the belief that we must submit to sin, discord, sickness, or fear; for, as the Master clearly proved, they are not according to the law of God, and there is no law greater than the law of omnipotent God or good. This Science or understanding is gained through repentance, or a change of mind.

A mistake can only be remedied by knowing the truth about it. Jesus taught his disciples the truth about sin and sickness. Christian Science is doing exactly the same by turning every student to the Bible, the teachings of which have become clear, definite, and practical since studied in the light of Science and Health, which is indeed a "Key to the Scriptures."

We have to learn to delight in His goodness, because it is diffusive and universal; and thus may we come to find a new place, a rest, and a home, and an all-sufficiency in the bosom of infinite beneficence. I believe that place will be found. I believe that a new, a higher piety will come. . . . Those who do not believe in human progress may think otherwise, but for me it is certain that this social and moral system of our religion and very civilization is not to run down into an unbelieving, brutish, and godless world. A piety will come which will not be local, occasional, exceptional, but will be the pervading spirit of life,—when men shall not say to one another, "Know the Lord," for all shall know Him, from the greatest to the least. Once let men come to look upon the creation around them as it is; once let them see not things alone, but the divine light and life that stream through them, and then shall every day open revelations, then shall the bird upon the wing and the flower in the field speak to them of God, then shall the ocean roll anthems and the streams murmur hymns, and the heavens shall be telling the glory of God, and the whole earth shall be filled with His praise.

Penned about the year 1866, by REV. ORVILLE DEWEY.

AMONG THE CHURCHES.

BALTIMORE, MD.

At a recent meeting of the members of Second Church of Christ, Scientist, it was decided to build a handsome new edifice on the lot recently acquired at the southwest corner of Mount Royal avenue and St. Paul street. Plans for the building have been prepared, and the work of construction will begin immediately. The design is for an attractive building in the form of a Greek cross, with a seating capacity of twelve hundred, including the galleries, and a Sunday School room seating four hundred and fifty. The lot is one hundred feet square, and the building will be ninety-six feet square.—*Sun.*

VICTORIA, B. C.

The Christian Science society will erect handsome quarters on Pandora avenue. Plans have been prepared for a building to cost between four and five thousand dollars, and the contract has been let. The new building, which will have a frontage of forty feet on Pandora avenue and be seventy-five feet in depth, will be two stories in height in the front position, while the main hall will be one story in height, sixteen feet from floor to ceiling. The building will be of silica brick veneer on concrete foundation. The auditorium will be paneled with native fir, with beam ceiling, and will seat between three and four hundred. Work on the erection of the new building will commence at once and be rushed to completion.—*Daily Colonist.*

WINNIPEG, MAN.

First Church of Christ, Scientist, of this city, has purchased a site for a church building on the corner of River avenue and Lewellyn street in Fort Rouge. The lot has a frontage on the avenue of one hundred and thirty-two feet and is one hundred and twenty feet deep. Located as it is, in one of the best residential districts of the city, and so convenient to a good car service, the situation seems most desirable. It is the intention to erect a church building on this lot which will be an ornament to the neighborhood and city and a credit to the Cause of Christian Science.—*Free Press News Bulletin.*

FORTUNA, CAL.

That the Fortuna Church of Christ, Scientist, does not propose to be without a desirable building site when such a time arrives as seems ripe for the erection of a church edifice is apparent, as two fine lots in the Haight Addition were acquired by the church last Saturday [April 24]. While the Fortuna church has a large membership, and along financial lines is amply able to build, we understand that no such step is at present contemplated.

Humboldt (Cal.) *Beacon.*

LANCASTER, O.

The trustees of First Church of Christ, Scientist, have purchased the Fishbaugh property on North Broad street for four thousand dollars. The house will be remodeled and converted into a church and reading-room.

CHRISTIAN SCIENCE SENTINEL

EDITORIAL

MRS. EDDY TAKES NO PATIENTS.

The author of the Christian Science text-book takes no patients, and reads no letters on disease, distress, or error of any kind. Reliable news concerning Mrs. Eddy will be found in the Christian Science publications.

TAKE NOTICE.

To Christian Scientists:—See Science and Health, page 442, line 30, and give daily attention thereto.

MARY BAKER EDDY.

MRS. EDDY'S STATEMENTS.

Chestnut Hill, Mass., June 7, 1909.

To Whom It May Concern:—

I have the pleasure to report to one and all of my beloved friends and followers that I exist in the flesh, and am seen daily by the members of my household and by those with whom I have appointments.

Above all this fustian of either denying or asserting the personality and presence of Mary Baker Eddy, stands the eternal fact of Christian Science and the honest history of its Discoverer and Founder. It is self-evident that the discoverer of an eternal truth cannot be a temporal fraud.

The Cause of Christian Science is prospering throughout the world and stands forever as an eternal and demonstrable Science, and I do not regard this attack upon me as a trial, for when these things cease to bless they will cease to occur. "And we know that all things work together for good to them that love God, to them who are the called according to his purpose. . . . What shall we then say to these things? If God be for us, who can be against us?"

MARY BAKER EDDY.

Mrs. Eddy also sent the following letter to the members of her church in Concord, N. H.:—

Brookline, Mass., June 7, 1909.

First Church of Christ, Scientist, Concord, N. H.

My Beloved Brethren:—Give yourselves no fear and spare not a moment's thought to lies afloat that I am sick, helpless, or an invalid. The public report that I am in either of the aforesaid conditions is utterly false.

With love, ever yours,

MARY BAKER EDDY.

"THE PUBLIC IS TIRED."

ABOUT every so often some person makes a demand for the moment on the attention of the reading public with a newspaper attack on Christian Science, and tries to bolster up its flimsy tissue with the time-worn and over-worked fabrication that Mrs. Eddy is no longer alive; or, if conceding that she is alive, that she is sick, helpless, or an invalid. While the motive behind these attacks has always become apparent in due time, and there is no reason for believing that such will not be the case so long as they continue to appear, the least that can be said is that this does not mitigate the wrong and wickedness of such an offense.

It is noticeable and significant, however, that the latest of these attacks, which appeared a few days ago, carried with it no conviction of truth either to the public or to the newspapers, and the probable reason for this is explained by the *New York American* in these few simple words: "The public is tired of the hue and cry against Christian Science, and is not a little sympathetic with the dignified lady who presides over the councils of that church."

The policy of Mrs. Eddy and of her followers, in meeting these attacks, has ever been one of kindness and forbearance, without heat or malice or recrimination. This policy was adopted and has been adhered to because it is right and Christian; that it has been effective is equally true, and for the same reasons. Mrs. Eddy's complete refutation of this latest attempt to discredit her and her teachings is given on this page in her own words, through the signed statement which she issued last Monday.

That Mrs. Eddy is in good health and is attending to her affairs and the affairs of her church as she always has done, the writer knows of his own knowledge, by reason of business personally transacted with her no longer ago than last Saturday.

ARCHIBALD MCLELLAN.

THE SCIENCE OF TRUE REFORM.

HUMAN experience presents us with no fact that is more pitiful than that of the apparent defeat of heroism. When men and women have worked faithfully and unselfishly for years, perchance, in the interest of a cause which ought to succeed, and finally lose courage and drop their hands because of the seeming fruitlessness of their efforts,—then one's heart can but grow heavy with its weight of disappointed hope, its protest against the wrong of the apparent failure of the right.

This has frequently been illustrated in the history of temperance reform. With a splendid devotion unnumbered brave spirits have struggled in the past, and are struggling today, to restrain the liquor traffic by hedging about the manufacture and sale of that which despoils the heart of its love, the home of its joy, the state of its integrity. With patient kindness and continuance they have tried to reawaken pride, to rekindle the flame of manhood, to reestablish the fallen ideal, and to fortify moral decision in the men and women who have become victims of drink; and yet how often they have been led to "give up" in utter discouragement. Looking at these and a thousand other heroisms of effort which have proved futile and inadequate, and knowing as they must that truth is mightier than error, that light always dispels darkness, the thoughtful can but realize that either the problems have not been understood, or else that the Principle by which alone they can be solved has not been rightly applied. Everything must be subject to Science, to Truth. "He is able to save unto the uttermost." Why this defeat?

In undertaking to answer this question it is essential for us to understand that while effects, phenomena, may be modified or shifted in their point and order of expression by direct address, they can be eliminated only by the removal of cause. We must also remember that all causation is mental, and hence that all cure or correction must be metaphysical, *i.e.*, by "a scientific mental method" (Science and Health, p. 79). The embrace of these facts is all-inclusive, and every failure of heroism may be traced either to ignorance of them or to indifference to them upon the part of those who have been devoted to human betterment.

If these things are clearly seen, we are prepared to understand Mrs. Eddy's statement that "the temperance reform, felt all over our land, results from metaphysical healing" (Science and Health, p. 404). We begin to apprehend that all true reform must be effected in the same way, and this realization immediately begets a new and larger appreciation of the significance of Christian Science to every human interest. We begin to see that to "preach the gospel" and "heal the sick" is to bring the

Digitized by Google

corrective truth, the Christ-idea, into touch with every false sense and condition by which the abnormity of human experience is causally explained.

The efforts to effect temperance reform by the many well-minded today are worthy of all commendation, since they express the noblest motives, and in an important sense are preparing "the way of the Lord;" but in so far as false belief in the reality of debasing appetite and conditions is maintained by these workers, in so far the gains from their labor cannot prove satisfactory or abiding, since the cause of the evil will remain undisturbed until the darkness of human sense is dispelled. The true healing must be effected by the Christ-coming to mortal thought. This radiation of Truth takes place whenever and wherever spiritual understanding dawns in human consciousness, and he who is living the Christ-life and demonstrating the power of Truth, is daily contributing to the advance of all genuine reform, whether conscious of the fact or not. In working out his own problems he is directly contributing to the solution of the problem of his every brother man.

JOHN B. WILLIS.

"THE PURE IN HEART."

CHIEF among those gems of thought known as the Beatitudes, is this saying of the Master, "Blessed are the pure in heart: for they shall see God." Teachers in Christian Science Sunday Schools may well rejoice at the opportunity given them to lift the thought of their pupils to the spiritual sense of being, found in the opening of the Sermon on the Mount, where the law and the gospel are so wonderfully linked together by Christ Jesus, showing that obedience to the Commandments is only possible where spiritual sense dominates material belief, and where God is known and loved.

The word pure is thus defined in the Standard Dictionary: "Free from mixture or contact with that which weakens, impairs, or pollutes; free from adulteration; unvitiated; unmixed; clear; clean; hence, genuine; sincere; stainless; free from moral defilement; guiltless; innocent; chaste; unsullied." Of old, St. Paul said to young Timothy, "Keep thyself pure;" and Mrs. Eddy says, "It is chastity and purity, in contrast with the downward tendencies and earthward gravitation of sensualism and impurity, which really attest the divine origin and operation of Christian Science" (Science and Health, p. 272). The necessity for purity has been recognized to some extent in all religious teaching, but unfortunately it has in too many instances been shorn of its true meaning and value by material sense. Against this false sense Christ Jesus contended when he said: "Woe unto you, scribes and Pharisees, hypocrites! for ye make clean the outside of the cup and of the platter, but within they are full of extortion and excess. Thou blind Pharisee, cleanse first that which is within the cup and platter, that the outside of them may be clean also." The Pharisees had complained that Jesus and his disciples neglected the ceremonial washing before meals; hence this sharp rebuke.

The cleansing for which the Master contended is aptly characterized by Paul as "the washing of regeneration, and renewing of the Holy Ghost;" or, to quote Mrs. Eddy again, "spiritual baptism and regeneration" (Science and Health, p. 242). This purification removes the elements of earthliness which "weaken, impair, or pollute" both mind and body. Without this cleansing process the impure thoughts of mortals are liable to break out at any time in wicked deeds or in bodily sickness. There is no safety and no happiness for the one who cherishes evil thoughts until these are washed away by the truth.

To all who are "pure in heart" comes the promise of the Master that they shall "see God"—which also means that they shall see good—at every step of the way. Even in medical practice the demand at the present time is for absolute cleanliness, but unless this go deeper than the physical it cannot establish or maintain a health that is worth while. Where the demand for purity springs up in the depths of consciousness, in recognition of the absolute purity of one infinite Father-Mother God, this demand will extend to all the avenues of our being, and will cast out every thing (and every thought) "that defileth, . . . or maketh a lie." The cleansing that stops short of one's thinking can never bring health to mind or body. With purity of heart,—that which springs from the consciousness of spiritual being,—temptation has no power; the clarified vision penetrates the mists of sense and sees God, good, forever triumphant; sees the jeweled gates of the city of Spirit, shutting out all sin, pain, sorrow, and death. Then is seen the life-giving stream which flows from enthroned Life and Love, the thought of which is expressed with great clearness in Wesley's beautiful hymn:

. . . . . .
Let the healing streams abound:
Make and keep me pure within.
. . . . . .
Thou of life the fountain art,
Freely let me take of thee:
Spring thou up within my heart,
Rise to all eternity.

ANNIE M. KNOTT.

LETTERS TO OUR LEADER.

London, England, May 5, 1909.

Dearly Beloved Leader:—Today I visited the British Museum with its world-famous collections of rare antiques, and amidst the millions of books in its colossal library I sought out the precious volume, one of the first edition, which you sent them in 1875. After some time I found the identical book, well preserved after its years of usage, and opened it to page 363, the chapter on Physiology, lines 3 and 4. "But what a task! say you, to teach the present age Mind's control over the body." Dear Leader, the present age has learned somewhat this control, through the wonderful example which you, the wayshower to it, have given. On page 456, line 1, I read, "Truth cannot be lost; if not admitted today in its fulness, . . . future years will point it out, and restore at length the fair proportions and radical claims of Christian Science." This great prophecy is so true, especially of this dear country England; the Cause of Christ is now growing so rapidly here and the wonderful demonstrations at the Wednesday evening meetings are many and beautiful. The thoughts of gratitude for you and your labors of love could fill volumes, and would rejoice your heart to hear.

I only know that I can show my gratitude by living in the way you have pointed out.

Tenderly, gratefully yours,
M. PHILIP JONES.

Chicago, Ill., May 25, 1909.

Beloved Leader and Teacher:—As I think of the past this seems a sacred place to me. In June, 1888, I listened to your address, "Science and the Senses," then attended the reception you gave here at the Palmer House that evening. It was all so wonderful to me; you seemed so beautiful and gracious. I have never forgotten any detail of that experience. My love and gratitude for what you have given us seems to increase as I can understand you better, and this love begets obedience.

When a child, my mother would tell me not to believe the ghost stories that were told me, and because I loved her I tried to obey. Much more, out of love for you, am I striving to obey your teachings.

Sincerely yours,
CHARLES M. HOWE.

Plymouth, England, May 23, 1909.

Beloved Leader:—We, the members of the Plymouth Christian Science Society, send this, our expression of love and gratitude, from the old town from which the Pilgrim Fathers embarked. They went forth in search of freedom, and from their search has come a glorious liberty which is freeing the whole world from sin, disease, and death. England gave America of her best. She is now reaping a thousandfold in return.

Our little society here is growing slowly but steadily. We have just moved into new and more suitable rooms. Our lecture, given by Dr. Fluno on April 20, was well attended and has already borne fruit. The literature is being distributed, and the latest addition, *The Christian Science Monitor*, is greatly appreciated. We are all striving to follow in the path so clearly pointed out in your wonderful book, "Science and Health with Key to the Scriptures," and to be led by God, divine Principle, to be lighted by Christ Jesus, and to be upheld by the Comforter, divine Science. Yours in truth and love,

ALFRED EVANS, *President.*
HUGH MCCULLOCH, *Clerk.*

Riverside, Cal., May 22, 1909.

Mrs. Mary Baker Eddy, Brookline, Mass.

Dear Leader:—Just a few words in loving gratitude for help which came to me through your poem "Christ and Christmas." I have owned a book containing the poem since the year 1897. I have read and enjoyed it many times, and a few weeks ago, when in extreme need of higher understanding, my thought turned to the above-named book. I studied the poem with its illustrations and Scriptural texts, and words cannot express how much they meant to me, breaking down the barriers of sense and leading thought onward, upward. Your writings never grow old, but unfold more light when consciousness is ready for it. In tender love and obedience, I am

Sincerely yours,
IDA LAWTON.

Chicago, Ill., May 24, 1909.

Dear Mrs. Eddy:—As I listened to your message at the early service in Boston in 1906, I rejoiced greatly because I realized that divine Love always protects those who wish to manifest purity and goodness. Of late, when the battle between hate and love has seemed strenuous to the senses, I have listened to Mind, and these passages have come to thought: "You do not have to fight in this battle;" "Stand still and see the glory of the Lord revealed;" and dearest of all to me, "Divine Love cannot be deprived of its manifestation, or object" (Science and Health, p. 304). I love you because you manifest the infinitude of Mind, and I know I can do the same and thus prove my love.

Lovingly yours,
JUNE L. REED.

Chicago, Ill., June 1, 1909.

Dear Leader:—Let me thank you for the article "Class Teaching" in the *Sentinel* of May 29. It has been my great privilege to receive class teaching nearly one year ago from one worthy the name of teacher, whose faithfulness to you and your teaching made him indeed able to elucidate the Principle and rule of Christian Science through the higher meaning of the Scriptures. After waiting nearly twelve years I wish I could tell you my joy upon being received into class. My heart went out in loving gratitude to you, that through the study of the Bible and your inspired writings this opportunity had been given to me. The words of Jesus, full of life eternal, poured into my consciousness as never before. I hope to gain more and more of the child heart; a willingness to receive all that your wisdom designates for my progress.

May I learn, more and still more, to kneel before the "white Christ," as you do, dear Leader.

Lovingly,
EDITH I. DUDLEY.

Berlin, Germany, May 8, 1909.

Mrs. Mary Baker Eddy.

Beloved and Revered Leader:—We, the members of Erste Kirche Christi, des Scientisten [First Church of Christ, Scientist], Berlin, Germany, in regular meeting assembled, wish to send a unanimous expression of our love for you, the Discoverer of Christian Science; and of our heartfelt gratitude for your divinely inspired guidance, for your ceaseless labors in our behalf, and for the loving wisdom which has protected and made possible the growth and prosperity of this most blessed Cause. We recognize as one of the great blessings which comes with an increased understanding of Truth, the greater ability to comprehend, appreciate, and imitate more and more your selfless, consecrated, and noble life. This consciousness causes our hearts so to overflow with thankfulness to you, our truest friend (John xv. 15), that the desire to let our lives, more than our words, testify to the sincerity of this sentiment, is tonight uppermost in our thought.

We who, to sense, are afar off, realize perhaps more fully than those who are nearer, the helpfulness of knowing that "unity is the essential nature of Christian Science. Its Principle is One, and to demonstrate the divine One, demands oneness of thought and action" (Miscellaneous Writings, p. 264). How often do we hear the words, "Could our dear Leader only see the earnest, interested faces of our large German congregations!" They listen so eagerly to the reading of the Bible and the correlative passages from Science and Health and testify with so much gratitude to the many blessings which have come into their lives through the truth as revealed to your pure consciousness. They realize that your love for mankind has given them the dearly prized Christian Science literature in German, and their gratitude for our priceless text-book is evidenced in the earnest efforts of those who have known no English, to learn to read "Science and Health with Key to the Scriptures," and it is further manifested in the healing works.

Thanking God for you, and thanking you for the unutterable self-sacrifice and labor which has made our joy possible, we subscribe ourselves, in loving assurance of devoted, faithful obedience,

Your loyal followers,
PAUL HUESGEN, *First Reader,*
BEATRICE CLIFFORD, *Second Reader,*
SUE SPENCER, *Chairman.*
Committee.

The following letter was written to Mrs. Eddy's secretary:—

Toledo, O., May 28, 1909.

Dear Mr. Dickey:—Some day when there are no flowers for the corner room, will you use the enclosed for some Killarney roses, and tell our dear Leader that they are from me with my best love. You may also say to her that I never appreciated, honored, and loved her as I do now, and that each day I value more the wonderful experience which was vouchsafed me in being with her in her home. I am constantly thanking God for it. Remember me to the other dear students, and with loving friendship for you always, believe me,

Yours in truth,
ELLA W. HOAG.

THE LECTURES.

PASADENA, CAL.

A very large and attentive audience greeted Prof. Hermann S. Hering of Concord, N. H., at the Christian Science lecture given under the auspices of the local Christian Science church last evening [April 11] in Woodmen Hall. Professor Hering was introduced by C. P. McAllaster, who said in part,—

There is a great deal of popular misconception regarding the place of physical healing in Christian Science teaching, and of the aim and purpose of the lectures which are given from time to time under the auspices of the different Christian Science churches. Healing is not, as many aver, all there is of Christian Science, nor is it the object of these lectures to proselyte. Christian Scientists believe that healing will follow as a natural and inevitable consequence of the right understanding of Jesus' life and teaching, and that in doing this healing they are simply showing their faith by their works.

When John sent to Jesus to inquire, "Art thou he that should come? or look we for another?" according to the account in Luke, Jesus gave no direct reply, but, after performing many miracles of healing in the presence of John's messengers, he said, "Go your way, and tell John what things ye have seen and heard; how that the blind see, the lame walk, the lepers are cleansed, the deaf hear, the dead are raised, to the poor the gospel is preached." Thus early in his ministry did Jesus acknowledge the transcendent importance of this truth, and later on, what did he give as the test of understanding on the part of those who should follow him.

And now, after nearly two thousand years, we hear the voice of a new evangel calling us back to the old faith: and this we believe to be the message of Christian Science, to bring us back to a correct understanding of the Christ-message: to bring to this age anew the understanding that God is "the same yesterday, and to day, and for ever;" that we are His children as really and as truly as the spiritually-minded fishermen of Galilee in Jesus' time, and that there is not one proof of His love, His omnipotence, and His brooding care, that was vouchsafed to them, that is not equally available to us if we but follow in the footsteps of the Master and spiritually comprehend the Principle which he taught and practised.—*Pasadena Star.*

OKLAHOMA CITY, OKLA.

Frank H. Leonard of Brooklyn lectured before an immense audience at the Overholser last night [April 27]. O. P. Workman introduced the speaker and spoke in part as follows:—

God in His infinite wisdom has used and does use human channels for bringing His messages of truth to mankind. It is worthy to note that truth is always presented at some particular time and by some special person, when some people are ready to receive it. Jesus himself, the greatest demonstrator of truth that the world has ever known, came at a time when a few people were willing to receive the truths he taught; and directly, in proportion to the understanding that they had of his truths, were they given power and dominion over evil, as promised by God Himself. And while about his work among the people in the mountains of Judea and the valleys of Galilee, teaching the truth, uplifting mankind, healing their sins and sickness, bringing them out of the shadow into the sunshine, some people understood in a limited way what he taught. This accounts for the great religious reformations and reformers: the Luthers, the Wesleys, Alexander Campbell, and the present great reformer, Mrs. Eddy. Christian Scientists do not believe that she has brought any new truth to the world, but that in her higher spiritual interpretation of the Scriptures she has disclosed more of the truth.—*Oklahoma City Times.*

PLYMOUTH, ENG.

A lecture on Christian Science was given by Francis J. Fluno, M.D., in the Corn Exchange, last night [April 20], to a large audience. Major the Hon. W. C. Rowley (London) was the chairman, and the only individual besides the lecturer on the platform. In his opening remarks the chairman said the subject of the lecture was the burning question of the day. A few years ago people talked and thought very little about religion. Now everybody talked about it. They could not go anywhere without hearing Christian Science mentioned, and those who understood it knew that it had come to stay and would do good. Those who were Christian Scientists knew the good it did, that it helped men to lead new and better lives.

Western Mercury.

ST. LOUIS, MO.

In introducing Judge Septimus J. Hanna at Second Church of Christ, Scientist, May 2, Frank B. Nuderscher, First Reader, spoke in part as follows:—

As Elijah heard the "still small voice" on Horeb's height, and in it recognized the strength and power of God, so today the seeker for a fuller and deeper interpretation of mental and physical phenomena may hear the still small voice of a regenerating, uplifting, and healing religion echoing in our land. As Jesus answered the inquiries of John the Baptist with an affirmative reply, recounting his works instead of referring to his doctrines, so the Christian Scientist of today, as a true and faithful follower of the teachings of Christ, must show through his works that he possesses and reflects the same Mind that was in him. Jesus said, "Ye shall know the truth, and the truth shall make you free." Is not Christian Science the still small voice of Truth? The thousands who have been benefited in mind and in body, who have been, as it were, raised from death; the thousands who have been saved from a life of agnosticism or unbelief and an existence without hope or God in the world,—bear grateful testimony to the healing, uplifting, and regenerating influence of Christian Science.

While the civilized world for nineteen centuries has acknowledged an ever-present, all-powerful, and all-wise God, and while we are not presenting to you a new religion, creed, or dogma under a name understood only by searching for its derivation, we are giving to you a spiritual interpretation of the Scriptures as taught and practised eighteen hundred years ago by Christ Jesus and his apostles; truths founded upon a rock, eternal as the heavens, unequivocal in their demands, and which, if faithfully and spiritually followed, will enable each and every one to do the work that Jesus did, and commanded his followers to do. That the prayer of faith is powerful, and that a scientific understanding of God, omnipresent and omnipotent good, does heal the sick and save the sinner, is the premise upon which Christian Science bases its teachings.

TESTIMONIES OF HEALING.

I desire to give this testimonial, as I feel sure it will comfort some anxious parent. A short time ago our little seven-year-old boy suddenly complained of severe pain in his left leg. I examined him, and found to my great astonishment that this leg was noticeably shorter than the other, also that it was very crooked. I talked to him and gave him a treatment in Christian Science, and he was soon asleep. The next morning the pain was gone, also the fear and distress which he had manifested the evening before. He, however, limped very badly and presented such a crippled appearance that several members of the family insisted upon my taking him to a specialist. I did so, and explained first of all that we were Christian Scientists and therefore did not wish any medical treatment whatever; but that the family were desirous of knowing just what the trouble was, so I had brought the child for an examination.

The diagnosis gave a very serious outlook, the hip-joint being pronounced immovable, etc. The doctor said that this disease crept on very slowly, and was months in developing, but the crisis came suddenly from over-exertion or a fall. He took no trouble to conceal his astonishment and disgust at the stand I had taken, and tried to frighten me if possible. He said that I must remember it was my own flesh and blood I was dealing with, that I must bring the child again in a week, and he hoped I would then listen to him and have the boy put into a plaster cast. For the present he desired me to use certain material means, and keep the child lying in bed. I replied that the first two things I should not do, but as the child was naturally very active I would keep him quiet for a few days.

I then went to a Christian Science practitioner, but she was not in; so I returned to our home in the country and continued to give the child treatment for three days. During this time he sat up in bed all day and played. After that some home duties called for my attention, so I wrote to the practitioner to give the boy absent treatment. The child then got up every day, and only occasionally rested on the sofa. The following week, or to be exact, just ten days from the first visit, I again took him to the doctor, and he was a surprised man when on examination the hip was found to be in perfect condition, and the leg the same length as the other and perfectly straight. Then the doctor said he must tell me that when he saw the child the week before he was very much frightened, and that he could only rejoice with me over the successful result. He said, however, that the flat foot needed attention, and I must have a steel brace put in his shoe. It is needless to say the brace was not put in, and in another week the instep had regained its normal arch and the ankle-joint its flexibility.

BARONESS KATHARINE VON ROSENBERG, Bonnewitz, Post Lohmen (near Dresden), Germany.

In asking for Christian Science treatment I did not realize the great change it would make in my life, as I was looking only for the physical healing, and told the practitioner in a letter I wrote to her—meaning at least to be honest—that I would not promise to do any reading, but wanted the treatment for severe headaches and other ailments with which I had suffered for years. I am often grateful now that she took my case, as I know how much more the spiritual uplifting means than the physical healing, although I have had both bountifully and am daily growing into a more perfect understanding of true health and strength.

The friend who prevailed upon me to have Christian Science treatment, loaned me a copy of the text-book, Science and Health, and with a wish to give Christian Science a fair trial, I began to read, knowing it was supposed to help in the healing process. I kept it up about three days, but did not seem to understand much of what I was reading. Then I decided to start at the beginning again, saying that others had found good in the book, and I could find it too. I began at the Preface, and read the first sentence, "To those leaning on the sustaining infinite, today is big with blessings." At once I remembered that I did have some blessings, and many things to be grateful for. From that time my condition improved, but soon I began to wonder if Christian Science really had helped me much, or if I would have felt better anyway. However, one evening I had a very convincing proof that Christian Science does heal, and quickly too. I had been busy all day during a housecleaning period, and early in the evening collapsed suddenly and had to go to bed. For a couple of hours the pain was very severe; then my husband telephoned the practitioner, and she at once began treatment. In a very few minutes I was lying quietly on the pillow, and in less than half an hour was asleep, waking but once during the night. This was certainly a proof that the "word of God is quick, and powerful, and sharper than any twoedged sword," and such a blessed relief from former experiences under similar conditions, with a long night spent in suffering and in trying the different remedies we believed to be beneficial.

When I asked for Christian Science treatment, I gave up the glasses which I had worn for several years, though the specialist who had performed the operation on the left eye for a muscular trouble, told me I must always use them. It is now three years since my first treatment in Christian Science, and I have never had any occasion to use glasses. Through the understanding I am gaining of the truth as taught in Christian Science, I have been able to make some good demonstrations for myself, one a few weeks ago over a skin trouble on my face. I did not pay much attention to it at first, but when it began to be quite noticeable I realized that I must do some good earnest work. In studying the Lesson-Sermon that morning, I resolved to apply each and every statement to the case, and in realizing that "God is the universal cause, the only creator" (Science and Health, p. 331), the demonstration was made in the one treatment, the effect of the poison was destroyed, and the healing proceeded rapidly.

For all the physical healing I am very grateful, but infinitely more so for the spiritual uplifting, and for the desire to think rightly and to do unto others as I would have them do unto me; also for the understanding that Christian Science does bestow all good, and takes away nothing but the unworthy. I have such a feeling of gratitude for the help extended me in the upward and onward journey from sense to Soul. As for our dear Leader, Mrs. Eddy, I am realizing more and more each day the magnitude and grandeur of the work she has already done and is doing, and with that realization a larger sense of love and gratitude goes out to her who has so steadfastly and faithfully pointed the way.

CAROLINE J. WOLEVER, St. Paul, Minn.

Last winter I was taken ill, and had to leave my work at noon and go home to bed. Three hours later I received word that I would have to leave town at midnight on business, so the practitioner was called. I was given treatment, and I left on time and in good health.

Myself and family feel very grateful to Mrs. Eddy for Christian Science, and for the many blessings we have received. I write this testimony with the sincere hope that it may come under the eyes of some unfortunate unbeliever, and help him to see the truth.

HARRY G. CARTER, Helena, Mont.

Digitized by Google

There is so much in the little word "sure." It expresses the certainty which one can feel of safety through the varied experiences of daily life, and it must come from deep underlying assurance of the ever-presence of God. Many of us seem to wander along, perhaps meet with defeat and disappointment in spite of our best efforts, until we learn the power of spiritual understanding, as revealed in Christian Science.

My recent healing of a terrible illness impels me to send to our periodicals a grateful acknowledgment of the divine comfort and help which came to me through my understanding of the teaching of the Bible and "Science and Health with Key to the Scriptures" by Mrs. Eddy. For two days and nights I was very ill, but every distressing condition disappeared into its native nothingness. The word "sure" seemed to be with me all one night, when I was suffering from a distressing throat trouble, accompanied with pain and a high fever. That one word seemed to sound with every heart-beat,—as Paul says, "The foundation of God standeth sure." Toward morning these words by our dear Leader came to me:—

> O gentle presence, peace and joy and power;
> O Life divine, that owns each waiting hour.
> *Miscellaneous Writings*, p. 389.

Then I could remember no more. With returning thought came the realization of the allness of God, Spirit, and the scientific statement of being (Science and Health, p. 468), with the correlative verses from 1 John iii. 1–3. These helped me, and I was cared for. After a short nap I arose and prepared the breakfast. Strange as it may seem, I ate my breakfast quite naturally. I read the Lesson-Sermon twice a day for my healing medicine.

In comparing the 91st Psalm as found in the authorized version of the Bible with the text as it appears in the "Breeches Bible," published in 1611, the truth is made beautifully plain. The latter reads in the fourth verse, "He will cover thee under his wings, and thou shalt be sure under his feathers." When I read, "Thou shalt be sure under his feathers"—I knew that the Christ-healing had sustained me through my struggle. Times without number, during the past eleven years, we have had many proofs of God's constant care. When I think on these proofs I am filled with joy and gratitude to God first of all, and then to Mrs. Eddy and to all who have helped me on my journey up the hill of Christian Science. The Bible has become a blessed friend and loving comforter. Christian Science teaches us how to profit by experience, and by turning to the Bible and Science and Health for our guidance and comfort we may prove that God is the same to us as He was to Moses or Joshua, in proportion to our understanding of Him. Jesus taught plainly that he (the Christ) would "show us of the Father," and Paul said, "For ye are Christ's; and Christ is God's."

I was always searching but never finding, until the Christian Science text-book was handed to me by a loving friend, who told me that when I had gotten through with material means I would be helped. So it proved, and my healing of many complaints was sure and lasting. The upward journey has not been an easy one, but it has been joyous, and if the steps have been slow they have been sure.

LOUISA R. FORD, Newton, Mass.

I was a sufferer from kidney and rheumatic trouble for years, at least that is what two well-known doctors told me I had, and in the worst form. A prominent doctor of this city gave me only one year to live. This was three years ago. He placed me on a diet which almost starved me. I had commenced treatment with another doctor when I was taken with a severe attack of illness. I was getting about on a crutch and cane when some one advised a trial of Christian Science treatment. This was about the only thing I had not tried, and I made up my mind to look into it; which I did, and commenced to take treatment. From the very start I felt like a new man and today I have the best health I ever had in my life. I have no more of the rheumatic or kidney trouble, and I eat anything I choose.

When my friends stop at my place of business and ask me what I have done to bring about the improvement and change they see in me, I simply tell them that Christian Science is good enough for me. May God bless our faithful Leader, Mrs. Eddy, who has given us this enlightenment.—WILLIAM J. COULSON, Albany, N. Y.

When I first became interested in Christian Science I was wearing glasses, but I was soon enabled to lay them aside through the reading of our text-book, and by holding firmly to the "scientific statement of being" as given on page 468 of this book. I have enjoyed eight years of freedom without the glasses, and see better now than ever before. Stomach trouble was healed in one treatment from a practitioner. A second attack, which assailed me when entirely alone, was overcome and totally destroyed through the realization of this statement from Science and Health: "Mortals will some day assert their freedom in the name of Almighty God" (p. 228). Headaches were slower to yield, but now they are as a dream. Today I am rejoicing in perfect physical freedom, and also in a measure of spiritual understanding which enables me to help others.

For all this I am grateful to divine Love, and to our dear Leader for sharing with us God's precious gift to her.

EDNA M. RASTERT, Cincinnati, O.

About eight years ago I was healed in Christian Science of acute lung trouble in a few treatments, and three years later I was healed of a growth in my side that had assumed an alarming size. Since then many other troubles have yielded to the truth, and I have enjoyed good health. Christian Science has opened to me a new view of life, and I feel a deep gratitude to our beloved Leader for showing us the way to health and holiness.

PHEBE A. GILLETTE, Chicago, Ill.

After suffering many years with severe stomach trouble I was healed in Christian Science. During these treatments the habit of smoking gradually left me, also the use of profanity. The study of the Bible in connection with "Science and Health with Key to the Scriptures" has eradicated from my thought so many illusions that words are hard to find with which to express my gratitude to God and to our dear Leader for this wonderful change that has come into my daily life and my business.

WILMARTH B. GILLETTE, Chicago, Ill.

In the summer of 1906 I was healed of a severe attack of fever. In less than a week I was able to be about my work, and in two weeks felt as strong as ever. Very soon after taking up Science, about five years ago, I left off my glasses, which I had worn for years for serious eye trouble, as I had been told by an oculist that I could never do without them. I have been more free from headaches since that time, and have used my eyes constantly in reading, bookkeeping, etc. Other members of my family have been healed, and in other ways greatly benefited by Christian Science, mentally as well as physically.—MRS. P. S. HESSLER, Denver, Col.

It is now more than ten years since I first knew of Christian Science and its wonderful healing. My knowledge of it came through the healing, in Emporia, Kan.,

Digitized by Google

of a poor woman afflicted for fourteen years. She had been an invalid most of the time, and had tried all the material remedies available, but found no relief. After taking six weeks' treatment in Christian Science she was healed, and gained enough understanding of the truth to make some good demonstrations for others as well as to help herself. I felt that this truth could heal me as well as others, so I purchased a copy of "Science and Health with Key to the Scriptures" by Mrs. Eddy, and began to read it; but, failing to understand what I read, I became discouraged and laid the book aside. As years passed by, however, I would often take up the book and try to read it understandingly, but each time was met with the same discouragement. In the mean time I had a trouble in one breast, and my husband said I must call a doctor and let it be lanced. The suffering was terrible, and I knew I could not bear it much longer, but I had more faith in the healing power of Christian Science than in a surgeon's knife. So I wrote to a practitioner for help, and one treatment healed me. This great help convinced me that I must gain an understanding of the truth, and again I tried to read; but I lived where there were no Scientists, so could not get the encouragement or explanation which I felt I needed.

In November, 1907, I took a severe cold, which seemed to affect my lungs and which hung on tenaciously for over three weeks. I used material remedies all the time, but grew worse daily. I again wrote to the Scientist for help, and after one week's treatment I was much improved, but it was three weeks before I was free from the pain in my lungs and a severe cough. The mental trouble which had seemingly brought on the illness was of such a nature that I could not put it down, consequently I decided to go where there were some Scientists, that I might have the privilege of attending their services and of learning more of this great truth. By hard work and great sacrifice I have succeeded in locating where for five months I have had the blessed privilege of attending services, and I am thankful for the help I receive from the Lesson-Sermons. I do heartily appreciate Mrs. Eddy and all her good works, and I love the Christian Science literature.

MRS. L. D. NORVILLE, Sinkin, Mo.

In grateful acknowledgment of countless blessings received, and in recognition of the accurate results obtained through the application of the simple definite rules in Christian Science, this testimony is sent. Christian Science has been relied upon in my family and among my friends, and through its application serious throat trouble, fever, rheumatic and paralytic trouble, besides many minor difficulties, have been overcome. A sense of injustice has been destroyed, and in its place has come a better knowledge of God's government. I am very grateful to Mrs. Eddy for this gift to us,—this wonderful revelation of Christian Science,—and also for our literature.

MRS. EMMA N. HICKS, Oswego, N. Y.

Almost three years ago I learned for the first time what Christian Science really is; also what it was doing and could do for suffering humanity, including myself. After I had become slightly interested, I awoke one morning with a severe attack of throat trouble. Some friends who were at my home were very much alarmed when they found that I could hardly swallow water. I had had a similar attack twice before and knew the symptoms well, and with the previous cases found it necessary to undergo severe medical treatment. In this instance, however, a Christian Science practitioner was called. She came in with a reassuring greeting, then stayed a short time to give me treatment. The next day the pain was wonderfully lessened and the swelling entirely gone. I called the following morning at the practitioner's office, perfectly healed.

This is only one of the many proofs I have had that this truth does heal all our diseases. Since then I have been healed of catarrhal and stomach trouble, colds, severe biliousness, and headaches. It is a great privilege for me to testify to this power of God, and to express at least some of my sincere gratitude to our dear Leader, Mrs. Eddy.—ADA KATHRYN DEAL, Canton, O.

About seven years ago, after suffering for months with rheumatic trouble and not receiving help from my physician, I went to see a Christian Science practitioner. I was entirely healed in two or three treatments, and the healing has been permanent. About a year from this time I had a severe attack of illness, suffering intense pain for hours. After trying all the remedies known to *materia medica*, I again turned to Christian Science. It was about twelve o'clock at night, and as I had to walk several blocks I woke my daughter and requested her to go with me. We reached the practitioner's in a few minutes, and in less than a half hour I was returning home without any sense of pain, being perfectly healed. For the physical healing at these times I am very grateful to Christian Science, and my heart overflows with gratitude and love to God, and to our dear Leader for the spiritual light I am receiving each day.

MRS. PHOEBE SANOR, Palo Alto, Cal.

[Translated from the German.]

That Christian Science is the truth which makes free from all evil, it has been my privilege to experience repeatedly. I would like to tell of a beautiful proof. Inadvertently I swallowed a small piece of glass, which lodged in my throat. I felt great pain and the throat began to swell. I therefore started immediately to a Christian Science practitioner to ask for help. During the drive in the car the pain became more severe, and when I reached the home of the Scientist I could hardly speak. She immediately set to work for me, and after a short while the pain and the swelling lessened, so that I could breathe more easily. After a while I left the Scientist, who continued to help me. This was late in the afternoon, and in the evening of that same day I attended a meeting. By that time I had but little difficulty in swallowing. I slept very well during the following night and felt quite free the next morning. I knew, however, that thoughts of fear surrounded me, and as I ascribed power to them, I again felt difficulty and pain in swallowing. In the afternoon the Scientist called, treated me, and told me that wrong thoughts could have no influence, for God's thoughts alone have power, and they are good. The trouble soon disappeared, and for this I am very thankful.

I felt still more gratitude, however, for the spiritual help which I received on this occasion. I again took a little step farther in the understanding of the truth. This is only one of the many cases in which I have found help in Christian Science. For instance, at the birth of our little son two years ago I experienced the power of divine Truth in a wonderful way. I am grateful indeed that God has led me into the way of the Christ-healing, in which I can find help for every need; and I thank Mrs. Eddy, who has explained to us this way.

FRAU HILDEGARD KRETZSCHMAR, Dresden, Germany.

I am exceedingly grateful for the benefits received from Christian Science, and wish to tell others of my experience, hoping that by so doing I shall be enabled to help some struggling one to accept this truth which sets us free from

Digitized by Google

the mortal sense of things. I had been an invalid for some time, and unable to do my housework. I was then treated in Christian Science, was healed, and can now work beyond any one's expectation. About this time I was left alone with two small children to support, and a mortgage on my home, but have now paid off the mortgage, besides making considerable improvement on my place, and have also bought more property,—all by my own labor. Christian Science has been the means of all this being "added" to me.

One day when I was suffering from a high fever, I sent for a Scientist to treat me. In a few hours the fever was gone and I was well. No one can be more thankful for Christian Science than I. Science and Health is my constant companion and lies open by my side while I am at my work.—MRS. CARRIE BROWN, Lawton, Okla.

Christian Science has been of great help to me. From being in a weakened, suffering condition, I have gained in health and strength, and the world is beautiful to me again. I had a bad internal trouble, which caused me as well as my friends much worry and fear as to final results. I had two operations at intervals, and at the time of which I am writing, in May, 1907, I was as ill as ever. Our doctor had warned me that I would have to undergo another operation, but my sister-in-law, who is a Christian Scientist, told me something of the cures that are being accomplished through this healing truth, of the great good that is being done, and I, fearing and dreading the seemingly inevitable operation if I continued under the doctor's care, bought a copy of the text-book and began its study. Soon after this my sister wrote a practitioner, who lives hundreds of miles away, for assistance; and in two weeks from this time the trouble left me.

The following January I visited in Chicago for a time, and while there I attended a Christian Science Wednesday evening service with a friend and heard testimonies of healing. One evening we were obliged to wait a long time on the street for a car, and as the night was cold I got badly chilled. There was a pain in my chest and a feeling of illness, but remembering my former experience in Christian Science I repeated the scientific statement of being (Science and Health, p. 468) almost the night through, and was able to return to my home the next day, which was on Thursday. I, however, grew worse after reaching home, and wanted Christian Science treatment; but my husband objected to this and insisted on getting a doctor. This was Tuesday and my condition was very bad. The physician came, and said it was a serious case of lung trouble, and that it would be necessary for me to remain in bed for several weeks. Wednesday he came again and said the fever was very high. My husband was obliged to go away the following day, and it seemed the hand of God was in it, for the sister with the knowledge of Christian Science came to take care of me. When my husband had gone I took off the cotton head covering, and the fever left me almost immediately. My faith in God and in Christian Science never wavered, although at this time the symptoms were very alarming. My sister-in-law read Science and Health to me, and soon I wanted something to eat—I had not eaten anything for several days. That night I slept quite well, and was much better next morning. I sat up an hour that day, and the next I was up all day. We read and talked about Christian Science a great deal in the three days in which the healing process was going on, and I did my work from that time on.

A trained nurse who heard of my case asked about it, and on being told the symptoms and conditions expressed herself to the effect that under *materia medica* I would have been in bed at least three weeks. After considering the subject, she has since said she should give up nursing and take up the study of Christian Science. I study constantly this healing truth, and can truly say I am well, for which thanks are due to God through Christian Science.

CHESTINE BERNARD, Serena, Ill.

For about fifteen years I had suffered from rheumatic and stomach trouble. About three years ago I had an attack which lasted about five weeks, during which time I was allowed to eat only the lightest food. I had the attention of one who was known as a leading physician of the town, but without any relief. At that time one of the firm was required to go to Kansas City, Mo., on business. As I was too weak to do any hard work, and it was thought the trip would do me good, I was chosen to go.

When I arrived at Kansas City, I went to see a cousin who is a Christian Scientist. After telling her my troubles and what I had come for, she told me to eat anything that was placed before me and she would help me until I returned home. About half an hour after I had left her I sat down to what is called a good, hearty German meal, and I want to say that I ate as much as two men generally eat, seeing that I was almost starved. After dinner I looked for the pain, but it never returned. When I returned home I employed a Christian Science practitioner, and after three weeks' treatment I was healed of the rheumatic trouble. I am thankful to say that with my slight understanding, and with "Science and Health with Key to the Scriptures," I have been able to meet all physical troubles that have since come up, as well as to receive mental comfort. I am thankful for the literature of this Science, and the benefits to be derived therefrom. I never miss the church services as I find them very helpful.

CHRIST. H. ASEL, Jefferson City, Mo.

[Written for the *Sentinel*.]

MY HARP.

MARY I. MESECHRE.

A SILENT harp is mine. Its strings are still,
The while they wait their unknown master's will.
Dumbly it stands, entreating silently
Each passing hand to try its chords, and see
If he whose magic touch shall music wake
May not be near. But, though they rust and break,
The strings are voiceless. Till its master come
My harp stands waiting—ready, aye, but dumb.

A jangling harp is mine. A curious eye
Espied it, and upon it carelessly
Smote with unguarded hand, and jarring sound
Sprang from its strings, where silence so profound
Before had rested, and its peace has fled
As on swift wings, and discord reigns instead.
Oh, that some gentle hand would calm evoke,
Or e'en the former silence, ere it spoke.

A singing harp is mine. The master hand
Hath touched the strings, and I rejoicing stand,
While from my lips the melody outwells
In waves of praise that every woe dispels.
Beneath Thy mighty power I gladly yield,
That through my voice Thy love may be revealed,
Till to Thy lightest touch my soul shall thrill
In rapture all divine, to do Thy will.

Be there no more dumb harpstrings in my life,
No more that answer to the voice of strife,
But let me evermore Thy minstrel be,
The utterance of a life attuned to Thee.

FROM OUR EXCHANGES.

[*Standard.*]

In every community are men and women who are not avowed disciples of Jesus Christ, neither are they entirely indifferent to Christ's claims upon them. They may be found among those who meet for worship from Sunday to Sunday, and they contribute to the support of the varied undertakings of the organizations with which they are affiliated. In not a few instances they have lost confidence in the genuineness of Christian profession. It appears to them that those who are known as Christians come far short of exhibiting the devotion which is essential to Christian character. They look across the centuries to Jesus, listen to his teaching, note his demands upon his disciples, and then mark the grasping, selfish lives of many of his avowed followers. We cannot wonder that they are perplexed. If they sometimes question whether or not discipleship to Jesus really makes any radical change in character, their doubt is not without explanation.

[Rev. John McDowell in *New York Observer.*]

If the Christian ministry of the twentieth century is to be the true successor of the stalwart Hebrew prophets, it must serve as a "public conscience" to society as a deliverer of God's views concerning national as well as individual life. But we are told in our day that Christ and not the prophets is the example we are to follow in all matters of faith and practice, and further, that Christ did not make pronouncements upon social or public questions, so far as the records show. Some pious people carry on their spiritual culture aloof from the citizen's province on the theory that they are "dead to the world." Dr. Campbell Morgan says, "Then such people should bury themselves at once. If you are dead to the world, you have no business so much as to live next door to a man who is not dead to the world—you have no right to take the benefits of the city and the nation."

[Rev. Samuel D. McConnell, D.D., at Church Congress, Boston.]

Christ asked not for belief but conduct, and I doubt if one of the apostles of his time would subscribe to any present-day faith. It has come about that the term orthodoxy is today a term of honor, while free-thinking is a term of opprobrium. Of the great leaders in business and professional life, nine tenths are aloof from the church, yet they are as reverent as we within. That they suffer loss from separation from Christ's body is plain, and the church also is a loser. There has been a disposition in the intelligent world to confuse orthodoxy with Christianity.

[Rev. Frederic W. Perkins, D.D., in *Universalist Leader.*]

Jesus was indeed a mighty believer in God and man and invincible goodness, but all his talk is of life and you are aware of the heart-throbs of his mighty beliefs only as you are aware of the throbbing dynamo in the light that floods the room. The popular verdict of religious liberalism is sound that religion is life; and so completely does vital religion absorb its involved beliefs into the very structure of its being that the beliefs may easily seem to be unimportant and negligible factors in the result.

[Rev. P. T. Forsyth, M.A., D.D., in *British Congregationalist.*]

I would state my conviction that there never was a time in the history of the world when there were so many souls bent on seeing and doing the will of God. There was never a time when spiritual sympathies and appetites were so quick and general as today, and never an age when so many were set upon the kingdom of God, and certain aspects of it were so clearly and widely seen.

SPECIAL ANNOUNCEMENTS.

FROM THE PUBLISHER OF MRS. EDDY'S WORKS.

THE CHRISTIAN SCIENCE TEXT-BOOK, "SCIENCE AND HEALTH WITH KEY TO THE SCRIPTURES."—This work contains many important changes and additions by the author, and also contains a photogravure portrait of Mrs. Eddy, together with a facsimile of her signature.

SOME OF MRS. EDDY'S WRITINGS IN NEW BINDINGS.—One volume containing Unity of Good, Rudimental Divine Science, No and Yes, Retrospection and Introspection; a second volume containing Christian Healing, The People's Idea of God, Pulpit and Press, Christian Science *versus* Pantheism, and the Messages of 1900, 1901, and 1902. These volumes are printed from new plates and are uniform in size with the pocket edition of Science and Health. Bound in morocco, limp, round corners, gilt edges, heavy Oxford India Bible paper. The prices of these books prepaid are as follows: single copy, $3.50; six or more copies of either volume to one address, each $3.25.

THE CHURCH MANUAL.—Containing all the By-laws of The Mother Church, The First Church of Christ, Scientist, in Boston, Mass. Each new edition of the Manual will have special notice in the *Sentinel*. Price, single copy, prepaid, $1; six copies to one address, $5; twelve copies to one address, $9.

Attention is called to the Library Edition of Mrs. Eddy's works, description and prices of which will be found on the outside cover page of the *Sentinel*.

Address all orders for books named above to ALLISON V. STEWART, Falmouth and St. Paul Streets, Boston, Mass.

FROM THE CLERK OF THE MOTHER CHURCH.

CHURCH TENETS.—The tenets of The First Church of Christ, Scientist.—The Mother Church,—printed on folded sheet for the use of Branch Churches of Christ, Scientist, with space for the names of churches and their by-laws, can be had at seventy-five cents per hundred.

Not less than one hundred are sold. Postage stamps are not taken for payment.

MEMBERSHIP.—Correspondence relating to membership with The Mother Church, and requests for blank applications for membership, should be addressed to the Clerk.

All correspondence and orders relative to the above should be sent to JOHN V. DITTEMORE, Clerk, The First Church of Christ, Scientist, Falmouth, Norway, and St. Paul Streets, Boston, Mass.

FROM THE CHURCH TREASURER.

PER CAPITA TAXES.—Per Capita Taxes and Contributions to The Mother Church, The First Church of Christ, Scientist, in Boston, Mass., should be sent to the Treasurer. Please do not send currency.

Remittances for the above should be sent to STEPHEN A. CHASE, Treasurer, Box 56, Fall River, Mass.

FROM THE SOCIETY.

Attention is called to the announcement over our Leader's signature, which appeared in the *Sentinel* of Jan. 9, to the effect that Christian Scientists in the field who send four subscriptions to the *Monitor* for one year, will receive their own paper gratuitously.

The Publishing Society has in stock a number of copies of *Sentinel* No. 6, Vol. IX., containing the article "What Our Leader Says" as last published. As this article is of abiding interest and value to the Field the Society will be glad to supply it, postpaid, at the following prices: 1 copy, 5 cents; 5 copies, 15 cents; 10 copies, 25 cents; 25 copies, 50 cents; 50 copies, 85 cents; 100 copies, $1.50.

On foreign orders add 2 cents a copy to cover postage.

The supply of *Sentinel*, Vol. IX., No. 14, is exhausted.

Digitized by Google

THE CHRISTIAN SCIENCE JOURNAL

FOUNDED APRIL, 1883, BY THE AUTHOR OF "SCIENCE AND HEALTH WITH KEY TO THE SCRIPTURES." MARY BAKER EDDY, DISCOVERER AND FOUNDER OF CHRISTIAN SCIENCE

This monthly Magazine is the official organ of The First Church of Christ, Scientist, in Boston, Massachusetts, and correctly represents the Christian Science Movement. It contains interesting discussions of the teaching and the practice of Christian Science, and in addition to dissertations, lectures, and contributed articles, publishes always a number of reports from cases of spiritual and physical healing, which practically illustrate the redemptive work of Christian Science.

TERMS OF SUBSCRIPTION: Single copy, one year, $2.00. Quantities TO ONE ADDRESS: ten or more, each, $1.90; twenty-five or more, each, $1.80; fifty or more, each, $1.60. These rates apply in the United States, Canada, Mexico, and Cuba. In all other countries add forty cents for postage on each subscription. Six months' subscriptions received at half the above rates. No subscriptions received for less than six months.

TERMS OF SALE: Postpaid to any address: Per copy, twenty cents. Quantities TO ONE ADDRESS: ten copies, $1.70; twenty-five copies, $4.00; fifty copies, $7.00; in the United States, Canada, Mexico, or Cuba. To all other countries, per copy, twenty-five cents. Quantities TO ONE ADDRESS: ten copies, $2.10; twenty-five copies, $5.00; fifty copies, $9.00.

BOUND VOLUMES: Current year and two years previous, cloth, $2.50; half calf or half morocco, $3.00. On earlier volumes write for prices.

THE CHRISTIAN SCIENCE MONITOR

Published every afternoon except Sunday

A daily newspaper for the home. Adequate news service. The various departments of a modern newspaper. Unique home forum page. Entire page of editorials dealing with the vital topics of the day. Contributions for the columns of the MONITOR should be addressed, Managing Editor, THE CHRISTIAN SCIENCE MONITOR.

SUBSCRIPTION PRICE: For the United States (except in the Boston Postal District), Canada, Mexico, and Cuba, $5.00 a year, $3.00 for six months; all other countries, $8.00 a year, $4.50 for six months, postpaid. When delivered by carrier through a local news-dealer, 12 cents a week payable to the news-dealer. In the Boston Postal District, by mail, $7.25 a year.

The Christian Science Quarterly

Published January, April, July, and October

Contains the Lesson-Sermons which are read at the Sunday Services throughout the year in all the Christian Science churches. These Lessons, which present citations from the Bible and "Science and Health with Key to the Scriptures," are valuable for daily study.

TERMS OF SUBSCRIPTION: For one year, 50 cents; fifty copies or more to one address, 50 cents yearly for each copy. Foreign subscriptions, 60 cents. Yearly subscriptions only received.

TERMS OF SALE: One or more copies, postage paid, each, 15 cents; fifty copies or more to one address, each 12½ cents, postage paid.

Der Herold der Christian Science

Published Monthly.

A magazine printed in German, which publishes original and translated articles bearing upon Christian Science, and also testimonies of healing from Germany and America. It contains about thirty-eight pages of such reading matter, also the Lesson-Sermons which are read at the Sunday services in all the Christian Science churches, and is valuable as an authorized representative of the movement.

SUBSCRIPTION PRICE: For the United States, Canada, Mexico, and Cuba, 10 cents a copy, $1.00 a year in advance; all other countries, 12 cents a copy, $1.25 a year, postpaid.

PAMPHLETS AND REPRINTS

CHRISTIAN SCIENCE, THE RESTORATION OF PRIMITIVE CHRISTIANITY. A Lecture. By CLARENCE C. EATON. 29 pages.

CHRISTIAN SCIENCE: A RELIGION OF DOING. A Lecture. By JUDGE WILLIAM G. EWING. 26 pages.

CHRISTIAN SCIENCE: A REASONABLE AND RATIONAL VIEW OF ALL THINGS. A Lecture. By FRANCIS J. FLUNO, M.D. 37 pages.

CHRISTIAN SCIENCE: THE RELIGION OF THE BIBLE. A Lecture. By JUDGE SEPTIMUS J. HANNA. 23 pages.

CHRISTIAN SCIENCE: HUMANITY'S HELPER. A Lecture. By PROF. HERMANN S. HERING. This pamphlet is also printed in German. 29 pages.

CHRISTIAN SCIENCE: ITS ADVANTAGE TO MANKIND. By EDWARD A. KIMBALL. A lecture delivered in London. This pamphlet is also printed in French. 47 pages.

CHRISTIAN SCIENCE: MAN'S DOMINION OVER EVIL. By EDWARD A. KIMBALL. A lecture delivered at Harvard University. This pamphlet is also printed in French. 28 pages.

CHRISTIAN SCIENCE: ITS NATURE AND PURPOSE. A Lecture. By BLISS KNAPP. This pamphlet is also printed in French. 25 pages.

CHRISTIAN SCIENCE: DEMONSTRABLE RELIGION. A Lecture. By FRANK H. LEONARD. 31 pages.

CHRISTIAN SCIENCE; OR, DELIVERANCE FROM EVIL. A Lecture. By REV. WILLIAM P. MCKENZIE. This pamphlet is also printed in French. 29 pages.

CHRISTIAN SCIENCE: THE CHRISTIANITY OF JESUS. A Lecture. By MRS. SUE HARPER MIMS. 28 pages.

CHRISTIAN SCIENCE: BOTH CHRISTIAN AND SCIENTIFIC. A Lecture. By REV. IRVING C. TOMLINSON. 36 pages.

CHRISTIAN SCIENCE: ITS PRINCIPLE AND METHOD. A lecture delivered in London. By BICKNELL YOUNG. 31 pages.

CHRISTIAN SCIENCE: ITS COMPASSIONATE APPEAL. Four articles reprinted from the JOURNAL. This pamphlet is also printed in German. 50 pages.

CHRISTIAN SCIENCE IS SCIENTIFIC CHRISTIANITY. A Lecture. By REV. ARTHUR R. VOSBURGH. 33 pages.

CHRISTIANITY IS SCIENCE, AND SCIENCE IS DEMONSTRABLE. A Lecture. By MISS MARY BROOKINS. 37 pages.

PROPHECY: FULFILMENT: REVELATION. By CHARLES ADOLPHUS MURRAY, Seventh Earl of Dunmore. 42 pages.

THE LOS ANGELES CASE. Testimonials given in Court as to the healing efficacy of Christian Science. 80 pages.

THE MINISTRY OF TRUTH. Five articles reprinted from the JOURNAL. This pamphlet is also printed in German. 76 pages.

PRAYER AND CONFIDENCE. Four articles reprinted from the JOURNAL. This pamphlet is also printed in German. 50 pages.

THE CHRISTIAN SCIENCE CHURCH. Its Organization and Polity. By CAROL NORTON. 38 pages.

PRICE: One copy or more, six cents; twelve copies to one address, sixty cents; fifty copies to one address, $2.25; one hundred copies, $4.00. Orders for above pamphlets may be assorted as desired.

Works on Christian Science

Written by MARY BAKER EDDY, Founder of Christian Science and Author of its Text-book

SCIENCE AND HEALTH WITH KEY TO THE SCRIPTURES. In one volume, 700 pp. Containing many important changes and additions by the author. THE ORIGINAL, STANDARD, and only Text-book on CHRISTIAN SCIENCE MIND-HEALING. This edition contains a fine photogravure portrait of Mrs. Eddy, together with a facsimile of her signature.

Price (cloth), single copy $3.18
Two to twelve books (cloth only) to one address, each 3.00
Twelve or more books to one address, each 2.75
Full leather, stiff beveled boards, gilt edges, same paper as in cloth binding, single copy 4.00
Twelve or more to one address, each 3.75
Morocco, limp, round corners, gilt edges, Oxford India Bible paper, convenient for pocket, single copy . . . 5.00
Twelve or more to one address, each 4.75
Levant, divinity circuit, leather-lined to edge, round corners, gilt edges, silk sewed, heavy Oxford India Bible paper, single copy 6.00
Twelve or more to one address, each 5.75

Orders for Science and Health in lots of twelve or more to one address may include any or all of the different styles of binding. The above prices are all prepaid.

MISCELLANEOUS WRITINGS—1883-1896. A book of 471 pages, containing articles published in THE CHRISTIAN SCIENCE JOURNAL since 1883, with revisions and additions.

Price (cloth), single copy $2.25
Twelve or more books to one address, each . . . 2.00
Morocco, limp, round corners, gilt edges, convenient for pocket, single copy 4.00
Twelve or more to one address, each 3.75
Levant, divinity circuit, leather-lined to edge, round corners, gilt edges, silk sewed, single copy 5.00
Twelve or more to one address, each 4.75

The above prices are all prepaid. Orders for Miscellaneous Writings in lots of twelve or more to one address may include any or all of the different styles of binding.

No discount will be allowed on orders for twelve books which include both Science and Health and Miscellaneous Writings.

CONCORDANCE TO SCIENCE AND HEALTH. This work contains about eighty thousand references (more than ten thousand words being indexed). It also contains an index to the Marginal Headings, and a list of the Scriptural Quotations in SCIENCE AND HEALTH. 607 pages, 10 x 7, and addendum, bound in cloth, marbled edges. Price, prepaid, single copy . $5.00
Twelve or more to one address, each 4.50

CHURCH MANUAL. Containing the By-laws of The Mother Church. Price, prepaid, single copy, $1.00; $5.00 per half dozen; $9.00 per dozen.

CHRIST AND CHRISTMAS. An illustrated poem.

Price, prepaid, single copy $3.00
Twelve or more books to one address, prepaid, each . 2.50

UNITY OF GOOD AND OTHER WRITINGS. One volume containing: Unity of Good, Rudimental Divine Science, No and Yes, Retrospection and Introspection, uniform in size with the pocket edition of Science and Health. Bound in morocco, limp, round corners, gilt edges, heavy Oxford India Bible paper. Price, prepaid, single copy, $3.50; six or more copies to one address, each, $3.25.

CHRISTIAN HEALING AND OTHER WRITINGS. One volume containing: Christian Healing, The People's Idea of God, Pulpit and Press, Christian Science *versus* Pantheism, Messages of 1900, 1901, 1902, uniform in size with the pocket edition of Science and Health. Bound in morocco, limp, round corners, gilt edges, heavy Oxford India Bible paper. Price, prepaid, single copy, $3.50; six or more copies to one address, each, $3.25.

UNITY OF GOOD. It lays the axe at the root of error, elucidating and enforcing practical Christian Science, thus affording invaluable directions for all true Scientists. Library edition, 64 pages, cloth binding, marbled edges. Price, prepaid, single copy, 65 cents; $3.00 per half dozen; $5.50 per dozen. Leather covers (pocket). Price, prepaid, single copy, $1.00; $5.00 per half dozen; $9.00 per dozen.

RETROSPECTION AND INTROSPECTION. A biographical sketch of the author. The way she was led to the discovery of Christian Science; its growth and fundamental idea. Library edition, 95 pages, cloth binding, marbled edges. Price, prepaid, single copy, $1.00; $5.00 per half dozen; $9.00 per dozen.

PULPIT AND PRESS. A unique work of importance in the history and to the readers of Christian Science; containing Dedicatory Sermon delivered at The Mother Church, and scintillations from the press of that occasion. Library edition, 90 pages, cloth binding. Price, prepaid, single copy, $1.00; $5.00 per half dozen; $9.00 per dozen.

RUDIMENTAL DIVINE SCIENCE. An interesting and valuable book, containing a brief and concise statement of Divine Science, *alias* Christian Science, in the form of questions and answers. 17 pages. Leatherette covers, gilt top. Price, prepaid, single copy, 37 cents; $3.00 per dozen. Library edition, cloth binding, marbled edges. Price, prepaid, single copy, 55 cents; $2.50 per half dozen; $4.50 per dozen.

NO AND YES. A brief statement of very important points in Christian Science. 46 pages. Pebbled cloth covers. Price, prepaid, single copy, 27 cents; $2.50 per dozen. Library edition, cloth binding, marbled edges. Price, prepaid, single copy, 60 cents; $3.00 per half dozen; $5.50 per dozen.

MESSAGES TO THE MOTHER CHURCH. By Mary Baker Eddy, including Christian Science *vs.* Pantheism, and the Messages of 1900, 1901, and 1902. In one volume. Library edition, 94 pages, cloth binding, marbled edges. Price, prepaid, single copy, $1.50; $7.50 per half dozen; $13.50 per dozen.

CHRISTIAN SCIENCE *versus* PANTHEISM. The Pastor Emeritus' Message delivered at the Communion Season in The Mother Church in Boston, June, 1898. A clear and strong refutation of the charge that Christian Scientists are pantheists. 15 pages. Price, prepaid, single copy, 26 cents; $2.50 per dozen.

MESSAGE TO THE MOTHER CHURCH. The annual message of Mary Baker Eddy to The Mother Church on Communion Sunday, June, 1900. Leatherette covers, deckled edges. 15 pages. Price, prepaid, single copy, 26 cents; $2.50 per dozen.

OUR LEADER'S MESSAGE. The annual message of Mary Baker Eddy to The Mother Church on Communion Sunday, June, 1901. Deckled edges. 35 pages. Price, prepaid, single copy, 50 cents; $4.50 per dozen.

COMMUNION MESSAGE. The annual message of Mary Baker Eddy to The Mother Church on Communion Sunday, June 15, 1902. Deckled edges. 20 pages. Price, prepaid, single copy, 50 cents; $4.50 per dozen.

TWO SERMONS. CHRISTIAN HEALING and THE PEOPLE'S IDEA OF GOD. In one volume. Library edition, cloth binding, marbled edges. 36 pages. Price, prepaid, single copy, 60 cents; $3.00 per half dozen; $5.50 per dozen.

CHRISTIAN HEALING. A sermon delivered in Boston. 19 pages. Paper covers. Price, prepaid, single copy, 21 cents; $2.00 per dozen.

THE PEOPLE'S IDEA OF GOD. A sermon delivered in Boston. 14 pages. Paper covers. Price, prepaid, single copy, 21 cents; $2.00 per dozen.

FEED MY SHEEP. Words by Mary Baker Eddy. Music by Lyman F. Brackett. Price, prepaid, single copy, 50 cents; $5.00 per dozen.

Direct all orders for above works, and make remittances payable to

ALLISON V. STEWART, FALMOUTH AND ST. PAUL STS., BOSTON, MASS.

All orders for periodicals, or literature other than the above works, should be sent with remittance directly to The Christian Science Publishing Society.

Bound Volumes: Current year and two years previous, cloth, $3.00; half calf or half morocco, $3.50. On earlier volumes write for prices.

Entered at the Boston, Mass., post-office as second-class mail matter.

ITEMS OF INTEREST.

National.

A frenzied demonstration of welcome by the men in gray for the son of the man who defeated them, marked the final scene of the annual reunion of the United Confederate Veterans at Memphis, Tenn., last week. In the reviewing stand during the parade stood Gen. Frederick Dent Grant of the United States army. A cavalry division approached, and its commanding officer, old and grizzled, peered steadily at General Grant a moment. Then he turned in his saddle and yelled, "Come on, you kids! Here's General Grant come to life again in his son." With an old-time yell the division charged on the stand, and the men jostled one another for an opportunity to shake the hand of the son of their old-time enemy. From that moment every gray-clad veteran who could reach the stand rushed up to do the same. The stocky army officer's gray eyes filled with tears and his shoulders shook with emotion as he murmured: "God bless you all, boys." He could say no more.

The largest of all the schemes of reclamation contemplated by the Government has recently been undertaken by the engineers in the Sacramento valley. Its ultimate object is to control the flow from a watershed of over four thousand square miles, and to improve the two great rivers of California. When the task is completed, over six hundred thousand acres of rich land, which at present is dry and sun-baked during eight months of the year, will have been brought under irrigation, and large areas of bottom land, which at present are subject to annual overflow and great destruction by the floods, will have been reclaimed.

Secretary of the Interior Ballinger announces a new plan for the disposal of Government coal lands. He has had the coal lands on the public domain classified with reference to both the quality and quantity underlying the soil. They will be sold hereafter on this basis, with the prevailing royalty that is usually paid private owners as a fundamental price. The present ruling will increase the price of the most valuable coal lands from $100 an acre to more than $300 an acre. Lignite coal lands of a low value will be sold at the lowest price fixed by law, from $10 to $20 an acre, depending on their distance from a railroad.

The Administration has reduced its estimates for expenditures for the fiscal year 1910–11 to the extent of $50,000,000 less than the total appropriations for the executive branch of the Government for the fiscal year 1909–10. To do this it was necessary to go over the estimates two or three times in some departments. About $20,000,000 has been cut out of the army, $10,000,000 from the navy, $8,500,000 from the Interior Department, and $11,500,000 in the other departments and independent bureaus.

The War Department has made a heavy draft on the Civil Service Commission for junior engineers, surveyors, and transit men, who are needed for work on the surveys in connection with the intracoastal waterways from Boston, Mass., to Key West, Fla. It has asked for two hundred of them, and the employment is expected to last from six months to a year. The salaries of junior engineers will range from $125 to $175 a month, while those of surveyors and transit men will range from $100 to $125 a month. The examinations will be held June 21.

The mayor of Boston has proposed for that city the appointment of a committee to censor any theatrical show, the morality of which may have been questioned. He himself has already prevented the appearance of several plays by withholding from them permission to appear.

Business transacted by the Panama Railroad commissary, the main source of supply of food and clothing for forty thousand people in the Canal Zone, amounted in value to more than $3,000,000 during the last fiscal year.

The Chicago traction subway will cost between $40,000,000 and $112,000,000. The final report of the city subway bureau just made public gives in detail four different sets of routes.

Richard Cockburn Maclaurin was formally inaugurated as the new president of the Massachusetts Institute of Technology last week.

Andrew Carnegie has founded eighteen hundred public libraries, representing donations aggregating $51,506,963.

Professor Pickering of Harvard announces that he thinks there is a planet beyond Neptune.

International.

Sir Christopher Furness, whose scheme for copartnership has been working successfully and satisfactorily for several months now in the shipyards of Furness & Withy, at Hartlepool, has brought forward a plan of the same kind for the consideration of the officials and workmen employed at the Wingate colliery, a property recently purchased. The conditions are that while the board of directors retain for the officials of the company the full power to employ men as the circumstances of the moment may determine, the general conditions of working and payment accepted by the Miners' Union will be duly recognized. Every employee, whatever his status, may become a member of the copartnership by signifying assent to its principles and by acquiescing in the regular deduction of five per cent from his pay until the shares to be allotted to him, and which he must apply for, are fully paid, thus enabling him to acquire his holding by gradual instalments. No employee will be permitted to continue in the service of the company for more than three months unless he becomes a copartner.

J. Henniker Heaton advocates that the British government purchase the cable lines. He argues that there is no reason why a rate of a penny a word should not be possible between Europe, America, and India. With regard to American cables, he proposes that the British and American governments jointly acquire the property and rights of the existing cable companies at a fair valuation, and thereby establish a common state monopoly of cable communication.

Canada has offered to build a navy of her own, to act, should the occasion arise, as an auxiliary force to Great Britain's fleet. Her contribution to the forces of the empire will consist of eight first-class cruisers, ten torpedo-boat destroyers, and ten torpedo boats. The government is prepared to pay one fifth of the cost for laying down the whole fleet immediately, the other four fifths to be guaranteed paid within the next five years.

The Russian Douma has adopted the law, introduced by the government, dealing with the changing from one religious belief to another, with the amendments, however, which Premier Stolypin recently opposed, saying that if they were incorporated the bill would be vetoed. He stated that the Emperor, as head of the orthodox church, could not allow backsliding from the orthodox to non-Christian beliefs.

Negotiations in progress between Canada, the imperial government, and the United States may result in the suspension for a few seasons of pelagic sealing, with compensation to the sealers for their loss.

Industrial and Commercial.

Two hundred and fifty-one pulp mills in the United States used 3,346,106 cords of wood, and made 2,118,047 tons of pulp last year. Spruce furnished sixty-four per cent of the total quantity used, hemlock seventeen per cent, poplar nine per cent. The remainder was supplied by many species, the most important of which were pine, cottonwood, and balsam. The wood used cost a little more than $28,000,000, or an average of $8.38 per cord, against an average of $8.21 in 1907.

Underground joining of the Hudson river tunnel system with New York city's subway and with the New York Central and New Haven Railroad terminals, has been assured by the granting to the Hudson and Manhattan Railroad Company by the board of estimates and apportionment of an application for a franchise to extend its Sixth avenue tunnel northward from Thirty-third street to the Grand Central station at Forty-second street and Park avenue.

Bleached flour can no longer be shipped in interstate commerce, as the six months' time limit fixed by the Agricultural Department has expired. All flour bleached by means of nitrogen peroxide is held to be an adulterated product in the meaning of the food and drug act.

The J. & P. Coats Company, Limited, of Pawtucket, R. I., following a custom in vogue at the company's mills in Paisley, Scotland, has converted one of its mills into a restaurant for the benefit of its twenty-five hundred operatives and furnishes warm meals at cost.

The Mauretania of the Cunard line has just bettered by two miles her previous record run of six hundred and seventy-one miles in a day, steaming westward.

Sales of tickets in the New York subway increased from 182,550,090 in 1907 to 220,031,212 in 1908.

It is now estimated that there are forty thousand acres of land seeded to rice in Arkansas.

CHRISTIAN SCIENCE SENTINEL

"WHAT I SAY UNTO YOU, I SAY UNTO ALL — WATCH" JESUS

A TRIBUTE TO MRS. EDDY.

[Editorial in *New York Evening Journal.*]

Box G, Brookline, Mass., June 8, 1909.

....., New York City.

My Dear Sir:—Accept my appreciation of your very kind and pertinent message to me through Mr. J. V. Dittemore. I can assure you that I am in my usual health and prosperity, and that God is blessing me because of Christian Science.

Sincerely yours,
MARY BAKER EDDY.

Recently, in the old-fashioned and tiresome way, there were published foolish and untruthful statements concerning Mrs. Mary Baker Eddy, Leader of the Christian Scientists throughout the world. An effort was made to represent Mrs. Eddy as ill, incapable of taking care of herself, or even dead.

It is surprising and rather shameful that any newspaper could be persuaded thus to encourage the hounding of a woman who has brought happiness into the lives of hundreds of thousands of human beings, who has certainly harmed nobody, and who has the devoted affection of an enormous following. Mrs. Eddy is today past eighty-eight years of age; she works with those that assist her in her very great undertakings; she controls and directs all of them. She is entitled to, and she has, the respect and admiration of millions of human beings who, like this writer, do not share the belief in Christian Science, yet render the tribute of profound respect to the Leader of that belief.

Feeling that some friends of Mrs. Eddy may have been disturbed by the false and malicious stories recently published concerning her, we here publish, with very great pleasure, a letter just received from Mrs. Eddy, written day before yesterday in response to a friendly greeting sent by one of her friends on the editorial staff of this newspaper. Mrs. Eddy's letter is signed in her own handwriting, with which this writer is familiar. Christian Scientists may rest assured that they have in their Leader an actual, living person, energetic, determined, and marvelous in her apparent defiance of great age.

[The *Journal* published at the top of the column in which the above article appeared, a photographic facsimile of Mrs. Eddy's letter.—EDITOR *Sentinel.*]

THE LAW OF PROGRESS.

CLARENCE W. CHADWICK.

THE progress of the human race heavenward cannot be measured according to any intellectual standards. Some of those regarded as the brightest intellects of the ages have been slaves to the most degrading of habits. Material accomplishments may seem to embellish and to smooth life's pathway, but they also bring their responsibilities and heartaches. Sooner or later the mortal comes face to face with the stern fact that all the knowledge of the world of sense cannot relieve him of the discomfort and unhappiness which the accumulated learning of years has brought him.

Finally, through sore trial and anguish of heart, he finds himself listening to the advice of some kind friend, to try Christian Science, and as it is his last resort he heeds the invitation and meekly asks for help. In due season it comes, often so speedily that he can scarcely believe it possible. He begins to read, to study, to ponder the Christian Science text-book, and as thought is uplifted to behold the heretofore unknown and unseen facts of existence he exclaims, "It is wonderful! Why did I spend all these years in ignorance of my spiritual birthright? Why was I not sooner led to this blessed truth which heals and purifies and saves? Why did God permit me to remain so long in ignorance of my freedom and health and happiness?" As thought advances from faith to understanding, all these questions are answered to his entire satisfaction, and he learns to rejoice in what he now knows about God.

Before, he was content to believe a great deal about matter and its assumed laws. Now he is content to correct and to unlearn what he has learned through the material senses, and to seek first the knowledge of the kingdom of God. Herein lies his progress heavenward. Before Christian Science came to him he was serving the belief in matter and its supposed laws. Now he is serving Spirit, and is coming to understand spiritual law. This reversal of things has also unveiled the mythical nature of sin as well as disease, and has given him the understanding with which to overcome evil instead of serving it. He is now under the law of progress, God's law, the law which "demands of us only what we can certainly fulfil" (Science and Health, p. 233). So long as he was governed by the physical senses he was not obeying the government of God, good, and consequently not under its protection. This fact every human being must learn before he can begin to make conscious progress toward the kingdom of heaven. Sense testimony relegates the heavenly kingdom to an uncertain future existence, and offers no present reward for present moral and spiritual effort. Christian Science ushers in the ever-present reign of Spirit and declares that this is the kingdom of heaven at hand. It reveals what is true concerning God and man, and mortals begin to progress out of erroneous mental, moral, and physical conditions.

God's law, which is the law of progression, demands that mortals shall seek "first the kingdom of God, and his righteousness," if they would gain the true idea of life and realize the Science of being. This is what is being done daily and hourly in Christian Science, and just to the extent that it is being done can one say that human progress is in evidence. The law of progress demands the overcoming of all that is unlike God, which means the correction and subjugation of sense testimony along all lines of human research and endeavor. It means the

Digitized by Google

conquest over every form of sensuality, evil, disease, sin, and death; in fine, the bringing into captivity of every material thought to the obedience of Christ, Truth. No human being can accomplish this work in a day, but he can begin at once to make the best possible use of his opportunities by becoming obedient to the law of progress, which demands the forsaking of evil in thought, word, and act before it can be overcome.

The moment the great problem of spiritual redemption is understood apart from the material sense of things, and the mortal begins to work out his salvation, that very moment does he begin to progress morally and spiritually. It is not what he professes or believes, but what he actually does that places him under the law of progress. The student of Christian Science rejoices because of the progress he is making, now that he has a definite goal to work for and knows positively what the work is that lies before him. The law of progress, spiritually discerned, destroys all sense of human uncertainty and enables humanity to reach out confidently and expectantly for man's rich inheritance, knowing that God hath given man richly all things to enjoy, and that no good thing does He withhold from those who are seeking first the kingdom of God. It solves the perplexing problem of supply and demand by bringing to humanity the conscious recognition of the infinitude of God's spiritual resources, which does away with any fear of lack or poverty. An all-knowing God must certainly know that every need of His child is already supplied, and mankind must recognize this spiritual fact, if the human belief of limitation is to be dispelled.

The law of progress demands giving as well as receiving. The great Master said, "Freely ye have received, freely give." One's capacity and willingness to give measures his capacity to receive. When giving ceases, progress ceases, and it is upon this very point that failures often hinge. One who is progressing heavenward must constantly grapple with the thought of human selfishness. When selfishness is allowed to enter, stagnation ensues, and the activity of good seems to become passive and ineffective. "Unto whomsoever much is given, of him shall be much required," expresses the unceasing activities of Mind and its reflections. God's bounties must be reflected, given out, not absorbed, if the law of progress is to be obeyed; in other words, the talents God gives must be made use of.

According to Christian Science nothing is more essential to human progress than a right understanding of spiritual causation. Thought which reasons constantly from a material basis, ignoring Spirit as the sole cause and creator, does not progress beyond the limits of its own finite beliefs. Until reason is rightly directed, and intelligence is predicated of Spirit and not of matter, thought makes no positive spiritual advance. If humanity would ever reach the goal of spiritual perfection it must begin to reason from the standpoint of a God who is Spirit, and of a perfect spiritual creation, since perfection is identified with Spirit and not with matter. So long as belief in matter and imperfection appear in premise, they are sure to appear in conclusion, hence the impossibility of reaching the kingdom of heaven without the elimination of material thought. True metaphysics is founded upon Spirit as the sum and substance of being, hence the need of supersensible thought and reasoning in order to understand Jesus' metaphysical teaching and works. All true spiritual advancement is growth out of physics into metaphysics, out of matter into Mind, out of the sensible into the supersensible.

Science and Health (p. 296) tells us that progress "is the ripening of mortal man, through which the mortal is dropped for the immortal." A mortal, then, in order to make any progress toward the kingdom of heaven must begin to surrender his belief in mortality, and the understanding of spiritual causation will inaugurate the mental activity necessary to carry on this work in individual consciousness. When he ascertains that there is no real cause for any belief in mortality, that it never was created by Spirit, and that without Spirit "was not any thing made that was made," he has divine authority for disbelieving the testimony of the so-called physical senses which declare man to be mortal and material, and in so far as he exercises this divine authority will he progress out of sense into Soul, out of the unreal into the real. Here is the path of progress of every mortal as outlined by Christ Jesus and made practically available to this age in Christian Science.

Since "earth's preparatory school must be improved to the utmost" (Science and Health, p. 486), it is incumbent upon mortals to make the best possible use of their opportunities. If each temptation to believe in intelligent matter with its vast array of hideous imperfections were looked upon as simply an opportunity to prove the omnipotence and omnipresence of God, instead of being considered an irksome task, greater spiritual progress would result. The careless admission on the part of students of Christian Science, that they have "so much to meet" or to contend with at different times, should give place to the recognition that God, omnipresent good, is constantly glorified through His ideas. When Jesus was questioned by his disciples concerning the man born blind, as to who had sinned, the man or his parents, his reply was, "Neither hath this man sinned, nor his parents: but that the works of God should be made manifest in him."

Jesus did not admit that he had a difficult problem on his hands, nor did he assign any hereditary cause for the man's seeming condition; he simply looked upon this experience as an opportunity to glorify his Father, divine Mind, and he forthwith proceeded to demonstrate the spiritual fact in Science of man's harmonious condition as a child of God. Upon another occasion, when informed of Lazarus' sickness, he replied, "This sickness is not unto death, but for the glory of God, that the Son of God might be glorified thereby." He positively refused to make anything of the physical side of these experiences. He did not make light of them, but, in the language of Science, he did make nothing of them, thinking only of the opportunity afforded him to prove the allness of God. He was thinking and acting in obedience to divine Principle and contrary to the material senses. Had he accepted what these so-called senses said, he would have departed from the law of progress and could not have healed the sick nor raised the dead.

The Christian world has fallen far short of the great Teacher's example in this regard. Mortals have looked upon the experience of sickness and so-called physical imperfections as conditions of matter; have called them real, and have then turned away from the only living and true God as able to heal, and have gone after all sorts of "strange gods" in their blind search for relief. In other words, they ignored the law of progress, and instead, retrograded mentally, morally, and spiritually, until Christian Science came and sounded the key-note of spiritual advancement, demanding the unconditional surrender of all faith in materiality, and a radical and uncompromising trust in omnipotent Spirit as able to correct every human mistake and to care for every need of mind and body. This spiritual quickening of human thought has already resulted in great good to the whole world, and as this progress of thought continues, the time must come when all mankind will have found their God because they have found the healing Christ, Truth.

The coming of the Christ-idea marks the advent of the reign of progress in individual consciousness. "Has the healing Christ come to me?" This should be the question for every professing Christian to put to himself. If he

Digitized by Google

can answer in the affirmative, if he knows that the true idea of God as being all-powerful and ever-present has become a tangible and practical reality to him, so that he can prove for himself and for others that divine Mind heals both sickness and sin without the suppositional aid of material means, he can rest in the calm assurance that God is with him, and that he is being governed by the divine law of progress.

THE EDUCATIONAL VALUE OF CHRISTIAN SCIENCE.

ANDREW S. CUMMINGS.

THE commonly accepted definition of the word "education" is usually comprised in a material knowledge of places, persons, and things, gained through courses of study in some of our various institutions of learning. According to the best authorities, the word education is derived from the Latin *educare*, to lead forth. In its broadest sense it is the art of developing and cultivating all the powers of man. When extended to the education of the individual, concerning the relation between himself and the Supreme Being, it becomes religious education, which is "the highest phase the art can assume." Education, therefore, is found to be, in its true meaning, a knowledge which broadens mankind's vision and leads them above greed, selfishness, and all forms of sin and disease.

The writer's experience in the study of Science and Health proves the great value of Christian Science as an educator. The help of a Christian Scientist had been sought for a sick child at a time when all material methods had been proven of no avail. With this began a study of the text-book, Science and Health, and after about ten days of this reading he became aware that an appetite for tobacco which had been with him for some years, had been destroyed. It is very evident that if the same time, and more, had been spent in the study of the nature and quality of tobacco, and the probable results of its use, supplemented by the best academic course, any such, to him, astonishing result could not by any possible means have been brought about; but the slight knowledge of man's relation to the Supreme Being, as discerned in his study of Science and Health, did so, which is unquestionable proof that the education gained through the study of Christian Science,—in other words, religious education,—is, according to the definition quoted, "the highest phase the art can assume."

Mrs. Eddy says (Science and Health, p. 469): "Intelligence is omniscience, omnipresence, and omnipotence. It is the primal and eternal quality of infinite Mind, of the triune Principle,—Life, Truth, and Love,—named God." Previous to taking up the study of Science and Health, most of us were of the belief that intelligence was something possessed by mankind, in varying degrees, and that those more fortunate in its possession were placed at a great advantage over those less fortunate, a belief which sowed broadcast the seeds of envy, malice, hatred, and revenge, because of the advantages which those who were more fortunate were taking over their less favored brothers. Through the educational advantages of Christian Science study, however, we are learning slowly but surely that all men are in reality governed by one Mind and one intelligence, and that the measure of our possession depends not on chance, environment, or good fortune, but on effort and fitness, and that our fitness will be in exact proportion to our effort.

The apostle Paul writes, "For the wisdom of this world is foolishness with God." It is therefore apparent that true knowledge is to be gained only through a study of those things which lead us away from materiality and up to God. We are daily proving for ourselves that the study of Christian Science enables us to reach this attainment, and we see that Mrs. Eddy stands alone, as the one in this age best fitted to teach us our right relation to God, divine Mind, and that this is indeed the highest phase of education.

EFFACING MEMORIES.

VIOLET KER SEYMER.

SINCE God is "the same yesterday, and to day, and for ever," it follows that man in His image expresses the same unchanged perfection and harmony. For man, as for God, there can be no mortal measurements, no past, present, or future. Chronology refers to the passing of seasons and years, and human events are tabulated in the order of the revolutions of the solar system; but God antedates all things, for we read that "in the beginning God created the heaven and the earth," and "in the beginning was the Word." Science and Health (p. 502) teaches us that "the infinite has no beginning;" that "this word *beginning* is employed to signify *the only*." When, therefore, did the calamities occur, from the effects of which so many people are suffering at the present time?

The verse in Ecclesiastes which reads, "That which hath been is now; and that which is to be hath already been; and God requireth that which is past," surely refers to the eternity of good! If we accept this interpretation of the text, are we not compelled to efface from memory those fallacious impressions which the divine Mind never made nor shared in? Full well does one realize how impossible it would be to conquer today's suffering, while theoretically according reality to the specific causative error, whether it occurred last week or last century. Rightly speaking, events which linger in memory cannot be labeled "past," and in the light of Christian Science one recognizes that the accident or calamity which overtook an individual twenty years ago was just as unreal then as we should know it to be if it befell him today. In order to put on "the whole armor of God," we must hold firmly to the Science of being for what is called past, as well as for the present and the future. The past, in God's sight and in man's experience, holds nothing but good.

In conversation with a Christian Scientist, the writer learned that, through just such mental work as this, done in response to the demands of Truth and not with any specific intent, a scar which he had carried for a great number of years disappeared totally. In giving to mortals a degree of spiritual perception, Christian Science enables them to look somewhat through God's eyes, and to behold man as God beholds him,—perfectly free from materiality, pain, or fear, and abundantly possessed of holiness, purity, and joy. Even the first glimpse of the spiritual man's unchanged perfection has oftentimes restored the bloom to pale cheeks and the vigor to shrunken limbs. We read in Science and Health (p. 255) that "eternal Truth is changing the universe," and showing it to us as John saw it and as it eternally remains—free from fear, vice, poverty, and sickness, and filled to overflowing with the affluence of Life, Truth, Love, and their attendant dominion and harmony.

It will be remembered that in that wonderful glimpse of reality called Revelation, the four beasts were "full of eyes before and behind," and they praised the Almighty "which was, and is, and is to come." To all victims of belief in a troubled past, as well as to tremblers for the future, Christian Science brings the comforting assurance that nothing can happen to the spiritual man that has not happened to God first, since cause and effect must forever

Digitized by Google

correspond. That eternal light of Love, "which shineth in darkness," throws no shadows either before or behind, and we can keep our faces toward it by declaring, as did Jesus, "I and my Father are one."

The future good is ours already if we claim and deserve it, and in the same way old errors are truly begone if we are a law unto ourselves in disproving and disclaiming them.

MAGNIFYING GOOD.

LEWIS LUDINGTON YOUNG.

ONE of the most satisfying answers ever given to a hungering world is that of our Leader to the question, "What is God?" God is defined here as "incorporeal, divine, supreme, infinite Mind, Spirit, Soul, Principle, Life, Truth, Love" (Science and Health, p. 465). An experience is recalled where there was an earnest desire to drink from the depths of this well of truth and gain more than a mere perusal of the statement could give. The dictionary was referred to, the definition of each word in this answer was copied on a scrap of paper, and these definitions were studied and dwelt upon until each coincided with the concept of God as revealed in Christian Science. The experience brought such an uplift, such a rousing from dormant conditions, that the water from this well was indeed as "living water," of which, if a man drink, he shall never thirst again.

Being committed to memory, these definitions would recur during unoccupied moments, and on such occasions the magnified mental view gave an inspiration and uplifting something like that experienced on beholding a scene of unusual grandeur. To reflect upon Deity as defined in Science and Health enables one to experience the richness and fulness of the divine Life; it fills the hungry heart with good things, and inspires us, like the psalmist, to "magnify the Lord," and to feel as did Mary when she rapturously exclaimed, "My soul doth magnify the Lord, and my spirit hath rejoiced in God my Saviour."

The experience of magnifying God, good, has been helpful in breaking the habit of unwholesome contemplation of the aspects of evil, and to disarm it of the repulsion and fear instilled. The dictionary alone, however, will not avail to define God satisfactorily, any more than moonbeams will melt a river of ice, the clearer realization of God coming from the conscientious study and practice of Christian Science. Comparing the effect produced by empowering evil and that of magnifying good, it becomes more evident that, as Mrs Eddy expresses it, "the Christ-like understanding of scientific being and divine healing includes a perfect Principle and idea,—perfect God and perfect man,—as the basis of thought and demonstration" (Science and Health, p. 259).

THE PERFECTION OF MAN.

HARRY FRANKLIN PORTER.

THE teaching of Christian Science, that man is now and always has been perfect, has awakened the comment that man's salvation lies not in his present perfection, but in his perfectibility, and in answer we would ask if the all-wise and all-powerful creator, whom the prophet described as "of purer eyes than to behold evil," or as unable to conceive of an imperfect thing,—did this creator, the one God, good, deign to make man imperfect (unfinished), and leave the problem of his perfection to the chance of the ages? Could He make anything unlike Himself, not "in his image and likeness" (complete, perfect)? No, perfection is incapable of producing imperfection, just as harmony is incapable of producing discord.

As a spiritual idea in infinite Mind, man is necessarily perfect. A creator with infinite wisdom and power could not, and would not if He could, make any other but a perfect man. Our sense of man's perfection is, however, sadly awry; and it is to this erroneous sense of things that all the toil and trouble, discord, disease, death, in the world is and ever has been due. This, then, is the task for you and me, who would labor for the good of all mankind—to mend our sense of things, and in mending ours to help mend or transform human sense at large. Some one has well said, "The mother of sins is ignorance." Let us, then, make war on ignorance. Let us puncture the flimsy fables of fear and folly. Let us remove the blinds of Belial, the dark and dingy draperies of doubt and dread, and see "the form divinely fair." It is there,—aye, here, everywhere,—if we but look, if we but raise our eyes. Why cling to earth and error, lean to matter, to mud, for health and happiness, when heaven, harmony, the reign of ever-present and omnipotent Mind, divine Love, is everywhere, and there is no place where it is not?

If it is admitted that God, whom men profess to acknowledge and adore as the one Supreme Being, is everywhere, and there is no place where He is not; that "in him we live, and move, and have our being," and that His reign and rule is perfect harmony, then it must be conceded that man, the individual idea of God, is even now perfect, spiritual, complete; and it is for us, who from the force of habit, just because our ancestors so believed, continue to accept unchallenged the evidence of the material senses, which testify to discord, disease, and doom, to awaken! The earth is flat and the sun appears to move—to the senses; but the science of astronomy contradicts this false evidence, and we have long since learned to acquiesce, although our ecclesiastical ancestry suffered sore from qualms of "conscience" before they fell in line. Christian Science contradicts and corrects the false evidence of the material senses as to the nature of man, that "would put soul into soil, life into limbo, and doom all things to decay" (Science and Health, p. 318), and declares his present, positive, provable perfection. Why linger longer and lag behind, like bigotry of yore? why not fall into the line of light now?

[Written for the *Sentinel.*]

EXALTATION.

MARY J. ELMENDORF.

OFTTIMES, when meditation steeps my heart
In harmony and hush and ambient light,
I seem to stand apart
From thoughts that to my duller moods respond;
Like some lone watcher, leaning out of night
To glean one shaft of glory far beyond.

Calmly I climb the holy hill of hope,
And from its summit higher summits view,—
Above the sensual scope,—
Whose sheer heights human daring may not bind,
Shining, aloof, cleaving the eternal blue—
The mighty Himalayan mounts of Mind!

My feet seem planted on the dizzy verge
Of faith triumphant, and across the vast
I hear God's music surge.
Visions of light and happiness are mine,
And, fearless, lifted from the foggy past,
I face the open gates of Life divine!

SELECTED ARTICLES.

[William C. Kaufman in *Butte* (Mont.) *Miner.*]

Christian Science teaches that God is Spirit, manifested as divine Life, Truth, and Love. It assumes, therefore, that all cause and effect, law, activity, and force must be the manifestation of Truth, which is always the outcome of good. We have, then, an unchanging creator.

Prayer is an effort to approach God—to come into His presence. When a man prays he desires something. He wants something brought to pass. Let us see how the Christian Scientist prays: He sees around him the sin, the woe, and the sickness, but has learned that they are temporary monstrosities which are apparently occupying God's place and power, and manifesting a will which is not the will of the Father. The Christian Scientist remembers that God, Spirit, is All-in-all, that "God saw every thing that he had made, and, behold, it was very good." He knows at once he cannot believe the testimony of both Spirit and matter. So he chooses that of Spirit, and realizes what James meant when he said, "And the prayer of faith shall save the sick."

We would not ridicule the musician because he maintains that discord is not the real and should not be dwelt on because it does not express the principle of music, which is harmony. Christian Science is no less consistent because it maintains that sin and sickness are discordant conditions which deny God's allness and should not be dwelt on. When mankind manifest "the Spirit of truth" and do "the will of the Father" more naturally, then they will not rely on a drug, mental or bodily manipulation, suggestion, hypnotism, or creed to realize that their prayers are answered.

["Correspondent" in *Evening Standard*, London.]

There has recently been accomplished in Boston a remarkable feat in the annals of newspaper publishing. In August last a number of lodging-houses stood on the road facing the Christian Science church in Boston. In three months those buildings had disappeared, and the offices of *The Christian Science Monitor,* containing a plant capable of turning out a large daily paper, had taken their place. On Nov. 25 the first number of *The Christian Science Monitor* was issued, and from that date the paper has steadily progressed in circulation and importance. The paper is not what is commonly understood as a religious one. In all its columns it contains only one daily article on Christian Science. It is exactly what it professes to be, a first-class daily paper of the ordinary type, the religious side of the movement being represented by the weekly *Christian Science Sentinel* and the monthly *Journal.*

The *Monitor* has already a world-wide circulation; indeed, probably no other daily paper goes to so many different parts of the globe. Its advertisements are ruthlessly edited, and an enormous number of applications are rejected. Every element of sensation is studiously avoided, and, while devoting a full page to athletics and games, it avoids all mention of betting and gambling of every description. All that is really important in the news of the world—its politics, its art, science, and literature—has ample space devoted to it, but horrors of any sort are remarkable for their absence. Politically speaking, its mission may be said to be an attempt to promote the federation of the world, instead of exciting the passions of nationalities; socially, its aims may be described as giving prominence to whatever "men do or say or think" for the betterment of humanity.

[Algernon Hervey-Bathurst in *Oxford* (Eng.) *Chronicle.*]

It is quite obvious that a man who knows the truth about a mistake is in a position to correct that mistake, and it is equally clear that a man who does not understand the method whereby the mistake is corrected, is not in a position to criticize the method. An error is equally an error, whether manifested in a man or a horse, and Christian Scientists have proved that, to the extent that they adhere to the teachings of the Bible and their text-book, "Science and Health with Key to the Scriptures" by Mrs. Eddy, they are able to heal the sick—whether man or animal.

Thousands of grateful men and women have learned through the teachings of Christian Science that the beliefs in sin, sickness, fear, and discord are no more real, no more powerful or part of the creation of God today, than they were when the Master cast them out through his knowledge of the immutable law of God. In this connection it is helpful to remember the young man who was born blind. Jesus the Christ knew that there was no law by which he was condemned to be blind, and with this knowledge he healed him. What was the result? They said to Jesus, "This man is a sinner," and they cast out the man who had been healed. The same law which Jesus and his disciples taught and applied nineteen hundred years ago has again been revealed to this age by the Discoverer and Founder of Christian Science, and it is through a knowledge of this law alone that sin is destroyed and sickness healed. If *materia medica* never failed, there might be some excuse for criticizing the efforts of others engaged in the work of helping humanity; again, because the methods of Christian Science are not the same as the methods of *materia medica,* it is essential that the physician should first carefully study and apply the teachings of Christian Science before attempting to pass judgment on them.

There is one way, and one way only, of practising Christian Science,—it is to let that Mind be in us which was also in Christ Jesus, to obey implicitly the commands of the "great Physician;" and that these commands are being obeyed, that the "signs" are "following," is beyond cavil or dispute.

[W. J. Bonnin in *Liverpool Courier.*]

If our critic would rely for his information upon the Christian Science text-book, and the authorized publications, he would learn that Christian Scientists do believe most definitely in the atonement—the reconciliation of man to God through Christ Jesus the Wayshower—and that if they have no outward ritual or ceremonial it is because they believe most implicitly that "God is a Spirit: and they that worship him must worship him in spirit and in truth." To assert, moreover, that Christian Scientists do not study the Bible is just about as erroneous as it is possible for an assertion to be. They read it as they never read it before—before, that is, Christian Science illuminated it for them—to extract every grain of truth from it, to reach, beyond the letter that killeth, the spirit that giveth life.

Christian Science certainly does extend the meaning to be attached to the word "sin," so as to let it include all that is unlike God, anything that constitutes a denial of the omnipresence, omnipotence, and omniscience of a loving God. And in this connection it is to be remembered that the Master never suggested that sickness was ordained by God; that he did not transgress any divine law when he healed the sick or raised the dead; that he came to do the will of God; that he declared the woman with the spirit of infirmity to be bound by Satan, of whom he said, "He is a liar." It is the recognition of the allness of God, and the necessary unreality of sickness and sin—in other

Digitized by Google

words, that Satan is a liar—through the light of Christ, Truth, that constitutes the forever coming of Christ; and in the measure that this understanding comes to us, in such measure may we manifest health and happiness and righteousness, and in such measure shall we be able to say with Paul, "The law of the Spirit of life in Christ Jesus hath made me free from the law of sin and death."

[Editorial in *Harlem* (N. Y.) *Local.*]

Whatever criticisms may be indulged in by the opponents of Christian Science in their efforts to discredit its claims to the serious consideration of mankind, it cannot be denied that Christ employed neither drugs, electricity, hypnotism, nor autosuggestion in his healing work, relying exclusively upon the truth, love, and power of God as the efficient remedy for all the ills that flesh is heir to. Nowhere in the Scriptures can it be discovered that he made any distinction whatever between organic and functional disorders, but healed "every sickness and every disease among the people," commanding his faithful followers to perform the same blessed work, giving them the definite assurance, "The works that I do shall he do also."

This is the key-note of the Christian Scientists' profession and practice, and they claim that they are simply fulfilling their mission in obedience to the divine injunction. According to their teachings, the true spiritual concept of God and the divine law of Love is all that is required for the solution of the "adamant of error" (Science and Health, p. 242), which they believe to be the only basis of sickness and sin. Whatever views may be entertained by others as to the logic of this position, almost every intelligent observer who is in the least degree familiar with the subject, will candidly admit that great good has been accomplished by the cult, many of whom reside in this section of the city, in redeeming many almost hopeless victims from the slavery of alcohol, drugs, tobacco, and other evil propensities to which mankind is addicted everywhere in the world.

[Captain Geoffrey Wilkinson in *Interpreter,* London.]

Christian Science starts from the premise that there is one First Cause, self-existent, eternal, infinite; one intelligence or Mind, the Being men call Spirit or God, the Principle of all true existence. Perfect Mind expresses itself in perfect ideas, so that creation is spiritual, ideal, perfect in every detail. Now matter,—that which appears to the senses,—with all its evil and discord, is the negation of this; is, in fact, the result of the carnal or mortal mind, a false, imperfect sense of things, which, for the very reason that it is a false sense of things, must of necessity be destroyed by Truth, must cease to have even an apparent reality. Material objects are consequently the counterfeits of spiritual ideas, and, speaking absolutely, unreal; much as, from the ordinary standpoint, the distorted landscape seen through a bad pane of glass is unreal. Material selfhood is a false, imperfect, mortal sense of man's true, spiritual, perfect, eternal individuality, which intrue, spiritual, perfect, eternal individuality, which in-God, in whom "we live, and move, and have our being." Even a healthy material body is not the reality of man, but health is a nearer approximation to reality than is sickness, and is one step at any rate on the road to that final conquest over physical conditions which found its perfect expression in Jesus of Nazareth, in whom "the Word was made flesh;" through whom, that is to say, the expression of the divine Mind, the spiritual idea, was made manifest to mortals.

Any one who will read, intelligently and carefully, the above résumé of Christian Science teaching, will find that it solves the difficulties brought forward by our critic. To judge by the latter's criticism, it would seem that Christian Science denied everything and left existence a dreary blank. On the contrary, it takes away nothing but the false, imperfect sense of things; it leaves the true behind. It does not say there is no rose, no landscape; it does say that the rose, and the landscape, as God created them, present a glory of which mortal sense has only a faint conception. "Eye hath not seen, nor ear heard, neither have entered into the heart of man, the things which God hath prepared for them that love him." "Things which are seen were not made of things which do appear." It will be noticed from what has been said that mortal mind cannot create anything; this false sense of things can only seem to counterfeit, to give a false sense of God's perfect creation.

The fact is that the critics of Christian Science persist in setting up a man of straw and then proceeding to demolish him. The point on which all without exception come to grief is their inability to distinguish those statements of Science and Health which deal with the absolute, that is, with the truth of being, the real, from those which deal with the mortal concept, the unreal. Christian Scientists have, probably almost without exception, gone through the same difficulties, the mistake arising from the tendency of the human mind to read the absolute statements relatively. Thus, when the critic sees such a statement as that man is spiritual and perfect, he immediately imagines that it applies to the ordinary mortal as such, and is either hilarious or angry over it; instead of realizing that it applies to man's real selfhood, the image and likeness of God, of which the mortal is the counterfeit. Such misconception will lead him to think, like our critic, that Christian Science teaches that mortal man is already perfect and there is no need for repentance; whereas Christian Science teaches that sin is unreal, inasmuch as it is no part of man's true selfhood, and must be proved to be unreal by its destruction, which destruction can only come about as Christ, Truth, destroys the illusion of pleasure in sin. Where Truth appears, error disappears.

If our critic had been able to distinguish the relative from the absolute, he would have understood why Mrs. Eddy is continually referring to mortal mind, that false sense of things which seems so real, and why, when speaking absolutely, she says "there is no mortal mind out of which to make material beliefs, springing from illusion" (Science and Health, p. 399). In the absolute, to the divine consciousness, no false sense of things exists; it can only seem to exist to itself. Of the devil, personified evil, Jesus said that he "abode not in the truth, because there is no truth in him." Evil never was any part of the reality of being, however real it may seem to be to mortal sense.

[John L. Rendall in *Scranton* (Ia.) *Journal.*]

The point that Christian Scientists emphasize more than other Christians is the present necessity for healing the sick as well as the sinner. Christian Science teaches that God's laws are infinite, consequently that they change not. This agrees with the Scriptural statement that God is without variableness, "neither shadow of turning;" therefore the law or process by which the disciples were to "heal the sick" and "cast out devils" still remains as essential and fundamental Christianity.

It must be plain to every one that there can be no new truth; it is also plain to many people that truth may seemingly be obscured for a time. The truths of Christian healing have been to a great extent ignored or neglected by most Christian denominations, hence the necessity for that which produces a more active and intelligent interest in them and which furnishes an adequate understanding of the availability of God's laws at the present time to the healing of the sick and the sinner. Now in all this our

Digitized by Google

critic and Christians generally are bound to concur, for these are the plain teachings of Scripture. The fact is that we are all striving to bring out the best results possible, though we may not all adopt the same methods. A choice between methods can be properly determined only on the basis of results. Christian Scientists are satisfied that the teaching of Christian Science produces the best results in the healing of the sick and the reformation of the sinful of anything of which they have cognizance; therefore they insist that Christian Science is emphatically Christian.

[John E. G. Sandford in *Western Press*, Bristol, Eng.]

When Pilate queried, "What is truth?" he voiced the yearning of mankind for the absolute understanding that alone can give surcease from sorrow, sin, and fear. To-day, one solitary woman's inspiration has awakened the echoes of the long-dead centuries, and caused the mountains of material belief to shake and tremble at the answer to the Roman governor's despairing question.

Christian Science is the name which has been chosen by its Discoverer, Mrs. Eddy, to designate the system of practical religion which offers, to all who will investigate it humbly and faithfully, the soul-satisfying understanding of the Master's teaching and works that enables the student who is willing to take up his cross and follow him; also to obey his imperative commands to preach the gospel and heal the sick. To the repentant sinner Christian Science says, "Let the dead bury their dead, and come thou and follow me;" to the mourner and the heavy laden, "Ye sorrow not, even as others which have no hope;" to the sick and suffering, doomed by material beliefs, "Jesus of Nazareth passeth by, for said he not, 'Lo, I am with you alway, even unto the end of the world'?"

[From an editorial in *Brooklyn* (N.Y.) *Times*.]

The *Brooklyn Times* holds no brief from Christian Science, nevertheless, it feels constrained to assert that Mr. —— is not accomplishing by his attacks what he aims to accomplish. Unbridled abuse never yet crushed out a religious belief or opinion. The blood of the martyrs always was the seed of the church. Abuse and you strengthen; denounce and you fortify. The longer Christian churchmen denounce in this fashion the teachings of Mrs. Eddy, the more followers will she have.

It may be well to note the soft answer that the Christian Science publication committee will indite for the critic. It will as surely come as will the sun rise tomorrow morning. It will breathe a better spirit than do his utterances. It will be broader in scope and will exhibit no resentment —only compassion. Then if the critic is a brighter man than his sermon would indicate, he will see a great light.

If we sit down at set of sun
And count the things that we have done,
And counting find
One self-denying act, one word
That eased the heart of him who heard,
One glance most kind,
That fell like sunshine where it went,
Then we may count the day well spent.

But if through all the livelong day
We've nothing done that we can trace
If through it all
We've nothing done that we can trace
That brought the sunshine to a face,
No act most small
That helped some soul and nothing cost,
Then count that day as worse than lost.

ANON.

AMONG THE CHURCHES.

ATHENS, GREECE.

Reading the mention of there being Christian Scientists in Constantinople, I have thought it might interest the Field to learn that there are four people in Athens who are deeply interested in Christian Science. Two of us who know English sufficiently well, have the task appointed us of translating the Bible Lessons into Greek for the benefit of the others. We are earnest workers and seekers after Truth. We have had a few important demonstrations, and hold our Sunday services regularly.—*Correspondence.*

BLOOMINGTON, ILL.

The new Christian Science church in this city has just been dedicated. The growth of this denomination in Bloomington has been remarkable, beginning with a handful of followers a few years ago, and now being numbered among the largest and wealthiest congregations of the city.

The new church is conceded to be the most beautiful in the city. Bedford stone was used in the construction, and the classic type of architecture gives the structure a distinguished appearance that has attracted wide attention. The seating capacity is six hundred and fifty, provision being made for a gallery should the growing needs of the congregation require it. A public reading-room is a unique annex to the church. The total cost of the building was fifty thousand dollars. The dedicatory program occupied the entire day, and Scientists came from all over the country.—*St. Louis Republic.*

NEBRASKA CITY, NEB.

It was eleven years ago that a few followers of the teachings of Mrs. Mary Baker Eddy met at a residence in this city and organized what they called First Church of Christ, Scientist, and since then that little body has met regularly on Sundays and occasionally during the week and held services. They have grown wonderfully in number, but so quietly has the work been done that only those who were acquainted or who made investigation knew what they were doing. There has been no ostentatious display, no antagonizing of other churches, nor any attempt to bring themselves into undue publicity.

Sunday, May 2, for the first time, they will occupy their new home. The building is located at the corner of Twelfth street and First avenue, and has one of the handsomest sites in the city. So quietly has the work of construction been done that few realize that within the past few months one of the finest little church edifices in the state has been erected. It is built of cement blocks, and presents a fine appearance. The corner-stone was laid Oct. 20, 1908. The exterior is designed in the classic style of architecture, and the same is brought out in the interior detail. The auditorium, which is 38 x 50 feet, will seat two hundred or more. A gallery over the vestibule and entrance seats fifty more. Beneath the gallery are two small rooms that can be used as reading-rooms. The cost of the building and lot is in the neighborhood of eight thousand dollars.—*Nebraska City News.*

Yes, it is true that there are moments when the flesh is nothing to me, when I feel and know the flesh to be the vision; God and the spiritual the only real and true. Depend upon it, the spiritual is the real.—TENNYSON.

CHRISTIAN SCIENCE SENTINEL

EDITORIAL

MRS. EDDY TAKES NO PATIENTS.

The author of the Christian Science text-book takes no patients, and reads no letters on disease, distress, or error of any kind. Reliable news concerning Mrs. Eddy will be found in the Christian Science publications.

"NO RESENTMENT — ONLY COMPASSION."

RECENTLY the *Brooklyn* (N. Y.) *Times*, in commenting upon an attack which had been made upon Christian Science, said,—

It may be well to note the soft answer that the Christian Science publication committee will indite for the critic. It will as surely come as will the sun rise tomorrow morning. It will breathe a better spirit than do his utterances. It will be broader in scope and will exhibit no resentment—only compassion. Then, if the critic is a brighter man than his sermon would indicate, he will see a great light.

It is gratifying to note that the merits of the work of the committee on publication are gradually finding recognition at the hands of observing newspaper men, who see in this work a legitimate effort to correct misstatements rather than an attempt to "get back at" a critic. The sole purpose of the committee on publication is to set forth the truth about the one subject in which he is vitally interested, and in which he knows the whole world would be similarly interested could it but be brought to see this truth.

This subject is Christianity in its simplest and purest form, and no one could reasonably expect to be heard on this most important theme did he not exemplify its teachings by conducting himself in a Christian manner. If "great is truth, and mighty above all things," then a simple statement of the facts, which will enlighten all who are sufficiently interested to listen, is the most effective answer that can be made, and all that is needed.

An honest critic desires to be set right if he has made a mistake. A dishonest critic needs all the compassion a Christian man is able to summon for him; and those who have been deceived by such a critic need nothing more than to be properly informed. This is the theory upon which the work of the committee on publication is based, and when this theory is put into practice in a Christian manner, good must result. Two wrongs never made a right, and never will. To abuse personally or harshly criticize a critic would be to fight him with his own carnal weapons, a warfare which has no Christian warrant and in which a Christian Scientist can have no part.

As Mrs. Eddy has said on page 342 of Science and Health, "The hour has struck when proof and demonstration, instead of opinion and dogma, are summoned to the support of Christianity, 'making wise the simple.'"

ARCHIBALD MCLELLAN.

ORIGINALITY.

THE word original is thus defined: "Pertaining to the origin, or beginning; not copied or imitated;" etc. In Christian Science we learn that the origin of all real being is God, infinite Mind, and originality is, therefore, that which expresses God,—His "infinite manifestation," to use Mrs. Eddy's words (Science and Health, p. 468). By a strange perversion, mortals waste their time in turning away from man's spiritual origin, and in attempting to get something, or become somebody, by taking from others that which they possess, or by imitation of another's work, all of which indicates, to say the least, mental short-sightedness.

To succeed in anything,—to be truly great,—one must be original, for God's ideas all have infinite possibilities and capabilities that are awaiting unfoldment. It should never be forgotten that we must *be*, before we can *do* anything of consequence. All who have ever accomplished any great good were those who recognized in some degree the possibilities of true selfhood; in other words, they were original.

In Science and Health we read, "Physical causation was put aside from first to last by this original man, Jesus. He knew that the divine Principle, Love, creates and governs all that is real" (p. 286). We could never think of Jesus as having borrowed his wisdom or derived his greatness from any other, and he was ever ready to accord to others their rightful place in the realm of Mind. Thus does our revered Leader, the most original thinker of modern times, recognize the greatness of all who are truly great. In her "Miscellaneous Writings" she says, "Great only as good, because fashioned divinely, were those unpretentious yet colossal characters, Paul and Jesus. Theirs were modes of mind cast in the molds of Christian Science: Paul's, by the supremely natural transforming power of Truth; and the character of Jesus, by his original scientific sonship with God" (p. 360). The work of such as these can never fail, and it does not cease with their earthly experiences. It unfolds with the unfoldment of all humanity; that is, to the extent that the ideas for which they stood are recognized and demonstrated.

To express originality does not mean that one should indulge in eccentricity, for as all of God's ideas have one Mind and are governed by one Principle, they must conform to one perfect standard; but each should pattern after the divine standard, not after some other idea. A botanist once explained to some interested friends that the individual blossoms on a bunch of flowers which he held in his hand were as different, each from the other, as are the faces of a family of children. Here was a hint of infinite possibilities in the way of expression—reminding us of the "diversities of gifts" named by St. Paul. The healing to which he refers has, however, taken on a broader significance in Christian Science, where it means the process by which we awaken to the divine likeness and begin to bring out a spiritual type of manhood and womanhood, "conformed to the image of his Son," to quote Paul again. This healing process requires us to get rid of all the flaws of mortal heritage which mar the character and bring discord and suffering; and which hinder the unfoldment of true originality, with all its splendid possibilities.

In that wonderful address, "Science and the Senses" (Miscellaneous Writings, p. 104), Mrs. Eddy asks, "How shall we reach our true selves [our original being]?" She answers, "Through Love. . . . I will love, if another hates. I will gain a balance on the side of good, my true being." The one who loves understands himself and others. He is not deceived by any counterfeit, but he knows that the real is God's expression, having a vital relation to its divine origin, and that, like Truth, it is forever triumphant.

ANNIE M. KNOTT.

THE PHILOSOPHY OF HEALING.

WHATEVER confidence the representatives of the various schools of *materia medica* may have in the alleged benefit to be derived from the remedies on which they rely, they must be entirely agreed that they have no philosophy of the relation of means to ends. So far as the observation and classification of the data of human experience is concerned, their procedure may be regarded as scientific, but

Digitized by Google

so far as their claim of causal relation is concerned it manifestly has no rationale.

The pure materialist may prescribe a given drug for a given disease, and be able to cite evidence in proof that relief has attended its use under similar symptomatic conditions, but if asked how the particles of matter taken into the system are able to locate the inflamed part or inactive gland, to determine the nature of its disease, and so to influence it as to bring about a normal adjustment of things,—respecting all this he has no understanding; no, not even the vaguest theory. He may say that he doesn't need any philosophy; that all he wants is a practical working scheme which is based on empirical investigation, but in so saying he certainly abrogates all claim that his scheme is a science.

The semimaterialist, who asserts that matter is a provision through which God accomplishes His ends, is equally incapable of giving any consistent explanation of that which he declares to be a divinely appointed order. If, for instance, God has arranged that a given kind of matter, such as calomel or arsenic, shall heal a given sickness, how is it that the continued use of these drugs poisons the system, thus producing another ill which is far more serious, perchance, than the original one? Has the matter in question escaped that divine control which was the dominating factor in the primary assumption, has the whole situation been taken out of the hands of purposeful affection and subjected to a malicious power which would doubly afflict the suffering? Can anything which is of God ever bring disharmony and suffering? These questions are simple but searching, and they enable us to see something of the self-contradictoriness of a so-called Christian point of view. The whole theory breaks down, not only because of the temporality of the asserted effectiveness of that which is believed to express divine law, but because of its entire lack of a rational *modus operandi*.

In contrast with the unphilosophical assumptions of every phase of materialistic thought, Christian Science gives the explanation of the Christ-healing in terms that are intelligible even to children. Every one can understand that a positive annuls its opposite or negative; that light and darkness cannot dwell together; that truth and falsity about anything cannot hold sway in a given consciousness at the same time. When therefore Mrs. Eddy declared that "metaphysics resolves things into thoughts;" that "the spiritual fact and the material belief of things are contradictions," and that "eternal Truth destroys what mortals seem to have learned from error" (Science and Health, pp. 269, 289, 288), she not only gave men a point of view which explains the works of Christ Jesus and his disciples, but she stated the Principle and rule, the ground and process, or Science of all true healing. From this point of view it is clear that neither man nor matter is or can be sick; that all disease has its origin and abode in false sense, and that the vital and continuous fact of the Christ-healing is the dissipation of error by Truth.

The naturalness and simplicity of this order makes instant appeal to thought. Its convincing finality is axiomatic; one not only apprehends it clearly, but he realizes that nothing else is thinkable, and it is this logical satisfactoriness of the philosophy of Christian Science healing which commends it to intelligent people who are unfettered by prejudice. Moreover, it not only makes the teaching of Christ Jesus lucid, but it makes it possible to explain the phenomena of medical and mesmeric treatment. When we have learned that so-called mortal law is a projection of human belief, we can understand the influence which this assertion of law exerts over all who accept the belief, but the moment false belief is known for what it is, that moment its phenomena lose their footing. Consciousness has entered the realm of Truth, and the ground and occasions of sickness are put away.

JOHN B. WILLIS.

LETTERS TO OUR LEADER.

Concord, N. H., June 9, 1909.

Mrs. Mary Baker Eddy, Brookline, Mass.

Beloved Leader:—With grateful hearts, the members of your church in Concord, N. H., in special meeting assembled, send you loving thanks for the o'erbrooding watchful care expressed in your dear letter of June 7. We realize that the best return we can make for all you have so generously bestowed upon us, is to reflect that impartial, universal Love which heals and saves; and, as you have so beautifully expressed it in your poem on "Love," to

> Seek holy thoughts and heavenly strain,
> That make men one in love remain.

Devotedly yours,

MARY D. RICE, WILLIAM A. CLARK,
MARIAN W. HERING, JOSIAH E. DWIGHT,
URIANNIE P. GROVER, *Committee.*

[Telegram.]

New York, N. Y., June 7, 1909.

Mrs. Mary Baker Eddy, Brookline, Mass.

Beloved Leader and Teacher:—The trustees of Fifth Church of Christ, Scientist, of New York city, in view of the recent statements in the daily papers, assure you that Fifth Church stands firm as a rock in loyalty to Christian Science and in gratitude to its Founder.

FANNIE BECKER, *Clerk.*
ROSALIND ROBERTS, *First Reader.*

Columbus, O., June 9, 1909.

Mrs. Mary Baker Eddy.

Beloved Leader:—While reading in the *Monitor* this morning an account of the false reports concerning you in recent papers, it occurred to me that there were, nevertheless, many thousands all over the world who tenderly love and honor our Leader, the chosen one of God.

In the seven years in which we have studied Christian Science, we have received countless blessings, a few of which I would mention. My husband, who was threatened with total blindness, was healed. Previously an infidel, he now loves and studies the Bible, and is striving to be a true Christian Scientist. I had been a delicate woman, but have been healed and strengthened until I am now able to care for my family of five children, three of whom have known no other treatment than Christian Science. Our little daughter, nearly three, has never been ill. In the daily study of the Lesson-Sermons, and other Christian Science literature, we are receiving constant blessings.

My husband joins me in sending most tender love to you.

With deepest love and gratitude,

EDNA G. (HINES) CUMMINGS.

Milan, O., May 21, 1909.

Beloved Leader:—My heart turns to you in love and gratitude for what you have done and are doing for mankind, in raising us from sin, sickness, and despair into the light and love of the divine Being, through the wonderful messages you are giving the world in Science and Health, and in all your inspired writings. I am but newly come into the knowledge of the truth, but I believe and understand as never before that God is good and is All-in-all. You have through your teachings opened my eyes to a realization of the blindness wherein I dwelt heretofore. Through Christian Science I have received healing, both spiritual and physical.

Faithfully yours,

NELLIE STANDART HOBBS.

Digitized by Google

Blackpool, Lanc., England, May 27, 1909.

Beloved Leader:—At the last meeting of our committee, when the lecture sub-committee had presented their report, and after hearing of the great demonstration,—how the lecture fund had been over subscribed,—our hall, which seats about eight hundred people, being filled with earnest inquirers for Truth, mostly strangers, to hear for the first time the meaning of Christian Science,—it was then that our hearts overflowed with gratitude to the one who had made such a demonstration possible. It was unanimously resolved to have a letter forwarded to you, expressing our gratitude and showing our appreciation for your self-sacrificing life, and our love for you, the Discoverer and Founder of Christian Science. We have learned from your teaching that something more than words is necessary to express gratitude, and in this young society every endeavor is being made to show our gratitude in deeds.

Again thanking you for the many blessings we have received,

For the Blackpool Christian Science Society,
JOHN W. HARWOOD, *Clerk.*

Los Gatos, Cal., May 11, 1909.

Mrs. Mary Baker Eddy, Brookline, Mass.

Beloved Leader:—Realizing the guidance of your constant, tender love, we, the members of First Church of Christ, Scientist, in Los Gatos, Cal., desire to express something of our great love and gratitude to you. Five years ago there were but three Christian Scientists in Los Gatos. Today, after many proofs of healing, and as a visible testimony of increased spiritual understanding, we have built, without incumbrance, an artistic and substantial bungalow, which affords us ample space for both a reading-room and a chapel. The reading-room is increasing in usefulness, and though the Sunday School is not large the children are earnest and faithful, appreciating the increased privileges given them by your recent change in the by-laws. We are thankful for *The Christian Science Monitor* and for all our periodicals, which your watchful care is maintaining at so high a standard.

To your purity of heart and self-immolation we owe our present understanding of divine Principle as ever-present Life, Truth, and Love. We are grateful for your book Science and Health, the "Key" which unlocks the Scriptures and proves the power and permanency of Spirit by healing disease and sin. We humbly pray that we may grow more worthy to follow you; and have that Mind in us which was also in Christ Jesus.

Faithfully yours,
The Committee for First Church of Christ, Scientist, in Los Gatos, Cal.

Glenwood Springs, Col., May 23, 1909.

Mrs. Mary Baker Eddy.

Dearly Beloved Leader:—I want to express my gratitude to God, and to you as the wayshower, for the wonderful blessings which have come to me since coming into Christian Science,—for my physical healing, which has been most truly wonderful (and far greater has been my spiritual understanding of God, as Life, Truth, Love), and for this beautiful thought of love which unites all true Scientists in an everlasting bond. Since leaving Boston in November, 1908, I have visited several Christian Science churches, in Chicago, Ill.; Rapid City, and Lead City, S. Dak.; Denver, Colorado. I am now located at this beautiful place, and here also we have the same earnest seekers for the truth. Many times my thought has turned to you and your untiring efforts in behalf of sick and sinning humanity. May the great Giver of all good, who has filled your heart and mind with this spiritual discernment of Truth, multiply your blessings more and more unto the perfect day. Believe me to be, most sincerely yours in the bonds of Christ,

LUCRETIA A. BOWKER.

Baltimore, Md., June 4, 1909.

Mrs. Mary Baker Eddy, Brookline, Mass.

Dear Leader:—I wish to thank you for the added proof of your loving care for us, and for the Cause, which is expressed in the article "Class Teaching." Your patience and love in being willing to add "precept upon precept," in tireless faithfulness, is certainly the love of a mother for her children. I have felt the need of just this word which you sent us, as error has raised its voice against class instruction, and with a multitude of reasonings is trying to cut off the searchers for Truth from a more perfect and exact understanding. I had my own struggle with this question both before and after receiving the instruction, the argument before being to stand alone with God, as He is All, not realizing then how little I knew Him or what standing alone with Him meant. The argument after going through class was that I had lost, not gained, by the class. I now realize that it was my own awakening to sin and self-righteousness that made me feel the great sense of loss. I had gained a clearer realization of God as divine Principle, and as the work has continued it has caused me to prosper as never before, and to help others, so that I am now beginning to be useful instead of helpless.

May I be a blessing to the Cause you have so earnestly striven for, and thus express my gratitude to you. My teacher is your student, Miss Ellen E. Cross.

Very sincerely,
ETTA M. GILBREATH.

South Orange, N. J., June 2, 1909.

Mrs. Mary Baker Eddy, Brookline, Mass.

Dear Leader:—Now that the academic year at Columbia University is drawing to a close, I feel I must write you about the wonderful lecture our Christian Science Society of Columbia gave in May, as it meant very much to us to give a lecture during the first two months of our existence as a religious society. We have met with uniform kindness from the officers of Columbia, through whose permission and good favor we were able to give a lecture by one of those splendid workers of the board of lectureship, Bliss Knapp, C.S.B., who delivered at Columbia, on the evening of May 7, a most wonderfully clear and logical exposition of the fundamentals of Christian Science. That lecture was truly an inspiration, and met every argument brought up here against Christian Science. The university newspaper printed quite a goodly portion of the lecture. It might interest you to know that at the time we asked Mr. Knapp to lecture for us and he so kindly consented to help us, we did not have a penny in our treasury, but that on the night of the lecture we had almost one hundred dollars.

We have been able to place *The Christian Science Monitor* in Earl Hall, the Y. M. C. A. Building here, where newspapers are on the tables for the use of the men students of the university. In the Columbia Library magazine room can be found the *Journal*, *Sentinel*, and *Monitor*. The Christian Science Society of Harvard were very kind to us when we were taking our initial steps in organizing. Such loving cooperation among your loyal followers brings out a sweet sense of the individual's living of Christian Science, which is an honest acknowledgment of gratitude to you, whose earnest Christian life is an example to us all.

Lovingly,
VIRGINIA TAYLOR, *President.*

THE LECTURES.

DALLAS, TEX.

"Christian Science, the Science of Salvation" was the theme discussed last night [April 17] by Prof. Hermann S. Hering, in an address before a crowd of good size in Carnegie Hall. The speaker of the evening was introduced by B. C. Odom, Reader of First Church of Christ, Scientist, who said in part,—

The essential problem of the moral and religious reformer is to lead mankind away from their tendencies of evil and limitation to ways of good. All Christendom is agreed that the best plan, indeed the only right method, for this reformatory work was established, or set forth, twenty centuries ago by the lowly Nazarene, when he revealed through his teachings and demonstrations the true relation of God to His universe. This knowledge was to free humanity from their erroneous theories, false thinking, by planting them firmly on the Christ-idea of spiritual supremacy, the stone which the builders had rejected. For to none before him had ever been so clearly revealed this basic law of life, "As he thinketh in his heart, so is he." The mission of Christian Science is to place before the world this new-old ideal, to remove from mortals the shackles of erring human thought, by giving a practical, scientific knowledge of God.—*Dallas News.*

SALT LAKE CITY, UTAH.

Judge William G. Ewing of Chicago lectured last night [May 2] on Christian Science to an audience that filled the Salt Lake Theater. Judge Ewing was introduced by C. B. Stevens of Second Church, who said,—

For 1900 years a large proportion of mankind have claimed to be Christians—followers of the teachings of Jesus of Nazareth; yet much has been done during these years in his name which cannot be justified by any interpretation of his teachings. Often men, in dissent of the interpretation given to his words, have torn loose from the established organizations, and with trial and suffering have sought to procure for themselves the opportunity for belief and practice of Christianity according to their own interpretation. Much that has been written of our own history contains a record of such efforts. There are today more than two hundred sects of Christians, differing from each other in the importance ascribed to one or more elements of doctrine. From the simple creed of the early Christians has been fabricated an involved and intricate system. Books have been multiplied in explanation of tenets which seem unexplainable even from their own standpoint; and the logic is so intricate that the ordinary man for whom religion was intended cannot fathom it. The student of these doctrines turns away in wonderment that such conclusions could have been reached from the texts quoted in support of them.

It is complained today that the churches have lost their hold on the people, and there is anxious inquiry on the part of friends of organized Christianity for a reason. Articles are numerous, written by ministers and editors of religious periodicals, which admit the fact, but do not see or cannot admit the reason; in some articles we find such terms as "the reproach of Christianity;" "Is modern organized Christianity really Christian?" etc. The conclusion is reached in some instances that the dropping off of attendance, the additions to the ranks of those who call themselves agnostics, are due to the inadequacy of prevailing creeds and teaching to define a reasonable and acceptable view of God—the insufficiency of nourishment in the spiritual food offered. Jesus declared his word to be the truth; and certainly truth is always the truth, and can never be more nor less.

It is but forty years since Christian Science was presented to the world. It does present a new view of the teachings of Jesus, one which provides, in the opinion of its votaries, a reasonable and acceptable view of Christianity. Moreover, in the experience of thousands upon ten thousands is shown the "signs following" where promised. That it is reasonable and acceptable is shown by its steady, unhindered, rapid growth throughout the world, without pomp or pageantry.—*Inter-Mountain Republican.*

DUBLIN, IRELAND.

On Sunday afternoon, May 2, Francis J. Fluno, M.D., lectured on Christian Science in the Antient Concert Rooms. Colonel H. Kennard, Fifth Dragoon Guards, introduced the lecturer, saying in part,—

Christian Science is growing so rapidly that it has passed the stage when it was classified as an absurd craze, and it is in the second stage when people are saying that there is very likely something in it. This is the stage reached before people say that they knew it all the time. I imagine that many must be like myself. I went into the subject expecting to find something new, whereas I found it was the same Bible and the same religion which I had been taught as a child, but with a difference; because, instead of stopping at many places and saying, "This happened in the time of Jesus on earth, and was a special demonstration of God's power for the disciples," Christian Science said, "These demonstrations of God's power were to show us the way to do the same things, and how to use man's God-given power to have dominion over all things." However, all this and much more you will hear this afternoon. You will not be asked to believe anything that cannot be proved. As St. Paul said, "Prove all things; hold fast that which is good." —*Correspondence.*

TOPEKA, KAN.

A large audience greeted Frank H. Leonard of Brooklyn, N. Y., at the Grand Opera House, Sunday afternoon [May 2], to hear his lecture on "Demonstrable Religion." He was introduced by Harry L. Rhodes of Topeka, who said in part,—

Jesus' healing work was not the result of his physical presence, but it was his perfect understanding of God's laws and their operation, because he said, "I speak not of myself: but the Father that dwelleth in me, he doeth the works." The mission of Christianity is to know God as Jesus knew him. The apostle Paul left us proofs in the first century that this message of Jesus was the truth; it must, therefore, be the truth today. Christian Science offers to every thoughtful man and woman a religion which covers every human need. To the weary and heavy laden, rich and poor alike, Christian Science brings that same sweet message of Christ Jesus which heals all their diseases and releases them from the bondage of sin, suffering, and poverty. Not a gaze into a far-away heaven, but a consciousness of ever-present Love which purifies and uplifts.

TESTIMONIES OF HEALING.

I became interested in Christian Science about ten years ago, through a copy of *The Christian Science Journal* which was loaned me by a friend, who also induced me to accompany her to one of the meetings, which at that time were held at a private house by a small band of workers in Dresden. My interest was aroused, and I continued to attend the testimonial meetings, as well as the Sunday services, as I was greatly uplifted and encouraged by what I heard and always came away with a feeling of joy for which I could find no words.

At that time I was far from being well. Some two years previously I had fallen from a high step-ladder, injuring myself badly. Following this accident, I began to feel very ill, and a physician was called who stated that I had sustained internal injuries which would necessitate an operation. To this I objected, declaring to my husband that I would rather suffer the pain, and the doctor was accordingly discharged, as he said that he could do nothing further for me. Massage, together with a cold-water treatment, was then given a trial, and for a time this afforded me some relief; but I always felt weak, and could not walk or attend to any of my duties. At this epoch my attention was called to Christian Science. I purchased a copy of the text-book, "Science and Health with Key to the Scriptures" by Mrs. Eddy, and began to study it by reading a few chapters every day, and to my great joy all my ailments gradually ceased. I could hardly conceive that by simply reading this book I had become quite a new woman. Since then I have enjoyed better health than ever before.

My boy, aged five, soon after my illness had a severe attack of what appeared to be an eruptive fever, and a doctor had to be called in, owing to the police regulations here. The boy was quite restless, had a very high temperature, and was full of fear. I soothed him, and when the household had retired to rest I sat down by the child's cot and read through the chapter on Prayer several times. I soon noticed that the child was sleeping peacefully and that his temperature had gone down. He did not waken until the next morning, when he proved to be perfectly well. When the doctor came round to visit the patient, he was greatly surprised to find the boy quite well and playing about, and said his eyes must have deceived him.

Some time later my husband was laid up with what the doctors pronounced a very serious affection of the spine. Notwithstanding the cases of healing which I have related, he did not believe in Christian Science, and one of the leading specialists of this city was sent for, who told me that my husband would not live more than another month or so. This verdict did not frighten me in the least. He was placed under Christian Science treatment, and in a comparatively short time he was completely healed and on his feet again. He even learned to ride a bicycle at an age when other people generally give up this sport, and he has enjoyed perfect health ever since.

Error has crept in now and then, in the form of rheumatic trouble, blood-poison, and other ailments, but I have always been able to overcome it promptly by Christian Science, and it has also been my privilege to help others. For over ten years not a drop of medicine has entered my house; the members of my family have always relied on the power of Truth and Love as taught in Science and Health, and I am hourly thankful to God, and to Mrs. Eddy, for all the blessings which I and my family have received through Christian Science. My heart goes out in gratitude to our dear Leader, who brought this great truth to mankind.

MRS. EMMA PFAUENFELDER, Dresden, Germany.

It is with much gratitude that I give my experience as to the healing truth of Christian Science. Some years ago, when I was going through a mine, a large rock fell and struck my left leg, pinning it to the wall so that I was unable to extricate it till the rock had been moved. I was taken to the hospital, and upon examination it was found that the leg was severely injured. The next day I asked the doctor how long he thought I would have to remain there, and was informed that if I got out in six weeks I would be lucky. Word was sent to a Christian Science practitioner in Denver, who began treatment at once. The sixth day I told the doctor that I wanted a pair of crutches, that I was going out. At first he would not listen to me, but after putting my leg in a plaster cast (which I removed the second day) I was allowed to go. In three weeks I discarded the crutches, and the injury has never caused me the least inconvenience since.

At another time I was testing some rock with nitric acid. In some way the bottom of the bottle had become cracked, and as I held it up in my hand the bottom came off, and in an instant about an ounce of concentrated nitric acid had run down my arm. I wiped it from my hand, but before I could get my clothes off it had done considerable damage to my arm. For the time being the pain was intense, but fifteen minutes after the accident I received treatment in Christian Science, when all pain immediately ceased, and the arm has caused me no inconvenience since. The healing was rapid, notwithstanding that it was my right arm which was burned, and as I was doing a great deal of writing at the time, the burned part was constantly in contact with the desk.

I am very grateful for these and other blessings which I have received through Christian Science.

DAVID T. VOSE, Denver, Col.

I owe a debt of gratitude to Christian Science for physical healing and spiritual uplifting,—the consciousness of the omnipotence of God, good. With the hope that the healing truth which has come to me through this teaching may help some other to find the same blessed relief from physical suffering and to demonstrate that God's children are free from all that would mar the perfect reflection of infinite Mind, I give this testimony.

About eight years ago I met with a very serious and painful accident. I was run down while on my bicycle by a runaway team attached to a heavy wagon. My injuries were such that for months afterward I suffered terribly. After I recovered sufficiently to leave my bed, I had to be wheeled about in a chair. The doctors at the hospital, as well as those who attended me afterward, told me that sometime in the future I would have to undergo a severe operation. They also informed me that it would probably be months before I could leave the hospital. In September, 1908, my back, which since the accident had given me much trouble, began to get very much worse, and no one knows what I passed through. I had been interested in Christian Science through the healing of my sister, of serious lung trouble, and in my distress I appealed for help, with the usual result. After a few weeks' treatment relief came, and today I can thankfully and truthfully say that I am almost entirely free from pain. I eat and sleep well, can sew and do all my housework as well as ever. I have lost the terrible dread of the impending fate meted out to me by my physicians. I have also been cured of a very bad form of skin disease which had troubled me since childhood and which at times caused terrible suffering. All this has passed away, and my skin is now as clear and clean as that of a child. I no longer dread a change of the weather, which under the old thought used to aggravate my complaint.

Digitized by Google

In the practical demonstration of health and strength which has come to me, is it any wonder I am so thankful to Christian Science, and to Mrs. Eddy for the light and truth which she has given to the world through Science and Health? She has brought to light again the understanding of the Christ-healing, and the way to apply it to our physical and spiritual needs. She has made plain man's spiritual relation to God, good, the healing power demonstrated by Christ Jesus, the great Wayshower.

MRS. BELLA RAYMOND, Atlantic City, N. J.

Four years ago, after several months of intense suffering, I consulted the family physician, also a surgeon of wide-spread reputation, who told me that my condition was most serious, and that in his opinion nothing but an operation would give any relief. Seeing my extremely nervous state, he prescribed for me, and said we would try medication for a month; at the same time he told my sister that he had no hope of a cure from anything but surgery. I took none of the medicine, but the next day consulted a Christian Science practitioner, and found help in the very first treatment. I showed marked improvement each day, and at the end of thirteen weeks I called on the surgeon to show him the change that had taken place. He was perfectly delighted with my condition, assuring me that no operation would be necessary, and it is needless to say that there never has been.

While this is the greatest demonstration of the truth, I have also been healed of several chronic ailments which it seemed impossible to cure in medicine, and my son and my brother have both been healed of badly injured ankles in a few hours' time. My son met with his accident at college, and after a week's surgical treatment there, he came home on crutches. He was quite athletic, and very clever at tennis. The surgeon told him he would probably never play again and must wear an anklet for years. After one treatment in Christian Science, he walked without any aid, and in three days was entirely well. On his return to college, two weeks later, he took his place on the university team.

Each day I realize how plain Mrs. Eddy has made this great truth, and I am most grateful that I have been able to grasp it, even in part.

MRS. SARA H. HOPPLE, Cincinnati, O.

I have been benefited in many ways since accepting Christian Science, but to me the most convincing proof has been the healing of our baby. She had been a constant care for sixteen months, could not walk or talk, and was unable to digest her food. She cried a great deal, and at this particular time had been suffering for three days with throat trouble, when a friend took us to a Christian Science practitioner. Although there had seemed to be no hope for the child, in half an hour she was sleeping quietly in my arms. In one week's treatment she was freed from the physical ailments, and in two weeks more she walked and began to talk. When two years old she began to attend Sunday School, and now, nine months later, is a picture of health and happiness. I am indeed grateful to God for His mercy, and to dear Mrs. Eddy for her knowledge of God.—MRS. FLORA F. GOUCH, Medford, Mass.

Christian Science found me helpless, hopeless, beaten, broken; mentally and physically incapacitated and in financial despair. For three years I had been greatly reduced in weight. I was lifted from these conditions into a measure of health and prosperity and enabled to take my place in the world. This healing came to me from a few brief statements of Christian Science gained from the public criticism and misrepresentation of Mrs. Eddy's great work, Science and Health, illustrating and verifying her statement, "A grain of Christian Science does wonders for mortals, so omnipotent is Truth" (Science and Health, p. 449). For the wonderful healing, and all that Christian Science has been to me in the years that have followed, words are impotent to express my deep gratitude to God, and to Mrs. Eddy.

GEORGE G. COUTTS, Santa Ana, Cal.

[Translated from the German.]

When I first heard of Christian Science, some two and a half years ago, I had just recovered from an attack of asthmatic trouble, from which I had been a sufferer for ten years, and during the last year the attacks had been frequent and severe. I became interested in Christian Science, and attended the meetings, and thereby got to understand better this saving truth. The asthmatic trouble has not returned since, and my child has been healed of a cough and several other ills.

I am especially anxious to tell about the healing of my dear mother, who was run over by a carriage while crossing the village street in February, 1909. She was severely injured, one of her ears being nearly dissevered. A few men carried her, unconscious, to her house, and a physician came after a short while. The condition was considered such a serious one that he took her immediately with him to the hospital of a little town, where the wounds were sewed up. The physicians doubted that the ear would heal, and her injuries were such that there was scarcely any hope of her recovery. My sister, who was then living in the country, a few hours from here, telephoned to me at Dresden, asking for help. I went to a Christian Science practitioner the next day, and we were shown the all-power of divine Love, for at the same hour when the truth was declared for our mother, she revived from the unconscious state in which she had lain since the accident. My brother, who up to that time was not convinced of the truth of Christian Science, became a believer through this occurrence.

On the following day the ear began to heal, and the other wounds also healed up very quickly. The physicians were astonished that this should be the case with a woman sixty-six years of age, but we knew that God is the "great Physician." Now all the wounds are healed up, and the ear has grown to the head. Our joy and gratitude are unbounded; it has been to us a glorious proof of divine Truth and Love. I pray to God daily for a better understanding of the truth which makes us free.

FRAU MARTHA THOMAS, Dresden, Germany.

The Christian Science text-book, "Science and Health with Key to the Scriptures," has indeed been to me a key to the Bible; it has made the word of God practical in my every-day life. The better understanding of God which I have gained since I became a student of Christian Science, has been an ever-present help to me in times when discord seemed to darken my path, and accidents have been shorn of their accompaniments of fear, pain, and discord, through this understanding of God as good and as omnipotent, ever-present Love.

At one time my little girl had a finger severely bruised, and for about fifteen minutes there seemed to be intense pain, but soon she lay sleeping on the couch. When she awoke all pain had disappeared, and the finger became normal in a short time. A grateful prayer that this Truth has come as a revelation to our age, to free all men from the bondage of fear and pain, brought harmony to our consciousness. Some time ago my little girl manifested all the symptoms of serious lung trouble, and during that day and the long night many were the fears that presented themselves, but they were put out by constantly holding in

Digitized by Google

thought and repeating this verse from Isaiah, "Thou wilt keep him in perfect peace, whose mind is stayed on thee: because he trusteth in thee." I had learned to trust in God by getting better acquainted with "our Father, which art in heaven" (in harmony), and my absolute faith in God was wonderfully rewarded when by the next morning every symptom of the disease had disappeared. I took the child to church with me (it being Sunday), and gave thanks that through the study of our text-book I had learned to trust God, whose promises are absolute and unfailing.

Recently another daughter was out roller-skating. When she came home she seemed to be in great pain, and said, "Mamma, I fell on my arm, while I was skating down a hill, and now I cannot move it." Through her understanding of Christian Science she was able to overcome almost all the pain, but there was a fear that her wrist might be seriously injured. I telephoned to a Christian Science practitioner for help, and soon after the child was able to move her arm a little. In about a week she could use it as well as the other. I had felt that I was willing to trust God in this case, knowing that, as the apostle tells us, He "is able to do exceeding abundantly above all that we ask or think," and this speedy relief made me very grateful. I send this testimony with the hope that it may encourage some other mother to have faith in God.

A deep and sincere gratitude fills my thought, that through the help of Christian Science a faulty disposition is being improved, and I know that eventually all errors of disposition will disappear in proportion as I am able to put into practice what I have learned. In the government and education of the children this thought from our text-book (p. 192) has been of great help to me: "The good you do and embody gives you the only power obtainable." I am more grateful than I can express in words to our Leader, Mrs. Eddy, who through her untiring labor constantly encourages and helps us on our way. I know she is blessed in her ascending path.

CHRISTEL S. LANGE, Portland, Ore.

At what seemed to be my extremity, and at a time when most needed, Christian Science came to my notice, and I found it to be the "still small voice" of Truth. I did not come to Science for physical healing, but was attracted to it by its bright promise of spiritual regeneration and as the healer of mental and moral faults. I thank God for the glorious light which it has shed on the Scriptures, as in my previous experience the Bible was a sealed book. Through the study of "Science and Health with Key to the Scriptures" by Mrs. Eddy, God's messenger to this age, the way has opened up to me to walk closer with God, and His Christ, in divine Science. In loving gratitude this testimony is sent to those who are struggling with a false sense of existence. I can assure them that it will be overcome through Truth and Love. I give thanks to God, and to our Leader, for the many blessings that have come to me.—GEORGE HICKS, Brooklyn, N. Y.

I esteem it a great privilege to tell what Christian Science has done for me. I had suffered for years with rheumatic and heart trouble, etc. After exhausting every available material remedy, without receiving any benefit, I was finally persuaded to try Christian Science, and can very thankfully say that I have been entirely cured. At times it seemed that the healing was very slow, but today I am a strong, healthy woman and able to do a day's work without any sense of fatigue whatever. Last winter I had an eruption on my hands and arms which was very unsightly and painful. I called a Christian Science practitioner, and in a very short time the trouble was overcome. I came to Christian Science for physical healing, and I not only found health, but happiness and the peace of mind which "passeth all understanding." I am very thankful to God, and to our dear Leader, for this great truth. I have found it a very present help in sickness and trouble.—MRS. HARRIETT D. BUCHANAN, Alpena, Mich.

Five years ago I was searching for a remedy for a skin disease on my face. After I became discouraged in the use of the regular medical prescriptions, I resorted to other remedies, and when these failed I tried a French cure and facial massage, with and without electricity; then consulted still another physician. I gave him a thorough trial, as I had in all the above instances, but the disease withstood them all. It was indeed a discouraging trouble and one so glaringly in evidence that it was a constant source of embarrassment and torment.

My mother had been a Scientist since 1888, so that I had been associated with Christian Science nearly all my life. My father was not interested, however, and as a boy is proud to pattern after men, the very earnest efforts of my mother to show me the way were largely unheeded. When material remedies had failed, however, that inherent hope which springs eternal in the human breast, turned me to Christian Science as a last chance, and I then listened meekly to motherly advice. I worked for myself, with occasional assistance. The healing was not rapid, but was attended with steady improvement. I had been told by a skin specialist that the trouble would remain until I became thirty, and probably longer; but I am now only twenty-four, and have scarcely a trace of the affliction.

I find the study of Christian Science of perpetual benefit in every walk of life. It teaches me how to appreciate blessings; how to endure disappointments, difficulties, and discouragements until they are overcome; and, in great measure, how to understand God; I am therefore grateful for this available religion.

J. PORTER HENRY, Jefferson City, Mo.

It is about eight years ago since I met with an accident and injured my wrist. I underwent a very severe operation, and it was nearly a year before I could work again. I had just got into a good situation when my hand began to ache and became bad again, so that I was obliged to give up work and undergo another operation. I, however, got fairly strong again, and settled into another situation. Everything seemed to go well for a few months, then to my dismay I found my old complaint coming back again. After that time I gave up all hope of ever doing hard work again; my doctor told me I would always have to keep going under operations. I lost all heart, and felt quite useless in the world, but thanks be to God, and to Christian Science, I am of some use in the world, for I am back again in domestic service and working as hard as ever I did before I was ill.

My sister heard a lecture on Christian Science in the Albert Hall, London, in April, 1907, and she came back and told me I could get healed of my long-standing trouble. I then went to the reading-room in Baker street, London, where I met a kind practitioner, who took my case. In less than two weeks I was back at my work, and have been well ever since. I do not know how to be thankful enough to God, and to the revered Founder of Christian Science. I hope many may get a blessing from my testimony. I am trying to help others with this wonderful truth. It is now nearly two years since I was healed.

FLORENCE DADY, Birdlip, Gloucester, England.

Almost six years ago Christian Science found me, a miserable, lonely woman, reaching out for God and praying that He would send me one friend in this great city

Digitized by Google

where I was a stranger. The prayer was answered in the form of a dear Christian Scientist, who invited me to attend the service at First Church of this city, and who also loaned me a copy of Science and Health. It was then I knew I had found God. Soon after this I received treatment, and was healed of an organic condition for which two physicians had said there was little help outside of an operation, and even of this they were not sure. I had also from childhood been a great sufferer from bowel trouble, for which I had no hope of relief, as it had assumed a paralytic form, but this condition was the first to leave me. Since then has come the healing of fear, worry, and many disagreeable qualities in disposition.

For all these blessings I am more grateful to God than words can express, and to our beloved Leader for the teachings that have enabled me and thousands of others to rise somewhat to a true sense of God as the only Life.

MRS. ALICE L. SHERWOOD, New York, N. Y.

I am not a member of the Christian Science church, but I am a student of its teachings, and I feel such thankfulness to God, and to the dear friends in Science who have given me aid and encouragement along the way, that I must perforce speak, or feel myself an ingrate. I came to Christian Science by way of great bodily suffering and depression. I had passed through an operation which left me in a wretched condition—days of extreme prostration and nights of sleeplessness. Reverses of fortune, and loss of all those dear to me had made life seem unbearable. I often felt my courage ebbing, and thought I must end the struggle in some way. The injustice it had been my great misfortune to bear, the treachery, the perfidy of those whom I had loved, had borne most heavily upon me, and I sought surcease from it all as a seeker for truth. Through theosophy and "mental science" I traversed the dreary way. Comfort? I could not find it.

At last a copy of Science and Health came into my hands, and I found in it the solution of every life-problem. It has given me a new understanding of the Scriptures; they now glow with meaning and interest. Its study is removing discord and inharmony. I am deeply indebted for the example set me in Christian Science of a selfless life of kindness to man and beast. I realize what wonders Christian Science can work in mankind. There came a day when the old trouble seemed to return with renewed violence. I sought aid, and was healed, returning to my work refreshed, strengthened, and with renewed courage. This wonderful truth has changed completely my way of living and thinking. "Old things" are indeed "passed away." I have demonstrated the truth of Christian Science.

MAY ELLIS ADAMS, Santa Ana, Cal.

When our little girl was three weeks old she had an attack of illness, but our physician advised us not to give her any more medicine than was absolutely necessary. Believing that the trouble would soon wear itself away, we patiently awaited the improvement which did not come; then for twenty months we struggled to find some help for her condition, which was constantly growing worse. All that physicians, nurses, and experienced mothers could suggest, was resorted to in vain. During these twenty months the child had never slept more than three continuous hours, and she always awakened crying, as if in pain, and it was anywhere from half an hour to two hours before she could be quieted and again put to sleep. Finally she had a bronchial attack, and with the aid of a skilful physician we struggled several days to keep her with us. After this attack the physician told me the time had come to be plain-spoken; he said I must know that the child could not go on that way much longer, unless something were done to relieve her; that she had no constitution whatever; that another attack such as she had just endured would surely prove fatal. He further declared he knew of only one thing which might help her, and that was six months of special treatment.

One doctor had cautioned me about drugs, and here was another, equally skilled and conscientious, advising drugs for six months! Worn and discouraged, I cried a good share of that night, and the clouds seemed very dark and heavy. The next day my husband suggested that I call on a friend who had become a Christian Science practitioner, remarking that Science could not hurt our baby, which was more than we knew about medicines. After telling this friend our anxiety, and frankly admitting that I had no faith in Christian Science, but did not know what else to try, I was assured that "man's extremity is God's opportunity," and baby had her first treatment.

Her improvement was very marked and steady, and in six weeks' time she was well, eating everything, sleeping all night, and the many troubles which had developed during those twenty months were all destroyed. Like doubting Thomas, however, I could not believe that such results could have been produced by Christian Science, which was so foreign to anything I had ever accepted or understood. One day, about this time, I heard a peculiar noise coming from the room where the baby was having her afternoon nap. Rushing in, I found her in an alarming condition. Forgetting all about Christian Science, and in a panic of fear, I hastened to telephone to the doctor, but found myself giving the Christian Science practitioner's number instead. I was told that a treatment would be given at once, and the practitioner reached the house in three quarters of an hour, during which time the convulsive movement lessened considerably. For an hour and a half the practitioner remained with us, and then I found the child in a free perspiration, with the fever entirely gone.

Words are inadequate to express my feelings of gratitude at that time. It was as though I had been ushered into the presence of some mighty power of whose existence I had before been ignorant, and I bowed my head with reverence. I could no longer doubt; I knew that Christian Science had healed our baby. The next day I purchased a copy of Science and Health and became an earnest student. This was eleven years ago, and since then Christian Science has met my every need. Is it necessary for me to say what Christian Science means to me, or how grateful I am to her who has revealed to us this truth and made the Christ-teachings practical to our daily needs?

RUBY M. FISHER, San Jose, Cal.

[Written for the *Sentinel*.]

TWO PRAYERS.

MARY BRENT WHITESIDE.

ONE in the prison-house of erring thought,
Where darkness reigned through the unlighted year,
In stress and tears, for his own worship, wrought
A frowning God of vengeance and of fear.
Teach me, he cried, though blind, to follow Thee;
To tread Thy thorny way, where'er it lie;
And if it lead at last to Calvary,
Teach me to die!

One answered him from that clear light divine,
Of faith that sears with every conscious breath:
A God of immortality is mine,
Why need I think, then, of the change called death?
Christ sought to wear the crown of thorns alone;
I humbly take the gift He fain would give,
And may the God who loveth all His own,
Teach me to live!

Digitized by Google

FROM OUR EXCHANGES.

[*Christian Work and Evangelist.*]

The day of sectarianism is doomed, for this sense of the universality of religion will rapidly take men's minds off those smaller facts that divide. It has never been the eternal or universal elements in Christianity that have made sects. It has been the lesser things of the mind, not the deep things of the heart. The happiest sign of our time is this growing desire to get back to the great eternal truths of Christ, the truths that must be true in heaven and earth, time and eternity, in men and angels. Men will not long be interested in any truth that is not large enough for all men. It is already getting harder and harder to awaken discussions over things that have divided sects. We speak before all kinds of denominations and we find the intelligent man is not interested any longer in denominational truth. A truth which is not big enough for all men to hold will not win the modern man. The sooner the church recognizes this, and puts all her emphasis on proclaiming the great, divinely human, fundamental teachings of Jesus Christ, and holding up his life as the pattern of the ages, the better it will be for the church. Scores of intelligent men, who have caught this vision of the universality of Christianity, and who know that truth which is not large enough for all Christians will never hold this age, are already getting impatient with those leaders who insist on calling the temporal, passing things which divide men, Christianity.

[*Universalist Leader.*]

He who reads the story of the baptism of Jesus at the ford of the Jordan, and finds in it only a preface to the wilderness and only a scene in a great tragedy, misses much of its diviner meaning. This youth came out of Galilee. His life had been spent in a little village of the countryside. He was more obscure than Columbus was at the court of Ferdinand and Isabella. But he, too, has been dreaming, dreaming, dreaming through the long years of his lingering boyhood. Now, here on the bank of the river, touched by the tongue of eloquence, stirred by the passion of a great soul, an old world passes away and a new one is created in the consciousness of one listener. Do we not understand that for Jesus every flower was more beautiful and fragrant, every bird-song sweeter, as the sun went down that day? He, too, stood "silent upon a peak in Darien," and felt the winds that brought hints from "beyond the sun." So the dove came out of the somewhere, with its message of peace and love.

[*Congregationalist and Christian World.*]

It was an inherited and deeply rooted conviction in the Puritan mind that all physical ills had some moral and spiritual cause. Efforts to remove the causes of diseases, famines, wars, and other disasters were of a distinctly religious nature and gave to all family and public life a religious appearance which has been much modified in recent years. Our appointed days of fasting have disappeared. Our public worship has a less somber color.

[*Zion's Herald.*]

The individual in whom Christ dwells, and whose life is hid with Christ in God, is becoming a new man all the while, and constantly filling full, in ever richer and grander degree, the complement of spiritual power and gracious energy with which God desires that his personality should ideally be stored and strengthened.

SPECIAL ANNOUNCEMENTS.

FROM THE PUBLISHER OF MRS. EDDY'S WORKS.

THE CHRISTIAN SCIENCE TEXT-BOOK, "SCIENCE AND HEALTH WITH KEY TO THE SCRIPTURES."—This work contains many important changes and additions by the author, and also contains a photogravure portrait of Mrs. Eddy, together with a facsimile of her signature.

SOME OF MRS. EDDY'S WRITINGS IN NEW BINDINGS.—One volume containing Unity of Good, Rudimental Divine Science, No and Yes, Retrospection and Introspection; a second volume containing Christian Healing, The People's Idea of God, Pulpit and Press, Christian Science *versus* Pantheism, and the Messages of 1900, 1901, and 1902. These volumes are printed from new plates and are uniform in size with the pocket edition of Science and Health. Bound in morocco, limp, round corners, gilt edges, heavy Oxford India Bible paper. The prices of these books prepaid are as follows: single copy, $3.50; six or more copies of either volume to one address, each $3.25.

THE CHURCH MANUAL.—Containing all the By-laws of The Mother Church, The First Church of Christ, Scientist, in Boston, Mass. Each new edition of the Manual will have special notice in the *Sentinel*. Price, single copy, prepaid, $1; six copies to one address, $5; twelve copies to one address, $9.

Attention is called to the Library Edition of Mrs. Eddy's works, description and prices of which will be found on the outside cover page of the *Sentinel*.

Address all orders for books named above to ALLISON V. STEWART, Falmouth and St. Paul Streets, Boston, Mass.

FROM THE CLERK OF THE MOTHER CHURCH.

CHURCH TENETS.—The tenets of The First Church of Christ, Scientist,—The Mother Church,—printed on folded sheet for the use of Branch Churches of Christ, Scientist, with space for the names of churches and their by-laws, can be had at seventy-five cents per hundred.

Not less than one hundred are sold. Postage stamps are not taken for payment.

MEMBERSHIP.—Correspondence relating to membership with The Mother Church, and requests for blank applications for membership, should be addressed to the Clerk.

All correspondence and orders relative to the above should be sent to JOHN V. DITTEMORE, Clerk, The First Church of Christ, Scientist, Falmouth, Norway, and St. Paul Streets, Boston, Mass.

FROM THE CHURCH TREASURER.

PER CAPITA TAXES.—Per Capita Taxes and Contributions to The Mother Church, The First Church of Christ, Scientist, in Boston, Mass., should be sent to the Treasurer. Please do not send currency.

Remittances for the above should be sent to STEPHEN A. CHASE, Treasurer, Box 56, Fall River, Mass.

FROM THE SOCIETY.

Attention is called to the announcement over our Leader's signature, which appeared in the *Sentinel* of Jan. 9, to the effect that Christian Scientists in the field who send four subscriptions to the *Monitor* for one year, will receive their own paper gratuitously.

The Publishing Society has in stock a number of copies of *Sentinel* No. 6, Vol. IX., containing the article "What Our Leader Says" as last published. As this article is of abiding interest and value to the Field the Society will be glad to supply it, postpaid, at the following prices: 1 copy, 5 cents; 5 copies, 15 cents; 10 copies, 25 cents; 25 copies, 50 cents; 50 copies, 85 cents; 100 copies, $1.50.

On foreign orders add 2 cents a copy to cover postage.

The supply of *Sentinel*, Vol. IX., No. 14, is exhausted.

THE CHRISTIAN SCIENCE JOURNAL

FOUNDED APRIL, 1883, BY THE AUTHOR OF "SCIENCE AND HEALTH WITH KEY TO THE SCRIPTURES." MARY BAKER EDDY, DISCOVERER AND FOUNDER OF CHRISTIAN SCIENCE

This monthly Magazine is the official organ of The First Church of Christ, Scientist, in Boston, Massachusetts, and correctly represents the Christian Science Movement. It contains interesting discussions of the teaching and the practice of Christian Science, and in addition to dissertations, lectures, and contributed articles, publishes always a number of reports from cases of spiritual and physical healing, which practically illustrate the redemptive work of Christian Science.

TERMS OF SUBSCRIPTION: Single copy, one year, $2.00. Quantities TO ONE ADDRESS: ten or more, each, $1.90; twenty-five or more, each, $1.80; fifty or more, each, $1.60. These rates apply in the United States, Canada, Mexico, and Cuba. In all other countries add forty cents for postage on each subscription. Six months' subscriptions received at half the above rates. No subscriptions received for less than six months.

TERMS OF SALE: Postpaid to any address: Per copy, twenty cents. Quantities TO ONE ADDRESS: ten copies, $1.70; twenty-five copies, $4.00; fifty copies, $7.00; in the United States, Canada, Mexico, or Cuba. To all other countries, per copy, twenty-five cents. Quantities TO ONE ADDRESS: ten copies, $2.10; twenty-five copies, $5.00; fifty copies, $9.00.

BOUND VOLUMES: Current year and two years previous, cloth, $2.50; half calf or half morocco, $3.00. On earlier volumes write for prices.

THE CHRISTIAN SCIENCE MONITOR

Published every afternoon except Sunday

A daily newspaper for the home. Adequate news service. The various departments of a modern newspaper. Unique home forum page. Entire page of editorials dealing with the vital topics of the day. Contributions for the columns of the MONITOR should be addressed, Managing Editor, THE CHRISTIAN SCIENCE MONITOR.

SUBSCRIPTION PRICE: For the United States (except in the Boston Postal District), Canada, Mexico, and Cuba, $5.00 a year, $3.00 for six months; all other countries, $8.00 a year, $4.50 for six months, postpaid. When delivered by carrier through a local news-dealer, 12 cents a week payable to the news-dealer. In the Boston Postal District, by mail, $7.25 a year.

The Christian Science Quarterly

Published January, April, July, and October

Contains the Lesson-Sermons which are read at the Sunday Services throughout the year in all the Christian Science churches. These Lessons, which present citations from the Bible and "Science and Health with Key to the Scriptures," are valuable for daily study.

TERMS OF SUBSCRIPTION: For one year, 50 cents; fifty copies or more to one address, 50 cents yearly for each copy. Foreign subscriptions, 60 cents. Yearly subscriptions only received.

TERMS OF SALE: One or more copies, postage paid, each, 15 cents; fifty copies or more to one address, each 12½ cents, postage paid.

Der Herold der Christian Science

Published Monthly.

A magazine printed in German, which publishes original and translated articles bearing upon Christian Science, and also testimonies of healing from Germany and America. It contains about thirty-eight pages of such reading matter, also the Lesson-Sermons which are read at the Sunday services in all the Christian Science churches, and is valuable as an authorized representative of the movement.

SUBSCRIPTION PRICE: For the United States, Canada, Mexico, and Cuba, 10 cents a copy, $1.00 a year in advance; all other countries, 12 cents a copy, $1.25 a year, postpaid.

CHRISTIAN SCIENCE SENTINEL

(THE CHRISTIAN SCIENCE WEEKLY)

PUBLISHED EVERY SATURDAY BY

THE CHRISTIAN SCIENCE PUBLISHING SOCIETY

Falmouth and St. Paul Sts., Boston, Mass., U. S. A.

ARCHIBALD MCLELLAN, Editor.

JOHN B. WILLIS, ANNIE M. KNOTT,

Associate Editors.

SUBSCRIPTION PRICE

Single copy, one year, $2.00.

Ten copies or more to one address, one year, each copy, $1.90.

Twenty-five copies or more to one address, one year, each copy, $1.80.

Fifty copies or more to one address, one year, each copy, $1.50.

These rates apply in the United States, Canada, Mexico, and Cuba. In all other countries add 50 cents for postage on each subscription.

Six-months subscriptions received at half the above rates.

No subscription received for less than six months.

Subscriptions to the *Sentinel* will be entered to begin with the first of the month, and will include all issues for the month named as expiration date on the wrapper. The receipt of the periodical by the subscriber will be our acknowledgment of the subscription.

TERMS OF SALE

Five cents a copy, postpaid to any address in the United States, Canada, Mexico, and Cuba. In quantities to one address: twenty-five copies, $1.00; fifty copies, $1.80; one hundred copies, $3.00.

To all other countries, six cents a copy, postpaid to any address. In quantities to one address: twenty-five copies, $1.25; fifty copies, $2.30; one hundred copies, $4.00.

Bound Volumes: Current year and two years previous, cloth, $3.00; half calf or half morocco, $3.50. On earlier volumes write for prices.

Entered at the Boston, Mass., post-office as second-class mail matter.

ITEMS OF INTEREST.

National.

Six prominent men in widely different walks of life recently entered President Taft's private office in the White House, according to Chairman Ralph M. Easley of the executive council of the National Civic Federation. They were Secretary MacVeagh, John Mitchell, John Hays Hammond, Jeremiah W. Jenks, Samuel Gompers, and Mr. Easley himself. President Taft listened attentively to what Mr. MacVeagh, the spokesman, had to say, and said,—

"The securing of uniform legislation on different problems in all of our forty-six different states is one of the most important movements which can be undertaken at this time. With the present great development of this nation's industry, and with forty-six different states continually passing new laws on all sorts of important subjects, a uniformity in these laws is absolutely necessary. Either some plan for attaining such uniform legislation must be put into effect in the different states, or we shall have to have more centralization of power here in Washington. You have asked me to open a national conference on uniform legislation, to be held next January. I will gladly do so. Go right ahead and issue invitations to the governors of the forty-six different states, the presidents of the different law colleges and the different state bar associations, and push the plan along."

As a result of this statement by the President, a meeting of the executive committee of the National Civic Federation has been held in New York, and it was decided to hold a national conference to aid in the securing of uniform legislation on all different important questions now before the nation in every state in the Union. The conference will be called for Jan. 5, 6, and 7, in Washington, and will be presided over by President Taft.

The action of the sugar trust in compromising the thirty-million-dollar suit of the Pennsylvania Sugar Refining Company in New York on the basis of two million dollars cash and the return of several millions of collateral held against the Segal loan, has already renewed the demand for a criminal prosecution by the Government of the sugar trust for violation of the Sherman anti-trust law in its dealings with the Pennsylvania company. The desire of the sugar trust to compromise the case against it, rather than let it go to the jury, is regarded generally as tantamount to a confession of guilt under the Sherman law.

In the East Room of the White House, last week, President Taft presented to Wilbur and Orville Wright, the inventors, the gold medals awarded to them by the Aero Club of America to commemorate the invention of the first successful flying machine. To make the event of national interest the governors of various states sent laudatory messages congratulating the brothers on their success. These, together with the resolutions adopted by the numerous scientific organizations and letters written by prominent scientists have been put in book form and will be presented to the Wrights.

The balloon University City of St. Louis is the winner for distance of the national balloon contest, which started from Indianapolis June 5. The University City covered a distance of 382 miles, landing six miles south of Fort Payne, Ala. The balloon New York was second in the distance contest, landing two and one half miles south of Corinth, Miss., covering a distance of 355½ miles. The New York will be awarded the prize for the longest period in the air, being in flight thirty-five hours and ten minutes.

The board of engineers has reported to Congress that the proposed fourteen-foot waterway project from the lakes to the gulf, while feasible, is not desirable; that the waterway would cost $128,000,000 for construction, and $6,000,000 annually for maintenance. Present and prospective demands of commerce between Chicago and the gulf would be adequately served, the board reports, by a through nine-foot channel to the gulf. Estimates for these channels have not been completed, but are promised to Congress by next December.

International.

The Russian Douma has been prorogued by imperial order until Oct. 23. The results of the session include the passage of a number of important bills and an examination of the budget. The Douma has regulated peasant land-holdings through a bill providing for the dissolution of the communes, which is regarded as the most important work of the Stolypin administration. Other laws passed included the religious toleration bill and a bill to reform the judicial procedure, permitting an accused person the right of counsel at the preliminary investigation. Chief among the host of minor bills is one penalizing the "white slave" traffic.

The German government has decided that it is inexpedient to tax the "unearned increment" for imperial purposes, insomuch as there are seemingly insurmountable difficulties in the way of an equitable adjustment of the taxes on city and country values. But it approves as just the taxing of the unearned increment for local purposes, as is now being done in many municipalities.

Japanese imports from the United States in 1908 amounted in value to $30,000,000, being 17.8 per cent of all importations. The exports from Japan to the United States in the same year amounted in value to $61,000,000, being 32.2 per cent of the whole.

Emperor William and Czar Nicholas met aboard ship in Finnish waters on the 17th.

Industrial and Commercial.

A new system of illumination, based on the same principle as that generally used in railway car lighting, has been recently introduced in Germany under the name of "blue gas," says *Engineering Digest*. The gas is delivered in liquid form, in such shape that it may be used in closed rooms in hanging burners giving from fifty to one thousand candle-power. To use the gas, all that is necessary is to pour the liquid from the steel cylinders, in which it is delivered, into the gasometer. A cylinder containing twenty-two pounds of the gas costs about $2.86, and will supply a fifty-candle-power burner for 480 hours, so that this illuminant appears to be cheaper than petroleum. This "blue gas" can be used for heating and cooking as well as for forging, hardening, tempering, and other industrial processes. It is a hydrocarbon compound, free from carbon monoxid, and is not poisonous; its heating effect is three and one half times that of ordinary coal gas.

During the year 1908 the steam and electric railroads of the United States purchased more than 112,000,000 cross-ties, costing, at the point of purchase, over $56,000,000, or an average of about fifty cents per tie. Of the total number of ties purchased for all purposes, the steam roads took approximately ninety-four per cent, leaving about six per cent for the electric roads. The oak ties amounted to more than 48,000,000, or forty-three per cent of the total quantity purchased. Next to those ranked the southern yellow pines, with 21,500,000, or nineteen per cent of the total. Cedar and chestnut supplied more than 8,000,000 ties each, and Douglas fir nearly as much. About 4,000,000 tamarack ties were purchased, nearly 3,500,000 cypress ties, and in round numbers 3,000,000 each of western pine and hemlock. Redwood, white pine, lodge-pole pine, gum, beech, spruce, and several other woods were used in smaller quantities.

The new San Antonio-City of Mexico short line which E. H. Harriman and associates are arranging to build, will run in a direct line in fact as well as in name. The distance between the two terminal points by the route now roughly decided upon is approximately 680 miles. The shortest all-rail line between San Antonio and the City of Mexico now is 954 miles long. Aside from the fact that the new line will be, by about 274 miles, the shortest between San Antonio and the City of Mexico, it will be the primary factor in the development of an enormous scope of territory which is now far removed from railroad transportation facilities.

According to a writer in *Motor*, the momentum acquired by a car when traveling ninety miles an hour "would be capable of hurling the car bodily into the air a vertical distance of 272 feet, or, if the track on which the car was running took an upward incline of forty-five degrees for a few feet and then came to an end, the machine would make a jump of some 545 feet before alighting. In its flight it would clear the roof of a ten-story office building occupying a full city block, or it would leap over the average church steeple."

The board of directors of the New York, New Haven & Hartford Railroad Company have unanimously voted to restore the ten and five per cent cut in salaries of officers and employees, this restoration to take effect from July 1, 1909, and to apply to all below the rank of vice-president. The Boston & Maine recently took similar action.

Wyoming this year will produce forty million pounds of wool, for which the growers will receive $8,000,000 gross, according to conservative estimates from authoritative sources.

The new Queensboro cantilever bridge across the East river between New York and Brooklyn, which has just been opened, is said to be the largest bridge of this kind in the world.

CHRISTIAN SCIENCE SENTINEL

"WHAT I SAY UNTO YOU, I SAY UNTO ALL — WATCH" JESUS

THE PRICE OF LIBERTY.

WILLIS F. GROSS.

LIBERTY is the divine right of every man, and it is the prerogative of no one to do that which will either directly or indirectly interfere with or circumscribe the liberty of another. According to the Declaration of Independence, liberty is an inalienable right, bestowed upon man by his Maker. The recognition of the eternal truth expressed in this sentiment has been the inspiration of every effort looking to the liberation of humanity from the various forms and phases of evil that enslave and that seem to have power to enforce obedience.

The fact that liberty is a God-given right can profit but little if man is not in a position to exercise that right. Evil knows no law and acknowledges no right. Its sole purpose and aim is to enforce its own claim to power and reality. Mortals are oftentimes the innocent victims of evil and may unwittingly become the means by which evil is able to accomplish its purpose. So completely are they deceived at times that they are led to believe that what they say and do is in the service of God. They are blinded to the fact that injustice is done to others, and the rights of their fellow-men are trampled upon. The wrong that is done ignorantly may not make one a wilful sinner, but it is nevertheless the means of injuring others and in time it must react upon the wrong-doer, causing him to reap as he has sown.

If one would exercise his divine right to liberty, he must understand how to overcome the evils that hold him in bondage. The fact that liberty is man's right and that all the claims of evil are false claims, does not suffice; he must be able to prove the unreality of that which is opposed to God, good. Unless he is able to do this, he has not gained that understanding of the truth which makes free indeed. To know the truth is to be made free, and the measure of freedom that is enjoyed must always be proportionate to the individual's recognition of the truth. The Master made plain the way to freedom when he said, "Ye shall know the truth, and the truth shall make you free."

To gain the solution of all problems in human experience there must be, first, the recognition of a right and then the exercise of the power that will establish that right. It can never be truly said that evil is made to serve the purpose of good. Nothing less than the demonstration of good can determine the rights of man, and every effort to attain a right end by the use of wrong means must prove a failure. The right way is the scientific way, and results are sure. Mortals must earnestly seek the right way, and when they have found it, they must walk therein if they would gain that which is real and eternal.

That it is not right for man to be in bondage to sin all will admit. If it is not right it must be wrong, and whatever is wrong can be and should be corrected. It is not generally conceded that it is wrong for men to be in bondage to sickness and disease, hence it is not clearly seen that it is man's right to be free from these evils as well as from sin. Because human rights are not recognized, there is not that honest conscientious effort which is necessary to overcome that which robs and enslaves. Two things are necessary if we would enjoy the liberty of the sons of God. We must first recognize what are man's rights as the child of God, and then we must do whatever is called for in order to establish and maintain those rights. Failing in the first, one cannot perform the second; and though he discerns man's rights, if he fails to work out his salvation he does not escape the bondage of evil.

Christian Science is doing a twofold work. It causes one to see that freedom is man's heritage, and then it teaches him how to gain that freedom. First it presents a clear, logical, and consistent statement of cause and effect, and then it shows how the understanding of that which is true can be scientifically applied in the overcoming of whatever is false. God is infinite, He knows no limitation. It is always some form of evil that robs mankind of harmony, hence it is that good is the effectual remedy. The belief in evil—in its false claim to power and reality—is not to be ignored; it must be destroyed. When the understanding of Truth has overcome the false sense and made one free, he has the proof of God with him, but his work is not finished. He may rejoice in his freedom and give thanks to God, but this is not all that is necessary. He must watch. "Eternal vigilance is the price of liberty." The belief in all evil is not destroyed when the first victory over evil is gained. The man has discerned his right to liberty; he has also taken the second step and established that right. The next, and many times the greater work, is to maintain that right. He must watch, and be prepared to resist every effort of evil to take away that which has been gained.

Paul wrote to the Galatians, "Stand fast therefore in the liberty wherewith Christ hath made us free, and be not entangled again with the yoke of bondage;" and James declared that "whoso looketh into the perfect law of liberty, and continueth therein, he being not a forgetful hearer, but a doer of the work, this man shall be blessed in his deed." He whose mission it was "to proclaim liberty to the captives" said, "And what I say unto you I say unto all, Watch."

When Truth is understood, the overcoming of evil is no difficult task if the student is watchful and becomes not weary in well-doing. He who would gain liberty and continue to enjoy its possession must pay the price thereof. In reality it is a free gift; as one of our hymns expresses it,—

> God made all His creatures free;
> Life itself is liberty;

but on the other hand a mortal must go and sell all that he has if he would gain it. He must work. He must be active in good or he may become the victim of the supposed activity of evil. When the Master sent out his twelve disciples he said to them, "Behold, I send you forth as sheep in the midst of wolves: be ye therefore wise as

serpents, and harmless as doves." Christian Science teaches us how to do this, and the wise Christian Scientist is sober and vigilant. Because he appreciates his liberty, he is ever ready to defend himself against the workers of iniquity. He has learned that the belief in evil is not something to be feared, for it has neither intelligence, power, nor reality; but mortals seem to be in bondage thereto, until its nothingness is demonstrated. The Master's last words to his disciples were a promise that to those who should believe on him power would be given whereby they should be able to cast out devils, handle serpents unharmed, and heal the sick.

The student of Christian Science is shown the necessity of overcoming all forms of evil. From experience he learns that the most effective way of doing this is to silence the first suggestion of error. No form of evil can be indulged with safety even for a moment, for it seems to increase in power and influence with amazing rapidity. The only safe course is to take a firm stand for Truth and under no circumstances to yield one's position. To admit the reality of evil is to be in bondage thereto, hence it is required of every man that he prove the unreality of all that opposes itself to God. A man is not saved from evil through his ignorance of evil. The understanding of good must be gained, and this understanding must be proved effectual in overcoming evil. The first step in the destruction of evil may be the uncovering of its means and methods. This uncovering is not the uncovering of something but the bringing to light of an error of belief which claims to be something. If the belief in evil is seen as something, it is not really uncovered; the mask is not removed and the error is not seen as it is. Not until error is seen in the true light can it be said that a man is saved therefrom. The awakened spiritual consciousness destroys the fear of evil.

It has been said of mortal man that he "is born unto trouble, as the sparks fly upward," but this can never be said of the man who was made to reflect God's image and likeness. If it seems the easy and natural thing to drift with the current of mortal, material belief, this seeming must be overcome by a conscious effort in the opposite direction. This effort must not be spasmodic. If it is, all that was gained during the period of activity may be lost through inaction. It is impossible to stand still; there is either progression or retrogression. Progression means a greater degree of freedom, while retrogression means a return to bondage. At times one's advancement may be almost if not quite imperceptible, but if there is conscious activity in good there is progress. On the other hand, the unfortunate one who is drifting can scarcely realize it at first. A single step in the wrong direction is quickly and easily retraced if the mistake is recognized and the effort is made to correct it, but when one has wandered far from the right path or has lost much ground, the return is not so easy. If the first effort of error to gain a footing were always recognized, it could easily be thwarted, hence the need of watching. Watchfulness is not the result of fear, neither is it occasioned thereby; it is inspired by wisdom, and true wisdom recognizes the presence and power of the "perfect love" which casteth out fear.

Some one has said that obedience to law is liberty. Obedience does not include a single element of disobedience, either ignorant or otherwise. If one would be obedient to divine law, and thus realize the liberty which is the natural result of this obedience, he must see to it that he does not become the victim of evil in any of its forms. We repeat that evil knows no law and acknowledges no right. Because it is "not subject to the law of God, neither indeed can be," the belief in evil must be deprived of its seeming power. So long as evil seems to have power, humanity is in belief subject thereto; hence the necessity of overcoming the false sense. It cannot be ignored; it must be destroyed.

The labor and sacrifice that is necessary to overcome error, in whatever form it may appear, is the price of liberty, and only those who are willing to pay the price can rejoice in its possession. If obedience to divine law is liberty, then that which would require obedience to some other so-called law, or would in any way cause one to disobey the law of God, is an evil; and all evil must give place to the consciousness of good. A mere belief in good is not sufficient to overcome evil. The belief in evil is so firmly fixed in human consciousness that nothing less than the scientific understanding of the presence and power of infinite good can root it out. This understanding is gained in Christian Science, and the wise student of this Science realizes that he must be faithful in the demonstration of the allness of good and the nothingness of evil. Says our Leader, in "Miscellaneous Writings," p. 117: "The student of Christian Science must first separate the tares from the wheat; discern between the thought, motive, and act superinduced by the wrong motive or the true—the God-given intent and volition—arrest the former, and obey the latter. This will place him on the safe side of practice." According to the measure of his spiritual understanding and fidelity the earnest seeker for Truth is being "delivered from the bondage of corruption into the glorious liberty of the children of God."

THE NATURE OF DEITY.

J. V. DITTEMORE.

THE Christian Scientist cannot accept the time-honored belief that God is a corporeal personality. His religious experience has convinced him that only as he realizes the omnipotence, omniscience, and omnipresence of Deity—qualities which cannot be personalized or confined within a finite form—is he able to bring into his daily life, in some measure, those definite and satisfying experiences or "signs" which the Master promised should be the heritage of those disciples of all ages who believed in, or understood, the Principle of his teachings.

Throughout all time mortals have been idolaters. It has made little difference whether they have worshiped images of iron and stone, or images conceived by the human mind and held in thought as enlarged concepts of mortal and finite personality. The results in either case have been to materialize worship and to disinherit mankind through failure to worship the Father "in spirit and in truth." When we pray to an anthropomorphic God, our concept of Him confirms the belief that His judgment will be based on and influenced by a human sense of justice and of penalty, instead of by divine, unvarying law, and we expect our relief to come through pardon instead of through increased spiritual understanding.

Not through petition and pardon, but through knowing the truth, as declared by the great Nazarene, are mortals to be made free from the sin, disease, and woe of human experience. This "knowing the truth" is the prayer of Christian Science, and it comprises the answer as well as the prayer. On pages 3 and 11 of Science and Health, Mrs. Eddy has written: "Who would stand before a blackboard, and pray the principle of mathematics to solve the problem? The rule is already established, and it is our task to work out the solution. . . . His [God's] work is done, and we have only to avail ourselves of God's rule in order to receive His blessing, which enables us to work out our own salvation." "Petitions bring to mortals only the results of mortals' own faith."

The Master declared that "God is a Spirit." Christian Science reaffirms this definition and accepts an additional synonym, declaring Him to be infinite, divine Mind, the

Digitized by Google

supreme creative and governing Principle of the universe. From this premise it must follow that real existence is spiritual and permanent, while our present material sense of existence, with all the evil and suffering it includes, is of that heaven and earth which shall pass away. God is infinite Truth and intelligence; therefore the normal man, governed wholly by his creator, can express only that which is true.

Human experience, with its changing theories and self-imposed penalties, defrauds the race through the belief that a manlike God, located in a place called heaven, is sending disease and suffering on His helpless children for some inscrutable but wise purpose. Christian Science utterly repudiates such a scheme. It declares that the kingdom of heaven is not afar off, but is wherever Truth abides, even within the consciousness of all who abide "under the shadow of the Almighty." The "spiritual intuitions" of prophet and apostle were indeed the words of God, the "angels" which Christian Science shows us are entertained unawares by all who rise above the strife and contention of creed and dogma into the peace, joy, and righteousness which come through having but one God, good, and loving our neighbor as ourself.

CHRISTIAN SCIENCE IN EMERGENCIES.

MARTHA V. A. BARRY.

THERE is never a dreaded business emergency which Christian Science cannot at once rob of its worst aspect. The thought that God is ever accessible and a "very present help," quiets the commotion, and in the ensuing calm it is comparatively easy to decide what is the most important matter, and arrange the rest of the problem in line with it. The solution then becomes easy, the problem is quickly worked out, and with no fear that anything will go wrong, the incident is satisfactorily closed.

The recent experiences of two friends show very plainly the immense help which Christian Science is in the emergencies of business life. One friend was called upon to arrange, compare, and correct—with great rapidity and under considerable strain—a number of valuable papers, and by holding firmly to the thought that God's child always does the right thing at the right time, the business was successfully terminated without one mistake. The other friend lost a package of papers containing full details of an important case, and as publicity was the one thing to be guarded against, he was quite perplexed and alarmed. At first it seemed as if the only way to recover the papers was to advertise their loss, and yet to acknowledge their value might be disastrous to the issue at stake. After realizing Mind's omnipotent care of all things, no further fear was felt, and within an hour a stranger called at the house with the package of papers, unopened, although it had been found and taken home by a member of the family of the very person against whom the records were filed.
